

306th Knowledge Seekers Workshop - December 12, 2019

(Using the UBESU or Enhancement Unit to elevate our souls we need to become humble and help the others to elevate, When you achieve elevation of the soul you become a light and those who claim to achieve but cannot make a light of your soul are false claims, If you managed to create a hollow center in your Gans and the next step to create a light then you have created a soul of that material, The center hollow is like an electron to the proton of your soul, This is one of the ways to elevate the Soul of the Man, ,)

(:05). .. We'll try to dig deeper into the knowledge this time and see how far we can go and how deep we can go in gaining of the new knowledge. We've seen in the past few weeks and months that many K Seekers are trying to find their soul or part of it and trying to understand that position and understanding the strength of what is hidden within the gem of the creation of the what we call, ?? body. And some think they have reached this point and they start making claims of, they have achieved this, and they don't need to be here, I want to be there. If you managed to guide you to, and reach to what we call, finding the strength of your soul and you don't need to be, or do things around the KF. That was our sole purpose to be independent, that was our purpose. So we see more people elevating themselves. Finding out the new ways, but try to be humble enough to understand that most ?? human, these kind of, what we call steps, is the time when you have lost the whole totality of it. Because these were tests for us and as human beings ?? ?? as created things that we find our position in respect and the whole structure goes on this basis. We are here not just to elevate our (own) souls, but we are here to elevate the souls of the others who need elevation. (:08). It will be interesting to see how many of the people who come close and start learning, or going into these, what we call Universal Systems and by being elevated start making a lot of claims and positions. The beauty of it is we let the mankind make these claims and what we call mistakes while they are here. Because once you enter the U Community and then making the claims you'll make a fool of yourselves. This is one thing that needs to be understood by many of you who have taken this path and become elevated. We see to become and to understand the power of your soul. Be humble enough otherwise you'll be humbled. It is a very fine line, and we have seen this happening in the past few weeks, there are people, some who become humble enough to understand more and some claim to be the totality and does not need (the KF), but in total we have done everything that what we call the balance is created. The totality is created. It will be interesting to see how these new souls who understand and become part of the totality of the understanding of the elevation of the soul, actually achieve it. Some think, **those who reach the point of what we call salvation, (:10). the point of understanding of how to elevate the soul of themselves, they become a light. If anyone claims that they have reached the point and cannot become the light, is a false claim.** ?? This is one of the keys to understanding the position of the STM, because those who say I can achieve everything, (should) sit and be watched to see if they can become the light. Then you understand that you become the giver, to become the center to be elevated, to elevate and if anyone claims I have reached and I do not need the KF and you cannot make a light of your soul it means you have ?? nothing ?? balancing. And you can see a lot of these. These are the claims that come from the same as clergy. These are what we call the new soul clergy who talk through the false understanding of their own position. We will see a lot of this. Do you remember what we said at the very beginning,

everybody wanted to know if something is a Gans, if you have a Gans. We explained with some Gans's if you put them in the freezer they don't freeze because they create a condition. But many of you who created the Gans's, you took in the process of production, some material stayed open conversion of matter so you ?? saw it freezing. And then you got lost, some of you put vinegar and acid in it and it got dissolved because everything was on the matter state. The way you created the Gans, (:12). was not of a higher quality to get the higher order. Then we explained more or less the only way we can see a Gans to be a Gans, or a water that appears to be a Gans, is to place it in a full ball and ??? rotate it at 2700 RPM and you'll see a hole in the center. If you do that with a water you'll never achieve it. But if you managed to create a right combination of materials, of Gans's in that ball it will cause the light. Not many of the KF researchers have managed to do that. This is something which will become part of the understanding of the totality. It's the same with the STM, when you achieve to reach the position of understanding the soul, that becomes a giver, you become a light. The funniest thing is, that those who claim to be, and we allow them to come into the teaching and ?? they thought they ?? could use the KF, never made anything themselves. And what do you call it, without actually ?? leaving ?? anything ?? , and if you have, if you manage to understand the process of what is the difference between the matter and a Gans by rotation of the ball. Then **you manage to achieve what we call, the hollow center, which is the center of the totality of the energy, then you have created a Gans. (:14). Then if you can reach the next step to make this center ball into a light, then you have created a soul, the soul of the material.** R- I lost the last sentence .. If you manage to create a hole in the center of the ball, Rick Crammon was one of the first ones to achieve this, then they started putting Gans's in and rotating more and we saw the center ball. **Then you understand that you have understood the totality of the work. In so many ways, you see the light because you are creator of the light. That center ball is like an electron to the proton of your soul, that creates a condition of the creation of the light.** In the future, mankind will understand what this means. In the future **this is one of the ways to elevate the STM.** The confirmation of the existence of the proton comes by the rotation and motion of the electron. In its rotation of high speed confirms the existence of a higher order field, that the interaction and the light, on earth, it creates that light. When as a nuclear physicist you go through the first steps of the teaching, of becoming to understand nuclear T, they should give you this. At that time when we used to study, (:16). it was impossible to confirm the existence of the proton but we could see the white motion of the electron around it. It is the same. In a way, in the new Enhancement Unit (EU) we reach that point. We saturate the environment of the system, in a position that the soul will shine. In the upcoming technologies which will be released it will be the same. Many of the materials, many of even water contaminations which man considers to be as hazardous, are sources of energies for the travels of the U. It's us who has to understand, in the future, in the depth of the space, what condition creates that position for the soul that not only of the man, but the passengers of the U exists. Not just I am happy it's good for me, I don't care about the rest. Mankind in the coming time will realize this not only on the planet earth but throughout the space. Just because something is not any use to you, does not mean that it is no use to anyone else (to no one). This is part of understanding the work of the U but at the same time understanding the work of the soul of the ?? In the coming time man will become, and matures enough to be able to understand. (:18). Man will mature enough to be able to find out what his soul is made of. As I said, the time is ticking and everyday we get closer to be able to bring that point for man to receive the confirmation of his own soul, existence of it, the brightness of it, the strength that he can shine on the

others. If the KF K Seekers, which are increasing by hundreds of thousands everyday, especially since we launched the EU. Everyone is looking for salvation in the physical dimension by using these systems, but in fact, they have to look to see what it brings for the elevation of our soul. Mankind with this new understanding should not look for the physical elevation of his physicality, but to look and see how the STM will elevate that it might lead to salvation from the pain of physicality. This is the process which we are going through and we will complete in the coming weeks. Many of you will use the system and many of you would not like to be back in the dimension of physicality. (:20). It's in the writings of the profits of the past, it says, if I show you the beauty of the other side you all will commit suicide to be on the other side. But with this new T you don't need to commit suicide to be on the other side, you are given the golden key on how to achieve it without the termination of the physical life. Then we'll see how the behavior of the mankind will change. Then we'll see how mankind will elevate himself, and then this will become like a virus across this planet. We will choose in that dimension, in that position, that even if we stay in the physical life the position of it, the work of it, the contribution of it to the society that elevates the other souls and maintains the existence of the other souls. With this new T it doesn't mean that everything on this planet is finished. It actually starts, but a new cycle we'll find out, exists for the mankind and then this becomes part of the process of being able to travel the spans of the U. In the coming time, in ?? of times, in weeks and days mankind will see this. You'll still go to school and to work, (:22). but the work will have a different meaning. The knowledge will have a different meaning. The leaders of the nations will change the process of teaching, because it has to be changed that man understands the position of his soul first from infancy. Not to be lied to when he becomes at a point of fear that if you don't do this, this will be the punishment and the rest. There is no punishment in the process, but understanding the position of receiving. It is part of what mankind needs to go through (and ?? through) for us to reach that point. We hear many people say that we have to get into the system then we'll tell you if it works. No problem, but you try to get into the system, which is yourself, then you'll know if it works. The process of the teaching, the work of the STM will appear very soon. Would we have the solar schools or would we have the soul schools which have elevated the school of soul to become the new generation of beings in the U. The expectation will be high, but the delivery of the truth will come from the action of the man himself. (:24). As we open the doors with governments as we open the path through different channels we'll see more and more. How the position and the condition will change. In step by step world leaders will change and bring that change and step by step we'll see the changes which come to accommodate the new understanding and then we'll see the new passengers of the U. Try to understand, to comprehend the reality behind these systems which we deliver. As I said the last time the next step for us is not just to do the helping of the man with his soul but the planet and what we have done to it and the other animals, to others in a way that mankind was left loose to do what he liked for thousands of years. We'll see the order will take place, we'll see the change of the rules of engagement will take place. As I said, the U Community has been waiting for this little child to mature and it's just getting to the point of maturity they celebrated with us and they are with us, and they'll stay around until it's completed. I remember the last time we were in Brazil they said, would we see the same rings and position in the sky (:26). as when we came. They came and we saw. They were with us last night and members of our team we both have videoed it. The position for mankind to reach the next step, but is mankind prepared to understand, do you need to build a spaceship or are you enlightened enough to transfer your soul to the spaceship available above. This is the secret. If you remember I

