

307th Knowledge Seekers Workshop - December 19, 2019

(Keshe Foundation web shop opened with a lot of new products and low prices of 9.99 to 19.99 Euro and cheapest shipping, Ella goes over products, About those who betrayed the foundation, Iranian officials asked directly if he is the Messiah and he says yes we are all messiah of our own soul, The Day of Judgment is everyday to Do Good Think Good Act Good, Don't allow others to steal from you nor you from others, The diseases of the world leaders, Tehran conference Knowledge Seekers will stay with Iranians and not in hotels, The No War Treaty to be signed by every country, The Ayatollah who brought Iran to focus on advancing science and technology to make Iran the leader in new technology, The Vatican and Rothschild's family financing wars around the world, Project list for new KF research in the coming year, Saudi oil refinery bombing was the use of the technology to return American missiles headed for Tehran nuclear facilities back to sender, ,)

(:10). ... KF web shop is opening up today.

(:12).

(Talks about KF products ...)

If you have an idea bring it in and we'll finance it. ...

(:18). .. We'll be a part of the products in a big way.

(:19). Ella takes over about the products.

.. Our products embed the Gans technology into the products. ..

(:20). I will explain one by one the products in the store. 9.99 to 19.99 Euros.

Ankle Gans Gel Pack. All the products are CE certified.

(:22). Gans Eye Mask. ...

Foot Gel Pack ..

Each of the products is 19.99 Euros each comes with a carry pouch ..

(:24). Head and tooth gel packs. Knee and elbow pack

(:26). face and eye masks . Migraine Ice pack. Multifunctional large and medium pack, this replaces the pads that we used sell. The T changed and this one is much more versatile.

(:28). Multipurpose pack 19.99. Knee pack. They can be heated or cooled according to the need. Shoulder and neck pack. Re-stick-able packs .. (:30). They stick to the body so you don't need straps. .. 20 new products added to the store.

.. the Universal Enhancement S Unit we need on the top. The USA Shop will close as of today. It will cease to exist. We closed the Paypal account on it. (:32). It means that all products will go through one store or to the KF Austria account. The whole process of returning the KF, restructuring, every product you see in AZ USA Shop will be transferred to the Austrian account. All under one shop. You still have access to all the products you wanted. ...

You'll still have the old Pain Pens etc.. will still be there. Now the product range has increased. The new T-shirts will be launched next week.

(:34). .. the delivery stays at 30 to 90 days, all the goods will be shipped in January in 15 days because the stock is kept. We have purposed a large volume and held it in stock ...

(:36). .. Around the world looking for new products and the sales team will be backed up once the Malta headquarters is set up ...

Are there any questions on this section before we go to the next one.

(:38). .. Ella has been working to 5 AM this morning. You have to understand that the KF staff has become very small but very effective and we'll build it back up to the way we want it. ..

We have given the distribution out of the KF hands into larger international companies. We'll take the best option and best possible way that we can ship. (:40). We have set up more or less the same structure as Amazon and Alibaba. We'll delivery goods into international warehouses and it's there taken over. All these holding and handling by KF is more or less will come to an end in a short time. This is why we have become very efficient and have managed to slash the delivery prices drastically. So sometimes you'll see the price of the delivery is the same as the product. The only reason is we managed to reduce the delivery costs from 30 to \$40 per piece is gone, it's finished, We have brought it back to around about 9 or 7 Euro .. This international organization set up has allowed us to work this way. Ella as the head of the KF has been working relentlessly with all the KF teams to bring these things in. Especially thanks to the Chinese team. The head of the KF in China, Gaun Lynn has also been working relentlessly to make sure everything is on the dot. Chow is traveling all over China making the guarantee of the products and new products ... KF has spread to special groups and teams. Now this way we control our initiative and the products are done by the teams we set up. We'll produce catalogs that you can go through very fast. (:42). As I said, when I come in, those who betrayed me will not exist. I am by tradition a trader, set out, and I told you when I come in there will be no one. Those who betrayed in Italy, there will be no job left. I'll go to 4.99 and I'll make sure the salesmen go door to door in Italy and around the world ?? Those distributors who thought could go faster, we'll take it one by one. Why should people pay 120 euro for the same patch they can buy for 9.99 or 19.99. We'll not supply any distributors unless they have made a new agreements with the KF. If you have signed a contract. These distributor contracts should not operate anymore because these agreements are with KF Austria and not KF Italy, it has died. They killed it, but it was good for us. It opened our eyes to a lot of things. these products now are in the hands of international distributors and international warehouses .. The minute the stock reaches a certain level you'll see, "on hold" (on web store). If the stock is not available it will not be sold. The pattern that it was kept and then trading people, but it's not there, and then 2 or 3 months waiting for you to get your goods, and then switching to another company is over. We'll make sure the new distributors of the KF stay the way they came and not the way it was set. The margins are very short but the reality is we will capture the market. (:44). We'll go a different way that I brought in 30 years of international clearing houses, manufacturing worldwide (experience). This is what I did for nearly 25 years when I left university to back the work and the research and unfortunately I left it to the people to do, and they thought they took, and now you have seen what we delivery. This has been my game for 25 years and you've seen it. I can go to 1.99 and I still can make a profit. I am a ruthless businessman when it comes to business those who betrayed me will beg for their life, bread on the table, because you betrayed the KF. We'll go internationally across Italy promoting the KF materials and ?? retail shops. I come from that background. I dealt in millions of items, not a few, and if they thought they went and told the others that, we'll turn the KF over, Keshe is stupid, now we see how stupid you played the game . I don't let any one betray the KF it's my responsibility as head of the KF, that the KF goes okay. Holding the stock and taking money in the name of the KF and then switching to another company. Match the prices and delivery. I told you that when I come back I'll come back heavy. The only thing is the suit of scientist is full time since 2002, the suit of international business and

stocking factories across the world, it goes back to 1981. This is what you didn't know. Return your BMWs back to the dealers you won't be able to pay your bills. (:46). Then we'll go internationally with it. ...

