

344th Knowledge Seekers Workshop; September 3, 2020
Unveiling Universal Enhancement Units Linz Austria
Brazil group division

ENGLISH TRANSCRIPTION

(:10). Today is a special day for the KF and those who follow the KF for years. Today we break through and open the exhibition in the city of Linz, to show the first two Enhancement Units (EU), one for production of materials and one for the body EU. We will go through this afternoon, we expect some dignitaries to join us. On the other hand we spoke inside the KF and we came to one conclusion, we are One Nation, we are as , we set up the structure to be as one internationally, in a way the KF and its followers become the government to see. For this reason after the break we go live. You will see the systems live. So if you have anything you would like to see, because we are answerable to you, the KF followers and not to anybody else. We govern on the basis of peace and equality, and on the basis of sharing knowledge. And who else we can better share the knowledge and the achievement, (:12). on the back of all the success, but you. In this case, because of this we are setting everything up that in an hour and a half or so, we'll take you live inside the exhibition. You got to realize there are many factors involved in the exhibition. There are no exhibitions as such held in Europe anywhere at all, due to Covid-19, due to Corona. Holding exhibitions has become a forbidden things .. we are the first organizations holding an exhibition in a E center for months. So we have to follow many principles and guidelines ...

It has been a challenge to produce these systems .. to take man to space. What does this mean, the systems we show today for the first time, man becomes independent of everything from Earth. (:14). We don't need to look for medicine, materials, for food, O, or anything in the space .. these are the first 2 units which will set the scene for new space era. Which means mankind will become totally independent. We can take into space and travel the depth of the U independent of the Earth. We have become, in so many ways, we are born to a new era. A new era of space T which is the title of the exhibition, which means mankind from today by showing these technologies becomes, in a way, a new child from the Earth, which will be born into space. The mother Earth gives life to her children to take into space, into the depths of the U, and this is the first delivery units. .. we start going through the process of new way of looking at space T. .. on the principle of universal order to take wings without worrying about, would I have food, would I have shelter , the defense, the medicine that I need. anything. These 2 units next to each other will bring a completion to the whole of mankind's dream of deep space travel. (:16). One of these systems can be set to fly. I purposely set these systems to show the first flight system in the coming weeks. System is set to behave as Earth, to create lift and motion. I showed this for the first time over 12 years ago, about the same time to the office of his eminence A K of Iran and that time president Akmad S, who hide and stole the T, and in that way Iran became hidden knowledge of the space flight. Now we bring it forward as KS, as people of One Nation, One Planet, On e race, we all will see the system, we all will go through it, enjoy the pleasures of the first steps, what I call the first crawling steps of man to endeavor to open the space for mankind. We are proud to be the first passenger of the space from this planet. In so many ways, combination of what we have taught, did the first plasma reactors built from 12 - 14 years ago, first in Belgium, then competed in Iran, then tested in Belgium,

then transferring the understanding of the plasma T conversion of the materials from matter to Nano, N to Gans, to become the new energy sources for us to understand the play game of the fields. This was the purpose of the Gans T, for mankind to have something to play with, to test with. (:18). To understand how fields interact with in the U. And in that process, start learning the process of interaction, living in the depth of the space. We went from material to N, from N to Gans, from Gans to field transfer and energy. So we have learned the process step by step. Now with this process, these two machines, which will be shown, we actually shown the working combination of this in China some 3 years ago, which was built in the city of Sanya, we tested with the Chinese team, the original structure of this machine. How we could create energies, how we could create conditions of plasma in the liquid depth of the U. We replicated it, we learned a lot, and thanks to David in China, we brought the knowledge forward by decades. In so many ways, .. allowed us to take the next step in being able to build systems that we can walk in to take energy, food, to create conditions for enhancing the body of the man, from the energies which absorbs from the depth of the space.

By the knowledge and its principle, as we have shown man takes 80% of his energy from his environment, not by food, but by absorption of fields. Now we'll release systems, with combination of both systems, not only we can produce food the way the man needs, and materials, we can produce at the same time food, (:20). You feel like a banana, mankind should be able to create not only the taste, texture, emotion, but the energy of the banana. In so many ways, we have broken through to a new era in the space T.

I am sure by the time the rest of the units, gets delivered into AZ, Canada, Thailand, Germany, Austria, and hopefully in Brazil, in the next 2 to 3 months, that now we learned and developed and we fine tune many aspects and T of these machines, then we endeavor to use this T to bring peace to mankind. In a way the next generation of the new systems is on the way. ... this is one job done the next one is on the way. You'll see the generation of the systems which will be developed for individuals at home where you can do everything you need at home. We endeavor to produce systems where people can walk in at point of disaster, that they can be fed, injured, they can be repaired. They are hungry they can overcome the hunger, but in a process we can do mass feeding. ..

