

343rd Knowledge Seekers Workshop August 27, 2020

Soul of the Light teaching

Iranian shows 5 Cup reactor each soul lights up

Creating a living being with heartbeat

This knowledge leads to thought controlled new computers

ENGLISH TRANSCRIPTION

(:06). .. We are getting ready to move in a very advanced way for the T to be where it should be, as we try to cover all aspects of the space T. In the past days and weeks we have worked towards a new dimension. In the first 100 teachings we tried to do everything with the matter state, then we introduced you to the soul. Now understanding the combination of the two, understanding the work of the knowledge at the universal level, brings us to a new dimension, how to travel in the depth of space. As I said, communication and the depth of travel is very much different in space than the knowledge of man. If you travel with the knowledge of man, as they say, it takes so many light-years to reach a certain point. Where with the new knowledge, understanding T that will take no time, zero-time, because we travel in the oceans and rivers and passages of the universal M fields, the way we were instructed. To get to that point we need to announce a number of things before going into teachings.

Today's teaching will be beautiful, it's one of the most beautiful teachings I have ever done, because now I teach my knowledge, (:08). my understanding, the way we travel the U, the way time and space is zero, and **loving and being part of the love structure allows us to reach every corner of the U.** Up to now I taught you the knowledge of man, it **took me thousands of years to learn, but now I teach you the knowledge of us.** What we know, how we know, and how mankind in time will reach us. We put the hand out of friendship and love, and with it we receive love, and with that love we teach. We teach you a lot from now on, very much different, but at the same time we try to use the language of the man, that man can understand and be able to relate to it. To be part of it. As you understand the past few weeks I brought the knowledge of U and mankind with the structures we showed you, with 3 containers, with 5 containers, how to create the souls. And those of you did, you seen for the first time the essence of the soul of the creation. What you have created, you setup the system so it carries part of the essence of yours in it.

To get to that let us clear a few points and announcements. One of the most important announcement is that the Linz Exhibition, is set and will be ready for next Thursday at 2PM. Dignitaries and the mayors of the whole of Austria are invited, and there one thing good news. As you know we have all of these "trolls" that are bombarding all the mayors. All the mayors, the emails you have sent to them have, will be handed to the Austrian national security and we have received a ?? due date . the mayors have forwarded, (:10). all your emails (you sent) to them, to us. And they are taking action on what you have done, and are doing. So now the governments are turning back on all these trolls, and people in Germany and Belgium who thought they have something to do. You will be visited soon, as the legal situation in Austria stands, send more emails to the mayors because they are collecting data and you will be arrested, and whatever they do with it, it is their job not ours.

On the other hand, the exhibition will open ,, expect a number of ambassadors to be there ...

Thursday teaching will move from usual 9AM to 2PM in afternoon. There is a specific reason for this and we'll inform you afterwards, what and how. The teaching only on that day ... there are big things happening in background. (:12). we are expecting you to develop this T further, because now we have structured totally different way, that we bring in the knowledge and we bring in the governments. ...

In Brazil we have seen heavy work, Broadcasting, Internet broadcasting , we have seen the coverage in Iran. .. to bring and keep the KF in public domain.

Knowledge has to be free that every man can develop it at the point of need. We have seen the situation with Corona, you are the last man standing, if you have the Corona governments have given you ?? no answer, be it Italy, Austria, Germany

the KS were the last man standing and made the to save their lives ...

(:14). As you became part of the understanding of the knowledge. What we see is how you perceive the knowledge as part of understanding ...

If the Creator doesn't patent, how does the man have the audacity to do so. This is how we teach, structure the KF. the knowledge at any point in the U has to be free. . that man or any creature according to his knowledge to use ...

(:16).

The knowledge has to be in a simple way that we can understand .

(:18).

Striving to understand the knowledge is the responsibility of all of us ...

the last man standing for his soul ...

(:20).

We start opening the knowledge in a true way, .. the fields of the U, mankind, knows enough about his own physicality, mankind for the first time has started learning about his soul, the creator of himself, and now mankind, we are preparing to understand the Knowledge of the Universe. If you become universal passengers it's no use not knowing what to do, where to go. **It's no use passing the fields which can save your life, but as you have no knowledge, loose your life, or damage yourself for nothing. So now mankind has to learn 3 knowledge, 1 about his own physicality, 1 about his soul that is the creator of his physicality in respect to the environment he is in, and then the Knowledge of Universe that his soul, (:22). can interact with a bigger dimension of the fields of what has created even the creation of his soul.** The rays of the U created the Sun, and the rays of the Sun created the Earth, and the rays of the Earth, in interaction with the rays of the Sun created the man. We are all part of the same. We are division, of a subdivision, of a subdivision, of a subdivision of a bigger structure, but in essence we all come from the same source.

You got to learn one thing, **is the knowledge of the creation is a god given right for every being in the U, and that is why we teach it freely.** There are no banks, checks in the U, and no bank transfers and no Nobel Prizes, because everything is noble, and everything is given as a gift to the humanity, and the rest of the creatures of the U. It's

us who has to decide in which dimension and which fields we would like to operate ?? out of. It's us who has to understand, in which way we operate. It's us who has to understand to what extent we can decipher the knowledge, that it suits us at the time of need. One of the biggest problems for humanity is deciphering. .. man, (:24). is he converts everything to the knowledge of physicality. We have to start trusting, .. understanding the process of the creation. That with that, we become independent in knowledge, that we can go through the process of adding, to be part of, to be within, and gradually to become the creator of. This is part of what you have seen.

I Have Taught You to Create a Being:

In essence, if you look at the 5 stacker unit you have set up. be it for the vertical, be it for the animal, be it for ... solid. What do you think that is? Mankind up to now has seen the level of creation through intercourse, creating a child, that I have created a being. With what I have taught you, **now you have the knowledge to create a being.** When you put these 5 stackers, it has a soul, it has a STP and it has physicality, that is your creation without ever having an intercourse. You become for the first time, creators. The level, the way the Creator has created all things. You are responsible for it. Up to now you have a child, "This is my baby." (:26). Now you create a physical dimension that you decide, you have decided, you made the Cu, you made the salinity of the water. You made the position of it, you have become the creator. Now for the first time mankind learns, creating through thoughts, creating through understanding of the knowledge. You take little Cu cells, and little Zn cells, which is part of your structure Amino Acids (AA) and give it AA and you create physicality of the man, you call your child. What have you created in these boxes? It's standing in front of you. It's your creation. Now you understand how simple I have made the knowledge of creation for you. When you made the first coil, ... first box. did you do what I told you, did you pray for it, did you give part of your soul to it. Because now it is your creation, you have created it. .. I always said to you, pray for your reactors, which means give from your soul, that it is with you and it elevates with you. Now you have become the creator of your dimension. (:28). Now you understand how easily I have walked you to understand, as in many teachings I said, when God created the earth, did not the scale it, ten kilos of this , and a million ton of that. The condition created by the position of the fields created the earth, and that with itself created the man. Now by the conditions you create, you lead to a creation.