(:48).

.. I am a man with a business background with a huge ethics, when you put my name and didn't deliver the goods that the KF gets a bad name and you promoted yourself. The only way left is one way, close the shop, clear what you did, and how you betrayed the KF, then we go ahead. Now you see how that patch, 9.99 to 19.99 delivery price brought in where we can control and we're an international franchise, we subcontract and it's done. It's not our worries anymore. Try to touch the KF once more like this you will see. This is what you thought, he was a stupid businessman, no. I trusted the people who called themselves K Seekers. (:50). And now you see, more products, 50 to 60, everything you have on your websites, as those who betrayed me, I match, 10% to 15% of your price. Go and check who I am, I run one of the biggest distribution houses for 15 years across the world. This is what you didn't know, I supplied the biggest discount chains around the world as a supplier and they promoted as a discount to their shops then you know what I can buy. The game is over but at least it brings a dimension to the KF. Thank you very much Ella, Guan Lynn, Chou, the rest of the KF around the world, in Brazil who supported us, and Austria ... We'll come back to what we do best, this is showing the T works. We have received enough order for the UBESU that we still go back to half a million price as of January and are more or less our books are full for the first couple of months and then we'll have enough orders to cover for the next 12 months. In this way KF enters in a very big way the whole of the clinical trials in every aspect. We'll try to increase the clinical trials if we have received it to the cancer research then we'll let you know if and how we get it done, it takes a few months to get the structure set. (:52).

.. In my teachings in Farsi in the presence of the Iranian officials of the government background, there was one question that was asked directly which has caused a lot of concerns and what we call, different emotions in Iran. As you know I announced that I am "Meethi" or what you call, Messiah and I was asked directly by the presenters if I can explain more. We are all messiahs of our own soul, the Day of Judgment, the final day of whatever it is, is everyday in our conduct and our products, as long as we don't betray our own souls and physicality, then we don't betray the others of our ethos. That's how it is, the day of judgment. So we are messiah of our own. We were cheated up to now to say there was that day will come. Unfortunately the doing of the man doesn't create a code of judgments for God to bring all the men and one day and line them up and that will be it. The day of judgment for man will be the day, everyday and it's with the STM. Now that we have the knowledge, the answer to the religious Iranian leaders (:54). is very simple. I am the messiah as much as you are for your souls. The conduct of the leader have to be within the STM the correct way for himself and his nation, then the humanity. We are all "Methis" for our own soul and now that we know the position of the STM is and in parallel with the soul of the Creator, the answer is very simple. Go back to where we came from and understand the ethos of "zadosh", do good, think good, and act good. In that emotion, by doing it, you become the true man, and that lays the day of judgment every day because you judge your own acts of every act, the thought, the deed, and the action. You cannot betray yourself because that is where the biggest sin comes when you allow the others to abuse you, and if you accept it, then that is a betrayal. That is stealing from yourself by allowing the others to take. My answer to

the religious organizations, be it Moslems, Christians, or Jews or whatever is very simple. I am the Messiah, I am the Meethi, but of my soul. You are the Messiah and Meethi of your soul and if you can live as leaders or citizens with understanding this and that you don't allow people to steal from me and you, yourself don't steal or do wrong to the others, that is the day of judgment because you have already judged it, before you become judged. (:56). If we learn this and if we do what we do the best way we can, we have already reached the Day of Judgment. The fancy time of ?? Mahesh, the Day of Judgment and Confession, is finished. Then we understand how the condition and position of mankind will change. As you know we announced on the 19, 20, 21, 22nd we will return to Iran for demonstration of the space T. We'll develop it to the point that it is and we'll show what's developed up to that point, and then we carry on. It's not that everything will be there, that for you, to start something which you fancy. Sorry about that I still have a very bad cold. In that level we go back to one point, we invite world leaders and what we call KF K Seekers to Tehran. As you know Iranian tradition brings home hospitality. We request from the KF supporters in Iran not to put the KF K Seekers in hotels and hostels but invite them to your home. (:58). Let them feel the knowledge and love Iranians. We break the sanctions through love and care and sharing of the knowledge. We'll organize planes to fly to Tehran with K Seekers, one or two thousand, it doesn't matter. We open the door of knowledge in Iran, in our homes and in the Iranian tradition. Ambassadors and officials will be invited and I have already asked the Iranian officials to organize a one and half thousand auditorium and maybe more, for the K Seekers and world leaders who come to Tehran. We'll be traveling with a plane with the K Seekers, we go back to Iran to being a revolution of knowledge, the same way as Ayatollah Khomeini did from Paris. (1:00). Knowledge Seekers and the KF management team. We land in Iran to bring the revolution of knowledge, not political change. We land in Iran to break sanctions as One Nation. From the first of February we'll organize this, that those of you who are K Seekers, we meet in Tehran. There are no hotel costs or charges the Iranian K Seekers will be your home. All you need is a plane ticket and a visa from the Iranian embassy to say you are going for the conference of the space T. It is the responsibility of the Iranian government to make sure this conference takes place, and to show the beauty of the Iranian T and science. We are not afraid of showing our T, we are proud to show how advanced we are. Knowledge Seekers and Iranian KS who developed and worked in different aspects will be given the platform to show their T. (1:02). The Tehran conference is the point of change for humanity, where we share the love, care, the knowledge. Let them sanction themselves. It's the responsibility of the Iranian KF to organize this that it goes smoothly in conjunction with officials. We are coming to Iran to bring a revolution in science and humanity and we leave the governance of the nation with those who they trusted. Iran will become the center of the new knowledge, as head of the KF that's my job. We invite the American scientists to this conference as much as everybody else, we welcome. The flag of Iran as well as every other nation will be next to each other, as equal shares of knowledge and T. Then we build the new space center and the new structure. Until that time we'll extend the T as much as we can and in Tehran we'll show the T as we can. The Iranian scientists will work with all of us to bring the change and the rest (1:04). and the rest is in the hands of what we call, all the KS in Iran and who handle the affairs of the Iranian KF to organize this to go smoothly. We have to make that step to bring the change, that we run this planet through knowledge and peace and sharing each others love. We ask the Iranian KF KS to take the KS to show them the love and how life is, not in hotels. The change and the beginning of the change for all of us has to take shape and it has to take shape by those who care and know. In

