

## **329th Knowledge Seekers Workshop**; May 21, 2020

\*\* How life started on this planet, true story of the Cycle of Creation..

The real origins of Man.

### **ENGLISH TRANSCRIPTION**

(:07). .. As usual we start a new cycle a new way of teaching, since the last time and the time before we started talking about after Corona, we have started explaining a lot of things in the background, (:08). what we could understand more last time. But one of the mysteries of mankind has been, "how did we get to this planet," where is the real origin of the man? And we need to know this as we become "Man of Space," we can explain it. We have to know our origin, are we delivered species on this planet, or were we made by this planet, its conditions, by its position, by its love, by its strength, by its beauty, and by its diversity? Is mankind ready to understand the truth about himself. In the last couple of weeks teaching when we started explaining about our origin, our way of thinking, our construction of body and soul and how even Corona managed to get in. What did our body not calculate when it was making itself to live on this planet. Was it isolated and in that isolation looked at the physicality without considering what we call the energy packs on this planet. And is it for this reason, (:10). that mankind has become vulnerable to viruses.

And as we become travelers of the universe, taking steps to leave this planet, as the others do, without all these fancy clothing, and training in swimming pools and everything else, as the old fashioned way, people like NASA and Russian Space Agency do. And we're face to face with the creatures of the universe, what do we tell them, and not being able to handle the viruses through the strength of our physical structure, would this be a vulnerability for us? In the space man cannot be weak, in the space man cannot allow nothing to touch him, and the biggest weakness for man, and we have seen in the past months is energy packs, what we call viruses. So if we pass through unwanted fields of ?? or something slightly different then our strength we are doomed, or if a race in the space out of kindness, loving and kissing and cuddling, cuddles us because our soul of physicality, and transfer their energy, which is in the level of the virus, we are doomed, the kiss of death. So what is important for mankind is to find out why (he) has become so attached to the dimension of physicality, (:12). that the smallest energy pack has become his demise, what we see here with even the Corona, is nothing compared to what mankind will meet outside.

All the religious teaching, all the scientific data only connects man to his physicality, not to his energy, not to understand that energy is built from that interaction of his energy leads to manifestation of his physicality. When I tell you I adore you, I love you, I kiss you, do I kiss the physicality, or do I adore the soul, or the energy, or do I hug which one. Any of these in the depth of universe, as we are men of this planet we love to touch, and kiss, and cuddle, and put everything in our mouth, it will become a doomsday, a space will become a scary place to be in, except we cover ourselves like astronauts in clothing and cloth and everything else, which even in the dimension of energy fields they'll vanish. Mankind has to learn what it means to be in the space. Mankind has to learn a way to use his own immortality to become mortal ... not to become mortal .. both is his choice. Mankind has to understand more, otherwise, as they

say, you are sick, stay home, you cannot come, and mankind will be forever sick in the space. (:14).

But we have to go to the origin to find out how we became what we are, and not look at the fallacies that we've accepted, "Adam and Eve," and the "Apple" and "ribs." And one belongs to the fruit shop and the other ones to the butchers. As I said the time, how we came to believe in this, because of the "dumbnation" of the man in understanding his power in creating. But we need to go before that, much, much before that, and then look at the different options, now that we understand the science of the creation on this planet. How did we become to be created? Doesn't matter if you say the first man was from central Africa, or in central Australia, or in central or South America, if you put the Pangaea together you'll see they are all connected, and life started on one equator line, just on a certain line. Now we speak about man, which walked, we go far beyond. Rick could you please put the map of earth, or what you call, all the land filled together, on the screen please.

If you look, we are wondering why and how. And if you understand, mankind will come to understand, life started on one level, one line with a very narrow band on this planet. (:16). That narrow band created life, if the structures were there to create. If the structures were there, the materials were there, the positions were there, and everything else that mankind wanted, could have been created anywhere in the universe. But in that process we only became part of, we only created one thing, and if you look at the original Pangaea we all created in one way or another from the same structure, in the same area. And as we broke up, as early developed into breaking up, we spread, we divided and we created exactly the same. So it had an origin, it had a position, it had a diversity of life, and it had in so many ways, understanding of totality. If you look you see, the creation was so simple. So we see life was one, but if you look at the present map, if you look at the map even before this, this was all one piece. So the life did not start ... life started on a band where the temperature and composition of materials would allow it to live. (:18).

Then we go back further, even if you go back further before man, before the first life, the conditions had to be created that man could live. Materials had to be created, materials had to be there, materials for life to create the first cell had to be conditioned to be available. What are these materials, and how we came to be as beings on this planet? In the solar system we started as a speck of dust and rays, it take billions of years for these specks to come together somewhere and build the first seed. And as every drop of rain falls back to its life, to its origin, to the center of gravitational field forces of it, as we understand in the world of the science of the plasma now, everything which comes in has to go out. So the sun forever spills out to be able to recycle itself. If you look at it, the sun is a recycling process for itself in the domain of its own in the solar system. And as it spews energies and magnetic fields, as they loose their energy they become into different stages of matter, and when they get to the boundary and become matter, in the dynamic position, they collide, they come together, it's like a crushing system, (:20). it pushes, it's like you put yourself of something in a forge and you turn it, all has to merge, all has to become alloys. And as it becomes alloys it becomes bigger and bigger, and in that position becomes the first seed for structure, it's a solid state, but gradually as he absorbs more and more energy from the sun it gets converted with the material with itself, builds itself, and becomes huge, but at all times the journey does not stop, because the gravitational pull of the "Mother" pulls in.

