

## 295th Knowledge Seekers Workshop - Thursday, Sept 26, 2019

( , )

(pre- video about traveling in space )

(:19). First conference will start tomorrow, to show the new T and what is the evolution.

(:20). Starts with questions before going into teachings. (:22). Q: Where does the soul of the animals go, ant or horse, do they travel the same path as the humans? The soul of every created thing goes through the same process. Every soul has an intellect, a life, a feeling, it's just that more or less the size, position and condition which leads to the creation of that entity and that physical dimension. We always explained we don't know the difference between the STM or a child or an animal, it's an entity on its own. It's like when we look into the stars, they are all shining, we don't see any difference, but depending on their size, they shine at a different strength. That shining which shows the strength they have and how they interact with the environment. So there is no difference in reality, in the structure of the creation of the soul. It's very ?? ?? how it finds its position that is important. Planets like Earth are the nurseries for the creation of life in the U. (:24). When the soul is free, according to the strength it has, what it can give and take, it finds its position in the U. It finds its point of reference in the U. As I said before, when you put magnets next to each other, depending on the strength of the magnets, they find their position, and so is the STM. How far, to what distance, to where, and on the other hand, do the planets like earth, which are the cradle of life, and create the souls, do they themselves become in the long run, term, due to the energies they create, start their own cluster, own galaxy. The seeds of, or the strength of the totality as it comes from the Amino Acid (AA) of this planet, do they create a common denominator strength that allows them to create a galaxy that has that common denominator that has the strength of what we call the soul of this planet. (:26). In that process all hundreds of billions of stars, planets or whatever created in that galaxy, they all have a common denominator energy which comes from the strength of the AA of this planet. Some of the galaxies in the U are created that way. They have a common denominator strength, that's where they can gather and collectively they expand to create the dimension and the fields and rotation of the creation of the galaxies, a series of stars. Then it comes to how we have all the stars as a twin stars, it's a balancing field, as a process of the delivery of the totality of life, and then would these common denominators in the future become part of the life, giving life to the planet. It is interesting how we understand this language, how we can comprehend and how we can expand on the knowledge. (:28). Q: Why did you call, when we look at our Topoli (dog), you say they are our children? What do you mean? Q: You refer to animals like a cat, mouse, when we look after them like they are our own children, but sometimes you refer to that they are our children? The child doesn't necessarily mean what you have given physical share of your physicality to, like our physical children. What you share love with and look after to grow is a child. The plant in its infancy is a child, it's your responsibility, a dog and cat are the same, because we share our souls. How much we share our souls with them, they become part of, they become like us. They understand us through our souls, feeling, emotion. What is important, (:30). (:32).

talks about animal until .. (:38).

... Q: Is an ant for example, created in the image and likeness of the Creator, and can an ant teach other ants higher or divine knowledge? In soul yes, because now we know that physicality is manifestation of position and condition, but **all creatures of the U**

**are in essence the same as the reflection of the soul of the Creator. Q: Can the soul of an ant choose to be the soul of a human body in the next life time kind of thing, or visa versa, can a human end up in the soul of an ant, after (Reincarnation)..?** The reality is if you look into the depths of creation, as we said, when we transmute the STM across the U, (:40). and when it suits it, manifests itself in the shape of the manifestation of entity at that position, then would that refer on this planet. But the other point is, would it carry the memories and the constitution of the soul in the behavior. Philosophically speaking as we have taught for so long, and you understand the totality, there is no reason why not. But then does the STM or any animal created from this planet due to absorbing energies during its lifetime from the U, find its balance to be on this planet, because we have engaged it. We, with the position of the physicality, the soul of the animal is engaged to the strength where it's kept, it's like a bird when you open the cage, does it stay in the same home, or does it fly and go to a new destination, but as it does, does it change its physicality to a dog or a cat, or does it stay a bird. In so many ways, there are 2 answers to this question, (:42). does the STM become a soul of a dog when it manifests itself? In reality it doesn't take place because now it has taken a different position, but does its soul become that it manifests a dog somewhere. We have to understand the process of the creation, the process of the creation of the soul is different for the soul when it is freed and it finds its own dimension. When we create a dog or a child out of the interaction of the 2 physical dimensions, like a sperm and egg, it's different then when a soul is free, it doesn't go and take a place in the physicality of a dog because it already has the body, the dog which is created, it already has a soul. So in that case the STM is free to interact, to create conditions for other souls to be created out of, but it can't go and live in the soul of a dog, it can't go and take a soul of a cat, because that soul was created at the point of inception, or let's say the soul of a child. In 2 different ways of looking at the same thing, it gives the freedom of the soul, (:44). but in respect to the STM is the soul of the planet, in respect to the soul of the planet is the soul of this galaxy, and the soul of the U and the solar system. So the STM finds a position which balances in according to all these, not what is created, that we can go in the womb of a dog and then create a dog. This is what mankind will understand. It's like when you see a flower matures, and then it pollinates, it releases its pollen in the air until where it finds the right condition, and right atmosphere that it can receive cells. The STM or soul of created things on this planet or anywhere in the U are like that pollen they travel the span of the U until they find a position, and then in that position they manifest themselves according to the environment of themselves with the strength of the soul they carry. And this is how we see so many stars in the U and they are forever producing. If you understand the same 10 million people on this planet, billions of animals die everyday, (:46) . We create the start of the soul and these souls take their position in the universe, they don't disappear, we can't unless the soul is totally disintegrated and it's got nowhere, no strength to create its own dimension, it's the same position. Planets like earth are fields of the flowers which pollinates the U, and that's its only reason. Because they are in interaction with the field of the earth, they have been captured so they find mostly, usually, space outside the dimension of this planet, and as they are the seeds already gathered together they absorb energies and they become the seedlings of the new cycle of life of the stars, planets and everything else. These are what we have to accept. In the new T's we start showing from tomorrow we will explain new dimensions, structures, criteria in the life of the man, by creating the condition of the STM and being able to position in respect to, not to become part of. Some of us in these new systems (:48). will see because the fields cross passes our skulls and brains tissues in strength, we will

