

## 293rd Knowledge Seekers Workshop - Thursday, Sept 12, 2019 (BLUEPRINT: , )

(:06). Today's teaching is going to be a Blueprint, as we go into a structure of life, as we watch the birth of a child, man has to understand the birth of himself into a new dimension... progressive development of the STM. Today's teaching will most probably be ? (:08). it will be remembered as a pivotal point of the teaching and in time as we come to it ???? Usually I don't give indications about teachings but today is one of those, what we call watersheds in the science of man. We'll see how K Seekers will handle it, some of us will have no idea what is going on, and some of us will never reach that point to be able to understand the beauty of what is to be taught today. Many of us will experience what has been the dream of the man for centuries, but on the other hand we say it's a blueprint. As with the blueprint for the MaGrav some people have developed it to its beauty and some have never achieved and complaining that it doesn't work. So it will be the same with the teaching of today. We are going to split the teachings, we'll take a break of about 10 minutes and then we'll start with the teaching. I hope by the time we get to that part of the teaching you'll all understand what it is. Maybe it might change some of your lives, maybe some of you will never understand, and then at one point when you come to it, dejavu .. I have been there, I have been told. I never knew, now I feel it, I see it. In that process many of us fail to go through the transition and then a new dimension ???? (:10). I would like to let you ask questions about what was taught last week because many of you were in silence and then we can build on it to the teaching in the next section. Any questions? (Can you adjust your microphone? We'll have this for the next 10 minutes, then we'll change over. ) Q: What do you think about the Artificial Intelligence (AI)? (:12). What do you call AI. ... If it is intelligence how can it be artificial? How do they know if they made it? Q: One question geneticists have is what about the Chinese intervening with all their cameras on the population? What do you mean intervening? If you are talking about the face recognition new cameras. Yes. Why does the west complain ?? facebook... all the channels you are on, they use it. If you look at any other programs which you carry, say Whatsup. They make albums of your pictures ... how do they do that? Why do we go back and we say the Chinese. Intervention in the West is worst then what people talk about China. At least China uses it for catching criminals and the rest. In the West we are ?? day and night, every single picture you take on the mobile phone is artificially intelligence classified. (:14). Or put in the ?? who is who in the pictures you have with what. I think there is a huge misunderstanding in the West with what they want to tell us .. and other places. You have the same thing in US and UK, you can't be anymore then a few meters from a camera at any time, it doesn't matter where you are. It's not artificial, at least it's used for something maybe in the future, maybe we structure this AI when we have this knowledge to identify which one of us is from this planet, which one is from what section, where and what we have done to ourselves. 58

(:16).

.. it depends on how you use it.

(:20).

..Q: You said we could reconstruct any person if we had their skull, now would we need the soul's permission to reconstruct it? No you would need to know how to reconstruct the matter state of that person. You need to understand how to convert the energy of the Gans's as we call it, to reach the matter state. You have to create the field strength and

the dimension of the fields to get to that point, and then it reconstructs itself, builds up itself. Q: We would have the matter state of the person, but we wouldn't have their soul in it would we? (:22). Do you want to try it.

(:26). Take a 10 minute break , the video is about 16 min) Video "Plasma Science in Action" excerpts from KSW 270:

(:43). Thank you for today the introduction. I think what we come to understand that we can explain it in 2 ways. We spoke in this video about the STM, but what do we understand by the soul, in many of the teachings over the years we have come to understand the presence of soul. (:44). We speak about the STM being caged within the brain or the physicality. What is interesting for many of us is the last trip, the last change of address, the last dimension in physicality where as we were born from within the womb of the mother, and the first time we come from the fish tank out and we take the first breath, we cry. Is that cry from not wanting to be in this environment or is that the cry of joy. Then mankind has to learn the next step, what happens this time when our soul is born into the next dimension, into its own universe into its own world. We came from a fish tank into the atmosphere of the man, the planet, where do we go, the STM goes when it takes the first breath in the dimension of the U? Does it like a shooting star shine and zooms off, or does it very serenely take its position, where it has been allocated to be. (:46). In the world of the man we are handed over to two strangers we call our parents. Who receives our soul on the point of arrival, on the point of departure from the physicality of the man. Are we born to, are we entering into, do we take a leap of faith or is somebody waiting for us on the other side, greeting us, welcome home, this is your mom, your dad, this is your Creator. How do we react or do we ?? meet again like the human race, wait for 18 years or 10 years to mature, but in the cycle of the U, 1 or 10 million years to be able to take decisions. What is the destiny of the STM on its birth into the dimension of the U. But there is something very interesting that many of us in this journey have been practicing, we go to sleep and let our souls free, it travels and comes back home, goes out on excursions, to parties, to see family, it goes to see different things which it couldn't see in the dimension of physicality because it's too far and too far reaching. (:48). Then it comes back home, is the departure the last good-bye to the physicality different then when the time of the STM left the body for the time of the rest of the man while you're asleep. Are we born in 2 different dimensions once we go and our soul is free, into a new dimension or when we go to sleep. Would we be able to delay the process of the physicality departing by changing it, but at the end when the dimension of the physicality comes to ?? its maturity, where does that soul get born into. As in the dimension of physical life everything is similar and repeats itself in different dimensions and directions, is the departing of the STM from the physicality at the point of the last good-bye takes the STM to a new dimension. Or is it or has or will it be part of the same trip as we took the night before when we were still in charge of it. In a way what's the difference when the man learns to detach from the physicality of the body, (:50). and takes a trip of ?? across this U in the dimension of the STM, and when the physicality says good-bye and separates from its partner and the soul enters a new dimension of life. Why mankind have mankind never understood the process of entering the dimension of life and we call it death. Is life ?? to the physical dimension to the eye of many and why mankind cries to breath one more breath of air ... one more day .. seconds to be in the dimension of physicality. .. we are