From this point as a dust, to this point, as a first, what we call, planet, which always is giant as it collects more gases, takes billions of years. And then the journey starts, as a fast motion, and the slow journey to reach the Mother starts, by rotation, and rotation, and rotation, and rotation, and somewhere here, in the middle of the journey, this planet decided, due to its composition of the material, which was created on the outset, and due to the magnetic field forces of the planet, and its star, to create and turn, and that turning, to position itself, magnetically and gravitationally, respectful to the others in the solar system outside, tilted the earth. (:22). In that tilting, by a few degrees created the present diversity, and in that diversity new materials were absorbed, because now it wasn't mono-energetic facing the sun, it was continuously diverting and creating more. What we know from this diversity and interaction of the fields of the sun and the earth, in an angle, new materials in each level of degree and interactions in different seasons, will started to be attracted. One of the first ones was Na, then others as it became closer and the diversity became changing, we know other materials start appearing.

In a way, now, because of what happened with the field interactions inside, heat started, gravitation took hold, and in taking that gravitation, by reduction in the strength of the gravitation, materials appeared. But don't forget, for materials to appear, the energy of the sun has a say. So slowly what we saw was the creation of the lighter elements in the different angles, which at the same time, because of the diversity and the angle of the planet, heavy materials were produced on the one side, while the lightest were absorbed on the other side. More materials were created as less and less gravitational fields of different strengths were accepted. So this became a combination planet.

This started creating diversity, (:24). hydrogen (H) from one end, while plutonium, and magnesium and the others, and gold, and copper appeared in the other strength. The beauty of this planet is what we call, inclination of the angle in respect to the sun. It creates diversity of the fields, not mono-energetic as most of the planets do. And so in that process, in that energy of diversity, Na, with, in so many ways, connecting itself with H and O, and then by the creation of the C, and everything else created the first cells.

So we have not been delivered from outside, we are the children of this planet in the physical dimension, but in that process many, many things were changed, because as different amount of materials were getting created by interaction of the fields of the planet we saw diversity, and that diversity through balance of energies lead to the creation of amino acid (AA). In the line of what I showed you on the Pangaea this diversity met its match.

In so many ways, the AA became the first diverse energy made by the planet, does not exist anywhere, but as it had the common denominator of everything, it could link up. It linked up with Cu, it linked up with Fe, it linked up itself with everything else, (:26). that it could make as energy, yes, matter, or whatever. It needed a stability that it could progress, it needed a stability that it could make a system that while this planet was falling back in to its Mother, somewhere in this point the process was completed, and what we saw was the first life. Life meaning, that the cell, the AA could sustain, and due to the energies within the environment, replicate itself, which means now, Mr. COHN could make more of itself. But it realized it cannot become like the sun to receive and give, it needs to create a structure that continuously can receive and give,

but in that process hold to some, and than it become very easy. It needed a mechanism, it needed to create a simple system, where as he absorbed energy, it could release energy in any shape or form, but keep its structure on either end, and start attaching itself for the circulation, blood. (:28). it needed to attach itself to blood, because Fe needed to match the magnetic field of the planet to create circulation by different strength in energy of Fe, in conjunction magnetic field of the earth, as Fe is magnetic, it creates the best motion system for it, so cleverly it attached itself to Fe.

It has created intelligence, so intelligence was easy to do. Then it needed physicality, because up to then it was just energy. If we look at it, AA in the space of no gravity, is in reality a virus, but getting involved in living and conditioning to the planet, a very weak one, extremely weak one. If I was AA, Mr. COHN, I would have chosen slightly, one more material to add to myself, that I would have withstood the viruses too, and this is where it did not happen. And this is why the man on this planet is weak, it cannot behave as matter and energy, or what you call it, a soul. But it attached itself and found itself a way to do, to attach itself to energy source by diversity of the interaction of the fields of its own, (:30). it created a new energy pack, that it could stand better than it, and could support it, this is what we call, the Soul of the Man (STM).

So the biggest mistake was made, instead of going all the way through physical condition and attaching yourself, and itself to Cu and Zn and every other metal, it ignored its own essence, and the center of its own creation, the energy pack we call the soul. If, if, AA at the point of the establishment of life on this planet would have learned to work in a slightly different system way, AA would have stayed as an energy pack that could have handled the viruses. So this is the flow in the structure of the man. It should have interacted energy with energy, than energy with matter condition. It went to the energy/matter and left everything in the dimension of the domain of the soul, or the energy center, which had singularity, but not dual purpose. So it can only work, one in the energy level we call soul, and one in the matter soul level, which we call the body of the man.