see shining lights around us in interaction with us when we are near these systems, and if the interaction is strong enough we shall become the light. Everything is dark unless it is interacted by the stronger fields of the sun, then it lights up, that's what we call daytime. Now we create the same, if we understand the process and that the same thing happens all the time in the U, then we'll understand very simply that the life in the U is a repetition. Q: Carolina .... (:50). When somebody in (high) position does wrong then you said it effects the children and the family, can you open that door more so we can understand exactly? K - What do you mean? Q: When you referred to the court ... when you read about the life of the Bab (Bahoula) then they followed the executioners life of what took place there (the karma that happened to the executioners) ... A lot of people get confused that they take responsibility for whatever their parents and grandparents have done? K - The same as we share our love and care for our animals and understand that they take share of our souls, through the connection to our children, through what we have done, be it a blessing or whatever, links up to our children, our offspring's because we pass on to. They set their souls and the souls of the parents to somewhere to balance things off. Just as with the STM, (:52). as when the physicality finishes, does not come to an end, there is still a process of balancing going on and it will lead to that point of the balance. Because our soul is responsible for the actions of our physicality because it was part of it, it's where the energy came up to do. So it goes on the same, and it transfers to the same position. It concludes to the same direction. We share as we our love with our children and animals as they take from us so that responsibility which we took, do it the right way or the wrong way, carries on to them and you see, ?? to go as they share the ethos. It's like if you look at the life of some of the prophets and some of their followers, they lead the same life, because they accepted to share the soul. You see the, (:54). .. it's the totality of working things out, and from it trying to understand that the life doesn't stop at the point of a soul being freed, the dimension of that soul, the responsibility of that soul will carry on through of (to the) children. Q: ... How much time does a soul need to balance its fields before it actually leaves the physicality completely? K- there is no time. Q: Or it hangs around or its presence stays around, like we had with Fabio, we still sensed him 3 or 4 days after the accident and he was present at the funeral in the Church .. ? (:56). ... How long can that be present, is that the same until all the fields are balanced with the family? K - It depends on what the soul decides more or less what connection, what and how it is connected to the physicality. In normal life we die in fires or in positions where there are no signs of life left, ashes or whatever. But the soul has its freedom and according to the love it has receives it connects to. One of the reasons we felt Fabio is because we literally adopted him as our son, we treated him that way, with all the freedom, opportunities and whatever he asked during the short time with us he got. He became part of us, he shared his soul with us and that's why we feel him, and that is how we felt him. (:58). You do not need to give birth to a soul to be its parent, it's what you give as love, what you share with them. When Fabio came and we saw him in the teachings the very first time he was very shy, I remember when we asked him to translate he had a problem to translate, but he flourished and we gave him the ground to flourish, to show his best and he did. That's what it means, the children, to create the ground opportunity for man, for a being to show his best ability. Then it is his decision and he built with us most probably what he couldn't do with the others, because we allowed him to show his best. He was a free bird and whatever he asked while he was with us was on the table, in developing things ... (1:00). (1:02).

Q: .. How can and what can be done to balance the field of the wrong, so that it lifts the burden from the family ... K- It is, do the families know they have done wrong, or is it

to you on your own. Is it a conscious knowledge or a shared one. Q: If somebody has taken a life from somebody else, like a father, it's in that line of responsibility, what can the children do .. (1:04). ... K- You see we are a soldier and we stand up and we kill, or we are a person and we see somebody stopping us from something we want to do and we kill them, or we are driving a car and out of nowhere somebody jumps in front of us and we kill. Is the killing justified in all 3? The first one you are a soldier, the instinct of survival is, if I don't kill I get killed. Then do I kill to stay alive or do I kill the next one to get a higher position to do something else, to have a nation of my own, or whatever. And the second one is if I kill I possess the property. At the end of it we take a physical life ?? and we free the soul. When a soldier kills another soldier, does it go that if I don't kill I get killed, or does that soul, he came to war because he couldn't stand (1:06). on the pains of what was going on in the background, this killing was the freedom of his soul from the freedom of hunger and everything, he joined the army to have a food on the table, or we go in a deeper sense of understanding accidental killing, is an accident. Anything else which is us making a decision to end life it means we have to connect with it. When a sharpshooter sees a body in the line of fire and fires, he has connected with that soul he has a responsibility to it and that responsibility passes on because, this is one of the reasons that people don't understand why the American people are coming back with so much diseases, and bringing so many problems back into their own nations, in the current present times. We saw the same problems with the Americans when they came out of Vietnam, because they killed. They went with the intention to kill, ?? that they killed. All these soldiers killing is done by the decision makers in the high office, those become responsible too. ... these people are all sick, all these drug traffickers, (1:08). criminals, which they run criminal organizations ?? they're all sick, and I said to myself, of course they are because they bring so much pain to the others. They have part of the responsibility to those who they make addicts and the rest of it, and how they have there families and everything else so they have a link to. If you break the line in the family, what happens, you betray the house and it will come down and suffer, and you'll find out the partner will do because you have betrayed, and then the children get suffering and the rest of it. So we are responsible and hidden or non-hidden it will come and serve itself. When we go and think nobody sees, our soul sees. If man ever, when we take people to army, explain to them about he position of the soul and what it is, I promise you none of them will be killing. In the future .. (unless) psychologically demented will accept to become soldier. When you don't have soldiers you don't have kings, ?? blue rulers, leaders, because we learn to conduct the correct way. (1:10).

