

349th Knowledge Seekers Workshop; October 8, 2020

ENGLISH TRANSCRIPTION

(:10).

(:12). And that is we announce today, the establishment of "One City, One System," to start from today. What does this mean, every city on this planet will receive one system. We start with 100 cities. ... There are certain criteria to receive the system. There are a number of philanthropists who are backing this. Me as an individual, as HKF, as creator and developer of the T have committed 1 billion Euro of my own private assets to this development. This means in the coming year I release 1 billion Euro of my added assets through years, gradually into the KF to see One Planet, One City. I am not a philanthropist, I am a scientist who backs his own development. ..

(:14).

(:16). we do not give free to any city, because then it has no value, they expect it We'll see a massive development by the KS across the world.

(:18).

K- What was the last you heard

R:

(:22). K I back the . with my own private finance
if developments go the way I want I will back another 5 billion of my own private finance. Austria manufacturing ...

In the next 5 years I'll back 1 billion per year. ..

not the Foundation side. The F has to come through public, through the spread of knowledge

From now on it is the responsibility of the KF KS, (:24). to bring the T home. Bring it home in a way, opening centers, health centers .. for the KF knowledge to become a public assets..

(:26).

(:32).

Nothing will be given free, you have to make the effort for it ... and the funds will be there.

(:34).

(:36).

I thank you all for bringing it to where it is .

(:38).

Teaching Starts :

Tell it so They Understand - 5 Cups :

Going back into the teaching, there are a lot of ambiguity, and there are a lot of points need to be clarified. The HKF was telling me a couple days ago. You know what's the problem, people don't understand, you have to explain more that they understand. So we go into that depth, to explain, to explain where the knowledge comes and at the same time to bring the new T with new explanation. One of the main cornerstone of this T is the space development. .. it has to be understood in essence by the way it works, by the way it is, we look at the flight with the aircraft, with the spaceship, but the original flights, the original movement of any structure comes from the flight and movement of the M fields. If we understand the movements of the M fields then we can understand how the rest, how the rest come to exist, how everything else become, to creation, life, solid matter, plasmatic condition of intelligence as we'll see in the space and the rest of it.

In this process, especially in the past couple of months, and past week, there has been a lot of concentration on the 5 Cups. The Cup of humanity, or what we call the animal kingdom, Cup of vegetation, Cup of Solid state matters, the Cup for gaseous and liquids. This has brought a lot of anxieties and questions, (:40). and some of the people who are scaremongering have used it to create a scare across the KF, that "throw your Cups away and do every other thing," because don't forget, we have seen this scaremongering before, every time we were correct they started a scaremongering, because it served a purpose. Enemies of the KF sat within the KF, and in that process we become wise. They showed us with their way of trying to create scaremongering, where KS have not understood, so we have to explain, for them to understand, unknown scares, you, known is a knowledge, which adds and strengthens your, what we call, trust in what you do.

What I want to do today, is very simple, I start for you in a basic condition that you understand. As we know, ... (:42). .. **As we said, the whole structure of the world creation comes from movement of what we call, M fields. M fields only travel with, one way, and that is if the field strength from the point of stronger, it creates a gradient, that the stronger field trying to reach the weaker point, it creates its movement.** In so many ways, in the history of the science of man, no one ever understood why and how M fields flow, how and why M fields travel in the direction, in a certain speeds, and how this speed is seen by detection system, but not by the eye of the man.

The Secret within the M Fields - Invisible :

In so many ways, there has been a secret, which is actually within the secrets of the creation of the M fields themselves. Mankind or any creatures of the U, depending on the strength of the creation of their own fields, only can see what is visible to them. Only can see what is, or has physical manifestation, but mankind and the totality (:44). of the **Knowledge of the Universe sits and lies in what the mankind cannot see.** What is not and has not been visible to him. In a way, the work in the background,

which humanity and the rest of the creatures of the Universe do not see, creates the puzzle of the motion of the M fields. In the Universe in the condition of creation of M fields, M fields and creation of the motion in them, has and possesses an invisible, what we call field dimension, what you call atmosphere, what we call, magnetosphere. What does this mean? Is that even though the field looked to us as it is moving in a direction, but itself due to inherited characteristics of what we brought into the discussion last time, the wave of photons and particles, the particle itself creates a massive, massive atmospheric condition around itself, which in that atmospheric condition, higher order fields travel in the depth of it, much faster than the light we see. So in fact, we are puzzled why a light moves in a certain direction, where is the gradient from. The gradient is created by its own internal magnetic magnetosphere condition, which pulls it in that direction. (:46). If you look at it, the rays of the Sun expand beyond and create Jupiter and Saturn and seeds for the future generation of the planet. What the world of science has not understood is that the light as what you call particle, creates a massive magnetosphere, which is far beyond the vision, sight of the man and other creatures. So it has by inherent conditions of its creation, has created a M field forces within itself, that allows the light to travel within that magnetosphere. So if you look at it, it sends a hidden fields ahead of itself, and then by inherent, coherent condition and interaction of the fields within the structure of the, what we call, particle, tries to feed it. In a way if you understand it, it's like you shooting an arrow and then running to catch it. As simple as that.

The creation of the motion and the expansion of the U is done on these basis. And to the point where the field can keep interaction MG field force with its origin, then the fields become in motion. M fields become in motion, then the structure finds movement. This is how the U expands, this is how everything else moves within the U. (:48). ... In this process now we understand how the light is created. In a way, the plasma of the soul is trying to reach the field, which has created by high order, MG field of itself, creates the condition of the motion of the fields in a particle. If this is understood, everything else about the world of creation becomes much easier. In a way, it's a magic show that now we have opened its secret.

