

310th Knowledge Seekers Workshop January 9th, 2020

(** The Peace has been achieved;

The Enhancement Unit is a copy of universe and will take mankind centuries to understand its full potential, It shows the true essence of how the universe was created and can replicate any point in universe without traveling there, Nuclear is finished, Western nations killing scientists, New systems for environmental cleanup or CO2 capture systems will be released, Cleanup of Italian contaminated waters, New agricultural system to cleanup antibiotics and chemicals will be released, Will release transcript of last Monday Iranian KF teachings, This is the year of the completion of all the teachings and start of commercialization, New CO2 systems will take the pollution out of the air and the Gans created will be released in the oceans along with what is needed to correct the damage done to the planet, Malta will be the new headquarters of the KF and Universal Council, Depopulation from earthlings as tourists in the universe one world government to decide how to control, Italian government to open court case of Fabio as a murder will lead to Belgium monarchy, Building homes and physical structures with plasma technology, KF to start developing a plasma leisure industry so people have something to do with their time, Feeding the animals in the same as the man so they enough energy and don't kill, Gans technology to protect against bush fires without disturbing the natural cycle, Controlling locus and pests by giving them energy and not killing, Through the new systems we control the evolution and dictate how we want our bodies to change,)

(:06). Whenever you listen to these knowledge seekers series. As usual we are back on Thursday again. We try to learn and share knowledge and try to extend the knowledge of understanding as a functionality of the soul and what we call space T, agriculture and everything else. It's interesting to see what we just saw, the Enhancement Unit (EU), this unit physically will be shown in the next 2 or 3 weeks and it's primarily taking the knowledge into the next step. It's not just an enhancement unit but it has many other functions as it's built and made in the shape of the U. In the past we replicated a lot of things, we copied the birds and now we have copied the U. **It will take mankind centuries to understand the totality of this knowledge in this system.** Many ways and things and many enjoyable times will come from this unit. In time when mankind understands the totality of the design of this system, (:08). **you can create the condition of any position in the U inside this system.** Slowly we'll open what this system can do, we'll learn, everybody thought this was for healing, or for enhancing the body ?? everybody thought it's for whatever and whatever, producing materials as we need in the space. This is a multipurpose unit. In the coming time when the scientists and when mankind, now that he has reached the point of peace will endeavor to create the condition of any point in the U, which means you can create the real condition of any planet of any star of any position in the U inside the system. In the extension of the knowledge we can come to understand one point, that we can create the whole arena of the U. We can develop these systems in a way that it gives us the images, the exact replication of the galaxies. The whole understanding is that in time mankind will develop systems which in reality, what we could not do before. We could not create the conditions of the dynamic MG fields around in the solar system, now this system allows us to do it. We can position the sun in the center and the earth and moon, (:10). and understand what is, what can be, and the other conditions what can be understood from their positioning. This will be the first time mankind has a 3 dimensional working

universal system, working only with M fields, nothing else. The way we have designed this and the way it will be used by the scientists is very much, 'walking into the universe.' Choose the place, position, condition, the MG field strength and you'll see the life, the extension of life, the interaction of the fields. If you think of it, it's a dynamic plasmatic system which super-passes Tokomak. As a nuclear physicist I always thought Tokomak as being a half cooked business, but this time the MG field comes for the wind within the structure. This passes the whole structure of CERN's advanced high speed whatever, has become more or less to its edge of limit, because there is too much limitation of magnetic field created through what we call matter state of fields, where in this system, now we create M fields in the structure of the plasma (PI) as it is in the U. There are no magnets but the fields created by the dynamic system will give us the parallel, the true essence of the work of the U, (:12). within the system. In the coming time we'll go more and more in depth, and we'll explain in a very detailed way how we can develop, increase and change everything. **What we see for the first time mankind has got hold of the true essence, the way the U is created. One the reasons I started bringing this out, was one reason, because we knew the world peace has been achieved.** We knew mankind will come to the point of what we call the turning point of changing science and T from wars. Then walking away from it and allowing it to become the most important thing mankind will do. As we were witness to it since last Thursday teaching, the whole world went through what everyone thought was the brink of war, but we knew there shall be no war. We saw by yesterday the whole thing turned upside down on its head. The most powerful nation has submitted itself to not being able to attain world peace and at the same time, (:14). world leaders have understood clearly **since last night's message from the American leadership that, 'we are powerless.'** It doesn't matter how you paint or word it, one thing that came out of the past 7 days is, no nation is ready to go to war. We have reached the turning point. As I was saying before the start of the teaching, just before we heard the words of President Trump, I was writing to a couple of KS in the background who were worried. I said, nothing will happen. The Americans will become ?? , because you have to understand that they have tried everyway to save their face. The most advanced nation in the world has come to understand that it has no advancement and somehow the world leaders have to understand. I'll put it in a joke way but it has a lot of seriousness behind it. The reason the Americans always rely on the world, 'we'll never let Iran possess nuclear (weapons)' is because they know that Iran has finished with nuclear a long time ago. If the Americans were afraid of the Iran's nuclear system they would have come up with different games. Simply put, the reality is, Iran has finished with nuclear. (:16). Nuclear is for the backdated nations and is something children play with. Nuclear as a weapon has no purpose or need, because simply the plasma technology which super-passes nuclear is like what we used to make, arrows and slingshots. Try to hide behind. 'we'll never allow Iran access to nuclear,' because Iran has walked away from nuclear. Because we have a **more advanced T and as I have requested from his eminence Ayatollah of Iran to be shown in March conference in Tehran.** You have to understand that us today, we are witnessing an evolution and revolution in the world of science. We had the industrial revolution and it brought many things, now we are going through the Plasma and Gans revolution that nations cannot close their eyes to. Yesterday I was talking with some of the powerful people in the world of politics and they said it was a humiliation that was accepted. It was a humiliation for the death of what we call the nuclear industry. It was humiliation for, (:18). understanding the simplicity of the truth. With this new EU a new cycle and revolution in the world of science and T will emerge. We used the water and the steam to advance the mankind

