

## **358th Knowledge Seekers Workshop**; December 10, 2020

### **KEY-PHRASES:**

### **SUMMARY:**

### **ENGLISH TRANSCRIPTION**

(:06). in past weeks .. years we have learned maybe a little bit, a touch on the surface of the KU. The world of creation on the level of matter works and how mankind in time will learn more about its own position, place, and own strength in the work of the creation. The knowledge of man is more or less like every other race in the U, is accumulation of the learning of others adding to the knowledge. At the same time .. villagge by villagge, and now with the new method of communication open to man he has learned to share knowledge across this planet, but still in the dimension (D) of the physical life. (:08). In this process mankind has entered a new D to start sharing knowledge beyond the boundaries of this planet. Mankind is learning to share K not only with .. but with the citizens of the U, mankind needs to grow, not only mentally but psychologically in way to understand the work of his life not depending on the physical condition and physical matter, working on a condition through the universal energies that mankind can absorb to live. In the travels of the man in the U, mankind cannot take trees, plants, and animals to eat and slaughter and try to sustain life. For this purpose we have start teaching that man become independent of physical resources but like the rest of the .. (:10). For mankind to learn to use the field forces of the U, and in interaction and accumulation of ?? to become the user of these for his cycle of travel in the depth of the U. Many years .. of the man's lives in spent in worrying how he will survive the next day, what does he need to absorb from the physical D of this planet to exist one more day, where the water comes from, where would his O , air he breaths, his food come from, where heat, and warmth for the security of his life come from? These are the shortcomings of the life of the man in the D of physicality. Where mankind can learn to live in the D of the U, where the energies of the U have converted to become that air, plant, animal, that heat that he needs to live his physical D. The teaching of the KF in past years has been to bring mankind rapidly to this level, to learn to live like most of the living entities in the U, using the universal energy, which means what is available as fields in the D of existence in the D of time, space, and the place where he will be. In the past .. months we have seen evolution, (:12). at a rapid changes in the cycle of mankind which he never knew. You used to be locked down in the castles to protect ourselves from the enemies, and now after centuries we are locked down in our cities with the open doors, but we have made castles, by the governments, and the forces that mankind cannot move. In a short time, as the farms have not been farmed as they have been forced to do it, the animals will not be there because of the conditions created, gradually in next times to come, there will be a shortage fo food, of clean water, there will be gradually a condition, who can afford these kind of lives, we use to have disasters, calamities .. but this time man has made his own volcanic eruption in the course of introducing, enforcing fields, and energies, that has disturbed the cycle of life. What we see from 12 months ago to today, the whole structure of this planet has changed. The way we used to live and think has changes. We could stay for 2 weeks for vacation ..

We see in this process families will run out of food, because they will not be available to afford to pay, (:14). they have not worked, governments will run out of money trying to support this high scale very few nations have the reserves to withstand long-term process. Then it comes on the process who can be useful to society can have the right to live, mainly through the process of food, health, and being able to pay and we only pay those who serve us. One of the biggest problems to go through the process of this virus, which has been introduced in any shape of form, and is to reality and the truth, we do not know how it has a spread one planet in less than one day. The records show that the virus was spread simultaneously within a very short time right across the planet. And it was detected according to the strength where it was enhanced. 29th of December last year, we saw it in China, suddenly it popped up in Iran, and then the whole planet is in the grip of it. The data shows it was with us last October, the data shows the initial cycle was seen in September. Now we are heading for another few after another few food cannot be supplied to hunger. (:16). We see the cycle of change needs to come in that mankind is ready for that eventuality, and maybe to change the course before that eventuality arrives. Last year on the 24th of January, I gave a gift to humanity, One Cup One Life, to save the life of the man from the process of the overcoming the virus, what we call, that we could survive it. We have saved millions of lives in China we started. In Iran the progress is still the same, people trying to help, all over the Europe KS have gone to that step ...

### **One Life, One Cup, One Food**

Now 12 months later we come to, where does the food come from. Today for the first time we teach you the principle of One Life, One Cup, One Food, which means from today you can feed yourself irrespective of any condition on this planet and beyond. Today's teaching is to teach man how to feed himself on the levels of the energies of the U, understanding the process of life, how in the world of creation in one way or another life can be sustained. I try to very clear to teaching you how to serve, to save your life in the depth of the space, and in time it is your responsibility, (:18). to translate it in the physical D of the man. In the process of the U we do not feed the physicality, we feed the STM, that through it, it feeds the STP, that it feeds the physical D of any position in time and space in the U. One of the most important points humanity has forgotten is the fact that the man has always been a passenger of the U. We have always been travelers. As

We are traveling at million mph in the galaxy and the U.

Releases energies viruses the body can't handle ..

(:20).

We will receive new energies called new viruses. How do we survive these ..

but we have a structure called the STM which can protect

(:22).