understanding this we'll try to speed up the teaching and in collaboration with the Iranians that in the Tehran conference we'll see new dimensions in everything else. Those of you who are responsible for the Iranian teachings and the rest to make sure all the farmers who are using the T, and all the universities which have used, and the Iranian space T which has developed by the Iranian government on the back of new technologies will be what we call the center piece. (1:06). We don't hide the T, that we show it if they attack us, we show the T that there is no need even to think to attack. We show the beauty of the T that it is power, that it forces nations who have been war mongering, will be ashamed to do. The KF with the Iranian KF support team will change the course and this is our job. These war mongers have had enough chance. Now it's time for peace. As I said there will be no war but we have to show what is the new way. In our conference in Mexico we'll sow more technologies. In our conference in Malta mainly we are there to set up the center for the KF worldwide. In Kenya we'll do the same and in Tehran we'll complete it as one unit. All the KS across the world we invite you to Tehran. In that process we need to understand, we'll show you what has been made to be false sanctions will be the sanctions on those nations who created the sanctions to enforce war. I will ask the Iranian government to facilitate for the KF KS to be given a special visa. Freedom to see Tehran and freedom to see Iran, (1:08). and at the same time, as I said to the Chinese when we were discussing about the space T with the Americans, and they said no. We said, but they are the KF KS and are American and they said, yes that is acceptable. We'll go the same way. We bury the flags and we make one flag which is planet earth, One Nation. Those of you who are believers of the path of Christ and you were waiting for a Christmas present next Wednesday on a Christmas Day, you have received your present, the promise of peace. It's a gift that no one could offer up to now, there is no more war, as we said, as we promised now we have to show the alternative for peace in a very rapid way, otherwise, as you know the men of Adam get bored and cause themselves many sins by eating the apple of the wrong kind. We have to take charge to sow the way the peace will come and what are the peace dividends. What rules and laws do we have to operate under for the new T. We don't engage in claiming and working for peace, (1:10). we create the conditions for peace with the new science and T, with the collaboration with the scientists irrespective of color, race, or religion, or position on this planet. We take charge with the distribution of this new knowledge and T and showing how this new T can change all our lives. The Iranian leadership has cancer, ?? leadership has Parkinson's, Chinese leadership suffers extensively from Parkinson's, German leadership shakes publicly with the Parkinson's, all leaders and their families all suffer from diseases, in which the new T can give them the pleasure of peace of mind and body. It will be interesting to see if we can get the German leader in Tehran to walk in the machine and come out without the shake during the conference. It will be nice to see the Turkish leader with his cancer to walk out without it. It would be nice to see if other world leaders and their families find peace through the knowledge that it brings peace to the nation. (1:12). It will be good to see the British Royal Family with all their diseases become normal human beings through the use of the T. The peace conference KF Tehran is a knowledge peace conference where the knowledge will be shared and displayed, but the prerequisite is world peace and delivery of the world peace. If the Iranian government officials try to block, I will play the game of Messiah. Then we understand who carries the true claim. We'll open the borders as I said in the talk before, we opened the Iranian nuclear transparency and it gave us peace. This time we open the transparency of the knowledge with the ethos of the KF and we'll achieve world peace through the knowledge in sharing the pieces of knowledge. The launch of the UBESU was for creating a peaceful condition, not for

