

## 320th Knowledge Seekers Workshop - Thursday, March 19, 2020

### English Transcription:

(:22). .. It's interesting what we have seen since last week's teaching. It has opened a lot of peoples eyes into how they can save themselves. We have learned of a very big structural difference. We were aware of it in China, but now we have seen it in Iran, which is shocking. They tell us, that why common people don't know, and that we can't get so deep with people. We had this, people from the Chinese team can tell us, that the leadership CCP called other people who were in the KF, who were making the Gans waters, can you give us some of that water please. It was to protect themselves. And strange enough in the Iranian teaching on Monday I heard the same thing, it was déjà vu, where the man at the highest level in the Iranian government was not, but he can put the T through to be applied. We have been negotiating with him for nearly 3 weeks or more. He is a heart surgeon, highly positioned, he calls, 'can you bring the water privately to my house, I need it.' (:24). This put me in a very uncomfortable position of literally, we gave to the leaders to speak, to protect the nation, but they want it only for themselves, for whatever reason they have. Even though the water was given to this gentleman to protect himself, he would not want it for his nation. And this, as I explained to the Iranians, I gave him an ultimatum, which runs out today, that I carried the Iranian passport for 45 years, since I left Iran. If the Iranian nation doesn't respond the way ?? most of the nation to be helped, I will move my passport from Iranian national citizen. Because they are using it, the Iranian KF support team, in one support team there are 17,000 people, and these are people who helped many others, and they come and go and learn. At any time, we see at least one to two thousand people online at any one time. At the moment there are 1,367 people online. They are helping each other, but as for the officials, it is good for them, but not for helping their nation. In so many ways, it indicates that the world needs a new leadership, a new government. These people do not govern, but to their own satisfaction, their own structure to fulfill their position. We'll wait for the completion of the time, and then we'll tell you what is the next step for the KF. (:26). People in Italy are suffering as much as in Germany, Austria, and England, and they are dying everywhere. We targeted China, to go through China internationally, we saw president Xi of China getting the environment cleaned up for himself, to go to Wuhan City to show he is there, and it is overcome. But still we see them with masks and keeping a distance from each other. They have to open the cities because people have literally no money, and the only thing we know, the Chinese have discussed with the rest of the world, is that the virus has mutated. Strange enough, they have released a document to show that they have found calcification in the upper spinal cord and the brain. We showed that the virus has mutated from the lungs to the brain. To this effect we'll soon see new mutation, which in the KF we have seen and with the openness we have access to people who get infected in Iran. We see new mutations, and pain in the kidneys, and ?? solidification and tightness of the stomach. It's like you have eaten the wrong food but the pressure stays constantly. This is the third strand of the virus. We see stomach pain, again tightness of the stomach. The intestine area, not the stomach itself, but the frontal part and pain in the back. We have seen a new version of it, (:28). especially in an Iranian women. We don't have access to the Chinese. What we see, like a menstruation pain in the ovaries, and in the womb, but you don't have a menstruation. We have seen one case now, with the men having a prostate pain or pain in testicles. This is the version. In extension to this we have seen in one woman, bone

pain, especially starting from the smaller toe. All these were told to and Iranian officials were informed through groups setup between the KF, the Sepah team for Corona, and the Ministry of Health Corona Team. They have taken no action. We have seen now, more or less, 5 variations of the virus. the strangest thing is, that we don't that many lung infections, as it was originally. With the new 4 strands (version) we don't see any fever. We don't see any fever at all. When we advise the people to take the new, what we call "protocol", then when the pain in the stomach, kidneys, ovaries, and whatever, reduces, we see the infection. That what we call, temperature and the pain which goes with it. Then as they carry on, (:30). 24 or 48 hours later, when the fever goes, the tightness of the stomach goes, and there is no pain in the kidney. In those who are infected by the kidneys, we see a very dark urine, or very white urine, which was seen in one case, which means the body is releasing a lot of Ca, which is part of this disease. Calcium is part of this disease, calcification. On the other hand, we see a massive structure in and around the knee, a general weakness. If you remember, most of the people who reported initial stages of lung disease of this virus, always spoke about general tiredness and pain in arms and legs. This showed to us at that time that the virus has moved into, but we had to see how it moves. Now we have a confirmation of it. It has moved into the blood stream. It will be interesting to see why suddenly the Chinese and Iranians choose the path of, "keeping numbers down." Because in China, the mutation is so fast, that everybody dies from emerging, heart attack, brain stroke, without a fever, but in fact, they carry the virus. The Chinese government only puts official figures on those who they decide to call, "have died of the virus of the lung infection." This is an old story, we have seen the same in Iran. So in fact, we estimate the death toll in China to be over 10 million, (:32). and we are increasing it to 20 million. In opening of the cities, we see no sign of death, but the death piles up, due to changes in the virus. The virus doesn't infect the body, it takes over, taking and sucking energy. We put the estimate of death in Iran, and in general, around about 200,000. This is considering that most of these cities have brought in freezer containers, to contain the dead bodies, as there is not enough .. In some places, people refuse to go to funerals, because at the funeral, is where there is a big problem. We have seen it in Iran. When you are sick, who is with you? Your loved ones, wife, husband, and children. Then who do you see to say condolences, at the funeral, the same person who looked after the sick person. Now, not only the sick person who has died, the family carries it, the everybody who goes for condolences picks it up. A handshake of death. In one case we have seen 52 people (infected), and a large number have died, mainly of kidney and liver and other failures.

In general, in the next few days, I will release a paper on the whole understanding of the Corona. I started the first part last night about 3 or 4 AM. Hopefully, as we are all getting pinned down, and can't go anywhere, it's a good time for me to write. (:34). In that process you have to understand a number approaches. First of all, when you spray, do it from head to toe, at least twice a day. For breathing you can wet a cloth or use a pipe, we call a Shi Sha (Hookah). Or put a clothe with Gans (water) on it and put it in front of your nose and mouth and breath deeply. In drinking, you have to increase it to about a half to one liter per day. Because now you have to go through the intestine. You have to use the ?? port. Only in the cases of emergency, we know a number of people who are in that position, from the diaphragm below the lungs to the toes. Again, only in the cases of emergency, from the diaphragm below the lungs to the toes, and ?? by the physicians, we advise the use of CuO, plus salt, plus amino acid (AA). ?? to the ?? legs in the bid container, say if you have 20 or 30 mls of Gans, in a Coke bottle of say, 300

mls, shake it well, and you put plastic or whatever, for a space gap between the Gans and your skin, you spray and put the Gans on your skin. On the kidneys if it is painful, also the liver, uterus, on everywhere it is painful, on your toes and knee. That the Gans doesn't touch your body, but there is a (plastic) film separation. (:36). Then make a patch of the CuO, salt, and AA, and you put it covering front and back. These are very easy to make, just wet it with a tissue, put it in a plastic bag and apply it.

The easiest way to stay immune from getting it, is to spray continuously for the next 3 to 6 months, at least once a day, drink at least 200 mls of Gans water. These are the ones we are trying to prevent. We have seen that even some of the Knowledge Seekers (KS) who thought it was a joke, and they were going to make the Gans, and spray every now and then, have picked up the virus. There is one thing we can report, up to today, in the past 2 months, from January, February, and now we are in the middle of the March, we have no losses from the KF KS or the people we have supported. We have not lost a single soul. We have no report, the ones who have followed the protocol exactly, and looked after themselves the way it was done. It is important for you because it is your life. This is what I told you all the time, you are the last man standing. You are responsible to guard, direct, and allow your soul to mature to its maturity, and you are the last man standing protecting that soul. Then you are responsible for the souls of your children, and your family, and friends. (:38). As I advised, try not to make just one Cup, but make many Cups. In 48 hours is the Iranian New Year, and shamefully the Iranian government officials are sitting by and dying one by one, but they do not release the T to the nationals. People are coming to the KF asking for help. The Iranian support team is stretched to the limit. This has to become the job of the governments, and we can carry on. The KS are working hard in Iran as they did in China. In China they stole the T by the order of the government, and CPC, but stealing it was a gift. Unfortunately, unfortunately it is the hand of the nation. We can't change it. They are habitually a thief, they even stole a gift. But in Iran we see Iranians taking the flag and working close. We see a lot of pain in Italy, but it is what happened in Italy, it was the way it was setup. Those who lead the destruction of the KF in Italy, their souls have to pay for the losses in Italy. You should have been there and supported the nation. Maybe this is what has to come. The KF Italy supporters, we have setup a line for you, get back together and save your nation. Your losses will become more than China. We see what is happening. (:40). The KS in Germany and Austria, you have been given a free run to support your nation. Your Chancellor talks about 60 million in contamination. It's the responsibility of the KF KS to spread the teachings and to show people how to save their lives. In France you'll suffer heavy if you do not ?? , because it's the only way you can protect yourselves. You have to understand that the totality of the teaching is for every nation. We can see the US getting hit very hard. But the problem in the US is there are too many guns. Shops are empty, there is not enough stock. They can only stock as much as the supplies coming. But we see the problem is that the shop keepers and supermarkets owners value their lives too. We'll see the collapse of the economy in a very rapid way. In so many ways, we'll see the same thing in Brazil. There is one good thing, those who come to destroy or hurt you, and say this is this, about KF and the rest, do not worry, it is them who will come back to you as fast as they can. (:42). We had a case in Brazil, that I am going to stop everything. We had a case in Iran, the gentleman calls, and as I said in the Chat, every swear word in the vocabulary of the Iranian, Persian language was given to the support team. A few hours later he calls, begging for the life of his mother. You have to understand, those who went against, supported us to become wiser and deeper, ?? We see the same thing all over the world. Now Africa is infected. At 2 or

