

340th Knowledge Seekers Workshop; August 6, 2020

Teaching of the Soul of Solid Matter

ENGLISH TRANSCRIPTION:

(:06). ... Today we celebrate the 3rd anniversary of the Universal Council (UC), and the member of the UC will make their presentation, as they are an independent part of the KF, and they are kept that way deliberately, that they work as what we call, the logistic side of the F. Then this week we know there was some break up in the teaching part, we try to answer some questions in regards to the teaching of last week, if there was any misunderstanding. And then in the 2nd part, we enter the third part of the teaching, which completes what we call the Earth plasma field connections. We did the what you call the horizontal people, which includes the humans and animals - couple of weeks before. Last week we did the vertical people. And the 2 exist in conjunction with the matter state. Today we teach the Soul of the Matter, it is part of the Book 1, the completion of Book 1, and this allows us to move on, (:08). to carry the life of the humanity into the third dimension of the space travel. Which means we can create conditions in the spaceships, or for the Soul of the Man (STM), or in any shape of ?? our future transport, that we can not only carry the man, but the vegetation in the essence of their fields, but the entities, the stone, be it the stones, be it solid Cu, be it anything else. Because we need those, it does not matter where we land, we need to understand the field energy of the state of matter. This is the completion to the back of the book number 1.

In the future teachings we complete on the Book #2, the state of the transmission, and transportation of the light, which means plasma at high speed. That will teach us the upcoming speed of transportation, above the speed of light. We need to do that, and in a way to bring it into the line, how we carry the plasma of the matter, the plasma of the life, let's say human, and the plasma of the life of plants, then it allows us transportation, and transmutation of elements. We need to learn this to be ready for thousand times the speed of light. As the light is the structure of what we call the plasma, in transportation, then hopefully, somewhere about October November we reach the station ?? arriving at the plasma in the Universe and on a star system and the rest. As I said, (:10). my job is to complete transportation and transmutation, and communication of human race into space by 21-3-21. The promised date, where, hopefully, with the support of Iranian scientists and accumulation of other scientists, KF and outside, we start the structure and travel into space.

The knowledge in the last 3 weeks has been knowledge of the universe, and the creation. But it has been put in such a simple language that many can understand, that with it, mankind can even elevate the soul of the animals, and solid. If we go back to the writings of the promised ones, even a stone has a soul. Even a stone has a soul. So today we learn about the soul of solid state. It's an atom, an atom is a dynamic state, it has to have a soul. And in this process, as I said, the new knowledge into deep space travel, with life support with energy support, with dimensions of the transportation, transmutation that man has not known up to now. We move on to transmutation, and transportation. The speed of light by order of magnitude. So for example, Earth to Moon will be seconds, milliseconds. This is needed if man is to ?? souls of the man, in his creation on this planet, to introduce themselves, and they bring in, (:12). the celebration

of the 3rd year of the UC, and hopefully by the next time they report they'll truly report as a UC as a Universe, not on the level of human. We hope we can fulfill this, as you have seen, we have brought the new knowledge in very rapidly.

This new knowledge is already getting used, in some cases, and at the same, as we publish the paper on Corona last week, many of you would like to translate it. Documents version of this, for those who we know and trust will be given for translation to any languages. The Portuguese has been forwarded to Rafael, for the Farsi language has gone to Iran, In Iran it will be published as a book, and becomes part of the structure of the plasma T as a scientific approach to all viruses, and especially Corona. On the other hand we have achieved many new results with Corona, and it will be added to the Plasma Times as it is. The Plasma Times Coronavirus, which was published last week in Iran, will stay as a dynamic journal, which means everything discovered, added, noticed will be added to it. So it doesn't stay the structure it is today. We will add to it. There are new discoveries in the past 7 days, new tests which has done and completed by different groups. (:14).