others to have a better life to live longer to rob and steal and abuse longer. We can gather as much wealth but the wealth of the health is something no one has mastered. (1:14). Now through what we call the enhancement of the STM, through the body, through the T, we change the position. Registration for the Tehran conference will open the first week in January. Names will be given to the KF Tehran to facilitate who will stay where and who wants to show the hospitality of the Iranians to the rest. We'll come from all nations, races, colors and background and it is the responsibility of the Iranian KF supporters to make sure that no one stays in any hotel, but in the hotel of life and the love of Iranians for the people of the world. We take charge for the peace because we are the only ones who can deliver it through the knowledge and T and as One Nation. The responsibility of seeing this takes place falls on the responsibility of the shoulders of the U Council. To make sure the peace conference in Tehran, the peace of knowledge and stability is your responsibility. It means the U Council has to make sure that everything goes smoothly that the knowledge becomes the background of universal peace. We have entered a new phase and when you establish peace you have to deliver it and protect it, (1:16). and see facilities that everything is more or less can be done and is the responsibility of the KF K Seekers to see the finances of the war, which have been used, is correctly transferred to be used for peace. We have to show that the finances that were used for defense or whatever, now has no room. We need to get the signature of, No War, at the United Nations or at the meeting of the KF leaders and ambassadors in Tehran. We to get commitment that no nation enters war. You have 4 months to work. Today is the 19th of December, January, February, March, April. But we have to give something to make sure that man doesn't have and will not go into war and that will come from delivery of new technologies in the coming weeks and months. It doesn't mean that when we get to that point everything will change. When we get to that point it will be the beginning of the change. How we can show them to increase the harvest, to give the clean water, clean environment, how the KF KS can show all the beauty of what they have created and what they can create (1:18). The Tehran conference is set for the world leaders to sign themselves into a No War condition. It's not a peace treaty, it's a No War treaty. We commit our nations and ourselves to no war and to peace and the expenditure that has been going on the war to go on the peace through application and development of the cultures, the nations and in the direction of world peace and opening of the U Community to humanity. We need commitment and it's the job of the U Council in the coming days to draft up a no war commitment by world leaders and their governments. World peace and no war, man has signed himself to taking no actions that will lead to war. Then man will come to be at peace. We need to understand this with the new T as we've seen today. We don't need to fight we just have to find a solution, that those who steal if they want to fight have no room to exist. The Tehran conference will be the beginning of the steps to what we call governing. The Tehran conference for peace even if they ban me from entering will go on. (1:20). It is the responsibility of the KF Iran and the U Council members and the Earth Council responsible for Iran to start the line of understanding on how to set up this conference for mankind to sign himself to no war. I am sure the Iranian leadership will be one of the first ones to sign itself to it. The No War treaty has to become the cornerstone that through it we achieve peace. Nations signing themselves that they will not develop any war weapons, nor buy anything which can lead to or cause or give an incite to war. The no war treaty has to come from the U Council in conjunction with E Council. You have 30 days to draw up the draft, and to deliver it to every leader and newspaper and making what I call, the end of the UN. We don't need a UN when we are One Nation as we are united. (1:22). In a meeting yesterday in Beijing one of the scientists has asked if we

can show the fields that we can detect. We will show a field that not only brings the change, but we can detect. The roadmap for peace is set, now the roadmap for no war has to be sent. Nations committing themselves to no war and to not make tools which can lead to creation of war. We are not talking about disarmament, we are talking about not making arms to be disarmed. Any questions. (1:24). Q; ... Is there a new method or alternate methods to pay for products other than the wire transfer which many people find awkward to use? Now the KF has a Paypal, you can pay through the Paypal in the Austrian system and we closed the Paypal in the US accounts as now it feeds back into the account of Global. The Global has no operation with the KF retail groups. If you try to find a way to support the work ?? we'll find a way to ?? New ways of delivery will come in. In china we'll use the "We Chat". In other operations we'll look for credit card facilities and ?? coming weeks will be set up through our operations. All these need setting up and this is all part of the KF Austria, which will become the headquarters of the KF worldwide. It has become and in that process we'll try to expand it gradually and at the same time it's spread around the world, it's just monitored and operated through Austria. Any other question. (1:26). Q: What about the weapons manufacturers, the purveyors of death and destruction, will they be required to sign? What? ... I think we'll come, you have to understand, look at the other side of it. When the nations sign themselves to a No War Treaty, do we need the manufacturers to sign as they'll have no customers. They are signed into it by it. You have to realize that the majority of the wars, the conflicts around the world especially Africa, now where it sits comes through the financing through Vatican, and Saudi Arabia. All these radical groups was to understand, they all want, they will go and disappear. All these people who will claim to be the leader of different factions and attacking the Christians or Moslems or the Jews or doing the others will come to an end, because the governments will sign the No War Treaty, will force them not to supply them anymore. Our biggest problem sits with the Rothschild's family and the Vatican. (1:28). The Rothschild's family finances war and that's what they have done for centuries because they see it as domination and control and different factions of it breaks up into different governments. We see the regular administration is run by one cousin and the other cousin tries to better up and all sorts of games. This has to stop. One of our biggest problems is with the Rothschild's family at the moment. The Rothschild's group has financed wars through Vatican, they put the money in and Vatican uses the name of the soul to create wars. As we have taken the decision to elevate the soul of the world leaders and the Rothschild's family, it's for their soul to reach a point that they understand the time for change has come. Let's see if the Rothschild's group attends Tehran conference and signs their family into peace and not financing anymore arms. It's the responsibility of the KF Italy to deliver the No War Treaty to Vatican. At the same time to Ayatollah Khomeini of Iran. The same to the Saudi family which is responsible. The same to the two Rabbi's running of what we call Jewish state. (1:30). The same with the temples, Buddhists and the rest. The No War Treaty, not entering war because the cornerstone of them not financing the war. The biggest war from now on will be with the STM with his own, not with another man. The No War treaty has to be given to every world leader and the member of the U Council can sign on their behalf, if ?? The wish of the UC will be obeyed. Those who asked the question in Tehran on Monday if I am the Messiah, if I am the Meethi, I think we have answered you back in a very clear way. Any other question. (1:32). Q: What is the role of neutral in a plasma device be it MaGrav or teleportation? R- I am not sure if he meant Neutral or neutron ? ... What the other question. Q: Nikolai, If KS have already sent their payments to KF USA .. ? Everything is okay, it's all in the same house in different ways. But the KF USA has to inform us what they have received. That account closes as

