

291st Knowledge Seekers Workshop - Thursday, August 29, 2019 (,)

(:07). At 300 KS Workshop I shall quit. After today as we have officially entered the market we will not make anymore announcements.

.. Most of my teachings are to open the eye of the man in what is to come. (:12). and in steps to teach how to evolve and to be able to live within this structure. What is life, what is the strength of our life. What, where, and how do we draw a line between our lives, and our physical life, or in the dimension of understanding the strength of the STM and that there is no time and space and that I can create as much as gold, as my own cells, as my own being, my own presence, not necessarily in the form of what we call physical manifestation. In the teachings last week I touched on this very softly, those of you who work on the edge of space T with us maybe you have seen some breakthrough, maybe you understand a little bit more. Maybe you have opened your horizon of understanding to the next level of the science of space, in man, in reality, become part of the world of U Community, is where do I stand with this knowledge, where is my next step. How do I keep to a different type of life, physical life to be present among those who I have been born with and then in the depth of space what I can be, what I can create with my own soul, according to the dimension of existence, the strength of the fields, the pressure of me wanting to feel through the strength of the soul and not physicality. In the teachings of the past few weeks I have started building what I call the environment of the life in the space. (:14). As it took many of you months and months to understand the teachings of the soul, now the teaching of living in the environment of space becomes the next step. The how, where, and the way we'll create this dimension, how we use the existence and the presence of the fields of the U to create the condition for our confirmation of existence. We are not always with our friends, cousins, uncles in the depth of the U. We come to the dimension where we come across life in the form that we are not accustomed to but we know it exists, we have to respect it as much as they respect us to be part of the life of this U. We see ants, lions, birds, in the U we'll see the same kinds of life structures but not the way we are used to. What is our reaction and how do we manifest ourselves to it. How do we know to create the conditions to absorb the fields of the U that it confirms our existence in the depth of the U. A new game, a new territory. The game is the game of U, and the territory is the whole of the U. From now on there is no limitation for man except his own understanding about the truth of the life for man in the U. You have to consider the environment and what fields are available in this environment, (:16). how can I tap into them, how can I give that I can take. I can't keep on taking, even the Creator doesn't take, (break ??) .. where is the limitation, where do I stop, to what extent can I satisfy the need of my soul without overloading and without losing the condition, the confinement, the strength of the STM. We have to come to understand a new dimension, new parameters, new fields of the strength of the plasma (Pl), a new field to understand how the plasmatic condition works. In many teachings I keep on repeating , maybe now as we develop into the space T, there is no resonance, no frequency. There is something which I always tell but very few people understand, if the mankind would have taken the path of Tesla in a very direct way, man would have become more dependent on the life of the earth. If the man would have taken the path of Edison to work with the DC and understand the totality, most probably as a human race would have gone further in ?? this T, in understanding the work of the U. we got trapped in understanding or creating the condition that we thought, a justice, (:18). we thought it