5 Cup Reactor has Different Lights:

There is a **beautiful picture done by one of the KS from Iran.** (Shows a 5 Cup stacker). It's beautiful because if you look, each box has different light in it. It means the interaction, the existence in respect to openness of the life, in interaction of the fields of the U is very much different. **At the top is the soul, and you see how bright it is.** The 4th one is very dark, it's the Inertia matter state interaction. And you see even in the center of the system the soul of the earth, #5, has a light, has a soul, it shines. Isn't this what we call the aura of the physicality of the man. But now we only look inside these Cups. Let's darken the room and bring the systems, that it shows the aura of the whole system. It's a creation. (:30). It balances itself with itself, and it balances itself with its environment. Isn't this what we do when we create a child. How come we pray for our children from the time of inception, and as I said, 20 years before you even become a father. And now you created it, have you prayed for it? **The praying means you giving**

from your soul, that it is the intellect of your soul, which embeds within the structure. This creation for man, is at its infancy. How do you feel when you go near it, how does it interact with you. How do you interact with your child when you go near it, because you created it, this is another child. **Very much mono-structure, but it still has a life, it still exists, and it has as much access to universal information and knowledge as your soul does.** Now you understand. When you setup these, from the second you even think about setting the Cups and structures, you are responsible. then you will see how it will react. It's not just I get the wires and make boxes and see what it gives. Go back to my teachings. understand the interaction of the fields. understand the position of the fields, understand how you interact with it. (:32). **Now you understand the physicality is irrelevant.** In the depth of the knowledge it goes back to the essence of the creation which is the interaction of the fields. If you understand this, then you decide the interactions, then you decide to what extent, then you decide to what to do. You remember, in one of the teachings I explained, **if you are the last man standing, and you want to create a friend, Adam and Eve, this is your Eve in front of you, you have become the creator of it.** You have created a partner, that if you can evolve it the way the life has evolved in the U, you have someone to talk to. You have a soul to communicate with. Now you understand. Maybe some of you understand. **Or would you like to be a prisoner of a system to the day you die with no companion.** I have made man in the image of myself, and you are the man, and from the materials which have made you, you have made your self in these boxes, to the knowledge you have, limited knowledge you have. (:34). And we have shown you how to do it. Now you understand what is to come. We prepare you in this way, as before you go anywhere they teach you first aids and first emergency rules, that if you come to trouble it's there, you can help yourself. This is the beginning of that step, for mankind to see more transparently the interaction of the matter and fields and the creation of the existence. A life, that he starts gathering trust in himself.

Cup 1 STM is Clear because No Matter State - Only Fields:

Why does the Cup #1 in the human structure, is clear, because it has no matter, it's made of fields. Why does that happen to the soul of the animals (?? plants) in a different way. And why does it happen the same in the soul of the matter state in different way, but they all 3 are clear. In Linz you will see this in operation, clearly. We have to gradually understand now that we made these, how do we communicate with it? **What emotion we give to it, and when we come back, (:36). how does it respond to us.** How does the feature of the matter state in the Cup 3, will change according to our emotion which we give? The Inertia and the Earth's MG field in the last 2, hardly changes. Look at the Cup 3, look at the Cup 2 and see how each time, if you go with happiness, or sadness, or joy, how they change, then you understand you are communicating. Then you understand, it interacts with you. You go and get a dog with a leash, and bring a soul in it. Now you have made the soul and the structure of physicality in your own home. As I said to one person, this is your new universal being, not a dog, not a cat, but interactive through your soul. Put it in the middle of the room and see how it reacts. Corner it and put it in a corner and see how it interacts. As one of the doctors put it, horizontally next to your bed, and sleep with it and see how it interacts.

It has a Heartbeat :

It's a living being you have created, but has fields. If one of you has the knowledge to observe it, you will see, (:38). **a heartbeat inside it.** You will see **vibrations which replicates the pulses, which is essential for release of energy from the static condition of the environment.** In a dynamic plasma like a sun, the rotation, and the heartbeat release the energy which we have. In the body of the man, we create the blood, and with it the heart, **that the beat releases the energy of the Gans's of every cell of the body of the man.** Now you have become creator. And **this has become one of the most important teachings I have ever done, showing you, and many of you did, now you become the creator.** Now you have to understand the totality of the knowledge. And if you look, the light you see in each Cup, it's what we said, **even in the Inertia we see a light, it has a soul. Confirmation of the writing.**

Then you have to take this knowledge further, then **you have to use this knowledge in system control, in new computers, in new dynamic systems. (:40). In systems which responds to your thoughts, and your emotions, and your soul.** Very soon when you come to Linz, **you will see no matter state soul structure. No matter state, man structure, no matter state creation of one elevating the other.** With this simple picture I have shown you the totality of the creation according to what you understand. Many of you have made this in different beautiful shapes and forms in your bedrooms, living rooms, garages, in your offices. Now you have understand, you have a friend with you, a new creation, a new creation of your own and not something you went and you bought the dog from it, kennel or whatever else. You have managed to create a being, which is created by you. Would you make another one and give it to your son and daughter, that when they are home, Dad is with them, because he created the soul of the system. (:42). Have we advanced enough to understand the totality. Then you understand when I explain, you are the creator. But how do you communicate? Now that you have made these structures, how do they communicate. Who do they connect, or now that you have created it through your interaction, have you become a proxy server for them to communicate with you are. The friends you have, live with, your children and your family.

Life for the First Time without Physicality

In Linz you will see, for the first time, and you will understand, **life for the first time without physicality. Existence without physicality.** Position to be able to interact in the dimension of fields. Position to develop a sense, which is within the man, to interact at the fields level, not the matter level. In so many ways, now you have solved 2 problems, (:44). first of all you start learning about the creation, secondly you understand to work with the fields, and thirdly now you start understanding the language of communication with the U Community. **These systems in the coming time become the structure of the soul, become the structure of communication of you and those who meet in the depth of the space. Translator of the knowledge of the soul,** if you don't understand. Creation of the condition for the soul to manifest itself in the dimension of physicality the or soul, in any Cup, as you wish. In so many ways, mankind has to understand a simple knowledge as of today, you have been given access to the knowledge of the U.

As I said very recently, within weeks and months, **the present world of computers will be obsolete, if you understand how these systems work.** You will develop technologies in a rapid way that leads to creation of new structures that mankind has

never seen. **We have transferred the knowledge, it's for you to translate the knowledge to the point of use, at the point of understanding, at the point of need.** (:46). It's no use buying all the computers, the latest telephones, keeping at home that one day I might need it. You buy the phone when you need it. Now learn the new way to communicate, the new way to store data, as you call it. If you see and understand what I see, you will not touch a mobile. **The memory bank of the soul is in front of you.** The communication time, zero-time is in front of you. You have to analyze it, you have to understand it, you have to push the knowledge within you to become the key to the accessibility to the Knowledge of universe (KU). Comprehend the motion of the fields. Understand the interaction of the fields, and then if you like it, bring it down to the level of the physicality. If not, use it in No Dimension, No Time and Space, as a memory bank of the U. We call it a server and we tap into all over the world to get knowledge. Now tap into the server of the universal knowledge. It's been open to you, it's part of you, it has created you in the position of accommodating your existence. (:48). Are you happy with 1 "Tera Box," or are you happy with unlimited Tera Boxes of the Universal Knowledge. As I always said, man will take from my knowledge according to his intelligence.

Secret of Creation is to Ask with Love and Care:

In the process of **developing these systems I tried to show you hidden knowledge, hidden information that it needs to be decoded,** it needs to be understood for it to be decoded , and when it's decoded you'll get access to another little gem in the Knowledge of the Universe. Don't forget the rule, you ask and it is given to you by love, it's given, **If you ask with love and care it is given, you never need to take. This is the secret of the creation with your system, you ask to satisfy for the elevation of your soul,** and if it's time and the place that the rest of your physicality and the knowledge of your soul has reached to understand the information, you are given. You have open access to it. You never need to steal. What is given is not stolen. Ask for a KU and according to your intelligence, according to your understanding of the totality, (:50). you'll be given access in the dimension of your physicality, and your understanding. And no one is higher than the other. **No creature is higher than the other,** this is what I said from the beginning of the teachings, I will take man to universe, community that man will never be subordinate, but be equal. I will teach you the knowledge to reach that point of equality.