( .. break ..) (1:12).

Q: How can a family member support when something is wrong in family (murder for example)? ... you know the story about the father who has made a lot of money through atrocities and whatever, and achieving this position in not a correct manner, then the son inherits that ..

(1:14). how can the son reposition what the father has done wrong, even if it is both ways in physicality and soul level. How would explain for somebody who wants to rectify what went wrong with so many ... How to handle this problem when the son inherits bad money? What would be your view on this? ..

.. K - The only way you can do is you have to go to the next level and you can't do it anymore by any ways that you might think, 30 or 40 years down the line. It's by elevating the soul of your father and because even though he is gone he is still connected to this planet and the people he has done wrong to, through what we call your

soul, because you are connected to the same processes, to elevate the soul of those or their offspring's which are still connected, suffer by it knowingly or unknowingly that they find (1:16). the position they would have had without this misconduct of the father. This is why we pray for our parents, when you do as we did in the old way was to raise their soul, was to give from our soul to theirs. And what for? For them to put right what they did wrong to the others. It's to put it right to correct the situation of what was created, knowingly or unknowingly. The human race will learn very soon this thing. The suffering on this planet is too much. Everything you do is so entangled that either way you end up with something, the condition of a mistake being made, ??? ... the physicality has created the condition .. the STM to elevate.. .. (break ...)

(1:18). So what we see, what we have is the totality of what we want, what we can do, are allowed to do.

( ..break ..) 25

In totality we are part of the same structure, but in totality we position that structure as you have noticed in the .... (1:20). We choose and we allow the position to take place in respect to us, we extend our lives according to our soul and we expand the horizon of the soul according to its conduct. How it will be done and the way it will be done, is for us to understand the totality, the understanding of the reality. We sit for the, not the consequences but the balance of the conduct of totality. If you look at this planet from a distance, in the eye of the man in the dimension of the physicality it's blue, but in the dimension of the soul of the U it is red, red with the blood of killing over all these centuries, thousands of years, millions of years. There is not a sand on this planet which has not been tainted with the blood of the man. (1:22). or animals, or creatures. This is what is the problem with this planet. Not what we see but what has the soul of this planet brought that it has created this condition of life like this on this planet. If you look at it it's the life of a single cell which is created and takes energy from its environment, the purest because it takes what it needs, it doesn't kill for it. Even the plants on the continuous lifecycle, we understand now that they absorb AA, which means it has a soul, is in the wrong condition. The whole structure of the soul of this planet is wrong. How it is come to be wrong, how it has lead to so much misery, is beyond comprehension. Is there a need to elevate the soul of this planet, that with it, it elevates the soul of its life, it doesn't matter tree or plant or whatever, is it only ?? And the answer is yes. (1:24). This is one of our jobs, work, to elevate the soul of this planet that with it, it elevates the soul of its embodiment, what it has done. We need to understand to comprehend, we need to be there that we can greet life without fear, compensation, without balancing. When a child is conceived, does it just carry the eye and the hair of the dad and mom or grandma, or does it carry with it their consciousness of misconduct too. Or do we just look at the physicality and we don't understand that it carries a soul, because we are just always concerned with it. the soul carries its own signature of the soul of those who created it, do we just pass the RNA or do we pass in that memory bank the RNA of the STM too. In reality, yes. Everything, every single cell of your body, which is the collection of the understanding of the knowledge of the past which makes you to look Chinese, to have a spot here, or to be a Jewish with a long nose, or to have hair long. The same information is carried by the man who created that life. (1:26). When we are born and we are only sucking the sap of the life from the mother, in that life whatever she has done is passed on to us, because that is where it came from. But it came part of it through the soul of what she destroyed to have the cow, god knows what, the animals she ate or whatever, because when we eat, consume the body, there is a reflection of the soul of the entity in it. So the accumulation of life

