

323rd Knowledge Seekers Workshop - Thursday, April 9, 2020

* Birthday of Mahdi, Messiah

Coronavirus will become cancer

How the virus's calcification is converted back to Gans state

ENGLISH TRANSCRIPTION:

(:19). .. It seems that, we are still getting more tied up and more struggling with the situation which is empowering the whole world in every aspects. According to the statistics, over 3 billion are house down locked, which means we can't move freely as before. The banking systems shut, hospitals overflowing and overloaded with everything else possible. In so many ways, as we have seen in many videos, and information coming today and in the past week, dead bodies on the street, that even the police does not collect. According to President Trump, as we said, we've seen it in China, in a different way, in Iran the same way, and around Europe, and in South America, picking up to the same. President Trump yesterday said, he admitted, that he was shocked seeing bodies put into the bags in New York, and put in freezers, containers, where they used to hold meat. This has become the value of the man, and in so many ways, the old system is collapsing. But you have to understand, many organizations who set this up, to enjoy the fruit of it, to become part of, to run the whole .. themselves have gotten entangled in this position. We've seen nations covering up, nations lying, nations doing everything possible, but there is a lot of hope and joy, in so many ways. (:22).

Today is the 9th of April, if you are behind in Iran, and across the world, it is the time of celebration, it's the 9th day of the 12 day celebration, is a holy day. If you are a Shia Moslem, in Iran you celebrate the birth of Mahdi (Messiah), and if you believe in any other path you are waiting for Easter to come next week. In so many ways, we have chosen the path of so many beliefs, but we never got to the truth. In so many ways, has the time come for Mahdi to come? It does not matter in what name, shape and form we call upon it. The crisis will become worse, if mankind does not find a true solution, not for the physicality of the man, but through the Soul of Man (STM). In so many ways, mankind has to learn a new way, a new dimension. A new way to preserve his physicality by merging, submerging and elevating his soul, that the soul looks after the physicality while the situation is out of control, for its dimension of life. Two or three years ago this was hard for many to accept, but the past 2-3 years of teaching has brought Knowledge Seekers (KS) to understand. In this process we understand more and more that, "is this crisis for man to learn to look inwards, (:24). and understand the source of his own creation?" Or do we need to elevate the STM with the gains, of Gans and drinking and covering? Do we in reality, when we spray you with Gans number Cup 1, we extend the dimension of your souls, that you have never understood? That we allow the soul to take over, and the present knowledge and science cannot understand, that for the first time man has a technology (T), which can support his souls, to protect his physicality, and it's the soul which decides, I want, I need, I have the desire, to live, to extend.

In the past weeks, we baffled the Chinese government, and we heard so many lies that, even the paper and the concrete cracked, with the loads of these lies from the Chinese officials, that they controlled, that they had only two or three thousand or five thousand

deaths. Where we see in America, with even some extent of openness, the president admits, we will be happy with two or three hundred thousand deaths, as he announced in the past 2 days. We will not... I cannot imagine, that America will run into 1 million deaths in next few weeks. In reality, if America, with all the things they have under control, accept 1 million, the Chinese with just about five times more population, (:26). they announced they only had a few handful? And now, as we hear Wuhan hospitals are full with the secondary Corona, that the people have gone back home again, to die. The streets of China are empty, the same as New York, London, Paris, Rome.

The only city we see wobbling and no, as if nothing is happening, is Tehran. People still rummage around in the buses, and in so many ways, they are protected with the soul of Mahdi. And we understand what is about to come? I've been in the background with this crisis since the beginning, with Chinese, releasing the One Cup, and supporting the Iranian nation through the Keshe Foundation Farsi solidly, with the team of dedicated people. Soon the Iranian government has no choice but to release the understanding of the new T. Out of all this harshness, nothing touches more than, what I've asked, Rick, if you can show the video I just sent you.

Look at this video, and you'll see a young man, in his mid-30s, battling with Corona. On Sunday night, when we were at the Keshe Foundation Team in Tehran, they said the sister is here and she wants help. (:28). Can we give the protocol and tell her what to do? Her brother is in critical condition, has been in the hospital for days, and he is on all sorts of machines and everything else. Strange enough what we'll see here, even the West, the American hospitals, the European and the Chinese hospitals have none shown such a dedication and such a latest equipment in supporting a normal man's life. He's not anything special. He is a normal man who happened to be in the hospital, with the Corona and you see Iran is well equipped. Iranian hospitals with all the sanctions put on them by Americans, looked inwards and built the latest machinery in Mashhad with the support of the top people, top of Iranian scientists that even the Iran emergency rooms are envy of the West. But what is important, is not that these manmade machines support life, it's the story of the man in the bed. When I spoke to the sister of this gentleman, on Sunday, with the KF team, he was on the deathbed. He was on the last stages. We gave advice on how to use the Gans water. He was connected (with machines) to the stomach and breathing system. And, as we know, these are the stages when there is no return. (Rick dropped out from Internet ..) ... (:30).

What happened is the medical team in the hospital had no choice, they had never tested the Gans technology. The sister being a nurse, tries to adopt, and she just sprayed the body, not following the protocol, which she was given. Then, lunchtime, I was told his situation has gotten worse. His breathing has gone up, his blood pressure has gone up and it's dangerous. I asked a single question, "have you followed the protocol?" "No, we just sprayed, it was just sprayed." I said, "no, it has to be followed according to the protocol we set out." So, the doctors knowing the patient is dying, they left it to the family and they said to whatever you like. The sister follows the protocol. Hours later, the blood pressure drops, the breathing drops, (:32). and this morning he is discharged from the hospital, totally discharged. In the video, which will be played if Rick appears, ... he is asking, he is telling his sister, "I want to go in the morning, I don't want to stay until afternoon tomorrow." He has got 2 children, and in so many ways, according to the rest of the world, and the scientific world, he should have been in the coffin by now. ... In that process, we saved this man's life. He went through the trauma, knowing we have

2 or 3 videos from him everyday, from the sister in the hospital. We can show you a number of videos from him.

The KF team in Iran has achieved miracles. The Iranian government is holding on until everything is 100% correct, when we announce the technology breakthrough. But as the KF is One Nation, (:34). we have broken through. Why I show you this video, is very simple, unknown to us, unknown to the KF Team, in the same hospital, in the same emergency unit, and the same time as him, some 10-15 days ago, a woman of 30 year old with a six-month child was admitted, and she was parallel with him, in the same conditions. Yesterday in the afternoon, the hospital authorities were faced with one patient surviving and wanting to go home, and the bed next to a girl, under the same condition, going into heart failure. In resuscitating the body and knowing that they cannot do anything, they say to the sister, the family of this guy, that, "now you can use your "magic water" and see if it works, she's dead already, she's gone, her body doesn't work." The Keshe Foundation Team rapidly deployed 4 of them, with a doctor to go to the hospital, but by the time they arrived to the gate of the hospital, the mother was dead. What was strange, was the doctors wanted to see if the KF technology really works, and can save lives, and their egos and stupidity, led to the life of a child, not having a mother for the rest of her life. (:36). Where they could have allowed the same to be applied on her, and saved the life. The doctors wanted to prove that they have 2 parallel cases that they can compare, a man of 35-36, and a woman of 30, one with 2 children, and one with 1 child, and then, these doctors played "God's game." How many more lives are we going to sacrifice? Or is the reason for this a bigger picture, a bigger game?

Can you play the video? [Iranian]

By the time we put this teaching out, he should be home with his family. (:38). And by the same time, another woman will be buried.

There is a huge question mark has risen internationally. Why KF technology with such effective work is kept out? There is one reason only, the king of Belgium. The lies, the fraud cases of their own fraud, has put the life of many, many people, online, and dead. And now we understand why so many governments are holding back, because of the lie and the cheat of the pedophile king of Belgium. And we make it a clear line. There should be no king on this planet. There should be no king, that they can play with these lives, in their stupidity, arrogance, and the greed and abuse of man's life.

There is two courses running at a moment internationally, in the background. One is that the KF should take over as a One Nation Organization, and the other group which is the Illuminati's, Rothschild's, Gates, Rockefeller, other Foundations to create what they call immunization control, and then control international. But there is one thing clear, as of today, we launch a massive movement on how to overcome all the pharmaceuticals, even using the pharmaceuticals medication to overcome the man's illnesses. We don't destroy them, we use them, to destroy themselves in a very simple way. (:40). Let me tell you the reason why. At the moment, medication has become restricted. Many corners of this planet there is no flight to deliver. We will see 1 million people dying of Corona, what we see millions more dying from the lack of medication, which is not, cannot be supplied because the pharmaceuticals producing these materials are closed. Secondly, most of the stock is kept for emergencies. The whole problem is very simple. Those who are ill, which was the bigger plan of the Gates Organization, is to get rid of the weak and the sick. Many people will not die of Corona, but will die of a lack of

presence and delivery of medication. We have two choices, we take over this part and save many lives and run as One Nation Organization, or we wait in the second part, more cancers, to kill more of. Now you understand the bigger plan of the Gates Foundation. When the weak are gone, when the sick are gone, we have a healthy nation. And the new world president, as he sees himself, as "the Bill." Now you see the bigger plan. You don't need to do much, (:42). you created the virus to kill the Chinese and the Iranians, running out by the Italians right across the world, then, now a new strategy, we see it running, killing as many weak as possible, no medication. Then everything is controlled under virus, and what we call, Immunization Control. In fact, we estimate the total death, if it carries into 6 - 8 weeks in the Western world, in the region of 100 to 200 million across the Western world. The figures will not be Corona, the figures will be lack of medication. Dialysis machines not supported. Heart systems, surgeries, heart system failures, cancer, reduction in receiving chemotherapies, and so on and so on.

The Western governments are shouting, "The Chinese didn't tell us the truth how many they lost because what we see in our figures does not show their figures, they lied." It doesn't matter whether they lied or not. No one has the solution. In the last weeks, I repeatedly increased the infection rate, from lung to brain, to intestine, to sexual organs, to bone marrow, to nails and the skin. And when I discussed it with one of the leading scientists, past 48 hours, (:44). he said, "the skin, never." And amazingly, the French are reporting it, massive amounts of skin rashes with the people who have Corona, and they don't understand what the rashes are. And we announced it. It will come, because skin is part of the brain, and is the same as lung. It had to come. The strangest thing is, in the first case we saw in Iran, in past 48 hours, it's very easy to detect. When you spray, the body of a man with the Corona skin, it goes through excruciating pain of skin. He cannot stand the pain, he cries, and it's worse than being chopped off the fingers, or whatever they call it. And why the pain is not there, until you spray the Gans Water on it? Gans number 1 immediately shows it, and the only process, is to wrap the body with the Gans solution, and repeatedly for about 3 to 6 hours, until the pain goes. Until you, in a way reduce the energy of the Ca, which created that rash, that, what we call, redness and bleeding. It's the salt, Calcium, which caused it. You call it cirrhosis, you call it any other name you like. The pictures coming from the French organizations explicitly, clearly shows it, and we understand it, that this is exactly what it has been said. You see. (:46). I'll send it to you because now it's posted into KF Farsi language.

...

It is now physically visible. What was happening in your lungs, and what was happening in your brain, now if it moves to your skin you see the Corona for the first time. And this is what I taught you last week, that if it becomes, if it changes and mutates to make the second of its own, then mankind is in a big problem. ... and you see more and more. (:48). Now for the first time .. you saw it last week, we showed it to you with a simple picture from the KF Universal Council (UC) from Italy. When she sent us the finger (photo), because she was affected. She took it as, this is not going happen (to me), and guess what, she got hit by it. And she can see it on her finger. She has it, and we managed, and we worked safe and heavily with her till we managed to get it out. She says she is doing well. You could see it last week in, (shows the picture of redness on finger and feet). This is what you will see. This is the Corona, and in the future this will become skin cancer. In so many ways, now we see, this game of Corona will not be ending. Rick, if you can take a picture of this and put it next to the picture of what I just sent you, please. You got to understand, (:50). many Knowledge Seekers

(KS), knowing and being around (the technology), did not consider themselves to be in danger. Two of the Universal Council members have been hit, and up to now, we have managed to save their lives. Both of them critical.

The Corona does not know race, creed, nationality, or color, as the stupid leader of the Western world says, 'there are more blacks dying.' Because now he can change everything to blame. The "blame game", "race game," has started with the world president. It does not have such a good look for rest of the world. You can see Corona on the nail and you can see Corona on the body. The redness, the irritation comes from calcification of the cell at that point. And it's like putting a salt on the wound, that's what it looks like, and that's what it becomes. If it's here (on your nails), it's (also) in your lung. If it's here, it's in your brain. These bodies have a limited life, according to calcification and the cancer in next 12 months. (:52). Most probably we will not see these bodies alive in next 3 years, even sooner, except the one on the left with the finger.

The World Health authorities have failed to protect, and it has no authority, as president Trump said. And as we've seen, the European Union is falling apart. On office buildings, the Union flag of the European Union is being replaced with the national flags, as the EU cannot do anything. We see hunger in Italy, France. We see hunger and looting in the United States, as videos are emerging across the Internet. One of the reasons there are rumors that they might cut some of the Internet, is not so much traffic, it's so much, the truth we cannot get out, we have no control. This is exactly what the Chinese did in Wuhan City, across China. In Wuhan City, they brought 1,600 specialists from across China, to see that no one sends no more videos, that it looks Wuhan City is clean. Wuhan city is dead. Some factories in China are working, but there is no guarantee and assurance, (:54). that the workers will be there in time to come.

We have offered the Iranian government a comprehensive technology, system, procedure, protocol, and functioning systems. The KF Team in Army Headquarters, have built and developed the technology, that the Iranian army can take over, and with collaboration of Sepah, to clean up Tehran. Pictures has been on the Internet. It's not something we hide. It's the time for the Iranian government to put those officials, who have bank American accounts, to be put aside, that they are not working in the favor of the nation, but in the favor of Gates Foundation. It's the responsibility of Iranian leadership, to clean out the ministries, and those who carry a double Passport, of Iranian and American passport, and waiting to cash in on Corona, and "crony" themselves to the United States.

We gave the technology free to the Iranian nation, and many tens of thousands have used, and are using it. You will understand, the tipping point will come, when one of the world leaders dies and no one will go to the funeral. (:56). There are a number of world leaders and their families, even have lost, but, there is a news blackout. Would we see Boris Johnson in 10 Downing street? And if he comes back, would he be as competent to carry the term, as the virus will be change into a cancer? The process has to be comprehensive. The process has to be as One Nation, One Planet, One Race, and comprehensive enough to save many lives.

What we want to do, is to want to bring all of the KF, all the reports, as you showed the Cups you made, we need those who saved their lives, and used it, to make videos, and

in the next few days, everyday, we play this across the KF Internet, and you'll pass it on to the world media. Short, 5 - 10 pictures, people video what they use, and saved their lives. We take charge to go into masses, and then we take control without governments, as they are not governments, they cannot even govern. There are no armies, as the soldiers refused to go on the ground. (:58). The only soldiers we saw on the ground was in China, they were ordered, and if they did not carry the order, they were executed, exactly like Hitler.

In the West, armies have been told to take shelter at home, and they might employ, and deploy a few, just for a show. We saw in America, as last week, as we supported and offered the support of the Iranian army, to help with the USS Roosevelt, within hours, the head of the ship, the captain, was dismissed, that he should not have done that, that the world knows the Iranians are coming to help the Americans, and then a few days later, the head of the whole army of that section resigned, because he knew the truth. Very soon there will be no police, as they are afraid of catching it, there will be no military, as they be afraid of catching it, they are no doctors, that most of them have died in trying to help the others, and there's nobody to bury the dead, and the virus will seep through.

There is a very, very, very weird and amazingly, if you understand it, shocking picture. Rick, I have sent you the picture. Have a look at this picture, put it next to this, if you can do it, (1:00). and then I tell you what is the biggest fear for mankind. Have you received it? Put it somewhere in between. Can anybody tell us where is this picture from? This is Italy, if I'm correct. This is a church, but the most shocking thing with this is, the seats of praying God has become the seats for coffins. But this is not the shocking wave. The shock with this is, the guys spraying and being afraid of even the dead in the coffin, two of them. Then you listen to the words of the American president, the bodies are put in the bags and into the freezer containers, and as we hear, they are moving them in New York to Central Park. But does anyone, has anyone guaranteed that the fuel will be there to run these freezer containers? And what happened when they melt, when there is nowhere to bury them, and there is no one to bury them? We are even afraid of our own dead bodies. How many times a day do they spray these coffins? (1:02). Or, as we see the beauty of the color of the shine of the coffin, it's only for those who could afford the box. As you can see in the far corner, left, there is one coffin, the rest is to come to add, it's already space gapped.