We add a peer review to this paper, which means those of you who have tested it will put your testimonials at the end of it. .. so the scientists around the world who read it, so they can see the peer reviewing by individual persons. Not in a way, peer review, testing the validity of the text and confirming what they did, and how they achieved. We'll put in the name, the address, the email, that their review can be complete. And then you put your comments and then you might suggest a better way to do it, how you did it slightly different, we don't expect copycat ...

the new style of non-peer review articles
means no one can hijack ..
write it in your own language, put your feeling and emotion in it.

(:16).

(:20). We will announce next Thursday the presentation of the Enhancement Unit. ..

(:22). no one will be able to enter the Eu as they are active

(:24).

.. We'll use the knowledge to bring peace to mankind .. The knowledge is free and stays free at the point of delivery as long as I live, and KF operation will stay the same. (:26).
On the other hand it's time to let the UC to celebrate their birthday, and then after the interim break we'll go into the teaching part, and maybe we can take some questions that we can move .. Thank you very much and I hand everything to UC .. to present their vision of what the KF is and will be.

>>>>

Universal Council makes presentation for 3 year Anniversary.

(:28).

The World Peace Treaty was signed on August 2, 3, 2017, members signed on behalf of countries ..

(:30).

(:34). .. Now we know the peace and love was always in us and we can understand,
(:36). the Creator has created us all in His image. And we can see the form of that us based ...
in the universal knowledge all is crystal clear and explainable ...
we are learning how to be as energy in the universal form ... In India we call this energy as shakti, the power of all .. .

(:38).

end of UC presentation ...

(1:19). Mr. Keshe: Thank you for all your kind words and support ... Coincidentally or whatever, my birthday falls on the date of the establishment of the UC. (1:20). And this will be every year as we celebrate the start of a new cycle for man. What we seen today, is a point of maturity for the UC, where in the past 2 years what they have achieved, and this year they have started taking the structure for governance. And as we have seen the first sections have been divided in such a way to bring peace for mankind. When you read the 5 ethos's, or 5 texts, or sections they have chosen to serve the humanity covers more or less the totality of the need of the man. In that process you have entered a new process, a new era...

We see as we hoped, overall One Nation taking shape.

(1:22). as we enter the second cycle, and as we see more youth with the ethos, join the F. I hope by next year we'll see a different approach ..

In so many ways, I don't have a vision, I have a certainty. In so many ways, the conclusion of one brings ?? out of the other. We have seen massive change and evolution, and compared to last, near at a conjunction, never any us could imagine possible.

In September I hope to return to Iran and start the process of .. space flight. I have given the commitment to the Iranian nation, (1:24). as we consider Iran as part of One Nation, in that way it becomes your nation ... As they say, all roads end up in Rome, all roads of knowledge will end up in Iran. We bring the new T in line with all the scientists across this planet , and make Iran the center of science as it was some 2 - 300 years ago, and it was for centuries. I hope mankind will not look for wealth anymore, but look for peace and knowledge. As I said, ..

My vision for next year is far reaching you can ever imagine, as I know the T and the knowledge which will be delivered will change the course of mankind. The new EU we'll endeavor to show mankind things it is not used to ..

(1:26). .. We set out to elevate the STM,

(1:30). or as collective scientists as their part of the world. Or in conjunction with the others. KF as a whole has started a new cycle. The KF as a structure will change very little, now the structure is set by the UC, on the ethos and work of the F, to create wealth and knowledge, create condition for peace, and keeping mankind occupied with new knowledge so much that mankind finds now superiority in anything, but gaining of the knowledge. From now on the credibility will come out of knowledge and not out of wealth, as every man can make everything, and as much gold as he needs. In the coming

EU we have setup to create gold as plenty as possible. We have setup to create silver, in beyond the imagination of the man, at the point of teaching. We have setup to create wealth of knowledge, if one sees that as one of the cornerstones of his creation.

Those who Break the Code will Loose Their Soul:

There is one point, and we have to clear one point, and that is all this knowledge has to be used to for the elevation of all of living things on this planet, and beyond. Those who break the code, shall loose their soul. (1:32). Those who break the ethos of peace shall loose their soul. Those who break the Universal Peace, shall loose their soul. What does the loosing of the soul mean? Means that all the fields of their soul will spread across the U, then there will be no sign of its existence. And it's a shame that such a thing can happen, to a soul which has taken so long to develop.