through the industrial revolution, now we use the PI and the knowledge of the creation of the U to change the course of humanity in a much better way. It is in totality the beginning of the beginning. When a man in my position as a nuclear and plasma physicist tells you that the age of nuclear is over, I have been telling you for a few years and now we have seen it. We don't go (talking) about who killed who, and who did what, the reality is all that nuclear weapons sitting in the arsenals of both nations, Russia and America, Chinese and the French, the Pakistanis, Indians, but nobody dares to touch because the consequences of it is too horrendous. But everyone will play through the PI. The world leaders, the peasants on the farms, the fishermen on the sea, and the spaceman in the depth of the space. (:20). What I said and I keep on saying is that we have entered the phase of world peace and there shall be no war. But the world leaders have to learn one thing from this, the past 7 days, showing power by killing is the job of the wild animals of the jungles. Targeting and killing is what the wild dogs in the plains of Africa do. As I said, these nations of the west or advanced T have no fear in killing scientists. **Many Iranians nuclear physicists who were killed because of their knowledge. Hitler didn't do that. Many scientists in the highest caliber in chemistry, biology, physics and astronomy have been killed, which is unbelievable, commissioned and executed by Americans and European nations.** The only nations in the world who kill scientists and they call themselves civilized. The only nations who terrorize people, and they call the rest terrorists. (:22). Now the true terrorists are one by one stepping down. We have seen the biggest terrorist who killed more Iranians than anybody else, Netanyahu, has been stripped of his positions and soon he'll see his own fate. **We see once you kill this way, you will be killed this way through your soul. In so many ways, the time of killing has come to an end.** Now it's our responsibility to elevate in totality, not only the soul of those who we thought were our leaders but the soul of humanity. **We have started releasing new T hopefully by Mexico or Kenya we'll show you what we call, environmental cleanup.** We have submitted a direct report to the Italian government in respect to the contamination of the waters, and they have until the end of January to respond. A 250 page document has been submitted directly to the office of the President and Prime Minister of Italy to respond in respect to the massive contamination in their country. I have informed the Italian government, (:24). that the KF will release this document in public and or, and if they do not respond to take steps to correct it. The next step for us is the **launch of the new CO2 capture systems which will be placed like solar panels across the cities.** These systems will be launched in the next 30 days. The KF has put a value of 20,000 Euros per system. In fact what you do, you cleanup the mess that you created. Before March we'll **release a new farming system which allows the farmers to cleanup their animals from antibiotics and the chemicals that in return, by eating them, into our bodies.** Our scientists in the beautiful city of Masshad have started testing. Scientists in Italy have started testing and we are very open. We have taken the leadership in cleaning up and delivering new T and will pursue this pattern until we achieve the maximum effect. The farming units which will be supplied directly to the farms especially in the country of Holland, Italy, European northern countries and in America, as they keep the animals encaged and captivated in cages, (:26). the amount of antibiotics and chemicals given to them to keep them alive to be able to use them commercially for their meat will come to an end. The new agricultural unit is the next target for KF. Because what we eat effects and changes our health. At this moment in **time the reduction in the sperm count in cities like London and major cities due to the factors we know, will be sorted out.** We'll release systems to protect and convert this. Every month I explained to you that we'll release advanced edge of T in a very simple form that will be sold through the KF

operation. As we have seen the EU we met exactly as our expectation for January. We will meet our targets in every shape and manner in the coming months to change what we have done wrong to this planet, ourselves, to its animals and by correcting it we return back to the position of peace. I wonder how many of these naval ships we can borrow from Americans to put the KF systems on them to cleanup the oceans from plastic. (:28). They have many warships. Now the war is a cleaning war against what we have done wrong. We saw in the past 7 days, the beauty of the knowledge. **I have asked the Iranian KF team to release the teachings of the KF last Monday. In a 5 or 6 hours teaching we made it clear to the Iranian government and officials and administration that Iran has taken and has to take the lead in knowledge and T.** We have set our scene and we have asked his eminence Ayatollah K of Iran last Monday to allow the conference to take shape and place in Tehran in April. Because there has to be a start, **this year is the year of the completion of all the teachings and now we commercialize.** We do it in a way that it can be used by everyone. The target of the KF in the next 12 months is the commercialization of the KF T through the KF operation and through understanding of the T. (:30). The Iranian KF Farsi team has the responsibility to transcribe the last Monday teaching into English and other languages. A copy of the teaching has been given to the Iranian administration and diplomats directly and to the ambassadors around the world. The way Iran took the lead for peace in the past 48 hours, it showed the power and the beauty and humiliating a bully. We thank the Iranian government for this. You can understand what would have been, and you can see what has come out of the wisdom of not escalating the war but pushing for peace through the power and T. As you listen to the transcripts of last Monday teaching, we'll announce to the Iranian government that KF will draw a line and explain what it sees and expects. We saw the end of wars in the past 24 hours. (:32). **We'll see the old interaction of all the American and European forces out of the Middle East on a very short time.** The reality is that we welcome throughout the Middle east the European and American scientists and not as soldiers. Tehran will become the cradle of science. **By the 21st of 2021 I'll step down and in totality from many of the KF activities to make sure that we take the lead in the leading science and I'll return to the city of Tehran.** Then we'll show the power of the T. In the next few weeks you'll see systems for cleanup, systems for agriculture, systems for many other things, and **the Iranian systems for flight is the responsibility of the Iranian government to show. They were gifted to them 12 years ago.** You have to come to the point that we will show the beauty of the knowledge, we'll show the glory of understand the knowledge of the creation in the U. **If the KS step up and move to the next level the world leaders will follow. Most of you have got trapped in peddling in what I call, underground base level of Gans's and Nano coating and the rest.** The true race for space will start from this week. We have understood the knowledge of the creation and we have developed T to confirm it, so we have become knowledgeable in the world of creation, the same as the Creator but in simpler ways. There are those who would like to make gold, and this and that, you have to learn yourself. You have to understand yourself. (:36). how these things are setup and how they can be done. MaGrav systems are obsolete if we don't understand the T and you have to understand the simplicity of the T and the knowledge of the PI, has been overlooked by the KF KS and that's why you are in problem. This is why all or many of you are catching up, trying to catch up but you don't understand where to start and where to finish. You have not understood the totality of the knowledge and somehow it's easier to be what I call, 'overlooking it then to do it.' As many of you are aware or not, KF has opened a new channel for all the KS to come in and share knowledge with each other and to distribute and share the totality of the