I already have designed the next generation, and once these complete in the next couple of months, we start delivering, (:22). large amount of orders which have come in, and signed agreements for many, many. we'll start developing the next step. Single flight system. single systems that can fly the depth of the U, or we can travel on this planet with no problem. Now that we have put these 2 systems on the ground and can be seen, there is no more dreaming. The reality is with us, and the beauty of the T is with us, In so many ways, once we open the videos for you, after 10:30 the world can the leap in the knowledge of the science of the space T.

Today is a glorious day for all the KF followers who have been around us for a long time. They were hoping, their wish, and now you can see the collective fruits of all our works, every single one of us in one way or another have contributed to the development and the spread of the knowledge. And now that we have reached this stage, we will see more of, we will see many ..much more, many of you will join us in the space T development. We'll see the extension to the knowledge ... The beauty of the

new T, (:24). is the simplicity of it, which means any one of us can reach the point of knowledge. It's not exclusive, it doesn't belong to no government and sharing the knowledge so freely .. we'll see the beginning of a new space race by many governments now that we show this ..

Jet propulsion and all their fancy work, has been a step for us that we can live in the space. Now we show the reality, how it is done. how completely we have achieved the knowledge. In so many ways, what we were afraid of, we have achieved ... it's a big leap ..

(:26). to people who have been waiting for mankind to take this step. .. this is one of the biggest changes in space T, and in coming time our children and grand children we make Earth habitable for others who could not be part of us, to join us, and the same time let's us become part of them, for we could not join them due to our lack of knowledge. The structure of the man is very weak, extremely weak, so with this T we give you that support, that extension to be able to live and survive in the depth of space.

My congratulations goes to China , WL ...

(:28). On the other hand the thanks for this achievement goes to all of you in keeping the F and the work of the F internationally live. .. **it's been a collective effort of the KF worldwide .. to break through. We have no links with no government**, we never took a penny from a government that they could dictate, and at the same time we gave the pleasure of the sharing of the knowledge to all of us, every individual making Gans's producing system that can save life.

We lead the way with breakthrough science ... We have broken through.

Most important thing today is to show the T, not to the world leaders, but to the KF followers as One Nation, we build it as One Nation we completed it.

We will show the flight system. .. One of the most important criteria of this T is, (:30). The most important part is that we stayed independent, independent of any government. We took nothing from no government, and we stayed independent. And this independency has given us a lot of power. **We can negotiate peace on our terms.** We can negotiate national food security on our terms. We don't need to wait for harvests. .. We see

(:32). This is the first step to create One Nation

We have one problem down the line,, how the world leaders will stand for this. How would they commit themselves to peace.

Are there any questions? (:34).

Q: Are there ways to reverse the DNA changes due to vaccinations?

K- The position with what we call vaccination, change of (due to) vaccination, is something that has to be developed, can be done, in the coming time. Yes, it can be done. Everything from now on is possible. It depends on the knowledge of man, and how much mankind wants to take that step. There is no limitation anymore unless we put the limitation on ourselves. What I call genetic modification of human gene, to correct itself to original state is possible. It's not a dream anymore. And how our leaders in science and T

The world of Chemistry, Physics all has changed with this situation. (:36). Now we have the possibility to explore new ways in science ...

You see how beautifully versatile they are ..
they can produce a combination of emotions, material, effects.

(:38). It is part of us, it is part of what we want to achieve
It's possible to change any dimension to what I call, gene, or any gene damages.

Divisions Purposely Being Setup in Brazil Groups:

Q: .. From Brazil, my question is because people here in Brazil question technology and defame their work by inducing others to see it as a threat, this occurs within the groups themselves. What does Mr. Keshe have to say to these people?

K- Nothing, what happened, .. as we always said, many, many groups, many people use the KF to confirm their existence. They don't existence if we do not show the technology. And we know what is happening, we see what is happening. We see the way people are moving around with the technology. It's in a way, we know how people take that kind of a steps to confirm their existence. Let it be. they have to, why some people turn ugly, because by ugliness we notice them. We pay attention to them. We satisfy their need to confirm their existence. We have seen this how many times. Don't be bothered because at the end of it, (:40). the technology has come to a position of sharing knowledge and with it we share knowledge freely. We have seen many people, we've seen the guy from Germany, who went backwards, he wrote to every embassy, and signed under "X," what did he do for us? very simply we took the knowledge to the Austrians free. As we announced on Tuesday, we announce it again, the exhibition is absolutely free to the citizens of Austria. At the same time we compile all the names and whoever they are, and in due course, KF will allow them to become and work with the factory which is getting setup in Austria. Now that the system is shown, these are pre-sold, advanced sold. So now we create the jobs, we run as a governing, government, we don't run as what we call, a fringe organization. So those people, they put the effort trying to block many things. Trying to what do call, bring "all sorts of things" to the Foundation to the other governments. What do we do? We took it to the nation, now you will understand in the coming weeks, all those who visit, Austrians, in this time of trouble, are what we call, Corona and so many jobs lost, (:42). There are 2 to 3,000 jobs plus on the card, on the table for Austrians. Do you think they are going to listen to a bunch of these people.

