

289th Knowledge Seekers Workshop - Thursday, August 15 2019 (,)

(:07). ... In the coming weeks we'll show the technologies that will complete the knowledge. ... using the fields of the U hopefully to interact with our MaGrav Systems to complete the knowledge, and this will bring a lot of unity from different forces to complete the knowledge that mankind will move away from matter state. You will understand this very soon as we develop and progress into the new T. ... these are workshops for the world leaders for the governments to understand what is to come to them. There will be translations from English to different language, (:10). simultaneous translations. .. to understand the change of the course, the change of knowledge, the achievement in the world of knowledge. Many of you always looked at the Gans's but you never understood the world of the Gans's. You always looked that you might get something out of it somewhere but up to now none of you have gone into the next step. Some people speak of the different ?? direction of the M field but none of the works of the K Seekers have brought the dynamic PI into the condition of M or G. I hear a lot of people, a presentation last week talking about scalar waves and all of that, but in reality this doesn't scratch the surface. ?? is another dimension. But what happens to ?? what is the next step in the knowledge, to understand the totality of the M fields of the U, not just to what we were used to. We were limited to understanding magnets, for centuries we played with magnets, now we have to understand that being M fields they can only show themselves in respect to the environment ?? they created and in interaction with universal M field forces. (:12). Fe would not be magnetic on this planet if it was not due to the combination of the field forces from the center of the U to the point of the manifestation of the physicality of the man. This is what has been missing in the totality of the knowledge. We always looked at what system we create, what energies we create, what Gans field we do, but now with the new T going into the dimension of international, what we call universal field forces, these field forces count drastically. This is one of the reasons many K Seekers up to now, 99 or 100% of you have not managed to achieve continuous, maybe some random flight because you have never considered MG field forces of the environment. In my first presentation nearly 11 years ago this is what I showed in very simple language to the American NASA scientists ... This is what we have not considered, (he shows 1 magnet pulling another to itself, flying). This is what is missing and what in fact most of you K Seekers have not understood, why am I not taking off, why my system doesn't work. When I showed this to NASA the first time the head of NASA stood and said the game of space T has changed, he has changed it. It's very simple. (:14). We always created the M field but we never considered the strength of the field of the U, the environmental field forces, and this is what we talk about from now on. Because it's like clapping with 1 hand, you need 2 hands to clap. We only considered the MG field of the systems we created, we never considered universal, solar, planetary M fields because it has been eluding us. We never understood how it is. Mainly because we never understood how the MG fields inside the system work. We always looked at what comes out, we never looked at what comes in (universal fields), and without it we can't do, without it, it is non-existent. Even if you look at the height of the man it is dictated by the MG field of the soul of physicality and the dimension fo the fields of the bone structure, which itself is another dimension (draws a line to the universal fields), because it's this which allows you what fields you can absorb that it can feed both (STM and STP). I was told by a group of ... do not speak about the soul, because some people don't like it, do not come on, because it means you haven't learned. If the religious groups or pressure groups think that

teaching of the soul is opening of the man to reality, you have to go back to Vatican and other places and put your books right. It has nothing to do with the reality of the knowledge, the truth of the knowledge. As we heard very recently, (:16). the Vatican has said, 'Christ will never come back', I wonder when they decide .. who decides when the Christ comes back. Now He is not real because the knowledge is real how and where the STM is. We have to understand, Christ He will come back, He'll be here forever and it is not decided by Vatican. Because they never understood the reality of the facts that the STM is connected through its dimension through the fields of the U. This is what we have to understand and what up to now we have ignored. Where does our dream come from, where do we ?? leave during our dreams, in which strength does our soul travel to meet, to work, and it's not ot meet other souls, because in the free dimension of its existence it travels the physical dimension of the U. Mankind has never been aware of this, because we dream about the pub we went to, going to a restaurant, and what we see, but we are not aware of the reality of our existence, of our soul which travels the dimensions of the real boundaries of the U. Our physical dream is connected to the physical boundary, our soul travels beyond. This is where mankind will soon have a big conflict with himself and those who sit in the seat of religion will try to use it, to abuse it, to carry on with abuse. This is the job of these teachings for you to understand in all dimensions, (:18). in the matter state through the work of the heart of the man we see the physical dimension but through the work of our soul, which is the freedom itself, is another dimension, and what we see, most of this is interconnected with the fields of the U. To what extent it can fly and extend itself in the dimension of motion. From now on, what is real to us, we have to go to the next step. This step is very simple, do you want to fly, communicate, travel the span of the U, then consider the fields of the U, we have to, because they are the rivers of M fields which can give you Zero time travel if you get into the fast flow. Going back to the original teachings, the MG fields of the 2 planets, like the earth and the sun, interact, but these fields themselves are forced and favored with other fields in the U. These fields link up in all directions and mankind from now on has to see. This is something that in the new systems which we'll reveal at the conferences and workshops you will see ?? (:20). considering the universal field forces, considering the presentation of what reaction will bring the physical dimension and what reaction will allow the STM. The new systems that are going to be developed by mainly K Seekers through the work of the governments will be understanding this process. We'll bring you into the meetings and conferences for you to be able to explain to the diplomats and scientists from outside the KF, where the game comes in. When you create MG field forces in your systems as many of you have done, as I said before, you'll see different layers, and these layers, for example, you see the Cu, then the water line, then you see the reality of the field forces of the U. Up to now you looked at what this was (outer layer), but now you have to see how this (inner circle) connects to the universal field forces. If you understand this in a simple language, this (inner circle) is the STM in no dimension because there is nothing in it, and this (outer circle) field creates physicality of the system. (:22). There is no difference in putting a dynamic system and man next to each other, both carry the same attributes. It's just the man who doesn't understand. From now on when we speak about the dimension of the travel in the universal dimension we are talking about what fields are created here (inner circle). (They are) invisible but we have to trust because this (I C) is more powerful then this (O C) and the IC is connected to the universal links. This (Inner Circle) you can't create in your systems, it is the outcome of what you create from the physical matter condition. This (IC) is what we call when the egg and the sperm got together, this (IC) is what creates the control of the U. this part (OC) is the