afraid to speak about it because we are afraid to speak about the unknown. But in fact our body from the time of inception, from the second we are handed over to this planet, the second we are conceived in the womb of the mother, works, makes its way, continuously develops, condition, to reach the point of separation of what we call death. Why is mankind so afraid of what is time to be of. Why we have never understood the process. What is the fruit of living days, years on this planet? (:52).

.. When the physical body of the man delivers the soul into the U Community, as is our parents, (:56). we are delivered to in the hand of at the time of birth, is it the soul of my Mom and Dad who is waiting across the threshold we enter the other dimension. Or is it the hand of the Creator we are handed over to as the father. But there is one important is how can we take this soul or excursion, how can we be able to open a window to see other dimension of life. Unconsciously we do it when w fall asleep so why hasn't mankind learned to do it consciously or are we afraid of what we might do consciously with the soul which we have never known to be in our hand. We die and we hand over, we die on a predetermined time when the energies and the fields of the physicality have handed over themselves to the soul. If you look at it, we slowly age, (:58).

.. point of knowledge to be able to separate the STM from his physicality by choice, (1:02). not by accident or predetermined time ?? of the physicality in the dimension of the energy of the body of the man. How many of you would take that trip. How many of you still need the physicality in the dimension of existence and not necessarily as we call it in Coma, but in physical dimension, move to a new level of understanding, that you can control own destiny of your soul, with the wisdom, with the openness of mind that I am not the controller but I am the observer. How many of you would like to take that trip, how many of you wish, and have done everything from god knows, drugs, different mixtures, to alcohol, to everything else to try to reach the point of separation of the soul that it has nothing to do with the physicality but you don't want to call it, a committing of suicide. Separation as I have I can see ?? and everything else you talk about. How many of you would like to take that trip but be assured that the soul returns home. (1:04). The teachings are not about any more building a reactor or power, something to be shown, but it's to feel the essence of the soul, the existence of the man.  
17

.. Many of you are scared of this topic because you have no knowledge of the STM and the soul of the physicality. And many of you will try different ways and say it doesn't work because I have never been enlightened to the limitation of understanding. (1:08). As I said in some teachings before, how and why we allow the STM in the part of what we call, in the strength of what we call the sleep time, to have the freedom to take the foot of fancy and travel to different dimensions and directions. Where during the daytime like the separation of the field of the sun, higher strength still travels the dimensions of the U. Interaction of the STM will be called a dream, it's not the exclusivity of the time of the sleep. It is continuous from the second man is born, man is created, the STM of the takes these what we call freedom fancy footwork in the dimension of the U, but still is continuously in touch, is part of, but at different strength to all of us, and in some cases now that we have the T to see can dissolve and evolve the body of the man physical dimension into no matter state for a split second and then

return it back to it. I don't wish to be in the point of accident to separate the physicality, the soul is aware of it, transfers the totality of the energy of the man into a different dimension and then returns it back to its physicality. (1:10). Then you carry on as nothing happened. This soul has the power of transmutation of it, to transmute it into energy and return it back to its physicality. If you have been clever and you have been around the Internet now that we have cameras that can record this we see many of these. People walk out of accidents that is impossible, things happen and goes through them. Are these aliens? Or, in fact, is it the dimension of the soul elevating the energy of it to transferring the whole body from the dimension of physicality into energy, and then return it back, because it's not time yet, it's not ready to go, something just happened, I have the energy, I know the knowledge, I have access to it, I transfer it to fields, and when the car passes I return it back and out of nowhere the person gets up and walks. The person says, have you seen these aliens. Have you understood the work of your own physicality. Then it comes to it, if our soul can do such a thing in a split of second when it's needed to survive, to keep the dimension of physicality, then why can't we do it. Which part of the show have we missed, what have we missed in the dimension of creation. How many of you would like to learn the method, the way, the approach, the control. Many of you go to South America to take all sorts of things to go in the dimension of bah la bu, (1:12). and some of you take drugs to go that way, but if you are a wise person you can do it yourself.