knowledge of the KF worldwide. As I said, to the Iranian KF KS in a very simple way, (:38). as we knew the outcome of the attack last week, it was very easy for us to start preparing everything for it. As I said, when they peace comes there will be no borders. The KF Keshe family platform has been created for the KS that we took the borders away. The border of knowledge, KF Brazil, Mexico, Spanish, ... all have been put under one cover, One Nation platform and this was set up some 4 days ago and it's for all the KF worldwide. Now we have made One Nation out of you. One nation, one platform, you can all share knowledge and come in and learn. We gave you a couple of days for everybody to come and say hello, and in the coming days you'll start teaching each other. **This is the platform for the starting of the KFSSI teachings for Master degrees, that groups of you, it doesn't matter what language group you are in, get together and enhance the knowledge of your own interests.** When I set this up, it was to bring all the KF KS enthusiasts in to start research groups. (:40). We have opened the KFSSI in a bigger dimension with no borders. American KS scientists, as much as we welcomed all the Iranians, the Brazilians rushed in as well, we saw the Spanish and every other nation. It is just coming in. We'll build this structure to One Nation education center. At this moment I see there are a lot of things, some talking about the Gans here or something else there, but let this seed grow and you'll see what we have planned for it. In this process the Keshe family will become One Planet family. You'll understand why I setup One Nation, One Race, One Planet. This structure is the beginning of it. Talk to each other. I have seen the Spanish and Brazilians are coming in, Iranians and we see all nationalities are coming in to talk. Try to setup groups of your own interests. **Move into the PI T and not into the Gans and Nano T. In the space you'll hardly change anything into the matter state.** In the space, we see it even in the Iranian Chats. (:42). because I have brought the Iranian team of all the KF Iranian supporters in one group together. That was the process because Iran will lead this knowledge and I brought them into the KF family that the Iranian teams, highly educated people, highly structured in research and development will take the lead with the whole structure of the space T. Our aim is one thing, that our American friends, English, French, Brazilian, Africans, Chinese, that you'll have no more names of nationalities, you have become one family. I have asked the Chinese to post this link that the Chinese can join this group that they can start educating and being part of one structure. Today I am in the beautiful city of Beijing and it's the responsibility of you as KS is to make knowledge the only common denominator and the science and T for the human race, because as you saw yesterday we agreed, the world leaders agreed, we need peace. The interesting thing in the last 7 days we heard from **Donald Trump 2 times** and both talks, (:44). **both speeches refer to the teachings of KF. As I said in the Iranian teachings after what he said, he killed a man. He knows his soul is in a big mess.** Listen to the talk, he comes to it, and for **the first time an American president public opening for a second time confirms the soul.** Listen to last week Friday's speech of him talking **how he killed a man, and in it how he clearly wants elevation of the soul.** So the Whitehouse is clearly listening to our teaching, because now they know they have to answer to the soul. That's why yesterday we saw the end of wars, because for the second, he is repeating it that, we start talking peace, we want peace. Because we have finished with the guns, the only thing left is the peace. This is what we are teaching and promoting for the past years. We have brought the world's, supposedly strongest nation, to understand about the soul and about the peace. It means we as the totality of the human race, including the Chinese, Russians, Africans and the rest of us are ready to go, because **we have touched the soul of the world leaders. In so many ways, we have taken charge,** as I said to you, we'll start governing. (:46).

Governing through knowledge and for man to understand he has to answer to something, he has to ... break ... the biggest mistake made, man by his own admission confirms he has killed 2 men, and to do it he has attached it to any reason. We saw what happened to Obama when he ordered a killing. We'll see what will happen to Trump, he took a life. What I hear, they call the biggest terrorist, who has terrorized humanity for the past century, Americans. Who made a terrorist out of me and then they changed it to a fraud because they couldn't get it terrorized, because nobody believed in it, the kingdom of Belgium. **We'll see that mankind has moved to a fate that will not be able to lie his way to do things. Let me tell you one simple fact. Ruling needs wisdom of collective consciousness of peace from now on. This planet does not need anymore rulers, (:48). because people will work through their own structure.** In the coming we'll learn more and more and be a part of it. I was passing a building recently and I said, how are we going to describe this in the coming time to our children and grandchildren. The Court of Justice. **When we elevate the STM and we put our prisoners into this machine and they understand that they get elevated,** then there is no where to go. What are we going to do with our prisoners. Now that man starts conducting his own way to be correct, courts will become museum places. They'll become one of the most strangest places, man will laugh in the coming time, 'why did they need somebody to judge them if they could judge themselves doing it the right way. It will come to this and the beauty of it is that through the T which we'll release will create that condition. A true scientist, a true man of peace has to make advantage and make best use of the worst conditions, (:50). that it becomes a success for whatever his aim and target is. If you heard what I said in the past few minutes, I explained to you that the KF in the next, most probably 4 weeks, once we come out of the Chinese holidays, will offer you and the world as a whole a completely new environmental cleanup system, it's not new but we gave it a beautiful shape and we've done it in a beautiful way, the way I see it. The Chinese KF meets tonight and tomorrow to complete this. It's a brain child of China, the way the EU stayed with Austria, this is the brain child of China and will come out of China, we already signed a factory position for it yesterday. In this process we are making the best of what we have done wrong to this planet to get everything back right, **by capturing massive amounts of CO2 which created so much mayhem as a Gans, and we'll feed these Gans's back to the oceans and seas and to the environment as a clean energy** that in the process of not only creating CO2 absorption but we **release with it what this planet was short of, into the oceans and the land.** The beauty of it is ?? to cleanup and we use that ?? of the judgment, (:52). of the correct conduct to bring the whole thing back to process. You have seen your CO2, you use it for your pain, or do this, or cleaning the water or whatever. Now this new system allows massive extraction, thousands of liters a day from the atmosphere. Most probably as I was saying, you see the solar cells on the roofs in the cities, you will see Gans extraction units and the same way as we are piping water in to the canals and we are infesting the world and we put chlorination in, now we put energies to change. From 15th of February or hopefully let's say 13th of February, the Chinese team with the new factory we signed in yesterday will deliver as much and as many as we can to produce to clean up the cities. The problems where I stand, today, now, I see the city of Beijing in the smoke with all the dirt. If the Chinese authorities understand what is coming out of China and place many of these on the roofs and on the ground floors and just feed them back into the water systems, in the sewage systems and in everything else, not only we cleanup the planet, we reenergize, we put back in, the damages we have done. We took it as oil and we'll feed it back as, "Gans in." (:54). When you take the C out of the atmospheric condition of the big cities there is nothing