The Teaching of the Soul of the Light - Secrets Hidden in Books :

As I said in Tuesday teaching, according to your understanding and intellect or according to the choice that you want to enjoy the dimension of physicality, you will take into space, traveling the depth of the U, as you choose, in the dimension of Soul or the dimension of the physicality, which you enjoy. **There is a hidden secret that in book #2,** I have explained, but it is hidden in the interaction of the fields between Book 1 , 2 , and 3. If you understand it, if and **the stone has a soul, and if the light is created of interaction of the fields of the plasma, so even the light has a soul. And if you reach the soul of the light, you reach the soul of the Creator, and that light, in the books collectively is given a name, the "soul of the light," is the name of the child.** (:52). Then you access every creature, every existence in the U. In physicality you have dimension of tangibility, in your light, you are light in every dimension of the creation, according to the intelligence and understanding, and the soul of the observer. Even a

light has a soul, and that soul is a common denominator to the all creation of the U. Now you understand. Now you should be able to take mankind to the level of every condition, position in motion, of the creation across the Unicose. **I am the light, and I am the soul of the light. In so many ways, if you understand this, you have reached a point of maturity** to move from the dimension of physicality into the dimension of the fields of the U, to be able to transmute, transfer and be able to reach the creation, and the Creator at any point in the U. (:54). Read the books, understand the 3 books then with it and with them you understand the totality.

Mr. Keshe Stepping Down - 2 Heads of KF Teach:

Mankind needs time to mature, it's like a wine, we have just brought the pot, and the grapes, how sweet it will come, what texture it will have, what sense of emotion it will create when the man drinks it, depends on the man and his soul. As each man will taste different, and take different emotion from the same cup. The two pearls of the KF, the 2 ladies, will enlighten mankind in time to come, in interaction of their souls, and you'll receive more knowledge. As I said, **I am stepping down, as my soul to take over to teach, and as the soul of the 2 heads of the KF**, will spread that knowledge among men, that they be cared for. That is, caring of the mother for the child. The child is the humanity and the Universe, and it's the responsibility of human race to develop itself to its perfection, to understanding of the ?? Knowledge of the Universe, not meager Cup, meager box. (:56).

Try to extend the knowledge to the point of understanding. I taught you about the vertical, horizontal, solid, the liquid and gas, now today's teaching if you understood, I taught you the soul of the light, the essence of your creation, the essence of your communication, the essence of your existence in the U. **When the ray of the Sun becomes the light, in interaction with the field of the Earth, creates life. It has to have a soul, otherwise it cannot create.** Now you understand. Today's teaching is understanding the soul of the light. The essence of the creation and the soul of my child, to be understood by humanity and the rest of the U. You have to understand the simplicity of the completion of the knowledge. And then if you reach the soul of the light to understand even that has a soul, **you have reached my soul.** Knowledge has to be felt and not understood. Knowledge has to touch the beauty of the physicality, that with it elevates the soul of the creation of that physicality, the Sun of it, the essence of it, the center of it.

All Fields of Universe are Connected to Each Other - Soul has a Heartbeat:

Then you'll understand how **every fields, (:58). within the STM is connected with every fields, in one way or another, in the whole structure of the U.** It's dynamic, it's powerful, and in essence it has a heartbeat, that continuously can spread the knowledge like a beacon in the dark, in the span of the U. When you sailed the oceans by the beacon sent by the ship, you know there is a ship but you don't see it, you are aware of its existence. So the heartbeat and the STM are the beacon for existence, of the man in that point, even **the soul has a heartbeat.** Then you understand. It is essential to be part of it, to receive it, to decipher it, and use it when it is needed, for the salvation of the soul, the physicality, and the whole existence, and the creatures, and those who live within the realm of the creation, as mankind is not the only one.

Mankind has been Enlightened beyond His Understanding:

We never became the center of the U, and we never been the only one in the U. As we are created by the interaction of the fields of the U, so (are) others, (1:00). and they manifest themselves according to the field interaction of their environment. And the sooner we understand this, the sooner we come to accept, that we are within it, and it is within us, and part of the interaction of the all, creates the totality of the creation.

Mankind has been enlightened with the knowledge beyond his understanding.

Mankind has been enlightened by one point, the understanding of the totality of the knowledge of the U. If you are a doctor you use it according to that with your patients. "Do I need to operate, or I can reach through the fields to do the same." If you are a computer analysis, "Do I need a Chip or do I need a Micro-Chip or do I need a system to store and communicate when freedom of totality is in front of me. It's me who cannot decipher the knowledge, where is the lack of understanding. In so many ways, mankind has been given every opportunity to develop his self to the level of the Knowledge of the Universe and Universal Community, and this is the point, that each one of us will mature to that point according to our intelligence. (1:02).

Try to understand, try to comprehend the totality, try to be strong enough not to see it as a magic, but as a power of knowledge which you have gained, that you can support other lives, or even your own, when the time comes. Even within these Cups we have hidden much more knowledge, because you have not and you are not used to, look at the physical interaction of the fields, but you look at the physical dimension of the man. Maybe, maybe we have opened a new door. Maybe, maybe mankind is ready for the next elevation of his souls, and his physicality. Maybe it's time to open a new dimension, maybe some of you will elevate to that level. And maybe the whole human race has reached the point of maturity, to be able to get and to reach the point that creates knowledge, and that knowledge becomes the Universal knowledge. (1:04). Maybe mankind has to strive to reach a point of maturity and maybe mankind needs that dimension of elevation. And maybe the time has come for the maturity of the STM?

Any questions?

Q; How does the soul differ from the spirit?

K- **You call the soul of physicality, spirit.** (1:06).

Any other question.

R- Let me paraphrase that, you said you call the STP the spirit, that's what you said I think.

K- Yes, you are correct.

R- Very succinct, very nice. I hope that ..

Q: The soul observes this body and leaves the body for the 40th day, why does the soul wait so long. .. R- I am assuming at the time of death.

K- You know that, now you have access to him, you have been taught. And see if he does wait 40 days.

Q: .. (1:08). .. I have a daughter in law she is 5 - 6 months pregnant, the baby has a diagnose from ??? can your T help somehow. what could we do ...

K- KF there are doctors who work with the KF T in Germany and Austria.

Q: How can I get contact with them

K- write to KF ... do it now our team in the background will pick it up immediately. (1:10). ..

..
the medical team in Iran will support you. (1:12).

Any other question?

Q: Marinith .. when we made the Cup 2 for Corona, (1:14). make one of the Cu wire like an accordion.

K- That was if you did not have a flat plate. That was .. you can use the wire to make it like a flat plate.

Q: So we make Cup 2 with plate and coil ..

K- ...

Q: how you calculate the Cups, the Zn, Cu.

K- Become a physicist. You have to understand why you are doing it, and what you want to do.

How to Calculate to Make Different Gans;

Q: If I want to make a different Gans. (1:16). how can I calculate

K- Go back to teaching around 100 we have taught how you calculate. how you understand, you don't need to calculate, God doesn't have a scale to measure. And there are different ways to reach a specific material or a Gans. SO you don't need to have necessarily have .. another new condition and get the same result. It's like when you try to reach for CO₂, you use a C and Cu and Zn, but **you can go and use Plutonium and another material to reach the CO₂, but that CO₂ has a power base of Plutonium, where the CO₂ you create now has a power base in the strength of Cu, which is connected to the body of the man.** Maybe in the space you need a CO₂ of Plutonium base strength, then you can still produce it. Part of our body uses high radioactive CO₂'s.

Q: So it is like the isotopes we have many CO₂ with little different of

K- **It is a central power base of the plasma, which dictates that CO₂, (1:18). to what it is connected. this is how your Thymus and Thalamus collectively work together to create that position.** This is the function.

Q: When we make Gans we always use saltwater, after we wash the Gans, it's ?? not G?

K- What you mean.