The Whole Creation Started with One Field Interaction - The Creator :

In a way, what happened, the whole creation started with one field, interaction of one existence, the Creator, and in spreading the fields itself, in the dimension of the higher order traveling faster than the physical dimension of the matter states, or plasma states, made the light, or the fields to manifest and show its direction, trying to catch up to the arrow. For the first time in the world of science, we understand the principle of the motion of the light. If this is very hard for you to understand, always find a copy, always find a replication that it makes it easier. In interaction of the fields in upper atmosphere plasmas are created, some as photons and some as particles, some as waves, and in that process, in being pulled by a weaker arrow, (:50). which has already arrived, in the center of the planet, the photon travels to it. In that process, not only releases what we call photons, but it releases the condition for creation of the materials, in the motion of its own plasma, leading to creation of matter state. Once we understand this, once we grab the science behind it, intellectually analyze it, we'll find that mankind has opened the door to new ways of transportation. I throw the arrow, it's part of me, try to catch it, I arrive. But you have to understand, this process of transportation needs massive amounts of understanding. Some of the travelers of the U have already

achieved it. And it's for mankind to reach to that point. In a way, chasing your own tail in the new dimension, but this time the tail moves faster, because of the higher strength, and as it loses strength it becomes a point of reference for you to arrive at. In so many ways, mankind needs to look in the direction and the position, and that direction and position becomes his destination and the speed of travel into it, and arrive at the zero-time and space.

In so many ways, those of you who are in understanding of the space T and space travel should have seen this coming to you very easily. (:52). In this process, once you arrive, what is the surplus of the position of the fields, you left behind in the MG fields you have created, become the matter states and creation of matter around you. So now at the point of reference you become the center, and if you need, want, you'll collect what you have left behind as they arrive to you as different strengths, as Cu, Zn, water and the rest. In a way, by the release and approach to the point of destination, you have created all matters that is in the strength of your own consumption and use. Now you understand the process of the creation. Now you understand how planetary systems are created. You understand how every other structure in the U is created. Start with one and in be able to send higher order fields, which is not visible to us, in losing the strength in interaction with other fields, and particles, and waves, and photons, and fields in the U, in the slowing down, now they have a G and M connection with you, and you trying to arrive to it, you become the center of it. You become the totality of what we call the principle section of it. (:54).

This process brings a lot of new conditions and new understandings, so in a way, as the field comes at a given strength, the field as a particle has already forwarded ... This is the photon, or particle I should say, which is moving, but with it, in advance of it, higher order has been sent ahead. In a way, this particle is chasing to reach this point, (:56). because if this (the particle) has a order magnitude of 10, this (higher order ahead) has a magnitude of 100 or 1000 so it moves faster ahead, because comes from stronger inner sanctum, In the world of cosmology, we call them cosmic rays. We call them neutrinos. And then as the particle tries to catch up, in its environment. .. In a way, I shoot the arrow of a higher order, and as it loses strength to one, now I try to catch up, and I create the direction of the fields of the motion. This is how we see M fields move, because in that process, how the original motion started. (:58). Now the U is full of fields, and in that process we don't see this operation so visible. But in a way, we see it in macro, and micro, both the same in the motion of the creation of the light at the upper atmosphere, and its attraction due to its strength to fulfill the need of the center of the planet as light. And then in that process particle themselves, according to change of the strength in trying to reach the center of planet, in interaction with a different field strength of the fields of, inside of the planet, leads to the creation of matter, and then as matter has both G and M field forces, it becomes matter and Inertia of the matter. Now we understand the process, now we are aware of the reality of the creation, which maybe up to now was not understood.

In that process, now we come to one thing, this light, this particle, now by slowing down in the point of arrival creates his own plasma. And if we create enough M fields by pulling from different dimensions and directions of the same strength, which mostly exists across the U, (1:00). we create the seed of a planet. This is what we call the Principle Matter, this is what we call the Center Core, this is what we call the, where the field interaction, brings the G and M fields. Now this is your first point, first point of

reference, what we call, MaGrav. You created the MG field of it. Now in the rest of the U, and interaction with the fields of the Sun, which continuously feed into it. And other sources of cosmos, which continuously feed it, the center core can .. Now the fields in slowing down will create matter state, and this matter state expands, and the size of the planet expands by the interaction of the fields of the Sun and the Earth. Now these themselves, carry, as had their fields, in converting to the matter state, create the transition of Inertia. So now you have not only MaGrav, you have Inertia too. Then the rest of the interaction of the Inertia with the MG fields, (1:02). and the fields around the planet, in a way, now you have 2 fields (MaGrav + Inertia) plus now the environment which they have created, leads to creation of matter state. So now this matter state has a condition, in the solid, liquid, whatever, depending on the interaction of the Inertia and MaGrav of the system. Then in that process, depending on where matter state sits and its center, it leads to the creation of the soul of its own physicality. And in the total interaction of the fields, in different mixtures, leads to the totality of what we call, Soul of Physicality (SF) in respect to interaction of totality of the matter state and the fields.

Now we understand why we have the 5 Cups. So if you understood this and you understand the theology, at the point of the creation becomes very easy to understand. How you create which one, gives you what you need. If you create the strength of the MG field of the Earth anywhere in the U, you connect to Earth. (1:04). If you create MG field of the Inertia of a given location of the Earth, you go to that point. It's the universal GPS system, not only for the position but for exact condition and the strength that you land on. The reason we put the 5 Cups out, was what we call the stepping stones for you to understand the start of the creation of life anywhere in the U. You want to go to planet Mars, you have to create a condition of MaGrav of the Mars in your system. Now the same as the light as you saw, matching with the light of his past, you travel to that position, to that destination.