to attach itself wit, so we'll get clean cities. A copy of a replication of this will be made in Iran, which will supply a different direction of this. In the next week or two I have set out meetings with all the Iranian KS who are developing or have developed T that we meet face to face, and that the KF will finance them to start producing the new products in health and agriculture so we have started the commercialization of this T in a way that all of us take a piece of it. In this process the cleaning up has come to us, the repairing has come back to us, if you have 2 cars or a ?? ?? the what we call, "CO2 out" and what the Dutch people call the green house and they sold many trees for it, but we don't know where these trees are. the amount of trees sold for replacing C absorption, whatever it was, this planet should be totally tree covered. But we haven't seen any trees. It was a very good game. Now these units will be in front of you. It is made to work and to replace the totality of what needs to be done. (:56). These new systems we don't patent but we keep our rights to every single one of them and we tell you what is going to happen to everything else of it. ...?? put new life back into this planet. I am sure we are going to have a wonderful time with KF Chinese people together in the next 48 hours to complete. This is a gift from China. **With this process we do not need to open massive Gans production factories which was planned by the KF.** We'll go directly into industrialization of the T while we absorb all the CO2 we need through the development and commercialization of this unit through China. This will bring huge amounts of revenues from the Chinese government and it's been **set in the heart and place of the man who built it up. He's been the rock with the KF and today we say thank you to him. It has to be with him because he put his love and his soul** into it and yesterday we signed a contract, initial, and we'll go for it that this factory will become operational within the next 30 days and you'll see the products. We'll try to show you in Mexico and the agriculture part of it we'll try to show in Africa in Kenya. The head of KF sent me a message in the background, please tell people that the booking for Mexico is open, all those from North America who want to be there please book, then we'll move to Kenya, those who want to be in the Kenya conference please book. The Iranian situation is register yourself as fast as you can because we have to submit data and names by at least the next 45 days with the Iranian government. Those people who are sorting and helping in the background from Iran, they tell us the Iranian Intelligence and Security need at least a month before, at least more than that because it's a very strange thing, Christmas in January, and we get Chinese New Year in February and each one takes a month to ... or 2 weeks off or whatever, and then the Iranian New Year is the 21st of March, so by the time we come back we are very close to the April conference. Sign in as fast as you can for those who want to come, the same with Kenya and Mexico. Our conference in Malta next week is primarily for the Maltese government, (1:00). but as usual before we go in everything gets cleaned up before we get in, we saw this with the day of the conference in Vienna, the government was in election, because out of nowhere there was a mess there and no one was in the government, they cleaned out. Then we saw the same with Brazil, there was immediate announcement by the government that a new group was setup by the ?? and in Malta next week, they have a new government because somebody killed a journalist and they found out it was governmental people behind it. So as we go into the Maltese conference we are just there to meet with the Maltese government in a very direct way because the headquarters of the KF are moving to Malta. We have to know how to organize the new totality and the new government will tell us in the conference of after the conference. We have found a center for the KF and hopefully we'll be able to get it, one way or another, and it's exactly the way I wanted it, where no one needs a visa to enter the KF center for peace and whatever mankind might need, or those who are not

from here. The Malta is too small for massive developments but it will become the center for administration of the KF worldwide operations, the U Council, Earth Council, and those of us who will be alive and will be what we call ??? ...around. Today's teaching is very simple, (1:02). we are celebrating the beginning of the peace, a lot of people were waiting for disaster yesterday and we knew it was not (going to happen). I was sitting in the airport and just about an hour before president Trump was to speak, all the Iranian international flights to Tehran were put on hold or deliberately delayed, all the flights over the Middle east were diverted, and everybody was waiting for a big war. I saw many Iranians sitting in lounges and waiting rooms because everything was delayed by 2 hours after the speech, that if man was going to war, nobody was going into Tehran. I heard in the lounge from the Iranian old couple negotiating with the children, don't go to Tehran, you're going to get killed and it's (going to be) there, and the children convinced the parents to forget about the tickets and go home. I wonder now if they found out what a big mistake they made. Talking to the Iranian communities in the airport, there was a joy. It was a joy of peace and as one said, now we can start living because we won by knowledge, by strength, and we showed we don't need to fight, for that reason I'll make one announcement. (1:04). This will go directly, we invite president Trump to the conference in Tehran. He went all the way to North Korea to get the Nobel Prize, Tehran is the best opportunity to actually getting it. In the coming days the invitation to the president of the US will go, but as we asked the Iranian officials, Ayatollah K, who is the only one who can allow this conference to go through, and on the basis that as we are inviting world leaders they have to be met by the Iranian leadership. We'll wait and see. It has become a very clean cut peace talk. KF the demonstration of new T, Tehran with the power of having the T. As I said we'll start governing but through peace and knowledge. The Tehran conference is the KF showing the T and that other scientists of what we call the plasma T, the Iranian government and the rest of the nations as guests. The problem will be how the Iranian leadership, and only his eminence the Ayatollah K of Iran ..and the KF ?? .. are negotiating in Tehran already with the Iranian administration. We are not talking, because as we said, ?? and our advisors and communications ...?? the fore coming communications that we have had said, (1:06). 'It's no use going to the president or the ministers if Ayatollah K says no, then it is no.' So we go to him and we have laid down the ground very simple, KF T, Iran shows its power of the understanding of the new knowledge, new T and we celebrate that to start peace. There is no one, we haven't had any world leader who has taken his nation literally by the neck and walked it through the most advanced T of the present times development, except Ayatollah K of Iran. We don't have any better candidate to lead the world towards peace the application, implications and development of new technologies. He has done it for Iran. We go by reference. Warmongering we have many, we see one American president after another. When I was listening last week to what Trump was saying that he killed one of the most bla, bla, bla, Turn it back a handful of years, didn't we hear the same rhetoric from Obama when he did Bin Laden. Didn't we hear the same rhetoric when they did Saddam Hussein and robbed his nation. Now it's finished. If we go by the reference, we have no leaders who personally have taken the knowledge, the nation, his nation to the most advanced technological development and he has to be given that chance to do the same with the rest of the world. Don't look at what they made (them out) to be, look at their CV (résumé) and what they have done with their nation. (1:08). Iran through its isolation and its own internal self-sufficiency has reached this position that it could stand and show the power of its might and knowledge, that the biggest nation in the world had to wipe its face yesterday in front of the international (community). 'We do not attack