If mankind understands the teaching of today, mankind becomes independent of the food supply in a matter state from today on. We teach you the principle, it's for you to decipher,, to understand, to teach rapidly across the world. The way you taught mankind the Cup of Life (CL),

If mankind understands the teaching of today, thousands of years will be a second in the life of the STM, (:24). in the D of the U. In so many ways, what we need to understand, is to go back to the beginning of the teachings, understand and analyze every step of it. I prepared you for this months ago by teaching you the structure, the 5 Cups. The 5 Cups were set for you to understand the physical energies of your planet, then the Inertia, then the soul, then the STP, and the end the physical D. There is no life from the point of the MG field of the planet in the D of physicality, until you hit the structure of the physical life. All is fields, MG field of the Earth is a field transfer of a higher order. Inertia is another field transfer of the order, then the STM ..., then the STP is another field of the order, and then when the order reaches equal to the MG field Inertia, which is the physical soul of the planet, with the physical soul of the man, man manifests himself in the physical D. So in reality, if we can feed the man in any process from the MG field of the planet to its physical manifestation, man can survive, does not need the physicality to manifest itself to feed. He can feed the physicality, through the STP or through the STM, or through the soul of the planet. this is one of the reasons, (:26). we see so much killing on this planet, as the soul of planet through its combination of the fields, and the position, and the diversity of the life, has not managed to feed the STM, that the man in physical structure becomes the same as the rest of the passengers of the U, where he can tap into the field of the (video flashes, and ..)

where this virus has been a blessing for you to understand, it's time to move, as mankind never moves until he is put in a corner and is pushed to. Or is mankind ready to accept in one stroke, in one drawing of the pen, to join the U Community at least in the level of not consuming, not to kill, not to destroy another life to guarantee his life, guarantee the extension of the survival of the physical D. What needs to be, 2 points, if add to the strength of the STP would you change the D of the physical life, if you increase and add the D of the STM would the process of the manifestation of life in the D of the physicality move further that the life does not need to manifest in the physical D in the time, the place, the space, what we call planet Earth or anywhere else in the U. .. by changing the strength of the STM, or of STP, (:28). we dictate the point of manifestation of the man, in the physical D. In the teaching of today, from now on till the 21st of March, when the new cycle of life starts on this planet, mankind has to rapidly develop the understanding of life. I take away from those who do not, and will not follow the procedures as they will be deprived of the knowledge through their own soul and their own misconducts. Mankind has to take this step. This teaching of today would have been introduced a long time ago, but humanity was not ready for it. Mankind was not ready for it... Move to the fields, don't look at the physical D. Look at the fields of the U that you can tap into, In the process fo One Cup One Life, for the first time we let you feel directly the energies within the structures of the U. We made within the structure of the Cup an independent U, that you could tap into and take energy from. We extended it to Cup 2, we extended it to the 5 Cups, and the existence of the 5 Cups was important for you to understand the way this structure works, the way fields are transferred. When I put the structure of the 5 Cups together for you, was not for you to stack it up, it was for you to understand the field flows within the U. (:30). But as usual mankind went for the physical structure.

In this process mankind became more entangled in how things become involved. In this process we shared more and more knowledge....

but in fact what we were trying to teach you all the time was, how do the fields flow in this structure. What is the interaction of the fields flow between this (Cup 2) and this (Cup 3) or with this and this. But as usual mankind became too entangled in seeing what is produced in the cup. The reason we introduced this was for you to become familiar with the field flows within the structure. We showed you how to produce sets, (:32). for vertical people, then solid, and liquids and gases. None of you have followed the process for the gases as your knowledge was not gathered to be, even though it was explained.

beyond the gases you would have reached the structure of the fields in the D of the fields of the U. You were happy just to see this ... So we stopped until you understood, and some misguided people took everything with it to confirm their meager existence. But in reality the process of the U was the cornerstone of this teaching of all these 5 Cups to see how the fields flow, not only in, but how they interact, to see how the fields will circle, and gather from the U into the system. But as usual, you all missed it ...

(:34). in the air as a vertical people, then we understood the structure .

In the cycle of man we position the soul on the top where it receives more fields from the U, due to the dynamic structure of his soul and his physicality. Where with the plants, the soul is embedded with the interaction of the fields of the earth, and it is more limited in the structure, in motion of fields, as G fields of the planet has a direct say in what it fields can absorb. It's a compromise, you feed me, I stick with you and get something for you. or with the man, "I walk and I give back when I am ready." In so many ways, at the point of death, we give what we collected, back in the physical D. This is why the trees and plants can last for centuries, as they do not make the compromise, as they have made themselves prisoners to the MG fields of this planet. They already accepted the lockdown, from the point of inception. So we see trees lasting 500 years, or 1 or 2000 years. (:36). Where man moves and does not want to grieve it, and moves his soul till the energies of the soul, and the fields of the planet break away, and man become the traveler of space in the D of the STM, and becomes free from the shackles of the planet. Now once we have shackled ourselves to this planet, it comes the point of, we are vulnerable, we are at the mercy of its movement through its D of its fields, and does not matter where we run, it has encapsulated us in its forces, and we abide by his rules. Today's teaching frees man from the shackles of this planet, and makes man open but still shackled to the central field force of the central line of the U. Then man changes one prison for another .. and in time will join One Nation of the Unicose. Each step needs understanding, total understanding from now on at the level of the STM .. (:38).

If you look at the brain of the man and a solar system there is no difference. The solar system has a center and the fields of it dictates what planet and what things will be within it. The STM in the structure of the brain does the same thing. When in interaction of what we call Earth here or Mars, we call here (brain) emotion of laughter or joy, or center where memories are carried. But we keep a dynamic structure within the structure of the Gans's of the matters, and so we don't need billions of kilometers of free space. We do the same job within a few cm with the vicinity of what we call, the Gans's of the structure of the brain of the man. In fact, when you look at the structure of the brain and the solar system there is no difference. The only difference we see, (:40). is that the man has committed himself to shackles of this planet, so it pulls and in that process, creates the shape of the man, but our own solar system in a hidden way we