In that reference we saw how everything moved to reach to this point. Now this point for you is this (MG). What the interaction of the environment of the fields gives you this one (Inertia). You want to land in Tehran, you create not only GPS position you call it a MaGrav, G of the Earth. you create the Inertia, where the total field of the matter state of the Tehran was made of. So not only you come to Earth but you end in the position of Tehran. Be it New York. (1:06). Be it Beijing, it's all the same, Because the Inertia is different, that's why we have the different matter states and everything else. Then you want to appear or produce in that position in the dimension of the physicality of the man, the STM has a spectrum range. So you come from planet whatever, you had a different structure. You create the STM in the strength of the planet. You take the feature of the man, then you decide in what soul and physicality you manifest yourself. This is the beauty of the creation if you understand it.

Those who tell you to throw the 5 Cups away, means throw the knowledge of the creation away. Of course we have seen this from the enemies of the F because they know you are reaching to the point of maturity, and by slaving you as they have done for centuries and thousands of years, they can still rule you. The knowledge of creation is simple. The knowledge of creation is so beautiful that now we have the plasma T that we can create different strength of MaGrav, different strength of Inertia, different strength of the matter state, we can produce anything, any position and travel to any destination in the U. Throw the Cups out, your nation will suffer to absolute poverty, as the ones who understand will rule you, and this is the whole, those who say that. They

slaved you for centuries, now they see the key of freedom, (1:08). given by the F, they have come up with a new tricks. If you are a simple man like me, simple to understand. Now you understand how in the coming time you will travel the depth of the U. Now by understanding the soul of the cancer, the soul of whatever disease you have, you can create its field strength of its matter state and its soul, (in) seconds done. As the HKF said, explain to them that they understand. When they don't understand they are open to abuse.

Now you understand and if you look at it, if you really understand and go back to the origin of the teaching, it's simple. Principle Matter (MaGrav) , Transition (Inertia + STP), and the matter state (STP + Soul & Matter), if you want to think in either way. There is no change in the knowledge which we transferred. Now you have to decide. When you are on Earth you have what you call fixed MG fields. When you are on Earth and you want to go from New York to Washington, or from New York to Tehran or another point, you create only the Inertial part fields. (1:10). And you'll be within Earth and you'll arrive at that point. And if you are on the Earth and you have the same MG field and Inertia, that in let's say in New York, you want to create the fish which is the same taste as the fish you had in Tehran, now you create the condition of Inertia, which applies and implies in Tehran, and then you get the same fish. With the new understanding of the T there is no genetic modification, it is the truth, in a way you create the condition and the soul will fit into it to fulfill it. There is no talk of genetically changing , it's to giving the Inertial value to it, that it can grow within it. Now you see why when we apply the T in a Gans we right off all the GMO, we have seen this in China, and other parts of the world where we go back to the origin of the seed.

Covid-19 Vaccination - Nothing

Many of you have a fear what this vaccination with Covid-19 will do to you. Nothing, because if you go back to the systems and understand the use of the T, they can give you kilos, tons of injections, because your body has set to be on the original dimension, as you created the AA of, does not effect you. (1:12). But you have to understand what you do. You have to understand the creation of the M fields in the dimension of the plasma in the strength of the virus, will handle it, but the injection of the new material will be converted. The control of the man, has to be in the hand of the man with the knowledge he carries, not by the fear which is created in him, not to see what he has.

As I said to the Iranian teaching on Monday, as one of the, what I call most illiterate people in the Iranian community told the F supporters to throw the Cups away because they saw the truth, and they could not save the man. And we see again by another person who we kicked out of the F, saying to throw the Cups. throw the Cups away. Now you understand this. This is the Cup 1 exactly what you have, .. if you don't see it, I explain to you. This is your Cup 1 (SF), this is your Cup 2 (S), this is your Cup 3 (M) , this is your Cup 4 (Inertia) , and this is your Cup 5 (MG). You throw the Cups away, you throw your nation to absolute poverty by those who will control, and those who tell you to do are the agents of the nation, (1:14). which you have seen, how to keep nations in absolute poverty. Now you understand the principle, the totality of the creation. I put it to you in a simple version, in the manner of Cups that the layman on the street could understand, that when he explains and understands the totality, not only him, but his children will not be taken to slavery by those who understood, and they block the knowledge. This is the European tactic, which has been used for centuries. Create fear,

create scaremongering, and control. There is no need to have a fear because you have the knowledge. In the systems you have created, if you understand how to use the fields of Cup #5, and you can transfer it in a position of dynamic, you can travel from Moon to Earth within seconds. The same as this field (original drawing) moved in following a weaker (field), created by themselves. You create Cup #4, understand the work of it. The fields of it, you can create any position, even on Moon, the condition of the Earth, greenhouse to grow your cabbage, potatoes or whatever you like. (1:16). You should have seen this in a true essence, what we saw in the Caribbean videos from our friends a couple of years ago. From now, not only the KS but those who work in the space T and understand this, can change the position of a space travel, zero-time travel, communications, where you use faster fields ahead, in a mono ?? micro and then you send your information behind it. You send a fast target and you try to catch it with a speed.

These T need to be developed, now that we are at this point the understanding, this is why I am backing it in every shape and form, and I call upon all you to do the same. Understand the T, understand the principle behind the motion, even the motion of the Soul of the Creator. The only difference is, what we call the magnetosphere of the Soul of the Creator covers the whole of its creation, and we are those rays, and photons, (1:18). and particles which has come from it, and travel within it, which carries attributes, because He was the origin. He has created that atmospheric condition and the rest of us live within it. The example of the Earth, Earth was created, this Earth seed, and we see MG, and then it has created the dimension of Inertia, which is what we see as its matter state, and then its magnetosphere, which everything else lives within it. That MG in the center is my God, is the Creator. And the rest of us in different shapes and forms, live within that cosmos of what we call Unicose. In a way we are created from Its own fields and transformation and transportation of its own fields. Now you understand with one pen, with one stroke you understood from A to Z of the creation.

