

314th Knowledge Seekers Workshop - Thursday, February 6, 2020

(** The next stage in the opening of the "jam jar" called earth to space, Bill Gates and the spread of Coronavirus.

English Transcription:

(:06). ... We go into the dimensions of understanding the T more and more, and what this new T is going to bring us as we enter 2020. As we head towards the space T, **there is part of the T which has to be understood. And this brings back the work of the KF in the new dimension. This dimension is very important and this understanding is very important. And it brings us to the next stage of what we call, zero time communication and transportation.** We are going in this direction to be able to understand more to be able to prepare the next steps in the space T. What is not considered, and this T, if it is understood, can be used for many other applications, is that, (:08). we have come to a stage that **we have to understand the process of the plasma (PI) technology (T), the process of transportation in PI T, the process of locating and location in PI T, the process of the creation of the conditions for manifestation, or representation, or communication in the PI T. I touched on this very softly in the past couple of weeks,** and now we are going into the steps of understanding in more depth and trying to understand what this means. Just before we started, we had Dr. Alzar saying, they can make an App, and people read it, and they'll recover from the virus. We see a lot of this running around at this moment, because everybody is trying to do something. It is become a world panic, according to how much the panic is hyped up. **We are all afraid that we might get this new virus.** We all are moving, closing borders and countries, but what about, if this virus opens the humanity to deep space? (:10). **What about if, new viruses which we don't know enters our cycle. As I said in a talk to a world leading scientist very recently, mankind has been in a bottle, in a closed jam jar.** When you make a jam, if you made it good, nothing happens (it doesn't spoil), but if you didn't look after it, contamination comes in, and it rots within, or it stays clean. **This has been the life of mankind on this planet, a closed jam jar. Now in fact, we are opening this jam jar and we are taking man into space. We're entering a new dimension of understanding, now (with the jar open), anything can come in. New diseases which we don't even have words for in our vocabulary. New conditions that can exchange our energy levels into a different dimension. New structures which we have no control over, as our knowledge is so weak in the totality of the construction of the U.** (:12). Mankind has to move to the next step of understanding the totality, what is within and what is outside. And understand **the process of transfer, and communication between one plasma (PI) to another, be it information, communication, transportation, viruses, or be it anything.** This is why now we see so many problems as we run from one thing to another, and to another.. and from bacteria's to microbes, to food, to anything else, and the viruses and anything else, and other worlds which we'll make in the future. The reason is that we have not understood the principle. **We have not comprehended that the process is the same,** and that it doesn't matter where and how it occurs. **Part of the teaching today is this. And part of the work from now on, is this, to understand the work of the PI, in a way we go back to Book #3, which is the creation of the man, the U, the cell, and of the matter,** it just depends on what you put in the formula of writing of understanding the truth.

(:14). One of the most strangest for a lot of us will be, is, if in the time to come, **I sit here as a soul, in this part of the U, and I place the soul of your child in another,** and the soul of your friend there, and a family member here, and each one of them is in a different galaxy, maybe in a different part of the U, or maybe in a different Unicose, **how do you communicate? Are we going with the fantasy talk of Einstein, "light-years"? Or are we going with the reality of the transportation, transmutation of the fields in the real dimension of the Creator.** Would you spend a 100,000 light-years, to go from one galaxy to another to see your child, which Mr. Einstein said, through his lack of understanding? Or are we going to stay to meet each other, through the soul of each other, through our great, great, great, grandchildren, in what is said by the G, G, Great grandfather to his son. **The world of science has accepted many fantasies, and many dreams, and many incompetent people like Einstein have made it more difficult for the true science to be understood.** If you understand and you can see, and if you can envision, and if you can reach the point of maturity. (:16). If you look at say earth, every second, millisecond, and every constant of the time of existence in the solar system, continuously considers the position of every moon, planet, star in the galaxy in respect to the position of itself, in (respect) to its sun. **There is no more sitting in the center of the earth with the central control, moon has moved a few millisecond, a few millimeters and now we have to adjust. If you look in the structure of the earth, in respect to its sun, and in respect to other planetary systems, continuous strength fields, positioning, gives it where and how it can interact with whatever. Simultaneously and instantaneously a new position for this planet is considered, not by control systems but by transmutation and transportation of the elements, in the strength of the field of the plasma.** If you look, for example, during the winter time on this planet, we have the production of different fruits. Different conditions of environment because at this point, all the time, every year, and every position, it doesn't matter if Mars moves to new position and Venus goes to another one, (:18). it creates its own condition to create that material, according to the control of itself in the balance of the fields of its own central MG field force. But we say, things have changed this year, last year there used to be more snow and before we had everything else and bla, bla. **In reality those are the interactions of the other systems on it, but it is instantaneous. It's position understanding, of its own field strength, in communication and in line with every single element, instantaneously. If we look at the life on the spaceship we call planet earth, we have already been living in an instantaneous zero time communication.** We don't need to look far to understand it. We live in instantaneous zero time communication between planets. We live in instantaneous and simultaneous time, zero time in energy transfer, **because the energy given by one of these fields, dictates where the earth is going to be in respect to it, and the in respect to the others, because my position, let's say, as Jupiter is for you Earth, to move slightly that way so I can keep my path of work.** (:20). The Earth accommodates instantaneously, the **Sun holds and vibrates. In the future when mankind understands one thing, you'll see the sun is not steady. The sun moves in different axis's in a massive volume. It's not that the sun is in a constant position, it's dimensions of rotation is millions of kilometers. It vibrates,** and if you look at the solar system with the sun in the center, the sun moves quite a lot. It's like what I have called in some the teachings, **it's like the gymnast on the rope balancing itself. The rope is a guideline, but the dancer on the rope vibrates to keep its balance,** and this is exactly how our sun behaves in the solar system, of its own, in respect to the fields from galaxies and other stars and bigger forces. At the same time, in respect, trying to keep the earth in its position, that it doesn't fall in. Therefore,

if we understand this, **mankind comes to understand that he is already part of the zero time communication, zero time energy, and zero time transportation. (:22). because our own solar system itself, it has to accommodate itself into the field forces of the galaxy and all the stars in it.** Not only that, its fields forces to exist, to confirm its existence, pushes the other solar systems to accommodate it, even though they all work towards the direction of the central point of the galaxy. Then we come to understand, we as the human race, as part of this structure, on this little tiny things with our soul, we are subject to the same thing. But in the dimension of the man we consider it, as what we call, **dancing on that rope, as a balancer, gymnast we call it emotion. Our balances, is our emotion. Emotion is built in the body of the man to be able to, without falling off the rope, balance it. When you feel happy you go this way a little bit, sad a little bit that way but you still stay alive on the rope. We don't fall off. If you fall off you call it a dead body. Then we understand death is the collection of the balance of the emotion of the man in transferring the energy of the STP to the STM. Then we understand why infants at the point of birth, die, and why some of us live hundreds of years and still survive and live. (:24).** Then we understand that we are nothing but a bunch of what I call acrobats. But **the balance of acrobats comes through the emotions. It comes through the understanding of how I want to live and I interact instantaneous, and in that position, so are the fields of the body, the STM in respect to the souls of every other things, in respect to the soul of the planet, the U and the rest of it.** If you look at it, it's very simple (draws a series of circles) we are a bunch of acrobats on a bigger size scale of the field strength, starting from man, to the planet, stars, galaxy, U and to the Creator. **Even He has to play acrobat to keep you in the position.** If you understand this, it is very simple, we are already in possession of zero time communication and transportation with every structure in the process of the creation, even to the Creator. Then the knowledge of man comes to one reality, to **find which field, which comes from the STM, connects to which one. (:26). So we will understand that we even have a direct access to the soul of our Creator,** but we have to find the fields of it, and the strength of it. Then we'll understand in so many ways, how **we can create the conditions of, without any systems or machines, to be able to transport our emotion, our energy, our communication to anywhere across the world of creation.** This brings us to another point of understanding, and that is, that **we have understood none of it.** In fact we have understood zero of it, zilch. With all of our cleverness we have dug ourselves deeper in the sands of ignorance, than in the mountain of knowledge.