because no Americans were killed.' Because the Iranians called you 2 hours before and told you to take everybody out. If you do not know that the Iranian government called the officials of Iraq, American, and European Community, 'take your people out, we want to show what we are going to do with you, if you don't stop.' And they didn't kill 1 person .. break up .. ?? targeted tens of rockets to one area where the Europeans and Americans were holding their equipment. That is why nobody was killed. The president Trump doesn't tell you that he was given warning, 'get your guys out or we are going to show you what we are going to do with you, or keep them in there and you'll get thousands of them killed. And like a mouse he collected them and got them out as fast as he could. Because if one would have been killed, he would have had to start the war that he knew he was going to loose anyway. And that came out of the wisdom of the leadership, a man who understands how he can be push people to a corner for peace, and he knows how to get the nations, the most advanced nations in the world. South Africa when they were sanctioned they tried to make a few things but see what happened to it. Nothing came out of it. But now you see the Iranian leadership under AK has a hundred percent reference to lead the world nations in peace and T. (1:10). And the KF KS we work one way for peace and extension of the knowledge that we can open this planet to the rest of its creatures and the creatures of the U. We have no option but to commercialize that everyone can benefit by it and put the seeds of it, what comes from it, back into the society as part of the KF work that the totality benefits by it. I lead the KF by the love of the man and not by the fear of what man might do to himself, because I know that mankind changes very quickly. As you know there is a good opportunity, there is no one to lead the world by creating such a mayhem. They have created a vacuum in the world leadership ?? .. only will come through those who will lead the mankind through science and T and advancement of what we call the STM through space, through understanding of his own space of the soul of himself. Now we understand the next step, that gap exists. As I said in the Iranian teaching, and that gap needs to be fulfilled by a man with the references and the credibility who has delivered. The KF delivers the T, the Iranian government with AK brings the power of peace, (1:12). as a nation. That is the only reason we brought the Keshe T to all of us. Two Iranians can sit next to each other and plan the humanity for peace, prosperity and knowledge because we both know what to do. The message to the Iranian administration is very clear, take the lead and leadership for peace and knowledge and let the rest to be part of the same family. No more borders, colors, races, no religion the way we set up the KF family worldwide operation as of this week. There is no choice, this opportunity will never come to mankind (?? again), and it needs to be taken and to lead mankind in the direction of the new way. As we said, if some of you don't know, and I saw another video recently that reminded me again, the largest ever empire in the history of mankind has been the Persian Empire. Over the 40% of the land mass was run by one just leadership of Koross and Darius and the families. Now we extend that mass to 100 percent, for a just peace and knowledge. It has to be understood that the opportunity has been there, we guided it, we know what to do, (1:14). and now it's time to complete it. The conference in Tehran will be what we call a watershed for peace and knowledge. In the next few weeks as we show you the simplicity of the T as it is coming out, and not out of the most advanced universities and research centers, but out of the KS and common man on the street. The last man standing. The whole structure of the KF is to guarantee world security and peace and knowledge and sharing of the knowledge so openly. Join the K family platform and start sharing how and what you can achieve to show by April, 3 months is a long time and a lot of you know what to do. Already 2 or 3 scientists have been invited to present and the Iranian group in

agriculture have been invited to show. The understanding that we have invited 2 or 3 Chinese scientists to join us in the conference and in that process we'll bring in 'man of space.' I have requested from the Iranian government to show the obsolete nuclear T which the Americans are so proud of. In my meetings with the Iranian teams we structured them that they can show the most technological advancements in their city in the conference. (1:16). I am prepared to meet any KS who are and have developed and can deliver a valid T, then we'll bring it out and support it. The beauty of it is that we have done it together, and we can do it together to bring us to that point. **One of the most important parts of the knowledge .. and it has to be done by the KS themselves is, the structure of a physical home that we can use the T to create what we call a home. It's not by bricks and mortar or whatever, it's by using the MG field systems to create structures, to create divisions or what we call partitions. To create conditions that you can lay the physicality or a place to enjoy.** What we call the leisure side of the KF KS is lagging behind a lot. It's this, (1:18). which will bring what we call the knowledge home. KS if you understand it, **start looking into the leisure industry of the KF, because now that we have no more wars we have to do something to enjoy the time. We have to change the structure of living the way we do and it has to come from the people who understand it, understand the ethos of it.** We need those who can take this to public. Yesterday we had a meeting with what they call the distributors of the KF who have been trying to sell things for years and I explained to them exactly what we need. KF needs a very strong sales team. If you are in that business, join us to promote the new T that people can benefit by it. We have no choice with (out) the wars, the only thing left is pleasure of enjoying the life. When you sit and watch how billions of us have slaved ourselves to be in a place called, the box, to be there 9 to 5 to get something, to have a holiday, to call it a New Year or whatever, and maybe a week to 10 days holiday for what I have done. With 7 billion people if we divided it the right way, (1:20). If we can get 10% of us working 10% of our time, the other 90% can enjoy the other 90%, because the 10% can run everything. You don't need anymore hospitals, churches, and don't need any courts, any this or that, and you can see where we are going to end up. A lot of leisure time as the Americans call it, and leisure time as it is called in English. This part of the T needs to be brought out by the youth of the KF. Imagine computer games, now imagine the next step of plasma games. Those of you who work in the world of computer animation, bring it in the dimension of using the PI. Develop your intellect into the PI T. This is the biggest part because we have many people unemployed and I am not worried about them because we have a machine that feeds and looks after their health, and they work because they want to be busy to serve humanity, not to live so they have something to put in their mouth so that they don't die. Fear of death has brought man to the slavery of the others. At the same time the fear of hunger that they might die, has put the same thing in the same position. With this T we have taken all those fears away. You will understand in a very short time. (1:22). That the only fear we will have is from natural disasters and with the new T we can look after them. They say 500,000 animals in the bush fires of Australia. I listened very recently to a beautiful Iranian scientist when I was in Dubai, that how Iranian scientists are developing a new fire fighting system and they want to integrate it with the PI T that it can do. I said, I heard this before, 2 or 3 different guys tried, but the Iranian guys have a different tone. I am meeting them very soon and in that process **we'll bring a new Gans PI T for fighting the fires.** If you are in that fire business and you want to stop the fires and fire fighting through PI join this team of Iranians, they have already advanced a lot, they can do everything with it because they have the machine developed in Tehran. But now we want to integrate with it what we have now