Are there that many coffins in the Vatican? Or is Vatican hiding? I can show you the pictures of the mortuaries in Iran's own hospitals, where the leading clergy's have been confined, with their name on it. How many of these are doctors, scientists, and those who served the nation? The assets of the nation is boxed.

Is the policy to get rid of the educated at the same time, so that we can run and rule illiterates? I can release a paper from the Chinese government officials written in detail, (1:04). for us to understand, to develop a technology for Corona, for the Chinese. In this information paper it says something for simple, very, very discreet - survival rate, 10%. Survival rate, 10%. Then who are we kidding? Do we believe the doctors who wrote the report while monitoring their patients, or do we believe the politicians. What is the truth, the total death total, for this game, this time? (1:06). The point comes, that, do we go out to serve our nations, or do we go out to serve humanity. And what is interesting for us is the simple facts, what is the limitation in this destruction, or do we all sit and

wait till Corona comes to us. As it was in one of the teachings, do we go in the old way of putting, "blood over the front of the door," that the virus doesn't come, as now you can cover the front of the door with Gans's, and the Corona will not come in.

As I said many times, "I am the Mahdi," and in that process, we have given you the key to survive this, that in the process, you survive the rest, what to come. In so many ways, you have to understand one simple, one understanding, one process, and that is, how far are we going to allow this, (1:08). to take over us, and do we literally hide. As we saw a couple of cases of some of richest people loosing their family to Corona, they take their life by jumping off the towers and hotels. To what extent are we going to extend this, and to what extent are we all going to hide and hope that it will not come to us? Or is all going to be in those boxes? (1:10). We don't have an answer or we have an answer, we do not know how to put it down, explain it. Or they have made us so scared that protecting our lives is a criminal offense. We can't talk about KF because FDA and the governments are going to come and get us, or have we, in a simple word, if you understand the full meaning of it, FDA, have a ?? ?? ourselves. Have we allowed a bunch of incompetent people to scare us, that even the president has no say.

I am going to release something, (1:12). very, very interesting. This is observation and comments from frontline doctors and written for us to understand how to tackle Corona. And I cut, I have taken pictures, snapshots of the picture, and this is the official Chinese government frontline. This is not from us, and what is important, read, very, very simple, this is the Chinese government, this cut out, and I'll send it to you, when we give you data, how correct our data is, from governmental report, and not by those who just gather to understand. Rick, I have sent you the extract from this report, I would like you to put it on. In so many ways, now you understand what the Chinese government knew from the beginning of the crisis. If, as we say in English, push comes to shove, we'll release the paper. The official paper written by the team of Chinese scientists to inform KF, (1:14). how the situation is. In this report we read details how they die. And read it, "if being admitted to the hospital after serious illness, the hospital treatment and ventilators is not effective. No matter if we use noninvasive or invasive ventilators, inheptions?? did not help much to eventually reversal of the disease, only 10% can be saved, as long as the .. and the rest of it." Rate of survival, according to Chinese government official document is 10%. Now you have everything together, and now Chinese cannot lie. Ten percent of you will survive. This is written by the frontline doctors. (1:16). You got to understand, they might let you go, but you come back soon with a secondary Corona. Were the Americans waiting for the truth, the Chinese truth is on the table. It says, "if being admitted to the hospital." Most of you are not admitted to the hospital, there is no room. This is why the Chinese government built so fast, in days, hospitals they called it, but is was actually what the official, Secret Service China, called it, "mobile mortuaries."

The biggest problem is that the US, the Russian, and the rest sit on my phone and monitor every squeak. So in fact, CIA knew that 10% will survive, and they lied to their president. (1:18). Is this how we are going to go, and do you want me to show more confidential reports. You do not have time, and you don't have time to play. As I said before, the Russian scientists in the past 7 days confirmed my word, that we will see massive cancers in the coming months due to Corona. This report should have been released 2 months ago when I received it. It's not confidential anymore. Then, Wuhan City with 9 - 10 million, doctors give you 10% chance of survival. 50% of the

population, they say infected. It gives you around 2 million dead in one city. (1:20). I was correct, China has lost 20 million to Corona, and will lose another 400 to 500 million in the next 3 years through Corona. But the story is worse in India, and it will get worse in Europe.

Let me tell you what we have seen, the Internet systems will go to minimum. Most probably the KF network will go down in next few weeks. You have to understand, that corporations don't have the engineers to repair the mechanical side, as the mechanical parts, making parts are frozen, not working. We'll go into emergency communications only, the telephone lines will be worse, and most of your mobile phones will not work. There are no engineers to support, to repair, unless we take the attitude of northern European nations, and just go and do it, and we'll keep it going, until it is, the last man drops. We'll find somebody else for it. Or we go viral and we save lives.

You are all sitting home. Most of you can't even move. Most of you are homebound. In the Iranian teaching on Monday night, out of nowhere, a lady wanted to speak. She came online and she said who she was, she lives in Canada, with her husband, both were infected, (1:22). she tells us that, they were infected because their future son-in-law was visited by his father from Hawaii, professor so and so. He was infected and he died sometime late last week, the third person to die in Hawaii of Corona, and in the family meeting, he gave the infection to the Iranian couple. They had no choice, and they go into the critical condition and knowing the KF work, they got support and she says, we are alive, thanks to KF and thanks to the technology because, the father-in-law to be, has died, a leading professor in Hawaii. They knew their destiny, but the 2 are alive. They managed to save their lives through using the Gans technology.

It's our work to spread, or I can keep on teaching you new things to do, but with the 2 Cups, Cup 1 and Cup 2, I taught you how to look after your physicality. With the Cup of Man (CM), I showed you how to elevate your soul, that the 2 Cups are not needed. When you make the CM do not look into the Gans of the Cup, look into the soul of the Cup. This is where you'll find your strength, (1:24). and this is where you become a twin of a set. When I explained the CL and the CM, you all, always looked at the physicality. In the Cup 1, I gave you the physical dimension of the white tissue. In Cup 2, I gave you the soul of the condition of the physical part of the muscle tissue. In CM I gave you the interaction of the soul of the physicality (STP) and the soul of the man (STM). In a way, you have, you built yourself a twin system, where Cup 1 is stronger because it carries the Zn, and Cup 2 is weaker, which carries the Cu. In a way, when the STM through the emotion, gives to the physicality, you have now created what we know as a single soul. But this is the Cup of the Soul of the Man, we call it the man. Now I stand the man, in front of his Cup, and I put the STM, (1:26). then, now you understand the gift I gave you (Infinity Loop between the STM and soul of the Cup). If you understood, you should have made the Cup this way (vertical, Cup 1 above Cup 2), the Cup of the soul, and the Cup of the STP. Then when you stood man in front of it, you would have seen, both, and in so many ways, you should have got your answer. In a very, very simple way. The CM is not the Gans to drink, the CM is the soul of the Creator, to give. (1:28). In so many ways, if you made the CM, and made with absolute purity of heart, the man can be you, your children, or any, that is the ethos of the KF. We are here to serve, and this is the ethos of the KF with love, we give, loving is giving. In so many ways, again, all of you, I left you for 2 weeks to think about it, could not understand. You built it, you sat in it, made and connected wires, and this and that, and

the KS are still wrapped in the rope of physicality and never understood. They write, "it doesn't produce enough Gans's." I answered to myself, what a stupid comment. Have you seen the strength of his soul. As I said, at the beginning, (1:30). with the new technology, to overcome this, you need a stronger soul to protect the physicality in the time of trouble. And physically, you are in trouble. So extend the soul.

Many of you, many of you, will run out of medicine, those of you who are critical. There are a number of ways you can support yourself. Is your medication for depression, for emotion? Try, and try, to make a sack, plastic bag, if it is liquid or tablet, and place it in the Cup with the Zn. And see how you feel. If your medication is for your physical, place your medicine in a bag in Cup 2. If you have a psychosomatic conditions or cancers, (1:32). try to understand why, with both. Try to be in the vicinity of your system, with your soul, not with your physicality. At least you can try, maybe you'll find, that you'll find an absolute solution for your illness without any further need for medication. A guy wrote to me, "Mr. Keshe, I am a drug addict, and with everything stopping, the prices are going so high, help me." Maybe you should put that in Cup 1, in a combination of the CM.

We'll govern through the soul, not through the physicality. We'll elevate the STM, that the physicality does not count in the dominion, in the dimension of the universe. Now, you still make the Gans's 1 and 2, and at the same time you support the STM. (1:34). Let's see how many of you will survive the time. Let's see, in so many ways, how many of you will tap into the Cup to take from it, for your medicines, for your dimensions of need. If you understand this process and not just become a copycat, you'll find out, on your table of food, that will feed you through your soul. You will stand the harshness of time, of no food, as you make your soul, to look after the physicality, through the energies of the universe. We feed, we look after you, and we don't every govern you. In administration and what we call, the executive, we do not carry no power, but the power of support, (1:36). teaching and share of knowledge. The executive and the administration of the KF, UC, and the EC, stand on their own to support and never will rule. The only point of reference for mankind, in total support, is the head of the KF. And we appointed 2, one for China, and one for non-Chinese speaking, as the Yin and Yang, and the balance will come through two women. You rule on your own, you stay the king of your own soul and physicality, and there is no one to govern you, except your own conduct.

There is no king in the universe, except the Creator, and even He does not accept the seat of kingship. If the word Mahdi, Messiah, Shaddai, whatever you call it, (1:38). the name of the Creator, and if today, His birthday, what better gift, he could give on his birthday. We have freed you from the shackle of everything which the man has been shackled on to, and not only for this planet, but for the whole race of the creation on the universe. Now play the game. You know the Cup 1 has saved many of you, and you know Cup 2 has saved many of you, and now you understand, the Cup of Man is for the life of the man to make him his own king. In a way, for him to make his own destination and his own destiny. Today I have given you everything the man needs to live in the span of Universe, in the spaceship, or in the space of his own soul, or in a ship called Earth, which is traveling the depth of the Universe in its own space. (1:40).

We give the false kings of this planet a few more days and weeks, and we put the crown they put on the Son of God, on their head. Today is the birth of Mahdi and he has

manifested himself in all dimensions to save humanity in every condition for his soul. From now on the physicality is irrelevant. Physicality is weak and feeble, and the Soul of the Man stands a better chance to survive within the span of the Universe. Then this soul has to make its own decisions - who and how he interacts to guarantee his survival and expansion and his nearness to his Creator. Once you leave this physical body, or you allow the Soul of the Man to take over at the point of birth to the new dimension; the race is not to live, the race is to reach the point of the Creator. (1:42). Now you understand our mission and our work, and we have shown it step by step. You can write whatever you like on these flimsy pages of buttons of Internet, we'll... shall rule. Let's see how the game will be played. But one thing for sure, we have never been wrong.

When you read the report from the Chinese doctors written confidentially for us to understand the illness, it shows the fear of creation. It shows a lot of, what I call, weakness, powerlessness with all the knowledge, to save a life. (1:44). So when you see American government gives you 400 thousand infected, expect 40 thousand survival. In fact, 400 million population of United State should look to be very simple, 40 million. And most probably this number are those who have gone to their soul, that their physicality is not touched. We reckon Chinese population will dwindle to less than 100 million, when Corona finishes. We reckon India will be about the same. Iran, 70 million population, will linger round about 30 million - due to the use and application of the Keshe Foundation technology, (1:46). as they already agreed and announced. The Iranian protocol, procedure followed, as is written by Dr. Asar ?? and Dr. Baraco ??, will become the cornerstone of the man to survive. This is, if the new technology is not followed, and this is when the new technology is followed. And in any way, due to high level of highly educated people in Iran, we'll see that figure to stay. Due to the high level of illiterate in US and India and China, the figures will go to that level.

In Iran, the women have taken over, to oversee that the technology goes and they can save their children and their family. There is a way to change this, and in reality it stays, how fast the governments implement the understanding of the Corona in its true essence. (1:48). A friend said, "Do you know something? Nobody will take the Oval Office once the president dies, because it'll be contaminated." Then we know this president is very touchy, he touches everything, moving, or dead, or furniture.

The responsibly of the doctors and scientist is, rapidly understanding this virus, the way it is set out, the way it's been explained. And in so many ways, does the human race wants to be here, or we take this path? We distributed Cup number one and Cup number two, now you imagine you give Cup of Man, and tell people this will save you. If they believe in the strength of the soul, it will be done. Then the ethos of, "doing good, acting good, and thinking good," will keep them in track. In a way, the Cup becomes the measure of the soul, and the man becomes a measure of physicality. (1:50).

I have accomplished why I came here to accomplish. In a very strange way, mankind will come to accept the knowledge of the universe out of his own demise. In so many ways, in the Roman time, and olden days they told you to put a cross with the blood of the animal, which was actually the Gans, which through its structure absorbed the virus. This time we don't sacrifice, we give you the knowledge that you have the total understanding, and you can elevate the Soul of the Man. This time we gave you the knowledge in truth, and not by fallacy through your own stupidity and lack of knowledge to understand. In so many ways, if you understand this operation, if you

understand the work of Cup of Man, you will understand how to survive in the universe. What mankind will do, (1:52). in the coming time, will make the Cup of Man, the Soul of the Creator. There is no need for physicality. Then you will understand more in the new dimension of the creation, as he has created it in the Unicose. Some of you will reach this point in no time, and some of you will take a lifetime of the universe to get there.

Any questions?

(WL) Hello, Mr. Keshe?

(MK) Yes, Madame Wang Lin?

(WL) Yeah, I have a question from a Chinese Knowledge Seeker. Before the teaching he sent me the message, and actually it's, it's quite fit with... with what you told, teach us today. Just one moment. Let me read his paragraph. He said: (1:54). "Show my best regards to Mr. Keshe. My name is (?), I come from China, she adds, I'm like, like a "light ascension people." Since 2011, my body has already switched to a state, doesn't need to consume any food and water to get energy to maintain my... my life. Since I heard Mr. Keshe teach about, the live with light. From the science point of view, explain this natural phenomena, the series of the natural phenomena. Let me have more deep understanding for my situation. At the same time I want to teach more and more people to achieve this capability through my personal experiment. To achieve what Mr. Keshe's ?? for change the humanity to get energy through kill and rob. I mean the bad habit. To achieve a human peace and also want to promote this technology to bring benefit for Chinese people. Personally I want to ask Mr. Keshe a question. In my situation now how can I improve my soul further more to really reach the universal society. (1:56).

(MK) According to what he writes, he has become, but it still lives in both dimensions, which we all do. ... In so many ways, to reach to the next state is the acceptance of the separation. Or stay in both dimensions of life. Doesn't mean just because you don't consume by killing or destroying, you don't and you cannot enjoy the beauties of the physical life. This is the beauty when you are enlightened. As I said, the very first time Caroline asked me, "Why do you come here like this, then?" I said, we come here for the pleasures of the physicality, and not to be odd one, we live exactly like the way you do. Its beautiful when you hold a woman, when you say to her, you love her. When you hold the child, which is the creation of you, and admire it. It's beautiful when you can touch a flower and see its beauty. It's beautiful when you hold a fish and you can see that fish lives in the dimension of universe of his own. In a dimension of the soul, tangibility cannot be found so easily. With the understanding of the knowledge, there is no reason not to live in both dimensions. (1:58). Because you're not taking from it, most probably you become a converter of it for the others to live from what you convert. So, maybe this is the best way to be. And you can live this life for thousands (sound drops out..). Now that we have the knowledge we don't need to move on and do others. Now we have a choice to create children, through the interaction of the soul, or through the interaction of the physicality. Would the love of the father will be any different from the physical, or the soul? In so many ways, it comes back to what we speak about schizophrenic. Now we understand who we are. Do we want to be present when one is present in the dimension of physicality, when the others live in the realm of the soul? Or do we want to be present at all time, to enforce we exist through dimension of physicality? The anger, the insult, the dimension of life, which we do not even want to speak of.

In Judaism there is a golden rule. It says, if you understand the meaning of it, and I've discussed this many times before, does not matter if you are in fight or whatever between a couple, on the Sabbath, (2:00). the physicality has to bring the love of God into the house. Jews have never understood the true meaning of Saturday or Friday night, and they converted in total physicality. In so many ways, if you've been with the Jews, they always have a little thing stuck on front at their door of the house, and they touch it, and they kiss it or they kiss it and they touch it, depends on the structure of the understanding of it, in their own soul. All it says is, "I'll bring the love of God into the house", nothing else. In a way, when you come into the house you come with my soul and not yours. It's become so habitual that the real essence of linking to receive has gone. It's exactly the same as that blood over the door in the time of the crisis.