physical part or what we call the operations of the fields of the matter state. This part (IC) is what we call operation or the STM in the universal line of connection. This is the part that we start concentrating to understand, because you can't create it without understanding how physically it was created, and then with this we tap into universal fields and ?? Not with dynamic ?? balls. Many of you will have a problem with this transition. Now we can go a step further and literally strip what (:24). we call the MG field of let's say the Gans of the Cu and ?? its water away. How does it happen, how does it work? If you understand your dreams when you go to dreamland, when you pass certain level of, lack of the fields forces to contain plasma, your soul flies, you go for a dream, you go outside ?? and communicate. One of the first principles that from now on the K Seekers need to understand is how to work and be able to replicate what the body of the man does. In the body the blood flows and contains the soul as your blood rhythm, and blood pressure, and heartbeat changes this thing (blood containment) fades away and the soul is free. This is where you travel in the dimensions with interaction of the fields of the U in the spans of the U. Now the problem and the teaching for the K Seekers is this, how will we change this process (erases the physical outer shell of reactor). And still ?? before hand we keep the line ?? of connection (to the U fields), direction of motion and interaction. (:26). We have entered the next phase of the teachings and now you understand why for the past year I was teaching about the soul of the system. If you put a man in front of it, or a flight system, or anything you like, the reality doesn't change. The reality is interaction of the fields without containment and this is where the change comes. This is where many of you will have failed, and in many ways you also will have betrayed, will understand that you are engaged and engaged. This is part in what we call the Free Plasma in the center of the your system, you call the spark in the center of your physical body, and what is called the black hole in the U. There is no difference. There is no tangibility to it but in fact it has the essence of the origin where the field comes. Those who tell me that I can't teach about the soul, it means you haven't even understood the principle of the flight in the U. You need to travel, not in the physical dimension, but you need to travel with the field forces without containment, the free bird of the U. Now what would you like to ?? call it. This will be the essence of the teaching, (:28). and what we will show in the new dimension. In most of the work we will show the effect of it because that is the only way we can show its manifestation. This is where we bring the change in. Then as you saw in the Chinese system if you want to collect rain, I give you rain, medicine the I give you medicine, if you want to see your uncle then I show you your uncle. And if you are so keen for Christ to say, I am here that no one shall say that you shall not return, we'll show you the face of Christ. You can understand conversion of the fields of the U to matter, and conversion of the fields of the U to plasma of the existence. then the question comes how can we create this that we can jump from what we have in the dynamic systems with a little ?? thing in the middle, that the little bit in the middle becomes without the ?? (containment). Then we progress to the next step. As I said the last time, (:30). we are nearing to our ultimate to come, but when you understand the work of this (FP) you still have just started the first step in the path to universal communication, travel and anything else which you could not dream, because now there is no containment. Now if you understood the work of your soul, or what you call your imagination and thoughts, now interacts. No physical body and no containment, and you have to understand that when you work in this dimension something very strange happens for those who are not happy with a lot of things, and one of these is, 'all the roads end up in Rome,' if you understand this as a STM you connect to the universal field, ?? motion, and all of these end up in the soul of the Creator. Would you like to go physically to Rome to see the

one who says He will not come, or would you like to go through the dimension of your own existence, and meet the man. With this we will have a lot of conflicts. This is how to change the physical jacket which will create a lot of problems for those of you who have abused. (:32). Then it comes to one conclusion or one point, this is the soul of your system, and as I just said a few minutes ago this is your ?? , how do you tantalizing with a lot of understanding will bring this (FP) out of the system that you only deal with him. Then how do you play with the system that you can put it (FP) back in its place where you want it. This should not be strange to the man, when you go to sleep and you let the ?? open and this is the time when we wake up and what we call engage the STM in the dimension of physicality. We copied the motion of the U, we copied the bird and managed to fly, we copied the work of the fields of the U we managed to create motion and some fields, and now man needs to learn this (soul to leave body and come back). This can't be done without understanding the totality of the interaction of the fields of the U, then the STM is freed and can manifest itself in any dimension. (:34). Those of you who have managed to go 1 step beyond the present physical teaching, some of you I have seen in your talks explain it but you do not understand it. Dr. Azar is very much ?? able but she can't understand how. She is one of those who is very much involved in this transition point but she doesn't see how to get out of it. How to allow the physical dimension ?? the soul is getting ?? in communication, but you have to understand that the STM has to be in tune and in balance with the work of the U before this is freed (from the physicality) before you can take even a system that can transport and transmute the energies of the free fields of the U. How to what extent do we follow, do we draw a parallel line or do we start with a snapshot and see what it fits, are we at the right strength, is this where I want to go and then deciding which way you want this guy (FP) to go. The knowledge is the knowledge of the U, (:36). the knowledge of creation and it's how everything is moved. I tried to teach this for the past year for man to understand not to cover the religious aspects, because religions do not exist, they're the confinements of the thoughts of the man to the conformity of the ?? ??? So in reality where does it fit? How do you transfer be it your system, spaceship, your soul, that it can travel the spans of the U. How do we get rid of, how do we overcome the physical dimension. As I have said many times, I am ashamed to be in the body of the man, that the soul is free to ?? U. Now how do you as K Seekers take this step to move to the next level. How do you extend your knowledge to understand that it is you who has entangled itself in this process and not the U. Then one thing is left, for many of the K Seekers in the coming time, understand the work of ?? my ?? free dimension, understand the interaction of the fields of the U. How you are, interact. (:38). How can you get rid of that cage? Many times in the teaching of past years I have explained that you will not see the reactor if you manage to expand the fields of your system beyond the planet (boundary), then you have made the dimensional connection. The question comes that if there is such a process is there a face and a dimension for the totality of the soul of the U. Does the Creator have a physical dimension to manifest Itself, and what does Itself manifest into to confirm its existence. Or is it in reality the totality? I made man in the image of Myself. When you look into the internal field forces it works different then the field forces from outside. (:40). And this is the part that up to now none of you K Seekers have understood the work of. In the matter state which is the dimension of field flow. In the dimension of free energy transfer with no dimension it's the totality of the fields in one dimension. Because one is part of the other, one is built from the other, and one exists within the fields of the other. So we are part of the Creator and the Creator is part of us. In the matter state you have ??? that you exist, in the dimension of creation, the true creation is the dimension of inclusivity, when you