on this planet is for everlasting ?? organization of pain and suffering of the others. When with the new T which we are about to release, it will be shown to those who are present tomorrow, those will understand one thing, for the first time we feed the soul of the man, without the need for physicality, but in the process, mankind has to learn and to follow, and to see how and where and what, and the shape it has taken to become. We create a condition and we go through the condition. A wife who lies and cheats stands the services of the same thing back. It doesn't matter if it is done in hiding. (1:28). If you ever listen to things which we lecture. If you go around any coastal areas in Europe you'll see churches, in small villages 2 or 3 churches ... and ask yourself why, the fisherman before he goes to sea goes and pays something to the church for the fear of the life he captures in mass that he can come back alive for the sins he has done, we call it a sin for the lives he destroys. When he comes back he goes and pays again for coming back safe, maybe he was a week or two or a month on the seas. But he is away and the woman at home finds a companion, she goes by the tradition and confesses to the Church, she pays another 1/3rd to the priest. The fisherman works his life, the Church builds up the building. In fact, all payment of one to another. (1:30). Who and how. we see this, it's a progressive work. I don't want to be in this physical life it's too harsh, and it has no meaning, because at the end of it you go out with less than you came in. It's a bank account which always leaves negative, because it's not that, he was a good man, he did everything whatever. He was a good man but he used to give a lot of parties with lamb and steaks and the best vegetables, consuming life, consuming another soul for the pleasure of his. It's the totality and life on this planet is beyond imagination of what we could imagine to be. Every second we breathe to survive we breathe another pile of pain. The only way we find a solution is to raise the soul of this planet through what comes from it, it feeds its inhabitants that they don't need to kill for it. When you have a full stomach you don't kill. It means you haven't been fed properly and it's the responsibility of the soul of the planet, (1:32). to feed the STM that the man feeds the soul of his existence, physicality that it doesn't need to kill. The problem sits within the lack of the strength within the soul of the planet and this is one of the reasons we convert the matter state of this planet to the Gans state to strengthen the soul of it because it works with it, it interacts with it, it comes from it. Then you understand why the Chinese understood and they used to go and throw tons and gallons of Gans's into the rivers and the oceans to feed the thirst of the hunger of this planet, to change its position. We cannot become vegetarians and don't eat because the essence of this planet takes from but does not give, and what it doesn't give we have to supplement. So if we raise the soul of this planet that the whole, in a way, giving, we call it a north pole where it goes out, becomes totality equal across it, that the souls of its inhabitants don't kill, it receives what it needs and they live through it, then the change comes. In the farming they say can you clean up this land with a lot of this and that in it. (1:34). I say, yes, of course with the new T we can because with it you rely on the free fields in the U to feed the plant, so it doesn't need to receive fertilizer to poison it, and in time these fertilizers, nitrites get washed and go lower and lower and the top layers become clean, but at the end of it, all these poisons wash in to the rivers and into the heart of this planet and in one way or another if they find their ways in the depths of the oceans, dilute but still in the process will reduce, and somewhere they convert. This is the problem we have. Once the soul of this planet starts giving gradually the cleanup comes. Not in one go. Raising the soul of this planet is more important than anything and part of the work which we have undertaken is this, to raise the soul of this planet. Any other question. Q: You have instructed us that if we have a cranium of a deceased person we can reconstruct his body, now what happens with the original soul or does he

come along with a twin soul? (1:36). In a way you create what I call, the beautiful people. You create another soul which is independent, not the person. So this skull has a house, it has connection to 2 souls. This is the way it is, you don't bring the other soul in, now it's a home for 2 souls, you created the second one. You'll not get the first, impossible. Q: That means the beautiful people have all gone through a similar situation? No, there was a situation that there was a room for multiple fields to be created. The biggest problem is for the beautiful people, the way our knowledge is today do not understand. Our scientists of the this position, but if they become aware and understand, then life changes. (1:38). Q: Who am I, am I the STP who plays and needs during the day, and I have an observer and judge, the soul of totality, or am I the soul of totality who plays and needs during the night, and I have as an observer an apprentice the STP, or are they both together with the schizophrenic life, and then at the time of separation how do they divide me, who and where goes, and what about the beautiful people, how do they split? In the structure of life we separate from our physicality in a very balanced way. Physicality has a level that it cannot go up, and the soul has a level that it can't come down. At that point of what we call MaGrav positioning if you want to call it that, when they reach that point that one takes from one what the other one (doesn't) need, and one gives to the other one what it wants to give, that point becomes the separation. (1:40). Then what is the physical life stays behind, they still got cells in it, those have life, they have a structure, so now they get decomposed and consumed or become part of the atmosphere of this planet in the consumption of gas or whatever or liquid, but the totality as they release their souls, stays miniature souls but they are on their own, single cell souls. They still have a common denominator of connection, but the STM which is freed from the physicality, from that body, has its totality in the strength of what it carries, above what was physical life. Let's say the spectrum is from 1 to 10, the STM is working from anything which is energy (level) of 6 and above, and the physicality works with energy 0 to 6. But 6 and above energy levels still has residues which shares but it can't reach to 10 that it can complete itself. ?? it goes from 6 to 7 to 8 to 9, and as it gets to higher order it has less of the weaker one in it. When it comes to the point of total MaGrav fields of giving and taking of the two, one it takes all the weaker ones, and the other takes all the strongest of the other one ... then they separate. And each one leaves its own dimension, and each one divides or adds to another dimension. Or the body after physicality gets eaten by birds so they go through the same process, transfer of the soul to a new dimension, because now you become part of the bird. (1:42). Schizophrenics are in the same position and it creates a condition that their souls, still share with the part of the emotion. ... in the new cycle of the systems we'll produce we carry this dimension, we have to understand it. .. We look at the blood as the circulation of the ?? life and emotion, but the blood carries fields, it's the same as the Gans's you put through. It has its own current separate from the current flow of the liquid and that current flow is much more rapid, is a non-tangible flow and that is what expands. The amount that it expands from its center, the center of the blood vessel dictates what energies it gives, that in that energy with what comes as a neural system becomes the physical condition interaction of the body. As you see the blood vessels near the heart are very big and as you go to the fingers they narrow, because the amount of fields that they can give dictates how the shape of the finger is going to be, because of the interaction of their fields, which what comes from the nerves, which is the memory bank, this is the shape it should be, dictates the cell. (1:44). Then when you see a big man with very big hands you can see the blood vessels are different. And it is the same when you see a small man with smaller blood vessels, so that creates a different behavior. Our blood is not just a