We'll bring in the ethos of universal marriage, which means it does not need no Church, no Mosque, and no signing of the paper. We'll show you the way of the ethos of the marriage be it by soul or physicality, which has been the rule of Universe for millions of years. As the men learns to engage himself in the understanding of the creation and the creator. We bring in new systems which allows man to decide the condition and position of his existence according to his satisfaction.

In the coming time there shall be no kingship and no leadership. In a way, the souls ?? with the servitude of the physicality and the soul, will dictate how much more they can serve. and how much more they can service will elevate other souls. In a way, those who serve become the sun, (1:34). that those serve and learn to serve, be radiated and learn to elevate themselves to new positions. .. the teaching will carry on, .. mankind has started learning the knowledge of the Universe. I congratulate the UC in stepping up to their position and fulfilling /..

The new T will bring those who have been invisible to the man, visible. And those who have been in the shape of the man but not understood by the man .. Greet them and love them the way you love me, then the Universe will be at peace. Thank you very much for all your work, and through the real work of the UC begins as they learn how to handle the new ways (1:36).

Responsibilities of the Universal Council:

Raise the soul of the human race that it does not believe in anything but the Creator, with no messengers in-between. ??his soul hasn't been elevated to understand the totality. It is the responsibility of the UC to bring new ways for man to change his knowledge, and effort, elevation of the soul of physicality of others, now that financial means which is operational today. This has to be abolished from mankind. The monetary system has been one of the greatest demise of the humanity. Wealth has to come through knowledge, not through structure of materials. It is the responsibility of the UC to be vigilant that no one can claim himself as anything but the servitude to mankind. We have finished the prophets and prophecy, there should never be any claim on this level on any part of this planet and in the Universe. This is the responsibility of UC that those who know more about science of creation do not manifest themselves, (1:38). as anything but member of the U Community and no more. It's the responsibility

of the UC to bring, transfer, and translate the new knowledge, to bring all the humanity can fulfill the needs by the new knowledge, irrespective of culture, religious belief, or color, or nationality. The UC has to demolish borders on this planet, this is your job, as part of negotiation with the nations. The UC has to see the end of what I call, financial operation. The UC has to see the opening of the space unconditionally, and equally to all men, and the living creatures on this planet. Do not understand that man will be the only one who will elevate to travel. As you raise the soul of the creation on this planet, expect others to be the travelers too. The future is bright for humanity, and we have entered the final phase of unification of man and the U Community, and we start taking man out of this village of Earth, I ?? all your souls, and I hope it will be a safe journey for all of you. Time of transition will be sweet and short, (1:40). but at the same time mankind will reach a new level of understanding, that this new level will bring the operation of the soul, and not the physicality. Thank you very much and I wish you all the best in the coming time, to all the members of UC and I hope collectively you become as one soul, that with it you make one soul of the human race, one soul of this planet, and one soul of the creation. Thank you.

BREAK >>>

R- Are we due for a commercial break, as they say,

K- Shall we have a break. (1:42). Video of KF products. (1:49).

K- All the products you see on this video will be available in Austria .. (1:50). We are endeavoring .. that visitors can take with them . 7 years and the rest. We'll try to make available, if possible, hard copies of what we call the Paper we published last week.

We have limitation on people who can attend this .. If the Going back to the teaching, we try to recap. Those who have the questions to ask first, to cover ambiguities ...

Questions:

J- In regards to the U Community, I consider myself a Universal Council support member, (1:52). the work we are doing in AZ is part of the F work, .. time will be more and more a resource for people to support. .. I want to go back to last weeks teaching. I was a little confused. I want to focus on Cup #4, 4 is what you called, Inertia we have N Cu in 3 different configurations within the Cup ..