With these teachings **from today onwards, with these teachings** we have started years ago, is to bring man to this point. To bring man to the understanding of the man and the STM to this point. But as I said many times, in Farsi we have a beautiful saying, (:28). it takes 14 intelligent men to take a stone out of the water well, which one crazy, stupid man has dropped in. It has rocked (muddled) the water for the rest to enjoy. We have **many of these stupid people in the cycle of the science of the man, like Einstein and Stephen Hawkins,** these are the present people who brought this. In the past in the US we have seen people very much like Edison, he was another one. They brought a lot of things to satisfy their ego, or bring other things into it. If you read the history of the man, this has been so for many years. **We have seen that many people who could understand the science have been eliminated, by those who want to control man through science. Then we understand it's us who allows these incompetent people to dictate to us, and condition our understanding the world of the creation.** The total world of creation is not what we have been forced (to believe), but it is what we

can feel. **The best peer reviewer, the best understanding of the knowledge of creation, is the STM himself, because it is it, (the source) that dictates the conditions of man on this dimension of physicality and beyond. So he has a lot of intelligence.** We have become the young child in the house of all doctors, and he wants to teach everyone the medicine, (:30). with a zero understanding, of even the creation. The process of the teaching in a very mild way, in respect to zero time communication, energy transfer, and transportation has to be learned from the structure of the STM, the structure of the planet, sun, of the galaxies, and not by meager understanding of ignorant people like Einstein. Because if we go by his say so, man will never develop. Man can't even imagine beyond it.

If you look in the total understanding of the knowledge of your own soul, and look at your understanding, even of a small magnet, you'll understand that mankind should have understood this principle, centuries ago. But through religious dogma and so much jealousy of the others, that somebody understands then they do, we have blocked many new understandings of the reality, to add up to our own strength, to our own knowledge as a human race. **If you look, if you understood, if you can see the totality of the work of a magnet and the STM, (:32). there is no difference. One is dimension of M fields in the matter state, and one in the PI condition of Inertia,** one is MG field strength, and if I draw you the shape of the head of the man, you'll see the same. In the brain of the man, the physical connection with the hands and arms and whatever, sits on the fringes (of brain) to the matter state. The strength of the arm (at the outer edge) to the center. When you have a stroke, these are the fingers, these are the upper and lower hands and arms. So in the solar system or in a magnet, gives us a very good indication, even in the STM. **On the fringes of your soul energy, you deal with the weakest in the matter state, physicality of the Man. In a bigger strength toward the center you deal with a position of the interaction of the STM, with galaxies, with other souls, and then if you can find, (:34). the strength of the soul of the center, this is the line into the Creator.** We say in every man and in every soul of created things, there is a line strength of the Creator, and this is how it works. Then we understand that with the physicality of the man it's the same. The media we use to transfer energy to the strength of the physicality, what we call the transition time, in the body, we have called the brain. In the STM it's more or less completely the same too. At the interaction at the fringes of physicality and the PI, man controls the physical dimension of his existence we call the body. In time when the scientists develop the same system, they will see the same in a magnet.

And for every creature, everything that exists in the U, there is 1 cell responsible for it, that in totality, how this responds to another soul, everybody else adopts and adjusts, even to the feeding of the Creator. The pain (.. break connection ..) by the Creator. In that respect, to adjust to that pain, (:36). mankind has been gifted, a new message, and when the man understands this, the humanity, the soul of humanity will move, by moving one of these cells to a new position to bring comfort, and opening of that jam jar, as I explained in the beginning. Now you understand.

From now until the Tehran conference, from now until coming into the understanding of the totality of the knowledge, mankind has 2 choices, (break) we go on the track of war, or we take the lead to understand the new knowledge of the magnet, the plasma of the STM, or be it, the plasma of the creation of the Creator, then the new job to the world of science... (:38). (break...) And then if the man can

understand this, man has entered the dimension of realms of men of universe. In the realms of understanding the creation and the conditions of creation.

When mankind comes to build the new flight system, those nations who sit on the path of peace will achieve flight, because the soul of the plasma of the system they create understands the purpose, not the hidden agenda which still has access to it thoughts and understanding. It's to understand, is the position, to be afraid is the weakness and reduction in strength of comprehension. **If you understand this, we come to it. We will see this in the human race, we have seen this in the very past few days.** We have seen in the behavior of the world leaders, and we have seen in the man, in respect to the leaders. (:40). Because we feel and we know their souls, but we allow them to be. We put our own self interests ahead of the totality, and the space T and the development of the space development of Pl, will not allow this. **Man will not take into space, into the Universal Community (UC) until the totality of the souls of all beings on this planet agree on peace, and agree on collective working together.** You will understand this more and more. Nations which are truly peaceful will take into space very rapidly from now on. **Nations in which the soul is to stop the suffering of what has been forced on them will take up (the T) first,** because they know the value of peace and education and understanding the knowledge of the creation. It's a gift, a man gives by his soul, and by the soul of the collective, not by the word of the collective. **As we know, man speaks different through the word of his mouth, then the action of his soul.** (:42). Then what becomes important in the new space research development is very simple, to develop T very rapidly and to understand the strength and the STM to his center, the strength of different dimensions in the work of the U, space and dimensions in the work of the galaxies and understanding the transmutation of the fields, not to matter state, but to the plasma of the energy states. Then if you understood this, we come back to one point, give me time, you are in one galaxy in one part of the U, and your son is in another, zero-time (communication), we meet for lunch with the cousin somewhere, together in another point of the U. This is not a dream, this is now for man to understand and to achieve. **Man collectively put all his energy to create a nuclear bomb to kill the others. Now, man can do the same with the dividend of the peace of the collective consciousness can achieve this in no time.** The teachings from now on will be in that essence. I have brought you in the knowledge, that **you started with the Gans's and the balls. Now the ball is getting bigger.** (:44). **Now you have to understand which Gans and which field takes you where. Now you create the Gans's, now you have to understand the operation and strength of each Gans in the environment which it works, that it allows you to reach to the Creator, or the sun, or create energy, or zero-time understanding of another soul in the dimension of physicality.** We take, we hype up, step up to the next level of knowledge. We came from matter to energy and energy to matter, now we have to understand which line of the energy leads us to each matter, lead us to what condition, to where to understand more about every dimensions we need. Instantaneous education of the full knowledge of the U in the position and the direction which the man needs.

We have seen this, the mayhem that man gets himself into by himself in the past 2 weeks in the government of China. **The Chinese leadership has become a shamble, in trying to control a simple virus. Incompetence in management shows itself across the nation, because the leadership, if it would have understood this, would have prevented it instantaneously, but man is in the grip of pride, (:46). and possession,**

and until that point, man will go. It's very interesting when you read in the press, **Mr. Gates has put a hundred million to support the virus in China, where he earns billions on spreading the virus in China. This is being aware of the STM. The reality is, nothing can be lied to us anymore, as man has accepted too many lies, and if you understand how to lock into the soul, to the line of emotion, people like Gates, will not exist in the stage and the development of what they create for physicality. Maybe the man has a hidden agenda, but not his soul.** Many of you have come, understood, touched, and some of the **U Council members** I see developing to that direction, and some of them, through the false understanding and misguiding themselves. Some of you who have learned in the dimension, (:48). of creation of the contact and soul, be it, those who choose. In the work of the U Council we'll say I wish, and I wish your wish, and I wish, wish, wish, wash wish. But what, if you understood what was taught today is very simple, **Trump is a white man with English language, he is the responsibility of the English spoken (language) of the U Council,** when you support through your soul, the connection of the wish of the UC member, to change the soul of the Trump. (If) you never reached, it means you have not understood. **You reach by strengthening the soul of that member, because you understand as the points of the U, you are connected. You took a commitment to be a member, to support entire, and then you'll understand, if you understood this process, the wish, if it is the true wish of the UC member of the English speaking language, will translate into the woman of the president. This is how you change the world leaders in the future, not by elections, but by clarity and understanding of the totality of the collective consciousness.** This is why we created the universal language as a UC, because you are all part of that brain structure, (:50). which has to work through one. Collectively, it creates a bigger mass of the fields, that can remove. **If I wished the removal of president Trump it will be done by tonight.** But he has a game to play and **we need him in that point of destination.** Soon you will understand. We saw him by cheating or whatever, going through the voting last night. But **he had to be there, because we have to have him where we want him, the way we want him, to achieve world peace.** This is what we worked through as outside connection, we'll leave the man to learn the inside connection. **You are that earth, which moves a little, the sun, to be able to keep your position. We are the outside, which makes him vibrate to the position we like.** The teaching of the KF is a collective teaching and it brings everything together in all directions, but we teach in bits, and in step by step. Then you understand that life is simple. (:52). It's the man who has not understood the totality by questioning himself. **The missing link is mankind, his own understanding of his own creation in all dimensions.** Now those of you who have understood this, it brings you back to one point, where would you like on this board to be? In line with your Creator, or in line with your son and your cousin, or in line with the U Council. And then something comes that is very important, **what is your role, what is the role of your soul, in all the structure of the creation?** Do you need to clinch on to the intermediaries of prophets, mullahs, priests and the rest, or have you matured enough to find the line of distinction, (:54). and the line and path of knowledge. As we saw in the Tuesday teaching, **another magician jumped up (from Breathairen Institute, 103 One Nation). Would we call him the new prophet or his prophecy became profitable overnight. I promise you,** those of you who can follow him, what he learned in that teaching will become part of his teaching, because now he thinks he learned a little bit more, and he can create more magic with ?? it.