Q:

K- **No, you create a Gans in that G condition, once you create it, it carries that inherent field strength of that point. If you take your Gans's and change to a different point, different salinity, different material salinity, you will see different reactions.** Maybe it looks the same to you, but if you observe the field flow from the Gans it is very different. . So this is a presumption you made, but the reality is different. It's like if the same cell in your heart, be different then when it's in your toe. The condition the environment forces it to react different. And it is preset where to react. Going back to the original teachings we always said, **every blood cell in the body of the man is "taxi point destination." (1:20). Due to this ?? because it has a position of MG field that only releases its energy at that point, nowhere else.** I said in many teachings if this was not so, the heart which is next to the lungs gets energized so rapidly it will grow with the whole size of the man. But only accepts energy, every cell

.. accepts energy according to its preset field strength from the blood, or the environment.

Q: then how can we make more G or more M Gans's?

K- For what reason, why do you need it, and what is it supposed to

Q: to work like a magnet

K- Magnet for what. How come the planet Earth

(:1:30).

K- You see there is a couple of problems with this, the bottom one says Gravity, it's gravity and M fields together. This is understanding the totality, and what mixture you have used. ... in some of the teaching in the past I have referred to it. Who ever put this picture up, have to change it... As all of you make these things you forgot ... because you are looking in one direction you have overlooked an essential part. (1:32). .. when you made let's say the first Cup of the Cup of Man, you used Cu and Zn, but something you have never considered .. the salt you used, how this salt was created, where did it come from, is it a sea salt, or is it sea salt which was dried as a rock embedded .. You use the Gans production with the sea salt, it's not a salt as NaCl anymore. It carries the essence of everything that was in that ocean or sea, which existed at the time in it. If you created that M field with N coated material, now that Cu, Zn. everything else, K whatever else, which was in that salt, now is part of your structure. Your Gans has a common denominator of that totality. (1:34). And so when you create these systems, you have to understand you have already brought part of the totality of the creation on this planet which lead to its creation or has been created because of its creation. It's not just a salt, it's not just NaCl, it's every other, one speck molecule of gold in that salt will effect the strength of the Gans's which you have made. So try to look with a wider view, much open eye. With a clarity of understanding. The whole purpose of these teaching is to give you a new horizon, wider angle of looking at the totality. It is part of the structure you have to understand, there is no isolated situation in the world of creation when you deal with fields. In so many ways, the knowledge of creation is not a exclusivity. (1:36).

The understanding now has to be overall, but you have to understand the next step. Go a step further, even that salt with all its composition, within it carries the essence of the soul, the essence of the fields of the Unicose, your galaxy, the universe ?? rotation. It's not just only a salt. If you look at it, that salt is like, if you understood the building of the ... 5 Cups but we put the solid plates, now you have created the solid point for the liquid state. Where the Cu was the solid point for the matter state. Now you have to understand more. (1:38). Now if you understood this, you can take the next step. You can understand then what is the next step. What are we to understand? What are we leading to. From now on try to look with a wider angle through the whole of the knowledge. One of the biggest problems KS will face .. "I don't feel nothing, I don't see nothing, I don't feel emotionally with this Cup or that Cup." It does not mean that your soul is not there, it means you have not understood the interaction of the fields with your physicality. And maybe your behavior changes because of it, (1:40). or something in your physicality changes because of it, but you never know because you have never been aware of that interaction. When we put the patches on a given position for the pain, or whatever, and you see the change. If it has created to release your pain, you felt it

because it was for that position, for that pain, but in reality it has always been interacting, but you don't feel it because you are not in that position to feel that strength, it does not mean it doesn't interact. Self-awareness of the STM is the key for mankind to understand the work of the creation and the Creator. And nobody can teach it, except man ?? learn it himself. Have you thought why do humans hug? In one of the teachings I have explained in a very in-depth. Why do we hug? Why do animals hug each other? Why do we stand in a certain position when we create life? Why we have a different attachment to our children then the other animals? When we hug we transfer fields directly from heart to heart, from the STP, in a close proximity from me to you, from you to me. Have you ever looked at, and understanding why animals behave different according to way ?? differently ?? to create their own children. Detachment. Why do monkeys and man have the same common denominator. We have our children, we transfer energy through our heart, through out soul, to our STP. Non-verbal emotional communication, matures the STM. Why do we choose this method. How and why mankind has not realized that you bring the souls close to each other that they interact too. Watch how different nations greet each other. Watch how our new generation on the streets greet each other, then you understand where the culture of man will go. Then you understand how the STM will elevate. (1:44). Transfer of the fields is beyond the dimension on physicality, and mankind has not understood that. Why children born in the West, live different ways then the children born in other part of the world. The same with the Chinese children, African children. Watch the behavior of the society and the interaction of the father and mother, even in every point of the life, ?? let alone at the point of inception. The position of the heart in respect to the soul, the position of the 2 souls in respect to the STP, all has a ?? improvise in respect to the creation of the soul, what we create as ?? life. When you are a light you shine on all equal, even those who are in the depth of the planet, because it's their fields, interaction which lead to the creation of the light on the upper atmosphere, (1:46). so they are connected to it, because of it. This is why we have different, same day of light and energy from the same Sun in different points of this planet. Combination of ?? the effect of the field. If you are in a desert it always turns up to be hot, because the STP in parallel with the soul of the planet creates that condition, doesn't matter day or night. You're desert. Because the Inertia has a say in it, unless you change the Inertia, then it changes. Why do we the planet earth suddenly tells you, geologists, that it used to be a desert here, now it's a forest. Because the amount of the ?? sand gathered in interaction with the Inertia created, in interaction with the MG field of the planet has changed the ?? condition above in the atmosphere where the fields interact, and the new field strength allows absorption of new materials, which are not desert, but allows in interaction with the fields of the planet to create life. The change of the layers of this planet, dictate and does dictate the interaction and creation of the next layer. And this is what none of the geologists who work at this level understand. They just cut a mountain and say, look there are different layers, but where did it come from? (1:48). We continuously add to the surface of this planet by the interaction of the center, Inertia, and the matter state on top, the Inertia which changes the field strength from the center. Now creates different condition for absorption of the different material from above. Darwin theory of evolution in the matter state of this planet, comes from the interaction of the field of the Inertia, and the field of the center of the planet, and whatever it has stacked up. ?? Now the Inertia changes because of the .. mass of the material and the interaction with the field of the center of the planet, creates a new condition for absorbing new materials. If you understood this, then translate the knowledge in the dimension of the STM and interaction with the physicality of the man. Why do we fall in love in different ways,

and why do we give, and we hug, and we kiss, and everything else we do with each other. We transfer fields. We look at each others beauty in different ways, where if you look at the beauty of the soul you'll find out it fits every dimension of the physicality for the observer. You fall ?? of the soul, physicality takes the shape of the eye of the man and the beholder. As usual we have a break for a few minutes . (1:50).

BREAK >>> (1:58).

K- Are there any other questions?

Q: .. with the AIDS virus .. my understanding is you talk about physical and emotional, and the AIDS virus has gone on to the mental plane.. can only be overcome through the Gans or the EU, or ... we have the physical . (2:00).