You don't need no one to tell you what to throw away, because they slave you. They slaved the F for 20 years. No more. We are all free, teach free, learn free and invest in our future of planet, and beyond freely. The 5 Cups, understanding the principle behind it, (1:20). is the key for man to span of the U, to travel and to span it, to grow food and energy on this planet and beyond, and the freedom of the man from slavery of the time, position, space and distance. Those who tell you to throw away, is to throw the freedom, throw away your sanity, and you are slave to their slavery as they have done for centuries. I give you the key of freedom, the knowledge. It's for you to develop it, to understand it, and to manipulate it and to see to what you get. Change it slightly on the S of the matter state you get the Cu and the Zn. Transmutation of the fields is the strength of the understanding of the man, not the field itself. What you understand you can transmute. The process of the knowledge, the process of understanding, the process of being creative to create new conditions, new materials, is the strength of the KS trust in their own knowledge.

In a way, what you see on the screen is the history of the creation of the Creator to this position with man, and it applies to every dimension and every position in the U. We come from the fields, and interaction of the fields creates the plasma, and the creation of that plasma, (1:22). creates magnetosphere, which the interaction of that magnetosphere with the rest of its environment, which is within, creates its matter states, and that matter states within itself creates entities, which can live within it, operate within it,

which becomes you, me, the plants, the stone, and each one has a soul. Because again it has a center which lead to its creation. This applies from your kidney, to your liver structure to your body, to the structure of this planet, to structure of this U, the Unicoise and the Creator. There is no difference there is only one principle, interaction of the fields, the amount of it and how, and how fast you can throw to catch up, and with it create condition of manifestation of the atmosphere. Now you tell me, would you throw your 5 Cups away to become a slave to those who abused the whole humanity, and infiltrated the STM to keep him a slave, or do you free yourself from slavery of everything on this planet and beyond. This is what I said, when you understand the knowledge there will be no magicians in the U, and no one who can tell you what to do.

Mass and Weight Explained:

Do you remember how for centuries man did not understand why there was a difference between the mass and the weight. (1:24). The mass is that MG, the weight is the interaction of it, with its field environment with its creation. There is no difference. And how that weight changes you manifest yourself in different strength, 100 kilo on Earth, 80 kilo on the Moon, 60 kilos on the belts, but in essence, your mass, the creation of M field of your soul stays the same. Now the science of creation becomes absolutely child's play. I told you by 21st of October we complete everything which is there.

British Deceived Iran Before to Get Oil - Same as Today :

And at the request of the HKF, explain to them that nobody can abuse them. And I think this is the best, perfect explanation, and we all understand, and no one can abuse us. As I said to the Iranian community on Monday, throw the Cups according to the joint, what we call the work of the devils, one from outside and one from inside Iran, and bring the nation of Iran to absolute slavery, where it started the knowledge with. We have seen this before, as I explained .. we have seen this last century when the oil fields of the Persian Gulf become known, British did a very clever move. They didn't want the Iranians to enter the oil zones, they sent a guy, a British to live amongst the tribes near the oil fields. (1:26). For 7 years he did not talk, he listened to them. Then after 7 years he started talking, he said whatever he said, and they looked at it (as) magic. He used to wear magnetic shoes and they used to stick together, the people never seen the magnets, the shoes stuck together, so to the people he became a magician. .. he told the Iranians not to go near the fields, these things are dangerous. They were dangerous because the British were siphoning oil out of the Persian Gulf and territory of Iran. And now we see the same, the same betrayal by those who came in, pretended to be, and now started telling, don't touch, because now the knowledge is dangerous, they loose control. Now they appeared themselves as everything else, except as the savior of humanity.

Everyone Can Understand the Creation - Don't Need PhD:

You got to understand yourself why this knowledge is so beautiful, because every man can understand, every man can support it, and every man can carry the knowledge. You don't need a PhD in stupidity, and you don't need PhD in Physics or Chemistry, if you understand it, you are intelligent enough to apply it to the measure which applies to you, and what brings you the satisfaction of existence, irrespective of the position and title you might carry. Now in a simple way, in a simple word, in a simple understanding, the whole point of the creation is in front of you on the screen. (1:28).

Awareness of Soul Protects Physicality - Even from Covid Injections :

You made the Gans's, you understood the transition of the fields. You understood the transmutation of fields through your body that you overcome Covid-19. The beauty of the plasma T in essence, is that it matches the dimension of the need of the soul. And the soul is aware of what has been injected to it, or given to it which is not good for its physicality, be it the injections by Covid19, or any other thing. Awareness of the soul protects the dimension of the physicality, and this is where we are heading for in the coming time. In the coming weeks we should show how to do that, that you become the travelers of the space as Mozhans. The time has started and we deliver more. Because now you understand it. All I need to do is to show you where the soul sits, and what strength it has and where that soul in such a given position of MG field, will manifest itself in what shape of physicality.

Any questions. (1:30).

K- I think Mr. Rick Crammond you have a lot to do in your workshops.

R: I kind of laid it succinctly Mr. K

K- There is no doubt in the knowledge, now every man can follow.

Q: so the Sun is the fast target and the planets are trying to catch it?

K- No, the Sun is what it throws away, the rays of it, at higher order, and when they slow down to given fields, then the other fields from it, as particle try to arrive to it. And in that process of transition they create light when they interact with physical conditions and magnetosphere of the fields which created the Earth.

R: Okay, but what about the Sun itself (1:32). in relation to the galaxy ..

K- The galaxies have created the same

R: The Sun is following a path that has been already made for it by the M fields, correct? The fields came first and the Sun is following that? So are the planets following the sun ..

K- The same position

R: I think that is what he was trying to say. the planets are playing catch up to the Sun. The Sun is playing catch up to the center of the galaxy. .. center of U

K- yeah it's not only to catch up, but to be connected, to be the target. But its that target and its position is amalgamation of all the fields within that galaxy and U, which gives it the position. The same with the Earth, the rays of the Sun, lead to the creation of the center of the Earth, what we call creation of its MaGrav, but once that MaGrav is created the position of the Earth, is not only dictated by the Sun, but it's created by the other entities within the structure of the solar system, and by certain measures by the fields of the galaxy, and by another certain measure by the fields of the Unicose.