Any questions?

Q: This jam jar that you were talking about, do we have to take the top off ourselves, or will it be taken off automatically? **K-** Do you still needs a magician. **Q:** You talked about a rope and moving like an acrobat, you said that is why a child can die at early age and someone else can live for longer, you didn't explain why and how? **K-** I thought you understood that by now. **Q:** If I understand the PI T then I should be able to do the zero time communication, transportation, all that right now, there is no ..? (:56). **K-** **You see. this is still in the dimension of physicality. You want to see it, to believe it, but shut your physicality down and see what your soul is up to, you are already doing it.** **Q:** I understand that I am already doing it, because I see the result, but with everybody else, is it going to be all at the same time, or **is everybody going to be on a different page or strength?** **K-** Of course, it's not communism in the true sense is it. **It's the freedom of the choice of the fields. you choose according to what interests you and what is beneficial to your soul. If there wasn't such a choice, then it would have been one Creator on his own.** **Q:** In this process **how can we help others,** people who understand, can help others? **K-** **That is something that each man has to reach that point by his own soul. It's in the writing, 'independent investigation of the truth', otherwise, because your father was a Moslem you become a Moslem, then your child becomes a Moslem. He is not allowed to do, to investigate and understand,** having moved a step up, that we can go further. Or does a man stay Moslem for the rest of the life of this planet and the U.

This is what we put to the world religious leaders, according to them, nothing can change, because if it changes then they have no power. (:58). If they accept that the time is for the maturity of the man, then there will be none. At the same time most of those who are in the position of power in the religious sections, which controls the STM, they've got their hands in so much criminality and wrong doing, that by them stepping down, and it comes up they know, they'll be dug in the ground. The denial of the new change is to save their own neck from what can happen to them. It's not out of the fear of man to succeed. It doesn't matter which path you call yourself, **be it the political, religious, or any other kind of leadership. The biggest fear of Vatican, now they are saying, the Christ will never come back, because we have done so much bad, that Christ help us, what are we going to do, if he comes back.** Would it be the only solution, as we saw with the Japanese Samurai's with a sword and a knife kneeling in front of your own soul, to submit. **Or would the mankind forgive. Or at least start a new cycle.** As you hear, a lot of things are happening, **because we have raised the level in a different direction, you heard about the situation in Belgium. (1:00). A king has lied to his nation for so long,** but the worst lie that has come, that in confirmation, **has caused the heart attack of the queen.** The queen very recently had to be moved from where she was, back to Belgium, because of a heart attack, accepting that the husband has never been there, now she has to accept a daughter she had nothing to do with it. The mayhem and turmoil in the Belgium monarchy is beyond belief, as we see it, we get reports of. A queen wants to kick the king out. How many more you have (children), I don't know. Who else have you been busy with. Read, very recently she was moved from Venice out, due to a heart attack. **They'll bring their own demise. This is what will turn, this is what sits in reality with a lot of these people. The world leadership has to come with the leadership of the STM alone, and no one to dictate to it.** And not jumping into whatever it brings you. I was talking to Caroline this morning, **I spent most of my business life in a very different way in the oil business, (1:02). and everyday as a major oil buyer, we used to get offers, millions of barrels, we knew it doesn't exist, but everyone was in**

operating in it, because they knew you have facilities that you can buy and sell, and refine, or whatever, and everybody was in the oil business. Millions of barrels. And since the past couple of days, because of the situation in China, and people knowing our contacts in China, now we are getting the same millions, but now it has become face masks, not oil, because it doesn't matter how much oil you have, you die, it is no good. Now they are dealing with fake, nonexistent facemasks, 100 or 10 million, it's just like 100 or 1 million barrels of oil. **Man just changes because he doesn't want to face the reality of the totality. It was very interesting to watch these offers coming to us, Mr. Keshe you have connections with the Chinese government, we can give you 2 million, how much would you like to pay for it? I said to Caroline, you see my old business, it's just the barrel has changed to face masks, burning it to saving life, hopefully.**

Very interesting is, the generosity and wisdom of a man and a nation, not abusing the power, but still being in suffering, helping those who created your suffering. This is the true man. (1:04). **This is a true, what I call, being to exist. When you can help those who created your suffering, to reduce their pain.** Then you'll understand who is the true man. We have seen **none in the world leadership, except one.** And own day I'll tell you who, which nation and where and why. Now they have to live in the world of the shame. Putting, serving, and that the serving is very simple, it's what I told you. (draws circles and forces finding balance with each other) **This is comfortable for me, but this has caused pain for me. Shall I give enough to elevate it, that his pain, and me helping, because for him to find a new balance in respect to his soul of himself, and in respect to me. Don't look for others, look inside yourself through your soul.** Then, if even you understood the teaching of today, (1:06). **if you look at every single page of this screen, I have shown you zero-time communication, transportation, conversion, and zero time transmutation. This is a page of the knowledge of the U, for the first time opened to the man, for him to see.** As I said, the question mark is, the man himself, then you see the picture is complete. **We have not understood the work of our soul, or the work of the soul of this planet, or the soul of the U and the rest of it, that with it, we might understand the work of the soul of the Creator. We have damaged the soul of our own creator, which is the planet, and we expect to move up. We have caused suffering for the soul of the children of this planet,** which are other men and creatures, and we still expect to go up, when is the jam jar top is going to open? Has the man made the jam without infestation and bacteria, that when he opens it, it doesn't contaminate the rest (UC), (1:08). let alone. not getting into the jam jar. We want more and more, but we don't even understand what we have less of, **greed of the man doesn't only go with his physicality, it tries to get it into the dimension of his soul, but it doesn't work.** But at the same time **you have to look inside, what have you done, that has brought you to that point.** As I just said, the queen had a heart attack, a stroke, but has she told the king she played out when he was busy playing out too. Then we'll see if the king will have a heart attack. **The biggest heart attack will come when the second and third hidden children come on the plate, in Keshe court cases in European court of Justice. Because these are part of those who touched the KF.** I knew through my soul that I had to take the time, because everything and all connections have to be made right, (1:10). for the time, place, and position. As I told you last week, very simple, we know a lying king, who has lied to his nation with a daughter, we know there is one more boy called, Mr. Di Grabba ?? We know this touches the soul of the queen, but **the queen has another child by another man, called the king of Persia.** What heart attack he is going to have, when he hears that he nourished another man's child, and called him a king. The thing is **he has already given**

the DNA as a civilian, and any document in a civilian court is a public document. We can test these very easily now in the court, because this man has played with the KF. Now you can see the end of the kingship. Now you understand what was hidden. It doesn't matter if they eliminate him, his documents and saliva, and blood tests are in the public court, as documents and we can all upon it. And she is a civilian, (1:12). and we can do the same. Now you understand **why there is so much opposition from the Belgium's on the Iranians and the rest, because this boy, the king wants his brother at the throne in Iran.** Now you understand **why KF ever came to be in Belgium, the plan to get rid of kingship, in all dimensions. Man's king has to be his soul and his correct conduct, and not be king by murder, rape, and abuse.** I can draw you more about other world leaders and you'll understand how we got a hold. **The Tehran conference is not just a peace conference, it's the end of kingship, and the end of one man's priority, in soul and power of physicality.** You'll understand soon.

