

339th Knowledge Seekers Workshop; July 30, 2020

Cup of Plants released,
Solution for Coronavirus Report read,
ISBN official scientific journal number,
Iran publishes Books - new technology is what was promised in Koran

ENGLISH TRANSCRIPTION:

(:06).

KF has ISBN for KF Plasma Times journal .
without peer review.
Peer review by public..

(:08).

(:10).

We refused to accept people from outside into the structure, that they do anything, as they do not understand the knowledge. We have the same situation in Iran, they tried to bring highly influential people to head the KF, to break open in Iran. And I explained very clearly to a number of people, that the KF has to run by KS, we devote our lives to bring what we believe in. Then we don't need to bring somebody in from outside who has no understanding of the F, the work, and the ethos.

(:12).

EU Shown in Austria, Linz in August, (27th or First Thursday of Sept)

(:16).

AZ; 10 units in Far east on an Island; center in Linz; rest of applications in China and Iran; (:18). A 10 unit center in Canada; 10 unite center in Brasilia,
try to keep that the knowledge stays open across this planet.
knowledge can't be replicated. you'll see part of power generators, Plasma Enhancement for illnesses...
We'll celebrate the new T among ourselves ..

(:20). This way we keep to our promise, we are behind because of the situation in China. .. Talk that a 10 unit center in Holland.

Sometime in September after opening, I will return to Iran.

We have undertaken to show the first flight by latest next March. (:22).

The book is being published in Iran by 11 AM.

(:26).

In Iran you have to have a permit to publish by the government.
This book has already been accepted by the government.

(:28).

The people who check the book, who know the Koran inside and out, and they have found a lot of parallels in this book and what has been promised in Koran. And they requested that, this page be added to the book.

Man will take knowledge of the space ...

They will complete the others, in coming months... he says there are 20 references in Koran to your work, and there is more.

The language is written, is irrelevant, the essence of the knowledge which is transferred is important. (:30).

correct to the, what we call, final time, final destination. As you know the Book #9 will be written by 3 people, as you are aware Ella, the head of the KF worldwide, except China, has started writing the first part. My teachings over the past year, and addition teachings will be added to this book, and the third which is the society, what we call, collective understanding of society of the human race, part of the soul of the book will be written by the second half of what we call, total Administration of the KF, Wang Lyn. Hopefully in the next 6 , 9 months will be released ..

and we'll close the book, to start the book of Universal knowledge ...

.. that started with the Book of Soul, what we call, the Cup of Soul, about 2 weeks ago.

Teaching:

Last week we showed you the Cup, in a way, the creation essence of the man. In the 2nd part of teaching today we'll unravel a new knowledge, , and put an end to killing animals and destroying vertical people. (:32). In a way we teach you a new knowledge, you received last week with the 5 Cups. ..

will complete the 3 essential lines

(:34).

(:44). Video of the Sepah, and KS spraying disinfecting the hospitals..

(:46).

If you are planning to come to Austria, please book your place. You can't just show up, you have to book. We have to keep room for scientists.

I would like to answer any question, second part we go into teaching.

Q: Which Gans's are they spraying in the hospital?

K- These are soft Gans CO2, second Cup. As it is effective with Corona. The results in the hospitals in Brazil has shown a massive drop in infections in the hospitals where ?? disinfectants by Gans has been done. So we have a track record from Brazil.

(:48).

(:50).

(:52).

(:54). Are there any questions.

Q: How to book for Austria?

K- On KF website ...

(:58). ..

now they are asking 72 hours before flights, Corona free tests from valid, credible laboratories. We know there no way to go to China, .. the rate of infection is so high. We have unraveled new Corona problems. We have seen the first brain and breast cancers of Corona. We have warned officials to be aware of what is happening. less than 6 months we start seeing the first cancers. We know they are Corona cancers, because they are like the ones we see in the arm, they are twins. It's very simple. We see two similar tumors on two side, maybe two breasts, two in the womb, two in the brain, ??? (1:00).

Any other question?

Q: Some KS keep spreading the news that for Covid-19 there is a cure called Hydroxy Chloriquine that the virus is mostly a hoax, and that president Trump is some kind of savior against the Deep State, these information's are very contradictory, can you share your thoughts on this ..?

K- We are counting the body bags in Iran. Let the Americans lie.

R- That pretty much answers that.

Q: Can I use low carbon steel, it's very hard to find pure iron?

K- You don't need pure iron, go around the block find the old rotten box with nails in it. I don't understand why people are doing this. ...

Why the head of the KF is not in the panelist. (1:02).

Just use .. I have seen people buying 99% pure Fe and the rest of it. Ah .. just walk on the street you'll find a nail. If it is rusted it's already N coated.

R- So should it have a red rusty coating, or a black ?

K- It doesn't make any difference on it. It depends on the carbon content, and the firing and the heat.

R- So it would be good to use the fire process on this?

K- If you can reach the temperature of pre-melting, yes, but it won't be easy for a lot of people.

R- Can one use caustic in this?

K- Yes, you can do, the secret in higher order metals is to add K to increase the temperature. This is what I have done for years. When it comes to gold and silver, you want to use N coating using caustic you just add a slight amount of K, which increases the heat, but because it is part of the salt it gives you a very ??of K salt in a way, if you understand how it works, it gives you a very high temperature, and a perfect N coating. Put it this way, I have done it for years, it must be good, for higher metals you put a bit of caustic, bit of (1:04). metal nail .. low caustic on top of it, use a very high temperature boiling water. I have N coated gold, and every other metal we have.

(1:08). I have 3 years in metallurgy.

(1:10).

(1:12). K- you can wash the Gans's in any shape or form you like.

R- In the One Drop process you don't wash the Gans's, is that correct, it's a straight one drop from the solution?

In a way, but you have to understand how to do it. .. How do you wash energy, have you asked yourself that question.

Next question.

K- Let me explain. the Cup of Soul you have created in that Cup .. we saw it done by Iranian scientists, a beautiful cup Persian tea cup, should have given you a sign, about what I was talking about, it's your emotion, which will carry in, not what is in the Cup, you just take it, and that becomes part of it. As we are learning the EU and as you know, one of the most peaceful women I know, and her life and style is to create peace through the T is the head of the KF. (1:14). And yesterday, I made 2 Cups, 2 systems, 2 jars of a specific combination, and I asked her to hold one in the back of the heart, and one in the front of the heart, to gather the essence of peace through the physicality of the man, the imprint, and then one to the soul, on the head, to transfer the wish of peace, and peacefulness in creating peace for humanity. And those who receive these, what we call Plasma Units, you already receive the soul, and the wish of peace by the head of the F. The same will be done with the Chinese part, Wang Lyn, 2 women, exactly the same in their wish for humanity. And so you will receive. . directly where it comes from the F. We carry the soul of the peace, we carry the essence of the peace, and in all the systems which will be manufactured by the KF worldwide, will carry that ethos of the soul, by 2 women. You'll learn very soon, very quick we give elevation to the soul of women in this message, because they love unconditionally, and they give unconditionally to the humanity, and the humanity belong their child. In that process we change the course. (1:16). We have to understand the totality of the knowledge, not fragmented the way we want to. We have the Cup of Soul, ?? cup underneath, it's to show you can't control it, you don't collect anything. But mankind is waiting for something, so we gave you the Cup. In essence what is in the middle of the Cup, is the essence of the totality of the STM. You have created it, with what intention you made the Cup. Many of you, make the units, and against the wall, in the cupboards, make cupboards, so you already deviated to the side of what's behind the wall. Try to make the Cup of Man as a free standing unit. Try to make this Cup of Soul, this Cup of Universe, as a free standing then like the sun, like the soul of the Creator, shines in all directions. You got to learn. Any other question?

