

345th Knowledge Seekers Workshop September 10th, 2020

ENGLISH TRANSCRIPTION

(:14). ... As you have seen it has taken a long time to reach where we are in the space T. Mankind has moved so far, copying the work of the birds, as you could see, could touch. And the knowledge of the man has reached a point that he can fly, ?? his place, his medicine, his food in the depth of the U. Which means with this basic T we have shown in Linz, we have made man independent of this planet. In the process of development we have learned a lot, we learned how to fly, create energy, fields which are necessary for different applications, but now man has become totally independent of the planet. Of course you have to remember this is only the beginning of the journey, we see everything as we want, (:16). we work to attain new knowledge and with it we learn to be able to share, to share knowledge, wisdom, emotion. The beauty of these new T for the first time mankind has the ability to share emotion, to enhance emotion. To bring the physicality and emotion to be unified, that mankind can move further, find new dimensions. The units showing in Linz and the ones showing in different parts of the world, will bring a new dimension to all of us. Today we see them as 2 units, and in the coming time they'll become as common as we go to take a picture in the picture boxes in a train station, in hospitals. What we see is a new bright future for mankind. When you go into the unit you don't need to go through the illness, that you find the full development of the cancer. The body, the emotion which will lead to the cancer is already within the first hours processed, handled, and the life changes. (:18). Mankind will never see cancer anymore .. or illnesses the way we are used to anymore. Because for an illness to show itself take years, where you have handled it at the beginning, at the outset. Mankind will write the history of medicine as part of the progress of his own understanding of his own structure, and no more. We will learn to be correct that we don't even lead to that position to create in an onset. The development of these machines as we see today, is and will be a breakthrough for humanity.

The beauty of it is, that we will strengthen this T further, ... a new system will be released in the coming weeks and months. This new system will be individual system, which means you can keep at home. It will be a totally different T then what is used in these machines. At the same time, the new T breakthrough which is to come out and be released, will bring a new dimension to human life. The most important part we'll start training man to live and be as in the space, never ending life. (:20). What this means at the moment as a human race, we rest 8 hours a day, because the body needs to repair itself. The body needs to replenish, extract and give new energies, in a faster way. With the new T man is replenished at the point of need, and you'll find out slowly sleep becomes eradicated for the life of the man. It's like the Sun, it shines all the time, it does not have an 8 hours break. This process is what most of the U Community lives through, lives with, and now mankind has to learn. There is no end, it is one continuous joy, not to miss a thing, and to be a part of all. Resting time is the habit of the man, and with these new T as they emerge, people will find out there is no need to rest, the body continuously will add to itself. The new versions and further development will make that very clear. In that process man will learn not to become aggressive, .. be peaceful. Man will learn that the life is one continuation to be part of, and be the creator of that part. .. Man always strived to have materials. Now man can have materials at any point.

In the future systems, (:22). which we'll release in coming months, as you understand the merger of the 2 units together, what you imagine you can make in ?? Today 3-D systems will become a reality in the dimension of the thought of the man. You think of a cup, in the other system you make the cup, the shape, color, and everything else you can imagine. The development of these T opens a new horizon and the moment you put your thoughts in a computer program and you transfer it, to be 3-D printed. With the new T you don't need the 3-D printer, as the combination of the work of the system, as you think and the reactors on the other side will do as you wish. These are not far reaching, we'll see it in the next 2 years .. to be in the reach of the man. Because once the society takes hold of the knowledge, it becomes unlimited. Do you need to go to the shop to buy a curtain, a furniture, the way you want it, the color you want, and the shape you want it. In the coming time life will change, .. man starts doing the same in the U, we make things as we think. And value it because it is a value of our thoughts, and expression of our soul. In the coming weeks and months, KF Austria will release a number of new T. (:24). We were waiting for the exhibition to open, and in negotiation and the ways we do, we try to spread the manufacturing of the goods across the planet.

The exhibition center in Linz most probably become a permanent place for demonstration of the new T of the KF. We'll reside in this place as we can, as long as possible to show new T, people from all over the world will come to Linz to see the latest developments. The KF Austria will release your elusive generator which you have been waiting for, for so long. The structure of it, the new version of it will be displayed in the center, and with it we create new fields within the structure. In the past few days, many times we looked at how this exhibition can be added to the KF permanent place that the world can come and see. As you are aware we were showing the system and with it we watched and monitored how the structure will take place, (:26). and how it will be added to the knowledge of the man. ... we are allowing limited numbers of people in ... allows us to be in control of who, what and how we want to disseminate the knowledge the first time. As we open the doors this week to public ... those interested in the purchase of the reactors .. KF Linz has become a reality that world T and science has to accept. The new knowledge now has a home ... (:28). is the work of the F. In the coming time we allow schools to come in. Universities around the world to touch, feel, be a part of .

The beauty fo these 2 system is that can transfer mankind's, and understanding of his knowledge so freely and openly. If you understand the combination of the work of the 2 systems, you'll understand in interaction of the two, mankind can establish all of his needs. This is why we setup 2 units, one for materials and one for the body of the man. If you read the book #1, and go to book #2 and 3, there is one space gap which is missing. And in that >> position it is important for all of us to comprehend the totality of the knowledge. What is interesting when you stand in-between the 2, you understand the one reality, and that a new science, T, understanding of totality has appeared. With T we bring peace, and with peace we bring friendship, (:30). irrespective of color, race, religion. .. if the governments don't support their own peace, governments need to understand the new understanding. If you stand in-between the 2 systems, you come to understand something very interesting, on the right you see material, on the left you see the human. Has the time come that we understand what happens between the two. How do we go from one to another. How do we change the matter state of the man, to transition to energy, and creation fo the man on the other end, in the plasma or Gans state. Or can we develop this T to extend new understanding of science allows us

transportation, transmutation of 2 at the same time, from one point to another. Mankind has reached a new destiny, and with it we need to understand more. Has the time of space .. only to the eye of the beholder, or does it exist in the dimension of totality? (:32). Do we all choose the time, place, and space to be, that we are visible to each other, or do we take a chance and transmute and travel at the same time. Do we choose to manifest ourselves to eye of beholder, of who we want to see us. Present to some and not to others.