Because now we go back to a very simple thing, which sits here (brings back the previous screen with drawings of the souls creating balance). **We have already made all the matter states and the human souls ready for the time. (1:14).** Because each one has connection to every single soul on this planet, and those sufferings, man has created in the U. Now you understand more. **We took the man of the earth into space (before), and we saw them carrying on with the same criminalities in the distance, so we came to cleanup the mess from the source.** Six thousand years is nothing, but for man it's a life history. **Putting the same soul in the name of Christ, Mohammad, and Moses and the rest,** is the game man likes to play and be happy with, but in essence it is the same soul. This is where he said, very simply, I'll see you in 622 years, and I'll see you in 1,200 years, and I'll see you in another name, in a thousand years, because it's the father, and that soul has dictated where he is going to be. Nobody needs to tell you, that I am going to see you in the restaurant tonight, and I'll be another man, when I see my son in another restaurant tomorrow at lunch time. It's just me in different positions because I have decided where to be, **and this has been the same with the soul of what we call, in essence the True Messenger. He has appointed the time and the day, where he is going to be,** and then you call it, the verses in Hades and chapters (Islamic holy writings). If he decides to appear in the dress of a clown in one, (1:16). and in a business suit in another, that is his problem, not yours, he appointed the time and the place. **Now it's the time and the place to bypass all the mistakes of the past. Because he has decided and no one else.** Seeing him as a fire and lights or whatever, is his decision, how he entertains at the time of the Presence. Any other question?

For those of you who listened to **the situation that is going on in China and the spread of the virus, the KF has developed the machinery to disinfect en mass, which means there should be no worries for anyone.** The machine has already been made, very simply done and will be released to the Chinese government sometime today. If and what we see, the incompetence in the leadership in China carries on the way it is, (1:18). and so many people suffer. **This T will go through the Iranian government to all the nations** around the world and in conjunction with our manufacturing base in Austria, we support the T. **This is to stop the infection from entering, or goes, as we see, this is a selected virus for the Chinese blood only, and the only system which can overcome the modification which was sponsored by Rothschild's family and the others to develop this technology and to assess its damage through MIT, will be overcome.** This is a tailor made virus and we have to be

on top of it, and it has to be, once they change the tailor made, who is the next victim. **The Rothschild's, Rockefeller, and Gates Foundation sponsored this disease, with this virus, without knowing that the KF has developed a T for viruses.** It's a shame so many funds have gone into it, but on the other hand it's a pleasure to see, that we can be tested. **If you or your nation gets hit by this, advise your people to speak to, if they don't want to speak to KF,** they can speak with the Iranian officials which will operate through the KF contacts and operations. **Those who boycotted and caused suffering to the nation of Iran, will beg for the life of their nations, (1:20). not to be boycotted by their own lives. As I said, it takes one nation that will respond, and that will be the Iranian nation. It doesn't matter how much suffering was brought by other nations in the past years, still the door of knowledge and T to overcome this position will be handed out and given by the Iranian government to those who created the boycott, out of fear of their own misfortune. ?? At the moment we cannot help China, because the Chinese leadership is in turmoil of who is going to lead more disasters.** They have to sort that out in themselves. The incompetence has lead to more suffering, and that is their problem. But outside China, (the virus) because it is tailor made with the Chinese gene, now will move next, out of China, **in the next year, maybe sooner, into Russia, into Arab nations,** and every other thing. What we have seen with the **American virus injection, actually gives life to patients for 3 to 7 days and then the patients are dying with suffocation, with 20% oxygen in their blood.** What the government in China is doing, is they are saying, the temperature is okay, go home, and the statistics of those who die after 3 to 7 days in their homes, are not considered as (part of the virus). The total death toll passes millions at the moment in China. **The count, today, is only of those who die in the hospital and not those who said they have been given an injection and they die at home, due to lung failure and lack of oxygen. (1:22). A Trojan gift by the American administration, or what we call, Rothschild's, Bill Gates organizations and the rest of it.** If you look at it, we give a hundred million to the Chinese for the virus, that hundred goes to buy the American injection which were made to kill more, that we can make more. The game is so dirty. The T overcoming the virus, we taught you the Cup of Life, now **we have developed mass production systems to cleanup the environment, hospitals, and ports. All you need to do, is to literally walk through a tunnel.** You breath. You see this injection they give for the fever, it sorts out the fever, but this disease sits in the lungs. The lungs collapse, then they get rid of the fever, but long term the lung is damaged and they die at home, but this part is not considered. It's very much the trick they played with chemotherapy. The chemotherapy is successful, but they don't tell you that it kills you with a small infection 5 years down the line, because of, effective killing. And we see the same things with these injections from, (1:24). America, because yes, it is a paracitimal and a bunch of other things mixed up together. What we have requested from the **World Health Authority which is run by a Rockefeller organization, as their private game,** is very simple. **We request the following, what is the amount of Mercury in this new vaccine, the amount of Cu, and Zn in this vaccine. We also, want to know the combination of Phosphorus used to effect genetic deformation. This is the responsibility of MIT to give us of this information, because they tailor designed this virus.** There is a certain amount of lead, and mixture of Aluminum, used in this vaccine, we want to know. **Any organization in the world who can get hold of one of these vaccines and give us the Raman Spectroscopy of it, as we have asked the Chinese government, will give us indication on how they have tailor made to kill.** Don't forget that Mercury was part of the 3 M injections (3 in 1, vaccinations for children), that caused so much problems for

parents. Now they have added it in a way, and loaded it up to the virus. **This is how this virus is killing and it is so bad. Because this part (Cu) is connecting to the muscle tissue, (1:26). this part (Zn) to the lungs.** You'll see when the analysis from the Americans comes out, and the virus and the energy levels, we are 100% correct. **They create rapid genetic defects in the lungs, and that causes the death. I know how they made the virus and I know how they are using the antidote to kill more. As I said in the teaching last night, MIT has to be closed. It has become the center for planning mass murders in a biochemical and bioplasma technology way of the virus.** I raised the red flag on MIT years ago and it stands much stronger with this virus, because even **the study of how many people will die by using it, was done by MIT 3 years ago. According to an open study, they even forecasted that 60 million will die, and according to uncontrollable studies, 600 million.** I said to the Iranians it's a very nice time to play the game, isn't it, but we don't play that game. (1:28). Do you want the T to look after you, break off the sanctions, and then we'll sanction you for selling arms. Let me explain to you, for those of you who don't know, I know that many Iranians know, **the only masks, more or less, which can, at least stop the size of the virus from crossing through the masks, are made by the Iranian scientists.** They're called Nano masks, and there are about 14 or 15 machines like these across the world. It's developed by the Iranians, the Germans did the original ones, but mass production now in this size is by the Iranians. If you go to the news the Chinese Prime Minister and foreign minister, has called the minister, Mr. Nassy, some 48 hours ago, to guarantee and thank Iran for supporting China with the virus, and to make sure that the Iran factory made Nano layer masks are shipped to directly China, because they can't meet the demand. **At the same time, the same nation that is asking for support, has put a ban on everything from Iran in China now and outside.** I said, knowledge against peace, I wonder when the Iranians will become wise to it. There are a number of these machines in Tehran and there are 6 in China as we know. As I said, 'we boycott you and don't let you sell anything here, but can you help us to save our people with what you make.' No one will do this except the Iranian nation, even helping their own enemies. It's a shame to be a Chinese in that level, by the administration. Now you understand, **the Iranian culture sits by its word, (1:30). talk good, do good, and think good, irrespective of what happens outside, time will change.**

Any other question.