explained to you, when we met with the heads of NASA in the ?? Slagsburg Spaceship University years ago, when I explained to them how the new space T will come that by creating the right fields you get attracted by the G fields of the moon so you don't need to burn any fuel. The head of the NASA team said, the game of the spaceship has started, the game of the space T what we were doing is over, the rocket propulsion. Which meant when the system as we showed, by creating the right fields the system will fly to its destination. Now that we understand, as I said, we videoed them when we arrived, and we videoed them last night again in the beautiful city of Brasilia. Those who have claimed they have reached the point of maturity and understanding of totality, let's see if you can transfer yourself to the spaceship and become the true passengers of the U. The new spaceship T, (:28). is to join the spaceship of the U Community which is above and that has a criteria of the peace, understanding the peacefulness of the soul, then you'll be transferred, if this is the wish of the STM. In a way, mankind doesn't need to go through the process of developing a spaceship T, where the spaceships of the life, where the U has been waiting for, is above you. Tune to it and you finally become the passengers of ... you'll reach the ultimate goal of the freedom of the physicality, but that doesn't mean the end of understanding of the totality, but in fact, it becomes the beginning of understanding of a bigger scale of knowledge of the U. If you are privileged and lucky to see these spaceships, as what we have shown before in Southern Italy, in Brasilia last night we saw it in interaction with the moon and not with the sun. See if you can elevate your soul to the level that you become passengers of these spaceships, exactly as I explained to the heads of NASA, that by tuning into the MG field of the moon, it pulls it to itself. You don't need to burn to reach it. Then the mention of the speed of light and everything else becomes the nonsense of manmade bookkeeper. (:30). Then you'll understand that the process has started. Then you understand that many of the government scientists at the highest level have been waiting for, or they've been, they are aware but they did not know how. As I said very recently we have started the spark. From that spark the fire of the conversion of the man's soul to the level of the soul of the U Community will start one by one and then it will become uncontrollable, because it will transfer and elevate the soul of the others to reach that level. But it doesn't mean that we'll leave the dimension of physicality. This is the next step and what we see from where we stand, a beautiful cycle has started. And in so many ways, if you claim you have reached a point of elevating yourself to any. Let's see if you get picked up by the passengers of the U. Then let's see if you shine. Then mankind is ready to become part of the peaceful U Community. I do apologize I have a bit of a cold today. Try to expand to understand, (:32). the truth and not the arrogance. And if you understand that you have reached the position of elevation of your soul and you can reach it, let's see first if you become a light. It means you become a giver to enlighten the others to reach your level. And if you cannot do then you are exactly like those who make a lot of claims. As I said to one of the K Seekers, he asked me a question, Do you know when you (are going to) die? I said, yes, I know the place, the time, and the ?? where of it and at that point there will be no dimension of physicality, as we become the light. This is what the man should be, then you'll understand that the next position in your life, what to expect. We have done enough Gans and coil making and everything else, but now as I said to a very good friend, we have made the elevator for the STM through the Enhancement Unit (EU). Mankind gets in an elevator to go from floor 1 to floor 10, now these EU are the elevators in the physical dimension to elevate the STM to the higher level. Then you understand, (:34). why you don't have a cancer or a Parkinson's, or why you go into the system and you still have the Parkinson's, which means you haven't understood, you have not cleaned up the path of

past. If you have cleaned up the path of the past with your own soul, you'll receive the dimension of elevation. You have to understand that **it is the soul which has to accept the change and not the physicality**. What you see with these new systems is that a man who is paralyzed starts walking because the soul has elevated. He was paralyzed for months and years in a wheelchair, through the present medical technology you can not do, you need physiotherapy, you need this and that to be able to move the muscles slowly. But with this T within days you walk without any physiotherapy, which means the soul has received elevation and that elevation of the soul has been received by the soul of physicality. So the condition of what we call paralysis or damage doesn't exist. This is what they said, "resurrection", this is what Christ did, raising the dead. He raised, he elevated the soul of the dead body that with it he raised the soul of every cell that the dead body woke up. But now the wake-ness comes from consciousness of the man not in the dimension of physicality. Many will go to these machines to get salvation from the pain of physicality but they don't understand, that they have to understand what they have done to their soul. (:36). In understanding they'll receive the salvation in understanding the release from the dimension of physicality. Soon you will understand. As I said to someone very recently, these systems are being launched the best time ever, at the beginning of the spring, not only for this planet but for the STM and humanity. Try to understand more about the fields of the plasma and not the physicality of the Gans. Try to understand what it means to exist within the fields and then what it means to live within the dimension of the fields but in the dimension of the physicality by the choice of the soul and not by the confirmation of the existence. **We are not teaching anymore, as I said, how to make Gans's. We are trying to teach how you create the fields that lead to the freedom of the STM in the dimension of the physicality, but at the same time to have access to it.** As I said, it's not, "beam me up Scotty" anymore, but it's let me beam to become the sun, (:38). for the others to enlighten, then you'll find out that you become the passengers of the U. Today in the afternoon in the city of Brasilia we have a meeting with many KF followers who will come especially for this meeting. A small conference was organized in a few days and many trying to be here but because of the lack of time could not get tickets to be here. Your soul is with us and that's all that counts. The first true flights will come from South America and soon you'll understand why and how. Those whose understanding of the elevation of the STM will come through the path which was chosen a long time ago. For us to be in South America there is a reason to fulfill part of the promise of the past. It's not coincidental. We are taking the T into every continent on this planet and now it's time to unify the totality, (:40). and South America was one of the last parts to be delivered. What is important in what we carry on in the next few weeks until we start the actual delivery of these new systems that elevates the STM is to keep you on the position to understand gradually what is to come, for you to understand what is the next step and for those govern to understand the governing by injustice has come to an end. There are many people who want to get into these systems to test. We'll test and elevate those who are sick first, before those who pretend to be sick.

Are there any questions?

Q: I built this reactor with the 4 Gans's inside. I am a life long meditator. R- He says he has not reached the Tibetan "Rainbow Body" yet, ha , ha. (:42). Today I am 64 years old and my bones and body are not like a 24 year old, the last years I have spent just practicing in my bed. When I sit in my reactor I don't feel any tension in my body, my focus and concentration has increased dramatically and effortless. I sit for 1 hour and it feels like only 10 minutes have passed. My question is it possible that the plasma fields