liquid transfer, it's a fast, do you want to call it, zero free resistance superconductor, because the field flow along the liquid of the matter and not within the liquid. It's like when you pump the Gans's, the Gans is there but the field expands further because you pushing more and more of it. Q: I had certain dreams that I was aware in my dream that the soul left the cage, being aware of this work I could not control the situation or go where it wanted, (1:46). it was a program, (like it's programmed) what do we do to go where we want to? K- As long as you have a physical life you can't go very far. It's got a hang and hook on you. It's your twin, it brings you back, holds on to you. It holds the cage. R- It's called a silver cord sometimes in some teachings. K- It's called anything you like. It's called MaGrav positioning, the position has got a hook on. In the new system and T's we'll clarify a lot of things. A lot of mysteries will open up from tomorrow. A lot of things that mankind didn't understand, gradually with those who come will transfer to their understanding that we have created a condition that creates a condition of life. With the new T as we create a condition of life to elevate the soul, through it we can use the same way to elevate the soul of the planet and end up with all these messes. Now we can replicate the strength of the soul of the planet, because the planet through its interaction creates the condition of life, (1:48). in the shape of our AA. Now we reverse the position of it, with a special way to do, and a way to understand, it works itself. Then put it this way, if you have so many mobile phones and each one is emitting a field to strengthen the soul of the planet, it is set to that strength, then you can imagine you'll find the characteristic of the planet change, the environment and condition of the planet changes, and with it we'll end with all these killings and things is to vanished from the face of this planet, then it makes mankind ready for the Universal world. There are very interesting times to come. Q: Should we see these different conferences as a portal that will open up communication with the U Community more extensively with more awareness? K- The STM more extensively. With these new systems we are not delivering ... there will be a lot of misconception of what they can do, but in fact we are delivering to elevate the STM by elevation of it, (1:50). that the soul learns how to absorb fields and how would it feel (? feed) its physicality. Any other question. Q: What is the best way to proceed when so many efforts are being made to hook us on 5G instead of advancing to 9G as you stated? The 9G principle will be shown for the first time tomorrow as a working system. This is what you were not expecting. But the principle ?? concepts have an actual physical system of the 9G will be shown tomorrow .. and as you'll not see, we have asked those who are there not to take any pictures, they'll be shown in the future, we have arranged for it to be photographed that people can understand but you don't see much. The whole principle of the 9G, actually not the principle, the 9G system in operation will be shown tomorrow. (1:52). The G9 is the Book #9 which is the dimension of the soul. The others as you read the books, you'll find out in how it will create communications, materials, and the operation of the ?? What man needs to carry in the space with him to be able to feed himself and elevate his soul, that the soul feeds the physicality as it needs will be unraveled tomorrow. It's a unique system, some of you think you have seen it, but nobody has seen such a thing before. Mankind has never had an insight to it and with it, it sets the structure of life, not only to feed the man but to elevate the STM and then elevate the soul of the planet. So what you call a G9 is a dream to come, is reality on the table. Many people who will come in touch with these new systems, it will change their lives. We did this not to waste time, to change a lot of courses. We will shown most probably in the next conference the systems that never need charging, universe. (1:54). As we go along from one conference to another you'll see the same unit but with an extension to show other things that man might or might not need. We'll

start changing things tomorrow. People who see will understand, if they understand what is in front of them. We have replicated life on this planet. This is what we call G9. Any other question. R- so perhaps we'll hear more about that in the next KS Workshop? No way. It's a puzzle, that people who come and sit and watch it will not understand it. But we have replicated the heartbeat of the U. So we can create anything of the U. Q: Why does the big media ignore the achievements of the KF? There is a band on ?? Fox. (1:56). Now we see the same problem, not a problem, but the same situation with the ?? down the road, but in time and in due course there is no way to block, no way to stop, as what somebody said, you have become the most powerful underground scientific organization in the world that nobody wants to speak about, but everybody does it. ... Someone was saying that out of nowhere he found 200 K Seekers in his area. ... My knowledge will stay while the kingdoms will fall. We unraveled the ties to people who were abusers and in time through us those who have set up things to do, will come to need it because through their abuse they come to need the T. We have seen it many times. This T is amazing in depth across nations. (1:58). It just needs one person as the Internet is tugging for energy systems and suddenly they come across the MaGrav system or whatever and they get used to it. ... If people understood what I understand about MaGrav units, then you all have the most powerful power generators in your hands. But you don't understand, and I realized that in the second day of the blueprint ... these people don't have a clue what you are giving to them, and you went the path that you wanted to go. .... people just wanted to copy it .. the generators we have can produce Megawatts tomorrow, and there is a plan to release but in a different way. In the coming weeks you'll see the first mobile phone battery that doesn't need charging, and cars that you don't need to energize you buy the car it's for your life. The T is KF. We'll give the knowledge to these people because we have the knowledge to do it. (2:00). We shared it with them because it effects the whole structure. ... Tomorrow will be the opening of a new science for man. It doesn't matter who sees what, but in time you'll realize. It's the first time you carry system that carry the totality of the creation with it. It's you who has to understand what you need from it. Q: In the future could we charge our smart phones just by holding them in our hands via KF T or pizia electric field? The knowledge is deeper then that, but so easy to understand. (2:02). Q: Some compared the layers of the petroleum fields to the layers of the planet?

..

