

## 292nd Knowledge Seekers Workshop - Thurs, September 5, 2019

(Soul teaching; How to control the spaceship without Chips or wires to be shown in Theran April, The brain is a copy of universal communication system which we'll replicate, Functions of the Universal Council in communicating with the universe, Those who go out and travel the universe will be connected to earth through the UC, Mankind has not been alone on this planet other beings have helped us and likewise we'll send our children to other places to learn, In some fields of the universe the brain dissolves but the soul of the man remains in the background, By positioning of the fields DC can be converted to AC and matter created, The human body is a replica of the totality of the working of the universe, The blood flow around the brain is a M field to contain the plasma of the soul of the man and the same as the M flows in the M fields of the universe, 3 dimensional Chips technology will be transferred to Huawei, , , , )

(:03). We'll try to go further in understanding the new T and the science of understanding the control. One of the biggest problems we have is to create a control condition. It means in the space we have literally no instruments. Mankind is at the beginning of a new knowledge, understanding a new T, and the latest equipment we have the latest electronics is absolutely obsolete. Totally useless. We have no understanding of the complexity of the structure of the communication in the U. (:04). We have not understood the totality of the work of the M fields and at the same time we haven't comprehended how these fields interaction within us, within the structure of the body. We always assumed that we have a brain and it tings and it does, but there are no electronics, no line of communication, no wireless or memory banks. If we look at the structure of the brain of the man it's a replication of the control system of the U. There is no difference, compacted within the sphere of skeleton of the skull and within the structure of the body. the new structure in control and managing the space programs of the future is understanding the new phenomenon, the new T, to create systems which can deliver instantaneously in different directions and strengths and in different commands. This means, when I used to be a student as a nuclear engineer, being trained to develop and understand the control of a nuclear reactor, we were not just told that this is a switch and what to do, we had to understand the geological land where we had built the structure on, (:06). and understand the structure or the building itself, and every dimensions of thermodynamics, radiation fields, electronic interference, everything else, then on top of it to understand that if something goes wrong with the ground where we have to move, what is the geological effect of it. We saw this failure in Fukoshima, the bunch of electrical engineers where sitting in the control room, and what did they do, the mayhem we have. When you train nuclear physicists, ... we were trained in every aspect that we could instantaneously make a decision if anything goes wrong, or if we wanted a demand. A lot of nuclear physicists are theoretical and a lot of nuclear reactors of today are run by electrical and mechanical engineers, that's why we see so much, because they have no understanding of nuclear reaction, once they understand what they are expert in. In space we don't have this, the ground, earth, geology is the M field of the U, that's what the platform is. The structure of the building, what it's made of, is the physical interaction of matter state, (:08). at the point of interaction, manifestation. How do we control it, then we have to understand the nuclear reaction, on top of all that what is going to happen in the reactor, which is the STM. In the new space T, we have to survive in space and be able to expand the horizon of mankind, is to be able to

understand the totality of the work the ?? strength of the U. The working of the system, how does it work, how does it interact and how does it effect us, and how can we use our soul, our body, the fields of ?? of our existence to be able to survive in the dimensions of the U. Mankind has a lot to learn. In a couple of teachings ago I explained and showed the interaction of the fields of the U and the conversion. Now there is no choice we have to find a way, for the replication of the work of the plasma, a neutron is the same as the structure working of the solar system, that now we know what they call up quarks and down quarks, we call them the earth and the moon because now we know what it is, we don't need to come up with fancy words. Now we need to understand the work that these planetary systems, stars, galaxies, the STM needs to work with and within. (:10). We come to the next steps of understanding. We gradually move from the village of the earth in the dimension of the work of the U, therefore where do we need to look to find a replication, to find the totality, and where do we need to extend our knowledge that by extending it we can understand the working , the control, the manage, the parameters of the U within the structure of the brain and the STM. We replicated the work of the solar system within our T in the past 5 or 6 years, now we need to replicate the communication system of the U, to be able to exist and be a real true man of space. Where do we look for it, where do we have the closest replication of it, .. **We found it in the inner sanctum of the neutron the structure of the solar system. (:12). We'll find the working of the communication line of the U in the structure of the brain.** Mankind needs to understand the workings of his own brain, the physical condition, material which makes the brain, the central control system, to be able to replicate and understand the working of the U, communication line of the U. In the coming teachings I'll try to bring up, and explain and many of you in the communication line will understand. .. that collectively by April of next year in Theran we can **show a full flight system with understanding the totality of the control of the system, where and how we can bring the T about, without any wires or Chips,** to resistors and transistors to Nano materials to be able to do the same in the new space T control systems of the future excursions of the man not only outside this planet but also within this planet, within the solar system and galaxies. You have to go back and understand the nature of the totality of the physical nature of the structure of the body, (:14). not only of the physical matter condition of the arms, legs and organs but the operation, interaction, energy, information transfer between the brain itself and all of these organs, where in the future as we understand more, the soul of the existence of the man, **for those who were created on this planet will be the soul of those who run and are part of the planet earth, you become the soul, and who goes out becomes part of the connection with his soul,** this is how the U Council will operate, maybe for the first time you understand slightly more what we mean when we explain this process, why we set up the structure or the UC, that **the soul of the UC members as totality become the line of the extension of the working of the U with those of the human race, which there, and travel the depth of the U.** It might sound strange to you, how could it be, but it is, this is how the position, the condition, the interaction. In a simpler way, when you are a mother you feel the pain of your child, it doesn't matter where it is, you pick a phone up and say what is wrong. The collective soul of the members of the UC becomes that mother, it feels in the line of the M field of the, (:16). emotion of the humanity as we are collectively connected, we bring the message home, there is a problem, we need help. Then you'll understand why we are structuring the whole combination of the KF work in many directions. We are creating a central point of the focus of the STM in the collective awareness, collective work of the soul of the members of the UC to be the tender lines not only for this moment, being there, what is