suits us, but when you have no frequency in the depth of the U, in the Pl of the U, how can you have AC, alternating current, alternative rotation. The new world of science has to open its eyes, we hear the noise from the space, but that noise doesn't come from the frequency, it comes from rubbing of the fields of the U ?? It's very much monotonous until another dimension interferes. When mankind becomes the passengers of the space what you'll hear within the space is a monotonous noise and that tells you what field strength is available because it's a strength that you can hear and absorb. It's at a strength where you can add to the strength of your soul. The STM doesn't have a frequency, it doesn't work with the AC and is part of the structure of the U and works only one way, through harmony, singularity, and no noise. The interaction of the fields of it, its environment, being different part of the brain, converts it. The brain of the man is a transformer in exchanging the field strength of the STM in interaction with the field strength of the STP of the man, to the noise that the body can understand, to the identity of the strength that the body can understand, (:20). we call it joy, fear or whatever, so if we look at the structure of the brain it's nothing but a transformer, it depends on where you tune it to, or adapt it to, and in the coming time man (break ..) .. star in the world of the U, in the dimensions of existence in the U, that you decide what is joy, what distance from the soul and what strength of the fields, and what strength of the fields from the soul of the creation in the dimension of the physicality that they interferes between the ?? new and creates a noise (break ...) that every, ... sounds fear. We translate the noises into physical reaction. At the same time we transfer lower strength materials in what you call, the strength of the fields into the cells of the body. Our ?? cells (self) works the same way. There is no difference in the world of creation, between the creation of the solar system and the body of the man. It's only different in the strength and in what we call, what is in the package, is it a cell, a star, or a U. In reality there is no difference. The Pl of the STM, Pl of the cell of the physicality, Pl of the solar system and the U, work all exactly the same. You have to understand, (:22). then how do I gain this physical body in the presence of the fields of this planet and solar system, that a given point in the presence of the strength of what we call the fields of the galaxy and U, gives the condition of physicality to my life, my existence in this point in this moment in time. Then you choose the time and space, and then the strength, then you have to understand what condition the strength of the environment allows you to manifest yourself, to communicate yourself with, to go through it, to be part of. Then there comes one point to understand, is the strength of the STM capable to understand and to translate and live among the strength of the soul of the U, be (with) all its dimensions. And the answer is yes, because if your soul has managed to manifest you in this condition, it has the power to manifest you in any condition anywhere in the U. Then it comes to the reality of, to what extent, to what we call passengers of the U we would like to get involved in the environment, where we are, what do we want to see, who do we want to take to share the knowledge, or can we see the people to see through our soul by not being there, but having the interaction with our soul. It's like you become a camera to the world of the U for those who are the passengers on the planet earth, what I see you see, what I feel you feel, (:24). and this will become part of the work of the mankind, in the coming time if you understand it. My eyes becomes the eyes to the U, and your soul becomes, as you call it, the monitor receiving it. As my soul has connection to yours, ?? the time in space. There is no time in space. It's what I see, it's what we see. Then we develop the conditions that we filter and accept only what we want to see, what we would like to have, then the life of the man changes beyond, then the position for man changes beyond and the reality becomes, why can't I do it when I am here, why do I have to, need, why does it have to be done once I leave this

planet? Or why it can happen when I leave this physical body. Many of you and your children in the coming time will go through the transition of understanding the strength and language of the soul. When man started walking this planet he had no language, and as he understood the capability of his brain he started to make noises and he recognized the noise what to be, now we have to listen to the noise of the STM and understand its working and not the physicality. Read the writing of Mohammad, he has referred to it many times. (:26). It's hidden in the writing of Koran and in so many ways we see the starting of the writing of this point in the writings of Zoroaster. Mankind has full knowledge but he has to understand how to decipher it to a level that he can translate it into the physical work of his life and existence. You can't put this knowledge on a board or on a piece of paper, it's not a reactor to build or a Gans to develop. Every man has to understand the strength of his own soul, the working of his own body in understanding in respect to his soul. If we can think and create cancer in our body, in the subconscious we are not producing another child that I suffer from (prostate cancer), so we can do the same, understand the same, use the body the same to last thousands of years and not a meager few hours. The process of life is so simple, it's man who has not understood it and made it so complicated. How far we can take this knowledge depends on the intelligence of the man and nothing else. Every man has the intelligence to understand it and at the same time he lives through this dimension. It's not an antennae to put up and absorb this radiation or that field that I can make bread or my leg. (:28). It's to understand how the fields of the U works, that in interaction leads to confirmation of existence in the dimension of the soul and not in the dimension of physicality, would mankind ever reach the point of maturity to understand the difference between the world of existence in the dimension of the matter or in its dimension of soul and would the man be able to exist in both dimensions at the same time. Many races in the U do so. It's to understand the work of the strength, of life, and to understand the work of the reality in how life is created in the dimension of physical structure if man needs to manifest himself. We have reached a point of maturity, knowledge, with all these teachings that in the coming time many of men by now when they listen and they go through the teachings, they'll know how to cross the line, to be able to cross to the dimension of the soul without waiting for the confirmation in the dimension of physicality to confirm that they have been to the dimension of the soul. the transition between the two will become the understanding, (:30). the totality of the whole structure of the U. Do I need to go to the moon in a craft or do I see the structure, life, taste, smell, the whole structured life of the moon through the souls of the passengers of the U. Man has never been in all points of the U, but when the man learns how to tap into the universal soul man will be and see as the others do as he chooses. We travel without actually leaving the position of the soul, but through the strength of the fields of the U we reach every point of the U. You look at the light of the stars which come from the depths of the U, but if mankind learns that even a star has a soul then you use that passage to reach the star, you don't to travel the star. If I can feel it, if I can receive the confirmation of manifestation, then it has a soul. Learn how to communicate, how to be, it doesn't matter if it is a soul of a stone, or STM, or the soul of your child, or a soul of a star in the depth of the U, once you have made contact you can reach it. Then do we need spaceships, or do we need to understand, that if I manifest myself to you as a star, it means I am prepared, I am open to receive from your soul as much as you receive from mine. Do I need to have a SS or do I travel the depth of the U, (:32). across the lines of the confirmation of the existence of the star. Don't forget the ray of the sun comes from the soul of the sun not the surface of the sun, as the ray itself was created by the field interaction of the soul itself from the point of the inception. Then man needs

