

294th Knowledge Seekers Workshop - Thurs, September 19, 2019 (Lucky date, Discusses Belgium court case, Announcement of KF Global trading name Markray RVBR, ,)

(:06).

(:16).

.. Today is a beautiful day for all of you. (:20). Many of you have been waiting to bring the KF into the international arena the way it deserves, not the way the Belgium's wanted it. 09

.. Government of Ghana investigated the case .. (:22).

(:24). Chinese Republic, which stays independent from other sides of the work. I have to read from a script which was given to me. Today is the 19th of the 9, the statement reads as follows: I am happy to officially announce that the KF Global which is an entity, has been formed solely for the purpose to introduce Keshe science and technologies to the world has become a publicly trading company. It's going to be trading in US, OTC pink sheet market under the ticker symbol, RBBR, the name of the company, Markray is our trading name. I being the officer and director of the trading company have to comply with certain laws and regulations of the US, thus I kindly ask you not to ask me further questions related to the Keshe Global company, rather than to start to follow press releases to be issued via press wires and news wires under the symbol of RBBR (?RVBR) . With this ?? news I consider it to be another achievement for the KF. I think this is a very fair move from our side to let people from all around the world to become part of our journey, certainly have a fair right to derive the benefit (:26).

(:28).

(:30). Armand was a stockbroker ..

.. KFGL is symbol of Stock market, ... K reads Armand's letter ...

(:32).

(:36).

(:40).

(:44). ...

Any questions?

(:46).

(:48). .. Q:

(:56).

(1:00).

(1:06).

(1:08).

(1:14). change topic ...

(1:16).

(1:20).

(1:26).

(1:36).

(1:38). We become more intellectually open minded and we make things which we think it was not possible to make. If you understand the application of the 3D printers, now with the new technologies what you printed from the stage one has a forth dimension to it, you can give it a soul from the time you print it. It's possible, now we can do. If you printed a cup, a doll for your child, you can with the knowledge we have to embed a soul in it, that truly a child enjoys having a doll. The knowledge is beyond what you can imagine, but now we are going to release. Then all we need to do is to understand the truth about creation. Once the 2 sides of our operations open up, which has been done today in America and was done in China some time ago. We are going totally independent we are not even relying on cooperation with the governments. They're too slow, we can make a decision with ourselves or we can make an announcement somewhere and some official somewhere will sign a paper. It takes too long. The Chinese operation is in the hands of the KF and we are not relying on anybody else ... (1:40).

(1:42).

(1:44). .. The new technologies that we'll reveal step by step in these conferences. We will not show you the system, it's a black box, but where and the way we developed it will guarantee world peace. I'll make the Americans dependent on the Chinese and the Chinese on the Americans, like the air they need to breath. I make mankind to be one, and the science where we are it will happen. When you have a totally different structure in the world of health, energy, there is no need for .. One of the problems for mankind is that he has always looked for bigger and bigger, whereas the world of the U works on the smaller and smaller. Where you have a truck you can heat one building, when you have a neutron you can heat the whole city. If the world of scientists and the world leaders understand this, they'll understand the power in the knowledge I have released.

(1:46). In the world of PI it makes this world a child's play. They are looking for bigger and bigger while I am looking for smaller and more powerful. There is an old English saying, it's not the size which counts, it's what you do with it that makes the difference. You can do a lot with the PI T and its minute fields, more then what you can with aircraft carriers. With one neutron I can paralyze the whole aircraft carrier and I still have energy left to handle 10 more. This is the beauty of it, and even you as KF followers of years have to rethink, have to understand. One of the first working power stations you have ever seen was the small 4 reactors which Armand made, and we stopped the system, ??? If you can reduce the size of that reactor by another 10 fold, you can literally lift the whole planet. We'll introduce very soon into the space dimension systems which will stop any meteorites, (1:48). or asteroids that hit or enter the earth's atmosphere. We extend the protection to all the rays of the sun which comes in different dimensions at dangerous times. There are a lot of rays which enter the earth's atmosphere that we are not even aware of, which cause specific problems, now we have the knowledge we open the ?? to it. It will be beautiful to land the human race on the moon or anywhere else, or have a party in the middle of nowhere in the space.