Q: Is rusted iron N coated?

K- Oxidized, it's not (1:18). It's a oxidized, there is a difference between oxidation and ?? N,

R- So you said to start with a rusty nail, but we would still do a N process. ?? end up with something different.

K- Yes.

R- Don't just put the rusty nail into the Cup .. and expect it to work

K- No, .. because the old nails are good, they are very good because they already gone through the process of rusting. ??? the cells are already open.

Q: How do we clean the Cups?

K- Why do we need to clean the Cup. ..

R- .. Cups are open to the atmosphere, what about all the dust, bacteria, things in the atmosphere?

K- Let them come in. They are part of the creation.

R- Some people have seen formations in Cups, I have never seen molds in my Cup. (1:20).

K- .. guy in Iran , Cup started making noise, he got frightened, and his wife puts the Cup on, and the noise stops. When they opened the box, they start ??

How come they are talking/

You are making MG fields, it's like 2 galaxies rubbing against each other. You will see new phenomena's, new understanding.

Q: Can we replace the N coils with Gans, same type and shape, for a better field for the Cups.

K- What?

K- If you replace it has to be in a dynamic solution .

K- Sphere shape.

Q: The chemical composition of the Sun, is H 75% and He 25%, (1:22). and smaller quantities of

Does the mean the

K- Stars have different combination, but are essentially mono in the center.

Q: Can we use the CS in any dimension ...

K- I don't know try and let us know.

Q: Can we use the nails that are galvanized .

K- No.

(1:24).

Q: Can I reproduced missing limbs ..

Play the recording of the Soul, because the next teaching will be very appropriate.

Video : Process of Creation ... (1:42:50).

K- We come to the point that in the whole life of humanity has been dependent from the second that the inception has taken place between the egg and the sperm, life has a one track dimension, to gather as much energy as possible, to grow, and to survive, be it from the environment, be it by attaching yourself to, be it by taking energy from the others, as you are not strong enough to do. In the womb of the mother we take the energy at the point of the inception from the liquids from the environment of the Gans, which is available in the layers of the womb of the mother. No attachment. At that point we have no connection, we are free, (1:44). but as we grow, as the division takes place, as more energies are absorbed in the field, then we attach ourselves to the body of the mother, a source of energy, "I cannot do it on my own, so I attach myself to." And then we go through the point of the birth. When we are born we go through the same process, I need to be given, I become a suckler, I suckle on the mother's breast, that I have been given again, so on ?? of the mother, we start taking from the others, we eat animals, we eat plants, we eat anything, we eat and we eat the creatures which are floating within the atmosphere, if there is a desert and with one rain the fish appears in the pond, how many fish has man absorbed by breathing in the cycle of his life and grown in different shape or form within his lung, within his stomach. Then we come to one important point, what about if, what about if, we go back to the first days, where we were taking the energies from the environment of the womb of the mother without killing, without destroying, without taking another life, without attaching ourselves to become the burden on the womb of the mother. Then stand still and look what happens in the womb, (1:46). the division of 2 to 4, and 6, doesn't come by accident, because when the 2 are created, they create a weaker 3, and that weak pulls in from the environment of the womb of the mother, and in pulling in, those 2 on either side, absorb and has a limitation, and divides. In fact the STM is created at that point of the inception, but has no energy, it's a

weak, it's dependent, and in that essence if he can keep that in all structures of the man, man in becoming humble to be small, in compared to the others, to be a giver, to give of a higher, to receive, man becomes elevated. And man can live with the environment of the Universe without ever killing. One Drop One Life. In the essence when we are born to be able to live within the environment of the planet, we are born, we've done many things, we do many things. Parents for the first time they put a piece of another animal in our mouth, they call it meat, chicken, whatever. They pickup a vegetation, an apple, a herb. We are told it is easier to take, then the ask for. When you ask, you are given, (1:48). when you take you're committed. When you ask, "I need this energy." When you ask, I need this for my existence, who is there to give me? The whole Universe is there to give you. When you put your hand out to kill, you are limited to amount, and you committed a crime. In the space, and the Universe we cannot do this. There are no gardens, and there are no farms. Mankind has not understood the difference between the animal kingdom and the plant kingdom. In the teaching of the past, many times I have referred to it, as we call them, the Vertical People. What is vertical people. what is the animal kingdom. In the teaching of last months, with the Cups we introduced the animal kingdom, with a soul and physicality. Where the STM Cup sits on the top, and the Soul fo the Planet sits at the bottom, and in-between sits the Inertia. And then what it comes, the physicality of the man. And then the STP. Then man, to keep this soul moving and alive has to move and commit more crime. In the world of animal, it has to be moved, (1:50). to keep the soul fed. To keep the soul in the dimension of its existence. Today I show you the soul of plants, the soul of a tree, and if you understand this, the STM in interaction with the soul of the plant will create a condition, that the plant gives what it needs by the soul without ever soul taking its life. You need this, because of the national food security, which is planned to destroy man, there will not be enough to eat, but a grain of rice can behave like a sun to absorb the energies of the Universe to give to all mankind. You can feed man from one grain, the whole of humanity. Not to eat it, but use is a source to absorb energies, which the man needs, at the strength of the grain. I am the creator, and I create the conditions for my existence, not by killing, but by creating conditions within my soul, that the whole soul of the Universe feeds me, if I need, when I need. In the structure of the STM, we saw that the Cup of Earth took its position at the bottom. We saw the Cup of Inertia, in the matter ?? state took its position. (1:52). In the plant kingdom the soul of the plants take position, on the soul. then with it, as with itself, the condition of the physical soul, and then you have the physicality. This sits across the 2 borders, the Soul of the Planet. and the ?? if in the physicality of the man, I cut your arms and legs, you do not die. So in the kingdom of the plants, you can cut what you like, the creation sits within ?? , then the plant dies. You can create ... breaks .. that process , so ?? .. to what it wants to take ?? arms we call the ?? (1:54). this is the reality, in ?? by sitting ?? as now as you said, by plant, now you understand what is the difference, now you understand mankind does not need to kill. many of you would like .. there is a difference, .. in a Cup of soul, and cup of physicality. Cup of soul of the plant.. in the present Cups which you use for the human body. you take a coil, another coil, and a plate, in the condition of the creation of the soul of the plant, for fixed point the plate moves to the center. and the coils take position. this is why the plants stay vertical, condition to fixed environment, because they have fixed themselves. .. Earth G field point of view. and ?? (1:56). (breaking up .. can't hear clearly ...)