If you have reached that point, you can survive the universe. If you have reached the point that you do not consume physical dimensions, you have reached the point that you can take into space in the dimension of universe, but you need to learn. You need a lot to learn, that like a first time pilot, (2:02). you don't crash when you take off. Nothing else we can do if you reached. Many, many Chinese have reached this level. You got to understand the manifestation of the soul enlightens all the souls and it depends on the what I call, the strength of it, what you receive, and when you evolve. It's like a book you've read many times, but it doesn't have no meaning, and you read it once and it touches you, and it brings so much different meaning to the whole reading. How many times you have listened to a music over decades and then one day, when you're in the right mood and the word comes, and it shakes you and brings tears to your eyes? Because now it has a meaning. It has a value. It has a new understanding and comprehension, and so many times you go and listen to it again and again. Sometimes it gives you the same feeling and sometimes you search for that feeling when it came, but it's not there this time. We touch many souls in our daily lives, but in which soul we give, or do we reach the point of maturity that we give to all the souls, unconditional? (2:04). So the guy doesn't need to worry, if he really understood, and at the same time understands, when he decides.

Any other question?

(SM) Hello, Mr. Keshe.

(MK) Yes, Ms. Mohammadi (SM) [Farsi]

(MK) [Farsi] Let me translate. Mrs. Mohammadi is saying that they have a special program from the Iranian Keshe Foundation team. Yes. (SM) [Farsi] [Farsi] [Farsi] (MK) This is part of the Universal Council job when what Mrs. Mohammadi explaining is, any Iranian across the planet who lives anywhere, doesn't matter which country, get in touch with the Keshe Foundation Farsi Corona team. They will teach you. They'll train you that you start supporting the Iranians in your community and the others. This is part of the advanced progressive work of the Keshe Foundation Farsi language. We have many people across the world, (2:06). Iranians coming to the chats, wanting help or they have problem in their countries, as we heard from Canada. Now the Iranian Corona team is trying to teach those that they become a center for the Iranians in their countries. Many Iranians have been hit by Corona. It's not just the nationals, they are part of the nation and we see many of them emerging. In Austria, a lady who had a Corona was put in a basement 2 or 3 weeks ago, till she dies or whatever. The Knowledge Seekers in Austria, the Iranians managed to get some GANS to her, and she started using it. She came out of it, they took her to the hospital, and they said there is

no Corona. They don't understand how it's disappeared, and this is an Austria past week. Our team are in communication with the... Iranians are well spread across the world and it's the beauty part, of the Iranian Revolution, that maybe that was a reason for it. Now the Iranian centers and what we call our points of reference to support the others, and the Keshe Foundation Corona in Farsi, is asking for all the Iranians across the world to get in touch. Go through the Keshe Foundation Farsi Corona team and they will teach you. What they've done in Iran, now they're spreading it across the world. And this way the Iranians become the point of transfer of the knowledge to the locals, the way we have been successful in Iran.

(MK)[Farsi] (SM) [Farsi] [Farsi] [Farsi] (2:08).

(MK) What she's asking is, to set up a Zoom for all the Iranians across the world, who want to join and those of you who are part of it, that meet regularly on a daily basis to expand a spread of the technology across your country, because now you become the reference point and the success in Iran can be repeated across the world. What is the idea behind it, is that the Keshe Foundation Farsi language becomes the center point for the spreading technology and people to use. Let me... [Farsi] [Farsi] The important point is that you're offering a technology and a knowledge. And it's people's decision to use it. This is very important. You offer humanity a way to serve, and save themselves from the situation there is now. Never offer a cure, or what we call, any other thing. We are a scientific solution, and keep to that, because we see a number of people who try to abuse the system. And try to explain to everyone, this is a free knowledge. We don't charge for it. It's a knowledge there, you can test, and you can try. This is very important. And especially, (2:10). offer it to your police, medical hospitals, and gradually you will see what will happen. We'll let you know in a few weeks time, in a couple of weeks time. [Farsi] [Farsi] (SM) [Farsi]

(MK) There is a problem I have to explain. We hear in the background there is going to be problems with Zoom. Zoom operation could have some problems, we do not know, but we hear. So we try to set a two-track system, one is Zoom, and one is the Telegram. That (if) each one fails, the whole process doesn't fall. So, all the Knowledge Seekers, Keshe Foundation supporters try to access both systems, Telegram and Zoom. That if the system drops will go into Telegram. (2:12). You got to understand the situation's critical around the world, and energies are needed more for other things than running computers and servicing them, or not mechanically possible in coming time. And people are at home, and the traffic is too high too. We will announce this Persian common on-line. There is a Chinese guy who has taken up, and there is bunch of Iranians who are reported, they've taken the case of the Belgium, fraud or whatever, and they're splashing it everywhere. We will handle all of this with the Iranian security in time, and we'll handle with these people in time to come for what they've done. Just be aware there is a lot of money paid by Gates Foundation to stop the Keshe Foundation, we see it coming up very, very drastically. And they are using every trick in the book, the same, with what we see, the same problem with the people who are the supporters in the background with other mass media. They see their position in danger. We see attacks from the pharmaceuticals, but the reality is pharmaceuticals are shut. They work nothing. The only valuation is those who talk about having a vaccine, and...

In using the new plasma technology, you don't need a vaccine, and secondly, as you will see we're getting a lot of reports around the world, people who had the flu, who had the cold, who had other conditions, using the Cup of Life have seen the changes. So in a

way, the viruses gradually we see, will be uprooted. But remember one thing. Keep on using the Gans for at least next 6 months. (2:14). Once a day spray your body, consume some of the fields of it, that protects you, if it orientates. Make it as I said, aftershave, perfume on your toiletry table, in your bathrooms on the shelf next to the toothpaste. This time is not saving your tooth, it's saving your physicality. And that's how crucial it is. I was talking to one of the Iranian scientists yesterday, and he wanted to know how long. I said next 3 to 6 months. We don't know, if it evolves, we evolve with it. It's the only technology which really what we don't need to go and get a new vaccine, we just evolve with it. And those of you who understand the work of the Cup of Man don't need to evolve with it, let it evolve with you. You soon will understand. We are not giving you, "the Cup protects you." We're giving you, the knowledge to elevate your soul, that the soul decides if the physicality needs the protection. It's a very big difference. "The Day of Judgment." In Farsi we call it [Farsi] and today is the birthday of Mahdi, and that day has come, for mankind to mature to his own mentality. [Farsi] (2:16).
Any other question?

(RC) We have a couple of attendees with their hands up here. Alvaro, would you like to go ahead? (AL) Can you hear me? (RC) Yes. (AL) Hi. Thanks, Rick. Thank you very much Mr. Keshe. I just want to clarify please about the Cup of Man. So if I have a depression or some problems in the emotion side, I will add the medicine that I take to the cup with zinc, the Cup number 2, sorry the Cup number 1, but if the problem is in the physical level I will put the medicine on the Cup number 2 is that correct, Sir?

(MK) Yes.

(AL) And how do I how do I use the medicine? I put straight in the water, should I put the medicine straight in the water of the cups?

(MK) Do you know something? Rely on your soul and see what it does.

(AL) Okay Sir. Thank you very much Mr. Keshe.

(MK) You're welcome.

You're the last man standing and it's you who has to carry this soul and the physicality. What was the cause of the emotion, (2:18). and what was the cause of the illness? What does the illness bring the freedom from, and entraps it in another dimension? This is the beauty of it. This is the beauty of the knowledge if you understand it, you don't need to interpret it. You do it because it's right to do, and the soul will tell you where and what. When you're in love, do you wait till the lover tells you "Love you," when you go out and buy a rose and you put it on the table, that by seeing the beauty of the red rose, she or he will understand the message. Or do you silently, in bed when she's asleep whispering in her ear, "I love you," that the soul hears, as the physicality's asleep. How many times you have walked to your children in the middle of the night and you have kissed them, and you tell them, "I love you," and they are in deep sleep, they turn round and they smile and go back. It's the soul which smiles, not the physicality, if you ever understood. And it's that easy to reach the Soul of the Man. We have just forgot it.

(2:20). Because we love our children with pure heart and soul, now in a way, we have become the child of the Cup of Man. In a way, it's a completion. If you look, an atom, you have an electron and a proton and the two protect and exist. And is the Cup of Man has become and/or is the man has become? Those who try to analyze the structure and the Cup and what to put where, they're still stuck in their world of physicality and their soul has never elevated to understand the total knowledge.

Any question?

(RC) Stefania has her hand up. (SA) Si, hola. I wanted to do some question from the Italian team. Hello...

(MK) How are you today to start with? (SA) I'm better, yeah, I'm better, yeah. I can see that, (2:22). definitely for me, the GANS changed my life day by day, so really One Cup, One Life means, it literally saved me, means One Cup, One Life, because give me back my life. Because since I've been using the protocol... I could... a certain way I felt that it was giving my life back... I start to... it's just something as you know, as you use the... as you use the GANS and the protocol you... you... you know straight away, that is something really good for you, and because you use do Gans's as well, you also feel you got no fear, and you feel content. You know you're doing the right thing, so you got this situation where you have all this pain, and you know that your body's going a bit out of control, but as soon you start the protocol, ... you know that is something good for you, you can feel it, and the fear disappears, and so for me it's been the best gift ever having this. I mean you as well, because you were there for me in my most difficult time, when I was on my own and had no one. So you and Mrs. Caroline, were there for me in the most you know difficult time. I think if you were not there I would not be here today. So, I told you many times, I owe you my life. ... In one way, this experience, it just... I think it's been really good, I think it was a blessing, you know. As you taught us in the "MOZHAN," (2:24). make a problem to strength, I think this what happened. So the virus, initially it was a problem, because... I, I, I went to heal very quickly, but, but thanks to this gift that you give to us... the problem become a strength, because from that point I understood the miracle that this GANS do, and also they understood the importance of what we're doing, understood that this the only way to go forward and understood... I'm still learning, I'm still learning... but... I really, for me this is the most beautiful experience that has ever happened, and from that day it is like, I'm reborn. So I reborn into another way to see life, and this to me is the only way, it's exactly what you said, we have to be united, and together is not a problem. So, even though every day I feel much, much better, and for the first time now, a few days ago, I feel like I had my body back, like I'm starting to get strength back, and it's just a pleasure using the Gans. I really recommend it to everyone, to start to have this relationship with it.

(MK) Let me... Let me... Let me explain to people who do not know. Stefania is a MOZHAN, is a very handful of people who've been taught to become the leaders in the new and the future space technology. There's about 6 or 7 of them. They spent nearly, (2:26). some time with me in Africa and then in China, and they've been told to go back to their souls, and they understand this process. But the biggest problem is with Knowledge Seekers, is they never make things till it's needed. She didn't even make the Cup of Life, and she came to us with the pains, which we knew will come up. She was one of the very first who reported pain in her ovaries and the womb. The extension was very deep and... she was more or less in the critical condition. But she was there, she has the boldly spirit and we sat down with her, went through step by step. And this time it needs a cool head and... She has that mentality, Italian mentality, of seeing it through that it happened and that I carry on with it. And she's out of it. She's one of the Universal Council members who's been hit heavy by the Corona. We have another Universal Council member again was been hit by it very badly. And they both are coming out of it. As she said she starts feeling better, now, after a couple of weeks because the Corona destroys many cells and converts many cells and it takes 2-3 weeks to recover from these injuries. The body spends a lot of energy to do the repair and building new cells. So you don't feel... jump out of it, I'm there. It takes 2-3 weeks to

gradually the strength come back. With the... Now there is all the energy, most of the repairs. And the more repairs are done, the more you go gradually back to daily life. It's not gonna happen today and tomorrow you run. So, and she says, (2:28). she's feeling more and more better because the damage was so extensive that all these cells damaged needs to be repaired. Carry on, Stefania.

(SA) Yeah, it's exactly how you describe it. It's like if I now I have the energy back. It's like the... if my body... even though I... I felt bet... better like last I felt a massive change just after 15 hours. So from... from thinking I was dying and my body was out of control, as soon you start the Gans, you got this friendship going on, where you can tell the pain changing, diminish and getting better. But after... after... after one day I knew straight away, I was already out of dangers. But it's exactly what you said, even though you... now you're out of dangers and the virus is gone. It takes lots... it takes quite a while to get the energy back. So I felt we've... we've like my energy was not there. Even those... it's a... it's a paradox because I felt really good, mentally very, very uplifted and I was very happy. But you're right, it takes time for your body to full regenerating, and... And then you switch. Your body switch where you... you feels slowly, slowly you got your strength back. So it's actually a lovely experience to experience. That's why I really recommend everyone to use the GANS and use the plasma technology because it's such a beautiful... you're going for a very beautiful journey... and, and, and...

(MK) But did you wanted that, this journey?

(SA) I have to say looking back it's been the best thing that's ever happened Because you... (2:30). you know, I've been with you with the MOZHAN and I, I been in the Foundation for quite a bit and... maybe for me took this situation to truly understand the power of what we're doing and you know when... the unfortunate is like you said, through fear I, I... For example in my case, I learned the importance of what we were doing. It's when you have a comfortable life and someone introduce you a gift, like you did to us it's.... it's... it's beautiful and you... you make the best to understand it but because you're such in comfortable situation, it's... it's... it's not the same when... when you actually, you're fighting for your life and, and, and you have to take off all distraction you, you have to have to kind of... How can I say this?... It's... It's... It's... I remember when... When I had the virus and I was... in my mind there was nothing else than plasma technology and use the GANS. There was just that. The 15 hours when you were assisting me, very beautifully and I never forget that because you were there for me and, and when you assist me all that love I received from you and from the GANS and from the Nano-technology... It's... It's really... I don't know, it's unforgettable like... In my mind there was only this and I understood the importance at that point of what... yeah, what we were doing. So I don't think I would have understood that well without... I don't think... We... I agree with you Mr. Keshe. We don't need to suffer. I don't say that we need to go through this. (2:32). It's not... It's unnecessary. In my case I, I, I, I could see the benefit of it. Why I went through that. And... And the power of what we are doing. And I remember clearly from the MOZHAN that our bodies are a Ferrari. So and, and things that happen in the MOZHAN, it never happened, and we didn't use any... We use our body... our bodies as... as a GANS device and the things that happened there, they were unforgettable too. So now I compare the power of me using the GANS to cure myself, and also I compare my experience in the MOZHAN with you. That was like life changing and I can see that is the Ferrari. So now I'm trying to add everything up, like you said to us, that is like a puzzle, the things come together, and I can see... Somehow, I've got bigger picture and definitely your body is the Ferrari, so I understand your talk of today. (MK) You're definitely an Italian. (

SA) Yes, red Ferrari.

(MK) I think... let me explain. We don't want to know about the engine. The... the thing is Stefania lives in England and she got contaminated by the Italians who came from Italy. This is the most probable way she got contaminated, very early group of people who got contaminated, by the Italians coming from Italy. The way the virus was spread. There is another member here, who has been through this. Do you want to speak about it? (2:34). Another Universal Council member who went through the Corona. And I think she's still battling it somehow. Would you like to speak?

(JM) Hi, Mr. Keshe. Hi, all. (MK) Hi, Jamila. Jamila is the Universal Council member for Arabic speaking languages around the world. Would you like to tell us what happened with you?

(JM) Yeah, yes, yes, sure. So, I don't really remember how I got it, because it's between maybe airport I was traveling back.

(MK) Let me just.... Can I explain? Jamila is the head of the Keshe Foundation in setting up the Health Centers and Research Centers in Arizona. She was in Arizona, setting up the center helping with John. And she just came back to France, just before the curfew comes in for the flight bans. She has landed few hours or a day before that. And that's where she thinks she could have caught it, anywhere. Carry on, please.

(JM) Yeah. So, I spent a long time in Mexico. I came from Mexico Airport, so maybe at airport. Maybe my sister come back... come to airport to pick me up from the airport So she was... (MK) In Paris? (JM) In Paris. Yeah. So, maybe my sister, maybe airport. I don't know exactly. So, I spent maybe 5 days when I come back to Paris, running everywhere to get my material, to set up my cups, and to set up Cups for my family, my friends. And... So, I did not... I know that there is this virus, but I was not afraid. I was doing what I have to do. 5 days after that, (2:36). I had fever. I said "Oh, okay. So it's there." And I did not have... my feeling was... I was very calm, I was not in feel... in fear. No fear, nothing bad in my feeling. I said "No problem, I have my Gans's," because I did my Cup of Lives... of Life... all the set in Arizona. I bring that with me. I brought all the kits to do the Cups for... for people here in Paris. So I was feeling secured. I have all... I have all the material, I know the teaching. I have Mr. Keshe, the foundation, all the Knowledge Seekers, so I am okay. And it went like that. So I inform Mr. Keshe about the... the... the situation he give me a really fantastic health instruction protocol, Caroline as well. So I was following all these protocols. So I felt much better after 3 days doing this first Cup of protocol... Protocol of the first Cup. But after four days, I got a very bad pain in stomach. I could not sleep, I had the fever back. And I saw.... I was thinking about the description given by Mr. Keshe about the virus, when he is in stomach. So I said "Oh, Mr. Keshe, I had another one." He said okay, this the bad one in stomach, so he gave me the protocol. He gave me instruction, he was following with me. (2:38). And I was following everything. So, if you want to know the protocol, you go to Wikipedia (kfwiki.org), you will see the details. So, 3 days protocol, day and night, and I felt much better and I was... I never had any panic or fear. So I was myself. I was thinking, "Oh, I am not afraid, I am okay, I feel even good, so I have what's needed." So, I have my angel Mr. Keshe. I have all the angels the Knowledge Seekers, Caroline, the Gans's. I feel very, very secured and very, how I can say that... Feel security, you know? Then...