And they'll all understand it. This is one of my wishes that all of you will have, do you remember the old Volkswagen beetle, it looks like a spaceship, Volkswagen can bring it back with just chairs and the body. We'll all become spaceship travelers. The new technologies that we'll release, you don't need beds to sleep in. I will explain this in the new science which will come out, you have to understand, if you can transfer the energy through your soul, do you need the rest time, as it can recharge the whole physical body in no time. these systems are well tested. I did not hide T from mankind, he didn't have the comprehension of it to understand to be able to use it the right way. You don't give a gas can to a little child with a matchbox in his hands, (1:50). he has no understanding of the use of both and what they can do with each other. We take the match away from the man which the killing and the rest, then we give him the gas bottle that he can do a lot of things with. As of the past few weeks we started to release a lot of knowledge which is unknown to man, you can't even think of it. When we made Grapheme we became a terrorist, now imagine what I can do with you, and change your whole blood in a few seconds to a clean blood with no infections. These technologies in the coming days and months will be released, but as you all know you are going to jump on me, you did it before, and I turned out to be right, and you proved to be right, we don't say who is wrong. When I gave the key to the governments you all jumped. I was called a traitor, he is the same as the rest, and then I brought it to you lot. You lot developed it more than the governments, so you got one point ahead of them. In the conferences of the Ambassadors, .. you have moved on, we brought the two, governments and citizens together to watch what is to come. Those of you who will be present in the conferences around the world, you are not there just to be there, you are there, you become the watchdog for the governments. If you don't do what should be done, then we are going to do it for our nation. Now you understand the purposes for these conferences, it's not that one crying, (1:52). he is a terrorist because they can't get it, and the other one telling me, that you betrayed us. Now when you are in these conferences next week, those of you who are coming in, it's your responsibility, not mine, to explain to the ambassador, heads of state, to the national people who come in, what is our ethos, what is there to come. You are not just there to see a new T, if you come that way, you come blind and you go worse blind. If you are coming there to transfer the knowledge, the way, the ethos of the KF, with these diplomats, this is what you are there for. It's the first time as a powerful organization we dictate the terms, the sharing of the knowledge and T. Those of you who attend the conferences you are the ambassadors of peace of knowledge. I don't think any of you just on the street heard of the KF and bought a ticket and paid the money to be there. You work on the ethos and you understand the work and you always wanted to be and now you are to be. We have to explain, we don't know how many ambassadors are going to turn up, and all 20 of you don't gang up on one. This conference is not by presentation, it's your presentation to your governments. They have to understand that as an organization we control the knowledge and with it we have a wish. That's why we didn't want 100 or 200 people coming to this conference. (1:54). I wanted it very small and limited and I got what I wanted. It's the job of those of you who attend these conferences, not only to interact with each other, to understand what is the next step, but it is your job, you are the ambassadors, ??? the human race for your governments, it's you in these conferences. they have to understand what they are there for and they have to convey the message, what they can do for. This is the essence of these conferences, what we have set up, showing the knowledge takes half an hour. They come in, see something they don't understand and they go out. The 2 or 3 days that they are there it's for you to enlighten the diplomats. The love of knowledge is the reason for your presence, not the food or seeing the knowledge. You'll

find out that a lot of work will be done by you and not me. You asked, you have to share, now you got the responsibility to share. I provided the ground. the achievements in China is enormous. We see it in a lot of work. There is some, what you call, the same situation we see with the Belgium government is going on in China. Just ignore it because these are the people who could not get the T and entered into what are false agreements, because they thought they can get their hands on it, but they don't realize we are much more clever and the things go by the STM. We see the same process, (1:56). as with what we see with the Belgium with a few Chinese, but in fact 1.4 billion won't be touched by a hand full of what I call incompetent people. In these conferences it is you who have to shine. I am ??? this is the process. Some of you might wonder why am I there, why I ended up to be here. You are not there just because you had the money, you are there because your soul already decided it wants to be there. You'll understand in the future. It is the need of us to change and since 2011, 8 years, you wanted to have, now I have trained you for 6 years, it's a short time. You transfer the ethos, the essence of the knowledge, not the machine on the table, that's just the magic, what you call a cup with a coin under. I am just a magician moving the cups you are the coin. Do not come to these conferences, (if) think, I am going to see something, you are coming there to serve something. Sorry about that, you didn't choose, your soul has. The new T's are so powerful that we will change the course in such a rapid way, but a good and clean way, without harming anything. (1:58). The interaction of the systems for energy transfer is so simple that I think Tesla would turn on his grave. It's our job to do and it's the power of the knowledge. Any other question. Q: According to the latest news in Chinese the pigs are infected with the disease, what about the use of Gans water? We have an article in the Plasma Times. We have already solved this problem. One of the KF followers got hit a few weeks ago with the disease and he knew what to do (2:00). and the next day the pigs didn't have the disease. It's very straight forward, it's a specific way and we have tested it on a large number, over 800 pigs. we don't have the facilities to deliver the solution today.. China bought a large number of pigs from the US, this is not accidental, they spread the disease for this purpose. They worked on it, the Americans infected right across to get what they wanted. National food security. (2:02).