... if you go back in some of the teachings I have explained by the rhythm of breathing, by flow of the fields, by change of the blood, we release the cage, weaken the cage, we allow the bird to go for flight of fancy. Then knowing this, how would you be able to let that happen to free your soul without wanting to have the ?? soul of physicality to be with it to know what it is doing, and let it come back. (1:14).

(1:16).

(1:20).

(1:24). (break in connection ..) (1:28). What I said, accidentally I disappeared as a voice, as a noise, as a line of communication, but how many of you weren't sure I would come back? How many of you were confident I would come back. He will come and tell us more about a dimension we do not know. Would we have that trust in our soul that he'll come back and tell us more about what we don't know and would love to know. Was my absence of 4 minutes a test for you to gain confidence in your own dimension. He'll be there he'll bring it back and the pleasure of existence will be confirmed that we can learn more. He'll bring more knowledge, can you have that confidence with your soul, yourself. If you can trust another man, another soul, (1:30). why can't you trust in your own soul, dimension and strength, or do we have to go and take all sorts of chemicals that shamans do and the rest to experience, because we in fact, do not have the strength and confidence in our own way of existence, ...35

(1:32). I told you today we are doing a Blueprint Workshop and I think many of you have started the Workshop and started thinking how can I plan this WS ... 15

(1:34). .. We made a commitment, thou shall not steal. We have to make sure the Soul of Physicality accepts our departure, the last handshake. Transfers what it feels it needs

to be able to carry on with its own dimension on this planet. We need to understand to what depth are we prepared to  
(1:36).

(1:40). Would my physical life miss my soul, which has left me behind, maybe for an hour, a day, or some time, and I wait for it to come back, but do I wait for it in a state of Coma and lie down until it comes back, or do I carry on in the dimension of physicality until it comes back. Is our soul ready to take to understand the totality of the work, 59

(1:42).

.. You know most probably more than the prophets of the past about the truth of the STM. (1:46). The question is were they ever revealed the truth about this, or the comprehension was beyond the time.

(1:48). .. Today's KS Workshop has a purpose and a reason and in the coming weeks it will be clear. As I said a few weeks ago we start setting the scene and in the coming weeks and months you'll understand more. But we can't put it right in front of you what it is, you have to be in a way nourished, taught, enlightened that when it comes to it, like Gans's you already know it. And it becomes a second nature. But what the point is that is death, the physical death of the man, separation of the soul from physicality the end of the interaction of both the physicality and the soul? What does that mean? As John said, if I pick up the skull, (1:50). and create the man would I bring the STM in, and then when you bring the STM into the dimension of physicality and the guy died a thousand years ago, he knows swords, horses and donkeys whatever, now his soul has to deal with jumbo jets, Mercedes and everything else. Would you like to put that soul into that condition? (now we know why Indians cremate) Or would it find a sword somewhere and do what it did in its (previous) life on this planet before. 40

(1:56).

.. I let you see the soul of Christ, would be fulfilled in Theran..

(1:58).

(2:00).

(2:02). .. In the coming time we'll show you the creation of the soul ..

(2:06).

(2:10).

.. Any nation that obstructs it will be handled severely, by their own structure of the work, not by us. (2:16). This way no nation will be behind or ahead ...

(2:18). ... Do you remember they said when he comes everything will change. He has come and everything starts to change from today. ..

..As was our wish those who have been Bolton, have been Bolton out, that was our prerequisite for peace talks ... (2:26). The whole humanity is getting ready for peace ...

(2:32).

(2:40).

... Any questions or shall we call it a day.

(From here on talk about the company until 3:26)

(2:42). Q: Does my soul carry all the memory and strength of emotion at the moment of detachment ... ? Next question, you should have understood in the teaching, you're still stuck in Gans's. .... The K Seekers in China .. have started a business in water cleaning.

(2:44).

(2:50).