Q: So thought is ray, and is stronger, (1:34). sent by the mind creates position, and we imagine, and call it, directed by mind, and then the body gets pulled into it and manifests according to the environment. So we are all gods.

K- We are part of it. We are created by its fields, and we manifest ourselves according to the position, place, and the field of the strength accordingly. I made man in the image of Myself, because I made man from the fields of Myself. It's not that there is something called God, separated, and then other things came in it. The reality is it is not 2 things, the Creator and us. It's us created from the fields of the Creator.

Q: You always say that only fields of the same or similar strength will interact with one another, yet it is the difference of strength which creates the gradient that produces the motion of the field. Can you more clearly explain that?

K- You see when we send a field ahead, because we sent it, it carries part of the strength of the connection of the fields with us. (1:36). It means because it came from us, it has that field strength connection. So it is not something abnormal, it comes from us, so it has a connection fields from us to start with, but of a higher order than we carry. And because it is created by us, it carries part of us, it has a connection with us, it's the same thing with the Creator. We come from the fields of it, so we have connection to it. And this process is the same.

Q: .. (1:38). I have been working on a MaGrav coil flight system, ..

K- Can you explain to us what the system does.

Q; whenever we want to flight we have to connect to a certain field strength of the point of destination ... and I try to do this with my system, but I think it is too weak to achieve this task so I try to create a base reference point where the system can push away from it.

K- Instead of going by G, you choose the path of M, this we understand. This you need when you are taking off from a planet. So you are approaching it from the reverse, instead of getting pulled to, you push yourself away. We see this, you are not wrong. We see this with the flight system of UFO over Jerusalem, over Christmas, if you understand it. .. you are not on the wrong path.

We saw it over Jerusalem the UFO, it suddenly takes a flashing vertical takeoff. .. is not by changing G, (1:40). It is using the M field of the Earth in a reverse condition to push you away. This has been explained in a number of papers. In a way, .. but you have to understand it. We have 2 ways of flight, we can reduce G fields of us, let's say in a flight system, in respect to Earth, or let's say we connect to the G of the Moon and it pulls us to it. The other way we match the magnetosphere of the planet. And the push of it throws us out. This is an extremely dangerous way of .. it's like going on top of the Eiffel Tower and jumping off without a parachute and hoping to survive. It has to be done ...

The danger is that your M shield is very thin. So if there is an aircraft above you hit it, or you literally decimate it. So what you talk about increasing the M, is the correct way of taking off. (1:42).

Why KS systems cannot Fly

Q; Do I need to create opposite rotation ... fields to be in the same direction, same line of movement.

K- I go back into what they call enlighten, or give you some information. If you look we don't see flying objects coming in the same direction or flying the same way, moving up or moving down. They don't always come from north to west or west to north or whatever. So the direction of flow is not that important if you understand the strength of the flow, and the Inertia of the flow. The reason you cannot fly is that you have not created the field Inertia. Or you have created a Field Inertia, but you haven't created a field MG. This is one of the reasons most of the people who work with the KF T never succeed because they haven't understood this. (1:44). A flight system of the plasmatic condition is a combination of MG, I, strength of the physical structure and the soul. And you have to create a system that encompasses all 5, that's why we gave you this Cup of 5, for you to start practicing. Try to see if you can match, try to see if you can replicate.

So when you try to achieve lift and flight and you don't, you have to see which part you have achieved.

1975 Serral Flight rotating solid magnets

If you go back to 1975, and Serral flight system where the motion of the MG field of the number of solid magnets to the speed and rotation has created lift of the vehicle, they have created the Inertia strength. And because it's a huge number of magnets circulating the high speed within each other, they create a spectrum of the fields of the matter state of the Earth. If they could create the MG, M and G field of the Earth then they can fly easily. But then you have the problem of what is the object inside it, would it survive? SO you have to create multiple conditions and systems, you cannot do.

Chinese Flight System had 5 Cups

I think if you look at the Chinese system of the flight for the space travel, is that system. We have created the MG, the I, the S, the M, and the ?? ?? (1:46). When you speak to those who were present in the trials in Sanya, we could hear not the sound of the motors, but the interaction of the 2 fields with each other, it was like talking with each other. We could hear space noise.

STM through Fields is how we Talk

This is how we talk, we create the motion in the direction of the soul, and the STP and then interaction with the matter states which we have put in as vocal voice becomes the sound we create. Why do we talk our emotion, how do we explain, you have seen, you have seen we explain our emotion, so rapidly with words, with physicality, we transfer the fields of our soul, in the strength of understanding the emotion between the physicality and the soul, and that field in touching the vocal box, which is of different strength becomes the voice. We don't have a nerve system to communicate, send the information, such a thing has to vibrate to make this. The STM in interaction of its fields with the strength of the fields of what we call, another fields of tissues, made that tissues, vibrate, creates that noise, becomes our voice. This is why we can speak so fast, because our emotion, in interaction with the fields of the other entity, which is flexible to move, in interaction becomes noise, becomes our voice, becomes the voice of our soul, becomes the voice of our emotion. Mankind has not even understood this, we just got a voice box, (1:48). How come we loose our voice, but we still think, we still have emotion, because In so many ways, this vibration in tissues, need to be continuously charged that they can respond to the fields of the emotion of the STM and the physicality soul within the brain of the man. That's why we can explain our emotion so easy with our voice, with our face, with our eyes. If it is of a certain strength it becomes tear, or laughter. Now maybe you understand, how when you think you talk, because the strength of the man has created his vocal box in a way, of the strength of his emotion, and then the 2 when they vibrate in connection with the STP becomes, noise, emotion, laughter. That's why messages are not sent one by one, messages are sent by the strength of the emotion and it is like a ??sunray of the Sun, when it hits the vocal cords becomes noise. I can make you talk without the voice, without a vocal box. Test something, I used to do this a lot with my children, put your head against your child's head, ear to ear, and start making small noises, and then listen to what they respond. (1:50). And then do the same, do it with your soul and see how they respond. Children

