

309th Knowledge Seekers Workshop - Thursday, January 2, 2020

(** How matter is created from the fields in detail at 1:00 hours;

Update on KF progress, UBESU will go to 500K Euros, Headquarters in Malta soon, KF Store now has devices for testing and feeling the Gans, We want to move Knowledge Seekers to take the next step by testing the Gans to understand the fields, KS are to come up with new ideas to research and develop also using the new Enhancement Units for testing new ideas, Talks about upcoming Tehran conference, Stephen Hawkins blocked any new ideas in physics and cosmology then he copied the KF knowledge, The soul in the physicality is like the sun in the solar system, Single planets existing between galaxies on their own, The next generation of the EU will be totally different and come from your research, Exposes the fallacies of the science world, ** Explains how matter is NOT created from the cooling down of the universe but by 2 MG fields from opposite directions interacting and thus creating gravity which lead to the creation of the universe, If you start playing with the cores you will see this and start creating matter, Anticlockwise motion of our universe shows we are in the northern hemisphere of the Unicose, Our twin planet on the other side of the Unicose, The fallacy of the iron core of the earth, By law of centrifuge and a plasma in a vacuum the heavy materials go to the outside, The same process occurs with the soul and the body, If you create the condition of the gravity of the earth in respect to your core you will see physicality manifestation, How we see the light of the soul, The 7 levels of the soul and jumping to highest, The Creator is in us and we in the Creator, How we see with the soul and not the eye, The difference between nymphomania and schizophrenia, Multiple souls in one body or "Beautiful People," Virgin birth comes from the interaction of the STM and the STP, Why schizophrenics kill their parents, Taking out the Hollow Center in the reactor and reactors around the central reactor, Human's ripple effect the Universal Community, When you steal from your soul you have to put it right, Analogy of chessboard with the soul moving the physicality, Trouble with schizophrenic when one soul does something wrong the others pay for it, Pray for the soul of your system, What happens after we die, Every soul has a destiny and death is the freedom of the soul and it continues according to its strength, When things go wrong it's because something has to be put right it is the soul that decides, The conversion of voltage to current and back again is the cornerstone of knowledge of the universe and the creation of the soul but mankind is not yet ready, Feeling the fields of the reactors and creating motion and emotion together in the field transaction (next step for KS), The whole purpose of the teachings is to discover the fields that come from the reactors and not the reactors themselves and how the fields interaction with our soul to create what we want)

(:06). .. Happy New Year to many of you who celebrate this path of belief and hopefully 2020 will be a very lucky year for many of us and we'll be able establish new grounds and breakthroughs in many aspects of the science and T. We wish and hope to be frontier and we'll be part of it to bring new dimensions and understand of the new aspects of the T. We are all hard working in launching new things in the path of the new T. As you have noticed the EU has gone to the value of 500,000 Euros. We have fulfilled what we were expecting in the promotion for the K Seekers to be able to be part of it. Many have taken the opportunity to join in and some the steps to setup a series of new centers, which will be announced once the agreements have been made and the systems have been purchased. In some cases the KF has become partner in these

joint ventures as part of being the initiators of the T. In the past few weeks we have promoted, (:08). this T in the way of understanding by many governments and on the 17th and 18th we are in Malta. We expect a very small meeting where we'll mainly concentrate on working with officials as Malta is the key point for the KF as the headquarters of the KF coming up in the near future. As we move to Malta we need to establish ?? to be there with the locals, government, and officials and this has taken place. Hopefully by 2020, if we are lucky and everything takes shape Malta will be where you'll see the Headquarters and then it's the beginning of the work for the U Council and Earth Council and we'll see how we can take the knowledge to the next level. The place we have chosen is extremely beautiful and now we have to setup the negotiations and setting up of the rest of it. As this is important for the KF, the U Council will take a position of the United nations in shareholding of the KF, and the E Council will be the other 50% voting shares. Where the KF will manage by itself, but the 2 organizations ?? will share ?? voting. We are in Mexico in February in interaction with the government in Mexico and then we'll pay a visit back into Brazil, (:10). ... where we'll find a lot of things we started earlier on. Hopefully in our return we'll be in Kenya where we'll interact with the government on a higher level, then we'll go for Tehran in the April meetings. There is a lot of interest in the meeting in Tehran, many KF KS have asked if they can come. You can all come, but only thing is to go on the website and register, it doesn't matter who you are, you have to register for this meeting. The KF in Iran is taking steps to organize we have 4 months to do. We have asked the Iranian KF to invite the Iranian leadership, his eminence Ayatollah K and Iranian officials to the meetings as we unravel new T and new understandings. It is part of our work to engage governments in our work and engage officials in understanding the T and in that process we are moving forward in different aspects of the T slowly. In the next few weeks you'll see another systems for agriculture that will be environmentally introduced as a unit which will be, provided by the KF. (:12). We have decided to move you KS to the step, something that you thought was for different people or things, and do things with it. We have brought in a dynamic system with a full system that any of you can start testing your Gans's, ?? single ?/ water and the rest has been going on for some time. Some of them medical doctors through different ways to Chuan Lynn were getting access to the dynamic systems, which we do tests with, ... Originally KF provided the cores, from today we will supply. Chuan Lynn has joined the KF in providing all the systems, which means all of you can buy the motors and cores and test your different new T. This is what we are trying to do, encourage you to move to the next level, not just drinking Gans water, ?? then the field of the Gans's. These are all for sale and will be delivered around about 20th of March, we have ordered a substantial amounts that we can meet the demands. This will go on sale from today. ... From now on all the products which could be bought by people ... now you can do the testing of the dynamic systems yourself. (:14). Then instead playing with Gans's in different ways, now you can feel the fields of them and understand to see the motions of them. This is important for many KS for us to move you to the next step, out of the Gans making into seeing the fields of the Gans that gradually many of you will start mastering the T. We'll try to introduce the next step on the Pl T in the coming weeks. There are a lot of hidden T which you have never seen but followed it up. ... We would like you to start understanding the fields. Because through these fields we can do a lot of things through understand materials, our emotions and the rest. The whole structure as of today is on the KF website and you can go and order. In the next few weeks we'll launch a full range of, what was supposed to come through Italy but got hijacked in cosmetic, a vast range of it. Then on the back of it new products will come online. The

clothing of the KF and the rest will come back online in the next few weeks. In that process we'll allow a lot of KS to be able to produce their own systems. (:16). These are very simple systems you can just bring in the bottles and test it yourself and see what effect it has, having 2 or 3 systems. A new version of these will come in after the 20th. We have offered 2 different sizes, 3 and a 4 cm, ... This is what we want you to do to move on to the next step. To take you out of just making Gans's, now if you want to find the strength of the fields of the strength of your soul and everything else, we have to get you moving to creating conditions to see if you can create flights. You can sit between the systems and see how the interactions will be (effected), and how you can test and make things. This is becoming one of the parts that we are trying to get you to move into, the fields. We have played long enough with Gans's. Now KF is taking over this site directly and we have booked for a 1,000 of these to be available to rapidly strengthen the knowledge of the KS. In the coming time you'll see other systems that we'll introduce and this is how we take the leadership, (:18). in bringing all the KF KS T into the frame of the KF. ... If you have produced anything like what you have seen here, which these all come from China, you can bring your technologies in. Then we have made an agreement with Chuan Lynn that he gets paid a percentage of the same so you can concentrate on developing. As he has become part of the full time KF organization we bring you also in as full time that we can support you and ourselves, to bring different aspects of the T. If you are in Brazil or China or anywhere else and you have a product ?? this is the beginning of what we promised you. We support you in disseminating the T or aspects of it that you have developed. This is the beginning of the start of what we said, you can buy the balls for it or the full set, and this way we take everybody across the full aspects of the development of the T by the KS. We have seen in Brazil some KS have developed different kinds of (Pain) Pens and they want to promote it, we have no problem. We have seen in China or KS having different products. ... (:20).