Today's teaching is about transportation and transmutation of elements. The game of mankind, but the process needs to be understood. Not only by the physicality of the man but by the STM too. As one can leave the other behind, transportation and transmutation (T&T) is the combination of understanding the physicality and the soul of the element. In so many ways, if we understand this, man has gone 1 step further to develop T and systems not only physical systems, but within the structure of the soul of the physicality of the man to move from one to another, and open a new passage between the two. To open the channel that the man can T&T and travel and at the same time be able to exist in both dimensions needs a new understanding, a new knowledge, (:34). needs a new that man can transmute between the two. and travel at the same time between the two at any dimension and where the physicality or the dimension of fields of itself, to manifest itself at the point of manifestation.

In so many ways, what has been lacking in the knowledge is the key which can open the door that both can exist, but both can be aware and inside of each other. At this moment in time the body of the man uses the space of brain and the materials and combination of Gans's, which is used to make this, for this ?? game, for this understanding. Now with the presence and understanding of the new T, mankind has a choice, to travel as a light or to travel as matter. Or be able to travel through as a light, but at the same time be the matter in the soul of the light. This has been one of the biggest dilemmas for the world of science, where in the world of physics sometimes we see particles and sometimes we see rays. With the man's knowledge we'll extend that, (:36). it becomes particle, that within it, within the center has a soul, that transfers the STM to any position in the U and then as a particle it appears it interacts with its environment and manifests itself at a point of manifestation in the structure of the physicality in the point of manifestation. I am the light. But do I travel as a light to enlighten, or do I travel as a matter state to manifest. Mankind has to understand the difference between the two. The man in the shape of the light, enlightened becomes the messengers of the God, the essence of the creation, and the Creator. The man who chooses the light in the state of particles stays in the dimension of physicality, covered with the essence and motion, speed of the Creator. How can this be ?? changed, how mankind can endeavor to reach the speed of the light at the highest strength of the fields of the U, to become maybe, nearest to the speed of the knowledge, and transfer of it, in the level of the Creator.

The further lights from the source, the further knowledge from the understanding of the creation. Mankind is at the edge and not at the center. By developing new T that man can see in physicality, and then it can help mankind to transfer itself as a matter to the light, (:38). as a light to a life on the other point. It's the travel between the matter unit enhancements, and the man EU. This is part of the knowledge that has been hidden from mankind, and today we try to start a new cycle. And over the next few weeks we gradually build on to it. As I said, by 5 months before the end of the term, we start the

teaching of the U Knowledge to be completed, in the next 5 months, man has time to understand to develop and be ready for the time of inception.

In so many ways, mankind has no choice, as now he is taught, he has to catch up with the knowledge. We took more time to teach, but now we teach you to travel with the speeds beyond the speed of light, by order of magnitude in thousands of times. We think mankind has matured to this point ... new knowledge has been released, and this knowledge will be transferred to systems, that many people will understand, and wonder why have not been understood much earlier. In the new process we teach you have to change the voltage to current, (:40). and current to voltage. .. when you change from voltage to current, you transfer from transmutation to transportation, and transportation to transmute to the element on the other end. This is where the humanity .. in the knowledge of physics has lacked and never understood how to transfer directly the plasma from its voltage, or its potential difference to a fast speed current. This process has been taught to the people of KF manufacturing, and you'll see systems which operate on this, to transmutation of voltage to current, or in a way, transmutation of matter to light, and the light to matter at point of need.

In the coming weeks we'll show you simple system for the conversion, and with this it solves all the dilemmas of the man's energy needs on this planet. Beautiful Tesla strived to have it, but he could not understand. Now in a simple systems we'll show you, the transmutation from physicality, or what you call potential difference, to the motion at the speed of light, to the strength or near the strength of the Creator. In time as the knowledge expands, mankind will travel the spans of U in seconds, time of man on this planet. (:42). You don't need to choose, if you want to live in New York, or you live in the desert and go to office in New York. In the coming time man choose planets and stars to enjoy to be at the point he needs to be in seconds.

In a way, man becomes part of the ether, what has been the dream of the man, but as part of the ether of the U and not this planet. It needs a depth of understanding in G fields, and depth of understanding in M fields of the U. In so many ways, the STM within the structure of it, carries the knowledge, but man has never understood this knowledge as physicality has taken hold, and denied access to the knowledge of the inner sanctums of his own structure, what we call the soul.

You have to remember one principle and one understanding, and as long as you keep that in sight you become master of the work. Go back to the basic .. work of plasma. understanding the truth about the transportation and transmutation of the elements in the essence of the fields and not matter. The principle of the knowledge of the plasma in universal condition is that the strongest gives, (:44). and the weakest receives, this is the reason why we see the stars, .. why we see the light shining across the U. The cell in the eye of the man, is so weak but made of the same elements of the star in the depth of the U, and in feeding it, manifests the star in the eye of the man. If mankind understands this, he has broken through the knowledge of the transportation and transmutation of the elements. Where a light billions of km away manifests instantaneously in the eye of the man, and manifests on the surface of the sun. On that place or planet. In reality what we see is not from millions of years, speed of light, it's instantaneous, as we see it through the emotion and the heartbeat of the man and the star. When mankind learns to work with different dimension of strength, man will not

only see stars in this U, but mankind will see the Unicose, and each U shall become one star.