K- Soul decides on the conduct of the physicality, in so many ways. As you have seen, it's not ironical as we have seen in the past few months, as I said in the One Planet... the reality is that we ... we saw a man ?? lying dead, and he went to the extent of lying beyond, even though he knew he was lying, and in the physical dimension for lying he got a judgment for 1 year. This was typical, he did this with another company, with many other companies in the US. Mentally demented, he always thought if I get ?? what I get .. so it was the satisfaction of the ego fo physicality. He has many 1 Euro things. But this 1 Euro cost him his life. he lied, because of it, while the T was available, he could not touch it because he would proven he has lied. He gave his life, his soul put him there to show, you pay for your disease even, with his physicality. the cheapest life, 1 Euro. So where does soul accept a certain point? (2:02). Is it AIDS, Corona or something else. What does align, with the STP, and the STM becomes second to it. Or is this process part of bringing new understanding of more. Of the knowledge. Or .. someone told me, it's very cruel the way you put it, so many people we see in the past few months, who have lost their physical life, or they have been through part of it, that it has changed their physical life or it has touched them in different ways. Where they volunteer to be there to show a new way. Have they sacrificed their physicality, for what ever shape or form, to elevate, to bring a new knowledge, a new understanding for humanity. Do we only stand in front of the bullet and sacrifice our physicality for what we believe in, or does our soul have the same capability. Man understands numbers, so are these souls making themselves standing the bullet, to make that ?? is it another presentation, we go writing, we go marching. Remember the one man standing in front of the tanks some times ago. .. (2:04). In the west we saw a man, he took the gun of the officer and put it on his heart and said, "shoot." Do you remember in 1960s when they marched against the war in Vietnam? Do we make sacrifices in dimension of physicality, or do our souls know they have to do to make that ?? Is AIDS part of that structure, wasn't AIDS an awareness of totality of what was going on, lawlessness in sexual behavior, if you look at it, AIDS the way you see it now, I was explaining this in the past few days .. if the AIDS would not have come the way it came in 80s and 90s, do you know what was going on in the west and many places, it was running mayhem, the conduct and sexuality. Do you remember the title, what did you said, "sex, drugs, and rock and roll." Too many things were rocking, .. we are children of 60s, 70s, and 80s, we woke up with the music in our heads, as loud as we could. We went to sleep with it, the rest of the day was how to get there. Not necessarily touching the drugs, not doing whatever, but it became uncontrollable. Was it a decision of the soul of humanity, ?? stop it ?? everything stopped from 100 to 0. fear of AIDS changed the mentality of behavior in the west in many people. (2:06).

Q: So we developed the emotional level very well, so to me the future is developing the mental ?

K- No, developing the STM, understanding the strength of the STM, interacting and using it as a new way to live a more peaceful life. We are all structured by our soul, but we take our physicality where our soul was decided for you to be. This is what we have to understand.

Q: There is a good example, one Israeli soldier ready to shoot a Palestinian man, when he looked through the sites he saw himself and it scared him, he dropped his gun and left the army. And I think he got a glimpse of his soul ...

K- You brought something very interesting. As you know we are discussing something very deeply with the Iranian officials of government very deeply in respect to spread of the knowledge the T in every aspect. In the past couple days of discussion there is a very big problem. .. and understanding my point ?? doubly as I believe we are correct. We stand to communicate, (2:08). and to bring the state of Israel into the part of the One Nation, and the Iranian officials to talk with, and it has taken a long time. This has taken a long time for the Iranian officials, especially in the religious side. Yesterday, .. intermediary we talked to .. we work with the Jews who live and are part of the area. We don't deal with the government but we support the Israeli citizens who are part of, the same as the Palestinians. This is a huge shift of understanding. In understanding the STM stands alone and has to be correct. We try to bring peace to both sides. This is what I say, we don't accept governments but we accept nationals. We speak the language of the nationals, that's why we have the U Council. And this is a very fine point which we have achieved in terms of negotiations

for Iran to be transferred to the center of T, but I want my terms that KF and the work and the ethos of us, (2:10). doesn't look at the governments, look at the nationals, look at the citizens. It doesn't matter we are in Israel, Saudi Arabia, Brazil, America or Iran. the important thing is we carry the soul of a nation, not the flag of a nation. And we accept term by term, and we .. have reached a point that we do not accept the politics but we accept the citizens. And as we take the knowledge to Iran to be shared, we will share with the citizens. does not mater speck of race, color or religion. ...

This is something I have many problems with religious groups ...

As a KS we seek the knowledge of the soul (2:12).
the structure we set .. hopefully we'll all be part of

We look at the STM not the color of the skin .

We see changes ..

(2:14). to the STM, and that soul can be anywhere in the U, or on this planet. .. we see the soul of another man in our own soul ..

Weeks ago we gave full support to the new Vice President designated as Harris to be the next president of the US, the first black lady in the White House. And we see the same, another woman will join her as a vice president. As we transfer the heads of the KF to 2 women, it will be the same in many states.

(2:16).

(2:18). WL: .. about today's teaching and I think I understand some secret about 3, 6, and 9 from the teaching you bringing today, you are talking about the soul of the matters, and then soul of the light, and then I think it should be the soul of the primary source, so in each world, no matter the world, the light world. I mean the transition matter, the primary source, all has 3 levels, they all have the same structure, of like Primary source, transition source, or transition matter or physical matter, so each 3, then the last being the light. So 9 is the highest number for the creation and to finish the creation. I don't know if I understand what is correct or not? (2:20).
(Silence .. break of Mr. Keshe microphone ...)

(2:24). WL: Did you hear my question?

K- You were talking about the 3, 6 and 9. I answered you, humanity was not ready for it. How much did you hear?

WL: No, nothing.

K- Oh my god, let's share. In the essence of the creation we share the knowledge and the way you said, is the elevation of the soul, and this time around the elevation will come through the soul of women, as men have failed to deliver. In so many ways, your knowledge and what you shared as a soul, as the 2 heads of the KF, brings a new dimension into the world of humanity. We will see as I said, many double presidential heads of state, as 2 women, because then we'll see the beauty of a lot of things, because they'll bring the soul, the love which is missing in the structure of the creation of nations and whatever we believe in. If you attend the Linz, exhibition, you will see very much physical explanation of what you just mentioned. (2:26). Because in interaction we'll see elevation, we'll see creation, and in that process we come to understand more, that as a common denominator will stay the same, you will see that the soul interaction will change. In totality we reach the soul for the Creator, but you have to understand the process. You have to see to understand the process because man is so physical. And in so many ways, if you put the way you say 3, 6, and 9, look at when you see the Sun, and then you understand how the soul of U Community and the Creator manifest itself within the structure. When we say the soul, it's the energy fields, not physically observing entity. From now on we ?? see the things with, not emotion but inside that they inform the emotion, confirm the ?? acceptance of, the understanding of knowledge which stop coming from our ears into our physicality, and to our emotion. (2:28). From now on, that we elevate the STM, we hear the emotion of the soul as it goes out, to be felt by our emotion of physicality, and we feel it, we hear it. Now it's a two way communication, where we have always been absent and never understood the other side, we always when we heard we created an emotion to what we heard, what we smelled, what we felt. From now on we understand the position without being in the environment to smell, through the essence of the soul which comes from in to out, we smell, we taste, we feel, we love, this is why a new birth has been planned and will be executed that we have access to both sides, both emotions, and the feelings, and the understanding of the physicality, and the other, from inside, that it can transfer to physicality as much as it receives from physicality and visa versa. Then the STP or the STM or the Soul of the Creator comes into it, all become intercommunicated, it becomes the knowledge free, the emotion free, the love free, accessible by all at any point. The new generation of man in the coming time will have access, full understanding of the communication between both the physical side and the emotional side with the STM. And the STM with the emotion, and the physical side. (2:30). This way we can live and feel in both

dimensions of the physicality and the energies of the U. that we can be .. collective energy of both. Do we want to react in the dimension of physicality, or do we want to act in the dimension of the collective fields of the soul, of the energies, which make in the interaction the physicality of us with the planet, or the environment we exist. This needed a specific special process to be setup, and it has all been setup, and it the transformation of the physicality and the soul at the same time. The elevation of the STM is the cornerstone of the work fo mankind on this planet and beyond, and for the created creatures of the U. It's not just for the man. We have to evolve to understand, to understand what is to come. And we will be able to, not to believe in, but we live within collectively. We don't call it a dream anymore, we don't call it a Sixth Sense anymore, .. whatever anymore, because now we know we get rid of all these fabrications, (2:32). fake names, and this is the whole purpose of going through the past years of teaching.