are easy to do. Men when you do it with your wife or whatever you have a preset, children are there to hear the noise of their soul. This is one of the ways you enhance peace in the soul of your children. Just put your ear to their ear and hum, and see what they hear, because at the point of the ear is somewhere where the 2 energies of the 2 souls meet. We create a temporary condition of interaction. You create a different bond with your child when you do this. We do this when we make love to our partners, when you are face to face, the 2 hearts come. The 2 STP create a magic point in-between. We know this, but we never understood this. Then you can do some simple things, you think to your child and say, now we go separate, don't talk, you see he moves his head away. Man has forgotten half part of creation, when you have a child, when your wife is pregnant or in that position, when you talk to your child, put your head on the ear, (1:52). on the womb of the wife or the mother, and you communicate with the soul of your child. You give the information which it translates inside to what you have said, because it carries the knowledge of the soul, the emotion of your soul, "my child I love you, Papa is waiting for you." Men talk to their children, touch, and transfer. This is how you elevate the soul of your child, how you guide it through the path. Understand the reality about the creation and then you can create guidelines, paths for everything to be the way it should be. The problem with the present knowledge is that we just create the child, and it is for it to grow. It is the responsibility of the father more than the mother, as she is the carrier of the one part to transfer that energy, and create the condition of evolution and the emotion of the soul of the child at the point of inception. The responsibility of the father is not just to give an dot make the first seed and that's it. You enhance the body of the woman. (1:54). You enhance the womb, the condition of the physicality for the elevation of the soul of the child. Being a father is not just as they say, shake and go. You have to take responsibility and position with it, and a lot of parents don't know, don't understand. It's not bonding, it's elevating, it's totally different concept, it's a totally different understanding and it's the way the U works. The Creator did not create us and left us on our own. Forever He sent us messengers to elevate our soul. He sent us the condition and different way for many people to understand. In so many ways, through His own soul elevates our souls to reach the new condition. Any other question

J: .. with the Gans material, say CO₂ Gans when we make it, we put our intention and our love, (1:56). into the process when we make it. If we have an elevated soul and we put an aspect of our soul into that Gans material, is it strengthened by orders of magnitude more? whereas before is maybe carry a field strength of 5 feet, when we do it with elevated soul it carries a strength much bigger, can we get the Gans material to light up if our soul is strong enough?

K- You can, you got to go back to understanding the property of C. C has a specific condition and it's very much like Deuterium, it's the construction of the D in the open span of the U. And it's line of communication, connection with all other fields, because the C or D in so many ways, orientation becomes the diverter and reflector of the fields, of the M fields of the Plasma. In the physical matter we use prism to change or deflect the light to see different colors. In the U the only thing which deflects, and reflects the M field and motion which man never understood, many tests have been done, (1:58). to show the light can bend or the fields can bend is the position interaction with the sphere of the what we call C, magnetosphere. We see that clearly within the structure of the neural system of the man. the switching of a C creates a diamond structure or superconductor. And it reflects and deflects it. So the C, only C, when you speak about CO₂, or when you use D you create that point of reflection and deflection of the rays of

M field. You cannot destroy it, you spread it. Break it up and you link it to another point. In a way, if you put a reflective mirror in the ray of the Sun you can reflect it to where you want

separating the C from the O. ..

(2:02).

Do you understand?

J: I will try some new experiments. (2:04).

K- We keep you busy. You see to do it.

(2:06).

(2:10).

We do not reach the people come in, they come on their own accord.

(2:12).

In Iran the KF has been registered as a company, and they have started delivering.. .
KF Iran has started distributing One Cup One Life freely to the population.

Saving life has to be free at the point of demand for those who cannot afford it. This week the Iranian KF, put all 3 out (2:14).

Any other question.

Q: from Jenia (2:16). .. (about the 5 Cup teaching) if the MG interchanges act as lens's, and the I + M + FS act as lens's also, in rythmic manner with each other thus changing the space properties.

R: I am not sure if you got that question.. allow you to talk.

Q: I am from Jerusalem (2:18). .. UFO video .. I am familiar with your foundation for only about 2 weeks. I was excited about it because I was interested in the field of metaphysics for some years. To sum it up the knowledge which you tried to deliver it, it was like the missing puzzle for me. When I saw a video of Nicholas... that's what hooked me up. So from my understanding of plasma and all the fields, was, it's like a divided condition, of balanced condition which makes motion, and motion is like .. the initial particle, that you call it. That makes the MaGrav fields, which are just the same fields, which goes to in opposite directions, and interacts with each other. So I am trying understand, this topic helps me to see as lens, (2:20). like every condition, every environment are like different condition of lens's, which interact with each other. So I try to understand the Cup concept, which I am not familiar yet. I am trying to figure it out, because I was watching what you were showing about a half hour ago on the board. My question is how to, from my point of view I see those Cups as optical, like they make optical conditions with each other, that with interaction with each other make different conditions that allow some fields to pass through, and some fields to not. It's hard to describe pictures in our minds sometimes in words. So I try to put this question online and see if Mr. K might interpret in a certain way to see your reaction. In a topic of optics, to see the fields in an optics manner.