are inside you are part of, you don't need to be linked to, to be linked of, ??? or trying to achieve to the point that you can gain from the other dimension bigger than you, but it's not ?? you are inside it, it's you who gives life to It, and it's It that gives life to you. For many of the K Seekers and the man on this planet this transition will be extremely hard. Then you'll understand why, I made man in the image of Myself. We are getting to the final points of the teaching on the matter state of the human understanding. Once we enter into the dimension of the Universal Fields Forces, (:42). game end. Very much different. As the Chinese say we turn everything inside down, and upside down knowledge. And this is where the point is. Where we are not confined by the matter state, but we decide by the interaction of the fields of our life where the matter state appears and how we manifest ourselves, because now we understand the position and transmutation of the field forces of the U and conversion to the matter state at the point of manifestation. Many of you will start testing and many of you will find out the first guinea pigs of these tests is one thing, and surely will not be your ?? physical. When you manage to free your systems which you built with Gans's or whatever, you'll find out it doesn't matter if I put Cu, Zn or anything else, This (FP) will not change. So it doesn't matter if you are black, white, yellow, short, you eat McDonalds or you eat Chinese, your soul strength is the same, it is independent of the consumption of the physicality. So shall be the STM. And so in the dimension of understanding your reactors will not count. (:44). Then those of you who perceive the next step of understanding, you'll understand one thing, which has not been achieved on this planet. A number of you in the dimension of your soul will interact with the dimension for the free energies of the U and very much, you'll become satellites to enlighten the totality of the soul of all beings on this planet. (He draws the 4 connecting around the globe.) Those of you who attend the conferences will understand these and become part of it. That's why many of you don't even dare to come because your soul is aware of your misconduct. Do you remember what I explained when you create the spaceship, many of you will walk away because this is ??? . There is no more punishment as you punish yourself with your own misconduct. The position to enter, to be able to travel the spans of the U and the Unicoise is to be in totality understanding the full field forces of the U without containment, and this is very difficult for the physical man, extremely difficult, because in everything he has seen is ?? for confirmation, (:46). and everything he has seen is for the confirmation (of physicality) and everything he has tasted it and smelt it (all confirms the physicality). Now how am I going to taste, see, understand and trust in, that what I see is the dimension of the U. There is no physicality to it unless I want to make it to (be), in the dimension and the strength which suits me and evolves in the dimension of my soul. I have been saying ?? how do we get this cat out of the bag? Once we get this cat out of the bag, how do we get it back in, to confirm there is a bag with a hole. Those who say we shall not return, it doesn't exist. They are explaining what is about to happen to them. It's the fear they have, but they put it in the name of the others. When you deny what created you, then you do not exist. And when they deny the One who brought you, for you to carry on that you can confirm and carry on with your abuse, you have in reality finished the process of life for yourself. (:48). And I think with what has been said, it's time to show one of the cornerstone strengths of our work and keep to our promise which I made years ago, and they walked into it themselves. We'll return the stones back to the coliseum that man will not abuse anybody (anymore). The only thing is, the true followers of the soul, of those who promised, will take control of their promise. The change of the position is real and in time, a very short time, you'll see the effect of it. In some of the workshops we'll allow you to see this (what he drew on board), this ?? image will become a reality of the

physicality, because your physical dimension knows the secret of both and then you'll ?? recognize (it). You have to understand the levels of the dimensions and strengths of the work of the U, and that is, you started with the matter and we brought you to energy, (:50). then to free fields, and with the free fields you have the freedom of the work of the U to show yourself at any level you like. This is how you become part of the U Community, because it's you who makes that communion. Would you like to be the soul of the fly on the wall to hear what he has planned, or do you need to be the soul to hear the voice of the universal souls. You don't need to sit to hear the whispers of the voice of the man, you sit within the STM before he whispers. Now you understand in truth why we even introduced you to a spaceship and a Star Formation. (:52). What does this mean and what does it do? If you understood the work of this system, it means by interaction of the fields of these (3 base) you can withdraw and extend and free any of these souls in the dimension of physicality, nonexistence but in the dimension of freedom of the soul. Now you understand the new meaning in the structure of the universal flight systems. If you go back to the original teachings of years ago we always spoke about the FP, now you understand what that FP means, it's the soul of the system with the dimension of physicality which can tune into the fields of the U. In a way we ?? get collective dimension of the beautiful life of your systems, and then we transfer it. Those of you who have been at the KF and worked in the Insano or Barletta now you understand why and how you can move the soul of the system into any dimension. (:54). What you are left with is ?? 3 balls, it's you who has managed to bring the fields of the soul outside. Those of you who move into the free flow fields of the U will come to this very easily and then by understanding this and going back to many of the teachings you'll understand how to free your souls through control of the non-physical dimension of the physical body of the man, and then, good-bye to the dimension of the physicality. This has been the whole cornerstone of the teachings for the past 10 - 20 years. Existence without physical dimension, and if you go back through the teachings step by step, nothing has changed in the pattern of the teachings it's just that you could not see. How many ways do you want me to show you that I show you and you'll believe. You took your flight system (:56). and, my teaching has been continuously exactly the same. Nothing has changed, but if you haven't seen then you don't understand it but it's the same, call it a SF or a dynamic system, coil windings, call it whatever you follow the teachings it's exactly the same ?? I am trying to show you (how) to free the soul, the energy center free from the tangibility, and imprisonment, and confinement of the physical matter. If you look at it in reality, it happens on the birth of the man when the egg and the sperm come together they lead to creation of the soul, if that soul can free itself from the dimension of physicality at birth, the child is free. If the dimension of physicality cannot contain itself ?? it leads, because of field forces of the environment existence, to multiplication and creation of the physicality. We didn't bring these 2 (egg and sperm) together to make another prison, but man through the dimension of the physical life of this planet has made himself that prison, called the body of the man. If you understand this you are one step closer to understanding the creation. (:58). If not you've got a long way coming. The problem is we have at this moment, even problems to measure 1 Tesla in the strength of the magnetic fields which is much stronger than even the fields of the U, how could we tap into it. You have to remember in the work of the U, in the matter state field strength ?? counts, in a plasma in the free dimension of the fields, ?? equality, there is a bigger game. We call it in the physical dimension of the life of the man, love affair. But man never understood the true love affair in the work of the STM. We don't give we become equal to the ?? (come close to) state. Then we can travel together in the dimension of the