So when you make the Cups to do with the plants (draws a line from the center N plate to all 6 coils in the 2 Cups below) that you fix the strength of the ?? ??

it's fixed then you understand, the simple ?? with man ?? you put the limitation of material, gives you different vegetation, herbs, and everything else .. and energy.

R- Can't hear you. it's breaking yup

K- Now you understand what is the difference between ...

K- It means God doesn't want you to hear.

R- God needs better bandwidth.

(1:58).

K- It means God doesn't want you to hear any more. He wants to keep man a slave to his plant. The planet earth does not want to give man the freedom. You got to wait that I have to support different systems to be able to get to you.... you have to wait .. (2:00).

...

God doesn't want you to hear

(take a break ... (2:02). (2:07).

K- We'll go very fast .. where did I loose you.

R- We didn't get a lot about the plants, when you started with the flat plate in the middle.

K- Okay, let's see. You see, this planet doesn't want to let the man go, it even interferes with the teaching, it says, "I have kept them here for millions of billions of years, why should I let them go." (2:08). So, we will see.

In a structure of the STM and physicality of the man , we always use the plates on the side, because then it is always un-balanced, it can move, it can change it. The plants, they gave a compromise. In a way, as I said, the compromise was, we stay with you Earth, but you feed us. Earth condition was easy, you decide where I have in one place, you can have one ?? seed and no more. For that reason man, and the animal, and the plants made a compromise. So in the plant kingdom, stay your plate in the middle, and you allow the other conditions for what you want to create to be dictated by the others. And in that process, when you came to the STP and soul of the plant, and the physicality of the plant, you had a choice of flat plate, means I don't move, I stay, I fix myself in the center, and let the fields build around me, that I can collect. (2:10). In the process of what is available, in totality, a plant condition is primarily dictated by one element, Inertia. But what field at the point of inception is available. Is Inertia of the position, matter state availability which gives energy to the plant. This is why we are conditioned in (by) what soil we have, and what can grow. The position of the physicality strength, then in respect to Inertia, dictates what will grow above it. If the gravity is tight, you get herb. if gravity is loose you get a tree. If you have a gravity which is a compromise between Inertia and the MG field of the plant, and MG field of the planet, you get what we call, seeds, and onions, and what you call grows in this condition under the soil. Where the soul splits, you have a growth to absorb energy (above), and you have a growth to interact with the fields (below). This is the difference between the physicality of the plant world, and the physicality of the animal world. (2:12). Now that it is fixed, your life becomes very easy for man, now you have the Soul of the Plant, and you have the STM. How do you want to fix, and what you want to fix in the strength, to what. But in fact, you find a fixture between the 2 surface,

which in fact, gives you the band width, which energy can be absorbed from this structure. When you get educated more in understanding it, you can use different combination of the structures, to develop different strengths of the materials. But in essence, the STM creation is in a floating condition above the earth, but the soul of the plant, is the soul of the entity, within contact restriction of the given boundary within the soul, within the ?? soul part. But then you have plants that grow on the trees without the soil, and everything else, which is a compromise between the two. But then the tree becomes the zero point, where the plant grows on the tree.

Why do ?/ some plants and trees do you take a piece from another one, and you put in (grafting) and you create fruits of different. Because you change the M field of it. Singularity does not create, (2:14). but when you put the skin of another one and you graft it, you create a field which ?? the two which creates condition for fruit, or whatever it grows. So If you understood this, you have the key not to kill. Not to destroy, exploit, but you just feel the strength of the plant and you tune into it. And depends what you need, if you don't need, "sorry the ?? position is full." The rest of chewing and the thing, is to feed the physicality. Now KS run and feed yourself. Do you want the herb, do you want an apple .. a date, all bear the same. You have to decide what you are going to put on this side, for G, for Inertia, and everything else. But the beauty of it is, that the plants create a condition of cover, so everything is conditioned. (2:16). to a Zn and to a metal condition, liquid, which allows AA strength fields to come in, to create that AA strength of your body, we can feed you. Or you can do it yourself. Directly in doing this job, you can create a condition that you can absorb energy from the plants, on agreement from the plants, not on your. In a way, you make a connection with your soul, which you never had, with the soul of the plant, and the ??? soul ?? R- Loosing the voice again.

K- .. And in this process you start understanding how you can take with your soul from interaction with the soul of the plant, what the plant needs it takes from you, what you need, you take from the plant. You don't need kill, you don't need to destroy the plant. (2:18). This is how it is done. And once you get educated, once you develop understanding of, you put yourself within the reach of, that you can take the amino strength from the environment, and in that process, if you put yourself in this environment you don't need to touch the plant, you take from the fields that are in position of it, and pass through to it. In a way, if you make, as I said, a copy of the plant's structure, and put it in the middle of the room, as the food is going, as the energy is, the proteins are going to it, you're intermediary, you pick up what you need. You don't need to kill it. You can let it live. So in fact, if you look at it, you need a combination (draws a Cup with different coils and plates) that can give you anything you need. In a very simple way. (2:20).

Any questions?

R- ... what about the gas of Nitrogen, it seems to be important to plants, it's one of the 3 important elements, the NPK and so on?

K- No it's not, N comes by the process of the absorption of the energies. It's a byproduct.

R- So similar to the way N is created in the atmosphere through the interaction of the fields?

K- Yeah, you come, the user of the transfer.

R- So with the fields you are in effect creating a magnet for the fields of N?

K- No, the N which comes is the byproduct of the AA, the N itself ... (2:22). You have to realize now with this knowledge you have a freedom not to kill. You have the freedom to be able to understand what is needed, that you can be, you can position yourself on the path of the fields which are on the way to the Cup. This is what you did with "One Drop, One Life." I think if you understood this, as you understand that different herbs can extract different fields, even the field of the protein which the body needs, one does not need to kill anymore animals. One does not need even to destroy a plant. The time of killing and destroying is over if you understood this ... This is how we are going to feed you in the space. Let me explain to you how you are going to be fed in the deep space. (2:24). This is Earth, you are here, and this is the center, in putting the weaker strength of the Earth atmospheric condition ?? in front of us here, in establishing a line of transfer for energy, we feed you without you doing anything. You feed by positioning, the same as I said, One Drop you put, by the energy trying to come to One Drop, the body takes what it needs. The process of feeding man changes, it doesn't matter where you are, you receive what you left behind. Any other question?

Q; . .that Cup you had in a previous drawing, with 3 spirals and plates, I assume that it is all N coated? (2:26).

K- I think you are all educated enough to know what you want to do. There are as many combinations as plants on this planet.

R- There are quite a few questions and confusions about ..

K- It's so easy to confuse the human race.