... .. What we have separated the KF as a donation and as a commercial side. The donations will hopefully go back on a separate line that it goes back to the KF. Many of you who sent donations to KF USA account, that account is not applicable. Don not donate to the Paypal there. The same goes for the KF Italy account, it is suspended. If you have paid any money in the past 2 or 3 months through Italy, you have to recuperate it back because that account is suspended. In the next 6 to 8 weeks you'll receive a totally new line of cosmetics that is targeted and was supposed to come out of Italy but it was hijacked, now it will come back again on very low prices. (:22). We deliberately keep the prices in a way that those of you who are interested to buy can afford it and it can be done. As we structure it in a bigger way. .. the KF has taken full control over the retail side. We don't trust nowhere for what happened to us to happen again in Italy. We'll develop the KF product range to 3 to 5,000 in the next 5 months. You'll see what I am talking about. When you come on the website it's not just single items. It's on Alibaba and the KF, you'll find a massive range of products. ... I'll go further into it in the coming months and you'll see all the applications of the T in every aspect from the farming, the people who produce Gans's. We'll start categorizing it as our webmaster in the background and this time we'll take full control of everything else. There is one thing we'll show by the first week of February, what we call, Enhancement Unit (EU). It will nearly completed hopefully in structure by about 1st February... then it goes into its trials for certification for complete delivery in February. (:24).

(:26). commitments on what I have seen and negotiators are doing in the background. We will reach between 500 to 1,000 units per month. We can deliver and our contracts

will be fulfilled. This process comes back to the K Seekers, in structuring that the KS who are looking for a different type of application we'll see how it can be done and part of the KFSSI we'll start training and teaching. Don't forget this and next week are the last time you can decide on what you want to study in research and we'll bring a lot of work into this. There is a lot of communication in the background about the Iranian conference and research and development between the IKF and KF supporters. We'll take step to make the sure in Tehran that all the technologies delivered by the Iranian scientists from the universities, groups and individuals.

(:28).

(:30). Everything on the health application wise is in the totally hands of Dr. Rodrigo ...

Are there any other questions before we go into the teachings. No questions so everybody understood that is good. ... How was it for moving the teachings today to 12 O'clock. Q: For the projects will this be within the private teachings of KFSSI? Yes. How would these groups be formed and who will be leading them, or is it someone who has interest will be the organizer? Yes, that's how we see it. And we'll give you a platform on Thursday and Tuesday U Council meeting and if there is a practicality you can join in with the, (:32). Rick's Thursday morning. You'll get the full support for this part. Q: Where would someone who is interested apply? KFSSI we'll open the teaching ... Do you know when they start. Monday the 13th. No we are not starting on the 13th, forget about it. We'll start on the 14th. There are no classes on the 13th. R- No 13th floor. No, we don't start pm the 13th, can you change that on the 14th. So we'll start on the 14th and you can join in on 14th in the classroom ... the first week to decide on topics. From there we'll start creating different Zoom numbers for each group. It'll be on the KFSSI platform that students can join, then we'll start building it up in testing and making the proto-types or different kinds of research .. (:34).

(:36). .. We canceled many of the teachings here and there. Anything that is not on the research and development of KFSSI becomes a fringe teaching and not part of the KF main teaching. The plasma private ... The process for what use to be teachings like the soul teachings or other parts, these all become part of the fringe teachings of the KF. They are just there, we give some platforms.... They're not part of the KFSSI teaching but if people want to carry on with ... we have to control a lot of things before it runs out of control. (:38). The process with the research, if part of your research shows promising results and then we can bring it in for full operational testing, it will be done in teams with it, then we'll bring people together to be able to do the tests. Hopefully now with us setting these research centers it will give us a lot of chances to do things slightly different then before, but you can come in for 3 or 6 months .. we'll give you the accommodation in the research lab and you can test it and then we'll see where we go. We'll develop this T in one way or another, and governments will play in that game of developing the T by the KF. Any other question? Q: When will the Huawei (Wah Way) implement the battery T? We will release that in the appropriate way. R- It's probably something that can't be talked about in public I imagine until it's actually implemented? We'll release that. We'll see what comes up and how we'll gather what we call the total amount in it.

(:40). The photo has been updated, this is the actual system UBESU. The full prototype by the time they paint it will be finished around the 18th of this month. ...

(:42). ... Any other question? Q: Why is it so difficult to use the soul capacity in the human condition? It's not difficult, we have made it difficult. What we call the lack of trust in ours, (:44). we allowed ourselves by not understanding it. I'll try to explain this in a different way. We didn't know, we took our heart to be the center but we never understood that everything needed a structure to be part of us, as an energy, we have made a lot of miscalculation in the totality of the life. Those we considered scientists, but they themselves not understanding the science of it have mislead us and those we trusted that they bring new understanding and knowledge, by they themselves not understanding have created more dilemmas for the scientists to do it again. We see a clear indication of this in the past decades. Stephen Hawkins came up with this ridiculous idea that black holes are eating machines and being, forcing himself into becoming a false imminent scientist, stopped any new ideas to come in about the black holes. To me he was one of the biggest criminals in cosmology and his stupidity for 30 years blocked any new ideas, (:46). any new concept to be listened to, until he read the papers about black hole by us, and then he changed his mind and now suddenly the whole world of cosmology has changed. Because of this ignorant and ridiculous scientist, **Stephen Hawkins blocked any new ideas, because he made himself, forced himself to become an imminent scientist he blocked everything, and this is part of our problem.** This has been part of our problem, even when it comes to the soul, religious leaders have done the same to abuse man. We see another criminal scientist called Einstein, he came up with the same thing, speed of light as the ultimate speed, and people don't, and people come and say, Einstein has said it. A bookkeeper, for god's sake, the guy has no understanding of physics, and now they have given him the control. This peer review and the conditions they have created, has created these problems for us. If you look from the time Stephen Hawkins read the paper about black hole, and he understood all the mistakes he made, look at every single lecture he has done (since that time), it's a copycat, copy of KF teaching. He changed his idea about the creation of the U, and about the creation, because he understood his total ignorance of science and he tried to make himself .. but it won't stick. It's part of us not understanding how we were created, and things are created, we accepted what I call a bunch of ignorant people who call themselves scientists. (:48). Because of their, whatever, religious background, like in Einstein, he was nothing, we gave him that position to abuse us scientifically. Now everything he talks about, leading scientists are proving to be wrong. String .. everything to do with his string game and then his ideas with everything else. He never understood, he wasn't a physicist, he was a made up man, that he believed in himself, that he was made to believe (he believed what the others thought he was). We learned a lot of false things from him. **Now we see the same thing with the soul. the STM being the center of the creation. Now we understand, if you don't have a soul , we cannot be, if you don't have a sun in the solar system how can you have a solar system.** It's like this new idea, which now we see, we understand it, but still we don't understand the totality of it, of finding what we call single planets in the middle of galaxies, that are not connected to any solar system. They can't explain it, but it's very simple if you understand the totality of it. **How can there be a single star or single planet, because it's dark and it doesn't have any dimension to it, be it existing on its own, between the galaxies or between the solar systems.** This is normal, and now if you listen to scientists who are trying to come up with ideas about what it could be, it is becoming ridiculous. Cosmologists have become a bit more now that Stephen Hawkins curtain of stupidity has gone, now we see a lot of people coming up with, not understanding of even the creation of matter, or how the U was created. (:50). If you understand how the U was created then you understand how