Mankind is weak in understanding of his own creation and in that process he has missed a lot. (:46). When you can transmute and travel at different speed of the strength of the cell of the what we call Gans of the matter of the man, then mankind can use different strength within that, that allows him to see the totality of the Unicose. In a way we choose a strength to see a star within its galaxy, to see a star in another galaxy, or to see a star in another U. In reality, the total what we call the total spectrum of the fields of the U, is the same across the whole of the Unicose. It's us who has to choose what we want to see. The curtain which has kept us blind from seeing the other Universes, is our own lack of understanding of the operation of the strength within the fields of the body of the man in its Gans's state. Once you understand this and you have established a link between the citation and you, that's your path, that is your strength, that is the way you travel. Which means there is no need for a spaceship, and there is no need for configuration of the system to get you to, as where and what you have seen, has sent you the message, "I am here," and on the return of you confirming to it, that "I see you," you can return back to the same point.

In fact mankind has to learn the new transmutation of elements to light, and understanding and configuring within his own what we call comprehension, (:48). the speed he likes to travel. As the light from the star from the depth of the U, as it reached to our eye, we have already confirmed its location, and we have sent the information back to it. We have fed to it. We have become the other twin star of the star we look at, because we confirm the existence. and in that process, we can travel as a light, as a ray to reach and at the point of manifestation to confirm into matter state, or what we call particles in the world of physics of today.

This knowledge has been open to me for decades, but I could not explain, as mankind was not ready for this. Now the mankind has come ready, and is ready to understand the transportation and transmutation. The new EU will give mankind this process. I did not bring the universal EU for body of the man, for diseases, and for enlightenment of the soul. I developed this for mankind to have access to be able, within these systems to travel the depths of the U and manifest itself at any point it needs and he loves to be. We create the condition of the fields within the structure of the brain of the man, and with it we make it, instantaneous travel across the U. Transportation within the structure, transmutation of the man's own fields, is the most safest way for man to travel as a ray. (:50). In so many ways, these new EU will allow mankind not only to perfect his own body, the future versions will allow man to travel the depth of the U. Do you like to travel as the light, or would you like to travel in a spaceship. The choice is yours. The STM has chosen the spaceship of the Earth to manifest itself at this point in time. With the new knowledge would the body be happy to manifest itself in this position. And again it depends on the knowledge of the man, .. according to his comprehension and the strength of his knowledge to understand. Now you understand how easy it has been, and how hard to keep the knowledge away from the man until man matures step by step in the knowledge.

As you try to travel as a matter in one unit to the other, manifest as the man, what happens in that position, what happens in that space, is where the knowledge and the gap is within the knowledge of the man. And this is how, that we will fulfill the promise

in the coming weeks. In so many ways, (:52). we allow the mankind to travel beyond the speed of light, by thousands and millions of times, order of magnitude. Try to go back to the basic of the teachings and understanding of the flow of the plasma. Its inherent conditions of motion, its inherent conditions of existence, its inherent condition of interaction. Then mankind will understand one point, as you travel and you have frictions within the structure of the physical dimension, then the light will have the same condition and friction with other fields. So mankind has to learn to use wisely that does not run out of energy at a given point of the wrong strength. These are all, be taught, and in a way, when we release first true MaGrav energy system, we start that process for the conversion, for man to understand. We have opened the Pandora Box, and it's for man to understand if you would like to be the Pandora, or would like to be the box, engage itself or travel the depth of the U.

The present physical structure of the body of the man, and its interaction and structure within the brain doesn't allow such openness. For this we need to create a new structure that within the physicality of the man, (:54). both carry the same. For this reason there is a need for a new generation of life, a new generation of being that have access to both. That the present physical body lacks this knowledge, lacks this connection, due to even its structure of the physical material of the brain.. In the new life to be born this will be solved and simultaneously will be transferred across the new birth, across the Universe. With this we allow the transmutation and transportation to all the beings across the U, and not only the man. The test of time will confirm the existence and the dimension, As man over millions of years have created different organs for functionality on this planet, now the structure of the brain will change, to create and allow the new development that mankind can transmute and transport at the same time to be both in the dimension of the plasma or the physicality.

For the first time this gift has been given to man, and will become and will be visible to many, as it takes shape and dimension. It will come with the new birth. New birth for mankind to enjoy and with it to understand the birth of the new knowledge, the birth of the new cycle of being, that will become a pattern across the U and the Unicose. The time has come to mature for mankind and U Community to reach this level in unisons, (:56). that there is no race behind. And any new development, any new creation will bear the same knowledge at the point of inception. It is no use letting so much harshness happen to mankind over billions of years to reach this point. Mankind has to understand the new structure of the physicality of the man comes through the existence of the new plasmatic field, which is being released by mankind, and through the development of these new technologies.

In time the atmosphere of this planet will change, which will accept and enforce the new structure. As we created the birds, now we create the freedoms, STM in the dimension of his own physicality, that there will be no nation but one, as man will exist in dimensions as he wishes, and where to live, and where to exist. Illnesses and food will not be part of the new structure, only the love and care. As was beautifully put, be calm, be kind. Be calm to understand, and be kind to share, be kind to be able to give unconditionally the new knowledge and receive it. Those of mankind's who reach the point of maturity will benefit from the new soul, and new life to be created, through the strength of the knowledge and peace. (:58).

In so many ways, in the coming weeks as we open the dimension of transportation beyond the speed of light, in the dimension of the physical matter state, this will change many things, and many operations on this planet. The present computers become useless. The present structure of transportation becomes a donkey work. The present cycle of feeding the man, becomes nonexistent, as the man will be feed through the strength of his own inner sanctum of energies.