Q: **How do we access the STM, is it enough to wish for it?** K- Caroline disappeared yesterday to meet a veterinarian and she came back she was so excited is she on the line, I think that is the only way I can explain it. . . . (1:32). .. As I said ... when the veterinarian raises her hand in front of the horse and says, 'I wish you will heal and help', and they change. Caroline says to her because you have found the strength of the soul, and have strengthen the soul of the animal and through that he finds his own wellness. So you have actually understood the soul of the horse, you understand it to create that condition with it, through your soul. .. you should have seen how happy the veterinarian was, she was not aware of her own capabilities. We saw this with another man in Belgium, ... he does that with the horse. (1:34).

Any other question?

We can reach any the soul, because all the souls of created things, have a link by dimension, with us. How many times have you walked into a position and said, my god why am I here, what made me to be here, and then you see the result, because the soul organized for you to be there for you to see or experience that thing. Then you think, 'I have done it', no partially as I said, **your soul, (1:36). guides you and your physicality**

rides you. And you, is something in-between nonexistence and existence, what is called, the man. I explained this in a very scientific way ...

If you look in **the structure of a nucleus, this is the field barrier, not a physicality, we don't have a physical position in it, in a nucleus. You'll find out, that there are many protons, we have many equal numbers of electrons, but the accommodator and holder of these two together, are those who, in the world of science have never understood, and we call them neutrons.** It's the neutrons, with their nonexistence, which creates the condition for, in a way, for these connections to stay (protons and electrons). Without them (neutrons), collectively, connecting to these, everything falls apart. (1:38). Each one will pull its own electron apart. **The neutrons are there to balance it even though they look, nonexistence. This is the same with those we don't see, your neighbors, the man down the street, the cleaner and the bus driver. The presence of their soul creates the balance in the soul of humanity.** This is what mankind has not understood. Why do we need more billions, because we need these neutrons that in the future they become the new cells. **At the same time, at this moment they hold the gel of the atomic nuclear structure together. No creature on this planet exists for no purpose.** Maybe it looks that way in the dimension of physicality, but in reality in the dimension of soul, he is that neutron, he is the glue to keep .. you need so many glues to have there, to create a condition, to create a leader, to vote, to be what, to be Christian, to be, to believe, to create Christianity, Islam and the rest of it. Then you understand, why we say, why are we created here, why do we suffer, it's not the physical existence, it's the existence of that glue of the soul, of the existence. Even the ants "glue", counts in the totality if the soul of planet. When mankind understands this, then he will have matured to the truth about the world of the creation of his own meager position, let alone the soul, (1:40). **Then the soul of this planet has the same meager "glue" in the creation of the galaxies, universes and the rest. At that point, it is just a neutron, but when the energy of this (proton) is used and consumed, and this (electron) moves to another dimension to become another neutron, this (neutron) becomes the queen. Then you understand what is the purpose.** Then you understand why that soul was put there. Then you understand why mankind history and life have been set. Man is ignorant to the truth of his own creation and that is the biggest problem. **His being correct (in conduct) counts, in being correct in time of need counts, because that is when the elevation of the soul comes.** (1:42).

Any other question?

In today's teaching, **I showed the secret of creation in the line of man's physical need, but he has to understand that existence in physicality is a burden, than actually a pleasure.** But it is for man to understand the separation of the 2 and chooses the time and the space, and the place, to convert and go through the transition if he wishes so. But **mankind has the same dimension, and should be able to return back into dimension of physicality when he feels so, but, in so many ways, it is done for fun, not by obligation.**

Q: ... When **the spheres of M and G cross each other, they create a vortex, the sounds and images we see in our dream, or the sound we hear in our head,** these are basically these vortices, that we hear, the ones that cross. (1:44). We don't hear anything in our ear. Also you mentioned here, that we go into that vibration ??? so we go more in a way, we go inside to be more ?? but how about when the soul comes out,

the energy of the soul comes out to the boundary, do we hear these vibrations or these voices more often?

K- It is always out, it's just at a weaker strength, we call it aura. It's always out, it's just how much we reduce the dilution of the field strength of the cells of the brain. If you go back into the history of man, a few times we have shown this, but those who have been witness to it, could not understand it. In time and the place, if you understood, when we say the position of the STM, which literally sits, when you eat, in your head. In the **mythical way, in the Chinese language we call it, Fire Dragon, in which the fire comes out. This is for those souls who matured beyond the physicality, that when they speak through the soul of correctness, because, dragons in the Chinese history language has a, carries good with it. So you wait to see, the light of the soul, and there are still some who can reach that point.** the condition, (1:46). **this brain, creates too much filter, they show the light through their mouth, what we call the fire. The same fire we saw with Moses, but the Chinese have changed it into their language, into a dragon.** If you are enlightened enough that you can see, and you see the physical dimension, the world of the man, the beauty of it, is that fire, if he understands it, that it comes from the STM. In Chinese theology or whatever they believe in, they transferred it to the fire of dragon. That's the fire of knowledge, the fire of existence, of the knowledge of the STM, not the physicality fire of itself. The Chinese changed it into a dragon, the Jews to a burning bush in the mountain. But in essence, **it's the interaction with the STM with the dimension of the physicality.** It's just a mythology, it depends, you can even put it in a candle, in a dog, or in a stone. It's the fire of the STM, not the fire of physical burning in a matter state. When I listen to Chinese try to explain what the dragon means, I say, my god they don't even know the truth. What's the difference. Because in original mythology the fire used to give a lot of knowledge, (1:48). but at the present time and culture all that has disappeared. As I said, the father is the same, and he decides where to be and how to manifest himself and in what clothes, but the essence is the same. **You can extend the soul to become beyond the boundary, but it is already of a weaker strength, you see it's like when you have a central heating you put a blanket on top of it to radiate less heat out, that you keep more in.** But if you take one of the blankets away, it gives off more heat, but the heat inside is still the same, you just hold it, and the brain is that blanket, and it is controlled through the blood circulation. **The Cup of Life is that copy,** if you look at the, 4 of the fields in the Cup you'll see the same circulation as the flow in the body with the blood.

Q: How about **the hissing sound, I developed .. K- it's just you should understand, it depends on how much you get closer,** the closer you get to the wind the ?? knows ?? This interaction, because many people have this position, now that they hear this noise, they get so close to the dimension of the soul, that the physicality moves within the inner ear and the ear. You're expanding it beyond. (1:50). You are taking the blanket from inside, not from outside. Q: **In the morning around 3 AM it's noticeable,** but during the day, sometimes it fluxuates. K- Yeah, around **3 or 4 o'clock in the morning is when the position of physicality changes from the left side to the right. It's a transition time and you become more vulnerable to it.** It's the time when we dream, or we remember the dreams, it's a very fixed pattern in dreaming, for man, the condition depends on position of physical dimension and dimension of the soul and circulation of the blood. **Your cycle to repair is between 4 to 5 hours, from one half (of the body), to keep the other half.** The whole body, when you go to sleep, I explained this many

times before, the body works this way. ... Half of the body goes to sleep full, the other half doesn't do, the brain works here, and the body is here (draws 4 quarters of the body). The first half, depends in some cases, even for left handed then right handed, we know more or less the same, when you go to sleep, this one goes low (to the lower half of the body) to do the body repairs. It's like when we go into emergency, and the repair crew comes in to clean and to do the other things. Then, during this time (the other half of the body) works full, but to support that, (1:52). goes on a lower dimension. Let's say, this side goes to works, you go to sleep from about 10 PM to 2 or 3 AM. It depends if you go to sleep (later), it shifts to 11 PM. That's why we follow a certain pattern because the body needs to go into repairs. Then around about 3 AM the position changes. **Now the other side goes into repair, while the one that just finished is alert and takes on the operations (of the body). And at that point you change, around about 3 AM until you wake up, at around 7 or 8. Both sides have to repair.** The side which is used less during the day by habit, goes into repair during the second phase. And this point, **when you go through the switch, when in a way, the STM allows to be more open.** Then in that position, if you hear a noise you most probably here it in one ear, it depends in which way the switch over is going, because now the soul crosses.