(2:04).

... In the new T presentations, you won't see any system that doesn't have a soul. It don't control but it understands the desire you have.

(2:06).

(2:08).

... Now we bring you the knowledge of space and those of you who are present, you will feel it and understand it. For the first time we open the door of the U Community to the world leaders through their ambassadors and we are making a very clear, (2:10). cut line. Our way, the only way, the correct way. You'll find out, when you leave the conference, even you might think nothing (happened). In a short time you'll see why ... suddenly you'll understand that you were in the presence of those who you wished to be present with for centuries. This is why these conferences are. Many of the U Council members will be present and will understand why they are there. Those of you who are in other parts of the KF, you come in and you'll understand why you are there, there is a purpose to it. Those of you who cannot make it, it means the soul, it's not time. The first interaction between the U Community and mankind starts next week in the conference and gradually you'll understand. We promised, we fulfill. Any other question. (2:12).

Q: In the news the Japan says it will release waters from Fukushima. (2:16). They'll release the water that they have saved for all these 8 years in the oceans? We have a problem with the tritium and for the solution they say they'll dilute the water and release it in the ocean. The tritium dilution doesn't need it, that is another game, as you understand, when you have a water you can dilute it with as much water as you like. The tritium in the tanks at Fukushima have all been converted to white gold particles, Nano state. So I can dilute it with anything I like, do you understand. Q: .. I think they have a problem? They don't have a problem I think they made enough gold and the American company that took the T from us is now worth billions. Yes, they have a problem, I have to correct it. They made so much material out of it, but there is such a limited use of it and they don't know what to do with it. In due time we'll show them what to do with it, because it has a lot of advantages and uses. I am very diplomatic about this, what I tell you. You have got understand that they changed everything. We don't talk theoretically, those of you who have been with the KF long enough, remember we had a dear friend called, Yukoko. (2:18). A Japanese who left with her family because of Fukushima, her children, she went to Japan and did, we showed live how the radiation was changed, reduced. If a housewife can go to Fukushima city itself and show it, you don't think the government had the power to do it. They have drained it there, now they want to release it. What's the difference if I put more water with water. But they bought huge amounts of mercury to do their job, a lot of other things and now it's worthless because they can't sell it. And the heads of the nation, whatever.. they thought they would have billions out of it, they put it all in their private banks, they ?? the Americans with the Nano white gold. You understand. It's a process of releasing water with water, they might contaminate a little of it so there is some radiation, but there is no such thing. They have cleaned up the beaches of Fukushima, they have opened it because they have cleaned it up with this process. They have neutralized all the radiation or most of it. There is a problem in the central core but they are controlling it the way it has been suggested. You have to understand that there is a lot of games, gamesmanship goes with the Japanese. Until you don't live and be with the Chinese you don't understand what the Japanese have done in the far east. If you think Hitler was bad, talk to the Chinese. (2:20). What the Japanese have done to China, and Philippines and far, islands and nations around them makes Hitler and angel. ...

... Everything has to go through FedEx in America as it is going through the post and the Americans open it as usual what they did with Huawei and everything, they took the material and tested it. And a bigger test was sent ?? with Yukoko to Fukushima. These international packing companies work for the governments and they are told what to give and not to give and what is in what package. (2:22). They control everything, we think we are free but in fact there is no freedom in international packaging and postage as we have seen with for example Huawei, suddenly the packages ...