So if man wants to become a "Man of Space," to live in every dimension, he needs to bring in, to understand, or in a way connect itself to its soul. (:32). That has an energy guardian, energy filtering system, energy condition to be able to survive the span of universe. As man was moving more and more into the dimension of physicality, it created a feeding system which it had to build on its own; circulation with blood, storage the liver, digestive system to be able to use different materials of this planet, lung for air, stomach and digestion system for the liquid and the solid, then it had to create its own filtering system, the kidneys and what we call the large intestine. Then it had to create a condition that only used the earth side as both, cleaning up and absorbing. And then it needed to coordinate the working of all of this in conjunction with sharing of the soul, or the energy center, and it controlled, control center called brain. So in reality the process of the creation of physical man on this planet came out of the first interactions and then needing systems to guarantee survival, because in the dimension of physicality everything had to be handled in physical dimension, where in the dimension of the soul, it had to be, (:34). only energy or the ?? sun and these two got entangled, and in the process man was born.

From the first interaction to the position of the delivery of the first moving cell with the full coordination, took billions of years. And according to the environment, to the

availability of the materials, and in the condition of the position in respect to the angle of the planet, new creatures, new animals, new plants, and new life started, because this planet is rich in diversity of material. And diversity of material on this planet, if you understood, comes from diversity of the energy through the angle of inclination in respect to the sun. And in that process, all animals, those who could absorb more, found easier way to absorb more, they became bigger, they became dominate, but at the same time, even today as we speak this process has not stopped.

In the jungles of Amazon, in the jungles of South America, in the jungles of Africa, everyday, due to change in the strength of the field of this planet, continuously new lives are created. When the scientists tell you they found new species of this and that, most of it doesn't go back billions of years. (:36). Due to the ignorance of understanding the process, of continuous process of creation on this planet, many of them took shape a few years ago. Or many of the new animals we discover in the jungles or in the planet, are the created, new creation in the interaction with the new field and all the poisoning and the pollution and everything else which we have done. These are the children of us, our abuse of this planet. Life doesn't stop, and does not stop billions of years ago, creation of diversity on this planet will last until the last second when it enters the womb of his Mother. When it ?? renews and joins back in the life, of his life with his Mother.

When the rain falls back on earth, the sun returns and receives his own child as earth. Life on this planet as we call it, billions of years is just a temporary trip, a very, very temporary trip, has a window of a span of existence, and soon as we get pulled more and more into it, life as we see it will not exist. The condition of this planet will not allow. The new position is too close to the sun, and closer the hotter. So at this point beyond, and this point within, is only a window of life, (:38). no more and no less. And in this process where we are created, and this process where the whole structure is created, is a flick of a second in the life of the universe. In a way, if you look at it, it's a desert which gets rain and energy, and blossoms and you see life on it for a very short time until the heat of the sun destroys the rest. This is what we are, a short span, a very, very short span, and even in this short span of a few million, we choose a few years of it.

In so many ways, is it worth it to live on this planet, or we use this window and we become passengers of the universe. And even in that dimension, even in that dimension, our lives will be a flick of a finger. And if we can use the step by steps, to become closer to the origin of the light, as even our sun and the galaxies within it, will move towards it, because they are in the same process as we were, as a dust on the edge of the solar system. We all come from, and we all go back to the Creator. It does not matter if you are a drop of rain, if you are a solar system, if you are a galaxy, or even if you are a universe. Everything is dynamic. (:40). Everything will stand the same course, and everything the same. And what we look at is literally this (goes back to other drawing of Man's formation), what we call our lives, what we call the life on this planet, is a small window of opportunity where the rain has come and the desert has becomes green, and soon will go back to be a desert.

But in this process when we understand that the interaction between the physicality and the dimension of the energy creates what we call, intelligence. It creates diversity of energies, which in that process of life will go back to one point, we can, we have the

ability to become energy pack in all dominions to reach the Creator. And in so many ways, it will be the vice versa, as was with the sun, we went out of and we came back to, and in this process if you could understand the condition of what we call, the energy of giving of the Creator, create its own condition to be able to become part of the energy pack of the creation, then the man receives the gift of life, the gift of intelligence on its own level.

A lion is intelligent, as much as a tree, they communicate and they understand, so when we speak about the STM, the creation of the man, and the soul, (:42). which can be a line with the Creator, and us to our level of understanding, is only for us, not the plants, not the animals. Man is so involved in his own hypocrisy, that does not see the truth. And in this process we evolve, depending on position we are created, and how long we last, we take different position and conditions, and we dominate for certain time in that process. Mankind has lost the track of his own existence. So in fact, what has happened in this diversity and interaction of the matter and fields, we became man, or a mammal who could think, and it could use its environment, at the same time to have interaction between his energy pack and his physical pack, we created a dominion, we call it, the brain, we call it the conscious, we call it emotion.

And when the mankind understood this, and when the first creator of the cycle realized this, that it is in the control of its own destiny for the small environment he lives in, it had the intelligence to effect the position and the dimension of the motion of the physicality and his behavior in respect to other energy packs of physicality and energy, man became conscious of correctness. (:44). Then those who understood the dimension of correctness, they understood one thing, they understood this and they understood this (the two drawing done earlier), and when they understood both, then we became conscious, we became human conscious, and that consciousness created 2 things for us, if you understood correctly, we became to believe in what you call the energy which created us, and if we found weakness ourselves, we found intermediaries, statues, religion, and on the other hand the strength and the path of the STM.