good for the French, Germans, or Iranians, for the French and Germans bloodline or the school or soul of the link in the span of the U. Now you understand further why we set the whole structure this way. Where now we bring the other arms of all what we set up to be part of the collective connections of the U Community with the human race. There is another point we have to understand in the whole totality of the whole understanding of the work of the U, **mankind on this planet is not alone. He has never been alone. The way we'll now extend our arms by the traveling of our children and their children into the span of U, those who were educated and they were advanced enough, in times of the past they have sent their children, the same as what we are going to do across the spans of the U.** Some of those are with us, amongst us, and have become part of us. (:18). In the process of evolution and evolving they have brought many beauties to us, this is what mankind will do in the future. But how can you tell what your son sees? He picks up a phone and says mom I am at a beautiful beach with a sunshine and a beautiful sea. Sorry we have no universal communication that your child from planet Zeus can say what he is looking at, except through the work and understanding of lines of the communication of the soul of the mother to the child, the UC to the members of humanity across the planet. Mankind will evolve, especially those who become connected to this dimension will evolve very rapidly. It's not that something new will be created, we'll become aware of what we have and have not utilized will come into operation. Now you understand why this is there and that is here and according to our scientists they say mankind only uses, what's it 5% and Einstein was supposed to use maximum 15% of his brain. **Every cell of the brain is used at all times, but man has not been aware of it, because we use it in different dimensions** and for different purposes and for this reason now we have to, there is no option, to move into the next step of understanding the construction of the control and of the communication of the brain, the cell, conversion, transformer, (:20). what we call the modem and at the same time their receiver and then at the same time the generator and everything else within the structure of the brain. If you go back to the teachings we did some years ago in the medical section on the structure and working of the brain, many of you will start making connections. You'll understand the connections between the teachings of today, the teachings of the past 5 or 6 years how everything was set to bring all together, gradually, to understand to work. But there is a very big problem. **In the span of the U the earthquakes of "Fukushima" happen, the structure blows up, but the fuel rods and the source of energy are still there, which is the STM, and the brain of the man in the dimensions of existence of different fields of the U, will dissolve. They cannot exist, it's like putting sugar in the hot water, but in the middle of the sugar when you have a lollypop the stick is still there, the center still holds, that's the STM.** Now how do we transfer all that is developed and carried by man in connection with his brain and the working of the system brain, into the system control of the STM. (:22). When mankind understands this, he reaches the level to understand the essence of his own Creator. From now on and in step by steps, with new systems that you have never seen that we are going to release, you'll understand why we have been sitting on the wings teaching that more and more people understand. In the coming time in the teachings which are set up, the demonstrations which you'll see in different conferences, we'll push mankind to move from the dimension of the matter state into the dimension of the interaction of the fields of the U. Conversion of the fields, the presence and existence of what you call AC and DC (not the Canadian way music band). In understanding the totality of not only field strength, the interaction of the fields and in what angle, in what position the fields have to interact that they change themselves from AC to DC and vice versa DC to AC, that's all it is, if mankind

understands this, how **he can work within the flat line of DC and then when it's needed to convert it to the sinusoidal or whatever shape of the fields that it can become matter state**, then man has truly come and reached the point of maturity of the understanding of the work of the creation. There is nothing else to it. Some of you, the leading space technologists, (:24). understood this some time ago in the teaching. Now we are setting up the new space center in AZ, KF in the coming weeks will develop this T and we'll bring AZ to teach these new technologies to humanity. What does this mean? It's not the soul. The sun has no beauty if there is no earth to convert it and it shows the existence of the sun. Earth has no beauty if the man is blind and can't convert the lights of the vegetation, animals and the sea in his own eye. This is where mankind has to make the change, he needs to **understand the totality of the work of the U within the structure of the physical human body because we are in a physical sense, a miniature replication, copy of the work of the U. It's not just a kidney or liver or heart or arm, the universal operation is based and it has made the man in the image of the working of the U, and in that essence, 'I made man in the image of Myself.' Then is the STM the copy of the working of the soul of the Creator or the U, and the answer is yes.** (:26). There is no room for theology but in fact, theology is the knowledge of the working of the U without understanding, needing the matter state condition. respecting the work of it, then understanding the interaction of it, and how one leads to another. In the writing of Sadid, the most beautiful poet of Iran, it's on the door of the UN, it says, we are all each part of the same party. But in fact, my soul is part of the structure of your soul and in that sense, collectively we make the soul of the Creator. The soul of the cell in the kidney, liver makes in totality by balance of its own fields in interaction of the fields of the planet, the body, working functions of the body, so it can't be any different between the cell and the soul of the body, as the soul is itself in interaction with the soul of the Creator. Now the whole structure is how did this brain come to exist. How has it found positions for emotions, different feelings, different functionalities, replacing and ?? interacting to every cell and condition which comes about. (:28). As I said in a few teachings before, **the blood flow in the skull are the M fields which the scientists and plasma technologists create to contain the plasma. The flow of the blood of the man to create that condition of the M field is the flow of the fields of the M fields of the U. There is no difference.** Then you understand, within the structure how the **interaction between the blood flow and the STM creates its own condition for creation and conversion of different cells of different strengths one to be used as the memory bank, reaction cell, emotional cell, or one to used in communication, but in fact the totality of the structure of the brain, and is of one, in essence one entity, but so micro it doesn't show, but so macro that it can connect the whole of the U.** This is what mankind, what the scientist in the coming time have to learn. If there is one thing the way I do, you bang your head against the wall, when you work in the true essence, (:30). in the space T of today as a spaceship program, the computers are obsolete, the electronic systems cannot catch up. You realize that mankind is in a dilemma of knowing what is to come but not having the tools to get there, to see it when it comes. This brings about for many of you the need for evolution, development of the next steps of lines of communication, **the next steps in what you call 3 dimensional memory banks.** Those of you who will evolve in a rapid way in the knowledge, you'll understand that the brain is made of single Gans's collectively to make the emotional part. Those of you who understand soon will come to comprehend one of the most important parts of all these technologies which I have taught is that the Gans's are the cells in the line of the communication system control of the matter states into the line and conversion into the line of communication of the

