

359th Knowledge Seekers Workshop; December 17, 2020

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

(:24). K- ... we need to explain more in some cases .. I especially asked to show the (intro) video, because we have entered a cycle of last week. How to show, to feed the STM, how the STM can feed the physicality, but understanding that the creation of the physicality itself is conditioned to its environment to what is going to be manifested. It's no use creating meat and chicken when you are in another dimension (D) that you can never take shape and it cannot carry its energy to sustain life. We learned in the process in the process how we have to understand the totality of the knowledge, (:26). in how we can mix, and create a combination of field forces, that confirms existence is given, point and time of position. In so many ways, we carry the soul, but where this soul appears after departing the physicality, or when within the physicality condition, it can be replicated, it can manifest itself in a position, other than its point of birth, and its point of existence, when first it took to understand its position and its cycle.

In so many ways, we have to understand what do we do with the new knowledge, and how we come to interact with it, how we live within it, and how it lives within us now that we go through transmutation of elements, and transmutation of energy and fields. In last weeks teaching we referred to a simple point, that the punishment for those who misconduct, what shall be, and the question was raised by KS, that weren't we promised that there shall be no more punishment. The punishment doesn't come by us, it comes by your own soul. We shall not punish, but your soul can restrain you from giving. The biggest punishment in the cycle of creation is the cycle of love, to give unconditionally. In a way, when you do wrong, when you become the creator of wars and conflicts, and become creator of all sorts of things, that you knowingly have taken part in, (:28). it doesn't allow you to give, because you have taken what is not yours, and was agreed not to be yours, life of another man, betrayal, adultery, killing, and everything else, which is forbidden in the Commandments of the Creator. In this process, we understand the punishment is very simple, it's like sitting and watching a man with 2 legs running, a man jumping, enjoying walking in the beautiful fields of the U, and you with the legs, you can't go anywhere. You watch your legs but you cannot participate. .. you have the legs, but you cannot be part of it, even though you possess it.

And the biggest punishment in the world of creation is having the love, seeing how another man loves another person, another child, another, wife, women, man, and you cannot participate, but you know it's in your possession. Being handicapped by not being able to give, to elevate yourself, is the biggest punishment you bring to yourself. In a way, we don't serve punishments anymore, it's you who has to be judge of your own conduct. It's you who'll understand, the punishment is for you to be able to see the beauty of but not to be part of. In so many ways, the knowledge of the man becomes a sight for the man but you are not part of, within. You see it in motion, you see how one can love another, and how give nourishment to another with loving, and you cannot do,

you possess it, but you cannot give. You understand it but you are just a by-passer and a witness, (:30). to the whole development of the cycle.

In a way, by not being able to give, to create the interaction of the other soul's fields, the light to show your beauty, you become dark, a spot of nonexistence. .. it's a point of creation without understanding. You don't become an absorber of others, because you cannot receive to give, in a way, you stagnate. This is the biggest punishment when you cannot love, when you cannot give. In a way, it's the answer to the KS, you choose how you shine, you choose how you shine to whom, and the way you do. The beauty of the creation is in loving. This is the only attribute of the Creator.

So when we talk about the Day of Judgment, it's how we judge the cycle of physicality to live. How much we lied, and how much we broke the First Commandment, Thy Shall Not Lie, This was the first Commandment given to Moses, and to all the prophets. Do not lie to your flock, keep in the direction of the correctness and establish the cycle of life, in a correct way through your soul.

In so many ways, now we understand that there is no punishment, except us not being able to be loved, and to give love, to be able to elevate. We cannot elevate when we do not receive, and you cannot receive if the cup has no room to receive, as you have closed the lid, not the others, when you put the lid on, and you closed the gap, it's you who is deprived of receiving, and you who is deprived to be drunk from, to give the pleasure of. (:32). So when you ask and you tell there was a promise of no punishment, we do not punish. The punishment comes to you by yourself, in a way by knowing you cannot give, and from it, can be created those, or be extended to those that will be part of you, in it.