(MK) Would you like to Would you like us to release some of your videos, the way you were wrapped?

(JM) Maybe I. (MK) You sent videos, this is how I'm wrapped, this is how I'm following the protocol. And you can hear the voice, the very sick and this is... We watch

things, we watch, we monitor, when we get involved in every step. And it's amazing how she recovered from the first and the second cycle. Carry on

(JM) I can... I can try to share that, it's in my phone. So let me just... I try, let me... give me one... one... two seconds. (JM) I stop sharing or you need to click. (JM) I.. just to find... video. I'm sorry, I have my voice tired. I'm still... One second. (2:40).

(MK) What is the strangest, if you listen to president Trump's recording past few days... He says, that he knows the hospital so well, he even knows the color of the paint, because he used to live there. He knows the size of the windows. And he was shocked seeing so many bodies in corridors. And with the Keshe Foundation technology, if it's reached the right time, the right way, there is no body bags. And it's for governments to make a decision.

You see, we say one lie can do a lot of damage. And you heard about the Shepherd and the wolf. The king of Belgium cried wolf and made us. And now the wolf has come. There is nobody to protect. Many people in the world have fallen for that false cry of wolf by the king of Belgium, and the Belgium Kingdom. And they listened to it, and now that their wolf has already come, is taking many lives, because of one, one man, the present King of Belgium. You will understand soon. He has to live with his greed, and his love affair and how many people have died because of it? We took that to the Italians last week and the week before, they're responsible for the deaths of so many Italians, (2:42). with what they did with the KF Italy. Now, is for the soul of this man and his understanding, how much he lied, created the false lies. And they have to live with the lives lost. Red Circle, especially Red Circle, now he has to answer to the souls lost, where it could be saved. Especially... Especially Mr. Bracquene, Philippe, the father, the police officer Delanoir. They have to answer and every life and their children's life have to answer, for the false cries they created, and so many people's lost life. And this, we will understand soon, the kings will put their own crowns down, because they know their lies, and it caused so many deaths. If they have... if they have honesty within themselves. Now we can see what damage that false court case has created. And now, all these rubbish notes on the Internet, people trying to believe in it... And you can see so many lives saved. Now they have to count for the lives they caused to loss. And I hope they can live with their souls. Red Circle, you have more, so much blood on your hands, it runs in millions. We'll see how your children pay for it and your blood.

Carry on, please. Have you found it, Jamila ? (JM) Yes, I switched to my computer.

(2:44). (MK) Make sure it's out, don't show us the screen. (JM) Yeah, one second please. So after the bath... Can you see it? (MK) Yes. (shows video)

(JM) So after the bath, the... wet clothes, I am wearing here and all my stuff here, yeah, I have the wet towel for ten minute I have to get it, to keep it... to keep it 10 minute per hour on my head, Then I have to... wet... the wet clothes with sleeves as they told you, I prepared it. So I am wearing here all the clothes, wet under this up here, because it's cold when you are wearing wet clothes. So in addition to that, I am spraying all my face with the Cup number 1 GANS water. I am drinking the number 2. The GANS water from number 2 cup and GANS water from number 1 Cup, in combination of all that. So the wet clothes, the wet towel, the spraying, the drinking of the water. Every half hour I change that. I go to the bath, inside my bath. I sit in on it, half an hour, 20 minute, half... an hour. Then I... I wear the wet clothes. Then I sprayed, I drink and I wear that on the head for 10 minutes. (2:46). I do this protocol each hour. I am changing it and I already

feel... I'm already feeling much better. So, thank you very much Mr. Keshe, for your instructions, for your protocol, for your guidance, for your love and gratitude. Thank you so much. I am going to fight it. I don't want it to stay on my body anymore. So I am going to succeed. Thank you so much.

(MK) You look as very good, what we call it, Arab woman. Well covered! (JM) In this time we... I don't... I don't know. In which woman I look like, but... It was... Thank you, thank you so much, thank you. (MK) It is good to hear your laughter again. (JM) Yeah, so, as I told you, we have a lot of things to do, so I'm not willing to give up. I am here, I will be here. And thank you all. (MK) Thank you very much. (JM) You've welcome.

(MK) Thank you very much indeed. And the biggest problem is our Universal Council members, and especially support system people. You have not reached the way the Iranian team is working. They get infected and go back on it. It's just like going into quarantine and coming out. And... It's very, very strange. Very, very strange how I see it.

And in so many ways, maybe it's the right time to announce it. The Enhancement Unit is completed and it will be shipped to Austria in the coming days. And, we will fulfill the process as we said, (2:48). the distribution of the enhancement system. We see the enhancement system now to be spread much, much more important, especially for the cancers, which is forecasted by Keshe Foundation. Now the Russian scientists confirmed, back us up with this, with a scientific paper. And the French scientists announcement of the skin. Will be important, we have decided the Keshe Foundation, we discussed yesterday. We drop the price of the Enhancement Unit back down from 1 million to 250,000 euro, it will become affordable for most of the nations and we support them that way. As of today the Keshe Foundation units will come to 250 000, because the cancer cases will become so cumbersome that there is no technology to stop it. And I have already requested from the manufacturing base in China. to be ready to produce 100 to 500 units. And directly in process. We most probably, show you on the next couple of weeks the enhancement unit. Its beautiful. It works. And as the head of the Keshe Foundation, said looking at the video of it, she says; I like the name of... the voice of it. When it opens the gate it goes woshhh and when it closes it was woshh. It looks exactly like what it was made to be. Now with the gap in China, we have managed to complete it. And the enhancement units are ahead of time of delivery, as some expecting in August, July-August. In May we will deliver the first batches across the world to be ready for this process. And we have reduced the price to 250 thousand for the time being, that we can support. As we see Corona will take many lives. Many, many lives. (2:50). And we keep this for next couple of months to see how we can support. And we extend the production capacities in China, as we go to see how we can support, not to lose to cancer of the Corona, what we call, Corona.

It is our job. For the running of Keshe Foundation, as the head of the Foundation to Ella, over past 3-4 years as most of you know. To make sure everything it runs, it gives me the freedom to see everything gets done across the foundation organization worldwide. It is good to have two very competent women, one in China and one in Europe. And to see that the two structure of the Keshe foundation are there to support and build a future for humanity. It's not any more Keshe Foundation one country, it's Keshe One Planet, and in the hand of two very competent women, both in soul and physicality to see it through.

I know there's some questions from the Italians. If you would like to ask the questions, please, Stephanie, are you there or has she dropped off? We don't have her, I think she's dropped off. Ella would you like... (RC) She looks to be there, but I don't know if... (MK) She's got her hands up (RC) Yeah. Stefania, can you hear us? (MK) Oh, yeah, she's translating... (SA) [Italian] (2:52). (SA) No, no, I am here, yeah I'm just now reading the question so... of the... One second, one second, because I got the two things going at the same time. So I'm now looking the question of the... the... yeah, okay so, Lara... she's from... She really helped me with the Italian team and she makes this question to Mr. Keshe and he says... she said...

Q: she would like to know if it's possible, she... Okay, she want to ask, if it's possible, to know how to increase the connection like Mr. Keshe do, to move her body, to move... like you do Mr. Keshe apparently, to move your body to people that are far. You know, in order to communicate. It's clear the question?

(MK) No, it's very alien.

(SA) Yeah. She ask... How she can increase this connection and she... she meant the connection that she... she thinks that you do Mr. Keshe. You can move your body in other places, to connect with people. She would like to know how can she improve that.

(MK) Become the Creator. That's the simplest way of it is.

(SA) Okay, Mr. Keshe... [Italian] [Italian] (2:54).

(MK) When... This has puzzled many, many, world leaders, now that you ask this question. We are present in their meetings and we hear their... or we listen to what they utter and what they plan, and then it has caused a huge problem in the White House, and even in China. How do we know so much, what is discussed privately, in private conversations, given, some places we don't want you to know. And this has had a huge problem for especially Obama administration. And now with the Trump administration with... the same with President Xi, and many of the world leaders. When we want to know we don't go, and we don't have spies. We just ask the soul, and it's furnished. It's just like... We don't listen to recording, we understand the motion taking. This is why we preempt so much, so many things in advance. When we announced on the 11th... what you call, on the 3rd of November in 2011, or December 2011, that we'll show the power of the technology, and the American drone was captured the next day. When we announced what is the plan, for the American disaster position with earthquake. And the same day after teaching on the Thursday, President Obama announced a new team for earthquake disasters. They listen to us, and at the same time we sit, within their soul, and it cannot lie. When I give you information it comes from the Source. (2:56). And this has baffled many world leaders, how Keshe Foundation reaches so deep, precise information. Because we sit within you. When the world leaders understand this, and when humanity understands this, when you call my name, I'm there within your soul.

And that's... that's what's the responsibility of the two heads of the Keshe Foundation in the coming time. And to teach, to ?? their students, to do the same. They are there in physical dimension, but in soul they are connected. The same as we established in the Universal Council members. You heard Stefania and you heard Jamila. These are connected to the soul of the language, and understanding of the soul of the language. But in the universe, we have one language, so I don't need to learn Arabic or Italian. We reach through the Soul of the Man. One day mankind will know who I am in the dimension of the Soul of the Creator, not in the dimension of physicality. I don't need to

be. I don't need communication. We don't even have computers in the universe. These are all man-made physical dimensions of comfort, of cheating and whatever they do.

(SA) Lara, she's answer and she said "Thank you for the information you give me in my dreams".

(MK) This is the problem I reach many women in their dreams and they write to me. But I hope it's a good one and I hope it elevates your souls. (2:58). We concentrate in this dispensation on women, because they are the essence of the creation, and because it's them who brings up the next generation of the man to be just and correct. It is in the writing of Baha'u'llah, bless his name, simple description. He says: "If you have money to educate your children and you have one son and one daughter," in Islamic world and the rest of the world they spend the money on the boy. In the path of the belief of Baha'ullah, bless his name, he says; "Educate the woman, the girl, because she will educate the children of the future of mankind." And this is the same process.

The 9th is the day of completion in all numbers in the universe, and today is the day of completion. And in so many ways, the life of the man, the creation, the Creator, is the womb of the universe, the same as given to the woman. We come from the background of Zoroastrian Mithraism and it was based on those basis's. As I said many time, "A woman in the Iranian family is a point of respect and honor, not a tool for a man to abuse." And once the world understand, this you will understand what it means, (3:00). and why we chose the life giver, then the support. Educate your women to the best of your ability, and one of the successes you see Iran, in Iran, is 70% educated woman, who are carrying the nation. The men just bark, women build the nation. It will be the same for human nation, as One Nation. When a mother is educated well, she brings up educated people, correct people. When a man is educated correct, never do wrong. Because he never gets himself to the point of desperation, to do wrong. We know exactly what we talk about, and we know exactly how we structure. Man lost track, now we brought it back on track. Respect your women, because those are the ones who keep your culture, your language, your love and your children.

(SA) Lara, since she told me this, I said to her many times, okay, "Say hello to Keshe for me." And she laughed and she said, "Keshe told me that she come, he talks to you, but you never listen."

(MK) One of the most... One of the most... strangest women creatures you ever met is Stefania. You will understand. I spent long enough, as with the team of MOZHANs, with her in teaching. She is unique and is Stefania. (3:02). And she's the only woman MOZHAN, in the whole team. But she's something unique.

(SA) Thank you so much, I hope in a good way.

(MK) I don't know the bad way. (SA) Yes, yeah. There's another things, when I was in the MOZHAN, and it happened to me now, I cannot think about bad things. Like, you know sometimes you're doing nightmares, or you're doing bad dreams? When we were in the MOZHAN's, I couldn't do that, it's like, it's impossible. And the same here, I think, I can, I can see that we have a bigger MOZHAN here, happening. And we're creating condition for things... good to happen. I can see we're repeating a bigger massive scale MOZHAN.

(MK) Doug McDonald has written something very funny, but very nice. It says: "In the Scottish tradition the same, educate the woman, the man just bark, grow their beard and rattle their swords." So we're Scottish.

(SA) I have a question from a second Italian. (MK) Yeah. (SA) He's a man. He said: "I got a question. Why does criminals like Gates and the rest constantly torment this planet. Why they don't die, and leave free this planet from their grief? This is what he said.

(MK) You see, until we don't have these, we don't appreciate the process of peace. We have to see these people, (3:04). to understand, and with them they create the conditions to be where we are, that we can elevate. These people serve humanity in a... in a different way than they really want to do. The spread of virus. You see, something very interesting is that, up to now, there was no nobody, does ?? (care) that the Chinese were dying, or the Iranians were dying. We saw the Americans increasing sanctions on the Iranians in the time of trouble, and they got hit worse with it themselves. Now they went and they found the professor who made the virus. Up to now it doesn't matter, it was the others. What can you do? Tell the professor to put the genie back in the bottle? Cannot be done. And in this process, they serve humanity, because we could never do this, bring the banking to a halt, transportation to a halt. The whole world economy has come to a halt, and it's going to get even worse in next two weeks. And I... my team in Iran, were absolutely in a despair yesterday because of something that happened. And I said to myself, "They don't see it. Because it's not the time, they need another week." Because if we put the whole thing out in one go, and the world governments find a way. We haven't got there, they go back to normal. We have to go and reach a tipping point. As Jamilla said this, Stephanie said, many others. "When they come out of this situation, life changes, has a different meaning." And these people will start elevating their souls. You will understand, very, very soon. (3:06).

And strange enough you gradually come off the food. I notice even in our own household, our food consumption compared to 4 weeks ago, maybe 6 weeks ago, is a quarter, is a third. Because we are continuously around the Gans and we, like you, we protect ourselves, we spray ourselves. There is no need to eating. Gradually we are coming off eating in... I said to Caroline: "We... have you noticed?" Even yesterday we've discussing it. We're happy with very little. And it's, it's going through the transition. And this is what it was supposed to be, huh. The, the world lives on equal balance. At the moment, estimated three billions are lock down. Another 2 billion locked down in next two weeks. China will come out with a huge damages, because now we will see changes in China. Because they say there is, but I can show you pictures in past couple of days from China. Motorways are empty. Motors are empty. Doesn't matter what the government claims. What the government claims is absolutely, utterly unbelievable.

This is, take it, if I can get my hands on it, this is taken from last Sunday. (3:08). Around about 3 o'clock in the afternoon, 4 million population, city. I want to show you how much China lies to the world. Because China has to come clear, that way we can move on. Because China has to come clear on how they used the technology, and how they applied it, and how much they lied to us, as the what we call, the world population. The lies told to the world population is unforgivable, they knew and even today, they're lying. .. I want you to see this picture, because then you know. The Chinese have come too far, and they have to change their attitude towards the world's population, and coming clean, in how they have used the, ... I want you to see it. .. we'll try to delete some of it, this is a 3 o'clock traffic in one of the Chinese major cities. (3:10). And then you'll understand why we are calling on all nations to stop lying to their people, and start acting. This is ... We are not talking about weeks ago, we are talking about today

in China, I'll try to reduce it for certain security reasons, as it comes up to me on my other phones. How much, you are not going to go back to normality. It started in December, we are in April, March gone, and the whole world structure isn't working. China hasn't recovered, no way, by a long pole, as we say in English, I try to save the images ... many of them and these same is literally, ... (3:12). literally, governments have to stop lying to their citizens.