of today. The link to it will be taken off so everything goes through KF Austria. ... A lot of KS still pay through the old account through Holland. So no problem. All the KS have to go to Holland and not to Austria, it's all the same. It's all one family, it all gets used for the betterment of the KF work. (1:34). As you see many people who used to around the KF and were on the payroll are gone. We restructured the KF in a way that we work through project or case by case management. This is a decision taken by the head of the KF and she doesn't want to run it the way I used to do where we paid for people to be around. She is working on a vision basis that we pay as we need and when we need and we pay the best value we can get for our money for the KF. I used to work on the trust of the KF and unfortunately, Giuseppe (Italy) took all of it and behind it, Ben (Ghana), so from now on as Ella works on the direct way of running the KF, that decision is there. Everything goes on the project basis and we won't see long term people around the KF. We project it out, that will be the way if will be. In that process a lot of things will change and a lot of ways of the KF will become more efficient. Nothing in the KF gets lost, it just gets consumed and used for another purpose, project, target or what we call, advancement of the KF. I stopped financing the KF because now it has to stand on its own and it's standing good. It will expand in new products and new systems. (1:36). It will develop more and more. New projects and new life have to come from ever development. As we announced, KFSSI if you signed and you paid your fee, you'll find out that out of nowhere you become a post-graduate student. We have asked the KS and KFSSI to line up projects that they want to participate in the next semester. We have gone from teaching to research and development, which means you to research and not just come here to learn Gans's, but what you want to develop and find the like minded people in the KF to develop that project. What I wanted to do today as part of the teachings is to ask the KS what topics would you like to research in the coming KFSSI new year. Each platform will have people to work together. We won't allow any one person to take charge of the research, that they can hijack. It has to be collective sharing and developing. Either way your work will be published or you'll have to publish it or bring on to the discussion table every end of term. The panel is open for you to suggest what you want to research. (1:38). New systems of space, agriculture, .. and how you can research it and then make a dossier of it and tell how you can develop it with a team that you put up (gather) to be with. R- In the K Plasma reactor group we created a project list for 2020 and we've got about a dozen potential projects Would you like to share it with us. Because we don't see, so you can put it on the screen so people can it and it stays recorded. These are some of the suggestions, You decide what you want to research

(1:40). R- reads Project List for 2020.

#1 - Understanding and replicating the first plasmatic Nano-coating interaction, the Coke bottle. ...

#2 - Making the self-charging flashlight. Has there been a group that has seriously looked at that to replicate...

K- Where is the first flashlight that charges itself. .. It was one of the first things I was to show in the demonstrations. ...

(1:42). There used to be a lot of discussion about the Coke bottle ...

If you need on these teams something to be done, we'll try to set up a structure that they provide you facilities. Or these groups in KFSSI can meet together once or twice a year to see the results ...

#3 is create matter from fields. .To actually create an iron plate from field interactions.

(1:44). This is part of the transmutation from fields into matter T, creating just a simple

matter from the fields .. K- There is a Brazilian group or people in a Brazilian Chat claim that they are part of the KF and they know the secrets of how to make materials from energy or something like that. Maybe they are a very good candidate if you can find these people. They said they are part of the original KF ?? in the Brazilian Chat. ... There is something very funny. Red Circle ?? somewhere claimed that he is financing and working with the KF research. I would like to see that finance which matches the claim. We have never done any research with Red Circle and he never financed any research. It would be nice to see people who would like to finance these researches themselves ..?? okay I finance this project ?? like other commercial groups too. (1:46).

...

R- There is more.

#4 - Understanding magnets, can we change the magnetic field within a magnet? K- Yes, good one. R- even with basic magnets ...

(1:48).

.. can we use the knowledge of the Gans to change the magnet. Changing of the magnet through Gans or the plasma, not with current, we already know that. In Tagomax they use part of this T to accelerate ... R- I heard a discussion of David Adair he talked about .. he said it should be a figure 8 like an infinity symbol. Like in your drawings. He is very much into rocket T.. recently invited to Iran to progress with this T, (1:50). and to help with their infrastructures. ...

(1:52).

... K- One of the biggest problem is that Iran has to take the leadership in the new space T. R- I think this is exactly what is going to happen. (1:54). This is what I suggested to the Iranians a long time ago. We have the knowledge and the scientists, we have to take the lead. They took the lead of the wars and we have to take the lead of the science. This has been my suggestion to the Iranian leadership for a long time. One of the worst thing that ever happened is the way the system works that you are guilty because we said so, as we saw in my case with the Belgium's. ..