(2:24). ... Q: What is the best way to support with our souls our new position with all the beautiful changes we are coming into? Just the way that nothing has changed, you learned to work through it. Support it with your soul. Make a wish, that's the way the UC people do. Want the peace so deep that it imprints the soul of the others. It is total what I call, fulfillment of the promises. (2:26). **If you understand that everything has a soul why do you work with the physical body. Then connect with your soul to the ambassadors and officials of the government and leaders of the world** and those of the KF who come to these conferences. **These are the gateway to the opening of the new knowledge, of a new cycle for man.** It's for all of us who understand this to take it to the next step. The new T's will be shown. It's all connected. It's the first time you'll

see systems that are connected to the soul of totality. Some of you may not understand it because it's so -- but some of you who are **aware of the power of the STM, power of the hidden energy source which is the essence of your creation, now you can test it.** These meetings will be dynamic. Every man will change because you'll understand. We are there not just to show, we are there to bring the change. Do you remember I explained to you some weeks ago, we make the fish tank, I wonder who is the fish. (2:28). Any other question. Q: Why do we have to sleep and dream, how is that explained from a plasmatic state and how about dreams? We sleep because we live in a physical dimension. I explained this to a child, .. When you put 2 circular magnets next to each other, do they ever rest radiating their fields. Do they fro a second stop keeping their distance or changes. No, never, for a magnet it doesn't matter day or night or whatever you pick up, still it radiates its fields. So is it with the STM, (2:30). sleep is the pattern of the physicality, not the soul. In time when man goes through this habit, then we'll loose the sleep. The reason for it is very simple, the position of day and night, psychologically has synchronized the behavior of the man and the absorption of the fields. In deep space or in space we don't have this position. It's always day or it's always night, but the field level taken or given is always the same, so man will never feel that tiredness. We might rest, because how many times can you walk around the spaceship, if you want to go with the spaceship. In the ?? position, we don't exist that way. And we can go to the next phase. So asleep is something which has become habitual and our body has gotten used to it. I sleep about 2 or 3 hours a day and that's the work. I don't see any odd reason for it, but I am 60 years old, and I still can do it. Because even that 2 or 3 hours, I don't see any need for it but, because there is nobody else to do things with, so I have to sit somewhere until somebody comes and plays. I have a time schedule now-a-days, (2:32). I know about 2 or 3 o'clock Armand appears, some times 5 o'clock somebody else, and then the Chinese kick in about 6 or 7 o'clock, so my 24 hours is full. I literally work, mentally organizing things 20 - 22 hours per day now a days. R - Isn't it true in your sleep you are quite busy as well? You were saying in our sleep when we are horizontal, the cage is open and the soul is allowed to be free, some work to do, fun or some adventure? You touched something very touchy. I told you if you trigger, I respond. I'll teach you a way of work. If you understood the teachings of the past few weeks I explained that the STM is engaged with the plasmatic field to hold it because it's a plasma. You put a water in a cup, you put the STM within the field structure of the Gans of the blood of the man. If you understand this and you know according to the different rhythm of the cycle of the strength of the blood, you can literally open a window for the soul not to go out, but to expand its fields, that's exactly what happens. When we go to sleep, (2:34). we reduce, what I call the barrier, it's like opening the shutters, the light shines further, that's all that happens. When you are on the back of the earth, the sun still shines, but you don't see it because you are on the other side. When you come to the front and face the fields, it's the same fields, then you see the light, so you can spread further. The same thing happens with us when we are asleep. When we go to sleep we lower, because if you look at it, the STM has a freedom but the physical existence of the man is schizophrenic, we have 2 guys working together, one the STP and one the STM and each one has to show its time when it's ready, when the physical condition lowers down, the STM shows himself, he wakes up and the other one goes to sleep, or is there in the background. It's a double act that each one knows when to play. But if you become educated in the knowledge of the U you can play both plays. You allow .. I do this quite often and it shocks Caroline the first time I used to do it, she never understood. We meet somebody, and in a few minutes I

say what we are going to do with this guy. You ??? I had this very recently, (2:36). with Wang Lynn, the head of the KF China.

(2:42). One day you'll realize the soul of Armand, those who understand. These are destined positions, it's not something that just comes out of nowhere. We are destined to go and do a job In that process we see each others soul. .. The energy of the soul fulfills the physicality, as much as the physicality opens the door, it's just a two way system. I explained many times that man has to learn to feed the physicality through the soul, maybe for the first time you understand how it works. It's very simple, if you understood the process of the sleep, that you need the time to feed all through the circulation of the blood, whatever, everything what the rest of the souls of the body needs. If you lower it enough then they take whatever they need. Then in that position, your soul is ahead of you, it can see other things. Nothing is hidden from us, nothing. But (2:44). you have to live and pretend in the dimension of the physicality, it becomes automatic ..