don't see has the same contour, the hat and the tail, it shackles itself to its galaxy. the same which happens to the galaxy which shackles itself to its U, and the Unicose does directly to the Creator fo the fields. What we call the Creator, the God, is the one, the point where the source of the energies, not only goes to, but comes from too. And in extension reaches the man. We are a branch of branch ... that it leads to creation of our physicality and soul. .. as our soul is free in the D of interaction, now it has to learn how to tap, like the stars and the galaxies into the universal original fields. Then life in the D of tangibility of physicality is irrelevant, as you decide what energies you tap into, and what energies you are prepared to give to the others that guarantees the survival of the center point, your star, your soul. (:42). In the teachings of past years, that's all we are taking you to, as I said many times in past teaching. It's the quantity which dictates your existence, the smaller amount you become an electron, the bigger amount fo the same you become a proton, and a bigger amount of it you become STM, > solar system and Sun, it's the scale of magnitude of being able to hold to, but in origin and essence all starts from the same strength, that it pins down everything together. We are not connected in the D of what we call MG field by this but in fact, man has always been shackled by this. .. what we have not understood has been the point of dismay and shorter life on this physical D, this MaGrav, we always looked at this level ( outer rings of spiral) , but at this has a connection to the center. And so in fact, we always have to look where we have been pinned, not where we release. even though the point of release is shackled to the center. These points are fundamental to be understood if the man of the Earth would like to live and survive in the U, from now on, once you understand the process, (:44).

(:48).

We have seen people in China for weeks and months and years have managed to sustain. We have seen a number of a handful of people across the planet have managed to understand in absorbing the fields of the U and living without. (:50). But now we teach collectively, but step by step from today we take you to that point, then through that we teach you the process fo creation for you to tap into universal energy. What we call U is collective fields which leads to creation of totality.

In so many ways, if you go back to all the teachings past 7 years, as we say, .. it 7 years to build a solid structure. When they build a mosque or church, a good church it takes 7 years to complete that it gathers and settles in the totality. And this year is the 7th year of the KF in teaching. And now we settle for mankind to understand the completion of the cycle. Go back to every word and every essence of the teaching, understand step by step of it, not just copycat it. understand how and the way you Nano coat, why you Nano coat, the way you N coat, the reasons the steps have put in there for you to do. understand the process of how you create a perfect Gans. (:52). Then understand how to interact this perfect Gans that you create a perfect supply of energies, that it becomes your food. And then take the reactors away, and understand how you can feed yourself.

## **Star Formation**

If you remember .. in a very touching way I explained about the 4 cores, where the Star Formation (SF) was done. Now .. look at the fields which they create, the interaction with each other, and in totality with one share point. SF is the key to the life

in the U, where you can give and you can take. This is one of the ways we have shown in the structure of the life of the man in a hidden way. As a father, mother, son, daughter. if the mankind understands this, mankind has walked half of the way to becoming the passengers of the U. If 4 souls can balance and share fields in the total understanding of the love of a father, and a mother, (:54). a son and a daughter, the family as a whole can create the position of self feeding, self space condition. .. we work with the fields and not with the matter state. Mankind has to go through this process to understand.

the 5th if the soul of the totality and the created and this is why we created 5 Cups. As one cannot exist without the other, and one cannot be developed without the other. Go back ..

(:56). the horizontal people, human race, we see the position of the soul ..

(:58).

(1:00).

We brought it close this is why the fields have to go somewhere. This is why plants become vertical. In the life of the man we put a cap, as the skull of the man, and the body goes down toward the gravity. In the creation of the vertical the skull is the gravitational field of the planet which forces vertical combination of the structure. that is why the skull ... not necessarily just the physical structure but field forces which contain the brain of the horizontal people dictates this position and the field force. Now we understand why we go down to the earth, and the vertical people go up ..

this way they connect to the line of the U. Now we can understand the next step, in the condition of the life, (1:02). in the U. We take the D and the direction in respect to each individual condition. In the process we unravel the secrets of the creation in feeding the man. One cup of energy, not ...

(1:04).

(1:06).

(1:10).

Shows the SF of the structure you have already worked within. The reality and condition is how you connect these fields forces of these Cups together that it leads to creation fo the fields that mankind can live within its environment. (1:12). How you connect what to where and how will give you the energy field forces that within this you will survive. In so many ways, understanding fo the totality sits with in the structure of feeding the STM. That through the structure of the STM you feed the physicality. You have a life which depends on all structure.

(1:14).

The clue is very simple, all , all, connect to one point. In a way now you understand how through the STM you feed the STP. As the life of the man on this planet has become part of this structure. in the fact we don't put the structure of the liquid and air here.

(1:16).

This is the Cup of Food, the cup of energy tapped into the U.

(1:18).

as your soul will tap in and feed the STP and the physical D of the man. Be wise in choosing the elements of your cup, because how you will choose these will give you the taste and the energy and the joy of what your soul will be happy with through the D of connection with the 2 souls. Where you do not need to drink to receive the energy but being within the environment of it, the energy will be delivered. In the past weeks, I completely and continuously explained to all KS when you make Gans, when you have Gans in your position, do not ignore AA on the top. (1:20). as it is the physical connection between this planet and its environment. In a short time as you get educated into

There shall be no element in any of these, all shall be the same. But first you have to see how you can walk.

In next 4 months you shall have no matter element in these cups, but you have to create the condition in these cups but no cup. with the field forces of the U. That point will reach on the pivotal point on 21st of March to come, by the creation of new cycle of knowledge for the creation of humanity and the U, where both the soul and physicality will be taught to live, and be able to transmute between the fields of the U, between the matter state confirmation of the physical presence, or the manifestation of the physical presence of the energies, field forces of their soul, without manifestation of the physicality. This is why in most of the teaching even when I said, and we choose the members of the UC, (1:22). I said, mankind will know the members of the UC by their light ..