.. The situation before Huawei, the daughter of the Huawei was in Canada. If you go on the news a few days before that the top Chinese scientist who was awarded in Europe a few weeks before, (1:56). again, he was drugged the same way as me, and was thrown out of the window and was killed in US. Americans and the Canadians and some of the European nations have taken that step to openly kill scientists. It's the job of the Iranian government to give sanctuary to world scientists and through the knowledge to create peace, this is what I have advocated with the Iranian government for the past few weeks. Become the hope but do not use the T as a defense, use it as peace that we share it with everybody else. This is the position we have to change, the freedom of the scientists to travel, of scientists to come and go out of Iran, for T to credited to them as they developed (it). This is what is needed as a new leadership. This is what I said to officials, I take that position to bring scientists to Iran. And openly release the T, the development, the way we are doing it in the KFSSI. By creating fear they have created war. By creating trust and showing the T we create peace. We create that this machine, what it does, is not for the war. (1:58). These steps to take scientists to Iran is something we have been asking for years from the Iranian government. But when we go in the knowledge has to be open and not kept secret. As you know Iran has advanced heavily in the past 30 years, be it in nuclear, in Nano or in any other aspects. Ask

yourself a single question, why. Many governments have changed. We saw Ayatollah ?? his idiotic behavior, we saw Ayatollah Rohani, we see the other Ayatollah's who ordered, who became one by one Iranian leaders. But they are just the front of it, the progress in the knowledge and T of Iran is in the hands of one man. He's extremely knowledgeable and extremely advanced in science and T. His Excellency Ayatollah ?? . The Iranian leadership sits with Ayatollah ?? and the T advancement of Iran, of nuclear processing ... comes from the insights of a man who puts science first for Iran. And it's AK who has done this, nobody else, governments have come and gone, but the pattern of development, of T sits with one man. The way he has supported scientific groups in Iran we'll see many more advancements. (2:00). My suggestion to the office of AK has been very simple that to allow the world scientists, make Iran the center of knowledge and we see it start. By creating fear and sanctions they want to stop this. With the Tehran conference in April we break this. It's the beginning of setting up the space T through new T that it brings other scientists to do it. The sits only from the inside and the openness and understanding the effect of the new T on the life of the citizens through the office of A K. He is one of the most intelligent world leaders, we know of no other time ?? He has used the assets of the nation to bring the nation to a very high level through the team that works with him. The special groups within the structure of his office has the responsibility to bring the world scientists to Iran. It's not just putting sanctions on different Ayatollahs or whatever, you have to see how the background leadership sits, we have seen many presidents change but the development of the science and T in Iran is amazingly a meteorite going up. (2:02) The Ayatollah K of Iran is Russian back educated inside. This has given an intelligence of the understanding of the totality of the knowledge. Through knowledge and T you gain power and not through arms. This is what most people outside and even inside Iran don't understand. It's not a random buying and making something. The AK has set up a structure that fishes out the intelligence, the most unique scientists out of Iran and nourishes them in a hidden way, then the technologies come up. It's the responsibility of the Iranian government now to extend that to the world scientists and they have started doing it. Iran in 1978 - 79 had 90% oil dependency for its income. Today through the wisdom of the leadership it's 30 to 35%. Iran is one of the biggest exporters of T around the world. This is why the sanctions don't work, because Trump lives in 1970s that they thought with the sanctions on oil can paralyze Iran. Iran lives in the 21st century where income comes from knowledge and T by chemicals and everything else. My advice has always been to the people who speak to the Iranian (2:04). central office to show the beauty of the T, not out of fear when we have to, but in advance that it doesn't allow them to take hand. The April conference is to show the beauty of the knowledge worldwide in Tehran then world leadership in science and T will come. This is what is important. Today's KSW is important and opening a lot of things and you understand what we are talking about. People have to understand the true nature of Iran. It has and it will become the center of knowledge. AK has taken that lead when he took the seat of leadership. Nobody understood. If you look during his leadership we have seen all the latest T. The Americans ran from the Straits of Hormuz of the Iranian T. It is not by coincidence and it has been developing one after the other. It has to be this way. The counter balance for war and war mongering sitting in Europe and America, is the peaceful nation of Iran through the new technologies, to releasing and becoming a home of science. Iran used to be this way until in 1972 the peanut man decided. We'll see that many scientists will be attracted to Iran. (2:06). Iranian scientists will have to compromise as much as the world scientists to bring back a counter balance, a sanctions on the nations that create war, with sanctions on the development of new T which can