The Syrians have shown these kinds of waves yesterday in a video. It's very interesting when you look at it. It's part of the electronic, plasma warfare which is running, in the Middle east, and Iranian scientists, behind it, they are testing a lot of things. It's in one of the Persian Chats, ... it's posted, you see the cloud which is there, and inside the cloud, (1:54). then high in the clouds you see waves coming in. It's part of the plasma T control. They have managed to video it, it's very nice. If I can send it to Rick you can see it, It's advancement in T. ... we know **it's part of the P I T defense. .. It shows the clouds and within it plasmatic field forces. Iran has started showing the power of the T in a very rapid way.** They stopped being ashamed of what they own, and start being proud of how advanced they are, and this has been me, openly fighting with Iranian officials. We should show what we have. **If you understand what we call, (1:56). quick plasma energy release, it is horrendous what our brains can do with ourselves, you don't need this, you can do it with the body of the man. It's the first time we see waves in motion,** and can be seen in a very beautiful way. ... Q: In one of the teachings, you were talking about black holes, when you have 3 unbalanced protons, and then you have the electrons, they are trying to basically balance themselves and the electrons are trying to match with them, they are creating that massive G field in the center so we can create that black hole, this was talk about the Deuterium, which has 1 neutron, 1 proton and 1 electron, where did the proton came here, was it like from a H, ... (1:58). Send to Rick .. It's the first time we can actually able to see plasmatic field flows. This is what I explained to you, which **was used 3 weeks ago in Iraq.** If you are in it, you can't see, it becomes totally blind, it's a physical, fields barrier. **This is a plasmatic field, and you can create a pulse of it, and it works. If you look outside of the cloud, you don't see it, but inside within the cloud, because it's in different stages, it shows the compression and manifests itself.** This is how if you see that shadow, (it's disappeared) this is what the Americans can't get through. It (creates) a blind. And you can rapidly send it and cover a much bigger space, the cloud allows us to see it, (2:00). but we don't see it in the open plasmatic, but if you look at it, the cloud has a circle in its cell structure. .. we have to become more aware of the energy, than the matter, then this opens up a new dimension in the world of our own understanding of our own creation and many created things. Shows the video. If you look at this video, for the first time you see how the MG fields as a plasma are used, look at the clouds,

just look inside the cloud and you'll see it, there is goes, the plasmatic waves. What you see as lines, these are plasmatic fields floating continuously from the central plasmatic reactor. It can cover kilometers. No communication, because there are layers of it. (2:02). If you go back in the teachings before. You don't see it the blue but only in the cloud because it shows **the compression of it as a plasmatic field, the space gap between the lines doesn't allow anything to penetrate. This is very much what we saw in the Caribbean Island during the hurricane. If you look at the space gap in them, they can change it in a compression way of the plasma that nothing can penetrate. You can throw as many missiles as (you want), it just takes them out.** And even if it goes in the more, the higher speed, it does the same. **At the lower speed it changes it to, Nano coating.** So it's an impenetrable situation. This is one of the biggest achievements of the Iranian defense T. **This will enforce peace,** you can see it as a shadow. This is a compression of the field, and it's on different strengths, bandwidth of it that covers everything. This is why the Americans could not communicate, and the ground force was literally annihilated. This is how it is, instead of keeping it continuous dome, they created a pulse dome, and it is there. They decide the strength of the pulse. You can see it very clearly coming up (in video), you can see different shades of the cloud, (2:04). as it goes through. It creates a total barrier, **this is how I told you, we captured the American drones. The new weapons T is obsolete.** As I said, now that we saw the Senate's situation yesterday, he managed to get himself off the hook, because they have nobody else, if they vote him out, who are they going to put as the president next time around? He is the only one they have. **He will become arrogant in talking big again, but the limitations will decide very soon by the others, then this, what I call the barking.** You'll see the rhetoric and all the games of the past months that he reduced, because he was trying to keep the Senate members happy, 'don't bark until I get through.' He did this before in his elections. Once he got through he said, I have nothing to do with the party, I am on my own. But they had no choice because he was already in. It's the behavior of the man. ..
Can you ask your other question please.

Q: When you were showing about **the black hole and you were showing the 3 protons, which were not balanced, and in not being balanced were, basically rotating. And there were 3 electrons outside that were trying to match with these protons, so they were creating 2 rotations, and also massive G fields,** and which is the same as the black hole. But then the talk was about Deuterium, which has only 1N, 1P, and 1E. **I can't understand where the third proton came here?**

K- What do you mean the third proton? Q: Because there were 3 protons in the center, they were trying basically to balance each other. K- **Yes, but this is what happens in the womb of the mother,** if I understood you correctly. (2:06). In the womb of the mother, **you have an egg and a sperm, they come together, the third energy comes from the interaction of the 2. And this now creates an imbalance because it wants to feed itself, and takes energy and creates the other cells by its division.** This is how nature works. This 2 when they share, **trying to come together, and if they are of the same strength, they create this common denominator shell of energy, but this shell is so weak that he tries to feed himself, but these 2 are in a strength that cannot match, so he takes from the energy of the womb of the mother. Now it becomes 4. The division comes this way,** and it doesn't matter how you do it, when it comes to the point of multiplication in several billions, then it decides that I have too much energy, which I don't want to do (have), what am I going to do. **One of the cells positions itself to get rid of the energy, because that's the way he finds his position,**

and we call it a kidney. The natural process of the physical body, is the same anywhere in the U. A disposable unit, and storage unit, and whatever you call, recycling unit, and one central control. I'll take you on the Mars it is the same, if I take you planet Zeus it's the same, to Earth it's the same.

Q: Is it the same as what happened to the One Cup One Life? K- Exactly, I have given you .. you create, for the first time man creates, if you understood the teachings last week. You are used to having a baby in your hands and calling it a creation of yours. I gave you a Cup, which has life, (2:08). that's what you create, a soul. You haven't even understood what I gave you. You are used to seeing physical life within a womb of the mother. I gave you a life in a Cup, that is why it's called One Cup One Life. And I said, it saves a life, and you haven't understood exactly what it means. I tried to explain this in the teachings of the past few days. This is the Cup you carry (draws Cup), and this is your man, and the STM (draws a man with soul), that Cup feeds your soul (line from Cup to STM). **Because it has a surplus energy of continuously creating. That is why you overcome any disease or virus, because a virus is energy dependent.** You are used to seeing your creation coming out of the womb of a mother, a woman. I have given you the chance to see the creation of the soul with your own hand, that it feeds your soul and elevates your soul, and then that elevation allows you to overcome any other energy, which you call it a virus, genetic, or whatever you want to call it. **The beauty of my knowledge is that I know so much that I can make it so simple that even an infant can understand, and that infant is man himself.**

Q: I have another question if you are finished here. K- I never finish, teaching is nice to share. (2:10). carry on. Q: **We can use the salt in a way to lubricate, expand or compress the fields, I was looking at the Periodic Table going from Ca to Fe,** is like adding to the atomic weight, I couldn't see a pattern how I can use the Periodic table going through, is there a pattern that I can follow? K- Yes, this is what I explained many times .. The problem is the pattern of your understanding, nothing else. What is Mg in the P Table? What is K, Ca.. anybody know? ... (2:12). Na is 22. Mg has 12 atomic number, K is 39, Ca 40, ?? 24, and Na 22. .. if you go with the Ca, K, Fe, >> Na = 22, Mg = 24, K = 39, Ca = 40, **Fe = 56;** (40 and 16) . the gap is 1 O, ... but if you understand the Zn, the **next cycle here sits around 72, then you see the relationship, but this is in a matter state. In Pl state, you go 56, the 10 or 20% up and down, (2:14). and when you come to H it's up to 50% up and down, you get about 15, so if you take 56, at 20% you can see that you come into the isotopes of Ca,** because this (Ca) has the same 20% up and down too. **When you have these points is when you see interaction and binding, and creation of Fe, and connection with hemoglobin and the other things.** I have explained this years ago. It's very clear, if you work not only with 56, it's a guideline, but when you go with the Pl, as I said, **the Pl vibrates so you have a bandwidth, the same as I explained about the sun going up and down by millions of kilometers,** it depends where it is, here or here, it has a peak. Q: But when you hit Ca it becomes bone, which is basically closer MG field together, tighter, and then when ..