3 AM I was talking to an ambassador from Africa, he says, Mehran we have nothing, we can't even report, we don't know who is dying of what. He said, officially we reported 1 yesterday, but officially the whole city is done. He said, I called you to see how we can help Africa. He is an old friend. We see the same thing running in South America. With the help of our webmasters and the rest, something came up and we saw, and then we ran a security check on it, which was not very clear. We found out something very strange, the man who released the virus in China, the same man, (:44). owns a vaccine company in England. Computers were not so profitable, enough greed, to become again the richest man in the world, as he lost his position. Because he started a "Micro", now he has gone to micro, micro in viruses, to become richer, to be somebody else. The greed of the wealth has blinded the man of stupidity, and his wife. Now we understand why there was resignation of Friday of a big ?? well company has been setup, to sell vaccines for the ones you infected. You rob a man from his wealth, and then you lend him the money. With his own money. We'll see what will come out of it, but now you understand, we wanted him, he understood, but we understand more into it then he is actually trying to become ?? richer, by supplying the vaccines for the virus which he released, through a British company. It's very interesting he advises all nations for vaccines, and gives (loans) them, to buy more of it from his own company. What in fact, has to be told to the world leaders and governments is that the virus has 5 strands and this vaccine only works on one of them. (:46). Because of the stupidity of man it will take some time to find out, because these are of different strands, and the vaccine doesn't work on all 5. One of the things we could not understand, because the Chinese blocked a lot of information, maybe they didn't understand themselves, is that people will drop dead instantaneously. These are the ones who received calcification within the cell of the blood. You have to understand that blood vessels run around the lungs to take oxygen (O) to the heart, and every single cell in your body has a Ca center. As the lungs themselves are calcifying, it carries the energy to calcify the blood cells within, which pass (by), and then you'll understand how this is taking shape. Now it has entered the circulation, and if enough cells are calcified, then the calcification in the blood becomes like a blood clot, and then like a loose bullet. This is why the Chinese never reported the people who died, who didn't show any sign of virus in the lungs. This is how they played with the figures. We have warned the Iranian authorities, that this game cannot be played. One of the main objects and work of the KF, (:48). KS is to keep an eye on the healthcare doctors and nurses on the frontlines. They are your priority to educate these scientists, takes a long, long time. To bring this level of wealth of knowledge takes even longer. You have to understand we have to, as a whole, understand one fact, we are all in it, and these doctors on the frontline are the only ones who are saving ?? our lives. It's our responsibility, what we call, us to protect them that we can guarantee, and we can stay alive. In so many ways the pain is too much. We have to understand, that the saving of our doctors and frontline is the responsibility of every single one of us, because they are those who protect our children and us in the time of need. I posted across all the channels, helps, and KS and groups, for a list of the doctors only. We have lost the ones we know in the past 4 weeks in Iran. The numbers are many times more. Many, many times more. (:50). ... this video is for you as KS to see what we lost in 4 weeks in Iran alone, doctors and nurses. None of these educated people are with us. The less of these people that we have, the more we become at risk. After their deaths, their expertise are gone. These are the assets of every nation. We hear that in Germany that doctors are hit worst then in Iran. ... In every country you are responsible. The losses are heavy, and the frontline is paying for it worse. In so many ways, it doesn't matter if they refuse, it's your job to inform, and strange enough at 2 AM this morning we

received a message from a lady, she categorically says she is a surgeon, doctor, and her husband is a cancer surgeon. 37

(:52). .. please play the video, these are all the doctors we have lost. ..

(:56). .. I would like for all of us to understand, as many say this is fake, it's made up.

This is the reality we face in Iran. The strangest thing is in one of the papers the lady doctor writes, this is the last prescription she'll write before she dies and she stamps it with her stamp. She says good-bye. Germany and Italy are paying worse. Do you see the cat in the arms of the lady? The shape of Iran is the shape of a cat laying down. We love that cat. We hope it is precious. Soon this cat will become a boot, and soon this cat will become the whole of the space across this planet. I do not agree with the Chinese government opening the country, because now they will not report the true figures,

(:58). and the virus will kill relentlessly in China. We do not see anymore lung infections by calcifications. (Instead) we see calcification of kidneys, stomach, wombs, and the rest. For ladies, please consult with the KF doctors in Iran, they are giving specific protocol for womb and ovaries Corona infection. The reality is we are loosing many, and the reality is, how many do we have to loose until people start governing without governments. According to what we hear, a trip to India is about to kill many of the world leaders, as the bribe was too lucrative not to make the trip. But the trip is paid back, with many of the world leaders going to that state and getting infected. The greed of money has brought them into that position, the death of many families. The US will probably go through a time of many, many deaths, not just by the virus, but by killing each other for hunger, food, and everything else. (1:00). In the west and the east, we do not understand the animal behavior of the Americans, where they carry a gun, and all have one at home. In Europe and in the east we shout and holler, these people go out and they'll kill more of each other soon, then the virus. There are a number of big problems, as I said in one of my talks, soon we'll see the end of the arms manufacturing, because as we said, the arms are not the only wars out there are finished, and the nations do not have money to spend on arms, and they are fighting another enemy, which they can't see. You will see the collapse of the American economy, and especially the state of Belgium, because no arms can be sold. The other nations have to be prepared to carry this through, as they will not be able to sustain life. There will be no shipping or flights, or we all have it and see who drops dead. If it becomes so common, then it will become an open state. Not a closed state, and whoever dies, dies. There is a very clear understanding that when you go through the process with the KF T, with spraying and helping and supporting yourself, if you are recovering, it will take you 3 to 4 weeks, to fully recover, because the virus has damaged many cells, so you will feel weak with not much strength, but this is part of the recovery, and the body has to recovery itself from.

(1:02). One of the easiest ways to understand, is not to be afraid that you might catch it, but that it has traveled so many places that it is around and in us. We have to learn to live with this, we have no other option. In time when everything settles, the KF will file for genocide of Mr. Gates. We'll explain to you more. The way we got Alan Sterling, we'll get Gates too. We are gathering knowledge and information, and we'll not talk until we deliver. At the same time this virus is what we call, a double-edged sword, it is killing many of us and we are learning how to handle it, but as we open the space to man and the Universal Community, many of us will come back with viruses, and as I said before, this Corona will be a child's play. In a way, we are learning worldwide how to live with viruses and how to overcome it. As I said, it will be all in one go. When we open the space in the coming months, then we'll all understand, that it is not talk, and it is not a joke. A lady in one of the cities near Tehran wrote a very funny thing, she thought it was funny. (1:04). But we found out she quoted herself. She wrote, "I am

walking around the city and I don't see any dead bodies, and in my house there are no sick people, and in my family there are no sick people, and in my water ?? there are no ?? They are all made up." Then she got made up. This is a reality that we have to understand, it will become part of us. We have seen it in the digestive system to go through the food chain. Eat vegetables, because they carry the protein, and if you consume so much of it, the ?? energy you release so much of it in the stomach, will calcify the stomach, and it will feel like your stomach is going solid. Spray everything you bring (in your home), spray your refrigerator on a regular basis. Don't think it is safe. It is the place where they grow rapidly. Just open the frig, spray it and the freezer. Spray the cooling boxes you have, just 2 or 3 sprays. If Corona can survive as an energy, so can the Gans. Understand and put a spray bottle at the front door, spray when you open the door to greet people. Just spray them, then you sit and talk and have peace of mind, and your love and care. Spray in the ?? , and spray your car, your office furniture, and in every shape or form. (1:06). Try to spray, if you can, with the original Gans that you take off with the salt (saltwater rinsed from the Gans). Because you'll see a mark of white from the salt on everything, when you spray with salt. Because the Gans energy stays within that salt. In a way you create a different salt, a different side of the room, field, in a way that can handle the virus. The reality is we do not know where it is. It is holding somewhere in the summer or winter cold and the heat of Africa and South America. It is killing on both sides of the heat and the cold. The way this virus is connecting itself is through one way, through what we understand as the hydrogen (H) channel. It's connected to every C, O, and N of the amino acid (AA). The problem with it is so big that it will take mankind decades to fully analyze what happened in 2020. Many books and papers, conspiracy theories, will be unraveled, but the reality is, as I said to my son, you hear about the Second World War, you hear about the Black Plague, now we are living that history. (1:08). In time, 2020 history will be written about the Corona. But this time you are part of that history, learn, understand, and try to comprehend what has been done, and what is here for me to learn from. The true point with this is, the Chinese could hold, the west cannot hold. Hunger will bring people out and we'll see they first blame the racism, to get rid of the Black, White, Indian, British, and the Americans, they are the cause of it, and then everything else, and then start eating from inside of each other. It's the responsibility of the KF Universal Council (UC) members to start operating to the capacity of they have been administered to do by their soul. You soon will understand. In so many ways, we do not enter a condition that we don't know, we enter a condition that we exactly know, what we have to do as members of the UC, and the KF KS. Do not make 1 Cup, make as many Cups and teach as many people, the biggest problem sits, two ways, we are again weakened by this to reach 14 billion, the ?? point to open the door into space. On the other hand, we do not understand to what extent the losses will be. (1:10).