creation of the ?? light in the U. Now you understand where a lot of teachings have been going on for years for you to step by step to move on the ladder to understand the work of the U. I think as a teacher I have taught you that and many of you are ready to go for the test drive. (1:00). I ?? those who betrayed me will understand when it's time. You have to realize and understand that the universal field forces, galaxies field forces, Solar and planetary field forces, and the condition of matter field forces, before you can understand the field forces of the U. That you can connect to anyone at your will. Because now this has no cage to confine it. This is the plan when you find no attachments and no reason to be connected to this dimension of physical life, (1:02). of this planet. It's within the STM that it decides how and which one it wants to connect with. Now there is no mystery and nothing hidden for man to be able to decide by itself which way, how and where, and which point in the universal condition it wants to manifest itself. Your problem up to now has been how to open the cage, but I explained to you in the teachings how ??? you release that cage, open a certain amount ?? dimension, which means your physical dimension still decides on how much of it you are going to travel in. But there is one beauty with it, the higher the further, the lower the field strength. (1:04). Then ?? you are becomes the total detachment, which means you don't carry anything with you, you are naked so you can fly with the birds of the U. If you go back in the Chinese flight system we clearly showed this, but most of you didn't understand. In the system control of the Chinese flight system you saw ?? flying cores, why? Because if you look at it, this continuously move condition, but it's the center soul which dictates the fields that it follows. At this point we create the physical dimension of water, or at this point gold. It doesn't matter ?? whether you rotate. It doesn't matter where you rotate yourself at what position we will take the shape in respect to the STM in the dimension of the existence, in the soul level and not the physical matter state. Those of you who made the systems, go back and now understand the system. (1:06). We have devised many systems and many technologies how to take the soul or to be able to control the soul, or what we call the center within the dimension of the physicality. In all your reactors. ?? be aware of it. How to confine it with the field forces and not matter state. And the only way you'll do that if you understand the field forces of the U, environment, Earth, and the rest, then you'll proceed and you can succeed, then we'll enter a new dimension. Up to now you worked along with you're motors, now you have to understand what was the purpose, (which was) to open the cage and free the soul of the system, the center ?? Then you are a free bird and not many men have seen the birds of the U. I think the first man who saw the ??? space are K Seekers like Rick Crammon and the others want to go back to the board and see what ??? missed. That the creation of this, I did not manage to create my soul but from it I gathered the knowledge of the U. Do not need to attend with the K Seekers. (1:08). Now you understand how we have developed and kept things in so many ways out of the imagination of the physical dimension of the man. The reality is where you stand and what are you looking at. the system that rotates and create the dimension of the soul in interaction of different fields, exactly as the same as the womb of the mother or do I nourish it for 50 or 80 years and then let it go to be free. Or I decide through the understanding and the language of the confirmation fo the existence of the STM where I want to go, as my soul has access to the whole knowledge without the need for the dimension of physicality. Some people call it enlightenment, and some call it the knowledge from the Creator, but in fact creation is created through ?? light by interaction of the fields fo the Creator with the souls ?? of this ?? dimension of the physical man, but it's with the soul and not the physicality of the man. Rick I think you have to go back to the (drawing) board and pull this guy out (the FP out of the reactor).

(1:10). If you had a chance to listen or go forward from the teachings of last week, I gave you a lot of hints, do you remember the Stonehenge. I keep on giving you directions and dimensions but KF K Seekers are focused on one thing, (a spaceship) that he can fly. Do you want another prison, you are quite welcome but it's not for me to put you in another prison. I teach you the freedom of the U, which you can ?? the man. Why do you want to confine yourself to the physical body of the man, into the physical dimension of the planet, and then another prison you call it a UFO but why don't you take the trip and join me in traveling the spans of the U. You have all the knowledge, you are not short of anything, it's just lack of confidence and understanding of the totality. That's your problem.

Any questions?