The further we became from religion, the more hypocrisy, the more we became to understand the truth ?? between our physicality and the energy, and the energy pack which created us, we became faster to mature, and we did not exist with it. So the first being who understood this, became Mitra, it means understanding the connection between the energy and the physicality, (:46). and its connection with its creator. But it had to come to that point, because she was a creator herself, she was a mother. The true Mitra, is in reality, the first person who understood this, and saw the beauty in what it creates. Then in the progress of the mankind, by whisper and talk, it became a ?? method. It meant that we had to understand, and if we create a balance connection between the energy, what we call the soul, and the physicality which we call the body of the man, and the Creator where everything comes from and goes back to, you live in harmony. And from then others who understood this, and developed with the more illiterate people created divisions.

So in fact, we are made of what we call the matters and the states of this planet. We came from interaction of the fields of this planet, and in so many ways, we have a very short time on this moving spaceship, we call planet. We have chosen different ways, in so many ways to control the energy or the physicality, and those who created the control of physicality, (:48). went for statues, and those who went creating and controlling the

soul, brought what we call religion, both imprisoning, one the physicality, and one the energy.

With this new technology we free man from both, because now you understand. And then in reality, you see through your eyes, what we call the Mitra, the origin, the first thought who understood the balance between the creation, the Creator, and the environment, which has created it. And if you look at it, that's all what Mithraism is, the Creator, the created, and the environmental condition, that it connects the creator to the created. "Talk good, do good, and think good." And if you understood this, then you can travel the span of universe and find a place anywhere, and any point in the universe.

So now the human race has to decide in a simple process. If this is our solar system and we are just about to reach and pass that window gap, do we want to stay there, or do we want to jump in a bigger pool? (:50). and then even then, we jump into the bigger pool, and then in jump in there, we join a pool which we become part of the totality. Where this is the solar system, the galaxy and the universe, and the Unicose, and the Creator. The journey to this will take forever. And now we are teaching for the man to jump to this, and maybe in the very near future to this, and maybe in the distance time to this, and maybe in a much longer time to this (Creator). And maybe, maybe, if you're matured, to the soul of Mitra, make the journey in one go. And in so many ways, in all in what we call the galaxies, the stars, and all the galaxies, and the universes, and the stars in them, and every other aspects, there are lives in every dimension, because every little planet or star has a different animal to his creator. So in fact they create life, but not visible to the eye of the man, (:52). because we don't see that level, we don't see what we call, uniformity in energy, and then if you take these leaps we have to understand the totality of it.

And what we teach is to give you a choice, physical flight in the space of the solar system, physical flight in the galaxy, in the universe and the Unicose, or a combination of both in the energy and physicality, or in the recent past teachings, through the energy pack, because energy pack does not need so much transformation. It needs to be stripped and become of the higher order strength to reach further and further. It's easier to reach in the ?? rain of the Creator with the energy, than with the physicality. Physicality takes time, physicality needs the space of physicality. The soul and the energy needs none, but of the same strength, zero time communication. As we said in the other teachings it depends what field you want to travel in. Now you understand, you want the physicality of the man, or galaxy, or the universe, or Unicose, or the soul, or the energy of the Creator.

I come from this (Creator) and I'll go back to this, by my own choosing, as I come from it. I have given this gift to 2 women in KF, they have to choose to keep the path, to bring mankind to this dimension, (:54). as they are mothers, and shall become mothers of the creation for the dimension of the AA of the human race and with it the Unicose.

There is one thing that you will understand soon, we teach not for mankind, but we teach for the Unicose, as they can diverse and travel the dimension, so their souls, and the dimension of the strength of the souls will be heard by the totality. The love of Creator does not shine on a ray, it shines in a spherical shape, equal and everlasting as long as the Creator lives. In this process as we taught you before, I want to bring in, what I call, enigma into your understanding. And this enigma, this what I call the puzzle

point is for you to sort, and will answer many questions when you ask many times, "are they with us, are they part of us, have they been here, the men of this Unicose and universes to visit us, and have they taken our shape and are we part of them?" In my teachings I tried to explain in a very simple way, especially knowing that we come to this day, that you have to understand. (:56). I brought Alex in a couple of weeks ago to explain to you how he makes the food. There was a purpose for this. I tell you what you understand. This is the salt and the water and the Gans's, and this is the apple and the orange, and in so many ways, different fruits, as they have soul, they have transferred the energy, the taste, and the dominion on the water that you drink. As you yourself are the mixture of Gans's and diversity of the fields. Now you understand one thing more, if this is your planet, and this is its surface and within it we have created so much water, and even the mixture, and even your own body on it as a liquid Gans, and if I am the visitor of this planet, and you was a Gans water, or the sea, what do you think? Haven't you received my soul? In reality, is there any difference between this and this, this being a fruit, and this being a soul of the visitor of this planet.

(:58). So mankind's knowledge comes from diversity of Universal Community and itself. It comes with its energies and beauties, without interference. And if you understand this, this planet soon becomes the Unicose, and soon as messengers of this planet we become that Cup, and we become that orange and apple. This is why we tried to put the physicality and the conduct of the man right, that when the soul, when it becomes the creators of others, it's perfection.