In so many ways, when mankind understands more of, he understand the punishment of the man in his soul, is by the man himself, in the true, and the way of conduct. We are told, "Thy shall not lie," those who don't lie, and those who get accused of lying, are the accuser, who has to bear that burden of lying itself. In a way, we have to live a correct life, and in conduct we submit a correct understanding. and it is for the souls to judge, it's the souls who adjust themselves to accommodate it, for the cycle of life, it does not matter, in what condition and what D, one has to understand, that the total strength of the fields of the U and Unicose is constant, is all part of the process of the fields of the Creator. So it cannot be any different, what diminishes from one point will appear in another. One reduces in the strength in one, will appear another strength in another. So in a way, it's how we transfer this energy for the beauty fo the Creator to shine, it's the responsibility of the creation of the suns which come from the STM. In a way, we shine according to the strength we create, from the strength we received from the Creator. In so many ways, as I said, we are part of the process, we are part of understanding, (:34). the totality, .. would you like to see any part of your creator to suffer with a injury. When you are there you cannot do nothing to increase, or show its beauty. I a way, when we are not shinning, we are not there to show the beauty fo the Creator. SO mankind understands very simply, the punishment comes that he cannot be seen to be part of, not only to not be loved, but not to be shown to be part of creation and the Creator. That is the biggest punishment a man can carry for himself. Just to be there, nonexistent, to be there, not to be shown. To be there not to be able to love, even though, knowing the beauty fo the love. In so many ways, the KS find one way, and in that process we'll find more, and In so many ways, the extent and extension of the life

carries on. As I said always, when you are asked and you're given, you are not stolen from, or you do not steal. It's the job of the giver who has to have the understanding of what he gives to the extent, to the extension of the love, that it can be given, and then what is given is the right of the soul to use to extend, to be used in other D and directions. I made man in the image of myself. In so many ways, I am soul and through the creation of the soul I show my beauty, and my attributes. In so many ways, mankind comes to one point, what is the purpose of life. And in that process, it's for every individual to understand the process, and understand what is there, functionality, and the presence, (:36). in the position of the created and the creation and nobody else's.

In the last week teaching we opened a new structure of life, for man to be able to feed his soul, that his souls can feed the soul of his creation, the STP. In a way, when you choose the soul to manifest yourself in the D of the position and time, in the D of the matter state, or whatever creates man to be of in any position of the U, it's not necessarily only the D of the STM, and the D of the STP of the vertical, horizontal, and matter state, but other state of the soul and creation of life in the U, that man is still not aware of. The D of the interaction for the souls, and the creation of life through themselves. In a way it's the point of transition, when the man understands his soul, it's just part of the creation of the totality for his own existence. What does this mean? It means through our soul we realize we are part of the totality of the other souls, we are fractions within the fraction of the existence. In so many ways, how we conduct, how we develop that soul to confirm its existence in physicality will take a different meaning. Either way you can create a D to create the soul of your soul in the D of matter state. Or you decide to manifest yourself using other souls, to manifest yourself in the D of the plant or animal, (:38). or any creatures in the U. So when we saw the picture of the soul in the center and the other souls around it, it's the transmutation between the 2, and all 3, and maybe if man understands more, the 5th and the 6th D, in interaction of the fields of the creation. What we call a mass, which comes from the interaction of the fields of the G and M. And then the mass in interaction with another MG becomes the weight, in its 5th D, its 6th D. So the STM has the same responsibility, and opportunity, to use the interaction of the fields of the others to manifest itself in any position and D of physicality it likes. It's the responsibility of the STM to decide, and to what it gives the position of, serving in the D of existence.

Even Soul of Atom decides where and when it will manifest

In a way, if you understand, it's very simple, **even a pebble has soul, even an atom has soul, and in that process mankind has to understand, that even a soul of an atom decides how it manifests itself, and where it manifests itself, and in the D of the strength of its existence,** it decides to be in a cell of an animal, kidney, or liver, according to its strength. **It's not that it is put there, and created to be, it's there because it has chosen to be.** This is the beauty of the creation, once the man understands.