(1:12). I have a question for you Mr. Rick Crammon, what are you going to do with the new dilemma with your system? Rick says, I couldn't understand the teaching today because the sound was so muffled I missed a lot of key words, I just couldn't follow along. I am not sure what you are speaking of, I missed that part of the teaching. Ah, so you mean your soul wasn't ready to hear? R - Not ready to hear (frustrated), I am having to put on my soul ears today ... I have just given up on the sound system, it's just so unprofessional that I am embarrassed somewhat, that we are just so disrespectful of your voice Mr. Keshe. So I am very sorry I wasn't able to hear. Mr. K says, we get it very clear on our side. R - Not the broadcast, it's very muffled and the microphone is rubbing against your suit and we hear a lot of breathing, muffled words that we can't hear, especially when you get close to the screen ... (1:14). A lot of issues to work out. (Rick's voice changes) I hear the muffles, .. it's us and not blame it on God, we need to support you. I have been saying this for 5 years, we need to support you better with a professional system, that is clear instead of the really crappy video that we have right now and really bad audio. It's going to have to change or I am going to have to quit because I can't take it any more. Mr. K says, okay, that's good. In so many ways we still go back to what we are saying within our teaching. In trying to go back to developing the STM, and there is always problem in the physicality within each dimension. So does anybody have any question except, bad voice?

Q: Could you expand on what you termed as M rivers, are you talking about wormholes, yeah? No, you have no worms or holes. Could you expand a little more on M rivers please? (1:16). The process of M fields is very simple. The fields of the U start in the center, and they have do to the dimension of rotation, has a field flow which gradually as it opens up, it gradually becomes straight fields, at the edges of the U. In this process the field flows in interaction with the next set, as it expands create new fields, and these fields interact and create new fields, and these have very much direct connection with the center, continuously, and these become what we call the rivers. The channels of the fields which are enforced by other fields for them to exist. If you look at it in a different picture, we have the earth, the solar systems and galaxies, each one of these exerts different field forces in direction of motion of these, and from different planetary systems or different galaxies, (1:18). or different universes these field forces are different strengths and run parallel to each other. The beauty of it is, in this process, I lays against the others (they go in opposite directions). When you decide and you extend the knowledge and you go further, if you decide to go on this one, or this one, or this one according to the strength, this guy goes that way .. do I want to travel with a higher or lower speed G or M. Then you'll see between the moon and earth, sun and earth, solar systems and galaxies, you have the same proposition. We have to

understand which level they work, which strength we want. There are conditions that you get bending in the fields according to the other fields, (1:20). but in general the field will follow the ?? flow. If you cross it (M river) you'll understand the consequences of it. Usually this (river) has a beginning and an end. Which way do you want to end or you can travel to a point and you can come off and move into another one. This is the knowledge that the man has to gain in the coming time. Q: How does the pulse, the universal heartbeat fit into what you have just drawn? very easy. What is a heartbeat, what do you explain as a heartbeat, what does it create. Q: Is the interaction where you got your 3 lines there, it's dynamic, you got 2 going in one direction and 1 going in the opposite direction, it's the interaction between the 2 of them, isn't it? (1:22). The heartbeat is ... it creates that, so it can't be? Try to explain, maybe you understand. Q: I am not ready for this, I am sorry? So repeat what you said, maybe.. Q: The heartbeat is the interaction between those 3 lines, but then that leaves me in a position where I am saying that these 3 lines were there before the heartbeat, but it doesn't work like that, they come from the heartbeat, from the universal heartbeat, U sun, those are the rays, it's a pulsation, expansion and contraction, I can't .. Try to expand on it. Q: I am not ready to do that at the moment. Oh, you are very ready to do that, just carry on. (pause). Q: I can't talk and.. (1:24). No problem. What is important is that each field, to be able to move within its own environment, fields come and interact and interconnect with fields which are next to them and in that response fields need to find a space gap, create that space gap that they can travel through. The balance between the space gaps that they need creates the heartbeat, the separation, attraction and repulsion. What is a heartbeat? How do we explain a heartbeat, how do we extend to understand. Even the moon, earth, galaxy, and U have a heartbeat. So what we call a heartbeat in the position of G and M fields, in balance with each other. There is no other explanation for it. ?? the 2 extremes, where 1 field gives and where the other fields take. Why is the heartbeat an essential part in the motion of the M fields in the dimension of the Pl. Why do we extend it to this level? (1:26). It's something in which we need to understand and we need to expand on. This is part of the knowledge which is missing for, and we keep on repeating and going back on it. Why does the change of the heartbeat cause the demise of the man? Why when you go to a Chinese medicine doctor the first thing he measures is the beat of your heart, in respect to the other organs in your body. Is the Chinese medicine and the Chinese understanding of what we call Yin and Yang and Taoism and the rest of it, that it brings a new dimension that us in the Western world and the world of science has not understood. What is the cause of the heartbeat, it's not just the exclusivity of us animals, trees have a heartbeat, the U has a heartbeat, we know the heartbeat of the sun, earth, and solar system. Why have we been so passive about this when it is one of the cornerstones of life of the Pl world, world of dimension of motion without physical dimension. to what extent have we missed the essence of creation, how do we maintain that elusive part, that by maintaining it, (1:28). we can create powers, you can cause barriers ?? , we can open the compartment of the body of the man. This is the part that none of the K Seekers have ever looked at. What leads to the creation of the heartbeat, why do we have the heart. What is the noise and no noise? Is the noise the M part of it and no noise the G. We never understood why in that process of the heartbeat we have the pull, pressure and motion of the Pl what we call blood. If you look at the M field forces (drawn) on the board, of the U, it is no different than the blood flow in your body. Where the heartbeat brings the flow of the blood in one direction, the same heartbeat brings in or moves ?? the lymph, feed it. Is the quiet part of it, the point of ?? feeling the matter state of, and the noisy part is the feeding through the fields of the gaseous part, or the ?? part, the subtler part. (1:30).