In so many ways, a new mixture of Gans's will be released to create that condition of the totality and satisfaction. I have asked the KF team in Austria to start the production of these Gans's, which in totality will bring the new level. Our target was to show the two units, now we show the dimension of the two, how when we put them together, the amalgamation will bring new understanding, and new totality to the science of the man.

As I said, very soon, the dome of the exhibition center in Linz will be lit, that it can be seen from all corners of this planet. The light from it will extend beyond the building, and when you ask, you ask for the building with the light ?? on and everyone will indicate you, where to. You will understand the totality of the knowledge in the essence of the creation. Once you enter the dimension of the fields, (1:00). you will enter the openness of the knowledge of the U.

We do not make a temple, but we make a temple of knowledge. Not the temple to pray to. You come in to enhance the T through your own understanding, and you come to enhance the knowledge of the U, within the structure of the physicality of the man. The process to start the "dome of light" has been explained to the team. In the coming time, will come into operation.

You have to understand where you did not understand the teaching and go back to it, and if you come to that point, you will enhance, understand how you can travel the span of the U and Unicose, both as rays or as matter state, the choice is yours. You choose the speed of travel and then convert to enjoy the sceneries that you travel to. It's very much, how much mankind will understand that he can go further within depth of the strength of his own fields to become closer to his Creator to see Its light. It does not matter, in any position in the U. (1:02). When you see the figure sitting on the chair in the system, we don't target the physicality, we target the energy which created that physicality. The beauty of the physicality, comes from the essence of the energy center, what we call the STM. When you see that beautiful body sitting on the chair, you admire the creation of the Creator. How He has transferred the light into life. That's all it is. We come as light from the Sun, and we become life as man. And now we teach the knowledge for man to become the light and manifest itself as a man anywhere in the U. Up to now we stuck to the Book #1, and now we start teaching with the Book #2, the structure of the light. The understanding of the totality of the creation, light is the transmutation and transportation of the elements in essence, the true essence of the creation, and nothing more. then mankind has to decide, it transfers as a light, or as particle. or both at the same time. Now you understand. (1:04).

Are there any questions?

Q: Can the unit that generate matter, generate at a distance in case someone needs something sent to it. ?

K- What do you mean?

R: .. could you send some emergency materials to someone in an earthquake from the matter EU.

K- If you are still in the dimension of physicality, yes, but if you work in the dimension of the energy, what we call the soul, the person can do it himself. (1:06).

R: .. we'll have units that will generate what we need at the point of need. .. wouldn't have to transfer that stuff ..?

K- What do you mean?

R: if someone needs food we'll be able to manifest that ... we'll be able to think something and have it manifest

K- That's what we just said.

R: so if we could have it manifest in the unit, (1:08). could we have it manifest at a distance somewhere. Or are the conditions in the unit, that's the important part. its, its own enclosed space for a specific purpose.

K- In so many ways, we decide everything, and In so many ways, the soul of the person decides at the point of the need. How do you know, what you are trying to give, is what they need to receive? You want to give, but maybe they do not want to receive, at the level of their souls because they are comfortable in what they were and how they were. (1:10). Any other question?

Understanding the Soul's Reason for Genetic Diseases:

Q: in the health unit can genetic deformations in womb such as Rett syndrome be corrected?

K- You have to understand why that syndrome was created and what is the reason for it. And what was expected of the soul to confirm itself in the present physical form.

(1:12). We got to understand why we work this way and why we decided, or why our soul decided to manifest itself in this condition. And how would it matter or how would it change the physicality? Would it bring a new dimension and would it bring a new understanding for the soul that accepted this condition? What our physicality shows is what the soul has accepted. And the soul accepts as a totality, of all the structures and settings of the past. What feelings, what emotions will bring to the other souls, this deformity, or this change. Or is a point of what we call evolution, that mankind needs to learn in that path. Many changes, as we see diseases today, are partially, and in principle, (1:14) part of the structure of the total understanding of the work of the soul in respect to its environment, physical, or in respect to the other souls. This is one thing that mankind has never understood and has to be understood. That when a soul creates a physicality, everything in the dimension of those who lead to creation of this soul, the parents, grandparents, the past structure of who lead to creation of this soul, all have a say, it's not just, that's it, I am here as energy and I decide. This is why we get the color of the eye of our grandfather, and the behavior of the grandmother. This is what needs to be understood. This is what has to come, that at the same time the soul of this planet, the soul of the structure of other entities on this planet, have a say in this structure. Why do we suddenly get the same kind of defects all over the world in one go, without anything. What is the planet trying to tell us. What is the process of evolution it is going through that it needs this in the future life for physicality to be alive. Not all what you call genetic defects, are defects, these are part of the correction that the body of the man will need in the future generations. Mankind is so physical, that he will not see, and he will not understand, and he will not comprehend the totality of the work. (1:16). We are not present at all times to see why and how a soul is created in the shape manifestation in physicality, manifests itself. If our wish is so, it shall be so. But the rest has to be part