R- Well every time you introduce something new, there is a new variable in it, multiplies the confusion. .. Q: We have at home 2 Cups of Man, should we fit them into these 5 Cups. In my opinion I don't want to because they are alive and functioning, what is the interaction in this configuration, if we keep the CM while creating the 5 Cups?

K- You are still producing another cycle of life, huh. The bad thing about these pots they keep on going, you change house they don't touch the food for 10 months, they ?? still growing.

R- So would it be okay to create 2 or 3 of these structures of the 5 Cups, of does that indicate the Schizophrenic tendency?

K- We leave it on the people, let them grow, we need to have a time that people start thinking. We have been spoon feeding too much. We spoon fed for millions of years. (2:28). It's for humanity to make a stand, .. to structure itself to what it wants to do. .. you decide you like apple, and the other one ?? the other one likes a lotus fruit. Now this way we give you the freedom, before you had a few animals, now the plant kingdom is rich. What you decide for the Inertia, will dictate what is available in dimension of physical matter, energy level.

R- Even John Bliven is saying, I am lost, do we create 3 new Cups and sit next to them the 5 new Cups, and stand between?

K- The thing is John, you still have 5 Cups, your Inertia and the G field of the Earth doesn't change, now you have the Soul of the Plants, which have fixed themselves to the Inertia, then you have the Soul of the Plant in the physical dimension because when you cut a tree, it still feels, it still shows reaction, and then you got the physicality of the plant, which .. grows up. What strength that shows is important, and would it become a tree, and would it become a shrub, (2:30). why the height does, why do herbs have such a concentrated energy of one element, that you can use it if you got a headache, that you

can use it for whatever else, which means the central plate is mono-energetic and is connected closely with the Inertia field in that position. Then you understand why some plants don't grow in alkaline and some plants grows on acidic, and all the games which is played. the Inertia of that point dictates what to create in conjunction with the strength of the central MG of the Earth. But you have to understand, when it comes to the Inertia and all the MG fields, you always have to have a condition where the CO2 is a factor. So you can never let go of your Zn and your plates of Cu. All of you always N coated the Cu and you put it in the middle, or opposite to, this time you have to N coat the Zn plate in the center. And in conjunction with ordinary Cu you create an umbrella of fields. Now you spread it, because the stronger one is in the middle, Cu is the weaker one. In the structure of the man we always put the plate or whatever, on the side, because we hold on, we don't want to go, we don't want to create any more condition for the soul to run. With the plants, because now your factor is dictated by the Inertia MG fields, you can play that game. (2:32). And your umbrella is much bigger than when you were the humans. We will show you, we got machines, we will show you these things. What happened if you put the structure you made last week, near the structure you make this week.

And then what are you going to get next week, or the week after?

Now you have the freedom, but remember the principle of One Drop, One Life, do you need a stacker, or can you create a One Drop, that you are connected to that it can give you everything you need and you are fed, you are not hungry. As we say from now on in the teachings, in English we say, we separate the wheat from the chaff. You have to understand what is what. Understand exactly how it performs, what it is supposed to do. And then you go to the next step of understanding, what this thing is going to give me. And it will be very, very hard for some of you, (2:34). you go to go ?? all of you, you put the seed of this year down, for next year, putting some Gans's around it.

So in fact now you see, mankind can tune to a plant with all the energies he needs, without actually committing any crime. And he can put himself on the path of where energy is coming from, and it takes what it needs. Many plants have the AA strength of the meat, or whatever. Then you understand we are in a new ballgame. We are in a new beginning, now you don't need to go and get an orange, now you create the essence of the orange from this, anywhere in the Universe, You can give it to a man on planet Zeus and say this is what we call orange, and he tastes energy and ?? all made by the emotion of the man, and the confirmation of existence of the fields. (2:36).

Q: Is this what Alex did with the orange?

R- And it's a different process, is what you are saying

K- It's a different process

R- reverse almost.

K- It's a point of creation, where that thing was created.

....

Q: Ram .. what about eating fruits, that is not killing trees, so is that considered ok, I was thinking the fruit is the tree offering its interaction with the fields to us in a way?

K- Did you ask the tree, can I eat you?

R- What if it drops its apples on the ground and we pick it up.

K- Then we have to do what the other ?? guy did, huh, write everything about it, when the apple fell on his head.

R- Well from the trees point of view it is probably trying to spread its seeds, with that fruit, it has its use of dropping fruit, and the birds and animals will take the seeds and spread them around, (2:38). so perhaps as humans we use that fruit we should be actually using the seeds and paying the tree back for its ..

K- I think if mankind understood the teaching of today, up to now, the past 1 hour, we don't need to get together for about 100 years.

Any other point?

Q: I am having a hard time understanding this, it seems to me we are making a second set of 5 Cups, but the top 3 Cups are of the structure of the plants...

K- Yes

Q: of G and Inertia

K- Yes, they are feeding, do you know they want to grow.

Q: .. I am trying understand how we receive the energies. I know we have to create that point of weakness to absorb the fields we need, so do we take some of the Gans's of this second structure ..

K- You don't take any more Gans's .. you take the fields, it's a big difference.

Q: So we position ourselves?

K- yes , More or less. (2:40). you can create the positioning by understanding that the process of system, will adjust itself.

Q: Thank you, I need to grow a little bit.

K- No you just got to understand, that systems work in different way. You have to be very much, extend the knowledge, understanding of the knowledge, It's time for us to move to new levels of understanding, much more open minded. This has created a certain narrow mindedness because we are used to everything we like, to be there at the fingertip. This is part of the problem of humanity, ready made, give me, give me, now we have to wish it, we have to ask for it. (2:42). We have to make it part of our structure, which is continuously evolving to gain, and to give. The problem now, sits in fact, with us, with our behavior. Don't take, ask for. And if you are given, it's a gift. We asked for my soul, on this planet, is given to be looked after by the planet. And then you can live anywhere in the Universe. And many times I keep on emphasizing on this, because sooner or later, you'll find out that, it doesn't work for you. The sooner you find out it works for you because you did it the right way, and everything else gets fixed, it doesn't matter if you need vitamin A or B, or whatever. There is no field strength names in the U, it's the need of the satisfaction of the soul. That's where the problem sits. My soul to be satisfied, what it needs by my physicality, then you'll receive it, be it the food, be it the lover, be it the love of the Creator. Mankind has to become, and mankind has to understand this, otherwise you'll run into problem as you have done for centuries, millions of years. (2:44). Thy shall not steal, but you can please me. Give me what I need, provide me with the pleasures of the existence. you steal it, you pay for it.

Q: So it is seeming to me, that I need to feel in a way my position with some sense that is closer to my soul ... ?

K- In a way , you have to understand your soul, your creation with ?? We have to understand to become low enough, humble enough,

Q: Is that understanding accompanied with some sensation in our physicality?