This is what we need to understand and what is missing, the heart. And how to create it, why is there difference between different systems, why does it become lower and lower when it comes into bigger physical dimension of the strength of the flow. Mankind always looked at the very high frequency of the heartbeat, whereas the U in the expansion of it totality works on a very, very slow and very, very faint (heartbeat). Is it the reality that when we work with a slow, we have less friction and narrower band and we can what we call, scrap through ??? and a be a space in the M field of the U. This is the new teaching and now we have to move on, with Mr. Rick Crammon or without, we all have a time of life. But the reality is how far can we understand this. It should not be the voice of the man which carries the knowledge but the STM. And in this process what can we learn and why? Does our soul have a heartbeat? We don't have to call it a heartbeat, but does it have a beat. We never considered that. If our solar system has a heartbeat, if our sun and earth has a beat, the soul should have one too. And is that interaction, (1:32). as I have said in other teachings, with the physical heartbeat of the man leads to the creation and confirmation of the physical body of the man. When the two (the soul and physicality heartbeats) interact they create the mirage of physicality. We talked about this many times. In resolving the understanding it is easier to understand then how the field forces interaction leads to what we call, sequential, symmetric, but very much a crystal. As we know scientists have proven that if we take away the skull of the man, there'll be no noise of the heartbeat as such. This is what is missing from the knowledge of man ?? in the interaction with specific strength you create physicality. (1:34). In the dimension of no boundary, you connect with the span of the U. If you look at the shape and structure of the skull you'll find some amazing things which you have never understood. Why do we have certain holes in certain directions and certain shapes, why do we create the direction and position of our nostrils and the holes and enter the dimension of the STM in the background. Isn't it our breathing which controls the strength into the lung, when in fact comes the manifestation of the physical life. ?? have interaction with the physical part of the body, their own heart, their own beat, where what it pulls from M into G and what it goes from G to M needs the space gaps of (1:36). positioning or what we call, the heart. And in this case it leads to the creation of the physicality. At the moment we have a T called face recognition if in the next steps of science the scientists understood the explanation of today, position of the STM and the position of the heart will give you a unique position of the man to understand who it is in the dimension of the U, not by seeing the physicality. What we call the soul evolution. This is how you recognize your mother in your dream, because you recognize this, this has a strength that has a meaning, it's the one I know, I call mother. Then when it comes to understanding and conversion of the voice into the feature of the mother and ?? it will be. (1:38). It needs now that we are entering into a dimension of no physical state, to understand the interaction of the fields which creates that state. It's not anymore M or G fields. It's not anymore one field or the other, it's a collective and in understanding the totality of the knowledge. The heartbeat is not the exclusivity of the body of the man. Any other question. Q: Are the AA's a transition from the fields or do they actually take part in the physical part of the field, so they are not radiating inwards but are part of the outer shell? What do you call an Amino Acid? (1:40). Q: Well I am thinking, because the outer shell is the cell, I am thinking ?? micro which is irrelevant in the process but ... the way the u works and the way we are creating an AA in a Box, my DNA structure I was thinking the AA must be in a transitional state, in between, like the fibers coming out of the center, because if they were part of the outer shell of the shell, then it doesn't make sense, that's why I asked the question? Now let's define something totally different.

What do you call AA, the AA on this planet, COHN is this, is a combination of different M fields which can lead to confirmation of a dynamic existence which can interact and show reaction to its environment in that state of Earth. (1:42). I promise you very few places in the U creates this AA. In some places in the U AA could be this, KPBA what ever you want to call this. Some elements known and some unknown. This is the problem if you get stuck to an AA and just look at it as creation of life. In the MG field of this planet collection of these fields allows construction of the collective cells in the space gap which can lead to physical life, be it horizontal or vertical. When we talk about AA from now on it's better you do it (this way), then in the future you don't need to do it, it's a building block of life, of existence, confirmation of the dynamic life that can create recognition and replication. So the (AA) on planet Zeus, this (KPBA) is most probably what it is, but it could have many factors, elements which we don't even know on this planet. Does it mean it is devoid of life or of creating, or recognized decision making. So AA is what we call the dimension fo the creation of physicality on this planet, (1:44). and not necessarily applicable to the rest of the U. Q: ... In the teachings of a few weeks was that in a way the AA doesn't act in this dimension, it has to swing both ways, .. every single element has 2 sides to it. Let me stop you, I am going to go back on something that is very interesting. Now that we spoke about the fields and the knowledge we possess, I create an environmental condition in this Box which leads to creation of your AA, and next door I create totally something else and it leads to a life which has the same feeling and understands the same and reacts the same. ... this is what I have said in teachings of the past, (1:46). in time we create the conditions of the destination which the soul wants to take to manifest itself. How do I look when I arrive there, can I handle this shape, or is it that I will be estranged to my own physicality. This is a very hard job, if any of you go through this you'll feel the fear, you'll feel the lack of understanding where am I, what is my position, am I still the but in different field of dimension. It's one of the most horrendous experiences, if man doesn't understand it. For you, you are used to this (body) if I even slightly change this (your body), you'll wake up with a fear of what you see. But in the new condition, even if you bring the soul to the earth condition and see the physicality of it, it's a nightmare. This is one of the reasons when we bring people out of Coma we always say to cover their face so we do not see their physicality, because the soul and the energy are there and the mental condition is there, but when they command their physical to move it doesn't and this gives them a fear, a shock and puts them back in a deeper Coma. But when you transfer your soul to another dimension to the physical dimension of the new earth, it's horrendous. I have been through it twice in accepting the condition fo being a Messenger. Your body shape, the feeling of the body like a stranger to touch, (1:48). because the soul needs time to connect with physicality. You feel the hand and the body but it is not yours, it needs time to connect, to fit the soul into the dimension of the physicality. I have been through this 2 times and it is horrendous, and I have seen this with the Coma patients and I know how they feel. Mankind will go through this, how will you react in the other dimensions, when the soul is present and you have to fit in the new gloves of the physical dimension at the point of arrival. It's very much you are liquid, you become a gas and here you are plasma but in essence you are the same, the structure in the essence of the STM. When you accept new dimensions these are what you have to be. When you go now to different zones with different conditions, when we go to the North Pole we get trained how it is going to feel, we get trained when we go to space how it will be feeling, how are we going to handle the weightlessness from now on new technologies are going to be developed that how would you feel in the space of planet Zeus, physical dimension encaging the STM. (1:50). In essence the soul in the