universal connection. What does this mean, what is the reality? How do we now come to convert these single Gans's in these jars you hold to part of the communication lines, instruments, communication beings of the future, (:32). for the need of the man in the depths of space. 1 one single Gans of Cu can manage the whole working of the fastest computers of today in storing memory. In the coming time, the KF corporation with leading Chip manufacturers will convert the totality of the new and present world of computers and the rest. **We will teach to leading manufacturers like Huawei, in the coming weeks, the production of the new 3 dimensional systems in the memory bank Chips of the computers, which means we transfer the knowledge** to bring and build the new dynamic memory banks of the coming time. Now this puts a new pressure on other companies, other organizations to work together, that collectively we change and we prepare ourselves for upcoming time in the depth of the U in travel, in cooperation. In my meeting with Huawei in the next coming days we will transfer T to ?? organization, in a clear way. This is the way we shall work. We work with those nations and companies who are advanced enough that they can understand the T. There is no American organization who understands this yet. The Chinese computer organizations are far ahead, it's no use dealing with a child when you can work with an adult, (:34). that he can understand the totality. The cooperation will be the same with most of the Chip manufacturers who are advanced in the cubical Chips, to transfer the knowledge in what we call the Gans T, in parallel containment of other conditions. We have no choice, instead of teaching online, (hoping) somebody might do something, we collectively bring the scientists who are in that position to be able to step up the next. Nano T is obsolete. It was a step up. Those of you who have not understood the totality, how far, how advanced you people are. It's very simple. If you speak to the leading scientists their understanding is what a Nano is, and some of them are even lost in explaining it, as K Seekers you have gone a step further, you have separated that Nano, now you have a new material, you call it, Gans. In knowledge we are tens of years ahead of the present world of science in material and Nano T. We were matter state people and ... yahoo we found Nano material, and we are very advanced, yahoo, KF K Seekers have gone 20 - 50 years ahead, they work with the next step, we call it Gans. The way the man has advanced in the knowledge of Nano T and everything is Nano, we Gans it. Far, far beyond the present understanding of the sciences of today. You as K Seekers are leading the world of science. **We need for you to understand what you really are and have really been playing with. (:36). You have been playing with the essence of the conversion of the fields of the U to the matter state of what you call Gans,** the stars. That's what stars are, they don't just become shining and become a bunch of (fire) flies and everything else. They have gathered the energies and have organized themselves that now they can give as much as they take. In the knowledge of the present understanding you as K Seekers in understanding the work of the Gans, the workings and structure of it you are hundreds of years ahead of professors at Cambridge and every other university, because they are working with donkeys. Sometimes you need donkeys to get things out of the depths of some caves but when you come out you have every other systems to move. Now you understand what you were afraid of, when they told you, you don't understand, you are too advanced, you have already entered the next phase of the knowledge and the creation. You can and you should be able to understand this. None of you have ever picked up a single Gans and seen its operation, because to you it's something there, Mr. K made the CO<sub>2</sub>, we call it CO<sub>2</sub>, we use it for the pain, but this is (like) having gold in your hand and not understanding it. I gave the gold of the U and you have not understood because you have no knowledge of its value. You know sometimes somebody brings you something to your shop, oh I want to give

you this, it's worth nothing. But then you take it to the specialist and it's a million dollar antique. (:38). I have given you the antique of the U because the others don't have the knowledge to even understand it. Now you understand how in a very simple way I have brought you to have the tools to be able to be part of the U Community, but as you never understood you have no value for it. What is the use of me explaining the beauty of the rose, the smell of it, the way I explain love in the essence of the presence and the peddles of the rose, when you have never seen or smelled and you have no knowledge of its existence. Now you know it exists, smell it, feel it, touch it, and understand the emotion it creates within the body and STM. Now you understand what the Gans's are. And if you haven't understood, Salud (good-bye) we'll see you to your great grandchildren when they might understand. **The advancement of the T is so rapid that we don't have this knowledge anywhere in the books written and it only can be taught this way that collectively we develop, understand, and change the condition.** We change the understanding and comprehension and move away from these funny little things we call Chips. It's good for the fish, but not in the computer. (:40). It's time to move, to evolve and in the upcoming time **we will bring this to the most advanced communication organizations to develop the next generation of what we call plasma Gans or the replication of the brain.** In my book if you look where I show the tube of the mixtures of the Gans's. I gave you the knowledge 10 years ago, but nobody understood. that was the message, because to you it was just some liquid colored water with some bits, it became CuO and ZnO and everything else but you never understood what it was for, what you could do with it. You were only happy that it was something to drink that it might change the diabetic, but you never understood that it controls your diabetic, **it's the essence of the creation of the transfer of the energy in the essence of interaction with the STM. It's not just a water you drink, it's the line of communication you create. You have already become universal communication people but without knowing it,** because it was not understood, it was devalued by those who don't understand through what we call, peer review. We have left our knowledge in the hands of a bunch of incompetent people who call themselves the scientists of today. (:42). This is why they object to your work, and there is something else, we don't understand so we object to your work, no there is something wrong with it, sir, you are incompetent, you are donkey's age time and not the present time. You're working in steam engines while we are in PI conditions. In the coming time now that we have set up the functions of the company in the US as an international company we'll deliver these technologies collectively to humanity into organizations which can rapidly take us to the next step. We see Hauwei as the most advanced and other companies in China who can take it further. In America we have nothing, no organization who can work with us, the knowledge is not there. They are 10 to 15 years behind G5, we are working in G9 and 10. What is G9? In one of our meetings in China there is an establishment of an organization known as G9, what is G9. G5 is the breakdown of your communication how fast, G6 and G7 become the method of feeding man in space and in disasters, transfer of the medicine through the line of the communication. G8 and G9 will become the line of communication in a universal condition, which means we are that far ahead. Now they are fighting for G5, oh my gee. We have developed the technologies and in the coming time we'll deliver them to the governments, to the nations, (:44). who are peaceful and can transfer the knowledge in the line of communication, the way you receive mobile phone message, you'll receive mobile phone food and medicine. The time of pharmaceuticals is long over. One of the Chinese scientists in the KF, 5 years ago made a system without him knowing it, partially in its infancy. The line of communication in the space dimension lies within the structure of