to understand more, understand that the dimension of the space travel is not within the structure of the SS but within the structure of the STM to understand the full spectrum of the capability of his own soul. Then a new knowledge comes into operation. Man has been in a way mystified and petrified and forced to think that everything has to be so big and to be stronger to be able to, we call it in the present age of space T, payload. But in the world of the U there is no load and there is no pay, it's to understand that it is all free and there is no size and dimension. As I said to my friend, how are we going to explain in the depth of the U that our soul travels with the speed of a 1000 horsepower brick. What is a horse and how do we measure in the depth of the U when they have never seen one. (:34). Do we need to create a new language, a new understanding, conception, and new structure in the work and the life of the U. Man needs to educate himself very rapidly as we have opened the door and in so many ways, do we need to be the passengers, or are we the captains of our own destiny, our own future, and will the mankind be kind enough to understand his own dimension, strength, his own interaction with the rest of the souls of the U. Then do I need to give you a SS? Or is the ship of space the STM. Then it comes to a further point, did Noah bring a boat with all the animals in it, or did he travel in the dimension of his own soul, that through his soul he created what he needed to be, that fits this planet. Do they have elephants and camels in the space that Noah took across or did the man not understand that it is the STM creates what it needs at the point of inception of the need and demand, (:36). and at the point of the pleasure of giving confirmation of his existence by creating other dimensions. Then is the Boat of Noah the same as the rib of Adam in creating Eve. Had the man not understood the totality of the truth and so he had to be told , or put in different languages for him to become mature to understand what was missed, but he still missed it because he never understood that it wasn't physical terminology, it was a confirmation of manifesting anything you want from the strength of your soul, even (creating) being a partner, something to confirm that you can love and it can love you back. Isn't this the same as calling the man the creator and the Eve, the man as the subject, to confirm his love for the Creator, and the Creator to show His love by creating the man, to confirm the confirmation of existence of life in the U. Which part of the history of the U have we not understood and we have to translate it into the knowledge of our own understanding because that was how much we could understand. Then the truth about the Boat of Noah doesn't exist, does it? It's the STM who understands that he can create what he needs as long it is done just and correct, and it applies and he can live within the existence of the environment of the given time and space in confirmation of the manifestation. I cannot take elephants to the moon and I can assure you there are no horses on planet Zeus, but on this planet it can confirm and conform to the physicality of life and the strength of the field of the U. (:38). How can I put this knowledge on the board and write it that you can measure it, develop it and make a reactor and fly with it. If you haven't understood the strength of your own soul how can I explain to you the beauty of the creation when you are blind to it. How can I explain to you the smell of a rose when you have no sense of smell. How can I show you the beauty of the Creator when you don't even understand what it is to be created, ?? establishment of the STM himself. Then, you say don't speak about the soul, it means you haven't even understood about your own creation. Denying ones existence is denying the totality of the existence, even in the matter state of the life of the man. There is no theology, this is the truth about the life of the man in the space, but you have to understand what condition space gives you that you can conform and confirm your existence within it. What do I need, or how will my soul react to this new frequency of matter state on the planet that I can manifest myself in that dimension of physicality. There is no frequency in the work