of. Everything has to be considered, every point when the souls create the STM, that individual, what you call physical deformation, or what you call genetic deformation, and what might lead to termination of life at a given point, by that soul, all has a reason. What is to bring to the man, to the mother, to the father, or to the child, or grandfather or whatever. That mutation at a given point in time. Don't forget the life of a man is like a car, it's lifespan, it's decided before, you are the only one to possess, fuel, and drive it. But at the end, it is written that so many hundred thousand km to come to a halt, you cannot drive anymore. You are only a passenger who can move it around, and you fuel it, exactly like you feed the man. And your physicality which takes the car around, (1:18). but the lifespan of the car is pre-written at the point of manufacture, and by the decision of what materials and to use. there is no difference in the dimension of physicality, only when you reach the state of the transmutation of the soul, then the time become timeless and limitless, zero time and zero dimension. The mankind has to understand it, needs to understand it. The mankind has to grow to understand this. Why do you want to change a defect. What would that essence, the time of the separation of the physicality, even due to that defect has, supposed to bring to the soul, of those who are around. How would they be, and how and what would they learn from it. In the future the body of the man will be perfect. In the future there shall be no illnesses, or no defects, because even when you carry the soul within the womb of the mother, in entering systems like the EU, brings the perfection too. Every child shall be perfect, in soul and physicality, and all will shine. And each one decides on its own dimension of physical existence, (1:20). and the way it wants to manifest itself. Nowadays when you talk about a defect, is it in fact a correction, not only for the physicality but for the future, but for the soul of those who look after this soul. What wisdom does it bring. And what clarity of understanding of the knowledge of Creator. Go back to the Chinese old saying, "pain makes man wise, and wisdom makes man rich." Not in the dimension of the physicality, it's the same in the dimension of the soul. You want to correct syndromes, genetic defects, correction of physicality after March 21st, you'll become part of the life of the new life. Before that mankind has to live in the dimension ?? why. When we create the perfect child in the essence of the STP then the life of the man will start to live in the U, the same. Do you remember the orange and the cup. Now there will be many cups across the U, and one orange. (1:22). This is how the future of the creation shall be. Then at that point you have to ask the physicality, why have you chosen this. What do you expect, what do you want to reach, what do you want to get. Attention, love, care, or the beauty. If it's the way you see yourself, beautiful and you are happy within your existence , that shall be, but you cannot steal. Any other question?

WL: ... how humanity can know his goal of the soul?

K- The goal of the soul is known by the soul. In the future the physical manifestation will bring that for the soul. In a way we carry the soul around to get what it wants, and to do what it needs. (1:24). This is what we'll learn more when we open the new dimensions and man learns the news ways to interact between the two. In gradual steps, mankind in the physical dimension will be enlightened to the dimension of the physicality of his soul. The construction and development of these systems ?? is that space gap. In the past man used to get in elevators to go from floor 1 to floor 10, get higher then, now mankind has learned and has to learn the new way. To enter into the dimension that he can elevate his souls form 1 to 10. These EU are part of the process for man to understand more in a free space, the dimension of his existence. Now is not only the physicality which you take from 1 to 10, so we can do the same with the STM,

but this time we don't take man to level 10, we show the man the level 10 within the structure of his own soul. The comprehension of the totality. This is the difference, this is what is called, (1:26). the new era in the world of science and space T. It's not just running machines to fly, it's running souls to fly. The teaching is on 2 levels, one is on the level of the creation of the physicality, and 1 in the dimension of the physicality. The choice is your, according to the comprehension of understanding of the knowledge. There is no time tunnel. There is no "back to the future," as you want it, because the future does not exist, and you cannot go back to it. You are the creator of the future, and simultaneously the whole of the Unicose. But collectively, by collection of the fields of the U, if man matures to that point, you can see the past. Always remember, the friction and the dimension of the light when the fields interact, especially in the matter state. You have all been to school, you have seen when they put the light in the prism, and the prism splits the light into different lights, now which one of the lights is the true carrier of all information, or each one of them carries all the information. (1:28). And then how many interactions these lights have, and then new prisms, then what happens then. Isn't the first light, the light of the Creator? And isn't the prism, the prism, the prism. ?? you have still the true knowledge and light of it, but in different dimension and strength, color, and race.
Any other question?

Q: How far back in the teachings do we need to go back, there are people like myself who are new to the KF teaching?

Q: Will the public teachings be enough, (1:30). to make everything that is taught. Or will I need the private teachings.

K- The head of the KF has decided to expand the KFSSI and the KS teaching in a different way. As coming weeks and months. ... IT section of KF will be set out to do this. .. What I envisage it will be, you think of a subject you want, and KFWiki and KFSSI will have separated everything that you can go directly to. The KFSSI KS section is weak and from this month it will be strengthened heavily, which means you don't need learn every point, you can choose a point and go to that part you are interested in. It won't happen overnight, it takes years of work and investments. But gradually this will be part of the IT section.... This is how the H of KF wants and she is getting financed for it to be done ..
(1:32).

(1:38).

.. production of materials will be live and video recorded and shared.

There is a German group that is putting everywhere that this is fake, and this is all rubbish. You have to understand the German group is, (1:40). the facts about Keshe, or whatever, these are the remnants of Alan Sterling, pedophile groups which they lost their income. They are all pedophiles. Facts about Keshe is setup by a bunch of pedophiles who used to do child trafficking, and the only way they see can take revenge is putting these up. So when the Germans, Austrians .. these are all pedophiles, especially in universities, taking young boys for clandestine activities. And we hit their pocket and now they are going everywhere, writing facts about Keshe ...

In that process all the systems will be shown in a working condition. (1:42). We have to do certain things to optimize and bring it up. In some sessions KS can be present when they see systems and running.

The systems are in running condition. We have not switched them on in the arena. They will be switched on sometime in the coming weeks, next week or two, and will be operational. ... we developed new ways to optimize the system.

Part of this system carries the illusive MaGrav system, generators, you have been waiting for. It's a hybrid of the plasma T and AC, but we are taking all that out gradually because we have to do some other things in the background that we could see the elevation of the energy and the way we wanted it. Yes you will see a fully operational system.

This is becoming a new home for KF T, in the next few months we'll take over the whole building, this is my plan. The exhibition in Linz ... (1:44). then we retract back to the platform we have. For example, the flying cars will most probably be shown downstairs. We are about 6 months to a year to show this. .. to get these 2 unit off the ground has been a big challenge .. opening a new factory in Austria. .. will produce new systems. We do plug and play. ..