This is the secret of the knowledge, the cornerstone of the knowledge of the U, we'll teach you how to travel .

how to embed this in the STP which carries the STM anywhere in the U. The clarity

you will take the knowledge according to your intellect in that process some of you will see the light of the Creator, as the purity of the conduct will reach that point. .. you shall see me, as I am you. In so many ways, (1:24). mankind will mature to the next step in maturity of understanding the work of the U. And there on would the man need to heat himself, shelter himself, build the cities to abuse the other souls, or would the man become the free passengers of the U. that through the travel D of the STM , will communicate in purity of heart. No deception and no lies. When I ask a question, I see the soul. When the physicality is still weak and wants to hide, but from now on, shall be no point of hiding. Even the physicality lies, the STM has to correct it. The day of judgment. changes to the moment of judgment, and gradually mankind learns. There shall be no judges and no court as the mankind will judge himself in the court in comparison of himself, in respect to the rest of creation. Then when you reach that point you reach the level of understanding of the prophet of God on this planet. As you receive the same knowledge in purity and totality as they did in the point of their birth point (1:26). Learn how to set these cups up, that through it you shall feed yourself across the U. But again do not get memorized by the cups and the rack, understand the concept, the knowledge, the field forces and throw away the cups. In so many ways, maybe you will understand one point, why in the process of the creation, the teaching of the man, we always created the condition of the son and the father, where the father is the soul of the Creator, and the son is the son of the soul of the . where the light of the

Creator shine through the son, the STM. In so many ways, the knowledge is so clear that it has puzzled us how mankind has got entangled in understanding of a son, not as a son, but as a light, not as an individual. In so many ways, mankind has got entrapped again in the D, (1:28). of his own physical understanding. I made man in the image of myself, as I made my son in the image fo myself. In so many ways, you will understand, the STP itself is another D in M field strength in proportion to the STM. As it is the Sun to Earth, as is the Creator to the son. Try to understand the progressive development of the T, understanding the interaction of the field forces, and with it, learn as of today One Cup One Life One Food, that it feeds you across the U, this is the Cup of Universe. One Cup One Life across the span of the U, is what we enter mankind into. With it the balance of the field forces will create the D of understanding of the motion of the fields and position of the fields within the U. I have said once before, those who betray us, in the D of understanding the field forces, they'll create distance gap themselves, by themselves, from the point of the creation , and nothing more. You shall never reach the destiny, and you shall never reach the destination as you have created that space gap, (1:30). in mistrust, in whatever you call it, in trying to deceive, your own soul and nobody else's. The love fo the Creator shines on all the same. The Sun shines at all time, it's the Earth which decides which one, which part will stay in the dark on the back. It's the giving of the sun and the giving of his attributes of delivering unconditionally. It's the earth which decides which of its citizens will stay in the dark, in the darkness of the knowledge , this is what will saw will do to you, the same as earth. In so many ways, would you like to be the moon to be seen in respect to earth, that one side always stays in the darkness. And that's what the STM for misconducts will be. In so many ways, the totality of the understanding of the knowledge is how to tap into the universal fields forces of the U, through it to receive the knowledge

(1:32).

Many of you will fail to cross as you lied,

How you space gap

you shall be with me. (1:34). Those who deceive and do not understand will have that side in the darkness. When I ask a question, answer the correct way, that you will not be in that position. I ask, I is the STM, not I as me. That in presence of another soul you'll never be ashamed of deceiving,

The only way the man's soul will not progress, will be due to his own misconduct, and the misconduct between the STP and STM. As when the STP is within the STM, still is answerable to all his conduct as now the STM manifests as (1:36).

The teachings of today is heard by all citizens of the Unicose and we salute you

even though the Creator has chosen the Earth, that time is short. Mankind hasn't got much time. You got to understand, the creation and the teaching of One Cup One Food, is to feed man across the U not on this planet

As of today we abolish all religions, all kingships, (1:38). As the man from today will take charge of his own soul, as he knows how to look after and feed himself.

We will not allow more than one soul to be created out of one being. the combination of the souls will lead to creation of the new light. the reason for it being to create a perfect light and a perfect child in the D of the creation will take all the resources of the creation that there will be no mistake

(1:40). as we said, on the dark side, where they themselves deprived of the creation. Now you have been taught

(1:42). We have spoken, and now it's for mankind to decide

in all the creation of the new cycle, cannot stop .

As I said, in the teaching yesterday in Rick's workshop, I said, the preliminary stage of the teaching of today, yesterday, Rick's teaching, and I asked him to withhold his teaching, till today. As now you understand partially what was taught in his teaching, because there was a secret hidden in that conversation, which is the key to the existence. You might hear it, as long as you don't understand the call of the Creator, (1:44). you shall be blind to it. The process of us releasing knowledge is through the souls we trust, and to who give our lives and souls to. In so many ways, it's your responsibility to feed your soul

(1:46).

(1:48).

I hope today's teaching will being the true knowledge for the KS who truly seek the knowledge of the creation not One Cup, and not one generator, and not one MaGrav. as al is ?? in teaching of today. I hope with this we disarm governments and those who want to govern with false fields and those who lie to us and cheat. As from now on we do not need to look to soul your physicality will speak the truth ..

(1:50).

Any questions.

Q: When we will get a Cup of Sun? (1:52).

Q: they find the making of the Cup difficult and they think they should buy the Cup from the Cup store. What would you suggest to people who have a hard time making the Cup. Is it necessary to make the Cup or can they make it without the physicality? .. (1:54).

K- I was muted .. repeat ..

The Cup of Life, all Cups now are available from the KF website. We dispatch immediately, there is a stock ...

(1:56). once you make to 3, that will lead to creation of the center, the soul itself. This is why ... if you are in the physical the 3 will create the same,

(1:58) .

Any other question. Why do we get the same people all the time, isn't there somebody else.