of the U, but there is a lot of frequency in the work of a beautiful man like Tesla, when he enters into a matter state to confirm the energies of the U, but in the dimension of the interaction of the fields, (:40). to confirm the dimension of physicality. If you ask yourself why there is no frequency, or why there is no what we call sinusoidal waves in what we call the U, because in the U there is no cutting for trying to get through, you accommodate, accommodation doesn't have the need to fight, to resist, to overcome. A frequency comes when you have to drill yourself through an atomic structure or mass magnetic fields of the matter state in the compactness of the fields of the U. What I call a pneumatic drill of the sounds and the waves. I wiggle and wiggle to get through it, whereas in the world of the U in a PI condition you float across, there is no resistance. I give, I accommodate that you don't need to sacrifice, you don't need to loose. What you give to me is your G, and what you give to me from you is M, and I'll take what I need that you don't need to waste time and energy in the space to get through to the point of destination. then you'll understand why the knowledge of direct or DC current comes into operation as the PI has no frequency. Maybe those of you who are K Seekers will understand more in the new dimension of life. (:42). As I said, we are entering into a new world of the science and T, because we covered everything and we gave man everything he wanted to see in the dimension of matter state. In the coming conferences, one after another, we unravel and show totally new T which is the real space T. Don't come in and expect to see a flying machine, I haven't seen any, I have never seen souls all gathered in one SS. Then you can put the whole soul of the U in one SS. It needs the man of wisdom, man of understanding the truth when you come to these what we call conferences. These are the conferences to open the eyes of the governments to what is to come and what needs to be done, and what is on the horizon for the world of science. In what level, strength, or in what dimension do you want me to manifest. In some of the workshops you might see what we call, citizens of the U. We can create that condition, we have the knowledge. If you remember I referred to this 2 or 3 years ago that we can make a fish tank and create a condition that we create the fields that it suits the souls of who are of the different strengths then man. In some of these workshops you might see the fish tank ?? (:44). you see some new technologies and in understanding the changes in the dimension of the physical man. In understanding what it means to be with the man of space without dimension, do I see my own soul within the confinement of the fish tank, and is standing in the presence of me in the physical dimension of sight. I was told by one of the Iranian groups that you have to show magic in your one of the things (conferences?) then we'll believe. The magician was Christ when he rose a dead man. The new science has no magic, it needs the understanding and the insight of the totality of the knowledge, then the magician will be you and not me. I can create a condition that many people see the soul but if you are ignorant to it, then nothing is happening there, then you'll think, he must be crazy, but in fact, your soul has not matured (.. break ..) of the extension in the strength of the life of the man. **One of the most powerful presentations will come when you present your soul** at these conferences and not for us to manifest a soul for you. Detachment through the understanding of the knowledge is the cornerstone of the new T in entering the U Community and nothing else. Don't come expecting to see a Gans machine or something else. (:46). Don't turn up because you'll be disappointed. World leaders and the governments will be shown what we have planned for them to create a condition which we want and not what mankind has dictated on himself. As I said, there shall be no war because we have decided. It's our decision, our wish and our wish is our command. We command it to be correct and from now on man will take that path because you become aware of your true existence and not in the dimension of

physicality. I was told in communication with Iranians that Iranian officials and the rest consider me as a "Methi" (messiah) (..break ..) the ?? total of the man has no Methi, he understands the truth and he lives in the dimension of the truth. We are not Methi to one and messiah to the other, we are Methi and Messiah to our own soul in the dimension of existence and in understanding the work of the U. We teach and it is for the man to understand. We bend to no governments and we accept no conditions except ours which is peace and in understanding the new T we bring wealth of the knowledge, not of the pocket, because when you have the knowledge of the U you don't need the pocket. The U is your oyster and your pocket, it takes time for man to understand it but once he does and he sees it with the clarity of the soul man will take to the next dimension. (:48). But you have to understand **what field creates me and not I am here, what field do I create**. Mankind has to go into the essence of the fields of the U which leads to his creation then through that path he'll find a way to the direction of the Creator who lead to his creation. In the new T we show the path to the Creator. We show the ways and you can't build a system to replicate it. You have to understand it through the work of the STM. In the work of the U there are no kings or presidents, the king is the STM and the president presents himself at the point of manifestation through himself, through the confirmation and interaction with the physical dimension of the fields of the U at the point of the time and the space. Try to understand more and more about the field interaction of your physical dimension and the environment of your body. Go a step beyond just feeling the temperature and the heat, try to feel the soul of the planet, try to feel the soul of your friend and your child that you don't need the dimension of physicality. (:50). The famous song says, I am who I am. Nothing else, nothing more. I can't make something for you if you are not aware and in a way knowledgeable about your own essence and existence. If the sun in interaction of its own fields creates the moon, earth and Mars, so is the STM in interaction with the fields of its environment creates the liver, lungs and the physicality of the man. It's us who has to understand this and nothing else. We are blind to the truth and in that process we have become blind to our own existence. How do I measure the fields of my soul? Have you ever said to someone, I love you. Has that word had any meaning to confirm your existence, then you have understood the strength of your soul. Have you ever held one to kiss, one to touch, one to smell and one to transfer the whole of your existence through, then you have understood the dimension of the physicality of your soul. (:52). I love you very much. I adore you. What does that mean? It means I give every soul of the cells of my body in the dimension of the soul to you that I can feel every cell of you, that you can take what you need from me. This is exactly what the Creator does with the man and the rest of the U. I give from what I have in totality and no more than what I have I can't give and then what is the totality. Is this what I carry or is it what I can take from the fields of the U which are available, to make it available to you that you elevate higher than me that you can absorb more and a higher strength that you can reach a higher level. What does it mean we give more to our children that they live a better life than us and we tell them, I love you, I love you my child. It's the same when we love a person, and it's the same with the love of God and the Creator. But how do we tap into. How do we get this understanding, it's for man to understand truth, then you'll understand why we have set the company and the matter state is for those who want to be in business, because our business is the work of the creation and the admission ?? of the STM. Those who are happy with companies and setting up factories to confirm their (..break) for those who are physical to confirm their existence. (:54). We set the scene but it's for the man to choose which scene he wants. Do not lie as we see the lie through the STM and the physicality has to stay ashamed. Nothing is hidden it is our grace that we keep