K- thank you very much. In so many ways, you are not far wrong. (2:22). The Cups are set not as optics, but as a field interaction system in respect to each other. Starting from

weakest in what we call gravitational strength, but strongest in G attraction, and visa versa in M. And as they create that field expansion, they interact with the Inertia, which we have created by the matter state of the fields MaGrav system, and in what those 2 interact, and what we have put up as a soul, then it creates the dimension of the physicality of what to be. In a way, you call it optics, we call it, interaction of fields, what is created from the bottom, in interaction .. that's the essence of the creation, or Cup #5 - the MG, in essence is all the same in all the plasmas in the U. What that field in a given position and condition, in interaction with its source which created it, creates that Inertia, which creates its matter condition. Which in that process, the interaction, what fields, the Inertia and the source create, leads to the creation of the ?? soul strength. and then interaction of the soul strength, with the 2 which have created it, (2:24). gives it the physicality and the STP. In a way, if you put it this way, the MaGrav, the Cup #5 becomes the source. Cup #4 is created from the interaction of the source and what created it, which is the Sun, which creates that Inertia self, by itself, back to its position. And then the Inertia and the MG field of the two leads to creation of the soul. And then the soul in interaction with the two, leads to physicality. This is why when we get to the certain points, or the mountain, we see a tree line, no tree grows beyond that line, because the Inertia in that position, in respect to the MaGrav of the planet, does not support soul of a plant, that in interaction leads to the creation of the plant. Now we understand the process in its true meaning. This is why we see certain creatures cannot live or exist in certain positions, because the interaction of the fields fo the Inertia and the MG of the planet, does not support the soul of creature, creation. This is why we have .. you see this, especially in Middle east, in Jerusalem most probably been there for thousands of years. (2:26). Some water wells have fish in it, some water wells don't, it depends on the depth and interaction with the planet, and the mixture of the water which runs through it. You have waters which run for centuries with no life in them, or certain minute life. But some water lines run and they create life, fish , because it is according to, if the interaction of the Inertia field strength of the matter state in that environment with the MG allows the creation of the soul of what can be living in that water which crosses, and leads to the creation, manifest itself as a fish. Now we understand the process of creation on this planet and everywhere else. A running field like a water, creates a running structure like a fish. Then how the fish wants to grab, to stand, or to walk, or to hold on to, or whatever, leads to creation of other entities as we know. You call it optics, we call it a field transformation. I hope we answered you?

Q: Yeah, you sort of answered me, because we all have our own definitions so it's something I have to meditate and think about, (2:28). before I react to it, so thank you Mr. Keshe.

K- I left you to meditate by picture.

Q: .. Dutch ...

K- Dutch Holland is our home. ... many good people.

Q: So when you were talking about Inertia, life in the deep sea versus, you also talk like there are intelligent beings in the sky right? So

K- Intelligence is everywhere. (2:30).

Q: So if they were to make the Cups they would have the same MG Cups but they would have different Inertia Cups as you go up and down the ?? sky

K- Yeah, if it is within the boundary of the planet Earth, yes.

Q: back to the MG Cup, if I want to go to the Moon, am I separating my Nano coated spiral Zn away from each other, or pushing them together to change the gap. or ?? introducing another material ..

K- No you have to introduce the MG of the Moon.

Q: How do I figure out what the MG of the Moon is?

K- We have the facilities to measure certain amounts of the U at the moment. Partially the matter state or the Inertia state of the surface of the Moon gives us a partially a clear indication in respect to MaGrav of the Moon as well. You have to realize that any entity within the solar system has a common denominator MaGrav strength. So you have to find the ?? solar MaGrav strength, and then the position strength of the Moon, and the strength of its Inertia will give you the ?? surface of it. Then you can choose where on the Moon you want to land, the surface you see. And then there are options when you approach, you change to matter state, physical state matter of the surface, (2:32). that you can position yourself anywhere. In the liquid, in the different depth of the planet ?? the surface or above it.

Q: ???

K- In a way, .. (back on the board) you have to extend the knowledge. wait . If you look we had the MG of the Earth, and that MG, then we had the Inertia of the Earth, but this in totality has another MG of the Sun. So when we want to travel anywhere in the solar system, we have to tune to be within this range of the MG of the Sun. Then we stay within the boundary of the solar system. So our common denominator is this (MG of Sun), then the common denominator of the MG of the Moon, and then position of what we call Inertia. The Inertia could be liquid, gas, or solid. You want to be on the surface, or in the depth of the liquid, or you want to be in the gaseous above, or on the land. So our MaGrav system has to include MG. We want to travel outside the solar system we have to consider our galaxies position. (If) we want to go to sub-matter we have to understand the sub-matter condition. . Now the knowledge makes sense. You want to travel into the center of the U then you have to understand the U field and what strength is that, and then you do the same in which U in the Unicose or the dimension of the Creator. Nothing changes, it's just how we adopt, what strength we use.

Q: So in reference to our body, you are coming up with the cures, in the Body EU and uses some Gans's to cure yourself. So we use. So do we look at our body the same way, Does our body have an MG too. (3:36). Or we have an Inertia for certain organs, and .. I know we have an over physicality in reference to the MG of the Earth, but

K- Yes, you have to do the same. You have to do the same with the soul. yes. Then you do the same with the soul of the Cu or the Zn. This is why, one of the reasons, we embedded as part of the structure we have been explaining for some time, the soul of the HKF in the system. That's a point of reference for humanity. The soul of the humanity, and a peaceful soul of the humanity. Now maybe you understand why.

Q: That's how you were able to figure out how to cure people of different diseases, because you have a reference like you have set up here, for any entity, right?

K- Yes.

Q: I have been trying to get my head around this for like 7 years now.

K- Now you got around it, or it has got around you?

Q: I don't know. .. it starting to look like good morning. .

K- I hope it is a very good morning. (2:38).

You see we do a lot of things, we talk about it. but people don't understand at the time. And I have been told many times, "don't say this, they don't comprehend they need to work a little bit at it." In that process a lot fo things put in the structure of the systems and everything else is explained but never understood. There are a lot of things ahead of time in all the systems. You want to travel to a dimension fo position in the U, you have to understand the strength of the soul of existence in that U. That you can match, you

can interact, you can elevate your soul with but still keep the soul of humanity or human race on it, in it, within it.