(2:52). .. Make sure you put back into the KF what you take and has been given to you freely that it can keep the cycle (:53 break in audio ..) (2:56). It's the responsibility of K Seekers, as we have entered the American stock market we make a very clear distinction between the KF work and the stock market and anything which is set outside the stock market publication is to do with the KF and not to do with the Stock Market. Usually the trend is that people start with a little shop and it becomes bigger and bigger and then they become a foundation and create wealth. We did the reverse, first we did the knowledge spreading, we have built it up to a commercial organization to feed itself in a very big way. We can not separate now that we have gone into the American Stock Market for you to teach, to stop the sharing of the knowledge. This is not our ethos, this is not what we came here for. That once we get to the market and get commercialized and we say good-bye and that's it the knowledge goes the other way. We have gone opposite, we are strengthening it because strengthening a public company strengthens humanity for the spending on the welfare of all of us and how you support it is totally your responsibility. We have valued it, the market share value that you see has no relevance to the stock value of the KF. We are an intellectual structure, (2:58). these shares when they came

.. don't think I can buy these cheap and make a killing, you'll kill yourself with it. There are limited shares in the market and any further shares will be tightly controlled by the KF management team and how many shares the company will release to bring the need of the KF of the new global corporations in delivering new products across the planet. Just because we have gone into the market and are selling shares doesn't mean we'll stop teaching. (3:00). ... I said to Armand, we are stupid because we built up the KF, Armand and I are carrying the shares for the KF and now we gave it away to public, to people. I said, we are stupid in believing what we do is correct that it brings peace, but we are stupid enough to believe mankind is not stupid to make the mistakes of the past. But I don't think we are stupid, we are very clever, we know what we have done and it's a joy. We transferred most of the assets of the KF into the hands of the new organization on the American Stock Exchange and the coming weeks we'll transfer more or less all the assets into Global. So when you buy shares, you buy shares of our work and you have to bring your work in too. Don't go and take shares because they are for pennies and I'll make money, ?? if I make money off the KF I'll give it back. This is not the way to be done. (3:02).

.. in past few hours we have become part of the stock marker, (3:06). the name has been kept temporarily, at least for awhile, will be changed to KG Global. All the

communications will go through KFglobal.global KFG.global .. we'll inform you of the structure as the team sets it up. 20

.. The KF doesn't hold any shares in KF Global but through proxy, the whole of the operation of scientific development and the need of humanity through it.

(3:08). When you go to buy shares in the new company, it's not the stock market, it's sold under a specific category of shares and it's the market we put on it until the market realizes the evaluation of the T. So you become shareholders, owners of the share in understanding of the price, which is set for the KF to achieve its goals, not what it is in the stock exchange. Those shares in the stock exchange will stay that way, and we know as they realize valuation comes up and people start trading in the prices, it will come to the price we set and above it in the next 2 years. ...

(3:10).

.. you will not see any shares in the market ... we hold 100% shares ...  
.. the take over will be announced ..

(3:12).

(3:14). .. In Ghana the government ruled in favor of the KF .. we'll move back .. the investigators have found everything in favor of the KF. Now we are waiting for the president to make the final decision. As I told them today we'll announce this, as still today the owner of the KF is outside Global. (3:16). If the money that was ?? stolen is not returned we'll ask the no one invest in the state of Ghana until the government stops this kind of behavior. 15

.. Armand writes, congratulations, officially you are trading in US stock market are we going to issue some shares to God, He will be very happy, good job boys, He will never imagine that the knowledge of the U is trading in the stock market. So we even brought the knowledge of God to make money out of it, to bring peace. So. (3:24).

Any questions.

Jalal. (3:26). Q: What is bronze diabetes? Would you like Rick to bring it up on Google.

(3:28).

.. It happens only to that island, they never moved out of the Bronze Age ..(3:32). I don't know, I never heard of this disease ..

(3:34).

... Q: Mr. K said the blood is in the Gans state, so with blood transfusions, the emotion is delivered into the blood (3:36). ..

KF will develop pure blood ...

(3:38).

... Q: What is Shingles? (3:40).

(3:44).

Q: When your soul leaves the physical body .. is it more beautiful, because I think I had experience of it? What do you mean by that? Isn't it beautiful. Q: You can see every single cell of the trees .. K- Everything shines bright as you want to call it.

.. (3:46). she tells her experience ...

(3:48).

... K- I think you are definitely in love with your husband, he must be a lucky man and did you tell him what he said to you, or what did he actually say. Q: ... the physical body doesn't justify the planet earth...

(3:50). ... Okay we are nearly reaching our 4 hour limit. ... the process of teaching. We'll understand more and more, we are teaching in this way. We'll carry on and go forward in all aspects of the development of the T. ...

(3:52). Our lawyers are putting things in order in our appeal in European Court ...

(4:04).

Video