As I always say, I have time, and my patience and my time has created many problems for many KS, because I have time, I wait, because it's like a flute, it's like when you cook, it has to mature, and when it is ready it shows itself. I could react very easy, but I know it is not the time to react, because the process will complete itself. I am aware it is on the fire and cooking, you just see the pan. I know the inner fields of what is cooking, and you look at what is in the pot. It's an old Iranian saying, what I see in the mud you see in the pot, you have to make the pot to believe in it, where the Mother holds and knows what it will be made of, what it will end up to be. And that is the difference. (2:34). In so many ways, mankind has to mature very rapidly, and as we said, we start showing structures, that you see more and more the dimension of the fields, that whatever you want to call it, it's suits you to call it the soul, or the STP, or the fields of physicality, it's all the same, as long as you learn, as long as you move from the matter state into the field state, and then you can manipulate to create. I have time and I have waited a long time. But the beauty of it is, the time is now and has come. Not because we say so, because we make it to be so. To share the knowledge and to elevate the STM and the physicality .. that man understands how his soul is made. How the fields and dimension of the fields of the U, and not matter physicality which man has chosen to accept. If knowledge is a sect, then god help those who have no knowledge. Everything to them is a sect. (2:36). Don't forget it is very clear cut. Those who abuse the soul they find a way to carry on with different ways and names.
Any other point, WL?

WL: .. I have something in my mind when you were teaching, but now I can't catch it.

K- Maybe the soul understood.

WL: yeah it is.

K- The understanding of the soul and the evaluation of the soul and the way we interact, is very different then from China to the West. the Chinese understand the emotions and the fields in a different way then we understand in the west. And maybe as China become more materialistic, it will become more the way the West is, has been materialistic for too long. Maybe somewhere in-between we find the balance, (2:38). both between the understanding of the emotion and the physicality. It's maturity of the man, the time for man to understand both levels of his own creation. We always ignored it, now we have to elevate it, understand it and allow it to be. If you look at it, mankind is like 2 children, and 1 always has always taken over the other, now it is time for both to shine equal.

Q: .. When we are created the soul is divided into two, the STP and the other is part of the Creator, and the elevation is the fusion of the 2 souls?

K- If that is the way you understand it. The STP in the dimension of not matter state, but as plasma, leads to a common denominator fields, we call it, the soul. But the other two are not in matter state, who made this, they're still in a plasma state. So they theirs, (2:40). and what they have to share they share, and with it the create a new common denominator, that with it both can have. We call it the soul. And then as the physicality has an energy source nearby it can rapidly grow in the womb of the mother, physicality encages the soul within himself. In a way it leeches on to.

(2:48).

Any other question?

Q: . work on themselves rather than being locked into mechanical jobs, I am looking forward to this time.

K- What you can imagine, you can create. with the emotion of the fields. (2:50).

Any other question?

R- I am still thinking about everything is done by the emotion of the fields, that's a good one.

K- hope this doesn't take you a long time to figure out how an atom fills the whole U

Q: Water has a memory, does this mean all of the pollution will become part of the salt, or is this different to water itself?

K- The man who said, water has a memory, couldn't memorize himself, you know what happened to him. We create fields with the plasma of the water, and those fields have a strength and a position , and when they reach the point of destination, they release that information, or that energy, what you call information. And not all the atoms of the water can hold on, or absorb, or create that specific field inside them to replicate.

R- So you are saying it's the fields that have the memory, not the water itself?

K- No, (2:52). its fields which are there, and the capacity that they can transfer the energy across without them knowing. In a way if you look at it, we transferred the orange, the taste and the feeling into the water. Now the orange is inside the water, it can transfer back to anywhere. This is the difference, with orange we did once, but now that we created the plasma of the field of the orange, inside that drop of water, and the environment is the environment of the water, now you can transfer this to anywhere, it doesn't need a memory. It's the field strength capacity.

Using Salts in Cup 1 to Make Gans:

Q: Can we use those crystallized salts in Cup 1 and 2 reactors to make another One Cup ?

K- What do you mean?

Q: (2:54). repeats.

K- Yes we always advised that. You can even use it in conjunction with other Gans's for specific position. If you use these salt Gans in like (Zn , sorry) Cu water it enhances the power of the Cu water, or the plasma of the Gans of it, to much, much more powerful, because it is made of it, so it increases its power. (2:56).

Q: Will the scientific paper be able to be copied and or printed in the near future, some people don't have internet access.

K- It has been made that way. The knowledge in the published paper is the right of every man on this planet.

R- But we can't copy or print it, because it needs a password to copy it.

K- It has different certifications, different keys. I think the head of the KF can explain .. or the webmaster ..

S: The .. When we decide to publish it can be done.

K- Now you know when we decide to publish ..

S: .. there are reasons behind (2:58).

Q: .. about the contraindications in the paper.

I wanted to maybe wait on that question. .. a company has come out with a nuclear recycled battery .. in the heart of each cell is a cell of nuclear recycled waste. The Company is called, M?? DB, it uses graphite reactor parts that have absorbed radiation from (3:00).

K- I don't understand anything about the nuclear industry.

Q: ..

In plasma 101 C14 .. talked about this .. I thought it was related ...

Nuclear Waste made into Batteries - Dangerous:

R- they coat it with diamond makes it safe ..

K- Wait . wait hold your horses there. What do they sell this as, in what equipment?

R- to make it into batteries.

K- It's illegal. It's criminal. (3:02). Whoever has put this in has to be taken for a full interrogation and brain to be tested. This was tested, this was done in 1970s, 80s, and now they put a new cover on it. In the middle of last century. .. a Russian did this, and the long term exposure of it, ended up with thousands of people dying, especially women. If it is a power source you put on the watch, definitely you'll die of radiation cancer. It is known as a black diamond. Russians produced this with high radiations, and then they put it in the market, and women who, it was a beautiful thing to wear, a black diamond, but the radiation, even in small doses in the neck created, many of women died of skin cancer. How can they allow this to happen, we have already been there. There is a safe in ?? New York... which still today can't be touched because they put all these diamonds in it, and nobody dares to touch it. This is backdoor to black diamond, Now they coated it and they said there is less radiation then in a cell, but you keep that radiation on the cell for long enough it becomes cancer cell. Once you go into, (3:04). this level of radiation you have to understand what you are doing. But we know this, it already has a track record. It doesn't matter how you coat it, through its property becomes, what you call black diamond. In time the fields will go through. They call one point, you cannot do it with 1 cell. We know very well that diamond under certain pressure and condition, becomes conductive, it will leak radiation. We've done this with South African diamond company, it's a combination of radiations. read the black diamonds in the US, a lot of it has been cleared out of the Internet because of the mayhem it has created. Many women died of it, because when you wear it as a jewelry

or watch or whatever, the radiation is continuous, and the heartbeat has an effect on it. We know that. Just search on the Internet. .. they tried to clean it up, because the claims on it was huge.

Americium - Mr. Keshe Can Absorb Radiation Special Structure of His Body:

Q: Does americium produce Alpha waves?