There are a number of wealthy KS to purchase these in their home not to share. You are welcome. but later open to the KF and public...

(1:46). The whole knowledge sharing and its ethos has to be kept across the whole KF. . The new power generators which you could not get going for a long time, you will see in operation. We organize to have 4 or 5 within the field dome.

totally new plasma systems, no motors .. you become part of the planetary system, This knowledge has been shared with the KFm in Austria. we strive to build it in the next few weeks. I designed it about 6 years ago.

If you look at it, we have the Sun which gives its rays and creates the earth, now within the structure of the Earth we create another planet, which will be part of these systems. The knowledge is there, now we start teaching universal technologies, these units can be seen. .. all EU will bear miniature of these units within their structure. (1:48). .. But you will see a tabletop material productions unit, which the F will release the new T. There is a lot to come, and with it comes the readiness to create new conditions for the creation of the new child. It will be explained, in so many ways, in the coming time. The child of knowledge has to be within the structure of the soul of every man. That's why we're striving for. You will see systems running heavily and producing materials. the factory unit .. is expected to produce up to 1 ton of materials per day. But has a different structure... we are producing systems for commercial level, which is the main target for KF to stop the depletion of resources on this planet. The material system .. will change into a field mine, which out of the system will come materials on a continuous basis according to the need and .. creation of alloys and specific materials

we will expand on this knowledge .. (1:50).

(1:54). That you have to ask the UC from Spanish, they are responsible for coordinating and organizing these teachings. All the UC members of the languages they responsible .. and it should be, now we see Spanish and Portuguese.

Brazilian Friday Teaching Well Planned:

The Portuguese has taken a beautiful shape in its structure, because it's well planned out for Friday nights. When you turn to Brazilian teaching, not only it's translated into Brazilian instantaneously or concurrently together they do it. But every presentation is well planned, it's a lot of time spent by Rafael and the Portuguese team, to make sure the 4 hours of presentation is absolutely solid. We've seen the same kind of thing with the American teachings on Sundays. They Chinese need to pickup their teaching in always what they do. But the Farsi teaching needs a little bit of strength because it's only translation of the teaching on Thursdays, they need to allow the new people to come and show, what they have learned, or what they want to show. These are the things that has to change slightly in each group. But overall everything is more or less done. One part of the problem has been to understand, (1:56). each culture and how we can fit into it.

Dr. Assadi Accuse Mr. Keshe of being an Israeli Spy:

Something very strange came up in the Iranian group. Part of the people who wanted to cash out on the T, now that it became very well known in Iran, they have gone to the government and said, Mr. Keshe is an agent of Israel, and he is a spy. I responded to the Iranian officials in a very simple way, if I was an agent of Israel, I would give the T to Israel. And with the knowledge I gave to Iran that they wiped out the American base in Iraq months ago, the Israelis would wipe out Iran in no time. I stay loyal to my nation and humanity. And these people are actually the agent of Israel who put these things out to defuse and decoy, or confuse in a way. If I was an agent and working for the Israeli government, with the T I have, I don't need to come to Iran. The knowledge I would transfer to the state of Israel will wipe out the state of Iran. And this will never happen. I stay loyal to both, to my nation, to citizens of Iran, and the planet. There shall be no war, and this is why we took the T to Iran. A peaceful nation. Now you can understand how the same process carries on. People like Dr. Assadi and the rest, people in the university tried to create this mayhem within the structure now that their hand has been opened. There is a very simple message, if we are supposed to be, as you say. We don't need to, we take the knowledge across, there will be nothing left. So you are the agents and you are working for your own benefit, because you have no status. (1:58). You found name, and you got crowd, and you got blinded by a few people calling you, "sir." We stay loyal to the nation and government of Iran, to the leadership of Iran and all the governments around the world, irrespective of color, religion and race. I had to make this very clear because Dr. Assadi and the rest of his gang, what we call, agents themselves, have written the Iranian government. And my answer to officials online today is very simple. The knowledge belongs to Iran, and stays Iran and will come out of Iran the way it is coming out today. My voice is the voice of Iran, and the knowledge comes on those basis to the whole of humanity. Those who sold themselves to the Belgium's came out with another set in Iran, this way. We got rid of one bunch and a new bunch appeared, because they sold themselves. We are humble Knowledge Seekers and educators. You got to realize the KF has become a part of Iran national, what we

call, Civil Defense. A group of people who go out unconditionally to help with all the, whatever, be the struggle, and what we call the problems.

Now we start teaching medical teachings to many Iranian scientists and doctors. (2:00). And with it, we translate it to all languages and it can be picked up by all the doctors, that the medical teachings become a strength in that way. There is a lot of things happening, in the background, the same with China, same with other places. And hopefully next week the ed team will tell us which 3 will receive the 1,000 Euros research ...

We thank the offices of the leadership and the Sepah who protect us, and the intelligent services of Iran.

John: AZ. .. shows photos of Arizona center ..

(2:02). (2:04). photos .. (2:06). (2:08). video of inside center dome ..

K- The way the AZ is set, (2:10). more or less become the blueprint for most of the centers we open around the world. With the progress and delivery of the new systems. can go to 12 units inside. .

I think that center will be well known for miles to come. Putting 10 -12 units in that building.. many people will sleep around the building without going inside to get, to receive. I wonder if the echo will be there when we install the system, or would the system absorb the voice and echo? (2:12).

J: . the energy of the dome itself will self create a bubble effect of the units. all of them will sit in the dome, the dome is made with 5 inch drywall so it's a solid dome.

K- Yeah, this is what we say to people who come in purchase the systems, we prefer it to be one floor off the ground so it is up, that the Earth's MG field is not so interfering with the system. Those of you who are interested in purchasing ...