Q: correct conduct. (2:00).

K- Correct conduct is correct conduct, doesn't matter where you are.

Any other question. (2:02).

**Break >>>** (2:11).

Q: ... the Cups are physical, (2:12). the U Community they don't need to make these cups. when you teach them, do they just visualize, do they just receive this energy? .. so humanity is in a physical body and needs the physical Cups, but when you teach across how do they receive those energies.

K- What are you trying to say?

Q: How do the beings that are present feed from the fields of the planet earth?

K- .. There is a fundamental point which may of you as KS talk about it, see it, write about it, you make some systems because you understand it, but when it comes to you, you forget. (2:14). And that is in the world of science of the plasma, we always say that stronger, the one which has more fields of the higher strength gives to the weaker. But what does this really mean in the terminology of understanding the man. And that is, to receive you have to be in weaker position or weaker strength, that with it you open the channels to receive. It doesn't mean that you have to be feeble, it means to know what to give as a higher order to receive as a lower. It means man has to become humble, or your soul needs to understand its position. It is the responsibility of the man, (2:16). to understand this, it's not just you make a patch, double the size in the other one, field transfer from one side, from stronger to weaker. So if you are the weaker to receive, you have to understand at what level the U works, that it is so humble that it can receive. One of the weakest continuous position is a neutron, as a singularity it can contain and live on its own. And there are .. packages of energies we call neutron which have been from the time of the creation of the U and they are still in this U, and there are neutrons which have been established from the time of the Unicose and they still are in existence, because they have managed to create a balanced fields of giving and taking, that they give enough that they receive at a strength. So when you look and set up these systems. Look how humble you can become, that you become even lower than the soul of the system. Otherwise you become the feeder of it, and you say it doesn't work. I've made them but it doesn't feed me, because you are still arrogant enough to think you made it so I control it. Now you understand what we said from the beginning, and that is, (2:18). pray for the systems you make, as by praying to them, you are a servant to them, and with it you establish a point and the level of humbleness.

Q: .. will the Cups once you make the Cups, will it fed just yourself or can you feed more than one physicality, more souls?

K- Can you make them as humble as you, if you can, feed yourself with it.

Q: They need to be giving souls to receive?

K- You never think I have to give to receive. It's my obligation to give, but without condition, and what do I give. As I was explaining in one of the teachings, for the past 7 years I have given totally and unconditionally, never asked for anything. And I released the knowledge of the creation, that anyone else would have made a fortune in the paper money of the man. My wealth comes from spreading the knowledge, not from receiving anything. I survived, I survived on this planet for thousands of years, I have seen every position fo it from kingship, to a soldier, foot soldier, to a man in the desert on a retreat.

(2:20). Q: ... the more information, knowledge you give the more humble we become ... we all get to the position at some point.

K- .. it takes some a lifetime of U, and some a few seconds. Some in the process of life they mature to it.

Q: .. it only takes one pure soul, we have the EU, will produce a pure soul, will that pure soul going to change humanity, bring forth a new D of non-physicality?

K- Why do you think only for man, when the Creator thinks about the whole of Unicose. (2:22). Why mankind thinks he is the only one who is going to receive and move. As I said many times .. we teach in the voice of the man, but in the soul of the U.

Q; we always think the Unicose beings would already be in the position to have the knowledge.

K- Really? The U Community is very much like the human race. We have those who just found out about how to make a knife, and how to hunt and build a home, and we have those who create systems and are in the space. We don't look at the life as man's life on this planet. We look at the life, the animals who have just been created in the past few days for the first time on this planet. The creation of life in different shape of form never stops on this planet. So it's a combination of the information of the fields, and it is the same in the U. We have stars which the first seed of life have been seeded on them today, somewhere in the U, and we have those lives who are ancient time, philosophers of understanding some of the knowledge of the creation. There is no difference between the village of Earth and the village of the Unicose. It's a spectrum from those who are created new, from those who have managed to understand part of. One of the most important things for mankind to understand, maybe out of his arrogance he doesn't want to, is that many animals have more understanding of the world of creation, (2:24). in the true essence, then the human do. And we see they do this and that, because they understand part of the physical structure of the fields of the U. Just because mankind makes a chair and sits on it, does not make him any cleverer than the animal who knows how to span a continent, or a planet, to feed itself from one point to another. He understands more about the work of the fields of the U than the man does. If I leave you in the desert how will you find through the M fields of your soul the direction home. But the bird does, some animals do. The fish do in the oceans of this planet. Mankind knows very little about the true world of creation.

Q: .. I know my soul smiles back.

Q: Could you take more about the rib issue you talked earlier.

K- This is what has come into the history of the man, that is in some of the holy books, (2;26). that Adam had Eve from the rib of him. There are many jokes over the centuries about this rib and the creator. In a way, I made my own creation out of myself, for me not to be alone, but for me to have one love, to be, that I can love, and through it I can create something that will be me in generation, or in the cycle to come. As it is in the Old Testaments, but there are so many things about how the cycle is. In a way, if you talk about the ribs, having the same but a little less, to confirm that I want existence, and if you call the Adam, the neutron, and in allowing part of it to ?? it becomes an electron, then they both can exist as an electron and proton, you just change the name. In essence, in those days it was very hard to explain this to the man, so it was easy for it to be Adam and Eve, as he came from a rib. But in fact, it is the process of regeneration of life in the U. understanding that in confirmation that one coming from the other, can interact to live within the existence of the environment of itself. That's all. Now we become wiser we can scientifically see it, at that time you couldn't explain to people that a neutron splits into an electron and a proton. (2:28). That one can create life out of itself.

Q: it snowed .. many interaction of birds, the beauty of creation.