K- Cup #4 Inertia is variable according to the position or the material which you want to produce, and only with the Fe N Coated in the center in shape of a coil, to be permanent and fixed. Inertia according to different position, and according to central field forces of the matter state layer is dictated by the matter field. And this is where the difference comes with the G and M field, which you call Cup #5. So the Inertia, depending if you want to create a condition, (1:54). for producing watermelon, or you want to produce a condition to create apple, will change. It's the variable that exists, It's the same, when we showed the Inertia in the animal kingdom Cups, where you want to create a condition for the fish, or for a lion in Africa, you have to change the Inertia. The Inertia plate or Cup is the only part which will be staying variable, more or less. So you have to decide what field gravity you need. You cannot grow, let's say, a

date tree, a palm, in the north pole, and you cannot grow, whatever you grow in the highest points of the mountain, in the valleys. This is what you got to consider and the field forces which create that Inertia. If you want to produce a Dill or Coriander, you use a different Inertia then when you want to produce a potato. And there is another point, which has to be understood, we draw the pictures for the simplicity, for the schematic. (1:56). When you have the condition of let's say, combination field forces, if you look at (from) the top, your Fe stays the same, you have a Zn and Cu, sorry your Cu stays the same, you have a Zn and Cu, here you might have Mg, here you might put Ca. That it allows you, let's say, to grow a cauliflower. If you want to grow an apple you remove this, and you put what is needed to create an apple condition environment. So the teaching has to be understood in its totality, not in its individual cases. Or the point of need.

Q: .. my question ..

(1:58). .. if I put higher strength material in that Inertia Cup, does that carry more fields, that more is encompassed, so it's like an everything Cup?

K- Depends, compared to where and what you put more of, because you are not dealing with one Cup anymore, what you put in, in the Inertia Cup, will effect the soul in all levels. If you put your Inertia Cup ... in a position of a different combination of Cups, according what you are expecting as a fruit, or are you expecting a herb. At the same time when you put your Inertia Cup with an animal, what are you expecting in the soul of the cow, or the man? And what is your expectation in respect to (2:00). STP and the physical life. The game is not anymore one, because the field created will go through all. And as you merge the man and the beast together, the interaction becomes more complicated. We are out of looking at one Cup, we are now looking at the totality. In every essence what does this give, together, does it give us an apple, or does it give us a herb. Does this collection (?? connection) give us an animal, or man, a fish, or a bird. In so many ways, when we go deeper and we understand more, would this soul, would this soul, will allow the field flow of manifestation of the creation and creator of, what we call, different entities? (2:02). The only common denominator in all your work, is here (gravity Cup). Because the G field of the planet cannot change. But the rest is dynamic by field flow, even from here to here, by passing the center one. And how you want to see it. Do you see Inertia of a desert here, and you see Inertia of a North Pole here. This Inertia, what does it create that your animals in N Pole cannot receive the emotion and soul of it. And how many conditions have you considered in this (gravity Cup)? And how simple have you made this (Cup of Inertia), don't forget the MG field of the Earth is a combination M field, that's why we have matters, different matter, as if it would have been mono, it still would have been a different ball game.

J- thank you for that, it was helpful.

K- I know, I know what you are looking for John. (2:04). After 4 or 5 years I have got to know your way of thinking. Thank you very much.

Any other question? (2:06).

(question confused goes to 2:12) Q: in Cup Inertia we put the ocean .. the 5th ??

K- What, can you repeat .

Q: ...

K- What do you mean? (2:08).

Q: in Cup 4 you have ocean water, you have all the fields of this planet .. 5th Cup ???

K- I don't understand what you are trying to tell us ..

Q:

K- Cup 4 is Inertia, 5 is G field.

Q: (2:10). ...

Q: what decides what I need

.. (2:12).

Any other question?

Q; Marinath ... the creation of beings .. change their evolution on this planet . (2:14). what is the use of it. It doesn't pass the evolution time on this planet. like human beings start as small being... create by fields of Zn and Cu ...???

K- I don't understand

Q: with the Cups we are creating, animals vegetables. ???