the Gans manipulation and working. We transfer the 3 dimensional space travel to the nation of Iran in the upcoming conferences, then it is the responsibility of other nations to collaborate to become man of the space, because the Iranian Nano technologies are on the verge of understanding it much easier than our friends who steal T without their understanding in countries like Belgium, US and the rest. Let me explain something to you so you understand how advanced we are. Why the government of Belgium decided to make me and the KF a terrorist, because when we gave them the first couple of parachutes from the Coke Bottle they found Fluorine in it, it's in their report, it's signed and sealed with lawyers in deposit banks of Belgium. At that time they were so ignorant to the knowledge that they said, Fluorine can only be used by creating Gamma rays, so he has a Gamma radiation source at home and he is a terrorist and an Iranian. (:46). The stupidity of a nation is not understanding the work of the U, the U works on the principle of grapheme. Now you understand how advanced we are, registered through the company which tested it, as you know the head is one of the heads which are going to the European Court and the lawyers for the attempt of murder of me and Fabio. This is why they were killing .. confirmation of the existence of resistors, known as grapheme in the space T, became the source of Gamma rays and terrorism. This is the ignorance of the Europeans ( .. break..) in blocking technologies. We work with the nations who understand and are open and now you can understand why technologies are transferred to Chinese and Iranian organizations and those who are advanced and open enough to understand the next steps. Not Mickey Mouse copycat nations who like to copy like the scientists in Japan and S Korea. Because there is no time to stop and hold back for the others through their ignorance to catch up. In the coming time we'll release more and more information and documents and data to the European Court of Justice that the Belgium's knew what they were doing and what was all the frame up. Their own reports from the companies they appointed to test confirms the existence of grapheme 11 to 14 years ago. These documents are sealed in the vaults of the courts of Belgium. (:48). Now you understand how advanced you all are because you have even passed the conditions of grapheme, you have moved into the Gans state. You have managed to separate that atom which call grapheme and by its orientation, the same as the brain you can clear one section, separate it, section it to be for the emotion, any frequency of the matter state in this box means joy. Now do you understand? Any M fields strength combination of the AC and DC at this point means hunger, now you understand how the new technologies will be developed. Because you have all the tools. You were happy to make more and more of it and put it in a ball and rotate it. I was more happy to individualize it and understand the work of it, the collection of it, operation of it, and the interaction of it with the universal fields. Now maybe, you understand more, how advanced the KF K seekers are compared to the present scientists. If I can compare you, you are very much like the guy who said, the earth is round and rotates and is not the center of the U, and what did they do with him, they hung him in the church. And this is what they tried to do with me and all of you. (:50). We are the man who understood, worked, understood, developed and made these materials in our bedrooms, garages and we become more advanced and through it to its beauty, understood the work of the U. Now you understand how some of you who devoted your life to this knowledge have become the true men of knowledge of the U. To you it was Gans's but nobody ever told you that you have the key, you have been given the tool to communicate and to exist in the spans of the U. Because when you can make that Gans in the strength in the level of the soul of the member of the Universal Council, that is the line of your communication with zero time, zero space. The human body, structure, the working of the brain is the simplest version of the operation of the work of the U. A few years ago when we started

building the second version of the brains in the lab in Barletta, I taught one of the K seekers how to structure it, layer by layer, and I told those who took over, that it has to be fed, watered and kept diluted that it can work. If you people understand the knowledge of the Gans T the way it is truly done in the U, if I give you the skull of a man, (:52). which is dug up from the ground today, you can build the man, build his brain, and with it through his structure create his physicality, because every curvature, every bump, in that skull has dictated what field sits where in that structure we call the brain. It's not the brain which has made the skull, it's the skull which has given the brain the limitation of its working, this is why some races have different structures of the skull, have different intelligences, why all the Chinese are like this, why the Canadians are like that, because the structure of the skull, the containment of what the body holds, and how much it holds and what strength it holds, then you understand as K Seekers you have had the tool of communication and work of the U in your hands for years. But all you did, you were happy if you had a little pain (use it for that) rotate a little of this and see what you get, as God's will. Now we train specialists in communication, in what we call, line of interaction with universal fields in the coming years and months, to be able to make man the passengers of the U and at the same time, not on his own, but in line of communication with the mother. We set up the U Council for that purpose and that purpose only. That's why they are called, U Council, it means they are in touch, (:54). with every man across this U who dares to travel the depth of the space. He will always be in touch with home. Collectively the members of the UC can recall the soul and with it bring back the physicality in time of trouble, this is the power we have given to the members of the UC. This is why they are not chosen but the soul has chosen them because the soul is at the point of inception to understand the totality. Those who lie and cheat as members of the UC will never understand the path we are on. Those who live in that life, by in the physical dimension lying and cheating to themselves and the others have closed the path to their lives to become the true members of the UC. There are very few that I see. Those who talk by word do not count, the silent majority are those who have chosen through the love of understanding the creation of the STM. Do you remember that I explained to you, the time will come that you want to board the (space)ship and you'll walk away, there are very few ?? faith members of UC and soon you'll understand. They have no feeling, they talk about it but they don't feel it. But those who are members of the Council who truly became K Seekers to become truly to serve will ?? and receive the message. As I said, the time will come when a member of UC will step down, there is a time when he knows that he has done wrong and he is not receiving, it's not there. (:56). (if for example) The member of the French speaking is in trouble in the depth of the U and there is no feeling. It's the responsibility of the soul of the member to feel it. There is nothing left, no one who leaves this planet will leave without that line of communication through his own soul, and the structure of the systems which will be understood more in the future. As I said, don't count the member of the UC, people will recognize them by their souls and not by their names and title and who they are. A member of the UC should be known by the strength and the shining of their soul and not by his talk. It will shine so bright that it will cover the span of the U and not to the eye of the man and collectively will brighten the whole of the U as one Council. We didn't set up the UN to lie, we set up the UC to enlighten the humanity and others races of the beauty of this race in the U. In the coming time as we teach and we develop physical matters for those who understand it, you'll understand that everything we lived and worked for will become worthless, meaningless. Why do we trap ourselves in the skyscrapers, when we could live in the most beautiful span of the most beautiful places in the U and still work as a secretary in the offices, (:58). of