(2:30). Q: your teachings become more profound everyday. This is the most profound so far. ... What appears to be in center STM. that would be above the others, above the base of the 3?

K- No we are not telling you anything, you decide. Put one on top of the mountain, one under the table, wherever. You decide. A lot of you decided to stack the 5 upright, I didn't understand something, in other way, if all the horizontal beings were supposed to go upright, what happened to the vertical ones, the vertical ones were upright as well. I looked everyone made the matter state upright, that ?? don't they understand what they read? (2:32). If you are horizontal, why do you put it vertical on top of each other. So we explained it in that manner.

Q: It is not that easy to understand. to you it is easy.

K- It is not easy, it's understanding the principle of the interaction of the fields. We have guy called Dr. Asardi in Iran, now he claims that the T was already in Iran, that I cheated and I have stolen everything from him. But he is a very religious man, and what he did, is he made this 5 Cups parallel to his bed, not upright position and he sleeps in direction of Mecca, and the command of God says, man shall not lie, and it is just the physicality leads that direction, the soul is still in the process of cheating. And he made that, and he was telling me, he made that parallel with me, does it make any difference. Where does the soul of the Cups sits with you if it is parallel? Or do you sleep upright, you understand? You got to decide in which way you, what you expect to achieve, and what energies you expect to receive. (2:34). How you perceive, is it just you, now you understand it is more than you. We had this .. I start teaching this years ago, but it got lost because in the process, some of the KS went the wrong way with it. The guy called Ali in Canada, actually if he would have carried on with the teaching at that time with him, many of you would have reached this point there and then with him, but people were not ready, and he got carried away in a different direction. But in the process, we have taught everything. It's just now you didn't understand, now we make you understand. I hope. ..

Q: .. is it correct the SF is to feed the STM and STM feeds the physicality. Is there another SF for the plants ... (2:36).

K- Excuse me, who said it is to feed the humanity, we taught you universal way of feeding. Why again man became the center. Did I connect anything to anything .

Q: I have started to understand how the fields flow .. I believe for each 3 of this a FP is formed.

K- Not necessarily.

Q:

K- There always is. That what you call the FP is the 4th state

When the ?? plasmas interact they form a super soul?

K- We don't have a super soul. (2:38). Each structure creates its own dynamic free flow. And even those free dynamic flows have and interact with each other. If you move one of these 4 in a specific position and condition, you might create a 4th one, the way we do in the SF ...

(2:40). point of justice, the beauty of the Creator.

Q: .. I am now sure .. thank you.

Q: is it important to do all the Cups or can you do the 1, 2 and 5?

K- What do you mean 1, 2, 5. We do the way it works in the U. You can do any combination you like. then some people see it destroys all the Cups, you do this and that,

This is the beauty of the knowledge, this is how the creation became diverse. There is no formal patent written. We don't make 7 billion vaccines the same. (2:42).

R:

K- They become in a limbo. there is a knowledge which we cannot share at this moment in time with man, this knowledge will be released in March. The knowledge is already on the table, but mankind do not see it. You don't have the insight into the structure of the creation. This is the way it will work. There is a key to unravel the line of what I call, energy or fields, or knowledge, into the whole cycle of the creation. We still do, mankind is not ready for that step. That step will come on the 21st of March in the b city of Tehran where Mitra came from, (2:44). in the land of Zoroaster, where the beginning of the belief in the Creator was set. it's not just because I am Iranian, I am born there. This is the way we set it up, it is the way we want it to be, just like when you set up a party, you decide where a flower goes ..

We have to choose a place, what better place then where we started from ..

(2:46).

Q; the light they say the photon can't be entangled ..

K- Yeah, but you have to see what you call, we are the light. We are not really the light, when we came in interaction with another fields we manifest a fields which you might call light. We have aura around us, but nobody sees it ..

(2:48). The colors we see of an object, are the colors which don't absorb.

Q: What is the link between information and light or the carrier of light, photon?

K- It depends to you is the light. To me is the information. It depends how you decipher it. It's the same how you look at the end of the cables, you see a light, but then that light ends up in another machine at the end comes the information that can be translated to what it means. If cut a fiberglass what carries it, you just see a flicker of light, it's the light, but if you end it up in a machine which understands how to decipher this light it is information.

R: one person uses it as a flashlight .. (2:50).

K-

(2:52).

This is why the EU handles both the emotion and the physicality, because it's in their parameter, we have put a structure deliberately to carry emotion. It's the first time every, a system has inherently built-in emotion.

R: light of a smile, that's contagious .. now people are wearing masks.

K- Now you understand why Mohammad said, cover the mouth of the woman, now you can't see except for the eye.

R: Now you can't see if someone's laughing at you ...

K- It's like a blind man.

R: forces one to go inside ..

K- there was an article, a joke somewhere. (2:54).

They haven't proven yet that the virus can be transmitted by the look.

K-

(2:56). You know in the office in Beijing we have face recognition.

WL: Now you don't have to take off your mask.

K- iris recognition.

Any other question. (2:58).

Q: Jefferson, Brazil, inside the 5 Cup set we have another cup inside them for the energy. Is there any difference between the small cup

K- Which small cup.

R;

K- Yes, that was introduced because people want to see Gans's, and they were not collecting Gans's at the beginning. especially with the Cup fo Soul, this is what we suggested, put a cup there, (3:00). at least you'll collect the energies inside it.

Q: but once you got this cup it has a different Gans inside it, Cup 5 produced Gans.

K- Cup 1 in vertical animals it does produce as you put in the environment and it comes in emotion of the people it reacts. Maybe if you are on your own and it doesn't interact with anything, you don't see it, but the ones we create in the lab .. because we have so many souls interacting with it, it responds. And it is interesting how it responds.