have a levitation effect on the physicality, that's what I feel, and is it possible the plasma fields are bending time? ... K- As they say when you have fun you loose the track of time. When we tend to be in the dimension to enjoy or try to enjoy we don't realize what the time is. Time is a manmade dimension, it doesn't exist anywhere in the U except for man and is based on the rotation of his own planet in respect to what is called the vision of physicality. When you build these reactor, try to understand, you have to understand what we call, "the last dimension" which mankind has not realized, and is built in the structure of the new systems. This is what I explained before no one will be able to replicate the work of the plasma units which we make. (:44). As I saw somebody said, we are going to buy one and strip it and show everyone exactly what to do. You know the story of the man who worked for a potter and worked for years and never understood why when he brought the pots out of the oven at night were black and in the morning when he came back to work they were all white. For years he couldn't understand the secret of the change of the color. Until when the master was dying then he asked the master can you tell what the secret is to when overnight you changed the black ones to white. He said, it's just a blow, I blow the dust away and you see the beauty of the pot. I blow the ashes away and you see the dust gone and the beauty of what I made. This is the same. Just because you might get hold of one or whatever and you think you might copy, the soul of the U has no blueprint. That's what you'll not achieve. If you see anyone claims to make the systems that can do what the system made by the procedure that we set up you'll find that you have gone the wrong way. Try to understand that, (:46). just by making the fields and not achieving, it means you have not made the totality of the spectrum of the fields needed to create that effect. And if you think you have reached the point of levitating, you have to understand how you created the condition of the fields that brings certain type of balance between the fields of this planet and you. And you can do that by breathing, you don't need the system. Many people over the centuries have managed to levitate. Levitation is the position on the matter state of the Inertia of the body of the man and not in the dimension of the STM. When you understand that strength, then you can tune into it very easily. It can be done and it's been done by many people. You change your breathing and then change the position of your soul in respect to your heart, which (is the) creation of the soul of the physicality and then you'll find out that you create a MG field which elevates you, but because it's based on the field strength of this planet, you levitate, you cannot fly into another dimension in the space. R- ... In regards to showing powers like that, (:48). whether it's considered not ethical exactly, but okay with the U, to show such things, or does the ego get involved with that and we have this thing where it's not good for your spiritual growth to be showing such powers, let's say? No why not. If you can use it for the benefit of your own soul and not damaging other souls, why not. It should not become the point of arrogance, it should become the point of humbleness. R- And perhaps only through humbleness it can be achieved anyways, is that somewhat true? In so many ways. The humbleness becomes the point of a giver not a taker. Humbleness comes through understanding that I possess nothing, I am just what I call, a medium, a point of transferring. Claiming possession is the end of the possession. R- repeats .. When you think you possess is exactly the time when you don't possess anything and that is the time when mankind, so many times fails. You'll see a lot of world leaders, that when they get to the point of leadership they don't want to leave, and that is exactly the time when they lost their power. (:50). They come in with the love of the nation and when they think they have the power, they want to stick to it and that's the time when the nation turns back on them. We have seen this in many world leaders. One by one. It's very much in understanding the totality of the operation of the STM. When we

understand it and become humble enough to be able to interact with it, it's the time when we become humble, when we don't need to, when we know it's there if we want, but it's not for us to abuse. Then you can do anything. In the setup of the new systems, as I was talking to John in respect to the AZ new health center, in which the property has been purchased and now it's going through its phases for the machine to arrive. The setting will be in a way, that if we can structure a center point. If we manage to structure in what we call centers with these systems, not only by entering into the system but by structuring the position of the systems, many people do not need to enter the system. The environment of the system will create the same condition of the elevation. (:52). The understanding, and this is one of the reasons we don't let individual units to be sold. It is because of the structure, which will bring the position of the environment for the condition of the elevation of the totality. Then if we setup enough of these in points around this planet, in linking up the elevation of the soul of the planet and of the mankind will appear at the same time. Because the STM has not reached the critical mass as I have said many times before, and these systems are developed to achieve that and then we can position them in the right positions around this planet, which we have chosen in a very hidden way and a lot of you don't understand. That helping hand for the elevation of the STM and the soul of the planet, will come sequentially and simultaneously. You could not do it, we gave you the helping hand. This is the reason we insist on a minimum of 3 units, because it creates, if you remember the Star Formation (SF) with a 3 base, the upper base (reactor) becomes connection between all the systems across this planet, zero time communication, zero time, loving mankind and if we please the base the more powerful the system will become. (:54). Now maybe for those who would like to buy only 1 unit, why we tell you, you need 3. The forth is connection with the other systems to create what we call the SF to bring the change on this planet. As I said before, I am a very clever teacher and I know how to get you lot going that collectively we change everything together. It's no use just elevating the STM when the planet suffers and the rest of the creatures of this planet. It's exactly the same, you don't understand, but we know the pattern. We set it up and you not knowing it, you entered the cycle. You create that cycle that it leads to the next step. You'll find out that many of those who have entered in the first cycle of buying these systems, they don't want any financial returns. They are just happy that the system will free some people from pain, and it brings the condition that we bring peace. But we set it up this way. The forth is the connection with other systems and at the same time the 3 create the environment of the base of the SF as you understand. (:56). This is why when people come to us and say, I can afford 2 we say the KF will support the third one, because we know why we are doing it. We are making a starship out of this planet then we change the soul of the planet that we achieve our goal. Then you'll see all the souls will shine, be it the ants, the lion, the fish, or the man. And even the soul of this planet will shine. The light on this planet will look different from outside and even for mankind once it reaches that point. Any other question? Now you understand more of where I am taking you, huh. I am a Shepard with a sharp stick and I know where to hurt mankind, exactly like what we say, fun to be in. Any other question. Or has mankind ran out of questions. (:58). Q: John AZ. Because the Units are all made from the same source is it true that in AZ I'll have a connection in China? Of course, how do you think I am setting you up. Q: Is it also true that I will be able to ravel to China, for example, from one machine to another? Silence. You got realize that John is our partners in AZ with 10 units which is going to AZ for the development of the T and it will be the beginning of the collaboration of the Chinese, what we call the development of the space T and as the AZ is the operation between the KF and the American authorities it will be the

beginning of the peace. You'll understand very soon why we allow and go this way. AZ is the center for the next step in the space development with the American government, (1:00). and the Iranian spaceship program. We are bringing it in a very tentative way but the AZ center as John knows it's the beginning of the ?? space T which will bring the collaboration between the Iranians, Chinese, and the Americans. We need these kind of collaborations, not through the government, but through different arms of the KF. In a way, as we said, we start governing but people don't understand how we start governing. Thanks to John you'll the next, the rest steps, as John was trying to say, he wants to, "beam me up Scotty" to China. We have to watch where in China you are going to land. And if you land in China would you look like a John in the US or like a John as a Chinese in China. That's one thing mankind have to understand soon. And then it comes the position when you arrive in China, as you travel through the spaceship of the STM do you need to learn Chinese or do you speak fluent Chinese when you arrive, because the school of thought with the dimension of the position. Then you understand why we created U Council members. The travel through the dimension of the new system is exactly as I said before, when you arrive in planet Zeus you will not look like a man, you'll carry the STM and understanding of the current line of communication, (1:02). but you'll manifest in the dimension to a physicality, to a time and a place. Do you need to learn Chinese when you arrive or Chinese is part of the language of transmission of understanding the line of communication of the STM. Traveling becomes very interesting now, huh, John? J- I will pack a light suitcase. That depends, do you want Chinese clothing or American? ?? You'll be in China with American clothing, huh? You'll need the Chinese suit the way I have. I have developed a new Chinese suit and I got the tailor to make it. This doesn't work, (he said). When I made it, it was very nice. One day you'll see it I will wear it. ?? Chinese suit. You can still wear a tie but still you have a Chinese outfit. Any other question. Alzar- Morning Mr. Keshe. ... (1:04). Have you got your wings back Alzar? Not yet. Are you still grounded? Ask the reason why. Should ask you? No, ask your soul. You are trying very hard to reach it. A- I think I already got it, I think I am going now, so it's not a problem. Q: In 303 (KSW) you talked a couple of times about plasma and you use your famous drawing where you make a bigger plasma and smaller plasma and the bigger gives to the smaller, you drew 2 circles, do you remember. You drew the bigger giving to the smaller, the smaller plasma, so what is given, because it has something in it, because with that it has enough, or it has something the bigger one needs. I was trying to figure out the analogy, say I want to make. Say you are the bigger plasma and I am the smaller one, and then I want to make "Iranian dish" so you have the lamb and I have all the other ingredients, vegetables and beans and salt and pepper, turmeric, yah. So if I don't get the lamb I cannot make it. But if you give me the lamb I have the other essentials so I can make it, then I can feed you. Does my analogy fit the picture? K- Two things first you have to explain to everyone what "Iranian dish" is. And secondly you can make it with ?? ?? substitute too, but it depends what gives you the pleasure. (1:06). But you have to understand the only way man ever elevates, or any being in the universe elevates, is that he is humble enough to accept that he is always the smaller plasma even though he might be the bigger. This is the point of maturity, then you always have a position to find a position in respect to other souls. It doesn't come out of the arrogance of being a bigger. It comes out of the humbleness of being always weaker than I can elevate (the other), to the position of the bigger. It's a very tricky job. It's like being a professor in mathematics and trying to teach a 6 years old boy about 1 plus 1 and trying to understand why he makes 2. I see myself a lot of times in that position where I can teach you everything, but you have not learned the facets of being 2 and how 1 plus 1