wherever it could be. If you look, the structure of the KF is set on the structure of the global operation. We have no head offices but everyone works, time zone and place do not exist, we have started to gradually developing and creating the next generation of no time and space in different ways of operation of the KF. **As long as I have food to eat, the energy to live and sustain every cell in my body, as long as I can transfer my emotions to my lover, to my child, and I am fed, and I am kept safe, I serve the KF. This is the way I live and those who follow me will so the same. We walk away from tangibility and physicality of wealth** because the wealth is in the knowledge we carry not in the clothes we wear or the houses we live in. My house is the U and my clothes is the beauty of the knowledge I spread. **Those who follow my work will live the same life, because you'll understand that you have been given the U to live**, why have you shut and imprisoned yourselves in the village of earth. If you are happy with a donkey you are quite welcome. (1:00). **It should be clear to the members of the UC, if you lie to one you have lied to the whole of the Council and you don't deserve, your soul will not allow you to stay as a member.** Understand that as K Seekers those of you who have understood and created and developed the Gans's, you have been given a gem but you thought it was a glass. **It's how you shine light on this gem will let you to develop the next steps in the knowledge and the science of space T for man and the development of the STM.** Now for the first time maybe, many of you understand **the knowledge you carry in a single Gans, in the collective of Gans's, is the structure of your brain**, the structure of the interaction and the most advanced communication line in the U as is the replication of the work of the U, then you understand why Nano technologists are dinosaurs of the knowledge of the space T. (1:02). 26 billion years behind. In the upcoming conferences you'll see the most amazing machines. We are not going around as a show, we are going around to show what this T brings, it brings all nations in line to work together. **The purpose of the next 10 to 12 conferences around the world is to confirm that the nations of the work, the governments have no power compared to the T which is delivered and the finances which are set up to control mankind becomes obsolete.** I have been a very clever man, huh. I have taught so many of you, now the T can't be stopped, **for the man to become man of space is irreversible.** Do we need CNN or BBC to lie to us. It's reality, that we have to understand, (1:04). it's the knowledge that we need to understand, we are born with it and it's part of us. How can a system work, how can a M field stay balanced when some of its fields are connected to the wrong place. (that's good, it means they can't do anything with us. I was told that part of the talking you couldn't hear,) From now on in the teachings, especially in the transfer of knowledge to companies like Huawei we move into the PI T in the Gans state, that you will see in the coming months weeks and years, the new advanced systems. We held all of these back until the company we registered in the US, that we could spread the knowledge as one structure, not as KF which was, whatever. Now the T will be nourished by the Americans and be published by the Chinese, one needs to work with the other to bring the advancement to both. One pays and one gains. The humanity will gain from it because collectively we pay, (1:06). for it, through the knowledge, the time we spent in developing the next phase. In the coming time the micro Chips we are used to will be in the history books. If you remember the 30 years ago first mobile phone were the size of a suitcase ... Now the dilemma for the mobile manufacturers is to make it big enough that people can hold it in their hand otherwise they can make it in the Chip. Now we can make it in the cell of the brain, you don't need any numbers. The memory bank of the present computers compared to what is to come in the dimension of the Gans 3 dimensional system is, collectively you can put all the most advanced computers on this

planet, that everyone owns, every nation into less than 1/10th of one brain, maybe not even 1%. Now you understand the change and where the next phase comes. In AZ we'll bring the understanding of the controls of the system, John has done a lot of work in that part, but he never understood why he is there and is doing it, because the spaceship program of the KF will carry out in AZ and he has set the seed for system control. He has done many experiments, (1:08). to other people has no meaning, even he doesn't sometimes understand what he is doing, but he sends me a 2 minute video, and I say John I wish you could understand what you are doing, the breakthroughs in the science you are achieving, but because he doesn't have the knowledge to understand what is involved, but I see the gold. I see the jewel and in the coming time this jewel will be shared with many of those scientists who understand it. We have to show the way otherwise it's just another thing. As I said, the conferences coming up, those of you who will attend like in Austria, Mexico, you'll see the most advanced stages of the sciences where matter state is irrelevant, where we move into the next dimension of the structures of the systems which makes everything we have taught in the past 6 years, collectively as the knowledge that we understand how to utilize it for man to travel the depths of the U, and how to feel the emotion of the man who is in trouble in the depth of the ocean. Then you have to understand, if you have not, listen to the past 1 hour of teaching I have given you all the secrets of creation which man needs in the spans of the U, but you are not aware of it. A sentence or a word was specifically chosen and spoken,