bring peace. The teachings of the K Seekers has been and we have seen for months, is not anymore on making systems because I knew, I planned this change in K Seekers. The KFSSI becomes a home for new technologies what you want to do, but the home of the new science, the new space T will be Iran. We invite the world scientists to come in. You know the top scientist in plasma invite them to the Tehran conference. If they accept, let me know, I will organize it with the Iranian government that all accommodations will be met that they'll be there. When we go to Tehran we'll announce positions that Iranian KF scientists, K Seekers will all go in full plane loads to Tehran. It's the responsibility of ?? and other nations to make sure the safe passage of the KF KS and world scientists to Tehran. How many peace and environmental (2:08) conferences, even the last one in Spain has faced failure, because they have not agreed to not make war nor go in conflict. When you agree not to go in conflict you already have found a solution for peace. We start with a No War Agreement. If you want to defend a land in the name of a nation, defend it, but you cannot go to war for it. We commit nations to peace because they have no wars to make. The same thing goes for the Chinese leadership. President Xi has to change the position from increasing the difference to increasing the knowledge for space, for T that we don't need to make war. In China there is a huge problem. The Chinese leadership cannot see the true developments in science because the leadership is surrounded by a bunch of scientists who protect their own interests and not the national or international interests and they are blocking the leadership to see new technologies which can be used for not creating war, but creating new conditions for peace. They are blocking anything from reaching CCP. All the heads of universities are there to block new technologies (2:10). that they keep their position. All the professors and military leaders who are in scientific development work in China in one way, not to show their stupidity ?? ?? but preventing the leadership from seeing what changes ?? brings. In Iran this is solved, the leadership of AK controls the new T around the world to bring in and they started doing it. This has to ?? ?? Putin has changed the position he takes a lot of new T into Russia in conjunction with the Iranians. R- Iran is currently ranked #4 in the world in Nano T articles right behind USA, China, and India. K- USA is stolen T. ... The American Nano T most of it comes from stealing and killing scientists, we know that. If you cipher out the Nano T in the US it's all stolen papers, knowledge and T. The US has hardly any, very little. If you do the correct ?? the US should be around about 25 to 30. The US steals T and accuses others not to see. (2;12). We see it with the Huawei. One of the reasons they attacked Huawei is because they are too advanced in G5 and G6. they kidnapped a woman (daughter of Huawei), throw their scientists out of the window to stop so that they can catch up, which is opposite to what Iran is doing. It's bringing in to go more advanced not to catch up for the others to catch up with them. If you see the nuclear sanctions, the only reason the Iranian ?? ?? five plus one is being enforced is because, put it this way, it takes one American centrifuge to produce 1 kg, and 1 Megawatt, whereas the same thing in Iran produces 6 times more. This is the sanction to slow Iran down from advancement, but it hasn't worked. Iran advanced more now that the nuclear problem, what you call development for Iran is solved. All the finances now has gone to space and other technologies. We achieve what we,, as I said ?? in the FivePlusOne Iran gave nothing, and in a way Trump is correct, Iran took everything and didn't give anything for it. Why should we, we are in charge. We carry the knowledge, it is ours, why should we give it away. We can perpetual limit that it is safe for us and we can do, we are producing the isotopes which we are selling worldwide, we still are developing a new kind of plasma nuclear T, (2:14) we can sell it and export it. We gave nothing. Which was alright. The next step in the T has to be the same. Homegrown new

T in collaboration and conjunction with the world scientists. Tehran will become the center of knowledge and peace. And the seed for it, as we said, by the present Iranian leadership of AK, people don't understand the influence of AK in the Iranian scientific world. Iran is the only nation that every year celebrates and invites its top scientists to a conference in Tehran. Elite Iranian scientists coming from universities or wherever are invited and meet with them personally, every year. No nation does this. This is part of his work to encourage new T. This is why the daily running is left in the hands of the president. What we see, the chemical developments and the rest of it and everything else, comes because Iran has the security of the knowledge and we have seen it. The Americans bombed their way from what they learned in the Second World War, high level bombing for the past 70 years, One by one. We've seen it in Europe, they did the same thing in Germany they bombed it from high. They did the same in Viet Nam. (2:16). They haven't learned, when you are incompetent then you throw stones. When you are competent you sit and talk logic and find peace. Americans find their way by high level bombing. Have you seen them over Iran, because they can go high, but we go higher than they do. They tried every trick in the book. It comes out of the knowledge and scientific T which is homegrown and developed by the Iranian scientists.

SAUDI OIL REFINERY BOMBING:

As you know very recently they claimed that the Iranians bombed the Saudi petroleum refinery. But did anybody say why did the Americans push so much. Go back to my teachings. They claimed the Iranians bombed it. They used every trick, they our armies at the disposal of the Saudis to do what they like with Iran. You heard what the American senator said, she said, excuse me, I am a military, we gave our commitment to the American nation not to be given to others. American military is not for prostitution. Why they couldn't do it. What happened in the case of the refinery? Has anybody asked or looked into it? Very strange. The rockets have American numbers on the side, they had American details on them. Do you remember what I said before, when a friend gives you a gift you don't need you send it back to him because he might have another use for it. When the rockets were launched towards Iran for the nuclear centers of Tehran, we have the T, we just diverted it and sent it back. (2:18). We had no control over it. Do you remember the old song, return to the sender, there is no such address. Did the Americans come out and say what the Iranians have done to them. They blamed the Iranians for their own rocket which the Iranians returned back. I told you this 2 years ago and I said to the Israelis, all these claims saying that it has come from Iran and it has been shot or launched by Iran, to the (Saudi oil) refinery. It came from Iran but it was a gift sent by the Americans which we didn't need. We have enough knowledge, it was sent back. But the Americans couldn't capture it. Is the world aware of the truth. Return to the sender, and this has put fright into the backside of the American leadership. The Saudis won't open and show. If it is Iranian then show the label on the side. It has American codes on it. We don't need the gift of a bomb we sent it back to you. If you have the technologies to launch it, then you also have the technologies to capture it. It's very much like a game of cricket, you throw a ball and you hope it hits the bar, but if you got a good batsman and you throw it back, it's the bowler who has to catch it that he doesn't loose 6 marks, doesn't it. (2:20). If it hits the boundary he's done. When the Americans launched these rockets to hit Iran, Iran had the technology, all we did is switched over. The Americans don't have the technologies to capture what they throw and then they blame others for it. If the Saudis come up. Why do you think the Americans suddenly opened (gave new weapons), we give everything to the Saudis