(2:04). (.. break .. ) ... (2:05). (repeats question again) .. .. Q: What is the emotional disturbance that causes the kidneys to malfunction? K- Okay I'll tell you what we have. We see, (2:06). with people in this new T that when we elevate the soul fast the physicality doesn't want to work with it and it shows itself in all sorts of problems. We see this with the new systems and we see people who once they start using the systems they run into problems because their physicality can't understand and cope with the soul. We see this with people with Parkinson's and the others, they go through worse condition. Because we elevate the soul in combination and the soul doesn't want to take or the physicality can't match. We need to understand the totality of the work and in some system when we elevate the soul the physicality runs into problem. (2:08). Any other question. Q: Can you explain more about when the soul is elevating and the physicality can't cope? What do you mean. Q: When people have kidney problems and they don't understand the explanation of the soul elevation and the physicality can't progress. What do you mean? Q: The way you explained it doesn't explain where the soul elevates and the physicality can't match it? K- **The soul tries to elevate itself that**

**it can separate from the leech of the body. And that moment you see this, because the present knowledge looks at the physical existence.** The totality of the knowledge looks at the elevation of the STM. The soul wants to be at such a high level that sees the structure of the fields, (2:10). as the way of the separation of the physicality. If in the future we put structure to measure, the soul which leaves the body and then somebody uses the T that elevates the soul to a higher level where the soul is happy and reaches its eventuality, and then you see that you have a separation of the two of a physical life and a soul. So what is the purpose of life, to elevate the soul ?? to reach maturity in a proper way, or keep the physicality here to suffer that the soul can be encaged. And then they say do we have to execute everybody that we free the souls? No. But in the process of completion, is death the conclusion, the end or do we free the STM. Q: I understand but the person is still functioning here in his physicality so I understand that the body can't cope with the elevation, how can we establish the balance between that? K- It's in the writing of one of the Messengers of God, if I tell you the beauty of how the other side is you'll all commit suicide. (2:12). If I tell you how you can elevate your soul to the level of the best it has, you don't want to have the physical life attached. Q: But how can balance that progressing that the physicality can follow, that's where people are looking for answers in their understanding, that what can they do to elevate their physicality that can cope with the progressing of the soul? K- Do we want to stay in the physical life and dimension or do we want the elevation of the STM to be free. Or do you want to elevate the soul that it can feed the physicality and ?? watch it go everywhere and you see everybody suffering and is killing and you are happy to watch it. Then that is your decision, because you are not part of it, you become an observer of the mass murder. If I get the video of the pigs in Vietnam and we watch, it is horrendous. Do you want to be part of that structure. They dig a hole 50 meters by 100 m by 6 m deep and they just walk in tens of thousands of pigs into it, and while they are piling them on top of each other we say there was, what do you call it when there was a mass run in a stadium and so many people got killed (stampede) stomping on top of and killing each other. (2:14). They put thousands of animals on top of each other literally suffocating the ones below and then when it gets to 6 meters above the ground they fill it up with soil. Do you want to be witness to this. Then when see you can get life from it, and would we create. I want to show you something, it is horrendous if people understand why I say ... this is past few days not before, I want to put you in that position and you say you are not ashamed to be a man. You have to see it, you are so remote from it that ... this is the reality of life today everywhere, be it from a cattle, pig, chicken and from everything else. Have a look at this picture, this is today farming. This is encaging the physicality that we decide when this animal is going to be slaughtered. We decide how many kids this animal can have, it's in their life, and the worse thing is this is the mother pig. If you have been to Holland or Italy, animals are encaged and then we eat it, is the soul, is that meat, is that life. (2:16). Is this life. Are we proud to be humans. Is this why we were born. This is what we have created. Look at 2 animals one walking away from the other. One in 2 legs and one in 4. And the 2 legged one you see what he has done. Why do we need to produce so many souls and encage them and entrap them. If we could absorb and observe the situation around us. If we could understand what is done in our name. Any other question. Q; Mr. K it's not only the animals that are getting treated like this. (2:18). In One Nation group we brought the topic on the table about the displaced humans on this planet which is about 600 million. They are getting the same treatment as the animals, so we have not differentiated from our own species let alone ? K- You see this is what we talk about the displacement and refugee. The pain of the refugee business and the people who get displaced, done by

deliberation (deliberately) of governments for their own benefit with what people. It doesn't finish with what picture you see it vibrates through the life of millions of people, for centuries, it's not just with what picture you see, there are ten thousands Syrian refugees in such a country. This ten thousand is suffering which is caused by the greed of the others, which is causing these ten thousand, how they got to where they are ten thousand, most probably they started with 15,000 and 5,000 died on the way and whatever you got 10000 in one country. Then what suffering they go through. The position of refugees and displaced people doesn't finish with one man, it goes through generations. I am one of them. We had to take refuge from the Iranian revolution. Forty years down the line, look at the life, we had ... if the Iranian government was not afraid of me being killed in Iran I would have been in Iran developing T, (2:20). proud of my nation. They have to protect me not to be killed to out of the country, and then they tag us as terrorists, frauds and everything else. I am a prime example of it, I have been through the whole process. What is the child we create the life stability, we have to go from country to country because of one king who is now, your country doesn't stand behind you, I will do what I like. If the Iranian government would have stood firm, it doesn't matter what you do, we'll protect you, Belgium's wouldn't have opened their mouth, they would have shut their ass. Their life is so simple, the refugee and displaced people created by the greed of the others will pay back to nations which have created it. The structure will change, you talk about displaced people, we were in university, people were proud to know us, overnight we became terrorists, just because they decided. We can't go anywhere, now they don't even give you a bank account. Just because one nation says to the others, or we decided that you are too advanced in T, since when a nation for technological development has become a criminal nation. This is the case of Iran in the international community. They have become too independently knowledgeable in T. That's what Iran is. (2:22). Then we have a gentlemen asking us why KF is not known. We are not known anywhere, because the knowledge is so revolutionary, people are using it. It is used in homes. We have become an underground scientific group, which the kings can have (to use) when there is nothing else left for them. ...