our silence, and not your cleverness and silence, cheat and deception. Nothing is hidden when you work through the soul but a lot needs to be taken, and be graceful not to put it right in the face of the people, that I see the truth. It's for you to live with your own shameless behavior, because that is what it is, not from me, my silence is my grace not my weakness and it's the same when you become the man of the U. But again you ask how do I find my soul, if you have to look it means that you have even understood about the soul. You haven't understood about the sun, the creator of the creation of your life, you haven't understood about the center of the galaxy which gave life to you as the center of the sun, be the center STM, and then the same as it gave the life strength of the soul from the center soul of the U, and the center of the U gets its life from the center of the soul of the Creator. (:56). Then is it a reflection, or is it part of? Nothing reflects, it's part of, so our soul is part of the soul of the Creator in the totality of the dimension of the creation. No one has put a mirror in the U to reflect its light, we have become part of it in different strength ?? its point. Then there comes another point, are there creatures who live in the bigger dimension space of the U, yes they do, but for man it's to see. Are we part of their organs? Maybe, but in a way we are an organ and part of ourselves (we ourselves are part of our own organs ?) , how can it be any different. The limitation of understanding and of accepting the truth, it depends on the strength of what we call the knowledge of the man and the truth, and nothing else. People will take from this T according to their intelligence, which means according to the openness of the STM, (in) how to translate this knowledge and understanding that I can move to the next dimension. Or have we got the ?? of when the man created the first car, that if you go faster than 25 mph your brains will come out and ears bleed and you'll die. So many of us who don't travel on the donkeys but in the cars of this planet must all be dead according to those who existed in 18 & 19th centuries. (:58). But interestingly enough, did anybody look up into the sky and see how fast the birds fly and did their brain come out, or was this the fallacy of man who never understood the totality of the truth. Now we have the same problem in the next dimension about existence of the STM, and once you understand it and you can explain it and transfer the knowledge through, you got ?? ?? mental asylum and the rest. The process of the man to become men of the U has started, it now depends on how many men are ready to move from the village of the earth in the different ways and not by weapons and rockets and maybe very soon through the SS. If you need to have a SS call Theran, the Iranian leadership will give you one. We have to move into the next step and in totally understanding it is the function of the STM for us to understand our soul, and if you are still in the habit of the old times, you become the new French business, we are making weapons for moon. Now you understand why I say that we have to change the man on this planet before we'll take him out. They can't get there so now they are trying to weaponize it (moon). the moon is a speck of dust in the dimension of the U. In the pictures of the meeting of the French president and Iranian foreign minister, you see a strange man, (1:00). sitting next to, ?? of Christianity, the Iranian foreign minister. Has the clergy entered the domain of the STM or still tampering with the physicality in trapping man in another dimension of the physical war. Just look at the picture and see where Mr. Massiv sits and who is immediately on his left hand side. (..break..) Christian ... religions are gathering together because they know their time has come. Trying to fiddle and fix the dimension of physicality of governing when there is no governance. Now the STM will govern. How do we tap into these dimensions, how do we choose the strength, mankind has been too kind to himself to fool himself to spend more time in the dimension of physicality, because we came here to have the pleasures of physicality. The beauty of existence, the smell, the touch, the sight. (1:02). Now can I feel, smell, and touch with