(1:10). has to enlighten the STM to the understanding of that word in its application in the work of the U. You have to understand, people tell me, show us a magic and show us something. I have shown my knowledge in the secrets of speaking that you do not even understand, that is the magic. Every word and every sentence is chosen to enlighten certain souls. And as you don't see you are blind to what magic has been released. You have to understand that in the coming time **we will not need for example, fertilizers to grow the plants, we transfer the soul, the strength of the soul of the plants to the plant, and it itself by elevating its soul, it shows its beauty.** This is what we do with plants. This is what we have done in millions of square meters of plants in farmlands in China today. We haven't given a Gans, we have elevated the soul and the soul in response of being elevated has shown its beauty. This is how we'll bring what we call national food security, not by Gans's sprinkled on the waters, we transfer the knowledge of the soul to the plant so that the soul reaches its happiness at the point of conversion that it shows its beauty. And thanks to the man who gave to me, I give a harvest of 3 to 4 times, 10 times more. **We don't increase the harvest, we give the pleasure of existence to the seed, (1:12). to the soul of the seed that it shows its beauty,** and this is where man has not understood at all, any of the work. Because man has not understood the essence of the purity of the teachings. **I am Iranian and I am born with one ethos, talk good, do good, and think good (Zoroastrian).** I don't spend my time harming, I live according to the way it is, what people get is their problem, from what I get, from what I give, because it means they were there in that path to learn and it was what you call, maybe, a way of finding (out) about themselves. We work on the strength of the STM and not on the dimension of the physicality of the man. You can transfer it to any language, look, understand, sit down and **look at the latest brain scans, the latest explanation of the structure of the brain, and understand the working of the Gans's, understand the position and interaction of the fields of the U and you'll say, "oh my God". (1:14). Now we understand why the brain is made of one matter and structure, there is no blood in it, and it's in different densities, and why in certain positions in all the brain is for emotions, and for certain places**

near enough is for language. What is language? What line of communication are needed of the fields between the Gans's and that environment. Nothing is needed like the organs of the body, one organ to another organ or position. In the brain all connections, all strengths are on the strength of the MG field of every individual cell, Gans of the body. Maybe for the first time you'll understand in a very simple way, if you understand what is to be said. **In the structure of the physicality of the man every cell, as in the U every star has a twin without it, it can't find its own position and the totality of its own balance.** then you understand how feeble the sciences of today have been that they haven't understood that **every cell in the body, in essence of physicality has a dimension and replicated cell in the brain in compact field forces, then if you understood this, then you'll understand how mankind will make and replicate itself in the depth of the U according to the position it manifests itself, because that cell in that position in the toe, (1:16). is the confirmation of the field strength and collective interaction of the fields with the planet earth.** One star is the holding of totality, and one star is loose, to show what it interacts and leads to creation of the physicality. Then you understand that even the **planet earth's twin star**, in essence, is it the soul of the system or is it the physicality of the system, or is our own solar system the physical part, confirmation of the manifestation of the soul of the other part, **which not necessarily needs to have a physical dimension, but it's an energy pack which travels the depths of the U, but in balance it has not solidified itself to manifest in the matter state, this is where we see many interactions of the fields of this planet in conjunction and in response to the twin star of this planet. Not all the systems twin star is in a physical state.** So what that twin star absorbs as fields in interaction, is what dictates the condition and position of the fields within the solar system and the entities within it, be it the cell of the man in his toe. Now you understand how interactive and collective the whole U works. (1:18). In totality you understand how everything is connected to each other. I was talking to someone, if they are blacklisted by the most bankrupt nations of the world which they can't catch up with Huawei for advancement in technology, can you imagine when Huawei and hopefully, maybe we can get a few American and German companies to understand a little bit of the work of what we do. **When they release the new 3 dimensional Chips, dynamic like the brain of the man. Then you understand how we unite the humanity through understanding of the totality.** Understand the orientation, position, the insulation and isolation, the collaboration of the fields, then you'll understand, maybe the beginning of the work of the U. Why do you think we don't allow any cameras and we asked K Seekers not to take any pictures, because we want them to understand the knowledge through their soul and not by copying or whatever they might do. Those who try to copy will never understand. (1:20). Those who understand the essence of the knowledge of those K Seekers who attend these conferences will take it to go to the next level of the development of the STM and in communication with what we call the dimension of physicality of the man which is the brain. **If you don't carry one you'll not be able to reach the others.** We gave up to show anything any new developments in the teachings in the last year or so, first of all the terrorists who called us terrorists were terrorizing them and their children and their family, and secondly man copied and never extended (the knowledge), because now I have a copy I can do it so I don't need to understand it anymore. So there was no addition to the science. No more addition to understanding the work of the U. In a way by your own misconduct you punished yourself, not by us. We still teach and we spread the knowledge and some of those who (got) enlightened can take it further. **You have to understand the working of the Gans in (its) true essence, within the working of the physicality of the body, understand it in a bigger**

**dimension in the physical structure of the U and then you can replicate or in a way operate within it.** They are part of the U, most men become educated, that **will be like the memory bank of the U exactly the way you have in your brain. (1:22).** There is no difference. They hold the essence of all the knowledge of the planet, of the U, even in the solar system we have the same, even within the structure of the earth there is such a pattern. **A repetition of the hurricanes, the seasons is not just coincidental.** How it changes in respect to changes in the universal condition creates the new environment and man has not even understood this simple thing. **The memory bank, the soul of this planet has to consider its position in respect to all the other planetary systems, all the stars, all what we call the field flows within the structure of the solar system, and then it adjusts itself.** And we say, you know, we never had it so cold, suddenly it has become so cold and it's getting colder and colder. Have we gone to the memory bank of the planet, (it's) trying to hold to its structure, how it positions itself, in a way to protect itself in what's forthcoming. **All its functions are to survive, exactly like you and me.** How, where, and the way it can attain to distribute the fields and the food within it, we call it, its atmosphere and its M field flow in it. It's because we never understood the true essence of creation. Nothing is there working on its own with nothing. We are too greedy and too thirsty to see the truth, to see the reason why we are given this, (1:24). way and we are in such a hunger and thirst, that with it, **if we don't watch it, it can damage and kill ourselves.** Many of you will come across **illnesses that you cannot help because you have not understood the essence of why you got that illness.** What has changed that has brought that illness. Under the present medicine you can't explain it. We do not interfere, we teach. It's the responsibility of those who understand to use the knowledge to help themselves. **I never punish, but the souls punish themselves because it has to make a balance. It has to bring a balance between the pain of the field of the emotion of one to the other and when you have a physical body you are not immune from it. Your physical body is used to put things correct with you and if you don't understand it, it will repeat itself again and again.** It's like learning how to roll on the roller-skates, you fall until you learn. You fall, you step and you make a little bit more, you make the same mistakes, you fall and injure yourself and you stand again. And **this doesn't finish in the dimension of the physicality it will carry through to the dimension of the STM across its existence. (1:26).** There is something mankind has to understand, **why do we get old, why does our physical body, in a way comes to rest? Because it has collected and transferred all the energy it can through the blood flow to mature its soul. The point of age and physical death is when it becomes imbalance and it sees its child mature and it rests, opens the door for it to fly the cage.** There is no time that man can choose, because in fact **the physicality of the body is the twin system of the STM in physical dimension. It matures it, it gives it enough, and when it matures it allows it (free), the same as when itself was created in the womb of the mother itself.** The mother created the field interaction of the environment to give physical life and then with it, it created the soul. Now the physical life of the man matures the STM and then gives birth to it in the dimension of the U. **My work is beautiful as a creator and there is no flow in it, it's just that you do not understand the beauty of my creation. (1:28).** At the same time at the interaction of the fields of the soul, the children of the STM will span the whole of the Unicose. As I said, where do you think the stars come from. We nourish, we feed them, we look after them in the womb of the earth, in the body of the man, for them to become the seeds of the stars in the U. It is for us to understand the totality, and the interaction of the fields of the STM with its soul, the emotion of the blood of the man, what we call, the soul of the