.. Give me a second I don't want to be here, (2:24). but I have taken a responsibility to be here and I hope the end comes as soon as possible, because there is nothing but suffering here but deception, cheating killing and everything else. Do you want me to show my power? There will be no man walking. What you'll see tomorrow will touch everyone's life in the next, don't know, 2 years maximum. We are releasing the knowledge which is beyond the imagination. Now every Iranian scientists become the biggest worse terrorist, because now we make there to be no need for oil, food and everything else. If I would have been an American would have taken plenty of Nobel prizes. But it doesn't matter, my knowledge, my T, what I have shared will last the life of this planet and beyond for those who take it into space. My name will never be forgotten, because it carries my soul. You can come up with any excuses you want. You people don't understand what it means what these people go through, and through this T while we are developing, we'll elevate their souls, we feed them in their souls that they don't even know. The man will feel ?? refugees and what they'll receive. (2:26). When you see, those who understand, the systems coming out, you'll see the STM, if you understand it, and you see through the eye of the STM. Your soul in your body is not attached to anything, it's a free rotating structure, but at a given speed of rotation and vibration. And in these T's that's what you see, what we have created. No attachments, but dimensional, motion ?? of the life. Many of you won't even grasp what is in these

T's, maybe years down the line. I can create the soul of a stone within the man. How hard do you want that stone to be. (2:28). Any other question. Q: Who suffers from an emotion, the STM who is detached and looks on as the observer or the STP? K- Emotion is the interaction of the fields of both. Emotion is another star, planet in a solar system, but this time it has no dimension, it has no physicality, but it's a field, what we see in the U. As we say in the electronic computer business, it's in the cloud, it has no home, but as a given strength when it arrives at a certain strength creates a fraction, we call it O or H, at this point in the body of the man through the structure of the field strength from the soul to that point and from the blood of the body and to that point, we say this area is for happiness. That's all it is. There is no allocation, that this is this and that, it's just a field strength in the structure of the body the way it has established itself, always this part is for vision, this part is for happiness, this part carries memories, this part through the physicality. The physical dimension of the body is on the outer boundary of the brain, so it's the same as the earth. (2:30). The surface is on the boundary, inside you have magma and everything else, but the brain has structured itself that to keep one place for an oil field and one place for the gold, we call this the memory part and call that one something else. But in essence it has not changed, it's the same thing. (Yes, fantastic news ..) Q: When you are referring. (to those who are working the background with the embassy's , contact and request the Americans to attend) Q: What you were just mentioning you called it an emotion, but some words before that you referred to it as a star, so from my comprehension of the teachings you ?? (2:32). two souls, the STM and STP, but there has to be a third one, you just referred to a star. K- they all are stars. Each soul is a star. You see, you have to understand how we feed. I'll explain how it works. When you have a son and that son betrays you, it doesn't matter which way but you feel he betrayed. And you are correct in feeling, it's not just imagination, because it is what is there, it comes to the point that the feeling of the emotion carries to your inner structure that with a man you feel that pain in your prostate, women feel that pain in their womb or in their breast. Where does that emotion come from, and where does it lead to. It comes from the interaction of the fields of the STM and what you heard and read. He writes to you, you are not my father. (2:34). How do you feel? To me it doesn't matter if I created it or not, that dog you pick up, you give your love to. You go through your pain for days. It's the same with the mother. It's the same when I explain to a lot of men who have no clue about woman's structure, and they think they are natural. A guy wrote to me, why do women become lesbian? I explained that, married women who then become lesbian, do you know why? You don't become lesbian, because the structure of inside of a womb of a woman has a wall, like a skin, it irritates and any interaction creates pain and a lot of women tolerate this in their married life because of their children, but the guy thinks, oh she makes a noise, I am a superman, but in the freedom of other dimensions of nations, they can walk away from it. But they still need that love, they need to confirm that they exist, but with a man they have to go through a pain, with a woman most probably with understanding of the same, they understand, there is no condition to create pain. I said to the guy, you know how if you don't understand, it's like me kicking you in your testicles and then say, walk, can you? (2:36). No. It's the same with a woman. We don't understand a lot of things, then we classify and put things in the condition of emotion. I prefer to be with another woman but not go through the pain of the emotion of interaction. Where do we classify. Then am I happy with what I am doing, because I am not supposed to do this, because it's supposed to be a man and a woman. This is what a lot of world of us, doesn't understand and then this touches the soul, the emotion, it touches the change of position and how we interact. It is consistent with ignorance of man about the knowledge of