ourselves in the womb of the mother are created. A lot of mysteries and false information will be solved with this Enhancement Unit (EU), because it's a replication of the U. It's not a half system, it's a universal system and a lot of this will be resolved, because we give room, we put different units in KF research centers, which KS who signed for KFSSI can go in and test. What is the point of the elevation of the soul? What mixture do we need to have? What is the time span of it? When can we change the soul but into the physicality that we created? These all need to be done. We will not have any more time to waste because the systems are there, we can replicate the beginning ?? time in each system. This EU has not reached the point, this is just the beginning, now we are going to the next step. The next generation of the EU will come out of doing your research. You will see what I am talking about in the coming time. **The next generation of the EU will be totally different. It ?? should be out by end of next year.** It doesn't mean that these units go obsolete, it becomes a ?? these units will become more powerful to show more. (:52). This is why I said for KS to come in and plan, I want to test. A number of these units are placed especially in AZ, 4 units are left for KFSSI research. To go there and do research, water, energy, contamination, environmental, enhancement of the soul. Six units stays with KF to pay for the expenses of it. Then this level of 6 will be increased to 20 to go into the operation of the KF cooperation with the American and space units, for scientists. Then it becomes international. We have already seen the place in AZ and John has hopefully made the first moves for acquisition of it. The KF research for health has already been purchased. This next step is the space center research and development, 10 units will go in there, and it will become part of the Iranian and American space , most of the American space T to move in there to start testing the space T, the same as what we do in Tehran. In that process of the space T we have to understand the soul. It's not the physicality because now we understand everything is made of fields. We had a discussion in the Iranian KF that one of the KS in Iran, we have to understand the mentality in the Islamic world that what happens with a lot of things which has been said in the Koran or in Torah, (:54). or in the New testament or whatever. One of the discussions was the cutting off the hand as a punishment. Okay we cut the hand off by the Islamic law, but now the KF T shows you can grow it back. So the criminal continues to carry on with his criminal offenses. ?? If he goes in the system he can grow his hand back. We have to update the religion to ?? understand. So now we understand that we need to enhance the body of the man so he doesn't carry on with crime, they enhance the STM. Understand why you create these conditions of crime. Now the game has changed. KF KS come and say we are doctors, we want to see how we can grow a hand, foot, or leg in these systems. What are the consequences, why now we understand a lot of religious ?? writings don't make sense. **We start questioning the religions, because of what they put there. Now we have a system and we can see it. We are not contradicting it, we are showing what it is.** You say, Moses saw the fire or the light or whatever, that's the interaction of the soul. Now we create, we allow your soul to become strong enough, the strength, then the brain cells can, (:56). ?? stop the strength and what we call, superimposes the physicality, that ?? it becomes a light. And if I speak to you, so you become my god, as I see you as a light in the system. do you become a new prophet. This is where I said many times, when we take man to space he'll become so knowledgeable that nobody can claim to be any different. In the teaching of today I have explained to you an old hypocrisy in the world of science, of even this planet. We all accepted it. It's not acceptable, it's not there. I put the seed of thoughts about it being wrong in the first book when I called it the Caroline Core. It should have been understood because a lot of KS now are going into the development of these dynamic systems, especially I announced

today that it is getting, that you can buy. If you see that and understand the work of it, and if you stood still for 1 second you can see the biggest fallacy in the world of physics, to do with Astronomy and cosmology has been accepted and because what I call, somebody came up with this, like the fossil fuel comes from the remnants of the dinosaurs and whatever, now we have proved that it is all false because everyday millions of tons of oil comes down, because you created it on top of your CO2 Gans boxes and everything else. (:58). We see how rubbish it has turned out to be. Now we have to understand how much we have accepted false information even about the physics of this planet or the solar system. Now if you understand the new or what we clarified in the book, but nobody has understood. It has to be understood, because **if you understand that then you understand the position of your soul**. Then you move on to the next step of understanding the totality of the creation. There are a lot of things that haven't been understood and a lot of it just becomes fallacy on top of fallacy that we have accepted. Let me explain something to you very interesting, I wrote this to... I want to share .. Let me come back to something which is extremely misunderstood and now as K Seekers you understand. What I am going to explain to you is going to shock you, but it shouldn't shock you, and some of you have already understood it.

The present world of astronomy and geology, and the scientists in this world have told us and we have accepted it, (1:00) which has been total nonsense, that as the U cooled down we started seeing matter. What a rubbish. (Rather it's) **the matter strength of the fields of the plasma strength reduced, that we start seeing matter (forming).** Then there is another fallacy on top of this that by cooling down matter appeared in the U. And then by creation of whatever we start seeing stars, planets and the rest. No such a thing. If you understood that in **the motion of MG fields, they all don't go in one direction, and by loosing in interaction they turn back on each other, you understand that the U even our solar system, even our U was created out of the interaction of the fields in finding 2 different poles, 2 different directional motion (facing each other) which created the gravity, which lead to the creation of the U in the matter state as we see it.** This is a huge difference then what it is now in the cosmology, in the understanding of the creation of the U. The creation of the first elements, first fields, first plasmas came out of the interaction of the fields which in that interaction, those who were moving in the opposite direction created the gravity. This is not in the books of today. (1:02). Today they talk about every rubbish, except understanding that nothing in the U can be created if there is no G field force, so there is no cooling. Now we understand it. **If you as KS and the future K Seekers will create the condition in the systems or in the dynamic cores which you start playing with, you will see that you start creating matters inside the cores.** If you know how to play. The biggest fallacy of cosmology and that according to the U, of things, of matters, the first matters appeared is all fallacy. The only reason the matters appeared is because what we call the interaction of the fields, the first signs of gravity appeared and that gravity according to its strength starting pulling other fields that in interaction, some reached the matter state to the observation or point of view of the man. At the moment the cosmologists tell us that the mass of the matter in the U is very minute compared to what it (really) is. What a rubbish. The U is full of mass, depending on what you are looking at. Nothing was happening in the dark until we made the glasses that can in the dark (infrared glasses) and see life is active and everything is moving. Our lack of knowledge and not understanding and believing some of the fallacies of the other scientists, who they themselves have never understood has brought a lot of problems. Now for the first time you understand how the U is created. How in our U the

first matters appeared. (1:04). They appeared because the U is totally and absolutely, what you call, a dynamic world of motion of fields and some of these fields in reducing the speed by interacting, have lead to creation of the gravity, which that gravity has in turn, turned to creation of pulling more fields and with it creating the first element and then the first stars. So our U has been created out of the interaction of the fields and in the dimension and the fields of it, but when we look deeper and in understanding this, then there is another dilemma in which we all get tangled with it. What we see is that all the elements in this U in a matter condition (move in), what we call, anticlockwise movement. Then when we look at the galaxies their arms appear to move in the same kind of direction. But what is interesting is why do more, or why do most of the galaxies that we see rotate in this direction. Why don't we see this direction (clockwise)? Does this give us a better and bigger understanding of the position of our own U in the Unicose? If you understood simply, that if you are in the northern hemisphere when you open the little top (plug) on the bottom of the bath (tub), you get that rotation (anticlockwise) and in the south you get this rotation (clockwise). (1:06). **Is the anticlockwise motion of our U an indication that we are in the northern hemisphere of the Unicose?** In that position do we now understand **why we see some opposite direction motion in part of it because of other universes, and at the same time because of creation of the fields which are trying to balance the mixture of the U.** If that is what we see and the motion of our U is anticlockwise, does that mean, a very fundamental point, **is our Creator in the center of the whole?** If our U sits in this position, that is in the anticlockwise motion, and there is another U in the clockwise motion as we see (on the other half of the Unicose). Don't forget what we see in the macro is in the micro and what is in micro is in macro, so it can't much different. We believe and we see that we have an earth which is rotating and we have a center. (1:08). Does it mean that the Unicose itself has this shape? And does it mean what we call our Creator, where the original fields came, that in interaction lead to creation of the universes, also lead to creation of us. Then it raises another question, as this process of change has taken place, as we have seen the creation of the man in different part of the U, in our planet, is it the same? **Is there another dimension of the life which replicates man on the other side of this Unicose? Or have we become the reflection of it (draws an infinity loop around the 2).** With understanding the truth about the interaction of the fields and how they do, we find out we know nothing about the creation. If this creation is in such a position, does it have a center and a soul? Which interaction of the fields of it, lead to the creation of physicality of it? Then the question of cosmology, the way our little U has been thought to be created, stands corrected in every dimension of the science. (1:10). Then there is more to answer by misunderstanding by our own people in the past times, something which, one of the first questions I asked as a teenager, and I asked scientists in the nuclear industry and cosmologists and they can't answer because what we say is 100% correct, it was this. **In the present world of physics, with our geology they tell us that the heavy material sent to the middle, the center and we have a solid iron core, and this has created the rest of it. With the knowledge we have and this is what I understood when I was maybe 10 years old was that this is a load of rubbish. The more we go into the world of science we understand that we have accepted the biggest fallacy in the world of cosmology, physics and everything else, and nobody has put it right.** I mentioned it in one of the reasons in the first books was, this is why I created the core I called, Caroline. Because if you were similar to me as a child and you could see what I could see, you would have realized, that I am correct. **Two things, the center of this has to be hollow? (1:12). First of all because we have seen a copy of this in the**