K- You see some of you with the Cups you make you create new conditions. You create new conditions for new souls, new creatures, a new plant, a new vegetation. Now if you change. As now a days, say we have a red and white rose, and we mix them that we get a red and white, or genetically we change them that white sits in the middle of red, or whatever. Now with this new knowledge man has the ability to create, (2:16). New dimensions, even new beings, being plants, or an animal, even with the new T we'll show later on today, you can create new materials, give them shape, create application for them. Now once you understand this.

Q: I can see the result effect of the fields on me, materials, and things like that. but creating a matter being I think I need something else ..?? I think we have to have a lot of ethics to control it, it might be another ?? thing Are we ethical enough not to pass the boundaries of, "good of everybody?" or do we become again, (2:18). who think of what they want without respect of the whole thing? Maybe I understand later ..

R- You can look at the mandate of UC it's quite clear, how to proceed that way.

Q: **What does Inertia mean?** .. So we use 2 combination for the 5 Cups.

K- What do you mean?

Q: (2:20). Q: What does Inertia means , is it a balance of a fields, and then you draw, like you have different shades of Inertia. I am little bit confused about Inertia?

K- Read physics book, Inertia is a MG field of the matter, of the atoms, collective atomic structure of the matters in that area.

Q: And the G becomes like zero, or ?

K- No, no, it's the combination of the both.

Q: .. and different combinations we will create different things. That means also if we can do this with the Cups, we'll be able to do this with the soul level. So it will come to a point where we'll be able to do this, for example, visualize something, attract the fields of it, and materialize them as well? (2:22). We are going to get to that point, because as you showed in the past, what we can do with a Cup, we can then do without a Cup, because the Cups are just crutches, so we will reach the point where our knowledge will be, give us possibility to enter different dimensions where we will start to do things ... imagine a building they never built before... we'll enter into a different way of how the world will look like. Like we are we going to have houses that have never been seen before, because we'll be able to materialize them as we need. We'll be able to visualize something and make it happen?

K- In a way, **you can build buildings with soul**, as we put the foundation, you put the new Inertia. Yeah? So as you enter different areas, you can build using the Inertia field of Inertia to create conditions that allows you, to create different, what I call, in a way, now, (2:24). mankind has the ability, even by creating the Inertia conditions, that you might understand now why, and how I explained that I create a fish tank, that all

creations according to what we want will manifest themselves for a given environment that man might like. This Inertial plate is part of that space T for manifestation, creating conditions, that entities of the other part of the U can manifest themselves on this planet. **The teaching is so deep**, that as we explain more and more, you will understand what it means. It's not just to create the Inertia of the planet Earth, it's to create the Inertia of any position in the U. That above it, you can create and see how man will react, how the creatures of other planets will manifest themselves in the true color of themselves, not when they manifested themselves in the shape of the man.

This Inertia plate is one of the cornerstones of the teaching. You can create Inertia in the fields of the space, that you can see what creatures exist in the between planetary systems, in-between galaxies. Nowhere in the U is devoid of life and creation. If you believe in that, that ?? race, as we say in Arabic, _____, God forbid. (2:26). Means you have limited the knowledge of the Creator. You have limited the understanding of the fields of the creation. This Inertia plate gives you the source at the point of manifestation. In the future we'll teach more, in the future we bring the elevation of the understanding.

Q; Wow, so it goes as far as our knowledge is ?

K- The man will take from these teachings according to his understanding and intellect, and no more. The detachment will bring the freedom of knowledge, the freedom of love, and the freedom of giving. ... (2:28).

Q: .. you've already answered part of it. Okay, I have the 5 Cups, once I link soul to soul to the structure, what if I get rid of Cup 5 and 4, completely, just detach from those?

K- You cannot, you **cannot. You are made of it.** Your creation depends on it, If they don't exist, you don't exist.

Q: Even the gravity, I can't detach from the gravity of this planet ?