North Pole, free flow, and ?? doesn't change. It's only the containment that has changed, field forces that have changed. This is what man still has to understand, you have no choice, there is no option now that we have opened part of the U. In the coming conferences I'll show you these confinements. Q: DNA, I just can't get it out of my head? What is a DNA? It is a bunch of these (COHN) stacked to each other in a different way in ?? respect to each other. Yes. So ?? Do you want to unpack it on planet Zeus. Q: What I see is that everything is so connected anyway..? They are connected, not in a way. Q: The way that I see it is the field forces of the U or of the planet Zeus, when we go there those field forces are different and will act upon the DNA which then changes it, but what happens if we are forced to live on a planet, (1:52). that we have to change our bodies in order to live, because if we were to go there we would just die if we didn't have enough? How and why do you think that, the STM is the provider of totality, what's your fear, it's not for you to decide, it's already set, it's part of its structure. It's like if you go for camping and you sign into an organization, they make sure you have the food, your camping tent, you have the diner, the tea is on time, the tent is ready for you to be in it. But that knowledge is within the STM, it does the interaction with the fields of its environment and dictates the manifestation and the structure of manifestation. In some cases we don't see manifestation, we see this clearly. The more man becomes educated in the space T you will see. We have seen in upper levels of this planet on the boundaries of certain field strengths of the earth and the solar system, we have creatures that don't have any need for the physical dimension of the bones and muscles, but they still function, we talked about this many times. It's the same once we open our doors into the solar systems, we'll see lives in the way of what we call, the replication and consistency in every corner of this U. (1:54). And then we recognize this is the condition. If we decide to live in span of the solar system without physical dimension of the, what I call the G field of the matter state fo the planet, we can survive, better intellect most probably. But if ?? you need the eyes to see or feel the fields something is coming I better move, oh there is a smell coming down the road is it from Jupiter or we didn't heard anything from planet earth. We sense the fields and the fields have an understanding of position. The soul doesn't have an eye, it feels its strength of the attachment, how close is a field to me creates certain feedbacks, it senses it's too close, what does it want, how is it there. I can't see because the soul doesn't have an eye to see but it feels the pressure of it. In that process if you go further in the education of the STM you'll understand something very strange, even within the structure of the soul there are field belts which are very much like sensors, by sensing this they understand the closeness, by sensing this they understand the position, by this understand what's the intention, by the others you get different information. When we look at the structure of the galaxy, it gives us a very good indication of the feeling of the U. (1:56).

(2:00).

(2:16). ... There is something that Rick raised and we have to address it. I teach across the world and we have to cope with what is. When we arrived in China we had transmission problems ??? a couple of places ?? it is what it is. when we go to Africa and there is nothing we still have to transmit. Understanding the knowledge is more

than listening to the voice and trying to distinguish what is what, pretty soon I will be teaching you ?? through the STM with no voice. I wonder if you can hear. You will see as we travel we accept the conditions that we are in, we appreciate the knowledge and not the face and the voice. Any other question. Rick says, thank you Mr. Keshe, (2:18). let me say something first, I really do appreciate your knowledge and I am trying to work in that direction more and more and with the PI Reactor Group as well this is the topic... Mr. Keshe says, ??? frustration because ?? every week with me. We are traveling across the world in the next 12 to 18 months we'll go to around about 20 different nations. We have to accept what is available and what they make available to us at the point. We stand ?? we stand threats, we stand all sorts of things, but the knowledge we carry is more important than the voice. Anyway, we all get frustrated, let's carry on, I get frustrated with myself sometimes, I am talking with myself in the background and there is nothing happening, then they tell me the Internet doesn't work, I listen to the teaching afterwards and I thought I was talking in another voice to be heard. Any other question. Q: Jalal. you said, we choose or we force the situation we want to be put in, does that apply to the same conditions we are here on earth? Of course, you condition yourself ?? , to children, to 9 to 5 working, and everything else. We condition our physicality to the point of acceptance of us what we can handle. As I said many times, we take from this knowledge according to your intellect. (2:20). Intellect doesn't mean your stupid but what makes sense to you. 08

(2:22). .. Q: Is the creation controlled? No, ...

.. Q: Is every cell in my body a U? Yes, of course, as we are a cell in the body of the U ourselves. Q: So when the Creator says, that He made, (2:26). man in the image of Himself? He didn't talk about 2 legs and 2 arms. ... the emotion of feeling of understanding in the confirmation of life. I am alive ?? interaction ... It's no use being on your own ??? .. I had nobody to talk to. ?? I have to go out to confirm that I exist, or somebody has to come in, to say, 'oh you are here', ?? ... and this is the life of the man. We got trapped in the room of the physicality of the man and the village of the earth. Now we are trying to teach you how to go site seeing, to understand how you are created and how ?? a tent and a baggage. Detachment from the dimension of physicality. This is all these teachings are and very soon we are getting there, we are approaching there. You know they say there is a parameter for everything you measure, when the religious people start complaining, do not talk about the soul, it means we have ?? pinched them there, it means the truth is out and you have to be open too, because it's the essence of creation. ??? what's the use of talking about spaceships and the plants to grow, because then they feed your soul, if you go ?? the wrong way how do you expect to be ?? ?? You see the entrapment of the physical man has come with the position of the physical life, but what they have to understand is that the STM is created by collective fields of the U, (2:28). and you go and carry on to become the Creator ??? They want to engage this for titles and positions, and as I said, not in my time and my space. The STM has to be free to choose his own dimension and understanding of his own position. ?? When you are created in the womb of the mother, does the mother put conditions on what color, what fingers, toes and hair you have? Or does she leave it in the dimension of the information that is carried and (what) the womb can create for you to be manifest the way you are. There is an experiment in which I challenged one of the world's leading scientist to a very specific reality. Now we speak about cloning, that they are the same. Now if I clone you in the womb of blond and blue eyed woman, or a black African woman, or in the womb of a Chinese