creation of his own. It is the knowledge of the man to understand that there is a structure beyond the physicality, but this physicality carries all the knowledge of the physical dimension, ?? where it can release and absorb without just being the giver, in a way, which we call the brain, and that interaction with the STM has given a dimension to create certain fields which we call emotion. Do you have an earth shining in the daytime if there wasn't a sun? (2:38). So the physicality, the blood <when> .. it is a sun and with the fields that it radiates, it passes through the filter of the brain, which what comes from the sun which is the STM, leaves the residuals of what we call, emotions. Have you ever thought how come your cell at a given point suddenly changes, as a time comes, there is a bank in the brain and there is a cell that has a soul, in the information it comes through the blood to feed it, it says, it is time for me to go, I don't have enough energy, it sends a message to the brain, send a replacement. In the factory in the brain that cell has a specific code what the strength is and it sends it down to replace. Our blood carries ever information, even replacement of us. The structure of science is beyond understanding because we have limited ourselves to the dimension of physicality. It's us who has to understand what we haven't understood, and it is for man to understand that the physicality is the creation of the interaction of the fields, it's the fields which the blood carries which interacts with the fields which is the creator of itself, the dimension becomes emotion and part of the information of the change. (2:40). Have you ever understood that when you burn yourself, how does the skin come back to be replenished. When part of the muscle on the tip of your finger gets cut off, a few weeks later it is back on, like nothing happened. ... Where does the memory come to replace it and it's exactly the same. It has a soul, a position, a strength, when you build the brick layer below the field created dictates what is going to be the brick above. The brain knows that this brick usually fits here so I'll send something to be built. We haven't understand but now we do. In the new systems we'll start showing we'll revolutionize the world of science. I'll build you a leg in a short time. You put the amputated person in and if you understand the T you can connect directly to the soul, I create the dimension that the leg will be created in no time. I brought with me in these conferences to change the humanity from the structure, from its absolute base. We give life and the freedom to life, and if the life is so horrible to be, it goes with it. (2:42). In emotional Parkinson's they usually can't accept, but physical Parkinson's always takes it.

12

(2:44). .. Q: When a human soul elevates ... ? The soul of consciousness, that's what you like to call it, but it's the soul of the awareness of the truth. It's awareness of the truth of what is there, what we are engaged entrapped with. .. (2:46). Q: Has this knowledge existed among the ancient civilizations? This knowledge exists ?? along the man today. Those who elevated have understood, have reached part of it, it's not that it's the exclusivity just now. 51

now every body does at the same time. We are not short of people understanding, we are short of the totality understanding to elevate in one go to go to the next step ... (2:48).

(2:50).

(2:54).

(2:56).

(2:58). Q: ... What does he do or can do to elevate his father with the fortune that has come to him, because that is okay, it's in the matter state, the physical world, you explained the soul level, but can you also explain ... ? You give, you give, you see the time of praying was a cheating done by those who came to ?? man to believe in a Creator somewhere else ?? soul. One K Seekers said, can we pray for, you can pray, the time of praying is finished because you know, you don't need to have a proxy, you know the soul is yours and this is papa, what is yours take if you like. Whatever you done wrong is your, I see, I had this thing recently ... how the pain of a lifetime was settled. These machines, the systems we develop will create that condition because it's the presence of being, the presence of life. A lot of people might not see it but those who it fits to them, matches them they'll see the effects, the conditions and the emotions and change. (3:00). You don't need to go, I pray for you, that way was belonging to the Church, Mosque, Synagogue, whatever else. Now you know the position who you are as a soul, a strength of your own, why don't you work direct, this is my soul take what you need, elevate yourself to sort out the others which you have done wrong to, that I don't have to carry, that I can work with a plain clean sheet. It's not the elevation, it's the understanding of. Take from me what you need to clean up the mess that you created. It's no use going and finding who your father did wrong to and giving them some money. You sort out through the soul of the father so that he settles it, then they come to what they have. I would like you listeners in generations to come, write about the children of Red Circle (Derek Belgium) and his grandchildren and follow it to become as an example to humanity. No one will do what he has done. The suffering, the pain come close to them to know them and write about their lives. Then let us see if his soul has allowed what he has done. (3:02). Follow this family for generations and write about their suffering because the father has put things wrong and somewhere he has to put it right. What Carolina just said. They followed a bunch of people who killed one man by intention because they were given the freedom to decide, and they wrote their life story what happened to them and how and what happened to the rest of them. (3:04). The understanding and the pain that people cause for their own or for clandestine decisions or whatever, has to be returned back to. I finished with the KF I told you months ago, now I am just cleaning up for you to be that everything goes in order, that we finish our work, as we say, ??? serviced. I have set the structure and these are the last, the final things we have to put to the world leaders and then, I am done. The knowledge which we brought as a gift to humanity, it doesn't matter how they cover it or what they put on it, it is shared it's gone. Millions of people and in the future will use it, and we have passed the knowledge we love with care, with understanding that it will change the dimension of humanity. But in the process a lot of people abuse it. Let it be. (3:06). In the coming weeks when we release, the condition of batteries for cars that you don't need to charge. You have cars like Tesla which at the moment they charge you for the next 20 to 30 years to pay the electricity in advance, you can charge it everywhere free because you paid for it in advance. Now you carry 6,000 cells in the bottom of each car it, ... now with the new T you need only a few hundred and not a few thousand, and then you can go from the day the cars comes out of the factory to the day that you scrap it. It never needs to be charged, maybe some maintenance here and there. Then what happens to the oil producing countries and all the killing they are doing for oil. What do we see and how. (3:08).

(3:16).

(3:22). In time we have appointed special pictures to release to the archives when the man was shown for the first time very simple systems which will change the course of humanity in the coming years. Man doesn't need to kill when man finds the best way to elevate his soul and extend his life in physicality to thousands of years if he wishes without pain or illness. And how he can elevate the rest of humanity and ?? Thank you very much. ... (3:24).

END