.. Try to understand how you go to sleep? Sleep is a visual condition, because of the physical condition of this planet has forced for thousands of years, reduction in productivity of the totality of the work of the soul. This means that mankind has switched time living a schizophrenic life, the daytime I go and find things, the nighttime you go and feed me. If you look, we say, in the tribes of Africa, man is a hunter and gatherer, and the woman is the homemaker, she converts it and feeds it. The physical body of the man is that hunter and gatherer during the daytime for its own use .

...

... This bird never leaves the cage, it's always in the cage. (2:48). But as you take the cover from it you can see more, further distance to warn you of what is to come. 08

(2:50).

... birth by soul is very different then birth by physicality. Man soon will gradually understand now that I explain to you that we start producing systems that everything has a dimensional soul in it, you'll understand that the game changes. Do we need to sleep, (2:52). or we have learned, or we have made an agreement that when you lie down I'll look after you, I'll feed you because ?? during the day when you are walking around the soul still feeds you. It's amazing that people don't understand. When it's the rest of the physicality, because the soul has more time to do other things, it expands itself and goes and sees the uncle and the brother and cousin and the rest of it. We have to enlighten (ourselves), we know a lot of things about life, but if we reveal everything mankind will commit suicide in mass, and that is not my job. Just understand how you go to sleep and how you dream. You are opening, lowering the cage that earth can look further and at the same time tell you, I am bring you the beauty, knowledge and everything, and then if you know it happens, then how come you can't do it yourself. If you can do that, reach a point of deep space, understanding, you never need to go to sleep. As one in balance between the two will feed each other. The physical existence of the man is a imbalance between the fields of the planet and the STM. And the STP is its child. It's its boundary and if you can bring the two together in balance you do not need the dimension of physicality of another field to confirm your existence, (2:54). and life and that's why

you can travel the depths of the U. In part of the teachings I have explained in a paper, I called, Inter-atomic Fusion. It depends which one is inter and which one is atomic, which one in the atom is the neutron and which one is the electron, and how can you hide the neutron inside the electron, and how can you hide the electron inside the neutron, the visa versa. Both have the capabilities of doing so, but one does in the dimension of compact energy, one does with the totality of the field. In the nuclear atomic structure, **it's not the proton in the center which holds the electron outside, it's the electron what can gather from what the proton has released that can confirm, continue its existence. Tesla didn't understand** this and it's a pity, if he would have understood this he would have done a beautiful job. De Vinci came to touch with it, but he was too busy playing with children. And it was taken from him. If you understand the process of birth in the womb of the mother, precondition, completion. The cells never go to sleep. **When the soul is created which shares to give to the rest of physicality, (2:56). in accepting its position, is when the soul is created.** Man needs, has to learn. And do you need to sleep in the depth of the U. Or do we sell condominiums in the space or luxury apartments were you can rest your body. We over thousands of years decided on a pattern of physicality, the rest, that the soul can feed the physicality, but in fact, it never stops. As much as the magnet, as I call it, of the soul is continuously spreading its fields, so is the STP, it just depends on how much I increase the speed that you play or I play. It's like 2 friends playing with a car, when I stop then you drive, and when you stop then I drive, but we agree, around about the same. This is why the soul is more or less 24 hours on watch, because the soul of the physical is on watch too. The structure of the heart and the brain, even has to split that to ?? find a tune. (2:58). Q: Alzar, if the position of our soul is already decided why does mankind try so hard to be something that they are not, I mean if they are just ? It's the freedom of the choice of the souls. It's the freedom of the choice. Q: But is it the freedom of choice for the STP or the soul itself? Both, they accommodate each other. You see, none is the abuser of the other, but collectively they coexist within each other and along with each other. It's very interesting and I have seen this a few times and it makes me laugh very much, there is a specific disease or condition which the astronauts get, all the astronauts and space medical people don't understand it because they just look at the physicality of the condition and they don't understand, (3:00). that at a certain point, like you know you get to a speed of 40 and the door opens, and when you get to 60 everything shuts or whatever, there is a point of the conversion of the physicality and the emotion and the soul interaction, which creates this condition with all the astronauts, because the speed and the duration of the absorption of the fields is different in the space and they all get it. When it happened with the first astronauts at NASA, there was a crisis, and if you listen to it, it's the energy fields of the Mg within the structure of the stomach. They all get it, but nobody speaks about it. But when the first time it happened the NASA people were in shock. They all get diarrhea and vomiting at the same time. The first time it happened they had to clean up the closed space, ... it was on my nose and face, then the other one had it, and then they realized that each astronaut would go through it at a certain point. In that position. These are secrets of NASA they don't open it up to public, because it's not very nice to say In that process if you put man in that condition, you'll get a release at the point of the, two arrives. (3:02). When they put you in the centrifuge machines you don't get it because of the vacuum and the condition of what we call weightlessness is not there. But the soul doesn't go through this condition. That's why when the soul leaves at night you don't have to change your pants in the morning.