.. we need to stay collectively calm and focused, (1:18). one point is, the new way to handle it is very direct. Protocols are changes that the virus changes and you have to follow, because it is very much like I said, the people who make the vaccination are stuck with the old, and it takes them a long time to find out, and before they do, and before they make ?? a new vaccine. The protocol has changed since we have seen that the virus has changed. We made a new protocol, and that is you make, many Cups, and in one of the Cups you take the Zn out of the circulation, and you put only the Nano (N) coated material and the Cu, and you produce a pure CuO. With this you collect all the AA on top all the time, and you keep on washing it. At the same time, keep some of the

saltwater separately, with some of the Gans of the Cu. with the new evolution in the Corona, you need a Cu Gans for 2 reasons, from the lungs down, everything is mainly muscles, even in your arms. There is not much muscle above what we call, lung diaphragm, the top level. This part is mainly made of Cu connection muscles. So it responses very rapidly, (1:20). to Cu. Secondly, Cu Gans Water with a few drops of its salt in it, is one of the best antibiotics that you'll ever put your hands on. It is many times more effective in killing germs then actually any antibiotic we know. So we have evolved with this. The doctors and medical team are giving specific advice on the ?? channel, that you can use, again, patches of Cu with CO2, on this ??? on kidneys, back and the front. There is no direct contact and you can withdraw it, for womb, ovaries, for muscles, leg muscles, and feet. At the same time you use the CuO direct, its Gans's water, the Gans's water, for this infection, very powerful. But you have to allow some of the, very minute amount of the Gans of Cu to be in that mixture, because it will stay behind to keep disinfected. The same with the salt spray, you can add, a very small amount of the CuO in the saltwater where you wash, where you are cleaning the Cu, and use as a disinfectant. This is one of the most powerful disinfectants we can recommend at this moment to be used. When you make the Cu Gans. (1:22). When you are washing it, keep the saltwater, and add a very small amount of Cu into it, for disinfecting the rooms and the offices. Because now we are dealing with a different strength virus and we have to change the protocol. We have put a new protocol to the Iranian doctors, and this is exclusively and explicitly for the doctors recommendation. As we see, that many of you go with no signs when the virus is overcome, in your kidneys, liver, brain, or the lungs, through the second infection. At the present medical protocol, as I was discussing with the ?? of Iran this morning. He said, we don't understand, the international protocol says, you do not use antibiotics with viruses, because it gives it more chance to grow rapidly. Yes, this is correct with the old protocol, because they had no tools to overcome the virus. Now with the Gans (virus) we deplete the energy and this leaves a massive amount of damaged cells behind that we have to wait to accumulate to become a fever.

The protocol to the doctors for their patients, from the KF is as follows: From the minute you have the confirmation you prescribe to your patient, the following. Use of the Gans of the Cup of Life (CL), spraying everyday, at least 3 or 4 times per day. (1:24).

- 1) This is for those who are infected, and not for public (?? prevention). Do not do this. This is only for doctors, as we can't reach you ???
- 2) Then spray the Gans of CuO from the abdomen down. In critical cases, use CuO directly in a patch, on the skin, front and back, to overcome within 3 to 6 hours, then you withdraw the patch, and you go on with spraying.
- 3) The use of CuO plus a small amount of salt, salt of the sea or direct to be administered at 50 ml every 30 minutes, at the critical point, when the infection has come, or is visible. This is used as an antibiotic. If there is no antibiotic available. From the beginning when you see the signs. You administer antibiotics, like Amoxicillin, from the time you start the process of spraying the body, that the body goes through the reversal of the virus and the damaged cells together. This way you get a rapid result, and the extent of the weakness afterwards are much shorter because the 2 are handled together.

The international medical protocol is to not use antibiotics during the crisis. This is correct. But the new T, as I repeat it again, we take the virus away, which is unknown to the present world of medicine, (1:26). you administer antibiotic, or you use CuO, 50 ml for the first 6 to 12 hours of the discovery of the infection. After that we don't need to use anymore, the patches, and you reduce the use of the CuO as an antibiotic, to 50 ml 3 times a day, for 7 days, and then stop. The new protocol has to be used, using the Cu Gans saltwater, a small amount of Cu to disinfect the environment to handle the new variation. You can add some of the Cup of Life water into this infection. We have taken a new step with critical conditions in Iran, that is, we take a CL water, or a CL Gans, we add 20 to 30% Cu Gans, directly into it. We use that mixture for both spraying the body from the diaphragm down, and .. nothing else. This is the only time you use this mixture. The breathing (Gans Water on clothe or Hookah) has to carry on the same, infected people, at least in the first 24 hours, for 10 to 20 minutes every 24 hours. And to drink of the Water, (1:28). for those who are infected with the new version of the virus, it has to go to half a liter every half an hour. At least 300 ml every half and hour, that it cleans, it takes the energy, and it sorts out the problem with the kidneys and the intestines. We will update the version next week as the variation changes. Don't forget the toe can be effected as much as the brain, at this moment, but the toe will be through the bone marrow, and the head will be through the brain. One is through the strength of the physicality, and one through the strength of the soul. the strangest thing is, that those who get, and we have seen one case, and we saw exactly where it goes, when you get your toe infected, and the brain, you can see that the larger is trying to feed the smaller, and the toe, and it covers the whole of the body (in-between).

Some of you asked in the past, how can we feed ourselves? I think you have the answer. By creating the condition on the toe, and the same on the head, then the soul of the man (STM) can feed the physicality in totality. This is the way you feed yourself in the time of emergency. We see a shortage of food, and rationing of food. And many people as we saw in China, they came on the streets, because they ?? food, they had no more money left. (1:30). At the same time they had no food to eat. It was to die of hunger, or to die of the virus. They came on the streets of Wuhan City and they met the bullet. The Chinese government has a lot to answer for, in reality, what happened in the last 4 weeks in Wuhan City and other cities which they locked down. As many people choose the bullet, rather than the hunger and the virus. It should not have been done this way and the leaders of China bares the responsibility of this with their soul. In the west and the rest of the rest of the world, remember the law of plasma, the weakest gets fed from the strongest, by creating condition of strength through the soul, and then to the physical body, the weakest of the toe, the body will feed itself from the universal energy, if you get it the right way. No one with this T should die of hunger. This is the first time we release this knowledge to man, to feed his physicality, without food. As it is a point of emergency, I promised you that I would do that this week. You feel it, you taste the food. Many of you will choose to eat, but the body essential will look after itself. Many of you will develop methods and ways to taste a Pizza, or a Kebab or a hot pot. (1:32). You will feel it, you will understand it, then what you think, what is in your soul, your body will be nourished with. Many people will die in the west, but nobody should meet the bullet, as the Chinese served on their nationals. I told you that when the leaders betray and steal, they deprive themselves of the knowledge, and they did. Many, many people will die in China, several tons of millions, because the new virus variation has not been understood, and they put it as, everything else.