And if the Chinese government will choose the path of correct conduct, in a way, very correct conduct, we stand by them, it doesn't matter how, the way they tried to deviate. I especially take a big section out of it, that it can't be recognized for certain security reasons. But I show you the highway, this is a very specific, this is one of the major highways. in China, and the pictures are taken over seconds, that we, you see the full span of the same motorway. And this is 4 months into Corona... I send you the pictures and you can see the truth. Rick, it's on your system. sent to you 2 pictures, this is a major city, major motorway. 3 o'clock on a Sunday afternoon, understanding (3:14). China has no Sunday, Monday, Tuesday, more or less they work around the clock. You can count 1 car on the highway. Up to now we tried, today I showed you communication from the Chinese securities and reports that 10% survive. ... Now you see the truth, this is what is going to hit you. This is what is to come. I put 2 questions to the Chinese authorities, in a direct way. Emptiness of these highways, is when you are calling the whole nation is open, due to so many people dead, or is it that the economy collapsed so bad, that nobody is on the street. The truth is somewhere between the two. You have to understand, this is an artery, it's a main road, it's a motorway. If you have been on cities, even on Chinese New Year, you'll see hundreds of cars on the road, now you see, 1 on the other side, and 2 or 3 on this side. and that's a few seconds later. China is totally dead. (3:16).

And this will happen in Los Angeles, London, New York, Washington, Paris, and Rome. This is 3 o'clock Sunday afternoon, is it the 4th, 3rd of April, 2020. I said to one of the national securities in the past couple of days, show us the satellite images of your cities, then we'll believe. Live, that we can pinpoint and choose and read the number plate. You'll find out most of cars on the move are national security or police, and not many real people. The situation is beyond control on China, 4 months into it. My biggest fear is, that they are going to stay empty like this for years to come, because there are no citizens. We'll loose more to Corona, and we'll loose more to the cancer of the Corona, and then the economy which collapse on the old age and the rest. Don't forget China has a huge, huge old peoples group. (3:18).

There is a message from one of the popular cities in the south of Iran, the mayor, and it says, spread this, spread this, and in his word he said something very interesting. He says, we want the policy from the president of Iran, is the policy to let 15 million people die. Is the policy to reduce, or are we going to save the nation. It seems the Iranian president sits with the 15 million payments from the American foundations. This is not our word, this is the word of Iranian mayor of a major city in south. This city was in the heat of the battles between Iran and Iraq, it is well respected, it's one of the cornerstones of the Iranian economy in the south. He says, spread the knowledge, spread this information, we want to know the clear direction, because these people sit at the head, and they are open to all information, and he clearly asks the president in name, clear my point, we have to know that we follow the policy.

The world leaders have a problem, and it depends on where their bank account sits. Do we allow this to happen to us or do we protect ourselves with the new knowledge, (3:20). or we find a way to save ourselves. Not necessarily with the KF, we never say we are the only solution, we tell you we are one of the solutions. .. This is from the mayor of .. he says who he is, it's in public domain, in Iran, we are not showing anything secret, but it clearly sets out a national policy, or clearance of a national policy, and the Iranian government has to make it clear, are we paying bribes to the Americans to kill our nation. Or who is taking the bank account? We don't play with games, they can bring the KF down, they can do anything. They won't touch us. Please play the video tape I sent to you and it can be translated by the Iranians. ... It's very powerful if you understand, when a man in his position, as a mayor of a major city, puts a challenge to the president of the nation. Is the seat for that president, and his cabinet, and the people he has put in position, or the leadership has to pass on, to the Eminence Ayatollah K to decide for Iran, as he has done for years. Please play it, I will translate for you slowly what it says.. (3:22). .. He says, he is the mayor ?? , (speaks in Farsi ..)

(3:24). ... K- He is the mayor of Musshad, a major city in the south and he says, we have 2 choices, we help people, or we let a lot of people die, the sick, the people who got AIDS, and the rest, and we'll loose 10 to 15 million people. He asks directly to the president of Iran, "you lay the line, what you decide we'll follow." Or we pay people and keep everybody at home for 1 month, and the sick people who come to the hospital, sorry, they die or whatever, but the healthy one stays home, we can start, and we can carry on. He says, we understand these 2 polices directly, so central government has to make a decision, which way we are going. The Sepah and Military are ready to execute either 2. To let 15 million people die in Iran, who are sick, who got everything. Or we go out and we save as much as we can. The decision making sits with the president, and he is asking directly to the president, make a clear decision, that ... This is the same in the White ..(cut in audio) the same in New York, London, and the rest. (3:26). His words, (Azar interrupts, he says) just wait .. can you block (She continues) K- Pardon. Azar- He says there are 2 groups in the government, one of them wants to sit and watch people die, and they are thinking, we get rid of the old and the weak, and that is good for us. Or the other way, the other group says, look we can save everybody, and if you put money, about 30 million, ?? and give everybody about 2 million, ?? and 2 million for 2 months, they can sit home for 1 month, in quarantine, and then what's going to happen, he said everybody, but it is up to the president, to decide now, which way you want to go, do you want to sit and let all these people 30 million people die, or do you want to save everybody. Now you choose your position, which way you want to go, because the Sepah and army are ready to execute this to help people, but if you want to sit and let the weak and the ones who have diseases to die, that is your choice. It means if you sit and you don't do this, it means you want people to die.

K- Yes, but we heard the same thing, policy, pass in the British Parliament, by the government this week, the past few days. That people with conditions, with respiratory conditions, heart conditions, over a certain age, will not be resuscitated if they go to the hospital. The British government has already confirmed what he is trying to say as the mayor Musshad ?? It has become the policy in the UK, and is a hidden policy in most of the nations in Western Europe. In countries like India and Philippines it is the only policy, because there is nothing left. This is where we sit, we in the KF are sitting in the same dilemma, (3:28). with the government today. There are those who have taken bribes, and they want to enforce their policies, those who sit with the

pharmaceuticals who are trying to sell vaccines to Iran, are letting many people die. It is the same with all the governments. Gates Foundation has put all the money bribing, all the world leaders, governors, that, let us do, you get the money, we get our vaccines and we get the control. This man, as a mayor of a city in Iran, who is a policy maker, he is fed up of seeing people dying. You can see he is wearing his mask around his head.

We have this problem, is not only in Iran. Gates Foundation has bribed all the world leaders. I can show you letters of it. It will bring shame to Chinese administration. They have taken nations to ransom. But we'll see, we'll survive. Human race will survive. Maybe 100 million die, 200 million die, 1 billion die, but the rest will survive will suffer in next few months. Exactly like Fukushima. In Fukushima (Hiroshima), few thousand people died when the bomb came. Many, many more died from the side effect of it. And they still die after nearly 70 to 80 years, (3:30). because of it. The reduction in population through Corona is made to crown one person. They wanted to bring it, to run, to rule. And there's one thing, I have a message for all of them, "not in my time, not in my space." Not in my time, not in my space. Today is my time, and my space. Any other question?

(AB) Mr. Keshe, I just want to add something. In Iran, the people who are in that election, who are choosing to let people die, they are the same people who are waiting for the vaccines dose and make profit out of it, that's what it is.

(MK) Yes, we know that. And they all carry American passport, they were educated in the U.S. Iranian cabinet, on the first election day, when it was announced, had more American educated doctors on the cabinet, than in Trump's cabinet. They all carry double passport. Trump in a private talk said, "I wish I had so many Iranian educated people in his cabinet, than mine, then I knew how is, how I can handle it." (3:32).

(AB) Mr. Keshe, I want to tell you a story.

(MK) Let me, let me, tell you something. Let me tell you something. When the Iranian president went to U.S. to give a talk to United Nation as you understand, he was confined to a square block, that he could not go anywhere. And in an interview he said, very interesting, but people never understood. He said, 'we've been through all this city during, when the time we were getting educated, we know this New York like the back of our hand. We don't need to go out now.' They're all American educated, and the vaccines are sold, through the damage.

But the reality is, what is the outcome for us as a human race? Or, what I see, due to lack of leadership in Iran, there is no need for election. Except direct rule of Ayatollah Khamenei on all matters from now on. Until a correct government is elected in Iran. We don't deal. The... the whole understanding of the whole, the same is... the same in Italy, in Holland, in Belgium, in Germany. Governors have to decide how to govern collectively. What you'll find out, union will split apart, because did not deserve, did not serve. You got to understand, the...

Why I stand so much behind the Iranian nation, is not only because I was born there, I'm connected with my blood to it. It's just because I know how the nation has suffered, (3:34). in the hand of all the boycotts, and it still stands so resilient. Hasn't gone backwards, is has become more advanced in technology, because it had to look inwards to develop what was needed. And this has created a special breed in Iran. Highly intellectual, talented men and women. And soon... and soon you'll understand, there'll

be a need for it. Because, in so many ways, we shall see one thing, mankind will mature through the soul, and the soul of... for those who matured first, will become the light for the others to mature from. And if you go by tradition to the flag of Iran, we carry the sun. Iran will shine, but not only for Iran, but for the humanity. But what is interesting is, how world governments have failed to serve their nations. You're all at home. There is no money coming in. There is no food on the table. We've seen the looting in the state. People literally ransacking supermarkets. If you haven't seen it, I can show you a few. In China people are, out of hunger came on the streets, because it was Corona or hunger. And they... they were not dying of Corona but they were dying of hunger. There was no money in the bank from the 4th week of lock-down, 3rd week of lock-down. They came, you can kill us but at least we don't... and they put people against the wall. (3:36).

In some cities more people got shot, than died of the Corona. Now you understand why some of the cities are empty. Some factories work, some people tried to get going, because they had to support and feed. I understand this, I've been through this, I went through the Iranian revolution, and I went through the opening of the Eastern Bloc. There were factories in Bulgaria and Rumania. I traveled across Europe, on a daily basis, a weekly basis, looking at the factories that were there, but people had no food to eat because nothing could be produced. We worked at it, we understood the problem, we ... so hard, that trying to bring, what we call, job, food, back into the situation. I have been there, I have done it before. I know what it is, when I tell you how it is going to be, it's not going to be so easy. It took us 5 years to move Bulgaria and Romania after the opening. And this is worse then the opening, there is nothing left. There will be nothing left. This is the biggest problem, the biggest problem for mankind, how are we going to recover from this disaster, (3:38). it won't be easy, there is no money to start, shipping has blocked, and the situation is worse than many of you can imagine. Banks will be the same as before, would they be backed by the government to save the banks, or would the government instead of giving \$2,000 checks, will write a total company check, that they can pay their wages, they can pay their people, and they bring the economy, this time the right way. That will take at least a year. Many companies have gone bankrupt. The solution is not and can't be resolved overnight. Shutting down and restarting is not that easy. I have been through it. I went through it with the Eastern bloc. Maybe that's why, was, that it brought me the insight of what's going to happen. It's not an easy job, if you understand what it means when the economy collapses. In another 2 weeks the US, you'll have no economy. What's going to happen to us, how are we going to bring these jobs back? How are we going to handle the looting, who is going to pay for it. How are you going to feed yourself, (3:40). if you don't use the Cup of Life (CL), the Cup of Man, at least to be able to carry the energy. The situation is not that good, but the situation is worse than you think.

The biggest problem is, would the Africa survive, this better then Europe and America. We see in South America, disaster is worse than what we thought, streets, bodies not collected. People just putting their dead bodies on the street, because they can't bury it, most can't afford to burying it. The reality is who are these people hoping to lead. Or actually lead a nation, that exists to lead. (3:42). It's very easy to be a leader of a mental institute, you got to be another one yourself. And it seems Gates condition is heading that way. One imbecile trying to lead the others.
Any other question?

...

Q: (In Spanish) (3:44). Does the proximity of 5G effect the production of Gans's and Nano (N) coverings?

K- There is a discussion, and there is a big discussion in a number of KF KS asking this question, and in so many ways, we, you can't say a hundred percent, "no." But, in so many ways, we cannot dismiss it anymore, but the problem with G5 is, has a resonance of 60 kHz, which matches the oxygen (O) according to the scientists. This is the problem, that if we understand this, we can blame a lot of things for it. We got to keep an open view to it, because it can effect O, but what we don't see in the structure of Corona, is connected to Na, the salt of Ca. (3:46). The salt of Ca is very far in frequency, or what we call, resonance away from O. But in the combination of certain cells, they can be an interference, but it can't be proven. I spoke to ?? you, but it can't be, but it can be, there is a possibility of it. But it just happened that the two have come together. So a lot of people are trying to connect it. If you study the papers which are coming out on G5, it is horrendous. As you know, some of the countries are burning these G5 lampposts. If you see them, they are like a street light stand, and we have seen many effects on it, on the plants, on the trees and many things. What is the problem, in Iran we don't have a G5. We asked the questions from the authorities, is there a G5 operating in Iran, because officially there isn't, and they say there isn't. And I know there is no such G5, as such in India. So it doesn't connect, it doesn't tally. In Africa we don't have G5 as such. In South America we don't see G5 as such. (3:48). Even in US they are trying to catch up with G5. So there is not such a solid collaboration between the two. We say, no, but still there is a reserve point, that if it is, what it does, it's the way, it's transmitted its energy packs, as a frequency, as information. peaks ??? 60, which is around about O. ...

Maybe the G5 will damage cells, create diseases, without a shadow of doubt, it will do. But it is not connected to or ?? to Corona. We have to be very clear about these things. We know, I have seen so much pictures, and documentaries, and people literally on the street pictures, send you pictures and you can see it. But yes, it will damage, without a doubt, it will do, because as I told you before, we have done tests on masts, communication masts on top of the buildings, and we know it does effect certain people, but it has its own damages, we don't see a connection to Corona. G5 definitely creates damages to cells, there is no doubt, hundred percent it does. Scientific report supports it, everything else is supporting it, (3:50). and physical evidence of it supports it. But it has it's own damages, it's not that, what do you call it, deliberately will cause the, as some people are trying to connect it. It will definitely create damage, we have seen it, the evidence is too heavy, not to.. and it's so clear, not to, and how we'll handle it. We can't connect it to Corona, and blame Corona for it, or it brings Corona, it brings damages, like all the masts, and it will create conditions, but we can't connect the two together at this moment. But, yes, I am a firm believer, that G5 has damages beyond repair, because I see it, but I will not connect it to Corona. R- If it makes, like a depletion of our immune system, as humans, say, 5G being covered all over the earth basically, and if it gives a general depletion of that immune system that, and leading to other diseases, and so on, would that be also leading toward more Coronavirus, The Coronavirus seems to attack the weaker, like older people and people with weaker immune systems, and so on?

K- We can connect that to anything. (3:52).

R- Well this is the thing, and some doctors who are in the know, say there is only one disease, and it's the environment which is , are the environment of the cells, basically. And the environment with the 1G, 2G, 3G, 4G, are all interfering with the cellular

process and making more problems? K- Everything we do interferes with the some.. R- This is the thing, and we got the air pollution, the food chain disrupted, all of our industrial processes are coming back to bite us now, and making us weaker, as a population. K- You are the best what do you call, sample of oil damage.. R- Yes, absolutely, oil damage. ... you want to have a poster of someone damaged by oil, I have the history to prove it, but it's also, in a way I am thankful because it has given me my, superpowers in a way to carry on with you Mr. Keshe, and to keep going on with this technology because both of us, and all the KS know that is the way forward. This is the biggest opportunity in the history of this planet right now, due to this funny little virus, which is effecting every single country and every single military, and all of the institutions right down to the coffee shops of the world, and all of the things people have been relying on for many years. (3:54). But what a... What a beautiful opportunity to be able to showcase the plasma technology. As you're introducing in Iran and well, all over the world as we have been doing for years. All the seeds have been planted and now the fruits are... the plants are... are sprouting and the blossoms are coming out, in many ways I think.

(SA) And also we never had... I mean the only difference now is, the, the... we've got the plasma technology on our hand, and we understand the soul teaching. So now, we got new tools never seen before.

(RC) Yes, confidence. Confidence going forward with those tools, exactly.

(SA) These problems are not problems any more, because I really love the wish that we make. When, we just wish that we elevate the souls not just in the Earth, in the Universe, galaxies, in Unicose. That give us so much strength at the soul level that all this 5G and Corona virus or other problems that has been around up to now, are not anymore a problem anymore. It's just matter of fact of start to develop this self responsibility, that each one of us has the duty to understand it. Now... Now with this new knowledge that Mr. Keshe presented to us. We got no excuse to feel like victims of anything right now. And if we got united we understand the power of each one of us has, (3:56). in their hands and we get self-responsible each one of us, of what we can do, all these things just disappear in thin air. It's really not a problem anymore if you focus on what we been learning up to now.

(RC) Exactly! Perfect. Yes we focus on the solution rather than the... than making it a problem. That's the difference I think.

(AB) Stefania, actually the Keshe knowledge in Iran has become a virus.

(MK) But you have to realize...