my soul then with my physicality, and what would I smell, which perfume of the STM uses, and which dress does it wear to cover the deception of the physicality. There is no board for me to write on to pass this knowledge on, it's for man to write with the pen of his soul and to understand with the dimension of physicality of his own soul, the truth about the existence and take flight in the path of what we call the soul of the existence, and then there is one question, if this U is made to contain the STM, the soul of created things what soul contains this U. If there is a containment there must be an environment for it, then what is that environment, what is the dimension of the strength. In the books I have explained it as the Unicose, (1:04). the totality of the cells, the containment of all of these universes, but is the term Unicose in totality is the embodiment of the Creator. Is it the interaction of the soul of the Creator with the dimension of the soul of his physicality that each U becomes a cell in the structure of the physical body of the Creator. Then you understand how feeble the man is and what is the mankind fighting to be a dust of the dust of the dust, that he is not even a dust. How can I write this and show it on a piece of paper or on the board? We are not theologian, we understand the essence of the process of creation. Theology is for those who try to fool the man to control the soul. We free the STM from the shackles of abuse, if the man decides to terminate with the dimension of physicality of his own. It doesn't need to come at the point of death. If the mankind understands that he cannot confine the physicality of the man then what is the use of building the prisons. (1:06). Who are you going to keep in there when all the prisoners know how to move their soul. Or does mankind move to the next step of creating a prison for the STM, the churches and religious leaders have done that for centuries and so on. We have to teach the man to never get into the prison in the physical structure, or imprison his soul with what we call, control of the others. This is what I said in many of my teachings when we take the man to the U or the U Community, not everyone you see who shows you a magic, as I was asked by the Iranian authorities to show them magic that they'll believe in, then it becomes a new religion and a new prophet. I have to show a magic that I will be accepted as Methi, I am, there is no way. I'll confirm with the knowledge and science and that's my magic, which is the totality of the truth. Let my students show the magic. We have to understand the totality, the reality of our own existence, then no one can fool you, or make a Methi or messiah out of you. All souls are equal in the dimension of the creation. (1:08). they have made magicians out of the prophets and messengers, not this one.

Any questions?

Q: Can you please tell how Jesus opened the way for us all,.. did he take on the planet and ?? comet from the soul? If you understood the teaching of today I think you should have understood. (1:10). Q: .. Tell us why man is profoundly unaware of his infinite potential, what is the hindrance or blockage that prevents him from entering even though it is the foundation of man's life? If you think of it another way, (let's say) you sit on a train and there is a lot of background noise, the train running down the track, the people who speak around you, the AC, the hostess who offers you a drink, children running around, but you are on the telephone trying to speak and tell your lover how much you love her. Is your body, hearing, your essence of existence, does it listen to all those noises when you are confirming your existence to your partner, or have you blinded yourself to it, you have blanked everything else out because that's all you care about, (1:12). to tell your lover how much you love her. It doesn't matter what is behind. This is exactly with the man and his behavior. Man has chosen to ignore, but the work of the U and the soul of the U carries on. We have chosen to stick to the dimension of physicality even the noise of the existence of the U carries on outside it.

We are that passenger in that train, we have chosen to ignore, to blank out the noise of the U, the confirmation of the existence of the beauty outside the train and how fast it goes and what a beautiful person sitting next to you or what a nice food is offered, it all doesn't matter as long as you can confirm to your lover that you exist. This is what man has done with his physicality, it doesn't mean that the rest doesn't exist, he chosen to ignore the voice, the noise, the call of the Creator. We sit there and the train arrives at the station you wanted but you are so busy telling your lover how much you love her that you missed the station and are back on the train of life. You didn't get off but you arrived at the station, and man has arrived at the station to understand the truth in the dimension of existence. (1:14). We chose to become physical and to value that. Caroline asked me, why have you come here. I said, there is so much beauty in physicality we wanted to taste it, we wanted to feel it to understand why man is attached to it so much that we can find a salvation for the man. His scent of life. The essence of creation in the dimension of physicality that it gets man so tied up to be attached to it, to beg for it, to breath one more breath, I give everything I have, I want to here 1 hour more, 1 day more to suffer more. What is with this dimension of physicality, we have to understand and now we do and it is nothing but a mirage. As I said, I love you very much, which means I give from the soul of me, my existence for your soul to elevate beyond me. Not to be equal otherwise it is the selfishness of existence. Any other question. (1:16). Q: Doesn't DC also contain AC within itself ...