When we see the structure of the what we call the STM, and the physicality of the matter, or the soul, or understanding of the totality, we come to understand one truth, (:40). man has the ability to be able to take, through the transportation of the fields, in both direction, be it the STM, souls of physicality of the matter, or horizontal, or vertical. In so many ways, now we understand this, it is very easy to add another D to the knowledge of the creation, which man needs to become the passenger of the U. In so

many ways, we look at 3 D, but if you look at other structures of what we call, the 5 Stack Cups, it should teach you another D and another position, in a way if you take the soul of the Earth, and you understood the same, in the D of the plant, or whatever, by adding Inertia to it, depending on the horizontal, or vertical, or the matter state, you can dictate how you want to manifest, in what position, and what direction. If you change now the same thing, you bring the soul of the Inertia of the animal, and then you decide the position of the soul of a distant planet, you shall travel to that point, or at least to be able see the physical matter in that position and time, (:42). and space. To understand the totality of the knowledge, now you understand you have to learn the condition of what we gave to you as a 5 Stacker, and in creating each one as a center, one can lead to the others, and create a D of transmutation through the energy levels, through the dynamic souls, and not necessarily, in a way, that the man has chosen the donkey, and the car and the rest. These are only field strength dependent and nothing more.

If for example you want to appear in the middle of the ocean, where the waves live, and watch them living, and enjoy their presence, you can create the MG field the place, in the Inertia, and in the plasma of the soul of the planet, and the presence of your soul, and you shall manifest there to see it, see the soul of the wave. And if you add the strength of the STP, and the physicality, you shall appear, maybe like another whale, or in another D, that you can enjoy and that become part of your memory and the level of existence for you.

If one understands the operation of all the 5 levels of D, as man knows up to now, you are free to travel without D of the physicality from one to another, through transmutation of the energy fields and not matter. This is the beginning of the teachings, this is the beginning for you to start testing. I have seen many KS just follow what we said. (:44). For example, I see them to put a cup, and maybe 3 spans. Why 3, what about the Inertia of the desert point you want to land has the combination of the mixture of materials. **This now allows you to add more to, to get the exact position, to get the exact destination where you want to land. You've got to remember, the U is a composite field strength, and not singularity. it's you who can decide if you bring the energy and the Inertia together, how and when you manifest yourself.** KS have to understand as we said before, to move from D of physicality to D of fields and energies, that they can decide the point of manifestation of physicality.

How many times you wished you were a dolphin, a flower, you could have been the scenery, and what you possess as a diamond on your finger. Now through transmutation of the energies mankind can do. And being watched to be enjoyed by the other souls, that this is the beauty of me, this is how I want to manifest myself, that you enjoy my presence. Transmutation of the energy and fields through the STM, does not mean you become the creator of another sun, that you create ?? You can do the same by becoming a flower to give pleasure to the others, by what you emit. This is the beauty of understanding the totality. I want to be a rose, I want to be a pebble for so many days, and so many years to the strength of the man, (:46). and then I want to be another.

This is how **as Messengers of the Creator we travel the span of the U, by the wish of our soul, this is how we manifest ourselves in different D and positions**, and we take our time, we walk the cities, and from one city we live as an old man, and we manifest ourselves as a new birth, as we take the D of physicality, but not the strength of the soul.