We have seen in Brazil, the reason .. Let me explain to you what happened in Brazil. In Brazil we had 3 people who hijacked the KF, one was the UC member of the Portuguese language from Portugal. Then we had one lady who threatened everybody, and we don't see her much around, because if you want to speak to Mr. Keshe you have to speak to her and she makes decisions. And then we had one guy who we gave a platform to speak at a conference, and now he thinks he is god, and he has done a lot of dishonorable things to the Brazilians and we wanted him out of the KF. And he walked out himself, he started all the mayhem. He is a disgrace to his work, because he used the KF to do a lot of funny things using the universities and everything else, and everybody

realized what he is doing, now to cover his misconduct, he is splitting the KF, but the KF Brazil will not split, because of one misconduct old man. On 21st of October we have an online Zoom conference with many, many thousands and thousands of KF followers and the government officials in Brazil, as Corona doesn't allow us to travel as such. And so don't be worried about it. In Brazil the gentleman who started this, he did a lot of wrong doing to a lot of people and when he was discovered he blamed the KF. Mr. Mendez (??) has a huge problem, and he is the guy who is splitting, because he has, I think he has a couple of court cases which he tries to bypass too. (:44). We have another guy listening. So we understand. Don't worry about what happened, with people trying to split. The technology stands, millions of people follow it. It's such a big family, extending so big, you always find a few misconducts.

KF Brazil is solid, and last week, you had 1 hour in your national television broadcast about the KF, which was done by Rafael. And then 2 popular requests was shown for the second time the following day, which shows everything with the Gans's and how people can help themselves with Corona. In so many ways, the number of the number of the KF following the knowledge is increasing everyday in Brazil by hundreds, by thousands everyday. There is every week 1 or 2 interviews and all these have become, because of Rafael. We have established a company in Brazil. And these people wanted to be the head of the Foundation, and do all the crooked business behind it, and they didn't get a chance. That's how they tried to split, because as you have seen the misconduct, they wanted now to carry on with the same thing in other ways. And Rafael as a correct follower of the Foundation ethos, stood his ground, and they could not rob and steal, and do whatever they did, and do whatever they wanted to do. That's why in Brazil it is just one man, and he tries to do, because go and see his misconducts, which we wanted him out of the KF. Mendez (??) was brought in by Caroline. All these people who you see damage the Foundation have been brought up by one person. And now one is gone the rest will follow. (:46). These were the people who were embedded in the Foundation, by those who were close to us to do these damages. And now they try to do. We'll see this in 2 or 3 other countries. Do not worry about it.

France and Germany we support solidly, I have asked the Dutch team which is the home base of the KF, to organize for me to give small lectures, 40, 50, to 100 people, 2 - 3 of them in the next couple of months. I'll go back to Holland, it's the home of the Foundation, and this is where we found the strength, and now we go back to Holland, where one of the first places, what we call the "fireside" teachings took place originally. And the Dutch team has supported us solidly, the same with the Belgium team. In respond I have asked them to setup a small conference, not a conferences, the way we used to do, fireside, 10, 20, 50, 100 people, we used to discuss, we used to teach. We go back to our roots. And this is where I feel at home ...

(:48).

.. Don't worry about it, Brazil is growing very fast. Just go and see what happened on one interview on a main television channel in Brazil with Rafael. These people who create division, these are the people who wanted to be on that seat and in a way, no one deserves that seat more than Rafael, the way he has conducted, the way he is running the teaching, and the way Brazilian team is growing by ?? strength, day by day. Stay solid and do not look at what a few does, and what they do, look at why they do it. Then you see if it goes with our work, if it sits with our work. Those divisions in Brazil came

because Rafael stood solid, the way it had to be done the correct way, in constant contact with us. (:50). And they didn't want to do it. They were setting up different ways of doing things and he stopped it. And now they are leaving, we wanted them to leave as usual, we don't ask unless they really do something totally wrong, ?? tolerate that they grow. And the left. We thank Mr. ?? Munis) left the Foundation. Because of massive misconducts. And they came on the back of an introduction of a Belgian.

Q: .. I am hearing your answer and I know who each of them are.