(2:14). Anything else to share ..

Any other questions?

(Break ... advertising ...) (2: 23).

Let see the questions, bring the teaching. (2:24).

Q: shows a video outside his window, sings song .. (2:26). (2:28). (2:30).

Jalal: .. you taught us hoe the life began on Earth, step by step, and the boxes what we are doing we are capturing the AA .. (2:32). .. the soul is decided, so how can I understand, are we making the conditions for the soul to manifest itself, or the soul makes the conditions to manifest itself?

K- The soul. but we have not. .. the physicality of the man is a leech attached, an din a way controls the strength of the soul. It has given it very little room inside of the physicality, and this does not give such a good position for many, many of us to be able to share its beauty. In so many ways, we have to learn that mankind needs to learn to share both the physical and the souls dimensions and energies. How do we do it, if you look at this picture, it has a lot of meaning. (2:34). ... this picture I ... shows picture of Sun, open hands upwards, "Pray for the healing of the sick". What does it mean. We take the hand of physicality, and through it reflect the STM as a light, to give to another soul. To share the fields, the energies, the understanding of , and and in that process we use the fields which are within our grasp, within our structure to elevate another soul. Why do we do this, why do we extend our knowledge to share, to be able to say you are a human. (2:36). that we understand more, we can share more and in the

process what do we expect, what do we need. maybe in time mankind come wise to these things. And maybe mankind in time become to understand his own soul, his own beauty, and to what extent we want to share these things. Do we rely on, simplicity, do we rely on the lack of understanding of the knowledge of the physicality, to the STM. We need to extend our understanding of our own soul, and with it share that soul , the energies of it, with another soul. And we'll all become light within the structure of a bigger light. In a way, the bigger light is the Creator and we are all receiving from the same, it does not matter if you are in the back of a planet, towards it, (2:38). or in front of it, because the strength of the love of the Creator surpasses any physical dimension. The ones that are on the dark side of the sun at night, not necessarily receive any less than the ones in the front of the light, knowledge and love of the Creator. It's very much like what I call as neutrinos, goes through irrespective of the matter content. This is what we have to become. we have to become that light, and in the process balancing many things. We show our love, our anger, our care, our distress, but does that reflect on our soul, the behavior of our soul's totality. Then you understand. When you love, does it direct to one person, or does the one you don't like, and love, still receives it, but doesn't recognize it, or still gets energized by it, and maybe it touches it and it loves you back. Humanity has to learn this what we ?? mean and how far can we capture this soul and engage it, and with the new understanding we give man the freedom of that knowledge. .. we welcome you to the knowledge of the U. (2:40). and as we see on the screen, the love of God has no form, no alphabets, dimensions and strengths of measurement. In so many ways, understanding this brings the message of peace. And one of the things we all need to learn and to understand, that the message is simple, if you ask the soul you want to give to, and it accepts to, that's when the soul elevates, when you make it available and it takes it, is when it wants to accept it. And it could be there, doesn't matter how much you give, the dam is closed, you are just storing behind the dam, till the soul is ready to open the dam and receive it. Will it open it in small measures, or open and receive it in one go. This is the way the love of the Creator is, all of it sits behind a dam, and mankind and other creatures has to be able to open up, and how much he opens it, and to what receive from it, be it the love or the knowledge. This is what I always say, if you ask, you don't need to make a dam. And if it is given, (2:42). there is no dam is made, so you receive and you give all of it. And it does not matter how you interpret it, how it looks to you if somebody else receives the what we call, the knowledge or the love, whatever. It's you who creates that dam, because it is not for you, and this comes all the way through the knowledge down the ?? creation. We have engaged the soul, and we create with that barrier of the dam, we call it the brain of the man and his emotion for it to receive. For the first time you open that dam, you open the layers of the brain of the man to become independent of the emotion, but live in the emotion of the soul. The emotion of the physicality is the biggest barrier for mankind to evolve. And that is one of the reasons we have not understood and cannot understand the evolution of the STM as much as the evolution of the physicality of the man. The souls evolve, go through the same process as the physicality, in the process of their own level. They are not created as one and stay the same. As the physicality goes through the evolution so does the STM, or any creature. How much can you receive, be able to share. I always say ?? I repeat it until people understand it. (2:44). When you are asked, and given, no one can stop. And once you are given, the totality is given, not part to suit. Then it's the beholder whose openness decides how much he can take, or her understanding and emotion of his soul. We create that condition in a very clear way, the STM has left himself an exit, and an exit through the separation of the fields of the

physicality. If you look the dome of the brain over the soul has left an escape route from the bottle, which is the physicality of the Earth, pull of the MG field of the Earth. Because if you could have escaped, you'd escape through the brain a long time ago. It waits for it to weaken and uses the back passage to escape, to open up into the dimension of the physicality. In a way, the love of separation is released by the love of the planet, or the being in respect to his position. As we always said, if you look at the lightening, as I was explaining recently, and we all know, the lightening doesn't come from the sky, it comes from the Earth, to discharge the balance of pulling the energy starts the first spark on the Earth, (2:46). up into the cloud, not from the cloud down. We only see the

(3:20).

Q: ... With the U Community if a thought, intention is made at the point of need, would another soul be able to interact with that thought and create on top of that thought to enhance it to make it more beautiful?

K- Why not. If you allow it, if you are asked for it, ?? or you ask for, yes, why not. You see, you ask to give, or you ask to be given. If you don't accept, you cannot receive and you cannot give. (3:22). It's very simple.

Q: Why would you not accept? is that on a soul level or physicality, or both?

K- How come when you don't like your food you close your mouth. Or if you are full with Chinese food, you can't take a bit of kabob, because you are full. That's the same.

Q: So that's a feeling, an instinct you have, sometimes you don't realize...