In so many ways, mankind in totality has to become aware of the new knowledge, mankind has to become to understand, to see the strength of the soul. **Up to now this has not been open to mankind, we promised a new birth. We promised a beginning of a new cycle on the 21st of March** in the cycle of the Spring, which is the beginning of life in the Northern hemisphere of this planet. This has been agreed by the men of U, and Earth has been chosen, the place, time and space for it. It's not birth of totality, it's the beginning to set the seed for the new life, where man will achieve the knowledge of understanding how he can transmute from one to another using the energy fields of the man to create souls that can exist in both D of the STP and STM. When you create the STM, is the STM created of only 3 elements, or is from the interaction of the collection of the other fields that leads to creation of his physicality that maintains the STM. So what you need to know, and what you need to ask is, what is in the future the total energy fields, (:48). of all the ??content matters of the life on this planet to be able to create the STP and not just only by 3. The 3 is just an example for you to understand the principle, the rest is for the man. If you understand in your Cup what you want to be manifested as a soul of the cell, or as a soul of a cell of the liver, or as a soul of the bone structure. Then you understand you need to change certain parameters in your Cup. In a way, mankind by transmutation of the fields can build new organs without even touching the organs. Mankind can create the conditions where transplants and what we call life support becomes a fallacy of the past. Now mankind can develop every piece, every organ, every cell of the body of the man, through the STM. And maybe in the future man will understand more. Maybe in the coming time we'll understand how we have chosen to be ignorant to the true process of the creation. Maybe mankind needs the first level of push, that in that process by creation of the soul, and the STP mankind can decide its position, time, point, and the place.

You chose to be a stone in a certain position, and a stone stands for thousands of years to come. You chose to become a flower to last a few days for those who pass you to see your beauty, as you are not there anymore. That's your prerogative. So mankind now has the ability to choose the time of the span of his existence in any D, but not in totality, will never change. (:50). We are part of the total mass and total energy of the U, and stays constant, as it comes from the totality of the structure of the creation of the Creator. Now the question for man is one question, why, and how, the point and the time, and how that structure will bring that change to all of the creation, not only for the planet Earth, but for the totality if the creation across the U and Unicose, as it was explained to a KS very recently.

In a way, it needs one soul to change the other souls and elevate the soul of totality. Go back to what one man said, the funny thing, when he saw, when he changed one magnet, the other magnets changed their position and their polarity according to the move. If you move the magnet the others move, but if you turn the magnet it changes polarity, they all turn and change. Now you understand, why it needs only one soul to change the rest of the souls and elevate them in the D of the creation in the U and Unicose. This is what we elevate, this is what is to come and what is to be shared by humanity and the rest of the creation and creator, and U and Unicose, in the months to come. As I said ... it takes only one perfect soul to change the rest. (:52). In so many ways, by creation of the perfect soul we change and move all to perfection, where there shall be no wars, hunger, where we all shall receive the fields of the creation, and we all become man of one creator. In so many ways, life becomes sweet, .. mankind is getting ready for elevation of his souls that to understand the totality, there is a need for a

change. There is a time and a place that the U Community will interact with humanity, when the man reaches that point of maturity in science and understanding the T and being elevated to elevate his own soul to the ultimate goal to be the lover, the one which gives unconditionally and it shines through the beauty of the Creator. Maybe now the KS who have been working on creating MaGravs and everything else, and understanding the field forces of it, gradually, we come to understand, that they are the MaGrav themselves, they are the possessor of the 3 levels both to give and to take, one in the level of the STM, one in level of STP, and one in the physicality of the man. In that way, this is how any creature is manifested across the U.

In so many ways, the process of the creation and manifestation in D of physicality is not unique, but is common denominator to all those who live and have been created. In so many ways, now we understand, (:54). if you extend the knowledge to the Cup of Man, to the Cup of Soul to the Cup of Inertia, and be able to replicate in its strength, but not in the cup, man will be, appears in the exact D that the structure, as the STM wishes, In so many ways, KS need to understand the process of the creation through the interaction of the fields, not Gans's and the Cups, and magnets. It will take time for the whole culture in understanding of the science T of the creation, for man to be much more clearer, as more KS understand and be able to explain the field of the creation through the structure of the understanding of the physical and matter state, which is clear and open to mankind. We have seen a number of KS have started to explain the T in the field term and not in Gans's and the rest. We watched one of the first basic walks, the toddler walks in this process of teaching, in the American teaching last Sunday, by Alex. In the coming time this has to be expanded that gradually the KS move away from the process of understanding the physical matters and Gans' and understand the process of the creation as their soul is already the creator itself, and they have to be able in understanding that to manifest and be able to transmute across through their souls. In the process of understanding and teaching KS will become more aware of the power of their soul. (:56). They come to understand how they can use it to feed themselves through the souls and the structure of the fields of the U. If your soul has managed to create your physicality and maintain it, so it's for you to understand how to get to it that, through that process you do not need to kill to live to survive. In the process of teachings to come, in the coming weeks, and months, we have opened, and we'll open more truth and more understanding about the knowledge of the creation through the interaction of the fields and the process of life in the U. The life in the U is no different than the life on this planet, it's all the same, and it is beautiful. And it's beautiful when you see it and appreciate its beauty. In so many ways, mankind will come to understand to create condition of fields and their interaction to lead to creation and feeding of the man itself, or to be able to support its soul, to lead to the creation of perfect life.