physicality. The interaction is so rapid in the dimension of the matter state Gans that it needs a blood flow to keep the interaction of the soul and the physical soul, constantly in communication and a place for them to know where it sits, and what needs to be done, and to be contained. **Now you understand why even the blood of the man is in the Gans state. Would you like me to give you a capacitor or a bunch of magnets. How many magnets do you need in the blood flow to get everything up without them sticking together.** (1:30). In reality, if you think of it, **why do you get a blood clot** in the physical body. Have you ever understood **why you get diabetic. What is the essence of diabetic, too much communication, too much lack of information to be carried, and sometimes the system over floods itself or under communicates itself. Then you have to understand the emotion of it,** why does mankind become diabetic too, **because it creates barriers in the structural transfer in the knowledge and the energy. Knowledge of its own existence. Where due to a lack of communication, then it sees itself as what we call, lost. It's an amputation by the body itself.** That's why when you become diabetic and it becomes very high, they amputate your leg and everything else. Have you ever understood the reason for it. How simple life is and how complicated the man has made it. **Why do we create the energies which we call stress and that creates a condition of blocking, creating a dam for the full information to be transferred, because the body goes into preserving the energy within the structure of the brain, (1:32). for it to survive the upcoming shortage, then you call it diabetic.** Man has not understood the true working of the Gans, the plasma, and the interaction of the fields of ?? entities upon each other, and has called it every other illness in the name of god. Try to take the knowledge to the next step in the dimension of the U Community. **You K Seekers are unique because you have touched, felt, seen the beauty that the essence of the true creation, not the robots and the cars.** You have understood how your human body has been created and how the world of creation works and that is why every other one hangs you in the Church, because there are those of the ignorance of the knowledge of the creation. Try to take the knowledge to the next step. **Try to understand what are all these Gans's you made, what is their function, it's not just sorting out of the diabetic. You missed it. It is there to keep you in the line of communication with the U that you can absorb the energy you need for your toe, but you did not see it.** In the coming time many members of the UC will walk away because they lied to themselves and those around them, in their private life, in the essence to become a member of the UC, and those who are by a pure heart, (1:34). will stay and stand, because those are the ones who will create the line of communication not only with the STM but with the soul of the U, that it can translate, convert the knowledge of U, not by words but through the essence of the field transaction communication of the U. You'll understand very soon. We open a new dimension in the world of science, and understanding the world of creation. We have prepared you for many of it and many of you have never understood how the recipe was and what the recipe is because you were too busy playing outside. **Try to understand in more depth the work of the dynamic cells, dynamic structure, when you want to look at the physical condition how you convert the energies into the matter state, look at the organs of the man. If you want to understand the working of the communication in non-dimension, look at the brain.** Then understand that **in very simple dynamic reactors you can create, replicate the work of the brain.** (1:36). Then mankind will move into the next steps of the knowledge of the U. The problem is, there are 7 billion of you and this planet is too big, now that we let you loose in the U, **there will be 70 billion of you in the whole of the U and because we give you the right knowledge, the right condition, you don't need to go through the conditions**

**of the physical life that man has been in, in famines, in diseases, and the black whatever and white whatever (plagues), E-Coli, E-Boli and the rest of it.** From now on we teach the STM and we are responsible for that soul to take it across the U in safety and in correct conduct. Try to realize, understand the interaction of the fields and not the physical manifestation of the fields. Try to look and understand in more depth the real position of the Gans's because this is the next step for mankind to enter, (1:38). to be able to make a transformer, a translator for the knowledge of the U Community to man. There are those who claim they are not from this planet and the rest, and they stand up in some conferences, because I played this game. And they don't know that I know who they are. We measure the essence of the evolution of the man through the collective soul of one. **The faster we go through this phase of understanding, using, operating the fields of the U, then we don't even need the Gans's, we work non-dimensional, non-tangible, we feel the whole of the U and become part of the totality of the creation.** I have taught those of you who are enlightened a lot this morning. I have taken you through the non-dimensional work of the U and it's for you to achieve and to take the next step. It's for you to bring the transition, for yourself, and if you are of the ethos of the KF try to teach the others, (1:40). Understand everything from the first teachings and what you have understood becomes your specialty, I am special for understanding the fields of the soul in the pain section, because I have that field strength within me that I have developed. You become specialized and you can teach the others. Share the knowledge unconditionally, but at the same time try to reach the totality understanding of the knowledge. **You do not need to (be) enlightened, we have already lighted the light, you have to be able to see it to be able to find the path. Seeing is not with the physical eye, it's by connecting to the soul of the knowledge that you can comprehend it and translate it.** We'll start taking man to the next phase of development, that the time of Gans's, making Nano material, now everything makes sense. How can you cook when you have no ingredients. Until you can taste it, put it on your tongue and understand the texture of it, how could I explain the fields of the U and the STM (1:42). if I would have not taken you to be able to make the first elements of Nano material and then feel the fields of it with the patches and everything else. Try to look beyond the physical condition of the Gans, try to look at the interaction of the fields not the matter state of the fields, try to understand which materials, conditions of the same materials changes, what it releases and what it absorbs, and what it releases -- what information becomes that, and what it absorbs -- what information gives to that. As I said, **I can't write anymore on the board and I can't show you systems for it, you have to understand that you can replicate it within your soul and maybe some of you will integrate it with the system.** Try to what you don't understand, to convert it to a bigger scale in the work of the U for you to see it. The knowledge available at this time collectively on the Internet is huge and many of it will show you the way, (1:44). and the working of the U, but even the people who did it do not know what they have done. The knowledge is collectively complete but you have to decipher it, would you like to be a heart surgeon or a farmer. Are you farming the fields of the Gans that it can be harvested or are you searching so that you know how to collectively cut and put certain energies in certain positions that life can carry on. In fact, **in essence there is no difference between the one who farms and does the surgery in the world of P I T.** In the recent past when the scientists got together they said, oh when you put this material to that material you get this gear box and that gear box, the performance will be better, bla, bla. Then the computer and electronic guys came around, if you put this Chip there and that Microchip there .. you get this faster speed, bla, bla. Now the new generation what we call the K Seekers we do