We have to announce the Linz center will not be open until 15th January, until decision by the authorities in how we can enter, we are still there. Due to regulation a new decision has to be made. (3:02). The center is now used as a Covid testing center.

Q: EU I would like to know about we can make it individual. Only 5 countries in this joint effort.

K- No, maybe 16 countries to come in, they are all waiting for AZ to set up then to see how they are going to set up.

(3:04). Center will be setup in Brasilia ..

We have seen in last 24 hours in Brazil. They are taking if off as nonsense.

(3:06).

We have systems for space for viruses.

I think if you support the church in Brazil, I think from January 2 days a week, to teach plasma T from the church. The priest has taken the position, as he was telling us last Friday. We know the Germans and Belgium's tried to convince the priest. he told them he tested it, you are talking loads of rubbish. These people are very active because they lost. The T is shining. They were trying to convince the priest that everything is wrong with Mr. Keshe, character assassination. (3:08). He said, the knowledge is here, so many of my people have saved their lives with it, you are talking nonsense. We have to push on with the T and the beauty shows itself.

Hopefully, if it goes the way I want, in conjunction with an Iranian group, we will establish one of the biggest corporations in the world in the coming weeks, even bigger than Microsoft. I have given my blessing to the negotiation team. KF will rise as one of the biggest corporations and in conjunction with the Iranians, across the world. We have the beautiful backing of people who understand. We don't need anything, the KF will

sit within the structure, Sepah structure. We thank the head of administration of Sepah ... in all aspects Health, Agriculture .. We announce this as we are in the final phases. And they don't listen to the Belgium's . (3:10).

The T, this EU has to be manufactured in Iran and China, and put across the planet. It's going to be across this world. You carry a cell phone it already has the T in it ...

K- In Brazil, support and work with Rafael and with teaching which is getting started in the church ... The location in Brasilia is a beautiful place. (3:12).

Rafael are you behind the line, are you there, do we see him or is he asleep.

R: He is here. he suddenly disappeared.

Rafael:

K- Would you like to explain what is about to happen in the church with the teaching.

Q: Rafael .. (3:14). we will make a meeting this Saturday to start in January for 6 months. The structure is set to be put in other churches as well.

K- Those who are old hands in Brazil, work with Rafael to work the Churches in your area.

Go back to serve your nation to save lives.

(3:16). In the churches and mosques that we can start saving lives. Stop listening to those who want to stop it ..

K- You had beautiful teaching with the priest on Fridays teaching.

There is something I have to tell you, those of you who sit in the prime positions in KF around the world. We have noticed that the Belgium's have started through Belgium companies, contacting, trying to get the key KF KS to work for them. Out of nowhere they offer you big jobs. And you wonder why. These Belgium's organizations have setup, now that they have seen the KF has broken through this way, to come through this way. We have seen 2 companies out of nowhere, start without any knowledge, (3:18). have offered big jobs to KF key people, in that country. Please be aware, it's another thing that is happening, don't think they love you. They come in through you trying to influence the work of the F from inside. We have this in black and white, with 2 nations we have seen 2 of the KF key people were active people. Just be aware. Any other question. Thank Rafael it was a pleasure to be in the teaching last Friday.

Q: Azar, .. I have a comment about horizontal and vertical. the verticals are stuck in the ground. Why call us horizontal, we can go where we want, 360 degrees.

K- No because when we leave you, you go flat on the ground, you go horizontal.

Q: When we are dead you mean?

K- No, do you sleep standing up. does any animal sleep standing up.

Q: I can sleep when I am sitting. (3:20).

K- yes, but ?? can sleep in a cardboard as well. but flat when sleeping.

Q: This structure on each of them there are little lines connecting them.

K- These pictures are taken from the set.

Q: okay. they are free standing.

K-

Q: Salameea, what is energy in regard to life and fields. (3:22). interaction of 2 cosmic rays and creates fields, and energy from this fields. if light can be particles and rays ..

K- No, we have explained this the difference between particles and fields of photons and fields of waves or whatever you call it, in how it comes to be and which one is which, and most of the waves becomes particles, in interaction with the other fields they the balanced fields and they become a plasma. It's a point of .. it's the point of time and position of the observation. All the fields one way or another, long term become particles.

R: shows an

Q: All waves can potentially become a particle only when they have certain conditions?

K- No, certain interaction point. There is no condition. At the end they'll find a match. And when they find a match, they interact. (3:24). You see, there are 2 ways, which in the future, in the coming weeks, I will go into more detail. 2 things can happen to a wave or a particle, one is that we just saw in the animation, that they become a plasma. in their interaction. And there is a way, which happens in most of the structure, even in your body at every second, minute, is that the wave, or the energy, plasmatic condition, not in the matter state, as a Gans state become added onto. There are 2 types of interaction in the U, 1 you add on to, which becomes as same plasma in higher strength. and one that you interact with, which becomes a plasma. In a Gans structure we add to, but within the same structure. In the particle physics, or in a physics, in the matter state, they interact with each other that they become a plasma. You can load up on each other, or they interact to become a plasma. A Gans, what we see is a plasma with many fields, packages, structured inside it like a sun. This is a very fine terminology in the world of the physics, nuclear physics, and into cosmology, in the physical of cosmos field interactions which when we come to it, maybe 2 - 3 years time in teaching, (3:26). cause I don't see mankind becoming developed to understand it so early, maybe in 2 - 3 years time if we carry on with the teaching, we start speaking about the interaction of the fields of the plasma within the structure of the cosmos. It is part of the cosmology, deep space travel that I don't see if we start a discussion it will be understood. There we show how energy sits inside each other as a package in a Gans, you'll see, you have a, you say it's a CO<sub>2</sub>. It's not that in chemistry you have a C and 2O, it's an amalgamation of the fields inside the energy package up to a limit is of the C, and there on is of the O. It's just if you look at it, it's like a funnel, but curving and dynamically rotating, and in fact, if you bring an O it still works within the center of, O which is the field strength of.