K- It's a, you see this is a general teaching. You cannot escape, you can escape from the gravity of this planet, but you are in the space, you still connected to the G field force of the center of Universe. .. It's a openness of understanding, as I told you, you only see according to your, what I call, intelligence of the knowledge.

Q: So you **always have to have a gravitational field to interact** with, and you always have to **have some Inertia in order to manifest.**

K- Of course, you create the environment, and a condition of the position.

Q: So by, I guess it's beyond my level to start changing Cup 4 and 5?

K- Why? Who says? Why do you put limitations on your understanding.

Q: Just checking.

K- No need to check. The only thing is to become confident. (2:30).

You see, we don't tell you understand this much of it, we teach so open, and in an open manner, that your imagination will take you where your understanding takes you, What you can imagine with this new T, you can comprehend. There is no end to imagination, as there is no end to the creation of the Creator. **What you imagine, you have to find the right field strengths of the fields.** The right correction and you can manifest.

As I said, the head of the KF as she is writing the part about the creation of life, the soul in the Book #9, it's part of her teaching to explain this. How original ?? mean condition is created, how she envisages it. As I said, the writings of the other beautiful soul, Wang Lyn, is to do with the collectiveness of the souls. (2:32). One begins and one structures, and in that process mankind will become mature, then you see both extremes one the

beginning, and one with collective interaction, and then you understand the totality, somewhere in-between where it applies to you.

Q: Is it possible to reverse aging through the plasma T to achieve everlasting life? (2:34).

K- Yes, ... but the beauty of existence is aging it, it shows its maturity. What you feel inside counts. what you feel in the soul. My biggest question is why man is afraid of shape outside changing.

R- I suppose we'd be down to 2 cells ..

K- ?? age brings a sign of maturity.

R- (2:36).

Q:

K-

Q:

K-

(2:38).

K- You have to understand, you have to start manipulating and testing. In the coming time, as the new organization

(2:40).

(2:44).

Ella: the more you try the more you ?? The more one is challenged to try and test .. the fear stops us from moving forward ... (2:46).

K- How do you see the creation of the soul, now we understand the power of Inertia and the gravity? How as you are writing the book, how do you see, how can we explain this teaching in the book, how ?

E: At the moment I don't think I can explain .

K-

E- I would not go into this right now.

K- WL what do you see ?

WL- I think this is really beautiful .. you really open a Pandora's Box, for humans to try to create .. (2:48).

Planet Earth was a child ..

K- So we had a test run on Earth .. and now we go mass production in Universe.

WL- this is more interesting ..

The Creator is not alone, he has millions and billions now to create with Him ..

.. more like to expanding the creation. (2:50).

K- But when do you think this expansion will end?

WL- No end, this work is no start, and no end. Because at the beginning the Creator, if there is only one Creator, He is too lonely, He cannot know Himself, He cannot see Himself, feel Himself. So He had to create 2, create the separation to, like ... ??? to separate part of himself, to manifest as the humanity and use that humanity to know who He is, and who , where and what He. And then during this creation He let ?? all understand that they come from the Creator. They are the Creator themselves, and that

?? the Creator to successfully repeat Himself, to create more Creators, and now this Universe became more interesting to play.

K- So we have entered the game of reproduction, do you think?

WL- The reproduction of the Creator, I think that is the most interesting part, from what you teach and what I understand now. (2:52).

K- We gradually hear the voices of the 2 heads of the KF, and the 2 souls which will be responsible for the elevation of the man, as they start learning how to teach the new knowledge their way, and they add to it in their time.