makes 2. There was a time when the soul of the Messengers met. (1:08). In that process every soul of every Messenger was trying to show his humbleness. Sometime very interesting happens when the meeting of what we call the prophets of the past, they realized they only shine when they are in the presence of the Creator, and then they realized that they all shined the same. From that point a decision was made, that to shine on the humanity, the STM on this planet the same. One day mankind will understand this. Then one day mankind through the light of the path will come to shine as one. That becomes the humbleness of the soul of the totality. Then if mankind is looking to elevate and as John said, is looking to travel to China, and then in the time of trouble which is pending for this planet, the planet will find the totality of the new position and the position in the U. There is a lot of misunderstanding about how man needs to live. When I explain to you on how you transfer yourselves, (1:10). into the spaceships of the U Community, when they have been here with what we call the spaceship, should come from the humbleness of the man wanting to be elevated and not getting strong enough to be pulled. It's a misunderstanding of the human race. As I said many times to Caroline I have come here to taste the love in the dimension of physicality. The beauty of loving and the beauty of those who possess that love to be able to share with. If mankind understands this, the STM is already elevated to be a passenger of the U. To many of you these talks look like a talk, but very soon you'll go through every word of it, what you missed, because you see part of it, you'll be hungry to understand the rest of it. Don't look for the translation of physicality, understand the position it brings for the elevation for the STM then you'll become what we call the travelers of the U. Then you'll understand what it is and how it is. It's understanding the position how you elevate the soul, (1:12). and you allow that soul to understand its own weaknesses. As you heard last week, I invited Def Florescence to join us to finish the book on the patent, (one of the) KF what we call K Seekers wrote to me, Mr. Keshe how can you do this, he has done so much damage. I explained to one of them, he was born to do that, that was the destiny, by elevating you, the position of it. It was a test for those who are going to fail not for those who already succeeded. In so many ways, Def Florescence always used to say, I am here to protect you, that's my job. By setting up all these things he protected the KF and the work of the KF from those who could harm, without him knowing. Because those who were true K Seekers ignored the ?? false calls, those who ?? the K Seekers to gain something for themselves without contributing to humanity fell in the path. In a way he has served a purpose and now it's time to finish the job. It's understanding the position which counts, not the ?? possession. We haven't come here to gather the souls, but to elevate them that they find the path themselves. Otherwise we'll be another religion, (1:14). or what I call building and temple. We made the knowledge for the temple of the STM to be within the man and not within the block, a house that ?? steals the energy, Church and the Mosque. If you go to the city of Seoul in South Korea you see something very funny. The first time (I saw it) I could not understand, but after it was explained to me, it made me laugh. If you walk around Seoul, or when I was there a few years ago, you see a lot of red crosses like a church cross on different high-rise buildings and I asked the guy, what are these. he said, these are churches. I said, what do you mean these are churches? These are ?? rooms in the high-rise blocks that the Christians use as a church, because they can't build anymore churches the way we have it in the West. Now God is on different elevations in different floors, distance from the earth itself. Some of them are on the 50th floor and some are on the 10th floor. Now the Church and the path of belief has already found its way into space T on different floors and doesn't need to be attached to the ground. Mankind has already taken the first step to become the Christians of the space dimension, but they are

attaching it to what floor, what we call high-rise flights or the blocks. (1:16). I wonder if those who are on the 50th floor or churches on the 30th floor have achieved that higher elevation of the soul or is it only in the dimension of the physicality of a red light, as it is in Holland on the red light district. Prostitution of the faith of the god in the name of the cross. This is what we'll come to understand, mankind has to be enlightened to the truth itself, not by putting God in different dimensions as it suits him. And I wonder how many crimes have been committed in each elevation? Soon mankind will understand. Any other questions. Q: Mr. Keshe can you hear me now? We always hear you, but sometimes we try to ignore you because you go to far, one way or the other. Q: Mr. Keshe I haven't asked questions for so long so I want to ask you. Yes, because they cut your wings off. ... Q: SO the way I see it, when you say there are a couple of ... when you say somebody's soul is a beautiful soul does it mean we have ugly souls? No, but you have the soul which doesn't understand the level of giving. (1:18). Q: because if I am correct the way I see it is like this, like right now. ... K- Let me explain the psychology behind ... let me explain what Alzar relates about the Iranian food. Actually this food to her analysis of the understanding. In the Iranian culture when we make this it's call "gorbasabzi ?? " it means when you fry everything that it can last and you only make these when you have a special guest. This is the cram lacrim of the Persian cooking when you invite the host. This is the time when you give everything. This food has a special psychological what you call, lock in the Iranian mind. So that's why Alzar analyses with this thing because she wants to give everything. The mind only works because it works in that way, that I want to give everything and I want it to be the best. You'll find out, we went to housekeeper who used to work for days to make the best gorbasabzi when their guest comes. And you can smell it for miles. And when it's cooked in the apartment at the bottom, the one on the 50th floor can smell it because it carries a wild herb, that goes everywhere, and it stays on your clothes if you come from a house which had that, they say, oh you had a gorbasabzi. We carry the essence of the pleasure of the food. So now you understand why Alzar keeps on connecting to this. Carry on Alzar. Mr. Keshe I smell it here in Sweden. (1:20). I'll give my address to Alzar to send me some. Carry on Alzarjan. .. Q: When I look at the physicality of the human, imagine in there is a concrete block, everybody is in a concrete block, the soul is inside of it, so it can shine, but if you make that physicality soul like a glass, then you see the shine of the soul, because the soul still shining but it's in a concrete block. ... It reminds me that everybody is looking through a window. If you see a warehouse of a thousand kilometers in diameter and in this warehouse everything is available to all of us, but each of us sitting in this wall, concrete block. And each one sees according to what we think and what we think and feel, have only 2 maybe bricks removed. If you look at Trump the block from his wall the only 2 bricks that are removed are power and money, so he sees through that window, but he knows of he understands that he sheds that wall, everything, money and power, more then beyond the power and money available to him, but he doesn't have understanding and each of us .. No, let me explain, you chose the wrong person for analogy. A lot of people don't understand why Trump behaves this way. (1:22). If you understand or try to understand the behavior of this individual, it's very simple, he had a very successful father and his success came through the dominance of understanding the totality. He has forever from the time he received the inheritance and before, tried to say that he is better then his father. This is what most of the people don't understand about this man. He's a failure in understanding his own failure. This is a pattern with successful fathers and we see the same pattern with the failed sons. You have to understand why this man behaves this way. He saw himself from childhood as a failure in comparison to the father and everything he does