This is a specific protocol for women, as we explained to the doctors in Iran, they are to prescribe for their patients. In the case, and only in the case, of detecting pain in the ovaries and in the womb. As we understand the energy level of the Coronavirus is at the Ca level, which means, it creates a condition of the salt at the Ca strength, that it has lead to calcification of the lung and brain cells, so in the case of lungs and the kidneys, we have used the air and the water. As they pass through the womb of the woman, it is the most precious part of the life of the mankind on this planet. (1:34). It has no exits or entries, except one channel. When they cancer takes over it looks for a seed. 12

Any questions? Q: Stephania, I want to thank you for saving my life. K- You're welcome. You are precious. Q: I just want to say to everyone listening, that if you follow the instruction, (1:42). .. step by step. I will share my experience. K- If you want to disclose it. Let me explain. She is a member of the UC and took it kindly (softly), and not to follow, and not to make the Cup, until last week. She is Italian in UK, she is involved with the Italians and everything else, and she picked up the virus off the forth case, which is ovaries and the womb, and every other side with it. She noticed it on Saturday, and immediately took action in trying to support. We'll let her to discuss. We see it in the KS, if they are around they all take it as a joke. As you know the Italians have brought a lot fo virus into UK, and actually, that is what happened. I'll let you speak. Q: I started to feel unwell on Saturday night, and I don't have the words to describe how much it meant to me your support, and told me exactly what to do. I recommend everyone to be calm, and go step by step, and trust everything is going to be fine. (1:44). I noticed that the symptoms change very fast, so it's very important that you are prepared with the 5 Cups, because when you start to have the symptoms, then you don't have time to do the Cups, and follow the protocols. Mr. Keshe told me that my case was quite advanced from what I explained to him. It's very important to have the 5 Cups, it doesn't cost you anything to make them, and you just have them on the side. Even for peace of mind. ... Because I luckily had the Gans already made, I could start the protocol right away. When you start the protocol, it is quite intense, you have to follow it up. But you see that the moment you start it, you have this relief inside you and you know that it is good, and you have this improvement in you. So you can tell that it is something really good for you .. You have to stick with it. In my case, I did it for 16 hours, you have to make sure to keep the symptoms down, and continuous. (1:46). This was the first day. Shall I say step by step how I did it? K- Yes. I would like you to say how you felt first, when you came to the point. How did it start. What you felt. Q: .. When I sprayed (Gans Water) I started to have pain, like you said during the Blueprint of the Iranian Paper. It was exactly as you said with the spray. When you spray all your body, I was dong a prevention, but it wasn't really prevention, because I was not doing it properly. But then lately every time I sprayed from head to toe, I started to have pain, everywhere. It started from the stomach to the liver, to the kidney, uterus, and pain in the head. It was difficult to breath and my tongue changed color. You see that your body changes very quickly. There is no time, so you have to prepare the Cup before, because your body changes quickly, it is out of control, you can tell. Started to have pain on my lymph nodes and under my armpits, on my uterus, everything was changing quite fast and you just want to have something in your hand that you can keep your body, with less symptoms. (1:48). So I was spraying myself and I started to feel this pain. It's a pain like you described, exactly like 2 fields interacting

with each other, then I started to feel cramps in my stomach, like it was cement, in fact, really rigid, the pain on the ovaries and uterus, and cramps. I used the spray to monitor myself, and as Mr. Keshe told me to do it every 30 minutes and that was really good, because through the spray you can monitor the pain changing in different places. It will go around (the body). I started straight away with the protocol, through the night, when you use a lot of Gans's you are not hungry anymore and you are not tired anymore, so you can wake up early and go to bed late, because that is how you feel. Then I started to take water, which was really important as well. I stated to drink the water every 2 hours. Also as you drink the water it is the same, you can tell the interaction of the fields as the water is going down, and that helps you to monitor the things, using the Gans. And you can tell, (1:50). as the time goes by, everything gets better. Then I used the breathing device. I noticed that if I was not breathing constantly, it was ?? .. The moment I stopped using the breathing device, straight away I would have difficulty breathing. I was constantly on the breathing device, as I was doing my Gans, ... Basically you are going to do this for 24 hours and have nothing else to think about, other than doing this. You just are on it. I didn't have a bathtub, so I used cold towels to keep down the temperature. You start to have ?? coming up as well. It happens quite fast so it is important that you are on top. I have a situation where I thought it was getting better, so I was more distracted by other things, so the symptoms would come back again. It's much safer if you just stay on it. The wet towels from plasma water from the Cup of Life, it really helped me to keep the temperature down. It was really such a relief. ??? .. (1:52). it make you understand, in the beginning a lot of pain on the chest and back, and on my organs, but as I was applying it, you have to do it every 30 minutes, when I was doing that you can tell the relief and the pain going away. It's a sensation you can't describe, you just know that what you do is good. I knew that Mr. Keshe was saving my life, I was so grateful, and it really marked me. Definitely, I will give support to others. If you are up for it, definitely you can do it. It's not that difficult but you have to be ready. Now I understand why KF stresses to get ready. Just in case, because you have to be ready ... the protocol for emergency, where you have to mix the Gans of One Cup One Life, because I didn't have a bathtub. In the beginning I had to wash my whole body. It's like you are putting cold water onto a fire, such a relief. (1:54). So you wash yourself, and you have this relief of .. then you have another type of pain, the one with the fields, it's not a bad pain, it's a pain that you know is for monitoring, it helps you to know that you are improving, it always becomes less and less. You do this for one day, nonstop. This was for the virus. My womb was hot, I really could feel this interaction of the fields. I could tell I was following the protocol because more and more the pain and heat was reducing. As you are doing it you are so happy because it feels good. Maybe it is the fields of the Zn, but definitely your emotional level is high, so you have this happiness going through, and you know in your heart that you are safe, and that you have found a solution for something that many people seem to die for. Then you can understand that people die, just because of a lack of knowledge, just because of that. If everyone had this knowledge, we wouldn't have (all of these) deaths, because it just takes one day, and the next day I felt very good. I started the protocol in the morning so I stopped around 2 or 3AM and woke up around 5 AM to keep with the protocol. Because I couldn't even sleep, because when you sleep, you still feel this burning sensation, this pain like you want to ?? run. (1:56). In the morning I felt much better and I could see all of my symptoms going, I was not reacting as fast (to the Gans application), as the day before, and by the afternoon, I was starting to forget the protocol, like I wasn't doing it as intense as in the morning or the day before. I felt, "oh, my god, I have come through it." I couldn't believe it. ... started getting distracted and

feeling good ... Then the next day I started having fever again, pain and some symptoms, so I could tell it was turning back. The strange thing is that the pain was not the same as the pain I had on day number 1. Mr. Keshe told me if you have a fever for the second time, it is very important to know ??? I think the second time, I didn't have a thermometer so I didn't know, but the first time I was burning like a fire. You know when you have fever. So this was the second time I had fever. He said, okay, now you are getting rid of the virus, but now you are dealing with the bacterial infection. So I couldn't go to buy the antibiotic to get rid of it, so I started with the CuO like he prescribed. I added to my protocol the CuO, because I started to have a different type of pain. it was not over, so I started to get on it. (1:58). I spent all day Tuesday, again 13 hours on it, nonstop. And if you are alone you have to a lot of stuff. You can't do anything else. So again you have to be prepared just in case. I started to feel a different type of pain. I started to use the CuO like Mr. Keshe explained, with a little bit of Gans in a small bottle, and I started to wash from the belly down. A big relief, even that one. I got addicted to it, because you feel the benefit of it. You know that you are doing something good for yourself and that you are gong to make it through. Then I started to drink a little bit of the plasma water of CuO, and even that one gave relief when I drank it. This was Tuesday, and on Wednesday I felt, again super good, like "oh my god I am cured." 3 days you can go through. I felt like a new person, my tongue was completely color ?? , you see your (before) my tongue was completely yellow with plague. .. Then yesterday (Wednesday) I felt like a brand new person. (2:00). In one way, I could believe that it was that easy, because it's hard, but if you have everything you need and you are at it. It's easier then you think. I thought it was crazy that people were dying when they can just do this. Everyone would be fine. Yesterday, I had to do something's to help someone else, so I was very distracted, but I felt completely normal, okay. Now, today I am keeping with the protocol to make sure I go t rid of everything, because you feel good, but the moment you stop, you might start to have some heat and pain again. One thing for sure, I understood the importance of the spray. I had to do the spray constantly, because you wake up cold. It's like a test, but you can also use it as prevention. It doesn't cost you anything. You can also use it on your body if you think you think you have it. You just spray yourself and you see the interaction of the fields. I will continue this, I am busy but not as before. ... One reason I wanted to say this, (2:02). is that you have to be prepared with everything all ready to go. And if you have others around you, you have to prepare enough for everyone. It doesn't matter if you are fine, just prepare it, like Mr. Keshe said, we are stuck in the house, we don't do anything anyway. This is the best time to prepare the Gans, PREPARE, then maybe nothing will happen, but you are happy anyway. Also teach it to others, how to make this, and like K said, if each one teaches to others, then you have a ripple effect, and it grows in a good way. If we each teach 10 people it will grow exponentially... and we take off the overload from the hospitals. What happened to me, I found people who maybe, are not interested. I just leave me them now. We don't have time to convince anyone. But what I like now, is that you have to learn not to worry, because this works, and it works very much easier then you think but you have to be prepared and at it. That's why the preparation is so important. Then you try to enjoy your life, don't panic, and think about nice things. You have to understand, that you still have to get information, not that you pretend that this is not happening, but you can have information without getting stressed. You have a solution in your hands, so get prepared, (2:04). because people will call you, if they are not ready at the time, and they want to follow their own path. I think it's good, everyone should follow their own path, but it is nice to have something ready just in case. ... I really thank Mr. Keshe from the bottom of my heart. .. and there