(1:18).

(1:20). Q: What happens to the souls of plants and animals after death, does they first have to become humans to return to God? What happens to the soul of the man does he become a cat or a tree. .. then the answer is the same. When a soul is created and leaves what we call the cradle of life, where it was established, is it what we call foot free and can fancy anywhere he wants to. But you have to understand, go back to the original teachings, a soul has both to give and to receive, and when you free this bird from its cage it has to find its position in respect to what has created it. Would the soul of the ant reach to the level in the U that would be closer to the soul of the Creator, (1:22). and would the soul of the man who leaves this dimension, moves because of his misconduct and what he has given from his life in damaging whatever, moves further from the soul of the Creator, in another dimension in another position. And then when he arrives in that position is it the position that dictates the condition of his physicality. If it decides to manifest itself, then do we have 1 universe for all the ants which are created on this planet, or is there only 1 U which accommodates man's soul. 'Hello boy what time have you been on earth, I have been there centuries ago .. and which planet and which galaxy have you created. This was deliberate, that part of these teachings would be so clear that all these ambiguities in this part of the T would be fully understood in the composition of the knowledge and understanding of the totality of the knowledge ??? any other question. (1:24).

.. Rick asks, ... all souls are one but at the same time individualized through the physicality, is it a different vibration for each one, not really a frequency, maybe it's more like a flavor or color, or can't be described by our senses, but I think we know the difference between souls generally speaking, we make a distinction between a soul of a cat, or stone, or human, yet you say they're the same but different, (1:26). different flavors. .. so can you explain that a little? What do you want me to explain? Okay, when you encounter a new soul how do you register that being with yourself, how does it vibrate with you ...? You see when I stand in front of the person and I get lied to, I see

it through the soul, it tells me it's a lie, but I don't go back and say you are lying because I can see your soul. I leave it for the soul to put the physicality in the position that it sees its life. That's all you need to do. The way you create a condition to manifest your physical manifestation, it's the same process, there is no difference, in a way you see the two, and the body language tells you. If somebody tells you ... (1:28). Like in Iran, you offer them something to eat and they say they don't want, then after they eat the whole plate. Do you understand, it's the same with the work of the soul, with a person, and I see it quite frequently, and this is why as you now know with all the KF .. things over we have gone in different dimensions, I put everything to all the members of the groups which are involved, exactly as it was. So they have to go through the same emotion as I hear from people, authorities from our departments, because I am a messenger for what is happening ?? outwards, but because I give the message as it is, I have no problem, because if they go to the source they get the same message. But the beauty of it is in that process the whole group has gone through the same emotion together, that when we get to the goal, and when it is there, as it has been said, it's been set, then the clarity of the soul exists, the unity of the soul ?? and this is how it is. You understand the whole composition. (1:30). You stand in front of your boss and you haven't done what you are supposed to do. You say, 'oh, it's all finished sir.' He says, can I have it please. Oh sorry I have 1 or 2 more lines to add to it. He knows you haven't done your job and you put yourself in that position of testing. By saying, there are a few lines more, you can have it by tomorrow, which way have you lost. We keep, sometimes there is a lot of pain and suffering, but why have gone through this, why have we been put through this process to learn what it is, what is the outcome of it, what is the reason we have gone through this test. If you are put in the position of test, it's different then when you put yourself in a position of test, to understand your strength, your own inner being's strength, this is mine, this is what I believe and what I do. As I said, now that I finished with the dimension of physicality, I still have to carry on a little more, that mankind keeps busy with his own dimension of physicality. The teachings will move very fast, (1:32). in a very specific direction that you all will understand very soon. Just be careful, the oven is getting very hot, the heat is understanding the existence of your own soul in the ?? Unless you want me to make you a soul machine. Jalal, Q: If I have a SF of 4 reactors, if I bring a 5th reactor on top, I will elevate the 4th one to the 5th one .. K- Who says? you might lower it or push it outside, have you ever tried it, I have. .. the SF is there but the soul of it is outside. but I don't need to move it to the 4th one boy, I can move it to the 3rd one. . (1:34).