the same in the knowledge of the Pl, in the knowledge of the matter state of Pl confirmation of systems and Gans. Move away, those of you who understand it, in the physical dimension. Move away from it and try to develop not only by holding the Gans but understand the fields of the Gans, the taste of the Gans, (1:46). the need of the Gans. It's not just there as something, it's giving to you and it's taking from you. Have you ever started to understand it? How many of you have seen the aura of a Gans, as you claim you can see the aura of a man. **Because it's a field dimension, it's contained and it wants to confirm its existence to outside and he wants to see how the outside feels and tastes about him.** The knowledge is written in the language and pen in the STM and not in the pen of the physicality of the man and machinery. This is what I said from the beginning that everyone takes from this knowledge according to their intelligence, it means according to their openness to be able to take their own soul, understanding of the work of their own soul to the next level that it opens them to the working of the U. Now I hope you understand where we are all moving to, and where the destination is, and what the destination is in a much clearer way than what you thought.

(1:48). I have been talking to myself. R- we can hear you loud and clear Mr. K. **It's the waking up call for the STM to understand the essence of his own creation.** I hope you heard it with the ear of the soul and not with the ear of the man. As we have no questions we say good-bye. I hope you learned a lot today and you can comprehend more in the understanding in the future teachings of the work, the true work of the U. No questions. It's strange Alzar has nothing to say today. And no questions. (1:50). Q: ... you have flabbergasted us, we are speechless. Thank you very much. You're welcome. My knowledge is free I hope the mankind uses it freely to bring peace and understanding of the U. Q: I think many of us have understood this and we are trying to do this in your name. You do it in your own name and in the name of the Creator. We are just messengers. We have one from "Skywalker", who is the skywalker, (1:52). when you don't have a real name you can walk the skies, when you find one come back. Q: Where is my second soul? Hah, hah. You have to find it not me, I'll be busy with 7 billion souls to find. Q: Am I hiding in the creation or enhancing it with the field? You're not hiding it, how can you hide it when you are ignorant of its existence. You can hide something when you know it exists that you want to hide it. It's hidden to you because you haven't been enlightened to understand it. It's very much like you are short-sighted and you can't see your glasses on the table and you say, where are my glasses. (1:54). The things in the room are still the same, you can't even see your own glasses how do you expect to.. Humanity has and will learn in a very short time in understanding the work of his own soul as he matures to understand the interaction of the fields of the U. As I said, we'll gradually move into new territories of knowledge, then you'll understand why we thought about the STM. You understood its existence, now you have to understand the work of its transformer, translator, its converter, what you call the brain, and once you understand this man becomes free to travel the depths of the space and be able to translate the knowledge of the U into comprehension of his soul and conversion to his physicality. I cannot write on the board, this is where the emotion of the pain is and it's connected with lunch there, and then you want to go and find that organ, how it is, and what it is and which part of the brain you want to take out to copy. (1:56). No other questions? It has made you think of your own conduct. And it has made you think of how the whole thing works. We are here to inspire for man to understand the potential of his own soul, his own existence and nothing else. As we have no more, I think what we taught today will take mankind thousands of years to understand the totality of it and the power of the knowledge. You need to listen to it

maybe a hundred times to understand this teaching. **It's the first time we open the door of the knowledge this way and there will be more** and more of these as we go along. In what I see and don't speak it's not my weakness and ignorance, it's my grace and my, what we call my understanding of the totality. Nothing is hidden, in no shape or form, (1:58). In the dimension of physicality or in the STM. I think we'll call it a day and it's for many of you to start understanding the work, the interaction of the fields of your life, or existence, within the structure of the Gans's. You have tools to work with, to understand with. We'll show you the power of the Gans's that you have never seen. We'll show you the interaction of the fields of the U in the upcoming conferences. Try to attend if you are there to understand the totality, and in time, in a very near future time, through different ways we'll try to extend the knowledge, that you'll see the presence of the those who are amongst us, they have been amongst us and live peacefully with us, but they are not from the soul of this planet, but their soul belongs to other part of the creation and they have to be respected and loved and looked after the way they have looked after us. Without them, man would have not been here through many troubles and many ups and downs in the life of this U, this galaxy and this planet. We thank you for your presence. Thank you very much for today and we'll see you next week **and try to understand the teachings of today, there is a lot of knowledge, it's the level of the evolution and the change of knowledge to a higher level.** (2:00). As I said, for maybe the first time you understood why and how we taught you, the reason we brought the knowledge of the Gans to you, because it's the knowledge of your own life, it's the field interaction of your own soul and you have to know.

Thank you very much for today.

Video

END