are so many people died unnecessarily because this is a very easy protocol to practice. At the beginning you think, oh my god there are too many things to think about and do, but after a half a day you have already done it over and over, then it becomes easy because you got organized while doing it. I recommend to every KS, because this is the problem I had, I was not ?? (prepared) and was doing it at the last minute ... and this creates more confusion. ... where you are, just stay there and prepare. I recommend to every nation to get organized in groups, who's got the materials, the Gans, we have to help each other. Leave behind who doesn't believe right now. (2:06). Anyway, they will call you and you have to be ready to support them. ... Mr. Keshe you really saved my life, I owe you one. K- Now you understand why you were making the bed (in her dream) last time. (laughs). This is interesting. Would you like to explain what you do for a living. She is around the medical world, and this is the strangest thing, and that's why she can explain a lot about the human body, because she works in the world of medicine in a different way, and she is fully aware. Q: Yes, I work with the nervous system, and I work with the body as well. I am a practitioner to help people recover from accidents, pain or any problems. I help people recover from things. K- Now you helped yourself recover from Coronavirus. Q: Would you explain the question you would like me to explain about myself? K- No, just what you do for your work, in the world of medicine. Q: I have been doing this for 20 years, but I realized in my work, (2:08). that the present T doesn't resonate with me. I found that I couldn't find a solution, because I always wanted to make people independent, yes, sorry. I ?? thinking that the brain is the one who controls the body, so what is interesting is that the guy who created this method was also a physicist, but I think he was teaching something similar to what Mr. Keshe is teaching, at the soul level. Now I understand that it is very important to organize yourself to find the position, you have to position yourself. That is rule number 1, you have to put yourself into position, when you are clear where you are and what you do, then everything is .. is the key ... you have to keep centered, this is the key. (2:10). From the moment I started to do the One Cup many people called me, out of nowhere for help ... As I was going through this protocol people I hadn't hear from for months or years, they called me. They were feeling fear and didn't know what to do. I walked them through the One Cup. .. Don't worry if some people won't believe you. I hoped I helped anybody listening to understand what we are doing. I came across people who said, you are pessimistic, I don't want to have a bad energy, I want to have .. It is actually the contrary, because I saw people who didn't want bad energy, but for them sometime they panic. So it is bet to have something for support. ... because in this situation we are going to see something we don't want to see. You have to be strong, and don't take it in, in a way that will effect you. (2:12). You can handle the real situation of how things are around you, it doesn't matter if they are good or bad, then you have the present T and it works. ... 3 days of work for peace of mind. You have to have something in place, just in case. People say I just want to think about nice things. Yes we are the creator, and it's true, we have to love, cheer up ourselves, it is important that we are happy and spread this vibe of happiness. .. But you also have to understand that we have never been in this situation before, so you very quickly go from happy to become (sad). .. Why I think I got the symptoms, is because all of us, all over the world have to make an important choice, because they are cutting the train, plane and everything. So you have to decide, do I go back to my mom, she asked me for help, or should I stay where I am, or should I go to another country ... I saw many people now who have the same decision I had on Friday. This decision comes from nowhere and are really intense, and under stress, (2:14). so you have to center yourself and that can cause the symptoms to come up. And in that case the Gans will support you. That is why you

need to have the Gans at that moment or you will not be able to cope, because no one has been in this situation before. This is my advice, because now many of you will have to decide shall I stay here, or go to my parents. My friend said to me, I would like to go and help my mom, she is 85 years old, but I am worried that if I go now I'll give her something. ... this is why the Gans are very useful and you'll be more in peace, you can do your meditation ... make nice music, don't make the Gans with fear, but by doing the things you love. (2;16). ..

... if we all make the Cup, then we raise the big vibration and make a big gird between all of us, because if each one of us makes 5 CL (2:18). you use them, and get used to the protocol for prevention. So if that problem arises with friends or family you already know it by heart, you don't have to read anything ... just tell them ... It's another feeling when you have done 5 Cups and you know it. That's why I felt safe with Mr. Keshe because he has done it over and over for the last months. ... (2:20).

.. talks about what is going on in Italy

(2:22). ... K- This has just come out. Minister of health were are loosing 3 people every second, and getting infected

(2:24). (long pause ..)

(2:26).

Stephanie talks some more . . .

(2:30).

(2:32). ... K- Thank you very much. In a way by, I let Stephanie to carry on, because in the time when I stop teaching, members of the UC like Stephanie and the others become the teachers on this channel. So in a way it is a good time to start learning how, these people who offered their life and soul to serve humanity, teach you from their heart and soul. This is a prelude to what will come. But the direction of the operation of the KF will run by the UC and their word is my word, when I leave. In so many ways, you heard the sincerity and clarity, and maybe that was the reason for this situation, for the next step of the evolution of the KF to come in. Thank you Stephanie, it was a pleasure to have you on my lap for a couple of days on the phone, trying to help you. She is very funny, she even takes the pain the sweetest way. You have to understand, we have to look at the bright side. There is an end to this situation, without a doubt. Without a doubt. (2:34). In-between words, not from me, that even in Italy, the bodies are piling up, they can't burn (fast enough). Now you see the truth on how it is seeping out. We are having a problem in the Islamic world, it's the most heinous thing that can happen to the body of a man, is to get burned. Then you understand, why we have freed the soul of ?? Cremation in the Islamic world is forbidden. We saw the pictures in Wuhan City that they burned so many bodies that the satellites have picked it the chemical chains across China, 57

(2:40).

(2:44).

(2:48).

Isolate 2 Cups to be producing CuO,  
then we'll teach you more. Stay calm.

The priority is one thing, not to infect the others, even if it means at the cost of your life. (2:50). Up to today, KF KS and those who we supported in China and Iran, have not had a single soul, of those who followed the protocol. As Stephanie said, follow the protocol, stick to it, it is your life. The following protocol for food, in case, it will be issued in a very direct way, that will understand that you can balance feed the whole of your body and family and loved ones. You don't need to shop, because the biggest fear is what we said, the people who get the Corona, they die of fear of suffocation. Many of you will panic from the fear of hunger. The procedure will be given to you in detail if we get to that stage. Is to calm you down from the fear, I have received the energy, I don't need to eat. Getting that confidence back. I don't feel hungry. The thing is every time you spray yourself, you feed yourself. You create the condition of receiving energy, and that energy balances with what the body needs. It's not just the virus energy coming out. Some of that virus energy as it comes out, trying to kill you, it becomes a beautiful, (2:52). fresh food energy to your body. this is why this T works so effectively. It's a source if you know how to tap into it and that is why we use it this way. It's not carrots or Vitamin C or D, as it is going through your body it is an open spectrum of fields, and the body takes what it needs from it. That's why the recovery is so fast. Actually the energy that was taking you to death, becomes the energy to feed you. You have seen this in the Parkinson's, that gentleman in the wheelchair started walking in 4 days. Because if you do physical therapy it takes months, but the body decides and the cells respond. You have seen it before and now you understand why. In a later stage, if we come to a critical point, in a total shortage nationally, then there will be no food. The reserves will run out in 2 to 6 weeks internationally, in most of the nations, if it carries on. The farmers are not farming. We were told yesterday that the flower auctions in Holland, which is the biggest auction in the world and are the biggest suppliers, are throwing the flowers in the bin because there are no buyers. The farmers will not farm to send to be destroyed. The bank overdraft and barrowing is too heavy. The farmers will not cultivate, (2:54). because there is no one to take their harvest. the truck drivers are scared to carry the food because they can get it while they cross the nation. The recrimination is far worse than what it. Be prepared for everything. Do not worry that you don't have or you won't get water. We'll release the T so you can, in a way, extract what moisture you need from the environment into your body. The same for your children and your loved ones. If you live in a block of flats (apartments), be prepared, you'll become the feeder of the whole block. You'll become the center that the whole family and village depends on. We had this in Iran, one man saves the whole village. We have Mrs. Mohammadi (MM) in the background if she would like to talk .. Hello MM, have you slept last night. (1:56). What is the position in Iran with your team. ...