he is trying to prove to himself that he has more power than his father did and he can prove to himself he achieved more. This is what people don't understand about this man. I always say a father who made the business because he had to make it, he knows all the tricks, all the ways, he has mended his ways to become successful. Eliminating the failures or being able to hide them. A son who has just seen the successes never understands how to mend it. (1:24). That's why this guy, no matter what business he does he fails. They say, how do you make a millionaire out of the farmer? You start with a billionaire farmer. And this is that farmer. This man has no understanding of the truth that he is a failure. His battle is not with humanity, it's subconscious to prove to his father that, I am better than you I became a president, now I can show. But in fact, his presidency was in totality the failure of his work. Before, if you see he has brought his nation to the same point of failure, as its businesses. All the big businesses flourish with the first generation and 80% die with the second generation, because they don't know, they have (only) seen it, but never ran it. And 95 to 98% of the businesses die by the third generation because they are just interested in spending the money and not how it was made. This man is a test for the Americans to find out how what you call, a failure their nation is to the nation and they made a failure out of their nation. It's the same way, we'll see this in China in the next two generations. The families, the sons of these 30 millionaires a day that's built up, most of them will lose everything and the nation will take a dive. Because the soul of the ?? working is not there. Don't ever use Trump in your analogy because, (1:26). this guy is just proving he is a failure by trying to prove that he is better than his father. He has done nothing else. If you look at the whole of his career, he hasn't achieved anything. A battling inside to show I am better than the man who made me and this is the point of his failure and he hasn't understood this. The rest of it is monkey business. ?? They cover his failure after failure. His battle is not with humanity it's with the soul of his father who created him, who was a very correct and successful businessman. The rest of humanity is paying for a failed man. He's battling with the soul of the father, but in fact he has destroyed the soul of a nation for his own misconduct and if you put him in a concrete block, open it and make with glass, you can't change it, that soul is what we call entangled to the point of trying to show he is better than his father ?? his own nation and has reached the point of failing the human race. People don't understand how much this pulling to his father has done to him ??? He brought us to the verge of a world war. He will not be the president next time unless ?? goes with the polls. (1:28). We look into the next president of the US if this time goes right to be a woman. She'll emerge in the next election or she'll come in as the vice-president and then move into the president's position. Q: ... Say my physicality is 100 and my soul because I put it in this block is 20, but if I let go of my physicality and let it be 20 but my soul becomes 100 then I can shine? Oh, you are so wrong, that is exactly where your soul. If your physicality is 20 then your soul is a million. Q: ... if my soul is 20 it's going to suffer? It cannot be, your soul is the creator of you, it cannot be weaker than you. Q: No it's not weaker but I put it in a way that it is not shining like in a cage? No, you can't look at it that way. if you are looking at it that way. When you have a sun that shines with all its might, it radiates all its field, (1:30). when it comes in touch with a weaker earth it shows the beauty of its light. Do you understand. It's the presence of the weaker which shows the beauty of the stronger. If you look at it, the earth is the size of a speck of dust in respect to the size of the sun, but how does it come and shine so beautifully when you get the daylight. The sun needs the earth to confirm its existence and through that point the weaker shows its beauty. I hope you understand Alzar. those of you who don't understand, ?? means my life. It's the gratitude towards existence in ?? language. ?? means life, someone I share my thoughts and my life with.

It's a time of communication. Okay next question. Q: .. Can you tell us a little more about Marianne Williamson who, (1:32). who runs for the presidency of the USA on a politics of love. It looks like she prepares for a healing of the American soul? You have to understand the most wounded nation on this planet is the American nation at the moment. We say in French, the French women in the last century didn't have the money to buy the rouge to make their cheeks red that they would look healthy, because red cheeks was a sign of healthiness, they used to pinch their cheeks to go red because they have used the makeup. This is how the American state of economy and life is at the moment. By pinching themselves trying to show they are healthy but are not. The nation needs to look inward to find out what it has done wrong to the other nations and in that process ?? study of itself for the sake of to be loved by the others. If you speak around the world, and there were some statistics done, the most hated nation on this planet is the US at this moment. But the Americans don't want to understand it. A survey was done by what you call, those who understand this that no nation ever has been hated and despised as the American nation ever on this planet. The amount of war they have created, mayhem, and abuse. (1:34). Maybe there is a need for such a person to bring the nation to understand. It needs to be allowed to heal itself. Not out of arrogance but by loving other nations that they love ?? come back to them. Look at across this planet how South America, go across East Asia, Middle East, through Europe, Ukraine and the rest of it, Yugoslavia, we have seen in the past century a trail of murder and killing by one nation. As I said very recently, high level bombing has become a pattern of high level bombing of killing themselves and maybe there is a need for this platform for people to be conscious of. If Americans get to know what and how people think of them, how they live with them, Americans will not do what they are doing if they are conscious that it is important for them to be loved. Look at many how many orphans sit ?? nation after nation, Afghanistan, Iraq, Libya, most of the South American and African and far East nations, there are more or less no nation that America has not carried out murder, (1:36). and how do you expect this nation to move ?? to reach it. Maybe there is a need for it. On the other hand ?? nation understands or very few trying to carry the rest of the nation, which is heartless, to love. It is estimated that 80% of refugees, orphans in the past 60 to 80 years is directly caused by the Americans. But the governments do not tell that to their people. Then you understand what is about to come to this part of this soul of this nation. Maybe they would like to open a platform to try to raise ?? ?? together but (sorry about this I have a very bad flu). Understanding why and where this nation is going. You have to understand they are 3 or 4% of the total population on this planet. They are the most bankrupt nation and by fear and tyranny they have caused a lot of mayhem trying to show they are a superpower. The whole thing is that sooner or later it will collapse. It cannot hold. (1:38). This is what I was explaining, if most of the people understand what is about to come in the next few years, we see the beginning of it. Cryptocurrency. Cryptocurrency if you look is how much I can mine and how much I value that mining. But the next step for Cryptocurrency is how much am I worth for the time I put and who is prepared to pay my currency. In a way without the banking system realizing, individual evaluation of the cost is coming into play. I value myself, I am a street cleaner and without me you have nowhere to go. I am the office cleaner and with the cleaner you work in a pile of god knows what. So what is important for me is how do I work, and this is my bank, my Cryptocurrency. I like to live a comfortable life, I like to have a house and car, then I start valuing myself, maybe a million dollars because without me you can't have it. This Cryptocurrency which is taking place by imaginary mining will change into the reality into the world of ?? of himself and what we are prepared to pay for it. More and more

we'll see this. Then you'll understand why we brought in the Keshe Coin. (1:40). A point of reference, equal everywhere you balance it off. This is why we don't allow K Coin to be speculated on. We could see this, when I set this up I could see this coming up. then would we be prepared to buy any American Cryptocurrency, individuals, because they are the cause of so much mayhem. What we call individual Cryptocurrency according to our worth in contributing to humanity. It's inevitable, because what we call the actor, President of the US took the backing of the greenback from the gold. You can do whatever you like. Now we saw because of that, years down the line, Cryptocurrency came that we value who digging, what we are digging. Why should I rely on somebody else to value what I can buy from. I what I contribute, what is my value, how I value myself and others will value me. We see a change, soon in the next 20 years we'll see this change. Now there is nothing ?? back, this is why I was saying that BRICS is taking so much hold, it's trying to bring into realistic value of the nation according to what the nation contributes to humanity towards its structure. (1:42). We'll see this, it's the evolution, this is the time when, what, how you give to me through your soul that I can exist, that I can give to the others, then the Cryptocurrency becomes nonsense. But we that phase coming in. Individual Crypto currencies. Surgeons valuing themselves, this is my value do you want, this is what I want. In a way it becomes valuation by bartering the essence of existence, then everybody will live a normal life. You have the food to eat and everything else, because then through your own Crypto currencies you can give yourself loans, credit buying. This was tested in a very wild way in Iran and we saw the results of it and it created a mayhem for awhile but they got hold of it. After the Iranian revolution anyone could open a bank, anyone with power, any Ayatollah, Mullahs, anyone could open their own banks and have their own printing machines. And they printed, if you wanted to buy a house for a million you opened with me and I printed and gave you the million, so you have the reference of the bank to do it. The government finally realized after years that all these different sections have their own bank and they print what they like and it added to the speculation of the prices in Iran. So if I wanted to buy a land for 10 million my bank just put a paper in there and signed for it. (1:44). This is what will come, how we value it, can we accept this bank, or this Cryptocurrency from a bunch of people working on a computer chain, or working on ?? effort this is how we set up Keshe Coin. Now you understand how far advanced we are in this ?? That's why we said in the KF in time, everybody will be paid according to the K Coin, what do you want to exchange it. Your worth of the money never drops it's always the same value anywhere you go, and do we need to pay, or we balance exchange. You work so much in a factory, you value yourself, I can't go bankrupt because your valuation dictates what you can get for other efforts from the others. You watch the valuation of the imaginary mining of Cryptocurrency to the reality of the effort of the man encrypting and developing in his own way to serve people and how he evaluates himself. Then you'll find out that a lot of street cleaners will give themselves the same wages as ?? because they want the same comfort as we expect to give them, without them we can't drive down the street. When I used to be in the world of business I used to give annual bonuses and my rule was very simple, the bonus gets cut right across all the workers the same with the management, ?? Because they thought they were the cause of all the success. But I always told them that if that lady wasn't there to clean your office you couldn't even ?? somebody to tell them you are successful. Her cleaning your room or office or your toilet so that people coming in ??? (1:46). is hers not yours. If mankind realizes this we'll enter a new dimension. This Cryptocurrency is the beginning of why do I have to buy something when I don't even know ?? encrypted. Encrypt my value. If I do a surgery this is my