developed, what we call **CO2 capture to be added in a different way of CO2 capture that there is no oxygen available for the fire to get.** How fast can you stop the fires? In milliseconds, but mankind cannot get involved in stopping the bush fires. If we stop the fires in America on a regular basis or in Australia our ecological cycle will be disturbed, and then we'll have a bigger disaster on our hands. We have to find a way that we can negotiate our way around it to save lives and property, (1:24). but allow the nature of this world, this planet to go through its cycle. Do you remember what we saw in the disaster in the Caribbean's, how it (the property) was protected. The biggest side of this protection is done by Iran covering itself. So it is possible. Now to create conditions to protect our own properties in a perfect way, but we allow the nature to take its course, otherwise the nature will revenge in a very worse way, because you can't stop the fields of the PI of this planet and U, not to do their work. If you pressurize it somewhere else, then it damages something somewhere else. How many times mankind has tried. So if you are KS these are areas where there is a gap. Not a gap. We haven't had time to work with it. The leisure time, the section that is to do with what we call, 'the better existing of the man and his life amongst others.' There is another part which has got to be addressed which is **how we'll bring peace to the soul of the animals using the new T. As we become self-sufficient through the new T that we don't kill. Because we elevate our souls, we have T and we have to transfer this back into the nature that we stop them by receiving the energies they need through the same process as we do.** I think the animals will reach that level much faster than we do because the new CO2 systems facilitate for that. (1:26). I'll explain to you when we go to commercialize it, the leaflets and pamphlets will for it will be ready and you'll understand a very simple point that we can through the same process, fortunately understanding the T, bring peace to animals. Bring it to a position that the animals don't, would not eat each other because through the energy received by them, they don't feel hungry and by the order of conservation they'll control themselves, in their numbers (population). I was watching a bunch of what we call crickets (locus) or what other people call it, eating everything up. Then they said, Mr. Keshe we need help, he is eating half of Iran's agriculture. Now I saw it somewhere else. I said, 'oh boys, you haven't learned.' You don't need to do anything with them. Just put systems in that it feeds them the energy they need. They will be there. That's all we need to do. We don't need to do something to kill them, to control them. Let them be, they'll control themselves but they are fed. If we can run the systems as the Russians did over the American boat (battleship in Black Sea), paralyzed it using the PI T, we can do the same thing with these animals. What did they say, 'it's in the holy books,' that the plague of these animals came and whatever. Now let the plague come and we'll create condition that they take energy from what they need, (1:28). they won't eat (the crop), they're there to enjoy the scenery like you and me. These are the changes that the KS need to prepare for. We have everything. We have the full understanding of the electronics, transmission, communication, everything else, the flight system, everything is there it just needs to be put together that it fits. This is what I keep on emphasizing, the Iranian leadership through the Ayatollah K of Iran and the KF knowledge will bring this together. We'll bring a lot of finances of the world governments to do what is best for all of us. You heard very recently what the guy said, 'we have increased our debts,' by call it the difference, by another 17 billion this year to 600 and something billion dollars. Can you imagine what mankind can do with 600 billion dollars from one nation put on defense, and use it for developing new T. I'll tell what, as I explained to one of my children very recently. People will come and say it's unfair, now they imprison us on earth. Because there will be so many of us wanting to go out (into space) they'll ??

worry about depopulation, the government of the one world government will decide to put limits on it. You can't all go out or we'll die here, if you all go, 'we need people here to run the planet.' How are we going to solve that? It is the problems of the future governments governing this planet. (1:30). Would we go through the process of (.break ..) As you know in the state of Israel, the Palestinians are more than the Jews, but how they got it, is by reproducing like rabbits as many as they could. And many Israelis left Israel, because they could not accept the unjust ruling the way they were doing it. And half of them fled out of the fear of when it happens (the reversal), then what is going to happen (to them). All this has to be part of the past of the history of the man. One of the biggest problems by mid-century or even long before that, is how we'll control our population, what we call, 'flocks out of this planet and sightseers.' It's fantastic when you sit and travel as much as I do between China and outside, it's amazing, planeloads, and the only person who understood how cleverly he could benefit by it, is the Sheik Mohammad of Dubai. He bought all these (planes) 380's, (they carry) 500 or 600 people, and they work one route, Dubai to China and then into Europe. He collects all the fees. Nobody transports more people out of China as tourists than the Dubai airlines, because they bought all 380's. Millions of them (Chinese) they want to see what they haven't seen. The beauty of it is, the Chinese are financing China by becoming tourists. (1:32). Have you seen them, they all want to have a souvenir from Rome, Paris, London and all these souvenirs, when you turn them over, it says, made in China. The Chinese are running the whole world industry partially on their own back and the Europeans say, we have Chinese tourists. Now we are going to have earth tourists, but how are we going to control them. These are the problems for the world leaders to sort out, not ours. Today is a beautiful day and those of you who know there is a figure (number) 9 in today's date, and it means the end and beginning of the new. From now on we step up. If you listen to these teachings it has become very complicated teaching process, to tell you some, to let you understand what the soul does and see what the soul has brought, what commercialization brings you, what we need to do and everything else. Because all the pieces of the T has been taught in the past 15 years, now .. ?? is getting complete, we are putting it together that we start enjoying a full picture and KS you are a part of it. You are the people who instigated it. (1:34). The way you have done it has puzzled many world leaders, how these unknown bunch of groups of people have brought so much that everybody knows, but nobody knows what to do, but in a good way. The best thing that happened to us (was from the Belgium's), look at it was the vacuum which the Belgium's made for us, that nobody wants the thing (the T), or people start looking at it or developing it. Now it has taken shape. We are waiting for one message, for confirmation of it, and this is important for the KF KS. We received a call and as usual we are getting it confirmed if it is correct. The "Cabinarie" of the Italian government has asked me to attend a court case in February, **the case of Fabio has been classed as a murder**. If we get the confirmation of this to be true, because Giovanni has spoken to the police, that they want to be. Fabio's death has now been entered as a murder. **If this is true it will open, in many ways to door for the KF to end the Belgium monarchy because we have enough, all the details for it.** We hope the Italian government has taken that step and as Giovanni is speaking to the "Cabinaries" and I have to attend, if it is through what has happened, then a murder case has started. This was an attempt on my life, (1:36). and Fabio got trapped in it. Sometime in February, we are waiting for it, and if it is correct we'll announce it, that it is done ... They have confirmed that there is a summons and I have to appear in court as a witness. Then the case of the murder is officially opened up. We knew that the Italian government has spent a lot of time and money on this case. We asked especially,