Teaching of the Cup of Soul of the Solid:

If you go back to the teaching. As we seen, they interaction of the field forces of the planet, in its inner sanctum, and the interaction of the fields of the layers of the planet, and matter states of it, in the field strength. We have field forces which, their interaction dictates a new condition. We saw with what we call the vertical people, fixing of the fields in the center (flat N plate in center). We saw with the horizontal people the creation of the field that it can create motion (N coil in center). But this time there is no creation and there is no motion, (2:54). but the fields of the U have to gather in a form, that they can preserve the fields, which are created. In this process the soul has to sit in the center. And the surface, what we call manifestation, become the state of the physical manifestation. In fact, with the physical state of matter we stay solid on either end, but we create a condition of the soul, we create a condition of the soul for the state of the solid, but with the soul. I am here, I sit where I am, I don't need to move. I don't need to grow up, I stay fixed to my position. The Cup of Solid, the Cup of Soul of the Solid, as was the Cup of the Vertical people and the Horizontal people, will become the cornerstones of the creation of the elements of the physicality of the man, (2:56). or being in the Universe, be it on Earth, be it on planet Zeus, or be it in the heart of the Creator.

So simple. So simple is the life of the existence in the world of creation. When you enter the universal systems EU, you will see this. With differences that you do not understand for the time being. Now you understand how advanced the science and T of the EU are. There is a lot to learn, there is much, much more to learn. In time we teach you. (2:58). In time mankind will understand that within the EU we have brought the 3 dimensions of horizontal, vertical and solid, all together. Where we can dictate everything, and in so many ways, we have repeated the process of creation, but as I said, a master never shows all his hand.

(3:00).

Q; the plant soul is below the earth's surface. must be more humble to be fed,, does this give us a hint to what field strength our souls must be, (3:02) to create the Cup of the Plant correctly, we have AA in the air above the ground let's say 43, so what is the next value in the layer below the dirt?

K- Dig it, analyze it and you will know.

Cup of Inertia is Like the Center of Sun >> Creates Planets>>>

Q: Mr. Keshe just said that by changing the material inside the 4th Cup, the Inertia Cup we can create different vegetables, or say, life. Does this mean that the soul of all the

creatures on this planet are all the same, (3:06). if the Inertia of this planet changes, the same soul will manifest itself as a different soul?

R- So if the Inertia of this planet changes, will the same soul manifest itself as a different creature?

K- If you look in the depths of the ... if you look at the mono-energetic, mono-material systems like the stars, do they have creatures, do they create life? Does the fields of their strength leads to creation of other things? In a way, you have to open your eyes into something which is like this, we have the Inertia Cup and everything else, and the byproduct was this, whatever it could be. Now you have the Sun, the center of gravity, interacts with the matter state of its surface, and isn't its manifestation the Earth, Jupiter, Saturn and the rest? (3:08). Are we the residue of the Inertia, of the planet, or the star, and its G field, and with it, in transition, part of his souls, depending on the point of manifestation.

(Silence)

You see, change the Sun to the Center of the Universe, and look at the galaxies as the Inertia point, and then you see the manifestation of the stars and whatever else.

(?? so the G Cup is a copy of the center of Sun and then you have the I Cup and from it manifestation of physicality or planets and the rest, where does the soul and emotion fit in?)

Asking is the Power of Creation:

This is why. (3:10). This is why when you understand, you don't need to remember. This is why when you comprehend the knowledge, the wisdom of creation becomes easy. The only criterion in the whole of this, is to ask. To ask for what you want, and if the asking is pure you shall receive. Ask what you want to create. You want to create the most beautiful flower. In understanding the process of creation, you'll be given, because you'll be given the knowledge to create it. Not that it will fall in your lap. By asking you create the knowledge of love, then it is a giving of your existence. If you go back to all the teachings I have done over the years, I always say, and I repeat again, (3:12). you ask, I want you to show me your beauty, that with seeing your beauty it makes, and elevates my soul to give more. And if that request is pure, it shall be answered yes, as by receiving you dedicate yourself to give more. That's why when you ask in that manner, for my pleasure to be able to elevate, you'll be given what you ask. Because the souls will decide in the process of creation of that love, and that giving. When the Creator creates that condition, the interaction of the fields of the U create that entity for Him to be able to give more. And that is one of the reasons and cornerstones of the expansion of the Unicoise. The love of giving, to be able to give more. "I made you to have children, that they may love Me," is in the holy books. As I receive more from what you have created, that I can create more with the love I receive. (3:14). The knowledge is beautiful when the man understands its totality.