(3:40).

(3:44).

Q: I have make a study about you. Your assistant give me the details, (3:48). information. So I thought you are involving a lot with humanity projects. I want to describe this social, this other aspect of you, when you realized, that you had to offer something to humanity by yourself, by your truth, what is this exactly, a better condition of life of course, if we are going to understand the ?? and cosmological theory in practice with human life, but I have the feeling you have something in the more higher level, that is going to be a realistic approach. Can you describe also this side of you about the humanity, because you ?? life about humanity?

K- First of all it goes back to the childhood, I come from a well-off background, I was educated in private education in Iran. In a very specific way, being in an Islamic country I was brought up by the Christians, Zoroastrians, and the Jews in the same class. The ethos of my school was, we are all equal, it doesn't matter what we believe in, behind

the door. Being brought up in such a culture with the Zoroastrians, and the , I came to see the truth, that they are all the same, (3:50). and in that process becoming a nuclear physicist striving to reach the knowledge of the physicality, and discovering the gravity, because gravity was enigma. Then it came to mid-point in life, I became wealthy enough that the wealth has no meaning. It wasn't satisfying anything, except that you could physically help someone, some people, but with the knowledge you could save a lot, and do a lot. In the process of development of the T from young age it became fulfillment to cover everything that a man becomes independent. Around 2000 understanding and competing the process for the gravity, and start building the first reactors, and first processes, You could see this knowledge is a gift, and it has to be given to everyone, you couldn't hide it. In 2004 /05 I was adamant I wanted to get the T, but I couldn't see how I could get it into public that everybody knows, and I came across people who wanted to put it in the process of patents, that they can secure it, and have financial income from it. Then I studied the patent principle in a big scale, and I found out the patents are the best way for me to get my knowledge out, but then open it, once it is published internationally. So I waited 18 months, and then it goes in the European patent publication, and then I released it to all the nations, when it was the right time, in 2012 /13, and the process is, (3:52). this is the knowledge of the Creator. We are just containers that carry it, we have no claim to it, and no possession. So when you are detached you give, and I am very much detached from everything. I live a life that it befits the way I lived all the time, but in the essence the knowledge is a knowledge of the creation and the Creator. You cannot charge what is not yours, but at the same time, you learn sharing the knowledge brings a lot of comfort to the others who can use it. You share and you see they use it and you see the beauty of it, and you allow the people to use it, and the more people get involved, as it is now 15 years, 2005 when we established the KF. In 15 years, we have reached over tens, hundreds of millions of people, and everybody is using it according to their understanding and I am not short of anything, and the pleasure of it is, when you see people use it to live in their souls, and live a more comfortable life, and some others use it to create a condition for the others. No claim to anything, and to be able to share, and others like Rick can, around the KF, we all live the same way. As one of the friends yesterday day was telling me, bending under the table, he said, these guys going on time, they are not like us, we are missionaries, we believe in what we do, they get paid for what they do. It's a big difference, (3:54). we feel it, we have a mission to serve humanity.

Any other question

Q: Mehranez, ... what is this memory bank that effects the emotions, where is it, the past memories,,, very, very past memories ..?

K- Our body carries the DNA, and our soul carries the RNA, I would call it of the soul, (3:56). which the memory bank of every notice, sound, us our ancestors and those who we have come through the cosmos have heard. It's just that we have to be able and get the knowledge how to tap into it, and what does it mean. As ... it's like a computer, you have different disks, but everything is recorded in the main disk, and you have to understand the emotion of it when it was recorded, otherwise it's the noise of something you don't understand. So what we carry, .. we carry the color of the eye of our grandfather, and maybe the nose of the our great great-grandfather we never met. In our RNA we carry the memories and whatever they ?? to because it is not just physical recording, it's a D of even the emotion of it. And we understand this T and this process and in the coming time, many of us we will listen to the time and the place to where our ancestors have been, it doesn't come from another D, it's the recording of the RNA of

the, what came with the DNA to create us. We are not coming out of just a sperm and egg, this sperm and egg are connected to those who created our father and forefathers, even to the first man, or the first creature that was on this planet. In time when the man goes deep enough we'll see through his own strength of the memory of the RNA of the STM, then in that direction we'll hear what has happened, (3:58). and be present across the U. In the physical D we hear the voice and the emotion of the man, and when we evolve to understand the way we taught today to reach that level, then we understand the history of the U, and that is why we can carry the knowledge, as we are part of it. It hasn't changed just because we have become physical citizens of one planet. The collective knowledge which is the same, we have collective emotions we have to understand that memory and what emotion was created.

Maybe today is a turning point for many of you if you understood and just don't copy the Cups, but understand the fields and the emotions they create, and maybe in that path, in the coming time we teach you how to connect to a bigger D in the world of the creation, as man matures to understand more, he understands it's not just a noise, but has a meaning and emotion.

Thank you ..

KF has become one of the largest scientific organizations, (4:00). across this planet where everyone shares knowledge freely, even in the church of God and the mosques across Iran as you have seen before. Sharing freely and unconditionally that's where the gift is.

(4:02).

K - This is an initiative that they bring their own culture and religious leaders. (4:04). Organize with churches, and the Bahias, and working in the background. We are trying to get the dialog regardless of the color ,

(4:06).

(4:08).

R: 358 KSW