dynamic cores, we always get that hollow center at a given speed. But when you look at the structure of a planet or a star, galaxy, U, or Unicose there is one fundamental point, if you understand the totality of the world of physics, what they have been telling us that the center of earth is a solid core, or what they call the outer core, or the inner core. We call it an outer core and then we have an inner, inner core, or whatever you want to call it. It cannot be solid. It doesn't follow the laws of the plasma or the laws of physics of the cosmology. If you understood what I did as a young boy, it's very simple, by creation of the centrifuge, you push the material to the edge and the heaviest goes outside. **This is by the law of centrifuge, which means the rotation. But by the law of the plasma in a vacuum condition you don't need a centrifuge and you still get the heavy material to the outside.** The center in both cases, (1:14). is the lightest and empty. You rotated those balls and you saw the center. Earth is a centrifuge 1,600 kilometer per hour and is in the vacuum of the U. Now go a step further and look at this, the body of the man and the STM. If you understand this. If you understood what I understood at the very early stages of my life, that how much things don't add up, what do you get. Go to our little ball. We have a vacuum ball, then we have a liquid water to the fringe of it and then we see the material. **In a centrifuge we see the same, we push the water and then we collect the solid on the edges of it. So is the body of the man, in this process of the body you have the soul, (1:16). then you have the brain and then what it has done is create the physical dimension of the body of the man. But because of the proximity to what we call, the soul of the earth, it has taken the shape of the body of the man.** If you go back, because we understood the wrong way, that the center of the earth is a solid core, metal, because it has to be magnetic, a steel because that is the only time you have a magnet. Do you see all these fallacies which have come out. We have not understood the condition of the creation of a vacuum, or of our own soul, which in our case, this friction, we call it the brain. Slowing down in the strength to becoming to the matter state. **What we see on the surface of this planet, sticking to the wall of your reactors, and what we see as the skin of the man. Then the interaction of the fields inside with each other dictate different conditions, we see liquid, or what we call magma, then we see the physical matter states, (1:18). and whatever it is that it can create, here we see the brain and the interaction of the physical body.** If you understood this, and this is the reason we introduced these new reactors for sale, is that if you can replicate the MG field .. **if you create the condition of the gravity of the earth in respect to your core you will see physicality manifestation.** Isn't this what we are developing in the EU. Isn't this what we have not understood before, and been lied to, and we accepted it, that now we have a problem to understand our soul. Then the whole riddle of the creation changes. It's absolutely impossible, an impossibility, for any solid matter to go to the center of the earth. If you understood even a little bit about the world of physics, rotation of the matter, creation of condition of matter, and what we call, everything else. **The pressures will play a game, but the pressures do the rotation and the creation of the fields confirm to us, (1:20). that the center of this planet is hollow.** The center of every planet is hollow, every star is hollow, because we have the system and we can see it. If you change the speed, and the M fields vacuum condition you will start seeing different structures. Then the question comes is there any difference between the soul of the system you built. Does it make any difference between the soul of what we call, everything else which we did. Does it come to the point of understanding the totality in how do we go back in comprehending what we have done, what we understood. Then we understand that we accepted a lot of fallacies. (1:22). **Is the field of the plasma the creator of the matter, or is the interaction of the fields of a plasma (PI) leads to the creation of the**

matter? Depending on the strength of the fields of the observer at which level does matter appear? This is why many times in the teaching I have said, what is red to me is not red to you. This is what we have to understand and now that we have come to the point of comprehending more and more of the totality, **does this mean, is there a Creator? Or as the radiation from His fields we have become part of the Creator, because through His strength we are connected, all of us, we are connected to this.** We have to understand where are we going to. Now that we start working with the dynamic systems, (1:24) and now we have started understanding the creation of the PI fields interaction, the game changes drastically. Because now we know we need a field source and if we create enough conditions within the field source, will it lead to the creation of different matters, and do any of these matters have different meaning, or has a different value from the point of observation of the Creator, as they are all, in all essence, connected to it. Is it man who has made the difference due to a lack of his own understanding. There is no ambiguity about this knowledge anymore. It is very clear. **If this soul is the soul of the Creator, then I am connected to its own strength field of interaction with me, it doesn't matter which galaxy, which U or which part of the Unicose I live. I carry its strength and knowledge, and I carry His mighty (power).** (1:26). It's me who has to understand and has to comprehend and comprehend the totality of where do I sit in the strength in respect to Him. But me being on the fringes of a galaxy, and another one being in the center of the galaxy has made much difference. Or being in the Unicose further from Him means you are different than one who is closer, even though we still have the same strength. Does it mean, I made man in the image of myself. It means I made man from my soul. I became the Adam and through the creation of my own fields and I confirm my own existence. Does it mean that everything created in the U is the Eve? Create as part of the Adam. We call it a rib. Or is this his rib, or the same? We haven't become ?? coffer because we understood the totality. We have become wise in understanding the truth. There is a very important point that I raised for a rabbi. (1:28). I am still waiting for an answer. That is, the light, the fire which the prophets claim to see, is that, what we call, the interaction between the STP and the STM itself? That in the eye of the physicality he sees the interaction of the light of his soul as a light of knowledge. Or enlightenment. If this is the answer, which is the answer, then it means we all have the capability to stand from the STP to see the interaction of the fields with our own soul of the creation which we call, the enlightenment, the light of knowledge. Then we all stand the same with all the prophets of the past. We should not call ourselves a prophet because we have come to understand the totality. But do we have to strengthen the soul that in interaction with the STP we'll see the light or do we have to enlighten the STP to, with its interaction with the STM, to see the light. In either way, whichever way we look at it, what we call the light, comes, and it can only come from interaction with 2 fields from 2 different directions. You call it the Sun and the Earth. (1:30). The interaction of the fields leads to the direction of what we call creation of light. It cannot be any different in interaction of the light of the STM and the light of the STP of the man. **Then when you become that light in surpassing what we call the STP in interaction with the fields of the U, you become a light.** Would we see that light coming out of the universal box. This is the biggest fear for those of you who are lacking the knowledge of understanding the totality. Many religious people, be it Ayatollahs, Archbishops, Rabbis, will create this mayhem because they know they have lost their position as the man has become knowledgeable to the source of his own existence. Then the answer becomes very simple. In what strength does one reach to be, to be strong enough to be as part of the soul of the Creator? The biggest dilemma for man is, at which level does the present STM sit. If