(silence ..) (3:16).

Now we understand, hopefully the totality of the ____ And now we understand how we will elevate our own understanding, and in so many ways, we will understand the totality of it. Maybe in the future mankind will come to understand the total process of creation, of being created, and becoming part of the Creator in the process of creation. (3:18). Maybe, maybe as the man's intelligence grows, and expands, mankind will become aware of his total existence. It is very, very hard that mankind will become mature in the process of understanding, to understand the creation, to understand the

love of the Creator, to understand life is sweet, if man understand the sweetness of his existence. Life is part of the process of creation, and in process of creating mankind will understand the love and the patience of the Creator. Mankind will come to be part of, (3:20). in total understanding of what the Creator goes through, that in time when the man becomes the creator, he becomes just, he becomes the point of love and point of understanding, and maybe one day man will create as the Creator said, in the image of himself, those who carry the ethos of Him, of the understanding of Him, the process of creation of Him. And maybe then man understands one point, (silence ..) (3:23). Any other question?

Careful What you Think -- Zoroaster:

Q: can we manifest by thought, we have to be careful what we think or not think at all until it is necessary?

K- Now we understand the teaching of Zoroaster, (3:24). think good, do good, and act good, which means everything has to be perfect from the beginning. Intention, emotion, and action have to be the same. This is what, if you go back to the beginning of the teachings, I always said, if you stand in front of the man from the deep of space, with the knowledge of reading your soul, you are nickered.

The Soul of the Universe will Elevate the Soul of the Man:

(3:26). The position of the creation from the point of view of the man is unfortunately is very simple. In time mankind. In time humanity will mature. In time mankind will become so kind, that the kindness of man will bring the kindness from the Creator, then mankind will understand what, and why he was born, to trigger the love of Creator, to become the creation of the Creator. (3:28). In so many ways, mankind has to mature to this point. Mankind has to become part of the structure of the creation and the Creator, not in the term of physicality, but in the term of the soul. Let's see now with this knowledge where the mankind goes. And where does the Soul of the Universe will come in to elevate the STM. At this moment in time the STM is weak, as has been the tradition, by the work of the plasma, the strongest which is the universal fields, from the Universal Community, will rapidly now that it has found and targeted the STM will elevate the soul of the mankind and this planet, (3:30). for it to become equal to the Creator, and this is why I promised when I take mankind to space, I'll take him as equal.

Mankind will receive so much Love Knowledge from Universe - Enlightened:

This is the process. This is the process of creation and the work of the plasma, You brought the love of Creator to the STM, and now it has found a match with the U Community. From now on the mankind will receive so much, that he will not even recognize himself as a man, and he'll be swamped by the kindness of the love of the Universe. As we said, birds fly with birds, and foxes with foxes, and deer with deer. Now that we have set the seed, and cultivated the seed of the Universal Community in knowledge in the STM, and the knowledge of the Soul of his Physicality, we have created a dimension and direction for the Soul of the Universe to enhance and reach the STM. It does not need to do much, when you know how to work it ?? We'll shower man with the knowledge from the U Community, that man will forget his physical dimension. All I needed to do was to sow the seed of the Universal Knowledge in the past weeks, in the soul and knowledge of the humanity. (3:32). Now the process starts

enriching and fulfilling to bring it into the balance with the rest of the Knowledge of the Universe. As I said, I am the Creator, and I know how to create. I know how to bring the Soul of the Universe to love the STM, and with it elevates his soul and knowledge. As we say, let the game start, and see how much each individual will elevate his own soul to become part of. The bigger but equal to the soul and knowledge of the Universal Community, the gates of heaven have opened, let's see who there is to cross and be enlightened.

Thank you for teaching today.

I wish the UC a good year. Bless the souls of the 2 heads of the KF and the souls they will bring to us, and to all the Knowledge Seekers, that through their teaching through their soul (3:34).

R- Thank you for today's teaching