In so many ways, humanity will become more humane. In so many ways, mankind comes to understand the truth about his own creation. When you make all these systems through Gans', understanding interaction of the fields, as I said ... Put the Gans's (:58). and put your hands in-between, and make the wish, what you wish to see in the palm of your hand. Start with that, is understanding that the fields of the STM in interaction with the other fields, leads to the creation. Start what I call in a sandbox, and test, then understand and see the beauty of it, that the Gans's are not important, but what is important is the fields which emit, and you start understanding how to work with the fields in essence of creation. Try to put dynamic or simply static Gans's and put your hand in and add the STP to it, or add the STM to it, that it can feed you. Don't forget

now you hand is the creation fo the Inertia, this is the limitation of the strength of your physicality. So the creation of matter by wish, has to be no problem for those who carry the true essence of creation. I said, that many times before, put your hand out and wish gold, and there shall be gold in your hand, You need to start to learn, make the fields of the Gans's and put your hand in-between the fields and wish gold, and see if your true understanding (1:00). of the gold is to serve humanity and others, you'll receive gold. And if it's there to satisfy your ego fo creation, you shall not see, nothing but the best of shame. In so many ways, then you understand your true conduct, then you understand how to be correct in the space of the U. You understand how to behave and how to assess your position and the others. .. you learn if you lie to yourself. If I want gold to live a good life, or I say I want gold to help another. In so many ways, mankind through these simple steps, will start understanding the true conduct. The true understanding fo the true meaning. Those who come and they show the gold in the palm of their hand created, which is a true wish to give, to serve the others, or those who want to have to make kingdoms out of it. They shall receive none, as there shall be no king. All man are equal in the essence of their soul. It's the man who decides how to manifest itself in the D of equality, not position and presence.

In so many ways, many of you KS pick up the Inertia Cup of the materials you like and in a way, dictate, I want this to be part of my physicality, I want this to be part of a plant, and I want it in a matter state. And put your hand out and see if you can create. Put the cup there and see what you want in the matter state to manifest because your soul has created a strength of Inertia for that point and position. Then you will learn in the span of U you do not need systems to create matters, fields, (1:02). and food. Your soul become the creator of, due and through the interaction of it field and strength, and its conversion to environmental Inertia. In a way, if you understand this, when you reach to a point in the U, that you want to manifest yourself and your soul says no, there is no conversion point, as it'll come the end of me, to put me in the danger. And you understand you don't need the knowledge of the U when you understand the trust in the strength of the field of hte STM and its interaction with its environment. In a way, man does not need to carry the knowledge fo U as the STM and its strength of its position with the STP, will understand with the interaction of the Inertia the field of the environment, what and how it can manifest itself to guarantees its existence and its life.

Now you understand in one process, with what we brought to you as a 5 Cups, we have shown you the key into U Community, the access of elevation to your own soul, and access to understanding the process fo the creation. In so many ways, we have shown you the way that the creation is created, and the way that the life cycle of the creation occurs and repeats itself in every corner of the U.