Q: Thank you

Do you want to go on **commercial Break** ..>> (2:47).

Any other questions.

Q: we are a particle of the Sun that is the maximum creator and our souls create our physicality. if so why does it do it, for what? If it must, evolution evolve to reach the soul? (2:48).

repeats ..

K- It's part of natural progress of life. Nothing we can do with it. It's a natural process. Nothing else.

Q: You said we are going to have an EU in each city ..

K- We'll start with one unit and see how it develops.

Q: maximum 12 (2:50).

K- We prefer them to be at one center .. about 1000 sq meter.

Q:

K- Because of the Earth G fields is too strong, so we separate it. about 3 or 4 meters off the ground.

The KS of the country have to back it ... (2:52).

Bret: Hello

K- Hello stranger.

B: I am not a stranger, you know I am in the background.

You have to be 20 feet off the ground to get away from the fields of the Earth.

K- what has to be ... you can be 100 feet it is still at it.

We have facilitated a system inside, that within 3 or 4 meters we are pretty safe.

B: I am saying in general ..

K- would like to introduce yourself.

B: My name is Bret ?? Baggart, I have been around the KF from almost the beginning. I am part of the Core Team,...

K- Bret is one of the 12 Core team of the KF US citizen.

Any other questions

Q: So we envision the location and we are drawn to it?

K- If you elevate your soul to reach that position, yes you can. (2:54). Understanding the process, just not to vision it, visualize it. To understand the reason why and how. Any other question.

Q:

Q: What plasmatic fields forms between a N Fe coil and normal one in saltwater?

..

K- There are all different conditions, they create different M field strengths, that's all. (2:56). Q:

K- It's all the definition of the field strengths ..

Everything you add or you put you create a new dimension.

R: How would they find out what plasma field forms between these items.

K- It's just measuring the strength of it. It's like we know the Zn and Cu create a near enough C field. It comes by experience till the coming time measuring tools can tell you exact size.

R: in the mean time is that part of feeling the fields?

K- understanding the strength difference and how and why. You see Fe and N Fe are 2 different field strengths, even they are on top of each other. That's why they are separated. The top layer Fe has totally different strength then the N ones strength. Each layer creates its own fields, its own condition. (2:58).

Any other questions.

Q: different intensities of light.. they were flickering ..

K- can we see it. ..

R-

(3:00).

K- We see that with most of the video nowadays .

R: .. we should do a little more research .

K- We see these quite a lot .

Q: I wish to join with doctors ...

K-

(3:02).

(3:04).

Q:

K- the systems will be bought by the company setup in that city ..

(3:06).

Q: we're just doing a Corona system for person in Germany .

When it comes to KS who collectively get together

K- Yes of course, when many KS gets involved the better it is.

The UC decides ...

(3:08).

Every 10,000 of it is 1% share of the company. So if people want that share it will be allocated. That's what has been done in Iran ...

From now on we try to spread the knowledge rapidly. ...

(3:10).

Q: Maraneds ..

K- Medical doctors ..

Q: How long does it take for the medical doctor to be trained?

K- It will take 1 week, all the teaching will be recorded after the first week..

(3:12). And then it goes through.. gradually the doctors decide how they want to handle the patients.

Q: Is there a guarantee if something happens to the machine, it doesn't work , it would be mended .. ?

K- What do you mean.

Q:

K- No the machine works for every reason, the only thing is if the field is set for the case given. It's not the machine doesn't work. the machines always works. It's just that. .. we have had cases of people they benefited by and then they said it didn't do anything, and can we have our money back. and we done that and we seen what happened to them. the system is set for the enhancing the tissue or whatever it is set for ..

Q: When can we order one?

K- Today.

(3:14).

Q; Even in Europe it is set.

K- Yes .

Q: Is there any other U exist which use the same law adversely .
is there any other U which doesn't follow this MG fields.

K- No it cannot be created.

At the moment we are trying to conquer the Earth to understand it.

Q: Even the soul of the stone .. elevate ?

K- the state of the soul is understanding of the state of ones self.

Q: The stones I said. (3:16).

K- Put it this way, you don't expect the stones. You reach mutation. You know in Farsi say, it is how you elevate the soul to reach to what extent
Even the stones have a soul.

Q: I have heard that souls that are not good they might become part of stones for long time. before they get >>

K- We can hear anything we like.

Q: Because the people who do bad, nobody punishes them, they go where?

K- We are not aware of their punishment, but in so many ways, they find their own positioning.

Q: .. that correct, So you say a stone by waiting a long, long time and they might elevate?

K- It depends, if you believe in the transmutation of element you change a whatever to gold, which has a higher order, which means higher strength, which means even the Fe can receive fields, that in the strength of its fields can behave as a gold in respect to its environment. And there is no limitation in the field strength of the any entity. (3:18).
Shall we call it a day.

As we seen today we have started a new process for the KF as the knowledge and the T will come directly ?? to you. This is the time to start and we support it, and the KF Austria as a source of the T will develop and deliver. And now it is in the hands of the

KF KS to move. You wanted a system to be in your city, now we facilitate it, we back it, and we develop it. And then maybe these centers become the centers of excellence over time. But my advice to UC, EC members, and .. EU is try to be correct, try to introduce equally across the whole planet, and all the nations. In so many ways, be impartial to place of birth and language you come from. Look at the benefit to the totality ..

(3:20). we deliver more to be done .. we have literally put the whole backing to the F ...

from today we understand the principle structure of creation, what I call inception to its final limitation as a body, be it the planet, be it plant, human body, or a stone, water, or gas. Now we understand more, the way the life is created in U.

Thank you

As we head to 21st of October, from there on we start teaching knowledge which is never been known by man. Opening of the space T which adds to the enhancement of the knowledge and the soul of humanity.

R: 349 KSW (3:22).

END