(AB) Keshe knowledge in Iran has become a virus. And then I have news for people, the Gates people, that you wanted people to... with this what you created, you made Keshe Foundation go to every single home in Iran. In villages, people are listening to Keshe knowledge. I mean this is a bad news for you. Because Iran has become what... the center of the knowledge as Mr. Keshe says. Really, really bad for you guys. And you know Mr. Keshe, you know... When you're talking about these people have both passports, Iranian passports. It's absolutely true. Because I tell you a story; when I was 17 years old, and we just moved to Tehran, because, I wanted to go to university, medical school. We bought the apartment in Tehran, in a new building. And then I remember that time. It was beginning. It was beginning of the commotion in Qom. And then, there were a couple just came from United States, they were educated here, she had a PhD in nutrition, and then he had the PhD in economy. And I remember, that time they even brought the whole furniture from United States, even the plates, spoons everything. Because I used to go to their house, and they had a little girl. And then I remember, after the revolution happened and everything finished. I mean this woman

was totally American, she had... she was wearing mini-skirt, that her... My father wouldn't allow me to wear mini-skirts, and then, she was completely American. (3:58). And then after the Revolution happened, I saw... It was finished and I saw... One day I went to their house, because I was gonna... It was something, a plate, something, my mother gave me to give it to them. I went and knock on the door, ringing the bell, and then, she opened the door. I see she has this scarf, completely covered the face, and this hijab that she would... like a... like a... like people in Qom that are traditionalists. And I said, and I came up, and then I told my mother what happened to these people, like she is covered from head to toe? And then, I realized the husband... I found out the husband got the job as a minister, in one of the ministries of Iran, in Tehran and the wife got some high position in the health department or something. And then I saw how... and that time, I told my mother, "How strange people, change position as if, you know, you wear mini-skirt one day, the next day, you've covered from head to toe. What happened here?" So these are the people who just change the position are going to what the environment is.

K- You see, this is the same problem in Chinese government. The Chinese government says many of the people at the top, carry American passport. ?? specially with the Chinese, many times... the CPC level. There are rumors some of the CPC members carry American passports, and they are working for the Americans. Chinese army is standing solid, Chinese military and even there, they have some reservation.

I said to when in... a close friend of mine, very recently, that one of the passports will be sought after, by many, very soon, it will be the Iranian passport. (4:00). Just to come and get educated. To get a visa to be able to fit into universities. But in so many ways, we should take this knowledge to every university across this planet, as One Nation. And, in so many ways, if we move, if the Iranian government move fast enough in next 2 weeks. I don't expect everything out of Iran overnight. Because, they're doing some beautiful work, especially the people in Tehran Military University. And the others. And fighting with, what we call, the American side of the Iranian administration working group. That this, we need this time. My view is very clear. The... The Keshe foundation group in Tehran are very, very... they wanted to go out tomorrow, but I keep on pushing. Yes, get it done but I know we need another 2 weeks to 3 weeks. You will understand when in 2 or 3 weeks time, if the Keshe Foundation is still up and running, if the Zoom is still operating, and if you as foundation members will keep in touch with each other, on the roots level, and spread knowledge. That the knowledge after this, will gives us one option, and that option is Space. You will understand it, if we would've left it the way it is, we will not reach anywhere. We will be like this. You heard one of the richest men in the world, gave 1 billion yesterday for one group for Corona. You give that 1 billion to Keshe Foundation, we'll stop all the Corona ?? But it shouldn't happen.

You got to realize something on the other side, (4:02). understanding the bigger picture. The departure of so many souls at this time through Corona, and whatever, or because of it, has multiple reasons. Once, is that brings men to the maturity of having no respect for wealth and governance, because they govern themselves. Secondly is the opening of the space to man. As we see no more wars, as we see no more things to do, and the Corona has taken most of whatever it wants to take, many organizations, seeing the work of the Foundation, understanding of it, will concentrate on developing it. And we will see opening of the space. If we wanted to do the way we were, it could've taken us another ten years. Now the governments will spend time and money. And development

at the new technologies as there is no more war. And organizations like Keshe Foundation, be it from Arizona to China will take the lead, because there will be many people will claim they've been with foundation. And they are there, and they have been there years, because now it's prestigious to be. But you'll find out these souls will fall out. And in so many ways, the ground is getting ready for opening of the totality of human race, welcoming the Universal Council, Universal Community. You will understand soon.

We just need to go that extra mile, as we say in English, to be able to have everything ready. I know it's very harsh, we're losing so many people. But you've got to understand, these souls came here to make, to path, to open the path for mankind. (4:04). We've got to look at this in 2 different ways. Why so many, and why so many in one go? What does these numbers bring? Our governments are cannot govern. The kings and the queens are hidden in the palaces and they are not doing anything for their nations. We expect the looting of the palaces in the coming short time, you watch. People are hungry, gold will buy, and these palaces are furnished with gold. Artworks does not feed the stomach of the people. It's a very interesting, very interesting video on the Internet. I received it yesterday through the Chinese Channel. (4:06). I sent it to Wang Lin, I said translate this for me, it's in Chinese. And the interesting part is, as she said, this is in America, past few days. And there are people ransacking a huge, huge supermarket. And you know what is the funny part, if you watch that video. American marines are walking around with submachine guns, just watching people, they can't do anything. You see them, with the machine guns, they're just walking. People passing them, carrying every loot in the supermarket. Who are they gonna shoot. If you want, I can send the video to be shown. Militaries, police are incompetent. (4:06). They don't have the competence, and secondarily, these people are hungry. They loot the supermarkets, they take a few glasses, they take all the food, then the food shops, then the palaces and then the rich people's home.

This is what I said to many of the Keshe Foundation people, cash as much money as you have in the banks at home. When the electronic system drops, computers fail, you have nothing to live. Hold cash, hold something which you can exchange, if you need. It's electronic, has no value when the bank system collapses. Then mankind is getting ready for that change. We lost our trust. We've seen in the picture of churches used as mortuaries. And the strangest thing is... Rick, can you put that picture of the church up somewhere?... if you can reach it, put it on the screen. (4:08). Look at this picture and try to understand one point, one interesting point. (RC) I'm not hearing you, Mr. Keshe. I think the... Not sure it's my audio or yours that's cut out.. (MK) Yeah. (RC) I hear you now

(MK) Yeah. Where is the priest? Where is the man of God, or there is no God? Or is the church renting the spaces for the bodies? Caroline said something very interesting the other day. She said do you know what's good about Corona? Less children go to church to be abused by the priests at least. (RC) I was wondering who's going to pick up those... all those Bibles that are sitting on the benches now? Nobody will want to. (MK) Actually they are needed to burn these bodies, because we cannot bury these bodies. (RC) That's it, the paper to burn the... to burn all coffins... (MK) Because the lies in them has to bury with the bodies. The truth is, where is God? Where is the Creator? Are the man in the coffin suffering the same as the man on the cross above them? (4:10). This is... this is the whole... the absence of reality. (CR) Mr. Keshe, good morning. (Mr.

Keshe, can you hear me? (MK) Yes (CR) Just one second please, Can you hear me now? (MK) We could hear you from the beginning.

(CR) Yeah, but I couldn't hear you, because I was on my loudspeaker. You mentioned something which was taking place in Austria, and you explained that when they bring these kind of infected bodies into a building, you can forget about the building, if you don't decontaminate it from top to toe, you'd better burn it down. Because it's literally is infecting the whole environment, this virus. Because the amino acids are sitting on the woods, on the chairs, on the floors, on the walls, on the statues, everything that humanity ever has or human has ever touched, the virus can survive on it. Is that correct what I understood?

(MK) Yes. So, the house of God will be empty. Nobody will go in, out of the fear of dying. This is one of the biggest problem in... especially we will see this... this will create a massive problem. Saudi Arabia has gone into the dive with this now. (4:12). We are watching the behavior of the Kingdom of Saudi and... I'll explain to you very, very soon why. The... they are gonna enforce the restrictions. As usual with the other places...the... The biggest problems will come in the folding of economies and not finances available to bury or burn these bodies. There are people would look into churches to pay for these burials, as the families have no money to pay. And would the government accept, and be able to do this? Soldiers will not go near, because they know they die. Many, many soldiers died in China, from the Corona. We... we had a rough security estimate about 150-200 thousand soldiers have died in China already, or are suffering and battling with the disease. They were put in the front line, and they had to follow. But nobody followed what happened with that picture afterwards.

Countries like Austria, premature in trying to open, will put their nationals in a huge danger. You will see what will happen in Austria very soon, because they are playing a massive game. But we see the underlying pattern. And they say the numbers are down because they are eliminating a lot of it. (4:14). The Corona with the stomach, with the heart, with skin, are not considered as Corona. So, they... because they... the virus has evolved now, away from the lung. Comes to the lung and then jumps across to the others. We seen it. That finger you saw with the Corona virus... Have you got that picture? This... the thumb. Rick? (RC) Alright, let me re-get that up here. (MK)Put it next to this picture (RC) Okay

(MK) This is the Corona which stays and we monitored this for years to come, but there's a way to solve it. You see the white. This finger, this here, the white, yes. Does anybody want to say who this finger belongs to, this thumb? This is a Corona patient, and it wasn't there before Corona. Anybody wants to claim the thumb?

(SD) It's... it's my thumb. (MK) That's Stefania's. Was it there before? (4:16). (SD) No, no, not at all. And... and I have another picture. Because... It's... Yeah

(MK) It's calcification, it's the calcification of the bone. If that spot, that salt spot appears in the womb, in the ovaries, in the stomach, 6 month time is a cancer. (SD) Not with the GANS. (MK) Not with the GANS. We... we have brought in a new protocol worldwide. We wait till the situation completes with the Iranian government, that it's scientifically put in papers, that it is accepted by Gates and Fox's News cannot block it. It will go through the appropriate channels. That... you will see... You have to follow this procedure for months to come to make sure... As Caroline said, you go to the church to pray, you pick up the new variation of it. These dead bodies in this church will haunt mankind for centuries to come. (CR) Mr. Keshe... (MK) Yes? (4:18). (CR)

For people, maybe, who don't understand so easy why you're referring to that it will become a cancer. Would it not be good to explain, when we went on the MOZHANs, 3-days blueprint? It was explained with Dr. Rodrigo how the seed of the cancer starts in the breast and why it becomes cancerous, and how it becomes cancerous, and how cancer... (MK) Oh, all that education is in Keshe Foundation, they have to go and search. (CR) Yes, but... (MK) We have done it. (CR) ...it would be very good for doctors to be referred to those information's, because they were public.

(MK) Listen, the doctors at the moment are only happy with their income. We had a very interesting situation last night. One of our active Knowledge Seekers who goes everywhere, he was called a week, 10 days ago, by the head of the hospital to speak to. He went there few days ago, they said they're gonna... they... they give... they can give him some patients, said he can test, because the head of the hospital has so many. And the hospital, with the government, have come up with a very, very clever tactic last night... Late last night, or yesterday last... yesterday afternoon... Can you close your microphones, please? The head of the hospital... Can you close the microphone, please? The head of the hospital has called this guy, he says, do you know something, you want to see if it's effective and it works? From Saturday morning, the emergency unit with, (4:20). God knows how many beds, it's a major hospital in the area, is yours. And let's see how many of them you're gonna save. I spoke to our consultant doctors in Tehran. I said, what's going on. He said: there's a problem, you know that? I said: What's the problem? He said, all the ones in these wards are cancer patient, dying. None of them got anything to do with the viruses. They want just to embarrass us. I immediately said to... We only accept the virus cases and the ones which we want in the board, not the cancer. And I said to our guy, if there is no cancer... confirmed Corona cases, we are not handling it. We are not there to save cancers. And they will die. These are the people who have a week, 10 days to die. They are on their life support with cancer, they'll all die. This is the cleverness of the regime in Tehran. But we are wise, we have advisors, we look around. It's not easy the way to overcome these doctors and people who are well covered. We asked for the Corona patients, they said, emergency, they are dying. You go and help, if you can we'll see. If you save one, it's good. But they're all cancer patients, with Corona, some of them. They're already dying. It's like giving you a bunch of rotten fish and say, see if you can save any to eat. (4:22). But, do we have the knowledge to carry on?

(JM) Mr. Keshe? (MK) Yes? (JM) Can I say just something about some doctors behavior (MK) Yeah. (JM) So, I think the... in North Africa some doctors, first when they heard about virus, they are... put themselves in the sick leave, and they closed their cabinet, and they are not active... They are not helping anymore. So they let some, some doctors who are upset, and trying to call them back to hospitals. It puts the situation very, very bad. (MK) We've seen that the same in Iran. The dentists have been called off, there are only emergency dentists. It's the same in New York, I think, the same in America, and all the dentists have nothing to do, because it's a close contact. Many, many doctors took this position, they took leave. Many, many government leaders took a leave, because they were infected, they didn't want to be found out.

We see people recovering in the hospitals. We see their recovery. But, as the Chinese data shows, they'll come back and they die. Or they die of damage to immune system, (4:24). which then they say it's got nothing to do with Corona. We see damages in the upper, what do you call, femur, where most of the immune system cells are coming out

of. They are getting blocked because of the Corona conversion, the same as on the nail. We... we see a lot of things but you have to understand, they put so many penalties on the doctors not to move, that soon the doctors have no patients not to move. I was talking to the doctor in the hospital in Tehran, near Tehran, which has been announced by the government. He says: "Oh, I just have 1 or 2 patients coming in, we handle them and they go. The ward is more or less empty, I have no Corona patients, because they all have their Cups, they are doing it, we're monitoring them at home, they're all okay." No one in the 120 patients or 100 patients which have received the Cups have died in past 10 days in Tehran, in this area. No one. No from their families have come. Cup of Life means a Cup for Life for the whole family. I wrote to the doctor yesterday, the day before, (4:26). I said to him, "Any news?" He says: [Farsi]. He says... It's a response from the doctor, he says: "Hello, there is no news." And it says, "We have 2 people in the hospital, but there is nothing important, and they're all OK." This hospital, who has had 1 or 2 dead a day, and tomorrow we're there 3 weeks. And the doctors, and the nurses which are dying in the hospital. This is the safest hospital in Iran to... to work at the moment. You have no Corona and you have no patients. The doctors are sitting there and are just watching, they cannot leave, the city is lock down.

And many, many Iranian Knowledge Seekers ask "Where is this hospital?" You cannot go to it, it's closed. It's a closed city, they won't let you in. But, the city is safe, and again is thank to the work of Universal Council member Mrs. Azar. Her vigilance and her family took us to this hospital. Universal Council members do amazing things without them knowing, or their souls take them because that's how they operate, to these positions. Her teaching, past 2 or 3 years to her family in Iran, then supporting the many sick people in city of Qom, now they've seen it, it works. Giving a cup to someone from another thing led to this hospital, and through them we got into this hospital. Nobody has died in any of the 100 homes, (4:28). whereas, according to the Chinese the statistics 90 coffins should have been taken out. And according to the hospital itself 1 or 2 a day in 20 days we should have had at least, something around 20 to 40 people dead.

And still, the embarrassing President of Iran says we need data. Because the data allows him to cash the funds in the American banks. There is a very clear policy in Iran, when we'll get through it, but will come out very correct. We sit as the Keshe Foundation directly, directly with Sepah and Iran military forces to protect the nation because we have it, it's in our hand. And it's a clear decision, Ayatollah Khamenei has to override the president who's incompetent, or the president leaves office and let it to be done by the Sepah. There is no 2 other way. We have shown enough. Tens of thousands of lives saved in Iran. The president's bank account is more important than the nation's life. The position of the president in Iran is untenable. We have sent a direct message to Ayatollah Khamenei to make a decision. Because once we start with all the support from Iranian nation we can go cross the world with other nations because they can see it. (4:30). Again we have one incompetent king who has cried the lying sheep, the wolf. And we have a one incompetent president who sits on top of the technology. And the "Crony's" which he has created the same as Belgium.

We need to start movement somewhere that we can stop these churches, to become, not the church anymore to lie and abuse, but the buildings where the new technologies are taught. The knowledge of the Soul of the Man, not the knowledge to rob the Soul of the Man. How many people will kneel on these chairs and hold that book, knowing it has been so close to a dead body with Corona? These books have to be burned, because

there is the fat of the hand of many people and Corona is a few millimeters away. Does the guy spray on the book?

This brings back a memory and I tell you exactly what it is. When I got poisoned by the Belgium's to kill, John who came from the Belgian government to kill me and the poison, (4:32). he said to me something really strange. I should have understood it at that time, it didn't click on me. Every time I taught around the table, Armen can tell you, I used to sit and I used to take paper to write on for the Knowledge Seekers to see. He laced the paper with poison, so every time I touched, every time I came from the teaching room, I was getting poisoned. And he told me once, he was telling me exactly how they're gonna kill me but I wasn't aware of that. He said, "Do you know how many, many people in Vatican got killed? They laced the books when they were praying. And every time they touched, they took the poison. The book of God became poison to kill, by the Church. Now with these books, will be the same. Now you understand why I said, these books have to be used to burn those bodies, because they are already contaminated. I've been through it. And how many of you will go to the church with your own book? And how many of you, do you have a Bible at home or you go to the church with the Bible in your head and in your heart and won't accept the lies?