K- You see we have to go through the transition. We taught you the Cup of the Universe, or the Earth, yesterday, because it is connected, last time. (2:46). And we taught you the essence of creation of fields of the plants, vertical people. And that is

what it is, that's how it is. Now with this teaching we brought you to the first level of humbleness, where you can be filled, where you can be fed, receive. This is the step man used to take. man did not eat meat first. We took the vegetable. you can be in the process of need and receive, you don't need to kill,

The time of killing, if you understood,

even though the Earth interfered, it doesn't want to let you lot go. I hope you understood most of it. It makes you independent of this planet. Governments can put these on every square,, corner, (2:48).

.. put it on the satellite .. now you can create it.

Q; So our positioning is a state of bringing our minds in accordance with our soul?

K- What do you mean?

Q: I am just trying to understand our positioning better, you said it is understanding our humbleness, in where we need to bring ourselves to receive.

K- You see, let me explain something to you to become very clear, and it will become more clear. ... mankind has a huge problem, and that is, it has to go through transition, not to be dependent on any physicality, and goes according to the maturity, and how we receive it, how we perceive it. And this is in a way for you a bit strange, because you remember the dome we saw in the Caribbean island, (2:50). that the soul of .. was the giver, and the source of it is the totality of the energy available. So in fact, until we teach you the dome next time, the preservation of energy will come into operation, you need to eat very little to exist. Man loses very little, because it is like the womb of the mother, everything is held for you. You just tap into it. This teachings, this coming up teachings, it shows you gradually how to make a cluster for your soul, that you feed the soul, that the soul feeds the physicality. But you have to create a condition that the energies can be absorbed. You have to create a condition and a position that you can receive. (2:52). The knowledge to come is beyond comprehension of man. But we share that in time man will understand. This is what I say, you can take the horse to water but can't make it to drink. We can bring the knowledge but you don't have the background to it, to understand it. So in too many ways, we build it up, we bring it in, and teach you more, and in a way, if you look at it, between the two, if you understand, between last weeks teaching and this weeks teaching, and the teaching too come. You have no need to take any energy from outside, because the soul already receives it, now you cocoon it, you show it, what that thing could be from the earth to take, instead of eating it, you take the energy of it. So you feed your soul with it, to elevate the soul to feed the physicality. In a way. you plug yourself into the vegetation energy M field, that can continuously give what you want to run your physical dimension, it does not matter if the apple next door, or in the next continent. If you want an apple, you tap into the energy of what is available in the apple strength, you taste the apple, you feel the apple you want. Then it comes to understand, you have to be so humble, the energy in you has to be so low, that it still converts into lie, but it is such a giver, that it receives out of the love of the Creator. (2:54).

We have a lot to learn, and as I said, one of the KS said, the knowledge is complete, there is no need for Mr. Keshe, we got all of it. Shows lack of understanding of the creation, we have not even taught you anything, and the arrogance becomes the cause of it, ?? done. Be always humble, that the more you understand, that you understand, you have not even understood the totality. Then you are at a position humble enough to receive. As I said, we even, I explained to scientists in Iran National Defense University, then we can go the speed of light.

Q: ... (2:56). .. The first question is I am not sure I understood how the STM works, when we have the 5 Cups for the STM, you drew ?/ with questions, and then you kind of summarized that in one Cup with 2 plates and 3 spirals ...?

K- You see, what we tried to do was to let you start maturing, we stopped this spoon feed. You become ?? ...

Q: Could you explain again the final Cup with 2 plates and 3 spirals? And then the second question, .. we argue that we have domesticated animals, plants etc. But at some level for me, I think it's the reverse, that plants have domesticated us, or animals have domesticated us, because we take care of them and feed them, and therefore, make them supply. In return they give us fruits, milk, or honey. So when we stop eating what is going to happen to their populations. For example cattle. are they going to survive on their own. how about plants that we actually grow in order to eat their fruits or their grains? (2:58).

K- .. this I always say, abuser always finds an excuse for his abuse. Did they domesticate us, or do we want to blame something else for. Or did we domesticate it, because it suited it us? There is a big difference, a massive difference in total understanding, why do we change it to suit us. Why do we change it to suit us? What gives us the right to do this? Why do we make ourselves blind to it. And secondly, it's us who wants to live, not the plant. We have to understand, we have to be in a position that we give to unconditionally at the level that the plants need, (3:00). that if it gives it will be the strength we need. It's a lot. Our body does most of this automatically. Now we become aware of it. The reason is if you become aware of it, and you can control it, you can become "Man of Space," otherwise you have a problem. Mankind will have a huge problem in the space. You run out food, out of energy, out of everything you imagine you have, because you haven't learned to take, your step, and mature to the next position. You have to learn to be humble enough.

I live that way, and one day mankind understands how I live. I never take, and I always ask and I emphasize on this more and more, because then you are given. I ask, can I have the pleasure of. And it's there if it available to be given, ?? it doesn't matter if it is a water, .. a person, it doesn't matter if it is even mankind itself. Can I have the pleasure of being part of this humanity. At that strength, I yearn for the past days, that I could be with the KF team in the hospital, they don't need to .. they go in there and get infected, they are still there but get infected more but they give so much that they want, (3:02). to give, to be there to be part of that they can give to make it better. When I look at the KS in Iran in the hospitals. They put themselves at risk everyday, they don't need to be there. They are there to serve humanity. Those souls will elevate beyond imagination of mankind. They are there that, "I take it," I put my soul on the line. You go to get fed by the plants. they go there to absorb, and be part of, that the others can survive. My life has no value, if I can help the others. When you see the teams in the hospital, especially the teams of the KF across the world what do you think they do? they put themselves, that they can be that humble , that they absorb it, and at the same time they can help. These are the souls which are matured. Always say, I relay on the greed of the man, and it is so good. If you been around me, I always say, that I give you so much rope, that if you stay on the straight line, you elevate, you start playing around you hang yourself. Because have you seen the monkey jump up and down, in bungee jump, it connect himself. We have seen that recently .. (3:04). We gave to give, but in that position of freedom to give, they thought they have become above, and at that point they cut themselves. Because you got to stay humble to receive. Every Thursday I come here, I

put myself lower than those who have no knowledge, as I can give, and with it comes what I receive and what I share. You look for the plant to feed you, and (I) look for the Creator to feed me, by humbleness, not arrogance of the knowledge which has been shared. We have seen very recently, those who became arrogant, are not there to be. And how many people have gone through the F in the past 15 years? The minute they thought they had a position, they learned something, they claimed they were everything. Where are they? When you claim the knowledge of Creator is complete, God cuts. As I said to doctor Asid in past days, the knowledge which can be transferred to man is, if you understand every star you look at, is a specific way which exists, and has a specific way which creates life that exists in that environment. When you understand the creation of every star in this Universe and the others, we might claim, we just start understanding. And when a little knowledge makes you arrogant, that you say the knowledge is complete, now I can take over, (3:06). you took over nothing, except the arrogance and the downfall. It's the same, it's not teaching you to take from a plant, it teaches you the way of living. And this is what all these teachings are about. A way to learn to give.

Q: .. but I still have a question about the transition, let's say I accept all that and I want to practice it. Taking from that Cup...?