K- Yes, the reason I use americium is very simple, I am a nuclear physicist, one of the best in my business. Americium used in a specific condition to create a specific plasma, in a specific condition. That specific plasma in interaction, (3:06). with the plasma of the center of the Earth and the center of the U, creates lift and motion. Americium was used for a specific purpose and nobody can repeat it, because there is a code of use, there is a specific way to use it. And secondly I can hold Americium like a sweet, it doesn't touch me. you touch it, you get cancer. I have a specific structure in my body I can handle radiations like water. This has puzzled my teachers at university and many people who work with me in the nuclear industry. I am immune from radiation ?? I can live there. Otherwise, the amount of radiation I have absorbed, anybody else would have been dead. This is the way . I developed this use of Americium because of certain conditions I create and it has a number of hidden structures in it, which it creates and develops. And in a hidden way, I go into cosmic rays. Cosmic rays allows me to interact with any position in the Universe. But what you talk about, we have a history, about mid 90s, we had this, it was known as the Black Diamond Death. The Russians very recently, created a new diamond, which used the KF T and then the people in Diamond Borsch, in Antwerp wanted to understand how this has been done. (3:08). And it took me 5 minutes, I knew what it is, I replicated it in a lab, and I said this is what the radiation, this is done. This is not radioactive anymore. You see new color diamonds in the market, very rare colors. It's done in a very cheap way by the Russians, but they look for a specific materials and then they create a condition of the plasma reactors which I work in, and this allows new colors to come in, but they are not radioactive. These are natural colors that is atomically available in the stone itself, at the point of its birth. A diamond is a "popcorn." When a C hits a high temperature, exactly like a popcorn, it pops. And in that process of the popping, if you understand the ?? a corn by, let's say, honey ?? or different flavor. That flavor is in the atomic gas state. So it blows up in the C while it's blowing, and then it gives a color to it. It's a specific way, if you take that bubble away the stone becomes clear, you don't have pink diamonds ,... Russians who have used Nano T and worked on and understood my papers, have developed, they have actually patented it, to clear new stones, colors which we never knew, and uses the plasma T as what do you call, specific condition, and new colors have been created.

Q: Your plasma T?

K- Yes, because I could decode it within 5 minutes. Russians I have explained .. KF, Russian group, (3:10). who are highly scientific, they use a lot of this T. Don't forget Iran transferred through its Ambassador in Moscow, a lot of my T, Nano T to the Russians. And they have their won scientists to develop. There is a very close connection between Iran Nano T, Russia, and China. And the knowledge which is not given and hidden from the West. Very soon I will be attending a conference and a development of, what we call, development of this T. And it's only for specific scientists, because with this knowledge, it has not been understood by the West. Iranian scientists which worked on my papers and understood it, they have developed as part of it. And it's in the hand of .. and it's shared with Russia, partially shared with the

Chinese. But this Black Diamond graphite which is exposed, is literally making a popcorn inside out. And as I said, we did a lot of tests in Belgium with diamond structure from the ?? beers to see the reversal of the conductivity to resistivity of regressed. I can make in a specific way diamond super conductor, and we done it. It's done in Bruges, in secure level of the Belgium authorities.

Q: Interesting . (3:12).

Q: They are putting it on the market.

K- Yeah, a lot of things on the market.

Q: They are going to have a lot of trouble.

K- Long term, definitely. That's without a doubt. Long term they'll run into. There is another Iranian scientist, nuclear physicist in Brazil, he came out of Iran, he was part of the team of original nuclear physicist, someone I know. And they went for the new compact nuclear reactors, and part of that process ?? look s like this structure. ?? from UN to do it.

Q: When I posted this on Golden Age of Gans. I showed what the radioactive material was, behind the foil, and it stops the Alpha particles from traveling outside the smoke detector. Because of the shielding the smoke detector poses no health risk if they are properly handled. Is that true?

K- Because the important thing for that detector is that the smoke enters into that little cavity, so the radiation, you have to understand, the properties of the radiation, and the environment that you create it. Alpha has a very short distance to travel and it can block it. But still there is a small amount but disappears and ?? displace energy within the detector. And I can make Americium fields to reach from, (3:14). let's say to ?? to New York.

Q: Wow, how do you do that?

K- I developed a . I am a nuclear physicist. It's the game you play. You see what happened, the Belgium's calling me a terrorist. What the Belgium's did systematically, setting up my Internet during my work, they approached every nuclear physicist who worked with me, threatened them, and they become a terrorist, even close friends of mine from university, they were pushed to that point, because I was teaching freely. I am the only scientist actually in the space T and is banned from NASA space Chat rooms. Because I was teaching freely and they couldn't understand, and they didn't want me to disclose. In so many ways, if you understand it, with the Gans's what do you do, you put a Gans on one side of the body, and you put on (other) side of body, you transfer through cm of fields, very weak. Now you give me Americium, I can expand it to anywhere I like, at the strength I like. I am a master in nuclear, and understanding of nuclear field interaction.

Q: .. Americium puts out Alpha waves, or fields.

K- Particles, energy fields.

Q: And these are, aren't they the weaker of all the nuclear sources?

K- Yes,

Q: So when you are saying you are putting a weaker and a stronger on both sides of say, pain in your tissues, this is the ideal of also .. sending it across whole nations. .. (3:16).

K- You have to understand, the terminology of the field strength of the radiation. You look at the radiation in a different way then I do. I create radiation at the point of need, at the strength I need. And that radiation is a cosmic ray. It's not a Gamma ray, X-ray. and in the spectrum of the comic ray, the fields you need for a specific effect are always available.

Q: I am not following Alpha particles ..

K- You can produce in it, you see it's not Alpha particle, it's the energy of an Alpha particles.

Q: ?? like a plasma.

K- Yeah, it's a plasma fields, I create that plasma of the fields, not the matter state of the fields. This has been, as I said, a master in your work. We understood this very early on when I was in, before university, because I actually built a reactor as part of my project that they let me into university. I built a hand held specific plasma, Alpha radiation, Beta radiation in a green box with a handle on it. Not the present radiation detectors, at that time I created the first plasma detectors of the fields. Not the radiation detectors.

Q: So you could measure the plasma fields with that?

K- Yeah,

Q: Has that come out on the market or has it been shown at all?

K- No, it was somewhere in my fathers house when I left, 30 years ago. (3:18).

Q: .. a useful tool.

K- In a way you can, if you set your mind, it is very easy. It took me as a project 3 months to build it. As I said before, I am an engineer, not by going to university, from mathematical, theoretical, I am an engineer by physically being trained by it. So we see a lot of other things.

Q: I remember you saying when your PhD diploma arrived,

K- No, when my first degree arrived I stuck it on the toilet roll. ?? my mother ?? crazy. It arrived about this time in August, June, July, and I still see my mother's face. "oh, my work, all the things I have done for you to become, now you put it there." I said, "that's what it is worth." I don't know if I told you a story. Have you heard of the China Syndrome, the movie? .. When I was just before going to university this movie came out. My mother never goes to movies, as such. .. we are going to a movie. ... I thought it very strange to go with them ..

You see, you want to do nuclear, this is what's going to happen to you. They are going to kill you. (3:20). Why do you do this. ..

I said Mom, this is my love, this is what I want to do.

She said, " don't go, don't do, I don't want you dying for nuclear." And then so many years later when the Belgium's tried to kill me, I said, my mom knew.

I am glad the F is cleaned up of the bad side of the Belgium's. .. we have gorgeous Belgium's too who are devoted to the F and I respect them. The bad apples are gone, one died and one disappeared.

Sharing Technology with Iranians and World - CIBURU:

Q: .. is it still in the process the making of CIBURU the making of the nations?

K- This is part of my work with the Iranian government. you know me I am a doggedly worker .. this is part of what I said, this is part of even yesterday negotiating, I will not transfer my whole T to Iran unless the space and defense part of it is original, and nations of the world are part of it, the Americans, Russians, Indians, even the scientists from Israel, as citizens, we scientists we can still negotiate and talk. As long as the undertaking is given, is not used for anything but development of space. (3:22). There is a lot of top negotiations going on in many, many directions. Transfer of technologies to Iran is not just a walk in, because I am Iranian. I secure the ethos of the F in many of the negotiations. Our knowledge has to be the backbone for creating peace and equality, in being able to use, not equality in everybody can have everything they like. Equality of knowledge can be shared and used by everyone, at any point. We agreed to most of

it. Now we are waiting for the new American Administration. I always can negotiate with women, let's see what she does. Anyway thank you for all your work Mark.