this (highest) is the soul of the Creator. (1:32). Then it comes to man to ask himself a question. If they say there **are 7 levels in the level of the soul**, is the STM in his position (lowest)? Where the ultimate goal of the 7 is the soul of the Creator. Or is the fingerprint, is the mirage of the man not understanding the totality. Now you can see how fallacies have lead to acceptance, to become the truth (falsehood has become truth). Our U was created out of cooling down, which now we know is rubbish. It's created out of the interaction of the fields and the creation of gravity, depending on the strength. Now that we know 'the center of the planet is solid,' is a fallacy, then it comes the truth, to us, for us, and that is, **is our Creator within us, and are we within the Creator, or within the realm of totality of these fields (all the 7 levels)**. (1:34). The biggest question is, with the teaching of today, with the teaching of the new message, which we have brought, are we showing you to go to the next level and there spend time to learn more, to become more, or can, through what we have taught you, to **be able to jump, and become at the strength as part of the Creator. The answer to that is, yes you can**. As you know the field of the PI rotates and the stronger is in the center, and this is the position you take, but the fields are all coming from the same source. Then a lot of the books of physics have to be rewritten, isn't it. Now that we know that the center of the earth can't be metal, as they said, the heavy one sinking. The law of centrifuge as the earth is rotating, and the law of MG field in a vacuum condition tells us that our planet is created exactly like we said, the heavy material has come to the edge, what we call the surface of the planet. The same system, the physicality of the man, and the same as you have seen in the core, then if that is the case as it is, then it has a center, which as you can see in dynamic reactors, has created a position that all the fields balance and share, like, has to empty, so it is the same as the STM. (1:36). As I said to you, this year we start teaching in a very different dimension, that you can understand the totality. Then no one can tell you lies and no one can cheat, but in a way the teachings of the past have brought us to where we are, to be able to understand. But if we would have understood it correctly from the beginning, wouldn't that have given us a chance to now, and not billions of years as man, you would have been higher (on the 7 levels), to be closer to (the Creator). But what does it mean to be closer to the source of the creation? That we become part of the Creator, and in fact, we become it, to become radiant, to radiate. When you put the fields together you come to one point, **interaction of the fields of the Gans's and the plasmas creates new dimensions of fields, which can in interaction lead to new dimensions in every aspect of the creation**. Where they interact leads to creation of new conditions and new matters according to the point of the eye of the observer, and according to the field strength. But are all these matters the same from the point of view of the observer? Or you have to be of a different strength, (1:38). and different observer to see what we see. And **do we look at the wrong side of the light. They are all looking at the light that comes to us. We are not looking at the light that goes away from us, because that comes from our soul**. That comes from our inner being and man has not understood this yet. Then if you understand this, does the man need the vision of the eyesight to see. Because, ISMW (in so many ways) what you see has 2 options, **you see with what your eye can radiate and in interaction with what is radiated, you create yourself an object. Or you see with the light of the soul and then do you see the same object? Then you understand mankind doesn't need an eye** to see in the depth of the U, (1:40). where the interaction of the fields of his own soul gives the true dimension and true reality about what he comes to encounter. If the fields of the other side by which the G fields of the STM comes to be, the field of what he can absorb, or observe, he says no to, then you'll understand when I tell you, your soul sees the soul of the other before your physicality

sees. If you see that, you see how easily you can see what other people say and talk, in reality to you. As I said many times, 'darling I've got a headache.' You can see through the soul and there is no pain there. This is what we'll see but the wisdom comes in silence, because your soul has already made the decision how to react. (1:42). Then when somebody says, 'darling I love you,' then you understand if it is really love, or it's just a talk. Or is it true love, or is it made up. Don't forget from the point of even love, love means giving. I give you everything when I tell you, 'I love you.' My physicality has no dimension because you receive it from my soul. Then when you see that the one you have given love to, has already given to someone else, and they pretend, then you'll see it clearly. But it's your wisdom that you keep quiet. It's the same in the depth of the space, when you come and see a new soul, you decide, is it going to eat me, or tap into my energy, or am I going to eat him and tap into his energy. Then you understand in the U no one taps into anyone else's energy, as man does [anything] to the others. This is why we created the term of MaGrav positioning, at the point that everything is in balance and in correct condition. Nothing can disturb the position because the fields from the center, (1:44). of the magnet and the Pl, have already decided, the physicality just shows the position. Now you have seen in one teaching, in one morning how much we have thrown away by what we have accepted. Now go back and try to rewrite all the books, that the heavy metals have sunk in the middle and the center of the earth is an iron core. What a load of rubbish we have accepted. Then goes the same with the STM, do we need others to tell us about the position of our soul and what is wrong and what is right, or do we see through our own soul. It doesn't matter what fabrication. Any questions. (1:46). Q: How do you get heavy metals out of your body? Buy yourself a new centrifuge. Not by buying a centrifuge, but in a way by understanding the motion your soul and the motion of your physicality. If mankind understands, **if you can emotionally understand that what you interacted or created leads to the cancer** of the breast or creation of cancer of the prostate or any other cancer which means a change of fields any way you look at it, then you can change the same position to change metals in your body. Then you change the fields, then would material or the fields of that matter you think, because in the body of the man everything is in the Gans state, nothing is in the matter state. (1:48). **Then will you be able to change its fields that it won't be a poison to you** or what we call as a poison giving fields, disturbing or changing the operation inside the man. One day, if ever mankind listens to the past 1.5 hours of teaching, and sit down and read, and if he truly understands it, you are on the right path and then you understand how much fallacy has lead to so much problem for humanity. Q: Can I jump in? Be careful you don't jump in the deep end. .. I have 3 questions. .. First isn't the creation what they call a nymphomaniac condition? K- Pardon? Q: the creation. Isn't that part of the nymphomaniac and schizophrenic condition? (1:50). We already have it in our bodies? K- You mean schizophrenic? Q: .. I never can say it perfectly unless Dr. Rodrigo can say it for me. Nymphomaniac. ... K- **Do you know the difference between the schizophrenic and nymphomaniac?** Q: Yes I was there in the teaching. Is it that the schizophrenia comes after the nymphomania? K- I think we have to get a definition by Rick in Wikipedia. Q: I will ask another question. No you can't wait for this one. You raised the question to me, in so many ways, they have nothing to do with each other, but it answers the other. Okay what is nymphomania and what is schizophrenia? (1:52). Q: I am going back to work and will ask later my questions. K- .. you raise the question and you run away. R- We get hyper-sexuality and sexual maniac. Hyper-sexuality is extremely frequent or suddenly increased libido ... The term nymphomania for women and satyriasis for men. ... K- So what does it mean in reality? It means oversexed I presume. R- Hyper

sexuality may occur as a side effect of medication such as for Parkinson's .. K- Why does he ask the question if the two are the same? (1:54). It's called sexual addiction. There is a fundamental difference or connection between the two, but one can be or to show itself to be the other. If you understand what we call the beautiful people which means there are more souls than one contained within the containment of the physicality of one body, which now we understand is a reality. If you have 3 souls in 1 body and each one has his turn to do (sex), to confirm, so the blond one has the pleasure of satisfaction in the morning with John, and then the black haired one Jack wants the same satisfaction at lunch time, and then the Sam in the afternoon would like the same pleasure. One body, three souls, all after the same. Does that make that physical body a nymphomaniac? Or if you have Jill, June and Fatima in **the same body and each one takes pleasure in different physicality of the man, (1:56). and wants to get the satisfaction of the physicality, confirmation of existence, which is replication of ?? Does that make that body a nympho?** Or does 2 of them want nothing to do, because they are satisfied sexually but the third one has a different idea, and anyone will do. We see this in schizophrenic, people with 2 or 3 souls, and one is not aware of the other, but if they take turns, but they are aware of what the other one does, they try to do what they like, but if you understand this does what we call, beautiful people, will give the right to only one of them to have the pleasure, and the other chose their own. This, what a single person can have that condition of repetitive satisfaction. Because the biggest addiction in the life of the man is what was given as a stimulation as sexual behavior. Why do we get addicted to drugs or alcohol, because it gives a certain what we call, (1:58). physical, psychological or chemical satisfaction or reaching to a level. Does this mean if we can satisfy that level then we need more and more, or you don't need some of it. I have seen all conditions in this structure, women with 3 characters and each one likes a different type of man, or one only chooses when she wants to and the other time doesn't. I have seen it with a married woman, and when you ask them they don't remember because they haven't done it, because "it wasn't me". When they are with their husband, let's say it's June, but when it comes to another man it's Cathy was playing and it has nothing to do with June. She says I haven't done anything I am innocent. In fact it was June who was playing. They target men directly, because it's the type of man they like. You see nymphomaniacs, or people who get repetitive, to satisfy their addiction of the creation, what we call to reproduce in that position. We have to be clear which one we are dealing with. (2:00). I have seen all, many of these cases, they deny, it's something you dream about, but in fact, Cathy was playing without June knowing. It's very much as what we explained in schizophrenic, you give them each one, and they are experts in the topic they are interested in and at the same time, each one has a different sexual habit, or attraction, one likes to go out with a blond and one with a black, and one with a bald. As it's the term for each, you say it's a nymph, but in fact it's 3 people who are satisfying themselves with pleasures of the birth, or human rights. This is what we have to understand, they say, 'oh, I have been faithful to you, I have done nothing wrong,' yes. June did, and Jacks term and he satisfied for June. This is what we have seen in some beautiful people, as we have twins of the same sex, we have twins of mixed sex. One likes to go out with a man, and likes to really go out with a man. But one goes out with a man as a man friend, and one goes out as a sexual partner, call it homosexuality. But the other one likes woman and ?? with him. This is the state of mind confirmation of position, that's why we see men who have certain behavior and we call them whatever, or women who have and cut their hair to have certain behavior. (2:02). Confirmation of position. Satisfaction in the point of demand. Therefore, when you speak about nympho which one is it, and is this the reason why

Jalal raised this question? .. Is it common? Yes, in some cases, what we call "beautiful people" with 3 characters, so with 3 of them each one likes his own satisfaction, because it's the time when they have the position of physicality. Do they become a nympho. They don't even remember what the other one has done, or they remember and they deny to cover. I have seen that clearly. One has done the act and the other one becomes aware of it, now the other has to deny it.