because they knew they couldn't capture the ball they threw. Now they blame the audience that they should have jumped in the circle and captured it for us and we get the marks for it. Advancement in the technology has given us a condition of peace. This is why we take the world central leadership to the U Council to Malta and not anymore to New York and the UN. The slaughterhouses of UN will shut very soon. The same with the World Bank and the IMF. The strength in the knowledge has to become the strength in the peace, not the weakness and the lack of understanding. I have said directly, show us the numbers on the side of these rockets they claimed hit the oil refinery. You'll find American codes on them. They tried to cover their face for shame of losing the game. We have to bring the peace through knowledge and what we call, no war policy. (2:22). As I said, we have to close 3 or 4 loops and it will be done very soon, it is my wish and it will be done. We try to control most of the Swiss accounts and lock some other accounts, and Monaco accounts. Now we have to stop the hidden money, finances, stolen money from nations and governments who supplied these kind of things into United Arab Emirates. It has become a sanctuary for stolen goods, funds and paramilitaries. This is one of the last loopholes. We closed the Bahamas and everything else, at least we tried to make it as ?? possible ?? The UAE has to open the books that anybody who goes in, where does he belong to and why. In that process it allows a lot of things to clarify and be clear what is happening in Iran, and how they are trying to play games with Iran. When I was there a couple of weeks, they said something very interesting, the Emirates expatriates to Dubai is 7 to 2, it means every 7 expats that leave 2 comes in. Dubai has gone on the decline. You could buy property for a million, now you can pick it up for about 300,000, because it has been 3 years since I left. I took everything out of Dubai. (2:24). Because it's unjust and the same thing has to be understood that new technologies have to take place in the world government. Do you remember that song that says, imagine by John Lennon, now imagine all these funding for rockets and everything else and killing is transferred for knowledge to capture the space, to open space frontiers, to open communication line with the U Community. Can you imagine what a wonderful world it will be. This is what's going to come out of Tehran conference. We will not show the AK Iranian leadership as those who are war mongers, we'll show them as those who set the cornerstones for peace for developing new T. This is why a lot has been hidden in public and why the sanctions are not so effective. With oil they took one third of the Iranian finance not the others. They tried to bring more sanctions against chemicals and every other sanction but now we are cheap and effective that now Iran's GDP export, it doesn't matter oil is just part of it. Most of the Iranian oil export comes back for the Iranians (2:26). cars and refining. We hope in the coming time to use the Iranian education centers and universities and T for world teaching. We'll talk about it in the coming time. If you want to go to the center of excellence for space T see you in a few months or years time, you can find a place in Tehran university. Do you know internationally what they say MIT stands for? Master in theft of technologies, not MIT scientists and the work that comes out of it, originated there, it was stolen T. They sit on all the boards and see what comes out, then it becomes from MIT and they try for the patents. This is what happened to KF with Ebola. They stole the T in the office of the president, 3 months later MIT, the same person who was in the conference, has published a paper as an American intelligent new T for Ebola. Find the scientist who published the paper and check his passport, it says Sierra Leone, 3 months before, as part of the world health authorization. Master in Theft, not MIT. (2:28). Carry on reading please.

#5 Simple Nano coated Cu scrubber as a water purifier. K- We did that, Armand and the KF KS we sent this with Ukoko to Japan. Is Armand there?

(2:30). K_ you need to add a little bit to this one, it's not just Cu there are those made of composites....

(2:32). Armand speaks a little. If you mix them with others you get a better result.
.. Can we put these on KFSSI so people can choose which topic they want. .

(2:34).

.. #6 Create gold from Tritium Gans. K- Please contact the Japanese embassy they'll give it to you. It's already been given. R- You've talked about that before ...

If you like to start testing it.

#7 MaGrav windings adjusted ..

(2:36). In a meeting in Beijing we gave some materials to test...

(2:38). ..

(2:40).

(2:42).

#9 is exercises for emotion and breath. (2:44). It all ties into a need for going to space and control of our own spaceship our body and emotions. ...

K- I have to leave in the next 7 minutes. So we'll come back to this in the next Thursday teaching for people to start choosing what they would like to do. Would you like to read the rest.

(2:46).

(2:48). Emotional dialysis machine. I thought that was a nice phrase. I think the emotional dialysis machine will come through the Enhancement Unit (EU). What I would like to invite a lot of KS to design projects around the EU. What do you want to see and what is the result when you change things. You can launch research on different application and position or whatever and in AZ we are placing 10 units and 6 of these are for medical application, the other 4 are part of the space research in which are inviting the American and Iranian scientists to join us. We would like to see what happens if you change some parameters. If you come up a set up and you want to see what is the effect on the emotions, production, 4 of these units are specifically for research, production of materials and all sorts of things like this. You can go to AZ for 3 or 4 months to test. R- We had a little brain storm before today when you mentioned some sounds that could be played when you get into the EU. That was offline. One of our Iranian scientist is a musician and I asked him to look into it. .. Use the T we have

...

(2:50). If you look all the 12 here are practical purposes. ...

K- KS in the U Council will do. and what ideas they come with on the spiritual and soul level and want to research and see or do theoretical research. R- we need more input.

K- yeah, different topics. **We might have some news for you very soon regarding other aspects of the KF Global operations,** (2:52). and facilitating these things. Is there anything else. I have to travel.

(2:54). Thank you very much. R- One comment, man says he used this T with the African Swine Flu and it worked. Yes we know.

Thank you

Video

END.