In this process, in this understanding, in this understanding of the totality, we come to one point, and that is, we need to understand, and that it is, we need to be able to comprehend the totality of the process, the totality of understanding, the truth about ourselves and the reason of our creation, and those who have created us through the dimension of the interaction of their fields. Mankind needs to know the truth, the truth about itself, and in that process, why and how we became, (1:00). and what are we to become. How far and to what extent would we change. How far and to what extent we will become part of, and how far and to what extent we come to understand the reality and the truth?

Maybe, maybe it's time for mankind to understand the whole process, and understand every step, and then you understand in the process of the creation we are little souls, that these souls in time will become, according to the position of their lives, the feeder of information to the others. The feeder of new life, and if you pay a visit to another planet and universe, what would you like this Cup, your Cup to give to that soul you meet, (1:02). war, anger, aggression, or peace, love and care? As I have said in teachings before what would you like the child of your soul to be? Because you become that soul, you become that food, you become that position of the transfer of your emotion.

And in so many ways, if you understand it, what we done with mankind is very simple, the UC has locked you down, for centuries and thousands of years, because present behavior of man is not acceptable. Because if you understand, you infect the universe. In so many ways, you have already infected many times that's why we have brought everything under control. So, instead of you becoming small problems, and a bigger problem in the future, we have come to solve the problem as it roots, as its onset, where it starts. We know where the problem has come in the creation of physicality, and we

know where the mistake has happened in diversity of the energies, (1:04). that the 2 needed to come into operation. So in reality, what we are giving to the mankind is both, in both dimensions. Understanding the power of the Soul of the Physicality (STP), and understanding the power of the STM and the energy, that in the space the 2 together become that formidable pair, that they can stand what we call the different field strength of the universe.

It is very hard to break a atom of H, if you understand its work. And it's very easy to create separation for an atom of H, if you know how to introduces new field to create the what we call, "the ?? distance," and if mankind understands this, if mankind understands that it never can kill, it can never destroy, but if it needs be, it can puts its emotion, and feeling in a soul to create the closeness and separation, then mankind will take off with this ethos in the universe that he is available to give, and is available to receive, but does not have the power to destroy, to kill. (1:06).

But, and one big but is, this word, "Mitra", and what is this word "God", and where the difference comes. And in fact, what does the 2 lead to creation of? In so many ways, we can choose any name for this (Mitra), as we can for this (God). And the combination of the 2 needs to be to create life, in order, and with respect, and peace. Up to now, man has been deluded of this (God). And now we put the order back in. Singularity has never worked, because it has to create compromises for it to exist (1:08). Then, you come with anything you like, and anything you want, and any other name in the universe, and then you create a polarity for your own satisfaction in any shape or form, in any dimension in the universe, where there is no control, and the mayhem like on earth creates. The perfection comes from when you create balance in any name from the beginning, then this will not exist (erases Adam - Eve, etc..), and man will be a man and, and the rest of the creatures will stay the same and balance will be created.

This is the change in the new cycle, not just for man, but the entirety of the creation in the dimension of the universe. In a way, we create a balance on the other end, if you understand, that between the 2 we create the harmony. And mankind should have understood something very simple, in the world of the creation of the Unicose (draws an oval with 2 dots in middle), the earth and its galaxy and its universe sits somewhere here. (1:10). where up to now we had this (draws an oval with only 1 dot in middle). And this new balance, this new understanding will create a balanced field amongst and across the Unicose (draws an Infinity Loop between the 2 dots). Now you understand why such a position, time, and evolution in time of man, at this time, is to move the whole thing into balanced position, and there is a reason for it, which mankind at this moment is not open to understand, and that's what we say, from the interaction of the two, we'll create a new soul, that all becomes in balance in totality.

The problem doesn't sit only with the solar system of the earth for man, the balance up to now sat right across the universe. A proton needs an electron to be able to keep its existence, so now we see the same. Try to understand this phase, and it will be very difficult for many, many human beings to go through this transition. When the same time, the ability of this is, in this process mankind has created many souls who become the stars of this galaxy and the universes and the Unicose.

Now that man is educated and the man will travel the span of universe, as for example you go from England to another country on the continent and you see another

Englishman and you say, "oh, you are from England, let's go to the Pub and have a drink." Now in the space you can say, "oh, you are a soul from earth." Because the fingerprint of the AA of the man and the planet is unique. And then you understand this planet has been creating many.

And in so many ways, now that we put the totality in correct conduct, all those who've been misbehaving in the system, shall be in the problem, through the dimension of the interaction of the origin will correct themselves. We've had too many mischievous souls in the dimension of creation, and with this move we put everything right. But understand one thing, mankind AA energy sits in balance with both ends of the soul of the Creator and sub-matter, to man's sub-matter, so you have to be the balance between the two, (1:14). and maybe that's why we choose the earth, and this time, and this place, and this position. We choose the place and the time, and at the same time, Mitra chooses her own.

The balance will come in a short time, but we don't have that much time, in so many ways, to pass this line (when the earth will no longer sustain life). So we have to complete in this window and man is getting very close to this line. Or the earth is getting so close to this line. Once you pass a certain position the falls to this line becomes faster. As I said before, the dinosaurs were created at this point, and the man somewhere here. And even today in the new creation, and animals and plants are created according to the level of the strength of the fields in every way.