Jalal annotates. .. (1:38). Jalal draws a SF with a 5th reactor above and he says it moves the FP up to where the 4th reactor is. Then he draws a body with SF, and draws the soul above the head. Mr. K asks why did you put your soul above your head? J- because it is, this is the field of the whole U. K - oh, go back to studying, Rick give him some of the teachings, he ?? doesn't seem to listen. Your soul is in the center of your brain and not above you. ... Whatever is outside of the body of the man is part of the universal field, it doesn't matter if you are on the earth's atmosphere, (1:40). or on the moon ... Your soul never changes its position unless you allow it or conditions are created for it to be, 14

(1:48). .. From now on there is a lot of soul searching. I'll show you a picture then maybe we show the progress of the knowledge. Shows a picture of a line of reactors.

This is how we have created different dimensions of the strength of the soul. The one of the right hand side is the first Iranian space reactor. (1:50). The blue one is the first we built in Belgium. The half sphere, two are a twin system flight and solar system, last one in an energy power supply. In the essence of understanding they all have a soul, in the process of creating the condition, we see we can, we have created a soul in each. Irrespective of color, size and condition they all follow the same pattern, nothing has changed you just change the address, galaxy, position. This is a very good example of the development of the knowledge in the physical dimension of this planet, understanding the creation of the soul, we call it a plasma in the center of the system. The truth hasn't changed in any of it. Do we create a soul for these systems that they find a position in respect to their planet soul, that they find what we call the flight. Do we set our systems in balance with the G of this planet, (1:52). or in balance with the truth of the soul of this planet. Then it comes to the point to ask wouldn't it be easier to develop a simple system which interacts with the soul of the planet which is singularity then you trying to overcome all the gravity, Inertia, and everything else that is piled on top of it. Shouldn't we design a new .. why is it that MaGrav positioning with the soul of the planet, we find a position of the body of the man or your spaceship. 49

(1:56).

(2:00).

(2:04). I'll try to explain something, put some pictures together to explain happiness. 40

(2:06). Look at this picture we see 4 states of life.

(2:12).

... The teachings from now on open the soul to the dimensions of the fields of the U.

(2:18).

.. We have accepted the conditions ...

(2:20). .. Q: What if a woman has a genetically problem from mothers side of family which is a risk to pass on to the child and she wants to have a child. (2:22). Is this possible to prevent before she gets pregnant? You see at the present time the science of man doesn't allow, we can't do anything with, but in the understanding the process of the creation and with the knowledge and technologies which are in hand, up coming and we'll see more and more. You can elevate the soul, and that's the condition, does it mean, .. the question to ask is why do we come to that point of genetic, it doesn't matter as a mental or physical condition, what did it serve that the point of the first time, what was the reason for it, the first time. Why do we get different diseases and give it to our children, we call it a disease but maybe at the point of when it started there was a need and a reason for it. Can we understand that point and change in the condition of the physicality, the condition of the environment has created that condition, and then can we interact with it, not to interfere with it, and change it according to our need, according to what we want. Maybe the creation of that soul, with what you call a mental condition would be, (2:24). the condition for the creation of a beautiful soul.

(2:32).

... We have called meeting for those of you in UC, and EC, Core Team and support of the councils. about the new global position. (2:34). From now on each council takes their position for governing ... that we can collectively decide the next steps . Any other

questions. Q: We see the interaction between the earth and the sun. (2:36). .. where can we see the interaction between the STM as a body as me and the soul of the Creator, let's say the soul of the U, there must be interaction so there must be something to observe to see where will that be? Do you want to see with the eye of the man or the eye of the STM? Q: This was my question at the beginning. So how do you know that your soul has not been there yet or is not there at the present time 37 01

(2:40).

(2:48).

.. KF has entered a new era, as we said in operations or commercial side and the spread of the knowledge and t around the world. Today we take the first step to understand and comprehend of what is going to come. ... This was just the beginning of the hard work. (2:50). .. Announcements of the new T will happen only through the global and international side of the KF. ...

I am stepping down very soon ... I have done my job. (2:52).

(2:54).

.. Please try to understand what we have been teaching you in the past 2 - 3 weeks because it's very important and you'll understand very soon. If my soul is dynamic and lead to the creation of me do I need a dynamic core to be able to travel the dimensions of the U ??? it's the same ?? and the same strength. (2:56). You have to be registered for the conferences by this Sunday. .. We'll show new T and it will shock some of you but that's what is needed...

(2:58).