bless his soul, Sandor, to draw for me electronic pictures of this. Me and Sandor went through every possible shape and form of the possible accident, done by design patterns, cars which we drew everything out, and every shape confirmed it was murder. The Italian police didn't let it go, they were doing investigation of it a lot. Because it was attempted murder on my life which he got caught in. If this is true, and if we go to court as a witness, from what we understand it is, then what we told you from the beginning that Fabio's death was a murder planned by the Belgium monarchy to murder me, and the poor chap got involved in it and we saw with Naomi, if this is true then we understand, when I told you, the Belgium monarchy is looking somewhere for refuge. Now we wait and as we go through this process we have asked the family of Fabio to check with the court case in February. You know Italian police don't go into these things if they don't have everything. We have a direct connection, (1:38). between Red Circle and the man who planned the murder. Our security has pictures, the companies, and all the setup, it's already been 3 copied and if anything happens to me the others will take it to court. Officially we'll see if it's true. Giovanni is taking the rest of it and I have to go to Italy to accept the courts summons to appear to be a witness. An official case is being opened by the Italian police for the murder of Fabio. When we told you it was a murder, everybody just said, 'he just talks.' This will ?? it, we know through our own security, they did everything (to check it out), they put helicopters (over the site), used 3 dimensional images, and everything confirms it is a murder. Now the driver, the first time he was brought to court, now he is being brought (back in) for a murder. We can connect him to his boss and we have a direct connection to Red Circle. What we talk is black and white and the boss has traveled to Antwerp and Albania on a frequent basis. To Antwerp only. This is a bigger case and we wait for security reasons, we have spread all the data and knowledge with 3 different groups that if anything happens it will be released. The case is very clear. We thank the Italian police, it has been 3 years to complete this case. (1:40). One does by missile precision, and one does by trucks. At that end they are all terrorists and murders.

Any questions I have 20 minutes and I have a flight to catch.

Q: John in AZ. About the Iranian conference. K- You already booked and paid for it

John, it's too late to ask a question. Q: Do we need to get paperwork for visa's?

Americans are free to travel to Iran. .. You can come in with a missile if your president sends you, we'll accept you, but have nothing in it, just an empty missile, it says John as a passenger. Q: Don't wear a USA flag shirt? (1:42). No, because many Americans go,

I have requested in writing from Iranian officials to facilitate all those who go to Tehran for the conference. I invited and asked the diplomatic officials to facilitate the Iranian

KS to go to the Tehran conference. It doesn't matter what color, race or religion you are it's a celebration of peace and knowledge. Q: So do we need the paperwork? You have

to get a visa, yes of course. Please when you make application write that you are going to the KF conference from 19 to 22nd, it's the job of our KF Iranian team to do this. The negotiation is directly, because if you understand the power situation in Iran the

negotiation is between Ayatollah K and KF, there is no other way. The Iranian governing structure doesn't allow, especially at this height of inviting the world leaders.

I am meeting with one of the world leaders next week for diner. The same structure is that he has already accepted and is coming to Tehran. We'll have a friendly diner in the Middle eat with him and his ambassador and he has already accepted to come to Tehran.

I have invited all those world leaders whom KF has a direct contact with. I think the beauty of it will be, (1:44). if the Saudi Crown Prince attends Tehran's meeting. We'll

extend that to him. It's the responsibility of the Saudi KF to make that invitation. For each KF it's your responsibility to make the invitation to your leaders to attend the

conference in Tehran, because it is your conference, it doesn't belong to any nation. If you are American, go to the Whitehouse and invite Trump to the conference. As a friend of mine said, you know what the problem is Mr. Keshe, the Americans know how much they have done wrong to you they, every time we talk to them they don't know how to react out of embarrassment. Whatever has happened it has all been worth it. Go to the embassy and put the request directly. They might say they know nothing about this conference, it's not legal. Tell them it has gone to Ayatollah K it is his decision not yours. Your job is to just pass the information on. This decision for this conference has to come from the personal decision of his eminence AK of Iran. Nobody else can do this because nobody else has the power to do such a thing except him. I know he can stop people going out or coming in if he decides. He did it with me. When I was leaving Tehran they stopped me at the last desk, which is the office of his eminence AK, I couldn't leave Tehran. (1:46). I remember the head of the AK's office was saying, we are trying to negotiate so that you can leave Mr. Keshe, we have been trying, but he took me back. He wouldn't let me go. They kept me for 3 more days until they negotiated and I could leave. He is a man of knowledge, he can do it. When you go don't be afraid, just say you are going in for the Tehran conference and give them a copy (of the brochure). The invitation to AK soon will be done. The documents were Iranian government, official brochures, it's just done in Farsi. It's beautiful ... Go in, be proud of who and what you are, if you believe in what you are here for as part of the KF. Even the Iranians have a problem, how are we going to treat the people from other countries. We open the channels so you can find somebody (ahead of time) and not go to the airport hoping somebody will come. The Keshe family is a platform for you to say, you come to Tehran you are my friend. find who you are going to house, accommodating, hosting and I am sure, don't go to Iran for only the 3 days conference. If you get to know the Iranians as I know them, it will take you a couple of days to settle in, it will be a couple of days here, they'll take you a couple of days to Sirran, and Istafn. (1:48). Plan it for 2 weeks and not 3 days because this is part of the Iranian culture. We love guests and love to show how we can look after guests. Don't plan for 3 days, it won't be that way if you are staying with Iranians at home, this is what the Iranian officials don't really know how to handle it, that people are taking people home, because how can these people be told this and that when they are not, this and that. It's very interesting and we'll sit and watch the outcome of this. Just go to the embassy and confirm what you are going for and tell them it's already been announced and AK has to decide. You get your orders ?? not from the office of his eminence AK. He decides, I am sure, we'll see what happens. I promised you peace and I got it. This is not that difficult. We are proud, a very proud nation. We are proud that we have become the cause of peace. Any other questions. Q: This is Ted from West Virginia. K- What do you feel about your president humiliating you so bad? Q: Ever since he came into office I have been trying to connect to him on a soul level to push him towards peace. (1:50). I do believe it's possible. Me and my sisters and a lot of people I know have wanted peace. We wish for it in America on our birthdays a lot. It's a common birthday wish, world peace. I am not ashamed, I am very proud of the Iranian and American governments if we can stop fighting. K- I don't think there is a need for a fight, this is, you know, who shows who has something... I think it is more commercials pushing this more than anybody else, the way it looks. Q: I have felt that way, I have been studying the wars since 2001 and it's just that, is what it is. K- I think it has come to an end. You can spend your time now in peace, reading about the peace. Q: Thank you. You have said a lot that we are here because, in a way, of what we are working on, that we are making this condition to our self. I am wondering how the fear of death, you did