Q: Is it correct to say the creatures of Earth have until now been in the womb of our mother, and that now we are born into the Universe to live independently, beyond the atmosphere, if we wish to do so?

K- .. yes, the answer is yes. Of course yes, now this is the first steps. These are the first steps we are taking to reach that point.

Q: A very happy birthday indeed.

K- Happy birthday to many of us, this is the birth point of knowledge and T and we all knew and we have been waiting for it. We all understood it, and we have been waiting for it. (:52).

Q: .. the soul of each one, they have a name, how is it assigned?

K- You mean the systems? **We don't give names to souls. I pray for them from the time when the design, and when the reactors are loaded a few days ago. These reactors are loaded in a way that no one can copy.** And they work so effectively that no one can copy. They are not usual. Many people will try to do it. These systems work on what we call, the heartbeat. They work on the principle and ethos of the Earth, the Sun, the way our life was create, the way we will see the next steps of the development of the human body in deep space. In so many ways, we need to understand how, and to what extent we understand the whole progress of the knowledge. (:54).

Q: Is there any special word to communicate from the soul with the STP?

K- I love you.

The Technology is Already Being Implemented Car and Phone Batteries:

Q: .. Is the T being implemented in the motor car battery for recharging continuously?

K- The battery operation is already partially used in Tesla cars. The Nano T, the concept of N T and plasma T is already used in many mobile phones you use. As I said if you listened to some of the teachings before, we didn't now this. .. I met a Chinese woman who wanted to meet us as a KS, (:56). and in trying to thank, in us trying to help, her knowledge helping her mother, she used the Gans T, she told us, she is part of the Erickson research, and this is how they developed many of the new batteries, and this is how she knew about the KF work, because it is used in Eriksson batteries, 10 years ago. A lot of the knowledge used, because we use open source, scientists from different organizations are taking it up and using it. This is the beauty of it. Many parts of the T is used by different organization because we went at open sourcing. You will see many things, many people will come up with new products as a spin-off of this knowledge as they add their knowledge to it. And in the new generation of what we call batteries and power generation, you will see many, many additions to energy production. Yes it is used, the space T. NASA is working heavily to ?? decipher the lift and motion. We know that because, as you know I am the only Iranian nuclear physicist who has received clearance by organized security, (:58). and by NASA lawyers to enter NASA

"black budget." They will not do that to you if they did not have and they were not studying the T. You will see many implications.

Corruption in Iran and Securities Help KF:

Today I was watching an Iranian physicist, he is a bio-physicist, he has used our T of the plasma has made an air filter system, which in Iran again office of Ayatollah refused to grant him a license. He has taken it to Turkey, and started the same T in Turkey, and welcomed by the Turkish government and they start mass production. We have a huge crisis in Iran, the bribery and everything which goes with it, in the offices of the Ministry of Health. We are not the only group which is blocked, we've seen radical changes in Iran, if you were in the Iranian listeners on Monday. A lot has been cleared in Iran, there was a group which was trying to hijack the T under the cover of the leadership. But now that we exposed as by the request of the Iran security people who came live online on Monday and confirmed the logo of KF ??? is a legitimate organization in Iran, Where they were telling us this is not and other things. They were trying to abuse their position to steal T and then legal action by the government in respect to these people has taken place and they follow. A lot of people will go through this phase, misconduct of their own. They'll go that way. And the .. 2 people in Iran security apparatus, (1:00). they asked to be live online and explain to the Iranian KS that the KF is a legitimate organization in Iran and respected. And were are taking the T back to Iran. Governments who understand what we do for them they stand by us. I stay loyal to my nation, and to the Iranian leadership, and to the Sepah, on the development of the T for space, and supporting the Iranian sick and needy. The same will stand for the rest of the nations. I do and I support the whole 190 odd democracies on this planet. To me it's One Nation, just different parts, different mentalities. something a lot of you have to realize, being born in Iran, living in England, in Italy, Belgium, Africa, in China, to me it's all one family with different beauties and this is how we look at it, and take it, I cannot be biased and to one nation or the other. Some are a bit crooked, some are a bit straight, some of them try to do crooked jobs, but at the end it's a big family. 7 billion with 7 billion ?? and we got to embrace all of them. (1:02).
Any other questions?

Q: How big are **the home systems**. .

K- It will fit in a cardboard

(1:04). Q:

(1:12).

(1:14). We don't extract, we give the condition for position.

Q: .. I want to help humanity through the KF, ... this is a dream I want to fulfill.
repeats ..