Q: Thank you for yours and pleasure to serve.

K- It's a good time coming up I really like to thank all the KS around the world to keep this going and sharing the knowledge. And as I said, our enemies work to our benefit, and it's very nice with what I seen this morning, especially what I told you, this pedophile group because they lost their income from abuse of children, and their master now has dying, and the other one is in prison, (3:24). they tried to create more mayhem and they shot themselves in the foot today. We'll see how the response will come from the ?? Ones who actually use the T, we have no problem, but the ones who abuse the T, to benefit themselves will abuse themselves with it.

Q: .. regarding the Deep State, there seems to be a global reset coming. they call it ?? gisara. and nesare for national ..

K- We have to go through it, we are going through it, because we cannot support it. It has be redesigned because you have to understand, millions of jobs have gone, it cannot come back. This has created a huge economical problem for the governments. They worked on the GDP increasing and increasing national by keeping employment. We are back 20 years now. And many jobs are gone now that cannot come back. and big thing. To restructure banking that there are no loans, there is no backing, governments can support their nationals to be, we can still use the currencies as we have. One of them is, we see it, it might happen, to unified military system which means everybody uses one currency.

Q: This is backed by precious metals? (3:26).

K- Backed by the effort of the humanity. Now with the new systems we can produce any metal. How many kilos of gold you want. So it comes by accepting social structure that we all live comfortable. We all live with all the basic necessities of life. There is a national, but globally we see on the horizon, as one currency accepted worldwide. Euro, Dollars, will diminish, will go away. I have put the suggestion to those who work in the background to use the Keshe Coin, because we kept it as one. And it is a long process, will take another 5 to 10 years, that we go for a single monetary, but with Corona it might come forward. We can't have dollar, Euro, Yen and the others. We bring that each man has to have such a level of living, and all the governments strive to reach that for their citizens. Then the nothing has value. Effort for creating comfort for the citizens becomes the value for the life. So an Indian on the street has enough to live have a shelter, as much as an European, American or Chinese. And then in that process, we allow you to live. We take the social security out of the structure. You are not given the minimum because government cannot print anymore money, you're given the maximum to live a life, and in that process 5 to 10% will abuse, the other 90% will build on the assets of the humanity. This is what we see, and the process is in that way because once we can produce all the gold, we go to Bitcoin. Bitcoin is now play games. (3:28). But that has to be available to all of us. Other problem is as we advancely educated in space T and ready to go. How much will they pay us on the spaceship if we are traveling to Moon or Mars or to another point in the U. What happens with the family left behind you have to progressively make sure, I devote my life to the expansion of the understanding of the knowledge of man, and the mankind looks after me. We don't become the citizen of One Nation, we become citizens of this planet. And we all enjoy the same. Not by equality of everything. When you have equality, you bring a stagnation. We bring a level of comfort at the level of need by everyone. Now we have T, we don't need to live by the cities. We can live by the, anywhere on this planet. Some of might choose I want to live on Moon, because now with the new T up in the next 10

years, position is irrelevant, comfort of life is important. Maybe I'm a farmer I can do something special on the Moon with what I become a farmer on the Moon.

Q: In America there is this problem with this idea of socialism and unifying ..

K- We don't go socialism, it never worked. Socialism doesn't work. It's we gave you enough a room and then we decide what we give you. Communism, Socialism, even Democracy has failed. We always say communism.. have you seen how many people are on the verge of poverty in the West. We seen it in your disasters. (3:30). American citizens living worse condition then the Africans.

R- Right at this moment a hurricane heading to

K- What will we see in a weeks time, who will help them with the Corona and the rest of it.

R- Some people can't get on buses because they tested positive .

K- So they have to die .. in their houses under the storm.

There is something that came out from a few KS, the damage done by the situation even in Italy, where what they did with the KF there. many died because we could not help.

We could (have) helped to save , like we did in Iran, we saved many lives. These people are responsible for the death of these people. The same in US, if we didn't have this mayhem the Belgium's created, with American KF Arizona, we could have expanded everything else, then every citizen (that) had Corona, (then) no Corona. Even if we would have expanded the knowledge, we have a hurricane, we seen what happened in the Caribbean islands. Why don't we set it up. This is what we are testing with the Chinese. .. we see it in the background what they are up to. Why do we have to run away from hurricane, ... we create environments where we can cover. (3:32).

Those people who have done ... now we put the governments against them ...

they are responsible for death of these people. Why do you think the Belgium's left the F for betrayal and adultery. They did all of it, and they are responsible for the deaths in Italy, because we missed it. The same in America. This is, it comes to the balance of the souls, and the knowledge of understanding it. And we share the knowledge. In America, John has been there investing so much money ...

We had one rotten apple which was sitting at the core of KF, and now it's gone. And you see the change. We should have been there, KS to save life. To give the opportunity to save life. And it's not there, and the guy dies, who is responsible for it, those souls who set the scene for their own business. Once we set the scene we'll bring you to understand how much damage has been done. (3:34). they thought they have somebody at the top of the KF, they were working, but we were watching.

Q: .. in Texas it could damage our ability for oil and gas production. ..

K- We have to see what comes. ..

maybe it will be a turning point for change of administration, incompetence to deliver. There are a lot of things accumulating to a given position around the world. We see it, I sit outside. We are going in a very good way, all these little ticks are needed to get to that point. It's not all bad news when you look at the totality of it. It looks bad because we take case by case.

We are heading in a very fine way to a humane society and this is coming. ..

we need to unlock nations to currencies, and in doing that governments are learning . (3:36)

We have to change the structure..

(3:38). And then we pass on. There is a need to show how we get things done, how we bring change..

The KF in Iran has now produced Zn on a sound basis .because they followed and understood ..

(3:40). K- America is a small producer, but on the other hand the oil industry has collapsed. The oil Industry has totally collapsed 6 months ago.

So many cars on

the ships on seas are biggest polluters .

Q: This will put Iran with

(3:42). there are not enough customers. One of the biggest users was jet liners.

Economical pressure from Corona is building up ..

Q; The patents put a price on everything.

K- with the Iranians the T stays open.

gradually the patents end .

(3:44).

Europeans want to use the T to enslave the world. .

(3:46). Q; We constantly see reports about superconductivity at normal temperature haven't achieved.

K-

We might make an announcement as early as next Tuesday.

Q; So room temperature superconductivity they are not recognized by mainstream ..

K-

Q;

K- But the thing is you produce it, N materials .

Q; We are way ahead of them

K- We are not way ahead. We have opened a new knowledge.

(3:48). There are many who want to take control of the KF to block ..

Q;

K- We keep it safe as the KF

I'll open the books about how

KF was betrayed at the root of it

Q: Did NASA take some of the Gans T?

K- They are working but they don't understand it. They are using part of it.

Q: So they are developing N T and using it for Transistors (3:50).

K- It's not just them. Japanese are doing it, Chinese are doing it, the way I showed how to make N Cu, now is used on the gold sheet and dissolved back underneath..

I have seen the books on it.

We have given international exclusivity on broadcasters , (3:52). that Fox cannot touch.

We'll know next week if it has been accepted.

We have gone another way then Fox

It's very interesting to watch how this will come out

I hope the main teaching of today, the Soul of the Light, and if you understood that, with what is to come, and the ?? birth to come, you'll understand a lot about what this means. It's a change, it's a point of change. The Soul of the Light, is the Soul of the Creator, if you understand it at the strength of, not belonging but in Transition. no to the physicality, and no to the source.

Thank you very much and maybe one day I'll show you how to make that ?? soup .

(3:54). 343 KSW