If you understand it, if this is our solar system, (1:16). and this is the sun, we started the life from here, and we are forever, every time, every year we are circling it. The time of dinosaurs was there, and the time of the man is here, and line to cross for no life as we know is here. This is why on this end we could see larger animals as the pressure from the sun on earth was not that much, and now the larger, and as we go further in we'll see smaller and smaller animals, even a giraffe will be a giant very soon, as the dinosaurs used to be when we were here. It's the compression of the magnetic fields and in interaction with the pressures from the rays and the fields of the sun which creates this. And it follows the laws of magnetic fields, and plasmatic fields. If you increase the G, the M will change too, because it has to, because it dictates by the absorption of the fields from the center. (1:18).

Maybe today's teaching will open the eyes of many to the reality and to the facts, and as one of the KS said, "it's a shock to understand, everything is different, and Adam wasn't the first thing," in fact Adam couldn't be, because he couldn't create. Adam is a giver, creation of life comes from the one who can create equality and balance that all the cells, as in the womb of the mother grow together in harmony and divide at the same time to create life, and the body of the man, and the man as the giver doesn't have this ability to be correct, to be just. When you have the cells in the womb of the mother she does not give one to one, and another to the other, she gives equal, because she is the creator, she wants to create and this brings a different mentality, different understanding, justice and correctness. And this is why the behavior in the womb of the mother is the true Mitra, and comes with it, the woman itself.

I warned for many years, and many years before, that the next prophet, the next cycle of generation will be a "womem," and now you understand why, and there is a big difference between these two (womem and womam). It needs a balance within itself to

be correct, otherwise it will become arrogant and singularity. It's the same when you put with the God, or the Creator, it needs balance, otherwise it will be the mess we have seen in singularity. It will be very hard for many people to accept, the hypocrisy they have believed in. In so many ways, the situation is very simple, when you enter a new environment, being a planet, being a galaxy, being a universe, look at the interaction of its physical fields and look at the interaction of the energy fields, and then somewhere in-between you'll find life, intelligence and interaction. (1:22).

On earth we have something very strange, in the universe that man enters, will come across another dimension, and this dimension is very different then what we have envisaged. Man will come to know and to live according to this. If you look, man's life in the Periodic Table sits in sub-energy atomic periodic table, which the man does not understand yet, and in what I call, "create a line of the energies" of which man is not aware of, and physicality exists in all strengths in all levels. The physicality of the man has chosen between the lowest part, and the interaction of the middle part, and somewhere a higher part, between the H to Zn, plus any other bits to create the balance. (1:24).

So this gives a very small window, but a diversity of life with intelligence on this planet. In other creations in the universe, which you unfortunately are going to fall into, you have this in one life. Or you have this in another life, which means life will exist in the two extremities, or life exists above the field of the man, because their environment creates this condition, and then you understand how you become a virus to one or the other. You are part of their energy pack, but you are not in their physicality, and this what I explained before, that mankind has to understand, not only his physical positioning, but the energy which he has created, which we call the STM. And this is bigger problem for you, when in part of the universe you get hit by a life which lives in this domain, or in this domain. Or the most disaster for them is, if they live in this domain, (1:26). and now you become a stronger energy pack above, you become their Corona. Now you can understand, and the further you go that way, the more you move towards the Unicose and the Creator. And the further you go this way, it's the time of the re-cycling to go back. In fact, it's what we said, you sit here, and now mankind is here. Then you understand why and how we have introduced, without you knowing, a new dimension, that with this (2 AA NOCH & HCON), you can live the span of both.

The Chinese philosophers understood, the philosophers of China, they called it Yin and Yang, but they could never find a way from Yin to Yang and Yang to Yin, and for the first time in understanding the construction of the life and existence, (1:28). it should be easy for them to unravel and complete the cycle, that their soul can live in all dominions and structures. As they give one to the other, they become and they move to this side (towards re-cycling) , and as they give one to the other, they move to this side (towards the Creator).

I explained this in a hidden way, in the teachings for years, and now maybe, maybe you understand. I said, we start from fields, and interaction of 2 fields gives us a plasma, and interaction of 2 plasmas gives us physics, and interaction of 2 physics gives us chemistry, and interaction of 2 chemistry's gives us biology, and interaction of the 2 biology's gives us the soul, and interaction of 2 souls, and then what you understand this, becomes the Soul of the Universe, and then the Soul of the Universe, (1:30). which is the level of the Creator, and there on to become the same of the two, to become

one, and in these there are still different levels. Now you see how it accumulates, and in that process mankind can exist in all dimensions, if he chooses, and chooses the matter state on this end, and the energy state on that end at its maximum use, by one of the two components. Because in fact, what he can do, is the ability to put two of these together (NOCH & HCON) in one package that it interacts. And you know how, it is done in the womb of the mother. By interactions of packages of two, you created the soul, or the energy pack. So man is fully aware of how to move across. And if you understood this, in the universe we can withstand any, any energy of physical dimension.