value because it gives me the life that I want and then you find out it's to the point where everybody has what they want, gradually you have a mayhem ?? then they reach a point that everybody respects and deserves life. Then with the new T we offer, then you understand do we need the dimension of physicality and the maturity of the man will come. Any other question. .. There is a point which we want to bring into the discussion of the KF K Seekers. As you know the KFSSI, the teaching section of the KF, finishes tomorrow for this year. Next semester as we go from January to January we will change the pattern of teaching. We are looking for participation of K Seekers in research and development and in the process of learning more from each other. We participate in different ?? in different projects which is your interest. We would like to start with 5 or 10 topics. (1:48). How many people would like to be part of it. We'll set up a structure for you to be participating inside it, which means as K Seekers you have been what we call undergraduates, now you have become the graduates, now you become the post-graduates of doing research. Some of you like to do the theoretical background and some the studies in the KF in respect to what the topic could be, or some are the practical ones want to make something to show it can be done. There is room for everyone. We'll post the link are topics of what you would like to research in, what you would like to do with that research, what you bring in, and we'll put it on the KFSSI page that groups of you who would like to meet join in the research and development. In that process we'll go into the higher level than just making Gans's and MaGravs and maybe in that process if the team decides they can go and do whatever they like to do with the KF with their work. We have to go this way, that we encourage new enlightenment in knowledge and a new understanding for the K Seekers. the group can come and report in the teachings and take steps in what they want to do. With this process ?? take over , KF research and development. If you want to do theoretical work on what the KF does a group of you get together and integrate it or make systems, (1:50). for application, you are quite welcome to join in. The next sessions ?? finishes tomorrow for this year, is research and development. It doesn't have to be a physical system, it can be an understanding of a process in trying to achieve something, which has been something that could not be done before, and understanding the totality. It's like if you ask Alzar, she wants to know how to make a tooth that you don't need to drill it and whatever. Make a team of people who would like to understand how to grow a tooth. ??Go through the teaching for understanding what ?? Dentist understanding and make a project of it and we'll see at the end of the year what it is and how it is, and may be you'll want to develop a T of systems or pieces that you can prove it and then we make it and can send it to Alzar and she can test it on her patients, or other dentists. Or you want to develop a new communications systems. We have to go into this phase. What we'll see in the coming time is that many governments will start teaching the new plasma T from the first years in the school because they are realizing that this T taught and changing the minds of those who were taught (the old way) from the beginning and it's getting hard. We'll want to look at how we setup the education pattern of the future in the schools, for those of you who are education minded. How should the books be and the education side, if that is a project for some of you. How do we develop the first systems, (1:52). and tools that they understand the position of the soul from the beginning. We don't need to let them go to the Church and the Mosque and they lie to them. ?? ?? Anything which could be ?? If you are a KFSSI K Seeker and you have a common chat room put it on the Chat ?? Then see who joins, you can be part of 2 or 3 different groups and bring the knowledge from one to another. It's more or less hands on research and development. If you make one group it doesn't ?? if you make no groups it doesn't make any difference. If you see it that you want to develop these things go back

into KFSSI and put your idea and see who is prepared to collaborate and how you want to do it. It goes the same way, you can come 9 to 5 to discuss it with want you to do and see how many people join, and setup. If it needs we'll make different classrooms at the same time, 9 to 5. The energy group, scientific group, the ones who want to make a dental equipment, and we allow it to grow in that platform and you can go to any of the platforms to see what is going on. Maybe you can bring the knowledge from one to another and we'll see it. If you are a KS or want to be one in KFSSI join the research and development. It could even be utensils in the kitchen or something you can imagine that can be done in the house and you can make such a tool, or we have such a ?? Then at the same time in the process you might learn something about Gans making and the rest of it. (1:54). If you need to understand and progress it, please go to KFSSI and try to put your ideas and see who is joining different idea groups. and if one or two people you can keep on doing the research and keep putting in there ?? maybe somebody finds it. In the Thursday teaching we'll try to elevate these topics that other people might not know and want to join. They'll join the KFSSI and add to their knowledge or they'll bring part of their contribution or they've done something and they want to increase it. One thing we are trying not to do is to make people who become dominant and they try become the heads. This will not work. We'll block these things from now on. As you've seen very recently, they come in and nobody ever listened to them in their life and being heard, KF gives them the bold sense, now I am the KF, I do everything ?? if I am not there the whole thing collapses. They find out after 3 or 4 weeks there is nothing to collapse it but themselves. We've seen this quite a number of times, people who misplaced their own position. They come into the teachings and then we give them room to become a teacher. Then something, and they think without them everything falls. The KF will go for the life of the man. It doesn't make any difference. I don't think any one has done more damage then Red Circle and with he brought more ?? People don't understand how they were served by this. How governments started looking at (KF). Anyway the harm that was planned to be done has done more and brought more success and people. It's a point of judgment, people judging themselves. We need these points. But some of you who think you ?? just because you have been moderator in a couple of classes, now you can do whatever you like, now you are the god. It's in your imagination. I have always said to my children, a man with the knowledge ?? ?? with his life. A man with a title is a placard on the door, but once he leaves that door he doesn't exist. If KS understand this we'll progress very, very far. You're a Minister as long as you are with that placard on the door, but on the street nobody knows who you are. Except for the knowledge you learn to serve humanity and be there to help someone. You don't carry the placard in front and ?? ?? and say I am a doctor. The strangest thing is, have you ever been on a flight with 2 or 300 people and somebody nearly has a heart attack. What does the airhostess do? Are there any doctors on board? Nobody knows who you are unless you stand up and say I am a doctor I can help. (1:58). It's the same with the society of man. Unless you are a doctor and have the heart attack yourself. That happens with a lot of people who miss positioning themselves and they come and position ?? ?? they need the freedom to go and show their beauty. And you find their beauty becomes their demise because they were false ?? If you are KS and you want to enter the world of research and development and meet internationally with all the KF ?? and if it goes further in the physical research and development at the site ?? ?? Put your name in the KFSSI and what you want to do, try to explain that these are the things that need to be done in this part of the first year. You can extend it to the 2nd or 3rd years it doesn't need to finish, but unfortunately we have a very bad problem with KF is that we have no papers that we can produce, we can't afford any

papers to write that you have a PhD or Masters from KF. Any other questions. There is something I have to tell you, hopefully we'll launch it today, but the KF team is stretched to the maximum. They have been working around the clock. Next week we'll open the store of the KF, the products are ready and we hope to go to day but there are some points left ... new products with a catalog. (2:00). All the products will have CE and American certification ??

Please try to understand we are trying to convert new T to new products that you have never seen before or you have seen and we elevate to new dimensions. As I said, we'll keep our prices to 9.99 to 19.99 for the new first range and if you go back on top for the other products. Everything in the first batch has been kept to that price. The only thing we have is the shipping which is sometimes more than the cost of the product and this is what we are trying to fine tune to be, at least we find the priority, it's the same with everybody else who ships but now that we have ?? ?? you can buy a new pad for 9.99 or 19.99. All of our patches which used to be crazy prices, now we have going on we have allocated a new product. They are all brought to the reach of every man, unless we go to direct distribution, that will happen. I have made a distribution where ?? Italy and we put the products at 9.99 in all the chemists shops. This I will explain to you ?? come. We make sure that across Germany, Spain, France northern Europe we can keep these distribution to pharmaceuticals. I have a long standing relationship with one of the biggest pharmaceutical chains in the world, Europe and we are speaking to the Board of Directors manager and they are prepared (2:02). to look at the new products of the KF to be in over more or less 50,000 pharmaceuticals across western Europe. These are old friends. Now that we have taken over we'll make sure that everything will be at the margin they and we can run and gradually we'll bring it in. It's the product range of the Pharmacies. Everything will be that price ..
... there will be a section for cottage industry.