K- Yes, but, but, **why does Ca become solid in the body of the man.** Does anybody know why we have Ca as the body of the man? **And why does it stay when we die?** Man hasn't solved this mystery yet. Why doesn't our muscles or heart get left behind? (2:16). But the bones stay behind. Q: Isn't it because we come from the planet earth as

part of the earth? No, nothing to do with that. Go back to the teaching, in the understanding of Deuterium, C6, that **C6 is a physical matter that we see. But C6 in a different dimension is a diamond, and in a different environment condition becomes odor.** Now the strangest thing happens, that **Ca at a given strength, sits within the heartbeat of the earth, which is around about a frequency of 7.5. If you go by multiples of the C (7.5 x 6), it's about 42 to 45.** Then you see where the Fe comes to that range, and Ca becomes bone of the man. It's just happens to be. **The structure of the physicality to solidify, has to do with the heartbeat of the earth, which converts. You saw those waves going through (the clouds), and you see them a certain what we call, plasmatic fields, that is exactly what it does. It's the earth's frequency which dictates C, nearest to its combination, which is the Ca in matter state, which confirms and converts into matter state, (2:18).** and it becomes bone. If you take (away) that frequency, you'll have no structure. If you go further, higher, this is why astronauts loose weight in the space, because that frequency is lower and weaker in the strength. **Man in deep space will have no physicality, that's why he has to rely on his soul. It's just a gel, (splat).** The heartbeat of the earth dictates this bracket here, which is what we call, the Ca manifestation. **Not all Ca can become, this is a specific (type of) Ca which carries a specific field interaction, of the Fe, allows Ca to be converted into solid state. That is why in the creation of, in every cell, Amino Acid (AA) you have 1 Ca as a seed, without it, you don't have life. We even find the field strength of Ca in hemoglobin.** Those of you who create Gans's should have noticed that by now. **There is a specific salt content conversion, which leads to creation of hemoglobin and certain combinations of it leads to the solid state of the physicality. If you go back to the creation of man on this planet, it came all because of this. Certain combinations with the frequency from the earth lead to solidification in a plasmatic condition, (2:20).** of Ca, and very much accidentally, at the same time, the same thing happens with the protein coming in, and they linked up, the hemoglobin, and that became the beginning structure of life. A freak of accident of the creation. And physicians will see in the systems to come, **I can create man with a bone, a brain, and muscle, because we know the secret. In the majority of the time, when the heartbeat of the man reaches a fraction of the multiplication of the heartbeat of the planet, man dies. It releases the soul. (Q: the ?? in the container) You will understand. The creation of life is the same wherever you go, if you understand it. You give me the right salinity, the right protein, the right condition of the field strength vibration between the Ca and the waters of the ocean and the Fe. (2:22).** As it brings that field strength through the hemoglobin, it is inevitable to create Ca bones. **There is no other choice, and then that structure tries to find out how he can build it at the level of the body of the man, the fish, or whatever, according to the salt, the position, manifests itself. The creation of life is so simple. I can make a man while you are watching it, you don't need the test tube. It's just what soul do you want to put in it. This is what I showed to Mark in Barletta when I started teaching how to create brain. If you understand this, you give me the skull, I'll give you the man. You give me the skull of Christ, I'll give you the man as Christ, but go and find his real physicality. It's so simple, it's done everyday in the oceans of this planet,** it can't be that difficult, it's just that we never understood it up to now. Have you ever tried to **make a spaghetti with a different length and thickness, and say it doesn't taste good** or it's not the same. Because Italians measure the thickness, width, and the length of the spaghetti for a specific sauce they create, to fit that. (2:24). When you change the sauce for a different spaghetti it doesn't match. It's the same, **you have to have everything right in**

the oceans, and if you understand it, you can create life. I can create you as many life's as you like, with or without bone, or use Mg as a bone, to become C as a bone. I tell you, that when you go to a position in the U, then according to the condition of the position, you create the life to fit that. It comes from the heartbeat of the center of the plasma of the planet, nothing else. It's a whip cream, you put the speed you like on the whipper, how thick you want it to get. It's very simple. Now maybe today you understood the secret of your creation.

.. Q: Alzar back to the noise and the frequency in the head, what about the color? K- It all depends on what you rely on for confirmation of your own existence. Color, noise, whatever, it's you..

You see the problem with you Alzar is you are trying to confirm your own existence continuously, but you don't enjoy the existence you have, because if you do you will reach your soul. Chasing it to confirm it has become the biggest problem for you. You go anywhere to find it, but it is within you, but you don't realize it. Color, noise, different temples, materials to take or swim in, or whatever. Look within you will find the soul. (Brother says: I hope she listens.) (2:26). Shall we take her passport away again. Alzar, you need travel to travel with the dimension of the soul, not with the flight of the airplane. This is what the secret of creation is.

Q: But also there is a problem here, connection with the Fe which made the blood and made man to start killing all the entities .. K- Yes, because we connected that same life of this blood, with the hemoglobin, with the existence that we kill for. We don't eat the bone and leave the flesh away. We go for this, hemoglobin, and its conversions which are added to the Cu or Zn or whatever. If we understand this, man or animals will stop killing, this is why one of the main things we introduced was the creation of the ZnO and CuO, is to elevate the soul of the totality. You'll understand very soon, what we are playing at and with.

Q: I noticed you didn't mention CH₃, because it takes care of the physicality and emotion, of the connection of the Cu and Zn. K- Yes, but what is a CH₃, it's 15 isn't it (C=12. H=1), if you put 4 of the CH₃ in a structure what do you get? Cu. It (the CH₃) is not only 15, sometimes it's a higher energy of 16, of the (2:28). the C energy (Cu and Zn), and now you understand why man uses CH₃ as sugar, because it's a combination of feeder. My students, you are so ignorant of your own creation, that is the problem. .. **Q: If you add one more thing to the CH₃ then we don't need to eat, and I think I found it? K- No, no, that's not it. If you find a link to CH₃, it's different, then adding the link. Q: If you take all the food we crave for and we like and we take the energy of them and add that to the CH₃, then the emotion and texture of the food and all these things are solved too. K- Good morning. Q: I found it, thank you. K- Now you understand when I tell you, when you go into the Enhancement Unit (EU) it will feed you, repair you, it flies you, it does everything you can imagine.**

Q: Thank you. K- I can feel the smile of the soul, Hassan. (2:30). The joy of knowledge is the most beautiful joy. **Alzar you had better speak to your brother, you might find a bridge.** Alzar - I will. Any other question? Jalal, maybe the soup Caroline fixed yesterday worked very good? K- For who? Yesterday she fixed a bone soup. K- I don't know we already reached there. there is a story about this bone, the richness of it, it depends on what it reaches. .. What Jalal is referring to is that we had a marathon teaching or discussion, what we call a fireplace talk or chat. sometimes on Weds, it went for nearly 8 hours and then everybody gave up. because it was too long. (2:32). In these

discussions we learned a lot. Sometimes we learn more in an informal environment. .. I call it a grandmas and grandpas meeting.

Any other questions?

Q: **I think we can also create a One Cup OL** by using several individual Gans's, if it is right can you give us the percentage of each of them. Personally I think **I can do it with my soul**, is that right?