Q: Does that lead to the virgin birth? No, somebody was there with one of the three.

Virgin birth is totally different, if you think of it, comes from the interaction of the STM and the STP of the man. If you understand it and the cases are there. But when you speak about nymphomaniac you have to understand which one it is. Then you understand yes, **there are women who go that way and even change the color of their eyes for each man.** If I like to go out with a blond, and the guy likes green eyes, my eyes turn green. This is something, (2:04). that if you understand it, you let it be on its own. I have seen it, they change the color of their eyes. They change even their behavior, it depends which soul is in possession or in operation, and then they deny the other 2 because they can't confirm the existence of it. Because then it is them, they used the body to do whatever and they deny it. But it is the same body. They can't fool their man or their husbands or partners because it is very clear. Or in fact they're women. One of these (beautiful persons) has been one of the advisors to the Whitehouse for a long time. One of the characters is homosexual and one, I don't know if the guy is still alive, used to be one of the worst womanizers ever seen. But when it comes especially to women, because it's the same body they deny the other. 'It's nothing, you are just dreaming, it's your imagination.' **It's very common in schizophrenic conditions, men especially in a young age one takes over and the other wants confirmation of the existence, and that is why they kill their parents, or they attack their parents.**

(2:06). Because the second one wants confirmation of existence, but if you become aware of your 3 parts or 3 souls in your body from a very young age, you can play it, I have seen it and denying of the other, 'it has nothing to do with me, you stuck it on me.' But if you go through the history of the souls then you see that is one of the souls who started playing very early age. And then they deny and claim innocence, but they have done what they have done. They go and they kill their father or mother, or they betray their husband, 'it's go to nothing to do with me, I never done.' But in fact the other soul has been for a trip, but does he become a nympho or is it 2 different levels that we have to understand. Man has to become very open about these things and understand it and then they can live a life. You can comprehend what is going on, as long as they understand that they can't lie, then it is just to leave them, it's just to leave it because when you see that they are in this position, it's one of the souls claiming he has nothing to do with it, but you know. Or you have fallen in love with one of the souls, not with all 3 of them, and then deny and what you call, adultery comes in this position, it's just respecting and walking away from it. (2:08). I saw this the first time in 1980's and then continuously I have seen many more. What is your second question. Q: In your drawing, if Rick can go back to it. I don't save the drawings. It's amazing the colors of your drawings. It's beautiful .. This is the webmaster when he knows what to get you ... The sound is so clear these days and we don't have any problem. We don't get Mr. Rick Crammond saying, "I am finished with all this nonsense .." Now we don't have that, we are keeping him. (2:10). What is your next question. Q: **If we have a reactor, ping pong ball and we manage to create an empty space in the middle and this is the free plasma in it. If we take it out this dot. If I take out what will happen? K- You can't take it out, unless you are the creator of the conditions.** Q: Yes if I create the condition, can I manage to take it out, so what will happen to the structure of it?

Nothing, because if you can keep outside, the same condition as inside. Yes. Otherwise you can't. Q: I can't pull it out. K- No you see this is something with a lot of people. I have seen the Iranian K Seekers they're at it like crazy, and they can't get it. What the Iranians are doing is they got this reactor and rotating it and they are trying to see this ball (hollow center) in the middle and it's very hard. **But if you have 3 or 4 reactors running around or a huge amount of Gans's around, you'll see that it becomes very easy. Because now this is the interaction of the fields around the system, interacting too. Earth is not a earth on its own, it's within the fields of the U** and that's why it behaves this way. Do you understand? (2:12). When you are creating these hollow centers that you are looking for, you have to understand that the (other) fields you have created also count. (Somebody says, it looks like he has practiced (drawing) a little more. No. ..

When we look at this, trying to create a hollow center, don't just look at your own system, look at what you created around it. What other fields, other Gans's and then you'll observe the position, the pictures and what you receive and what you see. (I tried to get the pictures back but it doesn't work, they must have been deleted.) Q: ... I didn't see will see later. What was the third question. Q: It was what was the new system (electronic blackboard) you are using? Done by our webmaster. (2:14). .. Any other question. .. You have to understand how much effort is put by Alzar and Hassan in the conference in Iran and the Persian teachings in the background, thank you very much. . Q: In the last 3 teachings you mentioned about the ripple effect in the human behavior in your work, good or bad on the U (Community) Council, .. what is the human work on the other dimension of the soul, if you could elaborate more on that? K- What do you mean by that? Q: **When you do good of bad, it has an effect on the U Council, (not council but Community) U Community, so what is that ripple effect? (2:16). We take from them,** because this is what I have said many times in the teachings, it's not any more who shoots the bullet, it's who made the bullet, who done the other things, and it's the same when the soul is freed from its body, when you shoot the body or the physicality, or deprive it of the physical condition, **it has an effect on the other souls in totality, they have to accommodate and position themselves according to it.** We take from them or how much we give them. The mankind has to realize that he is not alone, 'I do what I like,' anymore. Not only in the dimension of the physicality but it's the same in the dimension of the soul, but in a larger and more effect scale. This is what we take from people, what we are not allowed to take. You have to give the room, free to do what he likes, this is his right, and when you realize this you create a peace for yourself. When you reach that point to you understand that **you can't steal from your soul, and the others try to steal, then what happens. When you put it right,** everything goes right. (2:18). Everything goes right for your soul, for what you are there to serve, so in effect, what happens to your immediate family, happens to your immediate soul family, where you are within (a part of). That soul family is part of the universal soul family. .. **It's like playing a game of chess, you know you have different figures in chess, but the figures don't move on their own, there is a hand which comes and moves them,** positions them. The figures are there, you might have a computerized one that can move itself, but somebody has thought about this move somewhere, that he has given him that essence of what he has got to do. **The man is the pawn on the chessboard and the STM is the one who moves it.** But this has a functionality of itself. But if you sit here and you are the only player, there is another player, which is emotion and is thinking and effects what the pawn of his moves and yours. How you move this pawn is effected by this and if you can understand how you can interact with it, then you can understand how to touch it, to effectively dictate,