woman, the outcome will be the same, as you. (draws lines from each of the wombs to a person). (break up??) (2:30). Nothing in physicality, not even in the dimension of emotion, and the strength of the STM. .. What we give to it creates that, what we take from it, dictates our position. As I said many times, those who betrayed me, be prepared for what is to come, of yourself to yourself. I'll be the witness. Because we give the condition of existence. You create the man. This point onward it's you (? after birth). And you choose. So we choose the rest. If we go back to the drawing of the light and where it is inclusive of the STM. We are not blind to anything. We are just too busy trying to serve humanity.

here

(2:36).
MaGrav

(2:40). My silence is my grace and not my weakness.
You'll never find a system more complete and complicated than the MaGrav.

.. When we decided to share this knowledge some thousands of years ago, man wasn't ready. We shared it but man didn't understand. He was more interested in wood and fire. (2:42). Now that we share it he is more interested in what he can have free and steal from the others.

(2:44). Q: Is this process of awakening routine for all universes or are we somehow different ... ? (can't understand her ..) is the search for good and bad, pleasure and pain, is it a problem with the brain? You have to understand, it's ??? motorway as you call it, what comes has to go back and at a certain point it's in balance with the other. Man is not special but he thinks that way, because we have that habit from the childhood, the mom says, you are special and the most gorgeous thing God ever created. .. the animal which is totally black says to his child you have such a beautiful, white, transparent, crystal leg, but it is actually black, it's just the mother ??? Man has the habit to think he is special because we extend our lives, the excuse to exist, the confirmation of existence. It's strange that we, (2:46). need to confirm to exist, where we don't see the beauty of our soul, which exists within the STM, and we go for the physicality. If you look at the One Nation UC logo the man is standing, he isn't holding the earth but the soul of the earth, where it came out of his creation the STM, through the action of the field of the STM, and through his hand he shares what is given to him ?? . It's very interesting, those who draw these logos, without them knowing how deep they explained the work of the U. We are not special, we are time capsules of coincidences in the work of the U like every other point in the U. One of the things I always referred to at the beginning of the teachings, we try to explain how the teachings are, that when you go to space you don't find yourself prophets and what we call various leaders to abuse you, because you'll understand the process. So if I catch you on the way to planet Mars and I show you this process, and this is what you saw is, then I don't become the next prophet. You understand that this is what I already know ??? But what is your intention in what you are telling me, you are the prophet and you want to abuse me, or you want to love me, or you want me to love you. When you go (2:48). with the open eyes then no one can abuse you.

... This is my name, MEHRAN, this is the ?? of love, a giver. That's a direct translation from Farsi. We are not chosen by name, our destiny is set by action. You have to learn, ?? this is the ultimate position for ??? the life of ?? man. If you get to that point then you receive a total maturity. It doesn't matter what shape you appear as a physical ?? Q: By man I mean the first man God created, and I imagine that he should have been in soul level because in the soul level there is no movement, the moment he has a choice, and he chooses to do something other than what God has told him then there is a duality, (2:50). so the brain started to work in this duality. You see you are not making a mistake but let me correct you. This again is another problem. When you have the soul and it radiates, somewhere it interacts in the fields that it allows its manifestation. In the solar system there are billions of kilometers, because this field has to reduce somewhere to manifest itself as earth, moon, Mars, Jupiter or Saturn, so it needs to be contained. In the body of the man the soul wants to manifest itself in compactness, so what has it created for itself, the brain. The density reduces the span of manifestation, that's all it is, where is the duality here? If I can make it much denser in another U I might appear in a different shape. There is no ambiguity about the creation of life, we understand it fully. Then we have to match it with its environment, so what have we done, we have created blood to circulate around it, to control it, to confirm its existence in respect to its manifestation of its position. That's all it is. The blood is the containment of the soul in the dimension of physicality from the earth. (2:52).

(3:06).

.. Q: How can we listen to the heartbeat of God in the ordinary events of our day? Why, 1 heartbeat is the span and the life of the U. Q: We have to listen to it for a very long time to catch that one? In so many ways. Q: Maybe that's the meaning of eternity. ??? We'll close for today. ... (3:08). Please try to step out of the present teaching, as what you have been taught, because now you understand the ultimate goal and we need you to be there to guide the governments in the next steps to come. You'll soon understand that it's a time of transition. We have had the governments run and try to govern, but they have no soul, now we created the U Community, U Council and K Seekers to change the position, that we give soul, what we call, to the work of the man. For centuries this didn't work (governments) and brought many conflicts. With this (what the KF is doing) we are here to make sure that there are no conflicts. In that process we understand that the STM is equal, it doesn't matter where he is, being on this planet or other places, black or white, Arab or Moslem, Christian or Jew. When you attend these conferences, you'll carry this and you'll understand this, where in a simple word I can change you from a Christian to a Jew, the same ??? I can change a Moslem to Christian, with the same ?? ?? This has to stop and the process of the new governing is to make One Nation out of the STM and not the physicality of the man, maybe now you understand what is the purpose of the new cycle of the teaching and these conferences. This is where we change, the way the U works and not the man, (3:10). who has chosen the dimension of physicality. Those who have been ruling and abusing will fight to hold on, but one thing don't forget, my wish is my command and I am the Creator. We will achieve, but in this process we need the STM to progress to the next level not by us delivering MaGrav Units and other knowledge. The purpose of these teachings is to show man that there is a new horizon

(3:12).