mention that we are enslaved by the others because of our fears and hunger, and it is hard for me to understand how just a simple machine, like the dynamic system is able to show us so much through that, how it's able to show us that condition and why the different elements have such a different effect on the physicality, it's like I can't really understand why? K- Because our bodies are made of it. You have to understand the history of creation, it's very simple, as, it doesn't matter if it's on this planet or anywhere in the U, (1:52). **as new elements have entered the body of the man or of creatures, then the body has tried to find a way to see if it can use them to its benefit, or to reject them, to save what it has organized and achieved. The use of elements have been a part of the operation of our life. Now we are making, or facilitating that directly ourselves. We don't wait of the cycle of evolution, we create that condition of evolution directly ourselves.** For the first time we are dictating how we want to evolve, not by nature anymore. It happened and our body changed. We came to see, we have changed, us as human beings have changed a lot in the past 30 to 40 years because of the massive radiations. If you study the nuclear industries you will understand very directly that how we have changed. We see a lot of new things with the body of the man which we could not tolerate before. If we didn't have the nuclear whatever, which we launched, whatever came out in the last century, we would have had a huge dilemma with the amount of radiation which came out of Fukushima. Our body adapts and in adapting it takes its own cycle of work. (1:54). It is part of us and we have to be aware of it and work and live though it. Q: So could the dynamic systems be looked at as K- It's like the U. Q: Is that why the Star Formation is called the SF because I was thinking awful hard about how the SF is like a pyramid, tetrahedron looking sort of think and I was like, I type into Google, SF and I saw this image come up, a spiralization of the galaxy and how all the different rings started feeding back on themselves to create this star, and I started thinking about your patent a little bit and how there has to be, in your patent you mentioned, almost putting in particles, like a dust in the SF and how it is some kind of magic to happen in there, am I close on that? K- It's not that, because we understand, that's all it is, because we understand the work of the U. That is all. There is no magic. This is the cycle and now we have come to understand, this is why I keep on saying, people and the government don't understand, we don't need nuclear. Nuclear is finished. It was part of .. do we still look at the atomic bomb, because now we have more powerful bombs. Do we still look at the steam engines. They served their purpose for whatever reason they did. (1:56). We have now entered a world of Pl, of fields, we call it a plasma. Fields is the way the nature of the U is done. Just because we educated ourselves doesn't mean there is something wrong with the education, huh? Q: Well thank you for being a Pl physics teacher it's very exciting, I enjoy it. K- Thank you very much. I made a lot housekeepers plasma scientists. R- Yes indeed. ... Q: Can we build house and factory size Gans harvesters and connect the output of the harvest to pipelines to the people? That's what the new system is, watch the space in the next few weeks, next 2 or 3 weeks. The system coming out of China with the CO2 extraction, that's what it is. You buy and pay for the system and you put it back in. We cleanup what we messed up, but this time you see it, you do it because we all know the effects of the system. This is the beauty of it. The new system because of the rush going, because I am meeting with the KF China system. They built it for something else, but the opportunity is there to change it to something else, so we saw it. (1:58). The new factory was signed yesterday, we took over and we take over on first of February and you'll see these systems, made in China, helping the world cleanup, and then we feed it back, and it cleans up and it helps a lot of other things. It helps a lot of other things. You have to understand that to reach where we are people

like Guanlyn, Sharyin, Chao and many others have brought this position out and now they have given, they have taken the banner of changing the world by understanding the T and being committed to it. In the next 2 days the structure of the future of KF manufacturing in China will be drawn by the Chinese. I am just a witness to it. This will change a lot of things, exactly what you said. There are a lot of good things happening it's just that now we achieved what we came here for, which is peace and this is an everlasting peace, this is the beauty of this peace. I said to somebody it's just like going for a wrestling and you get tired, that's it, we did all the rest of it, we fought it enough and now we got tired and now it's time to sit down and have a rest and we are all ready for that rest. (2:00). But at least we have solutions ready for it. I think the position set for mankind has been setup a long time ago and now all of us, we are just, are actors to show the beautiful writing and how the play was written. We are all here, not just accidentally, as you understand, now your physicality has nothing much to do, it's your soul which has brought you here. Mark House, Rick, me, everybody else, and we all had to play our part for this to happen. **Humanity in totality had to be in it, otherwise it would have been dictatorship more than what is now. We all want it and we all will get it. Actually we already got it.** From what I heard last night, it's like watching a football match in which you knew you would win, because justice and peace was much bigger than everything else. It's just watching it. It's amazing, I sat and I nearly missed my flight, but I sat in the lounge and I listened to the most powerful man in the world licking his wounds, but still trying to find a way (to cover it). 'We will not let Iran have a nuclear,' he said. We don't want a nuclear, why are you telling us something we don't have. He reminds me of my Mom, she used to make the same pudding, it was nice, and she fed you again and again, but you realized it was not you, it was her satisfaction of cooking something. (2:02). We tested the nuclear and everything else, and now we'll test peace through knowledge and science. Thank you very much. R- We had a request for you to put your microphone a little further from your mouth, actually it was your wife. K- Oh my wife, she is 10,000 kilometers away, she can say what she likes. I am not home I am a free man ... No I just arrived in Beijing today. Next week the teaching will come from the beautiful island of Malta, for a conference More or less teachings will come from one part of the world as we are negotiating and developing positions with governments. It's not easy to be committed to peace needs commitment for life. ... Q: Italy is Canada's intermediary between Canada and Iran. Should Canada pursue a better arrangement or can we even do so. .. We don't have an embassy in Iran we have to go to Italy. Like right now 70 Canadians died, (2:04). in this plane crash in Iran and we don't have an embassy or connection. K- What were they doing there? Tourists. R- Yeah, they were on their way to Toronto, as well as 80 Iranians dies, 170 people. K- Oh, my god I didn't know that. R- It just happened about 24 hours ago. K- Yeah, I knew about the crash but I didn't know there were so many Canadians. R- Yeah a third of them were Canadian and well over half the flight was on their way to Toronto. They call Toronto, "Tehran-to" because so many Iranians in Toronto. ... Q: Italy is the intermediary for Iran because they have an Embassy there, should Canada pursue another arrangement or is it time for a Canadian embassy in Iran? K- I think everything will change from this time. But the Canadians, Italians are Iranians, as I always said we bring them together. Cutting Italy from Iran and Iran from Italy is impossible because we have too much with each other for over 3,000 years. We are embedded in each others culture. But I don't know what it will be, that's a political and dramatic situation. I am sure once America moves back out, he says he wants peace because they have no room for war. He tried everything, he gave his army to the Saudis

and they wouldn't play, he poked everybody up, (2:06). he was waiting for the others to come in, they didn't and he can't deliver much. We'll see what happens. .. 10

.. I have to go my car is right there, we look forward to seeing you next week from Malta. (2:08).

(2:10). Caroline - I would like to thank Mr. Keshe for the peace message and that there will be no more war and we are establishing it through our wishes we are in it together and shining like beautiful souls through everybody ...