(2:20). to it what it does. This is what we have to understand, our physical life is that pawn, it has physicality of presentation, it's there, it's our soul that is effected by it's motion, by its behavior, what it stands for, and what is dictated to the others who are themselves another pawn in the game. But in fact, there is one who stands here and when you die or are taken out of the board, he has to understand the position of it, because there is one less to have. This is what in reality we are part of the bigger structure, and our physicality is just a pawn on the pages of the land of the space of the planet or part of the U. But in that sense there is a soul, there is a controller that has no physical dimension, there is a play on the board but it decides what are the consequences of that move on the board, and it has to pay for it, or stand the loss of it. It's a very clear way that our physical life and the STP is controlled and dictated, is conditioned through the condition of our soul, and the soul, not having a dimension of physicality is part of the U Community in which physicality is, again, in the same position as the man. Or they know where to stand physically in respect to the soul and physicality. (2:22). When mankind finds harmony and balance between the STP and the soul, then you'll find a peaceful and a correct man. When one is doing or has done wrong to his soul, and the physicality stands (goes along with) it, you'll find everything goes wrong. Because when you do something wrong in the physical dimension your soul has already made the move to make the position in respect to the other souls what you have done. Then their reaction brings back to what you do, your physical condition, through your soul. When we just had Jalal talking about nympho and schizophrenic, or what we call beautiful people, most of the consequences for which soul in that body, and which soul finds its position in respect to the others because it deprives the others of the position. As I said many times, I am not a fool, even though I pretend to (be), that is the condition of the STM. Q: ... If say, I marry Suzy and Jack and I am totally aware of all 3 souls, can I become one of them, I know who is doing what, (2:24). and then take responsibility for it when I was asked. If I understand this or no, it is not possible? What do you mean? Q: For example, I am Mary and I go break a vase and then I become Jack and my mother asks me who broke this, then I can say Mary did it, because I am jack right now? ... and I don't blame it on the other one or create mayhem, and I can work with those 3 souls in the body simultaneously and be benefited from understanding each soul what their strength is, and what the development of each soul is and what they can do in that form? K- You have to work, or you've been working with, or understanding when you speak about the beautiful people, their behavior, then it is totally different. They cover for each other in the physical dimension and when they do something wrong and the one is always present finds out they have done something wrong, they do everything to try to cover it up or correct it. They become each others souls, what we call, balancer. (2:26). For example, if one says I broke the glass, the other one says I didn't do it. But up to now we (as humanity) were not aware of this condition, but now we are. We have to see how the souls play in respect to each other. Many times when you have this condition of let's say breaking a jar, or when it comes to what other people call adultery when it comes to involvement in other people cases of dimension of physical emotion, as Jalal was telling about nympho, 'it's got nothing to do with me, I have never done anything wrong.' But they're aware that the other one has but they cover it. Then you'll find the third one totally denies it. ... Or in the initial stages one tries to recover from it or tries to cover it. In many cases when you go into the legal system with cases of schizophrenic which get sentenced to long term prison sentences, the judges don't understand. If I go for a case to stand in the court with a schizophrenic, you call it a nice people, I (would) make a dilemma for the judge to decide why 2 more souls have to spend time in incarceration when one of them has

done it. Then that one who is getting incarcerated because of his behavior. (2:28). Wasn't he trying to confirm his own existence, then are the souls aware of it, and they put it right. The souls put everything right, because when one does wrong and the other one tries to understand, I didn't do anything wrong it is him, but I deny it, because Mary didn't do anything, but Jim was at it. It creates a lot of problems inside for themselves and then they deny everything, 'nothing happened, it's your imagination.' In the cases of murder, or hurting and damaging, their parents or their mother or father, which they mostly do, it's lack of understanding of the legal system and the scientific world of what it is. Why, when you have triplets and one of them does a crime, do you put the other 2 in prison. (But in the case of schizophrenics), because one did it, they are all together. What is the condition of their souls? One soul has stolen the freedom of the other 2. Where do they stand in the totality of the judgment, they all balance of the fields. I have seen cases like this, (2:30). both with men and women. You just walk away, because either way at this moment in time there is not enough understanding both by the body and the society of correct conduct. It's always somebody else's fault and never mine because, ?? .. because, 'I just didn't do it.' That's why when they become aware of it, a high rate of schizophrenics commit suicide, because the one who didn't do it, was not there to do it, but he is the one who is known to be the position of the physicality. But you imprison 3 souls. Q: About death, **in Islam, Christianity, Judaism, Buddhism, each of them has their own story about what happens to us after we die**, and all of them are adamant about what happens, but none of them have ever died and had those experiences, how is it possible they can talk about it so clearly after we die, nobody has died and come back to tell us this is what happened? Where do they get this information? K- Who says that? Q: When we have our Farsi teachings people send me information, Christians and Buddhist people about exactly what happens in the death, what we should do, how long we are holding in this place and then we go to the other place, (2:32). They have a very clear idea what happens to us. But I want to know what happens to us when we die at the present moment? K- The thing is, this is how, what you understand about the reality of the creation. **Our physical body or our soul is part of the cycle of transition. That's why I always said, you have a STP and a soul which is the totality, and how many people have been to the other side and have come back**, but if you understand it, do you need to come back, or have they experienced the death. But if you understand the position of the creation, and you have watched the cycle, you understand very clearly what happens next and what happens to it on the other side. Because from our point of view we see the soul, from your point of view you see the physicality. You see a cat dying, that's it, then what happened to it. Will it come back, does it have a soul, will it start walking, but that is all you can see, you see the end of physical condition, you call it death. But **when you sit in our position where we see the soul, we see the freedom, the motion, we see it moving to its own position and destination. It has a destiny, that is why it was in that cat.** If you understand, this is one of the reasons, (2:34). I always from the very beginning, any of the KF K Seekers ever came, started, listened to, I said **pray for the soul of your system.** It's not just switching it on and off and doing whatever **because you give life, you create the cycle of the collection of fields, that they effect the others, just because you don't see it in that moment, doesn't mean they can't. It means the energy has a spacing into other dimensions and to other strengths.** This is what mankind has to understand, we see the next step, the freedom of the soul, freedom of the package of energy that was the center of your creation. Then it takes its own position in **all the souls don't go through the same cycle, because it depends on what the strength you have, are you a small magnet or a big one**, are you amongst the bigger

magnets, are you amongst the smaller ones. This is what I say in one of the introduction videos, 'do you want to become a dust in the part of the others, when you can be the star yourself.' The physicality is a transition of holding the beauty of the soul and when the jar is broken the water is gone, spilled. But that water still carries on existing. It doesn't disappear because the jar is broken, does it. It becomes the water to the plant, water that the cat drinks, (2:36). it becomes the water that you might drink some of, it still has life and carries on, not just because the jar is broken. That jar is the physicality of the man. The biggest problem for the human being is that they have made a lot of things out of nothing because they never understood the reality of the existence. **The rest is fantasy, the world of making whatever you like. But now you understand that it's you who is in position you, the soul will, what we call, never loose its position of its control, it's existence confirmation of its existence.** Then you, even as a soul, when you come to a stronger soul, it's like sugar in a hot cup of tea, you dissolve but you are still there, but in a different strength of it. You are going to sip the tea with a block of sugar in it, which is dissolved, is not only in one place, it's in every sip there is the essence of that sweetness. So life never finishes. What happens if I sip from that tea with sugar in it, and then my child and my wife does. How have we split that sugar. How if I am diabetic and take that sugar, and my son is short of sugar, and my wife is normal, what happened to that, what conditions do they create in my body and in their body. (2:38). Life is continuous it's man who never understood it and he has a ripple effect on everything else which is around it. Q: In your talk today you talked about the soul already made a decision, it seems there is a constant interaction between the physical soul and the soul, depending on how you allow your soul to? (K- Of course) my question, I had an experience and I want to be clear on this. You see, in 2005 when I didn't have a clue about the reality of who we are and what we are. I just wanted to start my own practice because I was fed up working for other people and the fact that I had to do wrong things to people. Everything I did to arrange opening and getting the space, and doing different things, constantly it wouldn't go through. I had to get \$300,000 loan and I had no money to put a down payment, everywhere I went I was bumping into the wall. I was constantly praying, god please let this happen, I just went with my whole strength and my physicality to make it happen. Even for the first two years I sat there every single day, 7 days a week, from 9AM to 8PM and with zero patients, I was just adamant that I have to make it happen. The physical soul was actually driving me to do it, not my soul, because I was meant to have, but still after 15 years it still hasn't gone. But when I look at it, I was thinking about it, maybe my soul didn't want to do it. And why I was pushing so hard so .. K- I will tell you something very interesting with what you talked, coming with you. This happened to me just less than 3 hours ago. (2:40). I was in a meeting and the lady said, sorry I can't do anything. And I laughed. She said, sorry I can't do anything. I said, you don't need to apologize, it means it has a reason. I don't look at it that it's a bad reason, but something needs to be adjusted. She said, you're not upset. I said, no, but you think I am upset but I am not. because I look at it that there is a reason for it. strange enough I tried to do this thing for the past 2 weeks it wouldn't happen and on the way to go for it to happen today. So much, so much opened up, and I said to myself now I understand why for the past 2 weeks I couldn't get this done, because this gift of this knowledge was supposed to come to me now. Then I could understand and it was such a joy. Hanging around for 2 or 3 weeks and everything else was just a joyful thing and the woman thought I must be very angry. I said, you don't understand how happy I am. She just went crazy and said, I don't understand you. I said, I am not worried. She apologized. It meant I had to receive this knowledge at this point and you were the angel of it and not the cause of it. It depends on how we look at