(2:04).

... We want to build it up like an "Alibaba" of our products ...

(2:06).

.. We'll start building the platform and it will take years and cost a lot of money, but this way if you want a patch or something locally ... We put this on and we saw one of the Brazilian groups said, oh he came here to steal the T. How can I steal the T when I gave it to you? You are stealing, and then .. (2:08). We don't need to steal we gave it to you free. It's your responsibility to what you added to the knowledge, then to put it back in and others can enjoy it. You don't have a platform, you might sell a few pieces, but the KF website is international, millions of people come and go. The more we put them up the more it grows. It gives us the people to live off. We came to a misunderstanding by doing this a long time, but when I spoke with the Portuguese group some weeks ago, then we realized that many Portuguese were giving the certificate by Kevin Blunder, that by agents, and they used this. When we got it analyzed it by Rui, what do you call it, the then UC member, it was their only way of living. If ?? the knowledge of the KF has become part of your living to feed your family, let us help you to have a more comfortable life that you get a bigger exposure, maybe more orders. If you were selling 10 pieces a year and were getting something off it, now you'll be selling a hundred pieces. We are not jealous, we want to support you that by you putting more materials in the market it becomes known and part of the culture. I have has the pleasure of coming across people who have used it. (2:10). Because they have seen the benefit of

it. We had the pleasure to be with government officials very recently and as a man of medicine in the position of government, he said I don't need you to explain it, I already use your Pain Pens. It's that level, your talking the highest level in government. We don't need explanation because we already use your T. It's not my work, it is your work. As KS ?? let's do it together that we can support you. If you have your own website then link it to KF ?? Make sure your products are legal they are correct. I am sure in the future you'll make ?? ..

(2:12). .. This allows a new cycle and it shows in every country. People come in and they want Gans .. Make sure you deliver and give the benefit to the people so that they can come back. We have seen a lot of misconduct in Brazil and I sure there is in other places. One person who thought she was the center of everything, now we hear talking about everybody that she becomes the only one. This shouldn't be, we are all loved and looked after the same. This process has to stop. If somebody buys from somebody else in your country, encourage them. ?? Because ... Don't work to destroy the others which has been the habit of the man. Build on it and then you'll find that you develop more. ??? .. I know there are thousands of people in China that sell Gans's. Then you see the prices then nobody can go and do crazy things, but it has to be correct and in a standard position that we all can benefit by it. We'll try to .. if something delivered is not to expectations be prepared to get it back. ?? and build the relationship across ?? (2:14). We'll expand it, this will take a year or two to get it going ...

.. We'll provide data for those who work with the governments.

.. we need a lot of doctors for the EU.

(2:16).

.. Some people were asking about the jobs. This will be announced in Austria in January what we need... All the pieces for the EU will be completed in Austria and shipped across the world. (2:18). We need a lot of support and that channel will be opened up in KF Austria. ..

Any other question. Q: What about the Plasma Times will there be more issues? They are already done I was talking with Ella, we have been so busy with so many other things, it all needs to be done ...

Since I came back from China the KF is expanding very slow but very solid. That we can handle everything. ...

Q: Can you ask of the Conservative or Labor would be more KF friendly in England's general election today? (2:20). Oh, that's a very loaded question. Let me explain what happened in 2015 the British Health Ministry called for a meeting of the health ministries of European U in respect to the KF. We are aware of it because I was informed of it. They made a tentative decision that it was a cottage industry and when it goes up enough then the governments will look at it. This was initiated by the British government. The application of the new T will come through the health (side) of it, that's what we show, especially the new Enhancement System or Unit (EU). It's such a big elephant that nobody can ignore it. You have to understand what it means. We are coming in the path of space T, it's to be developed for space and this will go the same way. We need to extend and KF work is known by all the European nations and most of the world governments. It has reached the point of international recognition. You'll understand very soon what that is. We setup the conference in Vienna and then in Brazil and into Malta. We saw a lady from Italy who came to Austria, she wanted to show her magic but we didn't allow her. (2:22). She went back and wrote a lot of rubbish out of being despised that she couldn't show her magic. It had nothing to do with the plasma.

We let this kind of what we call, stupid behavior, but in general our work through these conferences are becoming very positive. Governments are getting involved and the first MOUs have been signed. MOU with the local business people has been signed and now we move in better understanding with the governments. We see the benefit of what we started in Vienna. ?? very few diplomatic core who attended brought a lot in the background in one or two cases we are working on. We have reached our target, no problem. Our next meeting in Malta in January will bring another ?? We are targeting diplomatic connections that they hear but we are targeting governments and they see it. You'll hear about the KF in the last 2 conferences and the one to come. We expect a very positive results from Mexico, we are also going to Kenya to complete. We have reached agreements with German government to most probably setup the first factories in Bavaria for helping the country. We have been to the ministerial level and we achieved that position. .. We are looking for a conference in Philippines. (2:24). We have very strong Philippine groups to talk to the KF to setup a conference that we can and be there to bring. ... We are looking for the Far East to setup a structure and in the Persian Gulf. You'll see very soon structures setup as a manufacturing in the Persian Gulf. These direct communications with governments has given us a lot of opportunities for the new systems plus these conferences. These conferences will prepare the nations for the next one, while we are in then we go back. We were in Brazil 3 weeks ago for a conference and then when we arrived we were asked to extend our stay, which we knew when we arrived that it will be extended. We were allowed to stay with the BRICS groups and our talks and negotiations with BRICS groups was very good. We see the next step, and we came back to Brazil on a solid base and building up the connections to confirm and then we" see the results of it very soon. We are dealing with governments, KF with what we call, individual basis by your work has been completed and still developing. What we have done in these countries have given us opportunity to negotiate with governments. One of the first things we do is to put everything on the table in respect to the Belgium situation, (2:26). that they have to make a decision. It's very positive and they understand. The government doesn't go to read because they know how it is setup. As we call it, it is colonization through technology. Before they used to raid the countries and colonize it. Now they try to control technologies so they can control the others and this has to end. It has come to an end. The governments have started to understand how the game is played, and we have a very strong support in the European Court of Justice. Our appeal is directly to the government of Belgium and not individuals. Because the structure of the government destroyed documents and the judicial has falsified documents. So somebody inside has to have such power and who is the one who covered it up. The government has started seeing it. Don't forget we have pictures with the king intimidating with the queen and it's published. When a king and queen sit down for an hour and a half and ?? a scientist, governments can understand because we have pictures taken by one of the supporters of the KF who was in the café when they ?? us taking place. We put the whole thing on the table, documents from the people who were present in the court and have an affidavit. Our case in the European Court of Justice is solid. We'll see a lot of changes and the governments are taking position in that respect, they are ignoring all the things, but it shows the weaknesses in the structure of colonization by T by killing scientist. (2:28). We are engaging governments and the first thing we do is we put the facts, that we have been committed to a false, what you call documents, all the documentation is there, they can see it. What is interesting the same case number in the court in Belgium, the first one says terrorist, and the only thing they changed when the Americans refused to accept me as a terrorist, they said he was a scientist. They used the same court case number and they changed it

to fraud. This is the amazing thing what the stupid Belgium's have done. They should have made a new case as a fraud or whatever. They used the same case number and they changed the terrorist summons into fraud. This had alerted the Americans very much in how it's done and you'll see it. They played with everything. We have submitted these documents to the European Court of Justice and it's amazing. They tried to drag it on for 2 or 3 years, the longer they drag it the more it gives us the chance for other nations to see into the operations into the collective between the Belgium's and Americans, how they have killed many scientists using Canada as a point of arrest. It will be very interesting how it is emerging and then you understand they ?? ?? in the same process.