MM The Iranian team which was active in Iran was aware of what was happening in China. We decided to setup Telegram groups to be prepared if it comes to Iran. (2:58). How are we going to handle it if it comes to Iran, to be ready for it. Even though this T is very young, not many people were aware of it, about the knowledge. We discussed all the positions in our meetings. The priority was to use the One Cup One Life video to teach on all the channels, on "Instagram" which is very popular in Iran .. (3:00). We made videos in Farsi on how to make One Cup, and also for local dialects. We knew when the Persian people started listening to it, that they would start contacting us. ... they educated the core teams to be able to foresee everything. Through our administrative central office, we trained people who could speak the local districts, who speak the languages, that they can reach their people very rapidly. (3:02). We knew that

after establishing the first teams .. we needed to establish a second team that they could answer the requests for help, (3:02). how to apply and the questions that would come up and they could answer. We trained the team of support admin, and a core team, trained in how to handle the patients, and how to handle (specific) infected conditions. The second team was trained to handle directly when it comes. K- Let me explain, in Iran they have 4 tiers of support teams, as I explained last week, there is one that is teaching how to make things, one is where people come and ask for support, and in how they can get help, if it is of the conditions they have seen, then they have built a team behind, who advises them, when the people come in with illnesses on site. Then that team has another team behind it, which are called advisors, like the Central Committee, with doctors sitting behind advising, all the cases. (In summary again), so they have a team which teaches how to make things, and a team which actually comes in when they want to know what happened with their Cups, or what conditions they have, like I told you last night we have the doctor asking for help. And then they have a team of administration who are trained people who can advise on making the Cups, and a team for medical application, and this team is supported by the 4th team, which is the central, and mainly doctors and they're what we call the core operations. (3:04). These teams know that they have to follow the protocol which was setup by the KF, and by the advice of the doctors and people who are in charge. So we established a 4th team which is made up of doctors and Mr. Keshe, and they advise how to use the medical operation, how to use it to fit the medical protocol. So this thing (organization) is all medical doctors and people trained in medical things. .. This way we have established a link between the patients and doctors directly through the support teams. (3:06). Until the moment that the patients don't report a full recovery, we stay with them. K- Let me explain. They teach them when they come in. In each center, within 2 hours in Iran, more or less, they can respond to anything. Last night we had it in the city of Massad, from the time she received the call from the doctor, until she had the bottle in the hand, was less than 1 hours. Actually the reason was that half of it, they left the bottle with the security, because they couldn't go in the hospital, because the security didn't know it was to be delivered. These people who are responding very rapidly, they are continuously making the Cups, and having the Gans's ready for this patch, and they manage it 24 hours a day. What they do is, rapid response team, will get to the people and initially give them a glass of the Gans Water, which they can use immediately, and they give them a Cup of Life, or a (ready made) system which they can just put in a glass and add saltwater and start producing it. And they leave them a leaflet explaining how to do it. They also teach the people who come for support, online, how to make the Cup. They not only get the water until their Gans's start producing, they get instructions for the Cup. Those who can't do it, volunteers will go to their homes and give it to them and see how they are. It's very extensive, the KF team is literally covering the whole of Iran. This is thanks to MM and the KF team in Iran, this is what she is trying to explain, how they set it up. It is well planned. (3:08). It is literally military precision the way they work. I couldn't even, by the time they sent me a picture, they said, this is a green jar, .. while they left the depot to go to the 2 doctors. They actually received 2 bottle, an extra one was given to disinfect the environment. It is extremely well organized. We have become an alternative health ministry as you call it in Iran. They are helping in Iran. I stay in the background, operational and giving support. And on the Chats. I put a note on the German language Chat, and Austria, and part of the Belgium. Get in touch with Klaus at the KF Austria he will organize you to be in touch with us. The whole of Austrian society is closed down, we are supporting in every way we can. But you have to be organized the way MM is explaining. It saves life. Carry on MM- When we

realized that we couldn't move fast with the Ministry of Health, and the government, half of (them ) are sick, even the doctors are sick, there is nobody in the offices. Iran is hit with a second problem, Saturday is the New Year, they usually take a holiday. (3:10). So everything is in disarray, not only half are dead, half are on holiday and half are in hospital, so you can see how KF has taken over the administration of this situation in Iran. There is no other alternative, because even the ministers aren't there. And as you have seen the head of all the top religious leaders have all died, and the doctors have died, and are dying everyday. So you can understand how KF with having no one to work with, because they are all "chickened out", in a way, or are dead, or are sick. They have started taking over the whole situation in Iran, which is actually to support direct. MM- Even we are facing with the 3 weeks of holiday, KF has taken the steps to cover the nation during the holidays. As we know everyone is confined to their homes, everyone is afraid, no one is traveling, we have decided, (3:12). to take the public information channels. As you know this is not a medicine this is a method for people to help themselves, so we are using the videos and voice recordings of people who have used the T, and how they help themselves at home with it, and to send it to the media so that they can see how it is used by themselves at home. K- There is an international law that says you can do anything you like at home, you can even take a poison, or alcohol, or a pleasure, nobody can stop you. There is no legal frame of work that can stop you from helping or taking alternative ways of life, inside your home. So the people are making these things in their home and are reporting back what they have made and are sending these videos to the media in Iran. Because there is no Ministry of Health approving anything, because half of the Ministry's main doctors are dead or contaminated, because they were not expecting this when they were doing the first tests, without knowing. At the same time there is no ministry to approve anything in Iran because it is all in disarray. (3:14). So they have found a way to show the methods and how people are reporting. MM- We'll give you an example, yesterday .. the volunteers went to an old people home to show the people in different areas, how this works, and the management agreed for them to go in yesterday to show. But when they went there, there was no management there, because they are all infected. If I am correct, in that old people home 1 doctor and 1 nurse has died, and 3 old people have died of the virus, so none of the managers are going in. It has been left in the hands of more or less, the cleaners to look after the Home because they are all scared or infected themselves. When they went there yesterday to show them how to do it, there was nobody, not even the cleaners. None of the members wanted to accept the responsibility. So they were faced with a new challenge, and they made a decision on how they are going to solve this matter. (3:16). What they did was when they went into the infected building, they knew they were in an infected area, so they kept on spraying themselves with the Gans Water so that they wouldn't pick up any viruses. When the staff in the Home realized what they were doing, they asked them, what are you do. They said they were disinfecting, because they weren't wearing any masks or whatever (suits), and they wanted to know more, but by law they couldn't use it in the building. So all the staff came outside the building, because outside they can do whatever they like, and they started training them outside, how to use the Gans's and protect themselves. They took all the Gans Water, now the staff took it themselves into the building. Because they could see it. You have to understand that all these people wear masks and everything else, but the KF team is very open, they don't need (masks), because they carry the material with them, and sometime they wear masks if they feel like it. ... (3:18). .. MM- We found a way now, instead of going to the management, they go to the staff and they take it in ...

.. They see in the hospitals that everybody who goes in comes out dead, and they see this and know that the hospitals have no solution. So when they see the KF come in they accept with open arms. (3:20). This is the way we have found to get into hospital ..

K- This is what we told you before, the Chinese government put many people in beds and they died, they started cleaning up many of the centers that were closed because they are using the KF T with their patients. This is one of the reasons they say they have overcome and the Chinese are opening the closed hospitals. Not only are they disinfecting, because as these patients go through the process in 24 to 48 hours, those who haven't died, are literally cured by using this T. You will see, as we have been promised by the leadership of the Chinese Government, the KF will be thanked for service to the nation. You will hear it very soon, they have already told us. But in Iran we don't have that position, now we have to get over the bureaucracy of a Government that is half dead, in hospital, scared, or on holiday. (3:22). What is interesting, .. the pattern of the leadership follows the pattern of the people who work with them, and we have seen the ministers lying to the people, the same as ?? . And ministers do not, with contacts in the Government and senior advisors killed, they refuse to take it up, but they want it for their homes, wives, and own children. This is the problem you'll face in Italy and every other country. ... Last night I explained to you that a doctor came in on the channel and explained that her husband is a doctor and he is dying. He took the virus sometime before. .... they tried every protocol ... this came to the emergency, I took this case myself ... (3:24). ... the material arrived to the control room.

do you know which one is salty or sweet. she put her finger in one and put it in her mouth, and started shouting, "wow .. this thing I just put in my mouth sent a shock through my body to my brain. What is this thing?" I said Madame you are 100% infected. After a few minutes, she said, "you know something, I feel fresh. Something has gone out of my body." I said, you are infected. She believed in it as a doctor, because the first time she put her finger in it and then in her mouth, because she got a full whack, ... when she tasted and could feel it. She said, "this is going to save my husbands life." Tell me what to do, and I went step by step with her, I spent 2 hours on my phone, .. She sent me picture of the husband in the O, and later he was sitting up. (3:26). .. I will bring her in, she is asleep at the moment. She will tell you. The medical teams have no choice on the frontlines. ...

The strangest thing is he was infected for a week, and he saw many people in that time, now you can see how many people are getting infected. MM job is now to send a team to that village to cover the patients who got the disease from the doctor who tried to save them. This is the problem with our medical team and why we have to save them, because they are the frontline and they get infected and before they know it, days go by and they infect everyone they come across. .. (3:28). ... We learn from you that whenever there is a problem you use that problem to overcome the problem and it works. This is the way it works ...

(3:30). One thing to notice that the Iranian New year is most important.. it's the busiest time .. with this Corona is all shut .. we saw this as an advantage we can use this .. MM comes from this background of media ..

(3:32). .. (media people) they understood and from yesterday they started producing films and videos. Most of the famous actors and actresses of Iran will make these videos about the supporters of the KF One Cup One Life, and how people around the world ..

can support themselves and teach the others. ... to inform them of the One Cup of the KF

The film producers of Iran said, they thought they would be home resting .. but with what I have seen my job. (3:34). has just started, we have to save the nation.