... Man in the deep space with the position of G fields we produce will never die. (3:04). You just put it a condition which it is working itself, how can you be a swimmer and get drowned in 10 cm of water, if you put it that way. You are in an environment that you are used to. It's not a conflict of change, and we don't understand this, that's why we are afraid if we get lost in the space. If you don't go with your spacesuit, and if you prepared with your soul you can walk out, because it's actually a lower vacuum condition then your body, so you are quite fit to live through your soul. This is one of the reasons when you open the body in one of the surgeries they don't die. The body automatically creates that field balance difference, it's naturally done. If you understand this you can put your hand through a body of the man, because you create that condition of the balance, there is no barrier. You'll see these systems in the coming time. We'll show you a system where it (something) is on the table and some seconds later its inside you, and then we'll bring it out and show you what it is there. Do you want me to remove a tumor, the tumor comes out with it, but you don't need any operation. These are the knowledge of the U, and what we'll open. We took the guarantee that (there'll be) no more wars, the soul of Trump has guaranteed, and we have the same from Rohanni, and the same from ?? (3:06). And we bring the gift. You'll understand how we work with the ?? soul. They can bark. **If they break, we'll break what we call our code, and then there will be nothing for humanity. This is to encourage the man to walk out of war, to stop killing.** We have taken our assurances from all souls. And then you'll understand, the knowledge we open, it shows the weakness, feebleness of the present defense T and that is easy to do, but we have to let the man do something, if we don't let the man do something, you become just a bunch of stones sitting around until somebody comes and moves you. You have to do something. the knowledge of space is very deep and we just open a window. If you understand what Armand brought (through) the company, read what the name is, this is us in essence, Mark .. Ray. I hope you understand what it means, the name is not coincidental. If you mark a ray, you know where it goes and where it comes. I am a good magician. (3:08). Any other question. Q: When a child urinates in his bed what happens to him? Go and see a doctor. We see a lot of people do it as well, when you go over 60 or 70 years, it's like becoming a child. More adults use pampers then the children, if you don't know that ... What happens to the soul. That's a dimension of physicality. If you understand the separation and work of each, it's to understand the totality, then you don't need to ask questions, you should be able to put 2 and 2 together. Q: About the feeding of the soul.... to what extent can we use this knowledge, (3:10). in terms of can we totally abstain from food and sleep and does that mean we can get any necessary material for repairing the body? Put it this way, let me explain, mankind has chosen the wrong path to gather energy for his physicality, the STM still feeds but he doesn't kill for it. In time when you become wiser and the condition changes in the upcoming time, soon, the STP will take the path of the STM. There is a big conflict between the 2, one tries to confirm his existence in the dimension of matter state and one tries in the dimension of the plasma state higher strength, it's a battle between the two, the only way you can sort it is through the dimension of the interaction of the two which we call, blood, or you call it emotion. You can explain even how man has overlooked his own behavior of reproduction, then man can understand, how can you do away, or do away with the way to consume. If the STP, (3:12). comes to trust its own strength and comes to trust the strength of the STM, we will be fed, we'll be shined upon, then it doesn't need to kill for to absorb. That's all we do, is kill to absorb from.. 20

..Q: What is the plasmatic explanation of yawning and the connection with the soul?
(3:16).

(3:20).

(3:22).

(3:24).

(3:26).