R- There is a lot going on now in Canada specifically how to interact with China in that regard, right now. K- Well yes because that is why the king of Belgium has made a recent trip to Canada they are looking for sanctuary. (2:30). They are looking for a place to abdicate and because they did all the crimes between them and Canada and the US. The Belgium monarchy is looking for sanctuary in Canada. If you look at the report he was there very recently, out of nowhere because the hope. R- There is talk of other monarchs that want to settle in Canada as well. ... royalty refugees across the world. They're going to need their own refuge because the people may not be happy where they happen to end up. K- You have to understand Canada has been a collaborator in assassination of scientists and stealing of T from scientists with Belgium and US. R- Yes, absolutely. Now they think if they go to Canada they will have a sanctuary. They will give them. The next step in the European Court once we go to it, we have enough evidence for 7 other scientists that have been murdered through the same process. That will take into the Human Rights Court of Justice in Dan Hag. There is no government. There is enough evidence of the direct connection. They are trying to preempt what might happen to them before hand. ... there has been no Belgium monarchy visit to Canada for 38 years. (2:32). It's a bit dodgy when you make a trip so fast. It's not just monarchies there are other presidents who are in the same position. .. I was kept in Canada in the airport, jailed by the Canadian customs or the police. The guy said, I get my instructions from Hillary Clinton, she'll decide on your destiny not us. It was very interesting, I think the time I was there, there was a conference, a G something, they were all there and they panicked, there was an Iranian nuclear physicist there. And Hillary Clinton has the say, and you saw what happened with her, go and see what she made ??? for the same reason. She is in a bad state of mind and mental condition today. She ?? ?? carry ?? These things happen and it's working together. It's good for humanity to reach a point of justice. I can still ?? in Canada. The point of it is how many other scientists have kept silent at the point of intimidation and arrest and stealing T from. This can not be one off, we were one of many and it happened over the airspace of Canada and that is why when I came to Mexico I thought it was a safe transit through Canada. Now we don't do that anymore. We take direct flights to South America. (2:34). I go so we don't have to go through criminal states. My advice for everyone is to avoid the airspace of Canada that's what they do. I have been a victim and Huawei is another one. ?? Canada has become the point for stealing T and capturing scientists and developers. It's part of the process of the human race maturing. Any other question. You are rubbing your hands I think you are cold. R- no I was just relishing your answer, I like that thank you. It is a little cold here but not bad. Q: What will happen in April and what will come in 18 months? We are trying to negotiate with the Iranian government to show the space T in Iran the 19, 20, 21 April. The T for it is available and after January now that I have finished with the medical side, it's going in the hands of a very capable man in the KF to see it through. We'll concentrate on the environment and the space T which ?? worked, and the rest to be, our target is to show the EU simultaneously in 4

places around the world, AZ, China, Brazil and Iran. (2:36). This is important for us that the T is shown simultaneously across this planet. At the same time we go to the space T we developed, it depends on how we tune the system. ??? illness or elevating the STM, producing materials or becoming a spaceship, or ?? energy. It's a universal system, it says on it, it's not a name it's a functionality. In the U ?? rotates ?/ creates energy, food, life and everything else. It's called, Universal System. Now we understand more. In 18 months time I'll leave the KF as I am today and I'll go back into research and choose a private life. In so many ways, Christ did the same, he completed his mission. We are not here to claim a position of power we are here to elevate the STM. I'll take ?? towards research and development, like many of you lead the life of it, and joy for it. ?? new life. This is what our plan is. ??? that speed of development is so rapid, (2:38). that I think it's time let the man to walk and see if he falls to ?? get up. We are not ashamed, ?? to stand up ?? push it and guide it 20th March ?? my date to leave the KF. 24

(2:46). Because of the high temperature you pass the point of melting in a rapid heat, so you "evaporize" it because a single atom of it is a vapor of it, in a gas state, and then because of the immediate environmental coolness it goes back, but it can't take the molecular structure, it stays in the ?? then in the next process you spread the ?? individual to singularity, on its own and not being spaced with other elements other atoms. So Gans is an accepted T we don't call it, a lot of people call it a plasma, because plasma is direction of the fields, but the Gans is the source of the fields, it's a sun. It's understood by scientists very correctly and rapidly. Q: Is there any influence by our "Twin Star" in us and in this creation? Yes, continuously and scientifically a group of scientists lead by a well known scientist very recently, in the past decade or so, has shown that the cycle of what we see, meteorite showers that effects the condition of this planet, spanning the whole of the solar system, is when the "twin star" comes in too close of a proximity and puts pressure on the plasma of this solar system and pushes materials towards the center. Yes it does. ?? Check the research papers and you'll find out. (2:48). Q: And is that why we see a lot of elevation in the human knowledge, because of that? No, this is a, not really. Because according to this research which fits and actually shows the cycle of how often the twin star comes close to us. It goes back to the position with the dinosaurs. It came through that cycle of closeness. It has a pattern and every time they come close we get a higher shower of meteorites crossing back to ?? It's just like a balloon, you pressurize it so everything moves to the center. the closeness, when they come very close they get to this, but due to loss of a lot of their fields, both stars to the galaxy and due to pull of the galaxy ?? now this solar system and its twin are closer in the center wing of the Milky Way, we call it, they'll be pushed (together) and they'll merge and that will create a position of, what we call, 2 stars sitting each other, or becoming one. But that is in the future. It's inevitable, ?? factors and environment and as you have seen higher level of meteorites moving towards because of the pressure on the boundary of the solar system. We have noticed a lot of bones, we call them dinosaur bones, (2:50). because that position changed, the position of the planet.

(2:52).

(2:54). I know some of you couldn't get tickets to come here because of such short notice.

... Q: Tesla erected his towers on the same earth lines as the Giza Pyramids, is this like the halo around the head, (2:56). where the universal fields entered the planet? K- What? (repeats) K- Not really. ?? decided where the ?? going to be and they ?? bought of him. Q: Seven sages in the ancient Sumerian texts are holding a bag and a crystal pinecone, is this the stronger giving to the weaker projecting the universal fields to elevate the soul like the KFSSI Enhancer? I don't know. It depends on how you want to interpret these things and we can't interpret just to be for the benefit of the KF this and that. R- There are a lot of things in that could be taken any way. K- A lot of scientists have taken it according to their understanding and a lot of people as scientists developed things they never understood. (2:58). Q: Arthur from Attenborough. The blue light spaceship you saw, and ask you if it was a field spaceship, did the UC make it through their soul or is it a reactor type spaceship? We had it last night again. yes, I videoed it and our head of KF in Brazil, we are all in the same place, he did the same. Let me see if can send it, that's his recording. I'll try to foreword it to (3:00). Rick. .. Q: was it with the (rainbow) rings? K- It was exactly the same as before ... He took one at 23:10 and 32 minutes past 12. It was there for several ... Q: I think Brazil has many activities in that region? I don't know. Q: I think there and Mexico they have a lot of them. ... (3:02). ... this should be with you on your chat Rick. What happened we saw it last night, it's the second time we see it in Brazil. It was there for about 2 or 3 hours, but this will become a norm and you'll see, it's very hard to record on a camera. These are what we call field center systems. (3:04). This will carry on with us in every nation we visit as part of our international conferences. (Shares UFO video). You see it at the edge of the light. It's very faint because you can't see the circle. ... No this is not a faint ring, it's a full spaceship, you see it. (3:06). When we were in ?? Sienya when the universal charter was getting written, around 2 o'clock in the morning, we saw a full display. we were with two families of KF and we both could see it. It was a beautiful display. 31

.. The original or the first flight system any race makes is a copy of the earth. If you noticed we already done that with the Iranian space program, because the Iranian reactor is that ?? Some cultures 100 of years relied on 1 reactor. (3:12).

(3:16).

(3:22).

(3:24). ... Lyn is the head of the KF China. Q: How does the hot plasma interact with the cold plasma, I think maybe he has a wrong understanding, can you explain how plasma might interact to create hot or cold it could be more easier to understand? The heat is a state of matter of the plasma. Plasma has no temperature. When you call it hot and cold, it ?? created (3:26). out of heat what we understand as

Any other question. R- We need to let you know. We'll see you next week, we'll be on another point on this planet.

(3:28).

Bye, bye.

(3:29).