K- The help will come in a very simple way, (1:16). just teach. Open sourcing and teaching will bring what you are looking for. And that is all we can do. We don't expect anymore. We got to carry on the way we done, teaching .. thousands and thousands of people join the F, understanding the T everyday. and very few will go with different ways with it. We have to understand how we teach and what they take from it is their own structure. Our job is to teach freely. In time they will use, and we don't know how, and the way it will be done. You cannot dictate. this is a child which we nourish as

knowledge and we let it loose to take span in the soul and brain of the man. And this is the way I always looked at it. (1:18). Is to sow the seed of knowledge.. Just teach the way we do today. Today is a special day ...

We don't show the dignitaries who come to see. Because we don't go to show. We have never been here to show. The team of buyers coming .. they go through the same process.

(1:20).

Never choose what to teach. teach then they choose themselves.
Any other question?

Q: how to decalcify the Pineal gland with plasma?

K- Speak to the doctors of the KF they will be taught.

Q: So soon we'll see international flying cars.

K- Yes, if there are not crooked people in your structure to stop it. Yes.

(1:22). In Belgium, the agents of the devil. they said, do you have a flying license .

The car was there, available 9 years ago.

Q: Can the system be protected from misuse

K- Inherently yes.

yes, because it works on the beauty of humanity. and it is there for man to see.

Q: Will there be any patients today. sit in unit (1:24).

K- No, nobody will go in the systems

These systems are enhancement unit not to be used for anything else.

Any other question?

Q: ...

K- Your welcome (1:26).

Q: Does our body represents our solar systems .

K- We are a copy of the Universe, and Earth is a copy of the U, and the solar system is the same. So in essence we carry different parts of operation,
But it is adapted to according to our knowledge, to our understanding , or what our needs are.

Q: What is the difference between the animal stacker and the vertical people stacker, is it the same middle plate but soul at the top, and plate at eh side and soul at the 3rd position?

K- It is how you want it to be, and how you set it up, and what is the wish for. (1:28). you create for the STM, or you create for the soul of your dog

Q; Is there a point on Earth where there is dark matter, anti-matter, and matter, where the spaceship can devour? .. like eat, SS can rejuvenate?

K- In the cell of the body of the man, every cell of you has that power. If you understood the T that's what it is, (1:30). part of the T. The systems we have developed is part of the understanding of this.

We are going through the phases of completion in the next 30 to 40 minutes we'll go live on the platform of the exhibition. That's one of the things happen last minute as usual and then you'll see the system. We facilitate everything possible ..

R-

K- After the break there are a few pieces .. (1:32). The whole thing is planned for the 2 o'clock opening,.. last touches most important. (1:34).

Any other question?

Q: how does plasma react or correspond to different surfaces, such as granite .. mirrors and rubber?

K- It's a matter state, and reacts exactly like every other things, it reacts like our body. Repeats .. (1:36).

K- The same as it attracts with everything else. . .

R-

K- is the threshold of the field transfer. What does this mean, above that will pass through, below it we can contain it.

Even a metal has the same property, it's the order of the magnitude. (1:38). If it is stronger then the existing one it can hold it, contain it.

R- N coating good to contain the plasma

K-

Any other question? (1:40).

Q: Can pedophiles, rapist fully rehabilitate themselves with plasma?

K- Yes, if you go back to the teaching some time ago. .. when the time comes the man embraces this T fully. there will be no prisons ..

(1:42).

Q: I built a dynamic reactor health ..

(1:44).

K- I don't know I am not there so I cannot explain. So a lot of people see things and they want it to be explained,

(1:46).

(1:48). Any other questions?

Q: Can the system be used on animals?

K-Yes,

(1:50). Any other questions/

The new space era, as we call it, is a T which will become a part of the life of every man, (1:52). and we will live this life. We will enjoy this life immensely, because we have chosen a new life, we have chosen to be part of totality of the structure of the U. Mankind is taking a known leap, not an unknown leap

it's part of what we are born with, what we live with, it is part of us. We are so used to it, we do not see it, we are so much apart of it we don't appreciate it, we are not aware of it, we chose not to be aware of it. (1:54). We live through its operation , we breath

through its operate , love, live one way or another we have to come to understand the totality of it.

(1:56).

(2:12).

K- The question I want to ask you is in a different way. How do you see the new T will change your life and the life of your children? What is the difference now that you know so much more. You are the cornerstone of this T, you are the developers of it. In one way or another you have developed so many parts of it. (2:14). .. parts of our society that you want to encourage. Is this part of the T you want to enhance? Is this where you want the humanity to go. Because from now on, the way we have structured this T, and the understanding of it is an open source. Whatever you develop will become part of what the future mankind might use. How do you see your emergence, your game play in this new game. From now on, it not anymore KF, it's you individuals who develop this. In so many ways, now it's a collective effort of all of us, in what we decide society to do with ?? this. Because .. once we collaborate with leading nations, who will be here this afternoon, they will decide the future of the destiny of mankind in the space development. We have ambassadors, attachés from the leading nations in the world with us, this afternoon. They are the power in the space development, they are the decision makers where man will take the next steps. (2:16). ... they decide. And what will they decide with what they see. Plus they already know the T.