(end of **Creation Cycle teaching** )  
(proofed to here )

And as you'll see, as I was informed by the webmaster yesterday, today, (1:32). that today is the 20th and next week during our teachings or sometime during that day, we'll see the Americans launch back into space after a long time, they fly with exact suits we have given you as Corona suits ...

(1:34). ..

.. As I said 2020 is the time of space (1:40). space program compare ..

(1:48).

.. We are moving in one direction, in reality it is to get off before we cross the line (planet gets too close to sun for life). (1:52). That in time we can find somewhere else in this U to find a home and establish

.. many cultures in U don't have homes, planets, they're not nomads, they're highly educated .. you'll be lucky to even see them or communicate with them ..

now you understand where you came from

(1:54). Any questions?

Q: Ruthi. . I am Wang Lyn, I am the head of KF China. I think today your teaching is so amazing. I don't know if the humans are lucky or so unlucky ..

(1:56).

K- I turn the question around, your soul is one of the two which ?? the mankind, which way you decide? The decision and the future of the U,

(1:58).

sits with your soul and the soul of Ella, it's a gift given, you have to decide. It sits in parallel with the soul of the Creator. So I think that's an answer you have to give, not us.

What do you envision for us ..

What is your vision, what does your soul tell us?

Q: I believe it is time to lift humanity .. (2:00).

WL- I can feel there is a kind of exciting,  
(2:02).

K- What do you see, you have the Buddhists

(2:04). WL-

K- So how are you going to take us into space with the soul you carry? What is the destiny of mankind? (2:08). As I was saying to some friends, I made a mess of creating the Man, how are you going to cleanup the mess I made, between you two women? Are you still going to go the path of physicality or do you choose the path of the soul?

WL- I think we'll go the path of the soul. The only way is that.

K- Where is our guideline, as I said you two souls need time to mature to be able to do, and the beauty of it is the innocence and the clarity,

WL- I think all the souls that come to the earth are ready and are united as one to lift us in one go.

K- Where is Ella, is she asleep or awake? .. (2:10).

E- I am awake.

K- What is your vision as the other half of this balance?

E- I can ?? but I can only speak about a recent experience. And that is about when I asked if you can teach about anger and how we can eliminate this from the human behavior to begin with, and instead, the decision was to teach about the world of creation and how we came to be, and actually the answer was in that, the answer to my question was in that, because my ?? old in steps, in human way, fist do this and then ????

(2:12). I don't we can say, okay now we all believe in our souls and the physicality will cease to exist, because in the end every soul can choose to manifest in any point in the U and still convert from ?? and matter to energy, and to have this playful and joyful growth in ??

at least that is what I see at the moment.

K- Will it be interesting for KS to observe in the next few weeks and months, how these two young souls will mature to run, and how the .. mature to guide humanity and the rest to world peace ..

but as two souls

If I ask you a question

(2:14). what is your wish for mankind, because whatever you wish will be done

K- What is your vision, where do you want to take us.

Mankind will change, mankind is a monkey and a sheep, and this should not be ..

WL- Yeah, my wish is humanity really put down arms, (2:16). and became united and peace and then we bring them into the UC and set them free, let souls fly.

K- What do you envision now, what is our future in the hand of you two?

E- At this point I can not say exactly, but until the next time .. just people think before ..

the wish has to also come within all the souls we are guiding ..

K- In so many ways, the humanity will come to adore you, (2:18). for the souls you carry, and I am sure in the soul of the Universe will be with you too.

Mitra means a lot for those of you who don't understand, the creator of the creator.

Any questions from any of the ladies. Don't forget when I step down these 2 ladies become the teachers.

(2:20). Does anybody have any questions, would like them to explain. .. K- which one has a question for the 2 ladies.

Q: Marinez, .. I have question for WL, ?? live passionately, and I think that what makes us different from others in U ..??

(2:22).

K- Are we ready to give completely, is the human race ready to give completely?

Q: Why not. ???

K- In so many ways, it's an honor, ..

(2:24). today we hear more from their physicality then soul ..

K- I think that responsibility.

(2:26).

It's not singularity, which is there to dictate, not accommodate ..

(2:28). twin souls of them will complete the process .. in time you'll understand ...

Q: Has there been before in the history of man this kind of ??

K- No,

Q: We are copying the UC?

K- No we are learning to bring the balance in. Any other question.

Q: ... I have more of comment .. I love both of these ladies so much as I hear them speak in the past 2 weeks. Form Lynn I get we are ready for the

From Ella I get she would like to see more change in physicality, more kindness.

I was wondering if that is correct?

K- That's why they were chosen this way, one from the East and one from the West.

they have to speak through their soul, not to write and think.

(2:32). Any other questions. Any comments form you Lyn or Ella. In the coming time we'll leave the Thursday teachings gradually to one of the other lady, or the combination of the two with me part of it, that we go through the transition time of the teaching.

Q; Stephanie ... (2:34). (Italian ) .. she wants to thank you for what you are teaching right now , she finds her place in the ?? When she came to this world she wanted to understand why she is here, and she always felt herself she was different, by listening to your teaching, you give her the tools to make the change. (2:36). .. (Italian ..) She says that since she has been part of the KF she feels .. through all the souls, and really felt unconditionally love for Italian community .. feels this expansion for souls all over the world .. when we elevate the other, like the politicians she really feel that this is

happening. (2:38). .. every time she had a birthday she said she will live more than a hundred years, now she has the tools ...