K- You don't need to practice, this is the whole thing Dr. Guatua. You have to comprehend the essence, These are just a schematic to show.

(3:08). Very soon, in a short time you'll understand why these are there. And those who did not deliver have gone. Why? Arrogance of not receiving. When I hear they say, "knowledge is complete, now we have everything." I said, that's the end. I knew the soul has to depart. Knowledge is never complete. Even the Creator accepts His knowledge is not complete, because He is still learning. Why is He here. Because he saw the beauty of love on this planet, the beauty of the creation of what he never thought could create. The beauty of a partner in the soul of physicality. Couldn't you stay long. So if the Creator Himself accepts, that there is no end to His knowledge, what even himself is learning from, how one illiterate, confirm that the knowledge is complete, now we can go for a takeover. Where are they, how many people we have like this? When you confirm, when you understand that the knowledge I have, is not even the beginning, you are ready to receive. And then it's the same, I don't have the orange, but I like to taste an orange, if you wish it as a soul, the orange trees are ?? not a planet, you will receive. To please you, to elevate your soul. That's why we say, even a plant has a soul, even a stone has a soul. (3:10). If you strength of your desire, to be happy with an orange. There is a tree, a plant, it has a soul, it connects to you. You got realize that mankind has to go through this process of humbleness. And then be able to live with it. As some members of the KF said, you are the most arrogant person we know. I said, yes, because my arrogance comes out of my humbleness. Because I am so humble, that you see it as arrogance, because I give unconditionally, it doesn't matter who it is, even to my enemies, even to those who betrayed me. It is for them to find balance in their life. Many of you who have been 7 years haggling with me, all these things, which everything else which is happening around the F. Have we given up? We taught more. have we stopped? We spend more time teaching. There is a very big problem in the F, that has to be understood. We have transferred the soul of "Elevation of Giving," to female, but those females who are here to serve, not those who are here to steal. (3:12). And those who are here to steal in the name of giving, will see their demise. Because they are taking what is not theirs. Mankind in essence of the soul is one. Because if you

look at the bottom pot, it's the soul of the planet, which feeds your soul on top. You are part of it, you are in it. And when you put a line in it, you cut it, nobody else does. You don't need to wait 14 days, you already cut it from the first day. How planned coup de tas we have seen around the F. How many planned elevations we have seen around the F. Which one of them are still here? The time of all, the time for changing mankind has come. And before time that day comes, all what I call, those who have taken from the F deliberately, they will not be there to enjoy the time. Not in terms of physicality, but by the soul. "I was part of the KF, I betrayed the F, and I am just a stand-by." Because I put myself above everybody else to be. This is one of the problems that you have to learn. You've seen a lot of people, we allow very few people to come near us, and when they come close they see the humbleness, and think, oh, we can do this ourselves, the guy doesn't understand. But they don't understand our humbleness comes out of our strength. You go nowhere with it. (3:14). The same is with a plant, the same with a STM. But when that happens, because the other souls are there, they bring you the gift, they bring you there, that you don't suffer, it's what you need, we give you from us.

This education cycle, specially in the next few weeks will bring many of you to understanding of the truth about yourself. I give freely, but are you there to receive it freely, and give it freely. Not by words, but through the soul. This is why I say, when I teach, I teach the Universe, not just with the voice of the man, because the essence of the soul is given. You have to understand, these Cups or whatever, it's not there to give you, oh I took, these, why is this brown? You missed the point. It's for you to understand the essence of creation, essence of life, and you stick to a Cup, is this wire connected that way. I sit and I laugh, I say, "my god, we are still trapped in the physicality before we understand the essence of it." It's very, very difficult, (3:16). for teachers like me, who have the patience to see the mankind making the mistake again and again, and he leaves a gap for the others to come and abuse him. It's in the ?? abuse, but the closest people to the F, and they left very quickly in the last few weeks. The extent of the abuse is opening up left, right, and center. They were given freely with the love of the Creator, and they stole. They went to steal from the Creator. As the knowledge of the Creator is complete. And those who follow them will follow the same demise. You watch. Thieves go together, and the givers go together. You've got to understand, the whole essence of the teaching is a way of living in the Universe. It's not the Cups too pink, yellow, 2 springs, or 2 flat plates, and the rest of it. You play childish game, we teach you the childish way. You play the mature game in giving, you receive knowledge we don't, can't even teach in a hundred years this way. Stop looking at the Cups, go back to what I said in the past months. Look at the fields, the fields is not where the fields goes, it's where I can give that the fields goes to save someone, to elevate someone. The greed of man, "me, me," is too big in mankind. Look at the essence of the teachings in the past 2 weeks, you elevate yourself to the others. Look at the Cups and connections, you stay a man, (3:18). and you suffer a life of ?? We have one of our dearest KS telling, now I learn how to be detached like you. I had to wait a long time for her to reach that point. Long time. But that time when you realize, you mature to the Soul of the Creator, to understand it, for the knowledge to be received. Don't look at the Cups, we show you a way how to tap into the energy of this planet, that through the strength of your soul, you can get that 20% and feed it when it's in the dimension of physicality, nothing else. I call it, remote control energy transfer, but apparently mankind wants to have all of it. ?? and I go back on it to learn, don't become arrogant. Just because we give you room to grow, we give you room to teach the others and not control and be the owner and claim it. And if it you learn that, you go to the

next step. (3:20). And if you can step away from it, you have reached a point of maturity, the I live my life, you become that life. But ask if you need, and you'll be given, if it is sincere and you need. "I would love to have the pleasure of an orange, if I could receive it." Because you create that understanding at the strength of your need, for the pleasures of other parts, which ?/ yours. You will receive it. You go and steal an orange from the tree, you break your leg and you pay for it. We showed you ?? one. The harsh way with the broken leg, or go the other way. Don't take my teachings as a Cup, springs, and a plate. Understand the essence of the fields of it, what does it do, it's there. When I explain to you, this is the Inertia, have any of you stood still, "why is he talking about Inertia." Oh, you put this one there to get something, we can see something in our plate. You are just a bunch of teenagers who just learned what sex is, and get there as fast as you can. For your own pleasure. Take your time, give pleasure. Take your time enjoy the presence, then you always get there. You receive what you want. As long as man behaves like a teenager, "Wang bang, thank you Madame," you won't get anywhere. You never learned what is the essence of the creation. (3:22). You just want Cups, "make it, do it, oh, I don't receive it." Because the Cup was just schematic for you to understand the totality of the creation. You have to grow.