This exhibition is to change the course of humanity and with it will come new rules, regulations, new parameters, new understanding, new work for many of our leaders, who didn't know how to lead up to now. In so many ways, the beauty of the T is in its application of bringing peace and .. for us to be part of it. We are the generation which will say, we were there, we were part of it, we made the first Gans's. We did the first thing with the Corona.

One of our main aims, targets, (2:18). is one point, and one point only to let the world decision makers know, the game of space, of how they behave towards their citizens, behave towards their the rest of humanity, has changed. We need to show the T in it beauty, and the T has taken a new course. They lead us to this, many scientists, and now we lead the world to a new dimension. I remember when the Berlin Wall came down we wanted to be there. And what we see, world scientists want to be part of this. it doesn't have to be in one place. They take the knowledge from the Internet, from every one do us and they develop it. In so many ways, the Corona and gap in the knowledge was needed, that we all step into an Era of science and T. The mankind when it comes down to the Corona will start looking for new ways. (2:20).

Q: .. you previously indicated that **man's self-awareness of his soul is the key for solving many dilemmas of the man, but it can't be taught**. ... repeats .. so how will the billions discover more, what will trigger their search. In what way does the Covid play a role, I am sure it does , can you take us to deeper understanding?

K- I think we will all mature in different ways, gradually to it. We all don't become space scientists tomorrow. We decide we decide in what to take from the knowledge, and ... we establish a new order. Man will let the STM decide. The knowledge will become so free that all of us will have access to it. We have shown in .. the free patent world, in the dimension of (2:22). free access to knowledge and T, how you all have

shared it, how we all brought it in. Is the knowledge of the man part of its transition. Now we evolved as much to understand the physical world, now we go through the scientific revolution. We went through it in the 50s and 60s in electronics. Now it's the world of plasma, Gans T, understanding the uniqueness of knowledge. Then we take the next step and see where we go. I think today's presentation to some of the worlds ambassadors and dignitaries of the different governments when they turn up. They'll be shocked to death in how the whole evolution in science has to be taken up, that it is with everyone, it's not one nation anymore of Russia, China, or whatever, but it's One Nation of humanity. (2:24).

I sit here today and look at this exhibition and I look at more or less 50 years of work. Over half a century of dedication. Dedication to peace, to science, to change the course of humanity, and whatever you do, with such a work you always feel good, it feels satisfied to be able to deliver. And you are always given a gift at the end of it. And that gift has been peace for humanity, what could not be achieved in thousands of years. And there are other gifts which comes with it, we enjoy the pleasure of science, T, and gradually we open up to understanding more. (2:26).
Any other question?

Q; How much will K change when he uses the system for himself?

K- Not much. I am happy the way I am, I am content with where I stand. The problem with this T, it's so powerful that it can make you fearless. It makes you arrogant in the way of knowledge and T, but in that arrogance brings humbleness. When mankind will learn this T, he will use it wherever he needs it. It's not there that it's there. You want breakfast you are hungry, you use it. You find something gone wrong you use it. It's not that it is there all the time. ... (2:28). You use it when you want to have the pleasures of it, and the science is that Rolls Royce, you park it, and whenever you need be it for health, loving, whatever you take it out of the garage of your soul and use, it. In so many ways, we have become accustom to so much abuse the pleasures have been forgotten. We go to work 9 to 5, we are abused to have something to eat, to have a shelter. I don't ?? eat, we have seen it with Corona, life will go on. We go for a break, when we come back we open the video channels, and with it we open a new era for science ...

(2:30). We have the Brazilian team with us, US, Nigeria ... we have moved the factory into Alex. It has to be known that Benjamin in Ghana was brought in by Belgium, and now you understand. Now we open ?? the Belgium has already left the Foundation for a few weeks. That atrocity of what I call, beauty of the knowledge has come , and come through its application. and it will be relentless, from now on we deal with the governments to change your conditions. We are proud who we are proud where we come form, but there will be no atrocities, no killing, and no abuse by man. Because we make everything free, at the point of inception. At the point of hunger, you can have it free. You have illness, you have it free. You want to fly in any corner of this planet you'll have it free. Monetary system will be something in the back of the mind of the man, as something happened in the history books. (2:32). I'll answer the last question . .. we'll try to make a feeling that you are part of us, you are with us, you are within the structure of the exhibition. Make your way to be part of this beautiful creation ...

Q: .. the professor of the university asks if there is a instrument to verify the plasma content in plasma water? repeats .. (2:34). repeats again

K- What does that mean?