.. if you notice it is very usual to have 2000 people on the channel .. they are live online. These people who come on the channels we teach them one by one and train them to become the (3:36). next volunteers. ..

.. The lady Dr. who called us last night had actually been in the Chat as one of the doctors for 2 weeks. but she didn't believe in it or carry on (3:38). anything with it. She sat there and thought this happens to the others .. she tried all the traditions and protocols form the hospital and it didn't work .. (3:40).

(3:42).

(3:44).

MM life is a devoted life for humanity. .. (3:46). .. MM is directly in touch with these doctors. .. once this is all finished she'll go to Sepah .. so it will go nationally... we are not asking you, first save your husband and family .. for souls to wake up ..

(3:48).

(3:50).

(3:52) ... K- About 3 or 4 days ago MM asked me to make a video addressing the nation in regarding to the virus and what we can do. We brought in a camera crew and made a 10 minutes .. the way I gave a gift to the Chinese on their New Year, we have given a gift also to Iranians on their New year.

(3:54). .. it was put on and 18,000 people watched it within the first hour and it has given a lot of hope to the Iranians. .. we don't take advantage of the situation to support opposition, we work within the structure the government. ..

This was not done in China they stole a gift ..

Something changed drastically this past week. Last week in the teaching a lot f you didn't realize, the voice of a Chinese telling another Chinese that he is working with the military and part of the military, making the Gans of the nation, but they don't want the KF to be mentioned because it has to be Chinese. And we understood, (3:56). the Chinese leadership was sitting there, the CPC and the head of state was listening to that broadcast. They realized they sent the head of the nation to Wuhan City by stolen T, and this brought a huge shame to the Chinese Administration. A lot of you just listen to the teaching, but we target our work for the benefit of the nation. What you saw, president Xi going to Wuhan City, .. was done by the use the KF Pl T. the leaders were told this was an Army development, which in a way, the voice recording of the officers and the KF team, was a clear stealing of T and changing the name, and it's an embarrassment to the Chinese nation. In a way, gave a lot of ?? to the voice of president Trump, that the Chinese do nothing but steal T. This way they got caught red handed. President Xi has to respond back on how he attended a meeting in public, saying they have overcome the virus, by stolen T, and then they show it to their own people as theirs. This has brought a massive shame to the Chinese nation and the KF supporters. Some of them said after it is the right of the Chinese to take the T because you gave it to us. We gave you a gift, you respect the gift, not steal the gift and change it. This is one of the biggest problems, (3:58). ... My call goes to president Xi, change the

Last weeks teaching was listened to many world leaders,  
.. In a way I understand why Bill Gates has such a huge hatred for the Chinese because they stole ever thing he developed ...

(4:00).

... Shows picture. The man on the right (without mask or protective gear) is in one of the most secure hospitals in the district. You see a doctor in the background ...

(4:02). .. He is in the hospital disinfecting without a mask ...

.. It's amazing how this knowledge has helped ...

He puts everything on the Internet .. The head of the Corona for the district is using the Gans inside the hospital. (4:04). ... I want to explain the difference between the KF KS in Iran and ..

This is a picture of Iranian KS

(4:06). Next to him are the military, they would have told him you don't need a mask ..

.. a nation that accepted the T with open arms. What is important for us is that the governments understand the T .. how easily they can safeguard a nation when a gift is given ... (4:08).

waiting for video.. what you see is the protocol the doctors given to the people in Iran.  
.. everyday we get a new protocol .. (4:10).

.. offered to America they said 600 video against him, facts on Keshe they refused the T.

(4:12). .. Shows picture of head of in Iran. video starts. You see the Gans water and the brother taking the video. .. 3 days drinking from the Water. ..

(4:14). This is the man who was saved by his brother. and the truth is we are all brothers. You can see, if it wasn't for his brother he would be dead. It takes years to educate these ..

(4:16). MM - I always said that Iran will become the cradle of this new knowledge. ... then we can teach the others because we have been through it. MM has to leave because she has an interview with Iranian Television ... We think within the next 2 to 3 days to get it through ... (4:18).

.. plays another video ..

(4:20).

.. another video ..

(4:22).

.. I wonder if the west would except the T or change the name of it, like the Chinese did, or like they accepted the Mithraism and changed the name to Christianity and Vatican.

Is it the second time the Iranians culture touches the Catholicism and the west, but this time with Knowledge and the belief in the Creator. (4:24).

.. it's the job of the Iranian nation to look after its children .

.. I am ashamed of the Sepah and Ministry of health, for being short-sighted, they always gave (the T) to their officers ... (4:26). I want to see the pictures in the next few days when he goes home, then you'll understand. Man's body is made of water and the only way you can save it is through the water. This is the water of life. ...

Stephanie: You always said in Mozhan training, that weaknesses can be turned into strengths. I think this is the time, (4:28). we can learn from the Chinese and Iranians ...

.. I was far away from it. Now I start to be in the middle of it, and I have no material, I am not organized. (4:30). It's double the job now. This can all be avoided. Those people who are far away can learn from others mistakes and can get ready. .. You always said in the Mozhan, that every weakness can become a point of strength. This can be the best thing to happen if we learn from each other...

K- You know what I suggested to one of the doctors .. those of you who use the T in all the nations, make a batch and put on it, KFSSI, I am free of the virus. You know in the time of the Holocaust the Germans forced the Jews to wear a tag to show you was a Jew. Now we should use the KF logo on the street with it, you know is safe. You can cuddle and say thank you, and bring the nation back to security. When many people, (4:32). wear these badges, the nation will move .. Just write KFSSI and anybody sees that knows you are safe. We need to bring confidence back to the nations..

The American, Chinese, Russian, etc administrations, you are all online, we see you in the background we are waiting for you to move. Not to let your nation move, that you will not be there to move, they'll move you from office, because you were incompetent when there was a cure, and what you called yourself the vaccines did not work. ...

(4:34). .. the Whitehouse which is noting but black and red with the blood of people. Do you remember what I said, an eye for eye, and tooth for a tooth. Did he take a life, and he was so proud, now is he going to pay for the life he took. He took the man who was loved by a nation because he kept his nation safe ... he shut down all the terrorist groups. Would he pay an eye for an eye. Now we shall see. You take a life, you give a life. According to what I heard in the past few hours, 20 world leaders have been contaminated by him, in the meetings since he returned from India. and his daughter, happy she took one ?? in India. I think they'll make a golden statue, ?? that's all it was, the briberies . (4:36).

.. the banking system will collapse in the west if it goes 2 more weeks ...

.. many KF KS in the west are coming to us because they have nothing to support their families, because every thing has been ?? We'll open the donation channels to support this. The KF Australia wanted to charge for it We said no. .. Jim are you in background. Take over please. (4:38). We need huge amount of financial support to be able to support feed units, and be able to support humanity. We have received less than \$250 in donations in the last 2 moths.

Jim. We have spent the last 2 years developing a training program for agriculture. ...

(4:40). .. We have developed a training program.

(4:42). Go to the Australian KF website ...

(4:46).

.. One Cup One Life Kit..

(4:50). .. K- Thank you very much Jim ...

Going back to what I said at the beginning, because we have found the solution to Coronavirus, is looking beyond, that is why you see these websites. For us Coronavirus is resolved, it's just that your countries and governments come to accept it and take it up. It has to go like in Iran, on national TV, and taught on a regular basis until the nation can save itself. The launching of this and other things. (4:52). We were involved

in it, and have already spent 8 weeks on it. We have seen the beauty of it in Iran, and the stealing of it in China. Now we are hoping we can help the rest ...  
We launched a new product in agriculture. ... It's an agricultural unit that we can adjust to what need .. It's a pallet size unit, self-assembly ...  
with this you have everlasting fertilizers ...  
(4:54).

It's very simple and can be used by individuals. ...  
can clean atmosphere in the cities. ...  
(4:56). To create a clean air in Iran in the next 12 months. The same system will be delivered to any country. .. We'll buy back the Gans which it produces. ..  
it's around \$12,000 ...  
(4:58). It's more or less like solar cells and extracts CO2, and if need they can become like power generators, we discuss that later on through the KF.  
Any other question?  
Stephanie: You asked what my job is ...  
.. focus on the things you can do ...

(5:00). .. We need to focus on what we can do. If you have a pain in the back and you focus on it and it becomes bigger and bigger. .. I'll stop talking ...

(5:02). .. she knows people on the frontline in Italy, many are dying and it is unnecessary ...

K- One of our main targets in the coming time, once we go through the Iranian national TV, is to take the clips and show them to the national TV's (around the world). At the moment we are helping thousands. Now that we show it on TV it will help millions. .. We'll curve the Coronavirus in Iran, hopefully during the New Year. If we can do this in the next 3 days, sending people home healthy. KF you are right across the planet you have to unite to make One nation. You are the seeds of that One Nation. (5:04).  
Governments will govern but will get inspiration and support through the UC members. You have to be there to learn to advise your governments, support, and unite. One of the biggest worries for governments will be, as I said before, they know that they will be no borders in Europe, because they took them all down, so they brought in American Forces to become a colonizer of the American or British government. Now this is how the Rothschild's, through British Monarchy, through American forces, which they are owned, will colonize the whole of western Europe. Now you understand on the other side British supported with a company which Gates owned in England, which makes the Corona vaccine, suddenly to take shape. We see the bigger picture, as you are aware, Gates owns finances, majority shares, in the background, of the vaccination company based in England. Now you understand, how the British never gave freedom to the American ..