things. **You want something so badly, if it doesn't come because maybe it's not right, the soul sees it's not right or you have to pass something you did wrong, at the right time to understand what you have done wrong or right. (2:42). The souls decide not you.** Once man becomes aware of the existence of his soul, this is what I always say, I don't put my head down worrying about anything that I do wrong, and I know when I do something, it's done through the souls and what's the reason for it, and the way it was supposed to be done. It's very interesting, you say you waited years and it never happened, the soul knew it was not there. They have a very good saying in Farsi, 'just don't think you know what is the best thing for you, it could be a poison for you.' But you don't see the poison. Any other question or should we call it a day. I think with what we see and what is to come, especially with these EU and those of you who want to do these kinds of research to understand more, to understand the strength of the soul and physicality and the different conditions and environments. We'll start taking control and start understanding the knowledge our way, which is the reality. The systems are there, so there is no need for imagination. (2:44). Q: Is it possible to compare the strength of the fields from the dynamic reactors with the ones with the disk, that is without physical movement, and only using the PI fields, and aren't the reactors with engines outdated or obsolete? Aren't we to go further in our work with the fields, as in the empty box of the U idea? That is the next step. At the moment we have to walk before we can run. The creation of the fields without rotation (by motors), that itself has created its own dynamic rotation of fields. This is how the U is created. This is what I have explained to quite a few K Seekers in the past times but nobody understands. This is what you change, the voltage to a current as you call it. This secret man has still to learn. **The minute mankind understands the connection and interaction and conversion of the voltage to current, then you have broken one of the cornerstones of the knowledge of the U. (2:46).** This is where the new T will come into play and mankind is not ready for this knowledge **of the conversion of the voltage to current and current back to voltage.** You measure it, but we multiple it, you call it a power, but we don't understand it, and **in the U continuously it's a cornerstone of creation of the soul. Then if you understand how a hollow ball appears in the center, then you understand, that you have understood the point of creation.** Then you are one level higher and then what is that other level of understanding of being higher, then you go to the other one (next one) until you understand the totality, which means if you understood the totality you have already become the Creator. This is how the creation is. **The dynamic cores with the motors is for you to understand the field effects which a lot of KS need to do, to move away from patches and other things.** You were happy with it, this is okay, you were happy with other things, this is okay. But now we go into a different dimension. (2:48). We have to. We say .. if you don't get there, somehow we'll get you there, but now slowly ??? Q: **Do we feel the fields in a dynamic or static reactor and give to them according .. or tuning to personal emotion? Yes.** One of our KS had that dilemma and he hasn't understood and I sit and watch. **It goes to 59 volts the minute I touch. It is the condition of understanding how we create that motion and emotion together in the field transaction. I said, transaction not transition. Meaning it's in transit in acting between one to the other.** Don't be shocked when you see the power generators, which last a lifetime or many lifetimes, it's the same as the U. Any other question. (2:50). Q: **What is the best way of creating an oasis system to protect our property and home from bush fires like what is happening in Australia? There are a number of ways you can do it. You have to create a dynamic field of CO2. If you can do that you have already created an atmospheric condition where there is no oxygen in that position for the**

interaction with the fire. The difference between the fire and the hurricane is the speed of the motion of the field transfer. With fire it's a matter level of the matter, in the hurricane it's in the state of the Gans of the gas. This is one of the things you have to understand fundamentally and then you can solve it. You can increase it, and keep the fire (100 kilometers), 100 meters away from the house, as you wish but you have to understand how and why. (2:52). But on the other **you have to realize that these bush fires are part of the cycle of life, and maybe when we get in it, and maybe there is a reason for it.** You have to create a condition that it interfaces with the CO₂ in a specific direction and position. Think about the magnesium fire then you'll understand how the fires move. Understand the process of the M field of Mg, then you'll understand how bush fires so rapidly create a black hole pull field. Q: what about the next time for next the KS Workshop? We'll go back to normal, (2:54). today was special because I was in travel. It was impossible to hold a complete teaching. It was easier, I think it was a very good time to do it at this time, huh? Only thing on the west coast it'll be a lot of problem, it's what 3 AM? Yeah from 3 AM to 6 AM on the west coast, but it's actually a better time for Flint, he commented the later the better. He likes the 3PM or 6PM Central European time. Everybody has their preference. We'll set it up on the European because I work around the European centers somewhere. I know the Chinese have it difficult in the middle of the afternoon ... Somehow we have to satisfy and meet with everything else. I go through this because I travel around and the confusion is when you hit the 11 or 12 hours difference. R- I know, we just have to slow down the rotation of the planet. K- Then what happens, we'll all die ...

If you really think of it, when you stop the rotation, you never really stop, Mr. Rick Crammond. If you look at this core. (2:56). We have this physicality on the side of it. **The real truth about the whole work, are the fields that we wanted you to learn about, not what happens inside.** As you are physical you keep on looking at that hole. If it's a hole here, or here, or here, what's the effect on the strength of the fields, which field comes from which position. If this is for cancer, or this one for energy, or this one is for material. This is what I am trying to, **the whole of the teaching today was, stop looking at this box (core), start looking at this guy here (fields).** This is what I have been saying before, some weeks ago, we want you to start looking at this (fields) without the dimension of the physicality. It doesn't matter where it comes or how it comes. **This is the whole purpose of the teachings, because if you understood this, then I'll tell you something, you'll find out, these all end up (back in the center of the core), then this (center of core) if it's part of it, ends up in the Creator. This is the whole purpose of the teachings,** we are going this way. It's just for you to .. I could not see any other way to take you away from the past, and god knows this and Gans's. Q: Now you are talking ... goose chasing. (2:58). No, you didn't chase any goose, it's just that in the future you'll understand why. Because you like to have a machine to play with to confirm something. When I left you with your soul you all got lost, so when it's true these machine are for your soul, "oh, that's what it was." This is what I am saying, if you understand to work with this guy here (the fields), then you'll understand how it interacts with your soul and other souls. And the life starts making sense of the T. But that's what I said, slowly, slowly. Now you know about the soul and the machine which can interact with your soul and then what are you going to make in between. Then what happens if somebody appears in the blue, green or red line? Is it going to be a Christ, Mohammad or Buddha or whatever. Or are you going to understand it's the totality, the same source. And **how it reacts with your soul counts.** It's just understanding the truth about the interaction of the fields and the rest you can join it and see. This is the whole thing I have been trying to bring you into, to think about fields, because now I showed

you this and explained to you about the earth, and bla, bla (3:00). It's all to bring you to think about these guys here (the fields) , it's not that guy (the reactor) who creates it. What can you make from it, it doesn't matter where it came from and who has done what. Q: Now we understand, maybe it's because of this new computer program you are using for drawing on the whiteboard. K- Thank you webmaster. No, because we had to understand about the soul. **The soul teaching brought a lot of people to understand that they can't be gimmicked or lied to, and then, now you can play with anything.** If both KS .. You see a lot of KS in the beginning, when with these dynamic balls, they never understood, they never looked at the fields of it, they just wanted to do the rotation, to move something or fly with something. That was not the purpose of it, so we keep on going on the same track and coming back until you mature. But if you look at the essence, nothing has changed. We showed with the Star Formation and we showed you everything else. Shall we call it a day it's 3 hours. Thank you very much for today and please remember if you enrolling for KFSSI decide what you want to follow and develop. (3:02). What you want to bring on the table or who you want to gather together to develop what you think or to research what you think to do. You have 1 year to do it, and at the end you'll graduate with no paper work. Your soul knows you completed it. Then you have the conferences coming up in Malta, Mexico, and Kenya and then in Iran. It's very bad news for some people who thought it wasn't going to happen but it happened, and the EU is now at 500,000 Euros and it depends on how you want to develop it, and we'll show you in the next 4 or 5 weeks we'll see what is going to happen to people and who will claim what and what can be done. ... I hope we learned a little more and corrected some fundamental mistakes in the world of physics.

(3:04).