Some people say when I teach I insult them. You insult your self, by not understanding what was taught, so you find my word as an excuse to cover your weakness. I don't use the color, race, or nationality. I use it for you to understand, ?? for those who listen, to understand the weakness in the man. If it bothers you, it means that weakness is within you. You have to learn where your weakness is and make a strength of it to become positive. We don't need no one to deliver to us. We take what we want, when we want, because we ask for it to be given. You ?? ask for it, you don't steal. does not mean the restaurant guy has gone and brought the food, you have to come and take. There are no "Fish and Chip" shops or pizzerias anywhere in the Universe. And the whole of the Unicose exists, how come when it comes to man, everything is physical and we have to have the best thing, that's it. Understand the essence of the creation, and then learn how you convert it. (3:24). Go back to Book 1, God is creator of all, and man converter of some. That conversion of some, comes at the point of the need. "I am going through a harsh time, I need a love, somebody to love me, that I can go through the harsh time. The Creator delivers it to you that you don't suffer, be it a earthquake, be it a death, be it anything. You don't make a Cup, put a Cup there and I don't feel the earthquake. No. You got to learn to ask. You got to learn to ask from your own soul, what can I give. Never ask what you want to receive. Stop looking at the windings, and the plates, and the coils and number of coils. This was to show you the essence of creation, how, what's the difference between the position of the structure of the STM and the planet. The Vertical People, the Horizontal People. The Vertical People and the Horizontal People stand on 2 ends, opposite. If you put the Soul of the Plant on top of the branch and somebody cuts the branch it's gone, dead. So the tree was clever he put it in the ground, as long as it is there, I am sticking to it, I am there to live. Simple as that. The earth, man, decided, "oh, I put it up there and I give it 2 legs to run if it comes to kill, and 2 hands to protect it." And if you put between the plant and the man, somewhere in the middle, (3:26). you have the soul of the animal, and the kingdom of the animals, and then you see how they behave. Why do animals, mono-feeders, specific, because of the position of the structure of the ?? understanding of their soul. You put a cow, donkey, horse, and a deer, in a field, none of them will die of hunger, because they each one eat part of the same thing that guarantees their survival. And man should not be that point, man to his soul has to be the collection of the fields of the Universe, that from it, as I

said, when you become a star you can create. Now how many Cups, how many springs, how many turns, 9 turns, 10 turns. When I hear this I say, oh, we are back in teenager job. "get there as quick as you can." My teachings are very deep if you understand it, and the way I live, I give total freedom until you hang it. You hang yourself with it, or you become humble enough that you absorb, and observe the changes. And from it you give to bring more changes in a positive way.

Any other question. (3:28).

Q: .. you didn't let us anything to speak about.

K- What do you mean?

Q: Yes, all, even now if we speak in physicality this is a problem now. But you know Mr. Keshe, we are teachers and we are teaching outside the KF, so the people are still in the matter state, the physicality. So they want to see, feel, even take the energy in the matter state. So that is why we are asking to understand, although some of us really understand on the soul level, but we need to connect it to the matter state.

K- Ask your question.

Wait, are you going to go to every language, every broadcasting, every Television, every radio to teach everybody, and someone is asleep and didn't learn it, they won't learn it, and then you have to go and find them that are awake watching that TV program that they learn. Or you teach through the STM that it doesn't matter if you are awake or asleep, you're still here on earth.

Q: No I go to the second one.

K- So, how and what is the way to the second one.

Q: What we are doing .. but this because we are short of living in physicality, (3:30). we want to see it in physicality. ..

K- Can you imagine how hard it is for a man to wait 9 months to see his own creation. He must be suffering, huh. But we got used to it, oh we got to wait 9 months. Why can't you create that soul, that it is instantaneous and it decides to show itself in physicality. You don't need to wait 9 months, nowhere in the Universe anybody waits for the creation of the soul. The children of the soul of the universe are created that instant, then they decide if they want to be part of physicality. But we still allow the cycle of physicality to go because you have to show something. Somebody comes out and says , hello mama, says hold on, where did this come from, was it me ?/ somewhere. Because we haven't learned about the soul of creation of the soul of children. We still have to put you through the 9 months. ?/ comes out, goes in, and then somebody comes out, go .. and that is your baby. Does the soul in the Universe carry 9 months, 10, 22 months. No way. So you like it, we give it to you the way you enjoy it. But in the creation of the soul. If I come to you today and say this is my son, you never had a child, how is it possible? It was soul born, from the soul yesterday, he decided to be there today. It doesn't make sense to you, but this is how creation is in the Universe. (3:32). As I said, we come to earth to enjoy the physicality, but this physicality is very ?? awesome, and very.. physical. Carry on.

Q: .. draw on whiteboard . that 5 Cups normally should be 3, and 3 connection in between. .. if I say there are 5 Cups.. !1, 3 and 5 . 5 should have partially nothing from #1, but #4 which gives in between ...

(3:34). Q: If we want to work with the world of plants, we need only to change the 2 above?

K- What do you mean?

Q: (3:36). Q: Draws 5 Cups

Q:

(3:38).

Q: 4 and 5 are the common denominator for all on the earth.

K- No they are not. This is exactly where you are wrong. The only common denominator is 5. The only Common denominator is 5. Nothing else.

Q: What is the Inertia then.

K- Inertia is in different part of the planet according to the material. This covers the same thing right across (from 5 upwards. this Inertia is from here (covers the top 3) , and that's it. If this Inertia changes you become a shorter man. So for you to exist you have to become a shorter man here. This becomes the position of your soul (between 2 and 3), because the Inertia change. In the world of plants, the Inertia ?? you can plant a herb and a tree next to each other. And the animal here always eat what is available here, because the plant produces. Their wish is to have ?? this created, by the central interaction of the material. So your proposition has, (3:40). needs a better understanding. We are not there to position us, we are there to enlighten us, so the common denominator is only the G field of the planet, even that at different points are different. Common denominator of the G of the Earth, or MaGrav of the Earth, on this side could be here, and through the composition of material, will be here. That's why we have mountains and valleys. Because it depends what this (Cup 5) composition of material has kept for itself that it absorbs the field. I tried to bring for you to look at the totality, not one line.

Q: .. all your Cups are like this .. triangle you are preparing a strong field as the soul of the Cup, here .

K- No, I don't see that, we haven't made Cups like that, all our Cups are like this. (3:42). Some fields above open them, and some below converge them .

Q: Yeah, due to the strength of what you are putting in.

K- Yeah well it's a choice.

Q: And if I want to go to the plants, and from our understanding that some of the plants the soul is down in earth, and they are here ... so in this way change the position of UCp 1.

K- What do you mean?

Q: This is the physicality of the man.

Soul of plants should be in this Cup 3 because it's in opposite position ..

.. (3:44).

Q; soul of the plant upside down from the man.

physicality would be on top here.

K- of course that's what we said. It's like putting the man on his head, but connecting it to the Inertia of the planet. You become a vertical, a herb.

Q: number 4 and 5 will not change.

K- Yes they will change, No, no, this is what I keep on saying, number 4 is all changeable, not number ?? 1 or 2, change but longer period of time.

Q: Do the same system for man go also for the plants, in the meaning? if we see 1 and 3 in what you gave us in the 5 cups. ...

if I go to this 3 ..

(3:46).

K- Yes you see you are still physicality, the fields go through. ..