K- I made man in the image of myself. ... so applies in both dimensions.

R: It seems the DNA has to have something to do, be some preferences built into it.

K- It all depends how we look at it, how we want to interpret it.

R: So in a way, souls have preferences built into them?

K- Of course, that's why they take their position. Or they would be on top of each other wouldn't they.

R: They would all be together on one single point ...

K- Isn't that why we call it the Creator.

R: Too much information, I don't think we would want to be on that position. So that's very interesting, (3:24). so the position is according to our preferences, or .. the M and G fields we feel around us.

K- yeah, in so many ways, yes.

Q: .. when you make a reactor with the T you have given and you connect your soul with it, like you have with the EU throughout the U that is felt, and they are aware of the reactor and your connection to the Source and to all.

K- What do you mean?

Q: ... when you connect on a soul level and physicality ... that then once you give the thoughts and intentions .. connects you

R:

K- In a way of development, (3:26). understanding the soul , it's very much we go back to the beginning of all the teaching. Even when you make a Gans Box, you pray for it, you give from your soul that it gives that connection and you can elevate it. In so many ways, it's part of you, because it is created out of the emotion of you, of the physical emotion, how you twisted the wires, did it pinch you, did you feel Gans's, did you feel the energy transfer of it. All counts. All is part of the structure and it counts, but it is

limited to the emotion of the physicality. Do you want to receive it in the dimension of the soul, soul does not have a physical dimension to feel the touch, the physical dimension, that's why it has built the brain, that in there so many information's can be translated.

Q: .. soul

R:

(3:28).

K- You as a human being, is English language, its polarity, is singularity. ..

We have to see it and then we understand it. In the body of the man we have neural system, and then we connect to it. (3:32). In the dimension of the soul we don't have such a think, it's the fields, and these fields are connected to somewhere. Where do they connect, to who's MG fields connect. These are what we have to comprehend. I tried to pick a picture we can clearly see. If we look at this picture, that's the brain of the man let's say, there is no neural system, but there are millions of fields going to this brain. Where are these lines connected to, to whom, to where, to what molecule, to which soul. And then you understand how the structure works. How do your soul's neural system communicates? And in reality if you look at it, and try to understand it, try to be aware of it, is this the nerve which goes to the papa, or this goes to another creature in another U. This is a very small presentation of the energy fields of plasma of the STM with the rest of the U. In the system of the body of the man you can count the nerves, but if you look, even this one here is connect to some where, because its interaction with it creates this little dot. (3:34).

(3:38).

(3:40). repeats..

All these fields end up somewhere (sides of ice). All these fields (bottom) end up with the fields of the frig and G of Earth, because these two, the frig and water in the container have to interact directly. We see the traffic, every single cell of the tray has a direct connection with every single cell of the water, and we see these fields coming down. In a way if you manage to count the whole number of these fields at the bottom we can see how many cells are involved with each other from each side. We can count the molecules, each molecule has created a parallel with the other one. The other ones which are there mean they have ?? connected. so some of the molecules of the tray, the box, the G of the Earth we can see. But this part, if you look at, they don't bend down. they are upwards, they are straight, which means they are connected to somewhere else. It's the same with the man, this is your neural system, your nerves, and this is the way of the dimension of the souls, (3:42). to be free to interact, uncles, cousins ?? space. For this (bottom part) we have made the neural system in our physicality. For this (sides) we are free to go, how many of these are because of the box of the container when we make the ice. Then we see the interaction, then we understand the totality. It's very simple, or I think is simple. Then which one is the emotion, the one at the bottom, the emotion of your own child, your wife, and you feel it, and you have every attraction interaction or is the part on the top with all the others you are interact with, or have interaction with.

Q: Where you put your intention is where you can interact with ..

K- yes.

Q: That comes to condition with environment (3:44).

K- Most probably, but then you have to learn from now on, 2 emotions 1 emotion of the physicality, and 1 emotion of the soul. Or the new lives in the future will be aware of both. And how will allow one to interact with the other, and what to overflow with that. In the new cycle of life, when you fall in love, you won't feel it in the heart. We'll feel it in general, the whole entity of physicality and the soul. Falling in love in the new generation as we prepare for it. It will come in a way of totality. When we were young we fall in love, we could hear the heartbeat changing, and the breath cannot be taken and the rest of it. In the new generation, and falling in love, as we change the STM to become aware of the Universal Soul and creation of ?? U, we make falling in love as a totality, because now you fall in love with the soul. You don't feel it in the heart as such. The need to be comes from the emotion within, not emotion with the heart, with the physical dimension. It's a total commitment, is what we call totality, it's not breath taking, it's just wanting to be with. It's wanting to be part of, because it's what you call, interacts, interlocks. Physicality is within the soul, so soul takes priority in loving. Don't know why, but I want to be all the time in the physical dimension present. But in fact, the soul has taken the love, and interpretation of love by giving, is part of the structure of the life of the man to learn, and this will become part of the new cycle of life. (3:46). We feel love in a different way then we are used to in the physical dimension. Because this is one fo the reasons for the new cycle of life. Because this was not open to the soul, now souls can fall in love, in a different way, then being twins and being connected. In the coming time even the structure of the skies will change, as the new way will be taught even to the planets and the stars. and universes. the structure of the skies will change in a very different way. The skies will shine in a different way and the stars the same. That mono singularity become colorful sky to look at. And the soul fo the new life will shine on all, and all will take the same. In so many ways, there is a new horizon, and that comes from polarity, not singularity. Mankind or the future of the race of mankind will have a very good contrast to put next to each other. how the skies looked shined and will shine in the future. When we bring the balance in the new dimension even the stones will be touched. let alone the heart and STM (3:48).

(3:56).