I said to a priest from Vatican once. I said, do you know what the cross is, with the Christ on it? Their cross is their Rome, and the man on the cross is its citizens. And hasn't changed in 2,000 years. (4:34). Does anybody know what's the Vatican death toll in Italy? Has any priest died yet? Or is it confidential? Or do the people need to have a church or a mosque? Or do they carry it in their hearts? We've seen in this, in the Islamic countries. People saying prayer loud across the streets and towns. They don't need to go to the mosque anymore. They've taken the mosque into their hearts and they live with it. There's many videos. The whole city goes into a song for the prayer, they don't need the mosque anymore, because they get infected. They have imprisoned us in our homes and have... but we have freed our soul and that's the beauty of it.

I taught you two things today. One was the true Cup of Man, and second was the freedom of your soul. And that was the promise of Mahdi, and we have completed it. Today is the birthday of Mahdi and it was promised in 2020 we will come. The Sunis expected him on his birthday in Mecca, but the city is too dirty. (4:36). It's tainted with blood. No one will touch me, and no one will have the power to touch our knowledge, except man, when he judges for his own to use it, to save his own life. Those guys you see spraying, if they were so confident that the sprays kill the virus, why are they wearing the mask? None of the Knowledge Seekers wear the mask when they go to save lives, or they give the GANS. We saw it in a picture of the guy, with his brother in the hospital. Or has it become the American green back, "We Trust in God," but we don't know where the God is so we print it in the paper. Today wasn't to preach. Today was to save mankind. But you have to see who and where and how you stand. There could be no Internet next week, 2 weeks, (4:38). but we had to send a landmark for you to start moving and teaching. And those who think, you got away with it, know and understand the knowledge, and then you will see if you have got away with it.

Thank you very much for today. And I hope we will see each other next week. And I hope and there is still... There is still time to save... And many of man... Mankind is very resilient. Mankind is extremely resilient race. Thank you very much for today and see you next week, if we're still online.

(LI) Mr. Keshe? (MK) Yes? (LI) [Spanish] (MK) Somebody wants to translate? (JW) Yes. Liliana is asking if she can ask a couple of questions. (MK) Yeah. (JW) [Spanish] (LI) [Spanish] (4:40).

(JW) She wants to know if we could protect ourselves from the 5G antennas with the infinity loop and how much time do we have to be between each spraying of the Cup 1 & 2?

(MK) Maybe you can save yourself with an infinity loop. Because we use it, if you are with us, if you've been around Keshe Foundation team, we all carry infinity loops on our own computer, telephone, mobiles. And it has shown it to be effective because I've seen it through German security in the airports, they see it, it absorbs everything. In respect to the Cup 1 and 2 what I suggested to the Iranian family, who were infected by it and they stood out now is... try to do the Cup number 1 in the morning and the Cup number 2 in the evening, that if you have picked up the virus, you will hear... you feel it. But there is a hidden thing in this process, is that now with Cup number 2 we still don't see pain, but suddenly we see the cancer. (4:42). The body call it the virus.

What I... what we are looking at the new protocol is, at least once a week and I said yesterday to the officials as well, for next 3 months, 6 months, you spray your body to see if you have, but at least once a week cover yourself with GANS number 1 in the upper body, the way you saw with it Jamila, and part... lower part with GANS number 2. Then you might see some pain, because we've seen this recently. So have to make it a way of a habit, to do it or do what Caroline does. Fill up the bath with 2 or 3 liters of number 1, 2 liters of number 2 and sit in it, for half an hour, an hour, every day. And she's got our boy to do it. And it's the way to do it, you decontaminate the body. If you don't have a bath and that kind of thing, cover yourself once a week at least, spend 1 or 2 hours saving your own life from pain. Because, it comes in and it sits in, you can... And secondly if there is any calcification this way, the energy's gone, the calcification goes, and reduces the future cancer. Because this virus is everywhere, we don't know where it comes, where it goes. When you speak to Stefania she will tell you. When I spoke to many Iranian men who I speak to, they are very shy to speak about the pain in their testicles. "Oh, I had it for past week." But women are more open about it. (4:44). Stefania, can you explain to us the pain? We have to wait, she is translating. (SD) Yeah, I'm here. (MK) What did you feel?

(SD) Yeah, the pain was very clear like you... you have like electric current. First of all I had like electric shooting pain. And then you also feels like a... a little bit of burning as well. I have to say you give me the instruction to... do you remember, you give me instruction to make sure I was using Cup 1 and Cup 2, but also make sure that the womb get also with the water of the GANS and so I copied the Caroline now. I'm doing the bath. I'm doing the bath now everyday actually. And that one it really, really, kind of helps with the pain and like I said before, very recently I do not have the pain I used to have before, because it was going and coming little bit again. But now, I brought it to a place where it's not there now. So, I'm very happy about it, but I continuous the... the protocol (MK) Yeah, but... but where did you have the pain? In your ovaries or in your womb? (SD) Yeah, I mean, sometimes it felt some... (MK) How did it feel? (SD) Yes, it's definitely womb, and then sometimes was ovaries, couldn't differentiate the two, if it was both, or if it was the uterus. And you remember when I used to... do you remember the yellow things? Yeah so. (MK) Yes. (SD) Yeah so, so... I think I... I don't know, it

seems to me was like uterus, for sure, and then sometime, (4:46). I don't know if it was ovaries or if it was the... (MK) But how does it's feel? (SD) It's just feels like... It's very weird because exactly what you said, it feels like something calcified. That is the feelings. And then you have this electric, like currents little bit. And then... Now it feels good, now I'm fine, Now it's much, much better. I'm talk about the past... (MK) Yeah, let me... yeah, but... let me explain to the... especially women, we are very, very open about it... (SD) The feeling was something there, yeah definitely. Like, like something that it's getting sometimes solid...

(MK) The, the, the clear indication Stefania, just touched it and if you didn't hear it. The first time, she put the GANSes on, two... She noticed a discharge of yellow, like a Calcium, coming from the womb. It's a physical thing. (SD) Yeah, very clear, yeah (MK) The body rejects Calcium, which is converted in the womb. It's not infection, it's material. So, we know the calcification happens in the womb. You have to be very vigilant. This can change into the womb cancer, ovarian cancer, and the rest. And because, the cancer will come in such a multiple positions and organs, there is no chance of survival. And one of the reasons, one of the things we're just pushing with Enhancement Units to be spread so rapidly in the coming months, (4:48). to be ready for this, that can change saturation of Calcium in the body. And I've just... asked the... as I said, the Chinese team and the Keshe Foundation team, be ready for the mass productions to come in, much earlier. To be ready, for these cancers to come, because in the Enhancement Unit, we can change it, even if it comes in multiple cases, because there won't be enough chemotherapies, they all die, it's as simple as that. It's not metastasizes anymore, it comes all in one go, liver, kidney, breast, lung, or every organ, because Corona has solidified Calcium. We just need one of them to trigger, the rest will go. When we, give you, information it is as precise and exact as it is. What's the second question? [Spanish] (JW) Why does the virus calcify?

K- It has the energy. Virus is an energy pack, and in its structure has the energy equal to the Calcium of, salt of Calcium. Which means, it's got a gravitational pull, but it has at the Inertia level... Which means... You see in the world of technology of the plasma, the knowledge is very clear away... (4:50).

(RC) You broke up there, Mr. Keshe. We couldn't hear the last sentence. (MK) White board. I am trying to get my white board back. (RC) Okay, maybe if Flint stops the sharing, it might help. Are you... able there Mr. Keshe (EC) Just wait one second, Rick... Mr. Keshe dropped out. (RC) Yes, I see must have to restart there. Okay bear with us a minute, while we do some reconnecting. I hear Flint has a song prepared for these intermissions, are you going to sing for us, Flint? (FM) A... (AB) Actually Rick, I can answer this question, as I... as much as I know it, until Mr. Keshe, comes. You see, in the Universe if the field of everything exists, you can make from... If you create the field of banana, you can create banana. If you create the field of gold, you can make gold. So, in the center of our cell... (MK) Hello! (AB) In the center of our cell, the energy of Calcium is there. So the field of it, the back... why... what the virus does, virus to create that field change it to the solid Calcium. The inertia of the Earth, create the Calcium. So the virus have become like an entity, who can make Calcium, and it's... the fields are available, just like that. (MK) Yes, I'm back. (AB) Mr. Keshe, I was explaining about the Calcium. (MK) Yes, I'm back. I'm trying to find... I got dropped off from one system to another, and I lost everything. So, I'm trying to find my code down the line, and... What were we talking about? What was the question? Calcium

creation in the cell, how it... does it become Calcium in the cell? (MK) Ah, the... The... How Corona brings Calcium, Yeah, just a second. I have to find my... my code somewhere else...

The calcification is very simple. (4:54). If this is planet Earth and... I'll put it this way, if this is the fields of the earth, in the interaction with the fields from the Sun, they create packages of energy. These packages of energy, internally have the characteristics, because they came partially from the earth fields, connection to the gravity and magnetic field of the earth, because they're created from it. It is inside, if you understand the structure of the plasma. They stay... if this is lets say, the boundary of 5 kilometers, they stay as still energy packs. Lets... this is 1000 kilometer in the space. This energy field will pull them in. But don't forget, they had a fingerprint from the interaction of it. Because the plasma works like this (draws a spiral). So fingerprint of the gravitational field of the Earth is already embedded. And then, it has a fingerprint of the gravitational field of the Sun embedded. But now, this is the total, that's the seed, that's the principle. So when, this takes, gets pulled in, to go in... at this point it still, stays as a pack of energy. Here on the surface of the Earth, we have Inertia, which is the gravitational field of the matter of it, plus all the matters, which are built inside it. Because the matter side is very, very small layer, compared to the whole lot, but here is the liquid part and the rest of it. So, the way this... the field of the Earth, (4:56). gravitational magnetical, goes beyond. The strength of the field of the Inertia, which is an atomic mass ratio of the gravity of the matter state, is very, very thin, runs maybe about few kilometers, 2 to 5 kilometers, 10 kilometers, depends on what we gather and the fields it goes up to 25 kilometers in cases.

So once this energy enters this zone, the Inertia of the earth converts it from energy to matter state. Now, here was field strengths of the nitrogen, but when it gets to the atmospheric condition, lingers on and changes, to matter, with the rain comes on, we receive nitrogen. That's why we have the growth of the plants, as they say. So if you are here, you created the magnetic field strength of the sand, of the desert, still stays Inertia, but here, because the strength is the desert, here falls in, as the sand of the desert. This is how the layers of the earth are created over billions of years. So earth has an Inertia, which converts the energy to matter state.

The same is with Corona. The Corona enters the body, when it comes to the cell, the center of the cell, has by inheritance, Inertia field strength of Calcium, because in the bone were came out, carries it. So this virus now, sitting around it, having that energy, converts this one to a Calcium. In a way, on earth the Inertia sits outside, with the virus energy it sits inside, and it converts it to a Calcium. So simple. (4:58).

We do it on a daily basis on earth, every second, trillions of energies changes to matters. It rains, you say, where do you think the rain comes from, most of it comes from the ground? Most of it is created in the interaction of the fields. And some it radiates back into the atmosphere of the solar system. And so, this thing, has a property to encircle, and the field strength of it, is of the Calcium strength of the field. But this is field. And now, what it does here, it does here in reverse, and calcifies, it becomes matter. And that strength we know Calcium in conjunction with the salt of it, becomes solidified, that's what we have in our bones. So, it has an energy.

This was very easy. the first pictures came out of Chinese to me, I knew exactly where it was, how I had to design the system. But I had to design the system, that it fits into the whole structure of nuclear atomic structure, and the plasma system at the same time, because we're dealing in a matter converter, which becomes matter condition. That's why when you die, your bones stay. And the rest disappear, because it has the capability of Inertia in it. Calcium is the only thing which carries the Inertia of the Calcium to matter state. And we understood, the minute I saw this with the experiments, and the experiences we have from the past, I knew where the Corona is going. And it was calcification, so... We saw it with the lady from Iran, 10 to 15 years ago, how calcification happened, so it was very easy to... to understand it. And to be able to track it and know where it goes and what it does.

When you understand the technology and the knowledge in full, you can relate it very quickly. One of the reasons, (5:00). I explained this to our doctors last night, to our senior doctors in Iran. One of the reasons, if you remember, I said in the Cup of Life I've produced a condition of Magnesium. Do you know why? I explained to you, Magnesium and Calcium. But why did I choose Magnesium? I knew the only way I can isolate, this seed of the, what we call, Corona, when it's calcified, is to isolate it. When you isolate it, it becomes a GANS on its own, the way you do. It's energy, I can extract it.

The knowledge I've given you in this Cup, will take Man thousands of years to understand. When you have a cancer, and the seed of the cancer sits and doesn't grow, it means there is no attachment of, or very small attachment of the Magnesium. Magnesium is a thread which connects things together in the body. And for me, if I could expand this thread, I weaken it, I make it to a GANS. Here, the Calcium is... is a matter state. When I add Magnesium to it, it's on its own, I get it a GANS and I can move it. Doctors don't even understand. Scientists don't even understand this knowledge. This is why you say, can I mix the CuO from one cup and ZnO from another cup I get the same? No. Because this Cup, I specifically explained the Magnesium. Because you know, your bones, cannot connect to your tissues, your legs, your muscles. They need the ligaments. The ligaments is a tendon which keeps these together. (5:02). This is a cancer, the bone is a cancer and body has developed the technology for it, to hold it, float it, and it pulls Magnesium. I ?? (Azar interrupts..)

(AB) Mr. Keshe, one of your teaching you said the... if the virus, Corona virus is high pack energy, so what really kills it is the Cu GANS. But when we go to space, there, a lower energy pack, with that case with use CH₃... So what the Copper GANS... (MK) No, no, we don't use ... Cu GANS. (AB) What the Cu GANS, what the Cu GANS acts like here? I mean what is the purpose of Cu GANS here? What is mechanism of Cu GANS?

(MK) The Cu... the Cu is your cell, is your tissue. It has connection to your tissue. This... this virus does not hang in there on its own. It has connected to a muscle tissue to a cell, which has Cu in it. And in the lung (break in audio.) , .. you have... you see if you understand it in a simple way, you have a Cu plate, you Nano-coated it... Yeah? And then when you, Nano-coated it, you freed it, it became a GANS, yeah? Now we can use its energy, Now you can play as an energy with it here, as a matter state. Corona, makes it to matter state, I go through the same process. I Nano-coat it, I isolate it, I make it into a GANS, and I can take it out. So simple. I go through the process of

GANS production in the cell of the body of the man, through different apparatus, different parts of the water you produce. You don't understand this, so it's no use to explain. I dismantle, that's why we keep on telling, you use it every half an hour, because you dismantle, you take out, then there is no more energy for that, you need to take out. (5:04). Millions of cells are converted, not 1 or 2.

Knowledge is very deep, but, you don't have the people 99,999 % of the Knowledge Seekers, don't have, and secondly, there is no... these things needs to be taught over centuries. We came with the knowledge of Creator; this is just a game to play. You go and make the plates and make the GANS, but this GANS needs to play with another GANS. But the Corona has made a matter out of it. Now I have to do the same process of GANS making in the body of the man, so once I do that, I need to create an environment that it is on its own. It's like a water floating. I have to create these tentacles, with Magnesium, to let it float, to keep it there. And then, when it's there, it's an energy. Then I can interact with GANSes I put on. It's very strong, it's a Calcium salt. You carry CuO, ?? carries Zn... The difference is very, very little. But the Calcium salt in a specific condition, is heavier than your Zn. That's why most of you, when you produce the first Cup it's a white Cu. Exactly like Calcium. You have to understand the knowledge.

(AB) That's... that's beautiful Mr. Keshe, that's fantastic. (5:06).

(MK) I know I am beautiful, I know. (AB) Mr. Keshe this is so amazing, you see... You see... You taught us to go from matter to the GANS, to the energy, plasma energy, now here, we're using the same system here, you dissolve the matter to GANS and energy and release it.

(MK) Of course. I'm master in my game

(AB) Mr. Keshe, this is amazing, it's just fantastic, right. (MK) You are a doctor, you understand.