K- Maybe if I can answer. At one point (in the past) when the maturity of the knowledge of the man reached the stage we are trying to take you to, but this time we are doing it collectively. In response to what you asked, (2:34). **You put the Cu, Zn, water and the salt and you created the soul, now if you understood that, and if you understood the discussion of today, do you need that Cup, salt, Cu, Zn, to create that soul? Or you can use the salt, as a field of the U, the Cu as a field of the U, and create that soul in the palm of the man to hold.** Then if you understood that, then if any of you can achieve, then hasn't that become the **Adam and Eve**. If you go one step further, hasn't that become the Creator and the man? **Do you need the physicality to confirm the existence of the soul, or can you create that soul, in the dimension of physicality. Then the truth comes, has there ever been a Virgin Birth? Or does the virgin purity come from the purity of the STM, in understanding the level of his own creation, not the physicality of the birth of the virgin, but ??.** Man, as I said, is like the Chinese Fire and Dragon, and the mountain fire or burning bush with Moses. **You have to understand the essence, not the myth put around it to cover it, (2:36). that you never see or understand it. Then it comes, if I have created this soul, do I want it to be me, and an image of me, or did I create it that I can confirm that I can love, I can nourish, and I can protect.** Then it comes to the point of, when I have such a love, and I want to give to somebody else, another soul, **would that soul have same giving (as me) to create another, that between us, we create the child of the soul, by interaction of the two. This is how life started. The physical life never started in the dimension of intercourse. The life in the U started with the interaction of the fields of no matter, but in the dimension of the plasma. Then you understand the secret of creation. You need to have a salt. Look at this planet, salt flows everywhere in the shape of a cloud, so this planet is like the Cup. And the materials flow created in the upper atmosphere, fall down, you have your Zn and your Cu, so you already live within that Cup, and you just need to put the soul in it. Then we bring the souls we are in love with from other dimensions with when we travel.** When you go from say, Turkey to London, what do you do, you call your lover, your girlfriend, and say, come over it is nice here, we can be together, and she comes over. Then what you do is so nice, an accident happens you put too much love in it, and there comes another young soul. (2:38). **It's the same, we passengers of the U carry a matching soul with us. We have been in love long before we understood the love of man. Then what do you do, you bring your love home to give it the physicality to love, and to create offspring's that you can create a new life. As we say, hello my friend, we meet after a long time.** When you go to the airport and you welcome the love, what is it? It's the same love, but now you have brought it to be with you. If she is a doctor or a princess it doesn't make any difference, when she arrives she is a lover, and carries the knowledge which comes with the physicality of the man in the dimension of the soul. Man has got a lot to learn, and man misunderstands it due to the lack of his own knowledge.

It's nearly 12 o'clock. I think today **we opened a new dimension for many of you to understand, and for many of you to understand what is to come. (2:40).** And for

many of you to understand how the end of kingship and leadership, is about to come to an end. When it rots from inside there is no enemy, when you try to rot it from outside, somebody has done something. This time everything is rotting from inside, because the feelings of peace have to fire.

Any other questions?

Q: By **changing the current** from the decreasing battery we modify, we widen that spectrum of PI fields in the Cup, (2:42). I have **a combination of a number of coils, in the Cup I have a palate of different Gans** ... how do I know how to use only a certain strength? **K- You created it, you understand it. ... You are the creator of it, you have to decide what you created. Some of the people are harvesting yellow Gans, some brown, green, blue, some don't create any blue, or just a shade of it. They are all afraid there is not Cu in it. But they are all strengthened in conjunction with the Cu you put in, so it depends on the strength which is added, or what is. Then if you leave it aside, after awhile they all go green, as they have more reaction with the M field of the earth. Don't forget the color you see in the Gans, is the color which the interaction between the plasmatic M field of the earth and the (fields that the) Gans creates. This planet creates blue, there it creates green, so it's understanding this that is part of it. If it is slightly higher energy, then it doesn't give its energy to the level which is the core, center of its Cu, it will be different colors. But then it becomes green or blue, and again it depends what O rate you .. are you creating Cu₂O₂ (2:44). or are you creating CuO₂, or CuO₃, Cu₃O₂. Some of the materials created in the combination, in Gans as an energy, you can't attain it in theoretical physics. I can. But as an energy they exist, then as they give their energy to become balanced with the atmospheric condition they become green.** You should have understood this by now. R- Some people are experimenting with different voltages and amperages .. and .. K- Have you seen the guy who is boiling it? He has put so much current in it, that literally the plates are boiling, he is cooking it. .. R- I asked them what was their intention with this particular Cup with your own variations. .. Just to play with it to see what would happen ... Is that a pure enough intention to begin with, to put into the experiment, (2:46). just to do it for fun?

K- Do it for fun. God did that and see what He made, called man, you never seen what might come out. R- This is what I wonder (laughs) ... we don't want them to hurt themselves, where is the discernment?

K- I was talking to one of the world's leading heart surgeons ... he said to me, how long does it take me to learn this? I said, **give me 3 days and you'll become better than me, because you know the work of the heart better. In 3 days I'll teach you everything as a heart surgeon, he is one of the world's leading heart surgeons. It was amazing to hear his voice, that with all he knows, he understands that there is more to learn,** and he is willing to learn because he can help his patients. These are senior advisors to governments and then they understand, when they are enlightened, there is more, and then they carry the government with them, with the new T. It's like tomorrow, the Conference in Mexico, we are not there physically, but I think over 12 Ambassadors and embassies, maybe up to 20 have announced will be present... (2:48). The governments have become open to understand that there is a need to go. This is what I told you, we started with a little in Vienna and now when we get to Tehran Conference more or less every nation's ambassador will be present. The amazing thing of it is, they will accept the condition, **and if Ayatollah K of Iran brings that transition of bringing the religious leaders to Tehran at that time, we'll have the physical and soul leaders in one room to decide the future of the mankind. And as Messengers**

we are present there to support to bring the change. We have invited many people to Iran, to be ready on a stand-by, and those of you who want to see Naomi, hopefully we can get Giovanni to do it, she has been invited as a guest to Tehran conference. And many other KF supporters who have brought change will be present. We just have to see how we can get the blonde there (? Trump), that is the biggest problem. Peace will overrule the pride. **The biggest card the Americans played was this card of virus and now that will go through, and now even that, has been disarmed. With that (the virus) they thought that they would overcome. They had plans to use this on the Iranian nation. (2:50). And now we have unfolded that, the terrorist activities of a nation, again. We saw that they tested it on the Chinese, then that was to bring. But in Iran we are ready, able, and we'll face it. But the thing is, sometimes these experiments go wrong, and turns back, like that missile, and I hope they can take it, when the virus changes to American blood. This is the biggest game they started and they have already lost, before they start. They became so desperate to win, that in that desperation they shot themselves, literally in the brain.**

Any other question?

We wish the Conference in Mexico City all the best tomorrow through Sunday. We are there to support the world ambassadors, and the scientific core of the humanity. The head of the KF, Ella is there, which is the most important part as she is taking over, one by one, the responsibility of running the KF. (2:52). I wish her all the best, as I said in another teaching, it's time for the old guard to step down and bring those of the younger age to take over and guide the next generation in, as long as we are there to support and not to dictate. We'll see the changes coming in, there was a lot of work put in to this, and as we see the old guard still tries to hold on to their power. You have no power, ?? But this shuffling of power in the KF has to stop by one or two people, because the only thing is to wipe it out. This should not be done this way, by those who set up to be around the KF. We see it and we have to give support to the head of the KF. She is one of the most capable people who runs and has managed the KF for the past 3 years. Now we see the rest of the structure of the KF coming in, and you'll see more presence on the world media by the KF in the coming days as it is getting structured and planned. We have brought in experts in doing what they know, and you'll see new divisions and sections in the KF, new international sales team which is set up together, ... taking global structure. .. by the end of this year we'll start governing through understanding of the knowledge and T. (2:54). as what we call, political governing has already died. We'll see what comes up ... it's a child in growth and developing, and it needs its own understanding of the knowledge and T and .. growth of the man .
Tehran conference ..

(2:56). One of my biggest wish is that the International Sepah will be established in the Tehran conference, that the world leaders put control on the arms collectively that no arms crosses borders. .. This will be one of the proposals in the Tehran conference and other ones around the world. We'll see opposition, extremely by the Americans, but we have systems to cover this point, we have foreseen it. It's very simple, do you want to be a human, or do you want to be an American. Do you want to be a man or a murderer, it's very simple. The American nation has to decide, how the humanity looks at them, because they never stood to understand how they're looked at from outside. they looked so much inside, that they believed all the false, fallacy of ?? We'll bring the Americans to understand about themselves, then their leaders have to follow, the way it is. It's time for a woman to lead the nation into peace. We support that motion head.

Any other question?

(2:58).

Shall we call it a day, There is a lot of knowledge in this teaching and I think this year our anniversary 6 going to 7th. Try to understand the meaning of today's teaching, we have set a new course .. (3:00). more in research , we had to put a seed down to start to measure the individual strand of the fields

.. Thank you very much. I am sure a lot of you will have a fantastic time by next week when we meet, it will be on the eve of Valentine and I hope mankind is prepared for it to be a Valentine for humanity ..

(3:02).