Q: .. repeats again ..

K- What does content mean? H and O. ..

R- Or is it the fields that are transferred to the water, is that what they are trying to measure. (2:36).

K- I don't know how you want to explain it. Do you want to understand the emotion of the water or the material of the water? Pharmacists can do that for you. I am a physicist but can we measure the emotion of it, Now it is possible and we are, we have seen we have developed T to do this.

R- If you hold that water in your hands could you sense it enough to say this is effective plasma water ... what would you do Mr. Keshe would you sense right away.

K- If you hold a Gans cup in your hands (1 sec please) . (2:38). When I hold Gans water in my hand, with experience, most of the time, we can tell what the Gans is, by the energy absorbed in the palm of the hand. You taste it, you receive the energy which is ?? taste of the metal, or material. Yes you feel, I do that quite often. Last week .. when we were loading the EU, I was showing the KS, my finger, my hand, my nerve changed. The structure of the skins changes. You should be able to do that. Many of us should be able to do this, by holding the Gans we should be able to say what energies we absorb from it. What Gans's for what purpose, (2:40). to what extent everything is adding up to what we hold. .. if you ever held energy stones like the gems, you should be able to see this. feel this. The same thing with the Gans. We should be able to feel it, .. see even the motions when we hold the Gans's in your hands, how they start changing, rotating. You interact with the Gans's it's not just something different. it's energy system.

R- .. (2:42).

Okay, we go onto promotions and then we go onto (2:43). videos >> (2:49).

Go live to Linz. (2:50). As you can see we are in exhibition. We have limitations, some of it can be shown and some cannot be shown. ..

Most famous reactor, first reactor built in Iran. the babies built forward. then the Gans systems. then we go into what you have never seen. There are many Gans's here which you have never seen. This is part of the package of Gans's we show. (2:52). The stock of Gans's in head office is huge ..

we produce cosmic rays for a given condition, we produce organs. on the table some 24 combinations ..

some of these are the most rarest materials man can get hold of.

These are the 5 reactors, you all are making.

And for the first time the Body Enhancement Unit.

It covers energy thing man will need to survive in the space..

(2:54).

The second unit, creates every element man needs in the space.

There is a similarity between the two ..

inside is a sun. we have replicated the solar system.

(2:56).

(2:58). A lot of things from today changes, because up to now it was a theory, could be done, we've shown it in small pieces. Now it is a reality. Now it's what we possess. It's possessed as a knowledge. as equipment, as data on material which has been shown. And the world of science will change it, will build what it needs. Will China have a hold on the rare earth materials anymore, that now you can produce even more rare earth than rare earth materials of the cosmos level in these machines. I promise one thing, .. we change the course of humanity. we bring it change it, with it we bring new dimension, now understanding, now you have seen what you have been waiting for. .. that mankind can feed his physicality and create his life. And we have completed it. As we walk out of the arena we will come to one point. The other things you've seen the agriculture unit will change everything for us. (3:00). even if we want to feed the physicality. We have seen different materials in different combination. at home ,, whatever you need
This is again handmade of the Chinese. one of the most beautiful groups in the KF you can cleanup the planet ... we can choose what we absorb.
The MaGrav Units ...

(3:02).
The 2 Units will become space .. will be able to fly on the wish of the STM.

Are there any questions?

R- Congratulations ..

K- We are in the international center of the city of Linz. (3:04). From now on our work carries on with the governments for the space development. One of the first dignitaries this afternoon is the top 2 nations in space development. They requested to be here. and called to confirm this morning, and they expect to see the systems. You don't need to guess much who the other one is. The world of space development changes because they see it in physicality.

Any other question?

Q: Is it able to create gold?

K- Next question, the man is not mature.

Q: (3:06). can you send fields of support along the Danube river ...

R- We actually did that for awhile in the Plasma reactor group... How can we send support?

K- Your thoughts are support. The elevation of the soul comes through sending, giving, and sharing.

R-

K- We would like to thank ...

From here it goes across the world .

Visit to Concentration Camps - Have Wars Ended Where they Started:

(3:08). .. see one of the camps from the Second World War .. a few kilometers from the exhibition . the furnaces. . the man went to kill so extreme, the same city comes life. Was that destiny where one finishes a new start, maybe. **Are we changing the gas chambers with the chambers of life. and has mankind changed so much in such a**

short time. When you touch the walls of the gas chamber gives you pain. when you touch the walls of the EU joy .. (3:10).

Have the wars of mankind finished in where they actually started.

Would with these units create peaceful leaders, not only on this planet but beyond, the answer is yes. Such a big contrast within the same city, one become exclusive and one become inclusive, has mankind matured to this point.