(5:06). .. Colonize through the Americans, ..

.. Someone went to his wife ...

Learn from the Iranians.

.. When the vaccine is given free by the government, you pay through your taxes....

(5:08). .. American troops to enforce the vaccinations ..

.. tried to buy the KF ..

They released the virus to become the leaders, and that virus will become their demise.

Ask people to release these videos ...

(5:10).

.. We release it very soon ... The rest of the world will know about the Corona blocking it up won't stop ... You can vaccinate for the lung one, but not the brain, heart, kidney's womb one ...

(5:12). ...

Are there any questions? Q: About healing reactions from using the Gans? K- We don't heal .. balance the energies ..

Q: Can a high rate of heart be one of the healing reactions ? ...

(5:14). If you have a higher rate of heart, if you had open heart surgeries you are advised not to use the Gans's directly. Use the Gans's to create the environment ..

.. the virus is calcifying .... if you use the Gans's and you have a reaction, it means the Virus is ... Because you don't have the knowledge of the science of this T. I explained that you make the ?? Mg. Ca and Mg, (5:16). are of the same strength, so this water of the Cup has the strength to match the salt strength of Mg or Ca, this is why it is effective. We match birds with birds. ..

It will take millions of years for man to understand what I gave you in the Cups. Those who use straight Zn or Cu, say the system doesn't answer so good, because I designed specifically the spiral system. Each one covers a spectrum of the field forces. The same on the other side. If you divert from what I have given you, that is your decision, then in this process you create Mg. If you use flat everything, sorry (no Mg), and then you say it doesn't work so good. Because you don't listen. (5:18).

.. because when I make things I calculate a lot of things you have no knowledge of ..

.. When I make a MaGrav I get 1 megawatt, when you make it ..

I keep on telling you, "I am the Messiah." You will soon understand. But in this process you are messiah of your soul, but I am ..

(5:20). and you will succeed. ..

.. Those who betrayed us in Italy are paying for it ... you are not worth spending time on. Follow the procedure of the springs. As I taught you before, this covers the variation between the two sides. This (flat Zn plate) connects you to the physicality, this (Nano Coil) connects you to the air and water, and this (Cu Coil) connects you to the water and the ?? water. You will understand soon. (5:22). These are set in a specific way. The soul takes the position of the center, and ( ) the soul of physicality, has to take its own dimension. And the two will run a beautiful system. Understand the KF team has made ..

(5:24). .. So you two have a problem understanding the English ..

(5:26).

Wikipedia has to be taken off the Internet, it is another form of controlling ...

(5:28). .. Are there any other questions. Q: Is it possible to use CuO<sub>2</sub> in the dry state?

We advise you not to. Not in this case. Q: When I fill CuO<sub>2</sub> with water it turns blue after a while, is that normal? K- what turns blue ... The Gans or the water? It's because when you dry it the particles take part of the shape of the M state. ??

.. we can't get a clean water so easily from it ...

.. This is a true picture of ...

(5:30).

.. I have seen these in the U, don't forget I am the traveler of it. .. (you didn't take the video ...) you know the video we took from the U, you didn't press the button, it's not recorded. .. the video you took with the machine is not there ... This is the exact shape of the U and the galaxies. Do you see these (a photo of many raw eggs in an oval container), the shape of the container, (5:32). is like the U. Do you see how the yolks have spaced each other, even it doesn't matter how we do it, there are some under or over with the same space gap ... this is a copy of the Gans in water, they space each other, you can't bring them any closer ....

.. it doesn't how many we put in, they still keep their space gap.

(5:34). .. it's a few seconds later but they still can't touch ...

.. I'll show you how galaxies are made because I have the video ... (5:36). I'll send you this video.... This is how the Gans's do, the other video is the work of the U when we get movement of the fields ...

.. my inspiration comes from the mixing, boiling and cooking ..

.. plays video (5:38).

.. When you stand outside the U and look at it this is what you see ..

(5:40). . This shows how Stephen Hawkins was so wrong ...

.. the center point in the Unicoise is the soul of the Creator, it is so simple. When you decide to stop it all the universes come to an end ..

(5:42). .. The universes keep their space ...

Now you understand, nothing stops with Coronavirus, we are still proving this T, it is built with ?? and doing a lot of work in the background. Any other question. Q: In Bulgaria Corona hit =us in the past week. We have many reactors .. Can I make a dynamic reactor .. instead of the Nano coated coils? K- No, you cannot use at this moment, any dynamic cores, (5:44). if you think to do something for Corona. We said, many times, this thing changes energy and you create more, deviation into it. Q: Because I created Gans's with dynamic cores and plates ???

Q: .. I want to know if you know someone involved in Senegal, all markets will be sprayed on Sunday ...? K- Sprayed with what? there is nothing you can do. (5:46). Q:

...

.. What is the temperature of Dacca or Conakry. Can anybody tell us? (5:48).

32 degrees. Now they have viruses on both side, the wisdom that when it gets warm the virus goes, (5:50). doesn't exist.

.. so this virus will stay in the summer in Europe. ..

(5:52). My biggest fear, as I said before ...

.. we see the behavior of double stranded, then it will be deadly ... connected to the O, ..

(5:54).

.. if it mutates, the mutation will come, most probably it will go from the strongest to the weakest, now it will go from the strings of the O, will ?? definitely jump to nitrogen (N), then as we have seen, some of the plants will start responding, and the virus will go into plants. When you have a strength on the O side of the hemoglobin on the dynamic side of the Plasma you connect to humans and the flesh, or horizontal people, when it moves to the n side it goes to all the plantations, all the greens, what we call vertical

people. That is the mutation .. we have seen the people who have Corona in the stomach and everything has come through this channel ..  
But when the N and O lines link up it will take the soul. And one of the reasons we keep on advising is please use as much as you can, because then a different dimension will appear, and mankind does not want to see it ...

(5:56).  
Q: Jalal.

(5:58). Q: In the news it says, a nano tech Italian company, which developed a nano tech material to sterilize the surfaces, and it will stay for 2 years without any intervention. A guy is asking is that a Gans or something else? K- We do not know, we have to see what it is. If it is a surface. There are a lot of nano technologies, and a lot of KF KS have turned things into their name and are trying to break into the countries to help. We welcome it, if it is part of our work, and they are expanding. That's what we did to the Chinese. (6:00). ..  
But they can't get a patent on it. the way Red Circle wrote the patent no one can get in it. Q: They are now working in Milan. K- They are all over the place. The Germans are doing it.

.. Some of the people in health organization, have taken a huge bribe from the pharmaceutical ...

When

.. These vaccinations carry huge amounts of mercury ..

He jumped, but he can't jump his soul. I have him and I'll bring him to his knees

(6:02).

(6:04).

(6:06).

(6:08).

.. Now you understand why the Vatican have to go.

Two microchip companies are using the Nano T

(6:10). ... W brought the T for mankind, from the Creator ...

.. it's a double O ..

(6:12).

Any other question about Corona.

CH3:

Please make sure you don't use any CH3, remove it from the house, or let it go down the toilet. You can always make it again.

But a lot of you make the Gans's with the Cu and a Cu, and it goes yellow like a CH3, this means that your Cup doesn't have enough O to link up with the Gans of Cu, you're

releasing from the plates, so it stays the color of the plate. When you add some water or air into it, it will go green, or it is a high energy O it will go towards the Zn strength ?? If it ?? CH<sub>3</sub>, if you have used Zn in your ?? side, and not steel in your ?? side you should get. Sometimes you do get CH<sub>3</sub>, looks like .. but is actually Gans of the .. it's a different color, it's more towards the yellow, CH<sub>3</sub> yellowish color, that is the Gans of CuO, at the strength of, (6:14).

(6:16).

Q: What about Deuterium and Tritium? K- Deuterium you have no problem. Tritium you had better move from the ?? At the moment we don't want to make available any energies to extend the life of the Gans (means> virus). You might need it, (if you keep it away), when it comes to the healing part. If you get desperate for food, we'll show you a way, that this will lead to the creation of energy. But at the moment we are trying .. when you are safe from the virus, and you are hungry, I'll show you a way to feed yourself. But keep your things, keep them away at this moment in time, from the environment where you live.

(6;18). Can we call it a day. We are trying to extend the Coronavirus (teachings). I would like to thank the Iran teams for taking the lead. ..

When we can release it internationally ...

I have asked the Sepah to be ready to travel to every corner of this planet to protect One Nation ..

(6:20).

Video

END