(RC) Let me throw in some other little factoid that I ran into recently that seems to tie into this, which you might find interesting Azar, as a doctor, that only a couple of years ago doctors and scientists have discovered the largest organ of the body. Now we always used to think, we were told that the skin is the largest organ in the body. But no, there's a larger organ of the body than the skin. And it's the, what's called the, interstitial fluid. Which is the fluid in between all the organs, and that flows through the whole body essentially. And it's very critical as to its pH, and is... as to its functions. It's essentially the sewer system or the... the area around the cell that Mr. Keshe shows here. And Mr. Keshe mentioned the removal of these of the toxins, or of the what's left of the virus and so on. So, that would be part of that sewer system you could say that would remove that, and be part of the getting rid of through the kidneys, through the pores of the skin and so on,

(MK) Yeah, but this removal system is a recycling system too. If the...when they take it out, and another part of the body already needs that energy, they know where it goes.

(RC) Exactly, that's... (MK) It's used and this is what... (RC) Mentioned... ... (5:08). this is what we explaining to the Iranian senior scientists yesterday. And he was baffled, they couldn't understand. I said, I take the energy from the virus, when I take from it, and then I use it in the other places. That's why the recovery with this technology is very rapid, because we don't waste. We work exactly the same as the body in this technology. So...

(AB) Mr. Keshe, Mr. Keshe, on the same note, I can...I can ask you this question. You remember when I asked you about the... about the viruses, like the soul is not afraid, you said, what are you afraid of? Think about love, do you feel the love? So, you know, thinking about that and then there was something about... a story about blood putting on the door and... at Roman time. So thinking about that, if we go to space and there are tons of viruses, and viruses are just like, an entities. At the same time in Universal Community, when we go there, whoever needs something, the stronger gives to the weaker, there is give and take. Nobody takes more than what they need. So when you see... when we see the viruses, the pack of energy, maybe we can give them what they need, or they can give us what they (we) need. We live with them. So maybe, we have to learn this here, how to interact with them. That's the beautiful thing we can do.

(MK) You see, I... (AB) Because we can... we can look at it as love. I mean, you don't see the love; I don't see the virus. So, I can interact with it, as just like love.

(MK) In a way I used the word 'love', because it's the easiest way for mankind to understand. Because when we fall in love, we just give, we don't expect to do anything. You know, we go and buy the chocolate. We go and buy... We don't sit in the house, "Oh, I'm in love, come and love me," huh? We go and do things, we cook for the lover, the... what we love. We give everything. (5:10). And when in the terminology of the universe we talk about love, it's not sex and jumping in, and doing what, or wanting something. It's a giving. Is unconditional giving. You take what you need, even you are a virus, you need that, otherwise you won't come to me. And this is what... that's what's many, many, many, many people around my work, have a confusion with. I adore women. I adore... I love women. But in the essence of knowledge I give, the love I give that, when you love a woman, especially in any shape or form, is, you give to them that they give their knowledge to their offspring's, and they can create that condition.

And we have it within our power, as Messengers, to do this. We enlighten the soul of the creation. You call it love, and whatever else you want to call it, and it has to be given freely, not to be asked to be given. When you ask to be given, you never receive, it's imaginary to you. When you are given freely, and it's accepted freely, it brings the elevation of the soul, and inward, can lead to the creation of the children of the soul, which man cannot understand. This is beyond your understanding at this moment, but maybe if we don't lose the Internet in the coming time, I teach you. Children of the soul does not... physicality... does not need the physicality of the action of the intercourse. They just keep... This is what the virgin birth was explained to. And the maturity comes when they both give, and consent with, and the creation. It's the same as the two Cups. You give two Cups with two soul. What do you see in there? (5:12). The child of that, the support of that soul, that Cup, Cup of Man, is a child, which is the soul of the man, who created it, because he needs it, otherwise he doesn't create it. In a way, you create a condition to save for yourself, "I made thee, that thy might create children, that they may love me. That by loving they give to me, that I can exist." It's the writing of the Baha'u'llah.

So, what do you expect, if you don't understand the theology and the reality? You don't need to create. You can create children of, what we call soul. And then, if the two consent with the acceptance of the... like the Inertia, I explained, can give it the dimension of physicality. It only can be done with the prophets of God, with the Creator, and no other time. And this is what you got to understand. And people are scared, "Teach us the thing, don't talk about theology". Because now you have come,

the creation is the soul, is the theology, is what you are created of. And like before you want to deny it? Deny it. It does not go under the carpet, it still carries on and delivers what it's got to deliver. This is what I said years ago, "Hello friends, we meet after so long." The understanding of the creation of the soul, is to give. You are not there to take. This is the worst thing for man, when he understood gravity. He thought it's... he can grab everything. In one of my papers I explained gravity as 'grabity'. Grabbing. Not pulling to come. You have to come as you like. (5:14). But man has changed the world of 'gravity' and 'grabity' together. He grabs everything, kills everything. And that's why he has no soul.

It takes a long time, even for many I can explain, months about just this picture on this table. Man is not ready for the knowledge of the universe. But a few will take a piece and then they claim they are, whatever. We've seen one in China, he's called Fanzo, he's stolen everything from everywhere, "Now it's my knowledge and everything." And soon, he'll be doomed with it. He'll go with it. And he's one of those, who betrayed the Foundation. You will see what happens to all these people, one by one, follow them. You have to understand many, many, many aspects of creation in the dimension of the universe, then you understand the body of the man is a copy of the it. That's what I keep on saying, we do 5 or 10% in health, or medical, or health application, but through that percent we understand the work of the universe in 90% of the work. When I have such a universe, and I see all the interaction of the universe, because I understand, and I've seen it all, why should I go and travel the whole universe? I've got this body here, does everything exactly like a universe, a galaxy, and in essence creates the shape of the Creator through its soul. So, what does man understand? Not much yet, and claims to be the king of the creation.

(AB) Mr. Keshe, if... if the med..., if the western doctor understand this knowledge, (5:16). I mean holding the position and the cars and homes, compared what they gain, is million times more beautiful. They become magician of the universe. I mean, can you...

(MK) Aaa, this is why we are teaching you, that no one becomes a magician. (AB) Because you become magician. I mean, I mean... If you remember, if you remember there's a Ibn Sina, the old time? They thought he is a magician, because he had the new knowledge. But this is the... you become magician. I mean, they don't understand you become million times, you go to the kingdom of God, I mean, with this knowledge. It is unbelievable.

(MK) No, the kingdom of God has come to man. Man doesn't understand. (AB) I mean it's so stupid. (MK) It's life. Paperback.

There's something I forgot before I go. I have to check. Is somebody on the screen? Yep, she's still there. Would you like to come and give them the gift, Ella? If she's still awake with the Chinese eyes. (EC) Yes. I will give a glimpse of the gift, and then the gift will come in a bundle. (MK) Yep. Go ahead. Take over. (EC) Yes. But first I would like to just mention one thing. Today will be the second day, when we will have a challenge, that we have created in the Keshe Foundation. This is called the "100 lines" challenge. What does this mean? We are trying to get the words of you Mr. Keshe, from these teachings, as soon as possible out for the people to read them, to translate them. To help the communities to get the materials not only through voice, but also through words written on paper. And so, we are organizing ourselves in a team of Knowledge Seekers and everybody that is willing to contribute is welcomed. It's quite an easy approach. We don't have much rules, let's call them. Everybody can do this work on

even their phone. Or they can do it on their computer, up to them. And the challenge is like that. As soon as the workshop finishes, when we have the auto-generated subtitles, we work in a team and we each pick a batch of 100 lines of workshop. And we just correct the words, in those lines, that they are exactly as you have spoken them. And add the pun.. punctuation, because of course this does not exist in the auto-generated subtitles. So, basically last week, we managed to finalize the initial subtitle by Saturday. Early morning Saturday. So, in about 30 hours we managed to do that with 7 beautiful Souls. This week we estimate to have about 12 Souls participating, but if anyone wishes to join, we will just put the link of the Telegram group, where we have this activity. And we are welcoming everybody that wishes to... to participate in this challenge. So, that was just one of the fun things we are trying to make.

(MK) In a way, transcribing using the already automatic translation. Just correcting it to fit the words? (EC) Exactly. (MK) Okay. Where do they go? Where do they go, people who want to help? (EC) Just one second. I will put the link on the group chat. (AB) And Ella, why do you correct it? (EC) This is up to everybody's abilities and capabilities and systems that they have. So, if you are on the phone, let's say for the Android phone we suggest an application, where you just open the subtitle file, that we drop. You go to the lines, that you said, "I will take, let's say, from 1 to 100." And while you listen to the YouTube recording, you simply correct directly on the file... the portions, that you see that they are not matching. If you are on the computer, you have multiple options. You can do it with subtitle software, which we have links to the proposal of the easiest ones but if you are not the computer savvy and you still consider those very hard to comprehend you can do it in Notepad. So it's basically just opening a text file and just reading while you are listening, and correcting where is needed. Yeah. And in the group we do offer support from those that are already experienced in doing it, support for those that do not know to do it yet and they are willing to learn. So we help each other. Okay, I'm gonna post the link. Just one second. There you go. And this... this group on Thursdays is doing this hundred class challenge. And during the week if... if the persons have time then they also pick one workshop by themselves and then they work at their own pace, on correcting the subtitles... subtitles for that workshop. And then they simply send us back the SRT file as soon as it is corrected. Once we have these files we do pass them to the more experienced Knowledge Seekers, lets say. (5:22). Those that have been with us for years and have a little bit more practice with the subtitles and then there is a final review for the words, just in case that the words were not properly understood and they were corrected in a different manner. In a hurry. But this doesn't stop us because the subtitle we do today will be posted on the... on the YouTube so it will be immediately available to the people. So this fine tuning for timing and for picky words is done a little bit later. But it doesn't stop the process. Okay.

And another surprise is... I know that many of you are asking where is KF Plasma Times? What is happening, what happened with the publication, why don't we see the editions? And we want to apologize for keeping it for so long and not having the time to deliver to you these beautiful magazines. Needless to say we did have a shortage of resources to work on these materials, but... now we have been receiving help from a beautiful team of Knowledge Seekers and we will show you today the new design of the September edition of KF Plasma Times, where we left off. And in the following weeks, probably we estimate, we have good feeling that this month we will just release the whole bundle of the past KF Plasma Times. So, I'm gonna show you the design...

(MK) Where are these people from? Who are helping you. (EC) These beautiful souls are from Iran. It's a team of designers that would like to share the knowledge through inspirational designs. (MK) The journal has taken a totally new image? (EC) Yes, it has become, how we call it, way more professional. (MK) OK, let's go. (EC) OK, I'm going to share the screen, and if I do everything right... OK, let me know if you see screen. (SC) Yes (MK) We can see you. (EC) Yes, thank you (MK) This is a new looking you, is it? (EC) Yes, this is the cover page and we did change a little bit the way we represent also the cover page, the graphics of it. And like I said it is the September edition. We... we did have the articles mostly prepared, it's just that we did not have the time to review it and put it in the design. So this is the process that we are going through right now. OK. So, this magazine the way we decided to make it now it will also be ready for print. So in any case that we would like to share these publications printable we can also do this and it will be in the proper formatting. (MK) But there is one point, that from this month, April will be issued and one from backlog. So, the every month will go ahead, but the backlog will be covered by four or five months, am I correct? (E) Yes, but anyway we do expect that by the end of the month we finish all of the backlog, so when we will release the new edition it will be just on time. I hope (MK) Yeah. (EC) So I'm just gonna go very fast through, just with the headlines and then when they would be published I will ask the team to inform on all the channels, that people can go and read the full articles. Inside the magazine we have a short introduction about who we are, the team that is working, credits and attributions, and some explanation about why about what articles are... contained inside with the table of contents as well. For those that do not know where to find the back editions we have included also the section where people can go and download all the previous editions that have been published from the KF Plasma Times.

So like I said the last one was August 2019 and you can find the link where you can go to download it. As articles we did keep our categories so you will see articles from the Keshe News, which are mainly taken from the Knowledge Seekers Workshop. And this is why I thank so much for the team of subtitlers that we put together, because their transcript, their subtitling will help us in the gathering the... these articles that we put in the Keshe News, KF News. So we have an article about the announcement of conferences that happened in September because in September we started with the Austrian Conference, the first conference of the series. And... one article that was made regarding the origin... Origin of teaching where Mr. Keshe has explained more in details the process of Creation in... in the Universe, to expand on the knowledge. In the same magazine we also explain a little bit the meaning of the logo of the SSI. As Mr. Keshe also explained it in one of the teachings why it was designed in the way it was designed to represent the Spaceship Institute. And in the section of Question and Answers, as we got used to up to now we are having the questions which we are extracting from the Knowledge Seekers Workshop. Questions that were put by Knowledge Seekers and their answers that were given by Mr. Keshe. A section for KF SSI Education, in which the KFSSI Education team is sending their message regularly to the students, but also to the souls that would like to join us as Knowledge Seekers and as students in the classes. And as you know we did have the... the event conference in Brazil and the event was announced online so we have a section in the magazine for it as well. and in the Media Coverage, we quoted the articles that were published in media about the activities which are happening around KF and other legal entities connected with us. In the Language Community we did have an article regarding certain activities that happen in the Portuguese community with the occasion of the conference that was supposed to happen

afterwards. And within the Plasma Scientific Journal, we have 2nd from the series of "Plasma to the Rescue", for the processing of thyroid nodules. And this was done by a Knowledge Seeker in Poland. So we have explained the procedure and the results in this case. In the Testimonials section we have a nice testimonial about the... the Pain Pen and its effectiveness in the application. And in the Join Us page again we are welcoming everyone to submit their plasma scientific articles. And with this occasion I would like to say also for example in the last conference in Mexico conference we did have the pleasure to see in the presentations from the Knowledge Seekers, from the community a lot of work that was done in the Spanish community. So I would like to remind all the participants that were at the conference, if they would like to submit their work with us and have it published in the KF Plasma Times then please do, because your work was really, really beautiful. And the back cover of the magazine is presenting the electronic versions of Mr. Keshe's books. So if you haven't read them yet, if you don't have them in your collection just follow the link and this is where you will find the... the books with more information about the plasma science. So basically these were just the headlines, the articles are inside and they will be available for reading. And thank you very much for waiting for us.

(MK) Thank you very much Ella. And as we see a new shape, a new dimension, and new groups have added to the foundation. It's become a big family, Chinese are holding one side, Iranian the other, the Americans the other side, the Europeans and collectively we are running a beautiful structure that we are sharing the knowledge and we see how and the way, (5:32). the knowledge is shared; unconditionally and freely. And I hope mankind will reach to this point of maturity. And I hope through it, we'll find peace. And we'll see it and wait for the, what we call, the time to come and that man reaches that point of maturity. Will it come through losses or will it come to a strength or would it become through an uprising of the Soul of the Man. It was... I promised one of the Knowledge Seekers last night, I show you how to... not to depend on the medicine from the pharmaceuticals. And as you know, medicines are becoming short and gradually will become twinkling. And our knowledge has to rise to replace these. And most of the pharmaceuticals products are in a matter state, not understanding the position of it. The way we combine these with the Soul of the Man there should be no remedy mankind cannot make for itself as I always said, we build on the knowledge of the past, we don't destroy the knowledge of the past. Many of you depends on pharmaceutical things that is very advanced, decades of work has been done for a specific condition. Where with putting these medicines in these Cups of Life you transfer them into the plasma condition of them and the knowledge because of your GANS top layer, having the amino acid will convert it to the energy which is needed; and if it's needed and what it needs to adjust within you. (5:34). And then drink from the cup. And most probably if your soul agrees with the condition, you will see remedy. If the change does not come, means the condition is already accepted by the soul. You're trying to change the physicality and there is a reason for it, which it will not happen. Very, very interesting time coming up.

Knowledge of the man is not all useless. It brings many facets to the Universal Community. But man has to understand. Thank you very much for today. And we congratulate those who manage to bring more for us to add to the knowledge. And hopefully... Hopefully if we're still here in time to come, there's a lot in coming times, that we'll share more. Thank you very much. Thank you very much the whole Keshe Foundation team worldwide. And please understand, we are this time in it, all together,

without the race, religion, color, nationality, flags and colors of the flag. Virus is touching all of us the same, taking life, dear ones to us, the dear ones to many others. Just remember, try to reach the Soul of the Man, and maybe you don't even need to make the Cup of Life.

Thank you very much. Thank you very much, Rick.

(RC) Thank you, Mr. Keshe, as always. (5:36). OK are there any other announcements before we end today's workshop? We do have the testimonials meeting coming up on Monday at... what time is it? I think it's at 8 pm. Central European Summer Time. So we can look forward to that, so bring your testimonials for that meeting. It's a public meeting of course. People can save their questions that they have here, for the next workshop as well. And we do have the One Nation, One Planet, One Race for World Peace also coming up on Tuesday next week. OK, well thank you everyone for all your questions and participation today. And see you next time around. This has been the 323rd Knowledge Seekers Workshop for Thursday, April 9th, 2020.