Any other question.

(3:12). WL: Thank you so much ..

K- remember we saw the units in the airport while we were going to the factory, and it was like an egg. Now it has a reality.

WL: . it's raining heavily here .. I feel it's like a celebration . the heaven is opening.

K- . It happened to us when we went to Vatican, and it happened to us whenever we had the world leaders with us. Every time there is a time of the change, there is a storm . So it is usual. I would love to thank you for all your work.. it's a child of your work

WL-

(3:14).

Q: .. is this EU also helpful for beings in other dimensions when it works.

K- This system is a universal system, so it belongs to the U but it enhances. .. Yes. . if it good for humanity it's good for the UC. These are universal system they belong to all of us. Not just one race. to the totality of humanity and the (3:16). In essence yes.

Any other question?

Q: What does a country have to do to receive these EU and how long would it take to receive and start operating them?

K- EU can be bought by the nations, and the ?? KF invests in different ways in the process. We've seen a guy in Germany who is very disruptive and has gone into putting all sorts of things out, we have setup a structure within the KF. We support those who like to be supported, and with it we bring a lot of new T with it. and in that process it's usually .. a number of groups we are meeting in next few days, (3:18). they are investing in a number of nations in one go. There investment is not just one, but as a national organization across. This is the difference in the problem ...

From today the price goes to 1 million, which was originally

.. we match one to one, if they buy 2 units we add a third one to it. (3:20). Yes, we have a structure with investors. ...

R- What would be the ideal configuration?

K- 12 they are a perfect combination. the middle brings a central field transfer. You need to have a field configuration that allows transfer of energies, extraction of energies, allows a lot of configuration.

R- What would be the configuration of 12 , just 12 in circle with the center empty.

K- Yes

R- all the heads of the people if they were lying down would be together. (3:22).

K- yes...

R- Alex was considering a configuration of 10 with 3 groups of 3,.. 120 degrees apart in a triangle with a single in the center.

K- No, that's not .. a 10 configuration, the 12 configuration. and .. creating a .. field flow which can be accessible by many energies.

R- .. group of 3 120 degree angle.

K- Groups of 3 creates a different environment. different strength.

..

any ways

R- if it was a lesser

K- Our advice is 3 as a minimum. You always have to have a material unit as part of the 3. (3:24).

R- Would they always be in a circle.

K- You have to look at the structure of the materials .

K- .. what is it used for.

The system has to viable to financially run. The charitable organizations which finance millions of dollars into this , we advise them to run the system and be free to the users, is to add a material unit into it, while you produce what is needed that it can be sold that it can provide financial support to be able to deliver the systems free. .. but at the same time the materials unit allows the extraction of the fields which are not needed in the combination system in the reactors. There are many reasons why we advise it this way. So you create a condition where the fields flow will bring in what you need. the way you need. And at the same time financially support the projects. (3:26).

Q; It's more beautiful then an arms exhibition, peace is more beautiful then war.

K- In so many ways, we need to do it, .. we cannot stop. As I told you, we'll change the factories from arms to peace ..

R-

(3:28).

K- The world leaders have to decide on this. and those who finance it. and how it can be understood, How mankind decides to go , which way.

R- would countries give these units to enemies to help establish peace in those countries

K- We'll see how philanthropists react..

To what extent do we want to produce these things ..

I have seen how people have changed ..

(3:30).

Man has come to 2 things, arrows, rockets aircraft. with the new T those are all sorted.

Secondly we can't do because we can't get the armies together.

On Sunday we are going on national TV ..

(3:32). We can enforce the STM, and then see what is the next step. We are we have to move to become a peaceful creatures we have no choice.

Q: Can you send healing to a remote person from these EU ?

K- Yes. Why not.

R- Perhaps with a sample of DNA AA would that be useful.?

K- Possible. It depends what are we expecting of it. What is our ultimate goal of it.

(3:34). What do we want to do what? can we do harm with this, can we do good with this?

Any other points or we call it a day?

Q: Can we achieve the same result of entering these all by ourselves . . . I am a replication of the U?

K- So let him try.

(3:36). Thank you very much for today. I think 3rd September, 2020 will be remembered in some parts as where the world comes to see the reality of the new space and new knowledge of man. And the beauty of it is it is shared so simply and so openly. I wonder if I put one of the world leaders who is so eager to start war, to sow he is powerful, how would he come out of this chair. Would we get back a true man of peace, or would we get a man without a soul. As the soul decides to leave the physicality, as it is do shameful? Thank you for today. This is a culmination of years of work and ?? man's in to space. Maybe in the next exhibition in Tehran will bring you to fly with us. join us in the flight .> bring a new dimension in the life of man. (3:38).

344 KSW

END