The five Cups and five Cups .. it's the story of 2 Cup. The field flow with the man is this way (outward down and inward up) , that's the direction because it gives energy enough to the soul. With the plant it still is this way, with the direction still goes that way, but here the soul of the plant sits here (4th Cup) to be a giver. This is why if you eat a fruit or whatever, it adds to your energy. (3:48) and that energy is to be used for whatever reason possible. This is what the scientists can't understand, and create themselves. and what they do to understand, and we don't need to problem with it, a lot of things with KS. One takes from the plant, and it puts its physicality at the height of the thing, and that's it. The other one puts its physicality within the structure of the planet, and it is committed to it, it can't do anything with it. In a way, when you look at it, a tree or plant talks when it grows up. But the man doesn't. (3:50).

K- It's the way life has become

Q: I have a small question. I have a small residual in the soul Cup, in the first one. is that because I am in physicality.

K- too physical. yes. because it is soul to soul. ... I don't know where my cup is.

Q: All over the place.

K- In so many ways, yeah.

We are getting ready to release the document, as promised. Please when you receive it, share it with all the health authorities, and all the officials. And they can contact the KF or wherever they like ...

(3:52).

(3:54).

Size of 5 Cups:

Q: Does the size of the containers matter for the realization of the 5 Cups?

K- Um .. no, but the further distance you are there is more possibility of producing more.

Is Meditation Helpful :

Q: Is meditation an important part of this great service, (3:56). and would a group meditation to elevate our soul as a group, creating a group consciousness, would that be a good thing?

K- I am going to bring somebody in. I think she is the one who tell you because she is writing that part of the book. Wang Lyn, can you tell us, because you meditate a lot.

WL- Yes, Mr. Keshe

K- Answer the question please

WL- so the question is that meditation is important for elevate the consciousness. ..

the answer is yes, ..

(3:58).

(4:08). adding to it in a positive way, we progress.

if we become physical with it, then it becomes very painful. What we planned, what we think, is not necessarily what it needs to be, unless the other souls have decided it to be. In so many ways, when you make the soul of plants, vertical people,

becoming part of the Soul of the Universe, is going to be a very difficult time for man. Because you still look at the Cup, what color, why is it green, why is it blue. It will take a long time for mankind to switch. If they take the path, as they ?? have up to now.

(4:10). In the recent past we have seen a lot of people going through this ??

A lot of people give promises, we don't give promises, we teach you. It's you who has to elevate, and those who think, we have, we've done, we're doing this, there is nothing there for them. and they attract the souls, for what they call there cycle, and then those souls become in a lot of problems. Because what was promised was not there. In this teaching we never made promises, we showed you how to make things, that it is you who can promise your soul. And I always say, it depends on what you want, because it is your strength, it's your soul who decides what it wants to take with it.

Q: I would like to translate your 9th Book of the Soul, I am so touched by your teaching of the soul.

K- We come from the Soul of the Creator, nothing is a choice. (4:12). And we teach for the elevation, gradual, of the humanity, not the totality in one go. And this gradual, we put a term and condition on it. A lot of KS were eager to get, to do, but a lot of KS were not aware of what we could see in the soul of the Foundation. And when there is misconduct we correct, we give it time, until it corrects itself. And when there is the gain for the F we encourage it, that it proceeds to the next level, fast. The teaching of the soul, is a teaching of the conduct of the man in the Universe, not the man on this planet, in a way, partially, this planet and the STM is what we call the sandbox. If we understand the operation of the soul of the others, we have matured maybe enough to understand the operation of our soul. We never can learn from our soul, as it is within us. We cannot look inward to see the light. We see our conduct in the behavior of other souls. And this is one of the biggest problems for humanity. Maybe in the future mankind elevates to reach the Soul of the Creator, then maybe he can look within. (4:14).

R- Looks like the report is ready.

K- I would like the head of the KF to read it.

(4:17). Ella, .. basically it's a lot of information we have approximately 187 pages. .

(4:22). various researches were we show the M fields ..

History about the Gans and viruses ..

Construction of Cup #1, and Cup #2 ..

how to use them .. Gans suits ..

Protocols of different mixtures .

Detection .. (4:24).

Disinfection of environment

Protocol A white tissue

Protocol B red tissue.

Mutations .. (4:26).

Cancer ..
Children
Environmental Corona infections.

(4:32).
lab tests ..

K- Can you go back to the statistic page. What do you see, the most important part of this report is this, where if you open up, you see as high as 94 - 95% success and reduction for specific parts, lung, fever or whatever. And this is exactly what WHO looks for. What we don't see is, (4:34). the effectiveness of ?? and how fast it is done, is within the guidelines of WHO, and 95% success, has not been reported anywhere in the world, with the T. We had to work with 156 out of the total numbers. And this part, this is actually what confirms the correctness of the T. If we look in detail, there should be no need for no one to die of Corona, even in the early or late stages, 95% reversal. It's part of what has to be considered by the WHO, and the Iranians ?? and the offices of the ... sitting on this because, they see no reason a water should be able to do such a thing.

Data to International Standard, 95% Success Rate:

The theoretical data, is to the standard international requirement. This is what all the governments will be looking for. We have shown the T, we have shown the things around it, but essentially this report is the compilation of a lot of knowledge to show 95% success rate. (4:36). It stays an open report that we can update and change. And we'll keep this report ongoing, until Corona is not a problem anymore. In a way, a simple \$1 cup can save one life. And we have seen man dying for \$1, why? So, what we, what you are interested in is the procedure. What to look for, and protocols. Many of you get Corona but are not aware of it, and later on, you see the cancers of it, and all other things of it. Read the Protocol, read what we call the cases. There are 23 to 26 identified ways that the Corona is effecting humanity. And of today, our successes are of 95% doesn't matter which one has been hit.

Any questions?

R- I was wondering what is meant by saying ... 95% success, what does that mean, (4:38). what happened to the other 5%, did they ..?

K- We allow 5%, statistically it's about 97 people out of 100 survive.

R- So that would mean 97 out of 100 that are already in pretty serious condition in the hospital?

K- In any condition, yes. The people who did this. There is a list of the patients, who they are, what they have been through. The 155 , the details have been given to the statistician, and they have come up with the figure after analyzing.

As a KS you have seen many parts of it, we had to put in this report as people who don't know nothing, (starting) from zero, to the point of conversion of the disease. The university wanted 2 halves, one to do with the Gans's and one to do with the illnesses, but have one after the other to be published. This way we kept everything together. You get a Corona, open the book, see what signs it is, we update all the time, what you have to do. (4:40). Any other question?

With this journal , with this publication everything how to do.

if in the future there is no one around to.

If there is no other question we'll close this session. Please send this around the world, the way it has to be, governments, officials, ...

R- Wonderful thank you, and congratulations.

K- You should thank the head of KF, she has been working day and night to get this done.

R- Yes, congratulation to Ella, definitely. (4:42).

K- We'll see where we can go with this ..

Your governments can ask questions directly to ..

(4:44).

(4:46).

K- .. we have to go as fast as we can .. how many lives to save. .