K- Thank you .

Q: I think the whole point .. gather the knowledge ..

.. My question is if we use the plasma water will it be the same effect as the Gans?

K- I don't understand. (2:40).

Q:

K- What do you mean?

Q:

(2:42).

K- I still don't understand what you are trying to get at?

Q:

R-

(2:44).

K- No I think you are confusing and mixing too many things, but once you have the source and you take from the source, the source continuously supplies into the fields, but once you take your water from the source, and you give it to the others, it has no source to add to it, it loses its energy, and this we have answered before. You cannot take without a source. This is why ..

changing the new Protocol .

Any other question.

Q: (Spanish ) (2:46). .. is the transformation in this new step

K- As we always say, everything in the U even if you become wise enough, even the fields of the Creator has a measurement ..

because if it didn't have measurement the STP would not have been able to capture it, or to encage it. So if mankind understands this, mankind can create a condition to free his soul without anything, without death, because if you can create a field around the ... would have been free. It's amazing when I look (2:48).

our soul would have been in the center ..

life like a jelly shape

(2:50).

Chinese have more of the emotion ..

(2:54). Ella comes from the matter state, logical, has to have a meaning in the physical dimension, and if you look at it, we always that position of STP and STM, and if you understand this

(2:56).

(3:00).

(3:02).

.. The game has changed if the mankind understands, but don't forget nobody jumps into one end, it takes time, I .. to bring one step at a time. Those of you who mature to this, you jump. I go in the STM, and I said many, many times, I had this battle many times with Caroline. She said to me, I know what you are doing, don't do that, don't go inside. (3:04). You see them as they are naked, but they don't see what you see. Nothing is hidden to us, but I still play the game otherwise I have nothing left to do. Because I create the condition of environment of your soul, I am in it. I know which president is lying and cheating, do you want me to open up the voice box. But we have to let the coarse, I can't steal but I can witness .. When I sit in the emotion of Ell or WL, I can elevate in 1 sec but that is not my job, because they have to go through the process of giving and taking in the correct way to elevate the totality. I don't need spies, I live within ..

(3:06).

(3:10).

.. it took me a long time to bring the soul here...

(3:12).

you are gradually getting the tools for your soul. ..

(3:14). .. I suffered long enough to bring this soul here ..

I never thought we have such incompetent leader across this planet .  
you depopulated yourself.

my job is done, you are not aware what I brought you .. just because there is no man this planet will not continue its beauty ..

(3:16).

I never thought such a stupid leader in American .. you opened your door to mingle, viruses.

Let me explain what is going to happen. The biggest mistake your governments and your leaders have made, and you thought you are free, is this. You know it's a (3:18). typical what you call English school time. You go to school season in September, you have brought all the diseases of where you went in the summer with your cousins and everyone else you traveled around the world ...

then you hit Christmas 2 weeks, ..  
the April ..

.. Now your leaders are making the same  
now they are opening the borders for you to go out and go shopping

(3:20).

get a massive increase of Italian version, Spanish version ... then open internationally 40%

worse thing your leaders did was to open up ..

(3:22).

We'll see a massive increase .. not in lung ,

.. will touch the plants and everything else... we're going to get a virgin planet, do you think 30 to 50 years will make much difference. ..

(3:24) . Now you understand what is to come. Your leaders are absolutely incompetent, and on top of it they have a more incompetent person called Mr. Gates ..

.. You thought the "Boat of Noah," was a joke. You have to decide if you want to be the passengers of it. Now the earth is reaching to that point. In the talk of the two you get one message if you go deep enough.

(3:26).

Any other question?

Q: Ike .. We are learning to get to the balance on the onset we diverted from the soul and focused more on the physicality, to get to the balance ...

K- What do you mean?

Q: I am not sure how to put it. (3:28).

K- What do you mean by that?

Q; I want to know how to get to the soul quicker .since we are used to physicality.

K- Oh, you are like the others, you want a short-cut. No shortcut you should have learned it billions of years while you were here. (3:30).

Q: So that is the shortcut?

K- That's called the cheating, tell us show. A lot of people would like to know that you had plenty of time to learn that you abused your soul with physicality ..

even these 2 souls have to learn to accommodate the other in peace and harmony but mankind decided to cheat. physicality is a leech on the STM ..

(3:32).

(3:36). So how what we take form this planet dictates how we look even if we live in the same place.

Very soon I will show you all how you can feed yourself without ever touching another being. In a way, (3:38). the biggest problem for the man is to feed himself. if we fill the oceans with Gans's Then what would be the ultimate if you are feed ..

(3:40).

would that elevate your soul. in the coming time we'll show you how to do it,

You have to do it with the Gans's , we can't do it, because it's your planet

(3:42). Next question.

Q: .. In reference to a few weeks ago you mentioned the virgin birth , the role of the men on this planet (3:44). ?

K- You have to understand the difference between the virgin birth and physical birth .. .. you listen to the only part that suits you ..

(3:48).

(3:56).

.. Thank you very for today.

Soon you'll see they'll become mature voices,

I give from my soul to both of them that mankind can elevate

(4:02).