Many Souls will Never be Enlightened Due to Misconduct

Many, many souls will never be enlightened as due to their own, what we call, misconduct, they hear and they see, but they never achieve, as they have not understood, (1:04). the totality of the process of the creation. As it says, "Thy shall not lie," thy shall not lie to his soul, as the creation of the soul, .. the existence, .. the totality of to be part of, is sacrosanct, it will not change, it will stay the same, and it will be part of the process of the conversion of the fields of the U to any matter fields energy, and being which the soul wishes to manifest itself, or conduct itself through. Now it is for the KS to start playing with these sandboxes, Cups, not only with 3, but with 10 different

elements, but understanding the reason you create the Cu, and what is the purpose of it. And then in the same process try to create the condition of Inertia within your soul, within the palm of your hand, that you shall see gold. Now if you understood this, and you understand the expansion and knowledge of the U, one thing will become apparent to you, what we said many times before, you create the kidney of a man which is danger (damaged), or is not there, has been taken out, and the kidney will be created in its position, because it is the wish of the soul. It's the position of the man who puts himself within the fields to create that D. So what we'll see in the future to come, man does not need open heart surgery, as man creates the perfect available fields for creation of the muscles of the heart, and that will take shape when the man is within it, with a wish of the soul, that the heart will function the way it was built to do. (1:06). In this process mankind will come to understand the process of the interaction of the fields in the appropriate measures and strengths can create anything in the cycle of creation. Would you need a kidney or a liver in one point and D in the U where there is no need for cycling and cleaning as you receive the energy in the D of soul, STP in the form of energies that there are no waste created. Now you understand, the expansion of the knowledge we have opened up. It's for mankind and the rest of the U Community to understand the process, and expand to extent to create the perfect soul, a soul that does need nothing for it to survey, a soul that only gives to be able to be part fo the creation of giving. To love, to love to serve and in that process it might need to exist in the D of physicality, or the D of soul, but in fact it served, to itself, to the totality of the wish of life in the Unicose. In a way, you become a shinning star where you are asked, or you have been wishing, or you have been wished to be. In so many ways, you wish to have a dream of your mother who passed years ago, and if you can create a D of sincerity, and understanding it is the same wish as the mother to see you. You shall see the mother, and you become part of the mother through the point of the full satisfaction to be and to enjoy the presence or the wish of the soul. Mankind will understand, (1:08). transmutation and transportation, will become part of the life of the man, in the D of the STM, then it comes to one point, would there be a need in the coming time, to come .. a need for a UFO, for a flying object, a need for a means of communication as computers and the rest. As the man in understanding the process of the T & T of the fields will possess all within the structure of his physicality of his soul. Then he can do what he pleases, to serve, and not for his own conduct and pleasure. Giving, In so many ways, is the totality of the understanding, .. is understanding that the totality, that it is me, and it is me which is part of the totality to exist as part of the Creator. Mankind needs in the process of understanding to work as we call it, in the ?? sand bag (sand box) of the earth, get in there and play in that sandbox, and mix the matters of the creation with the Gans of it, and understand the fields of it, and interact with those fields, and the fields of your own creation and see what you can achieve. These are essential in the next 3 months for mankind, to himself ready for the process of the beginning of a new cycle where the man can transmute to the STM and the STP in the D of the living. It's been said when the mankind is ready at that level he shall enter the U Community. In a way, once you enter in that level of understanding. (1:10). you have already entered and become part of the U Community. .. you understand the creation of the U and the community which has created it. Beauty of the creation is understanding the process, not to replicate it. In a way to be able to extend the knowledge, and that knowledge to be given to the others. the minute, the instant the knowledge is gained in the D of the soul, it is shared by all the souls in the D of the U.

In a way, it takes one perfect soul to be born to change the rest of creation to perfection, and change them in a way that the totality will bring, that is a collective soul of the creation, that by it and with it, and through it, the whole of the creation becomes perfect, and then we shall see the beauty of the Creator as they are all part of, and within of. It's the responsibility of the KS now that we have taught you the 5 Cups, to start playing not just with 2 or 3, but try to understand the composition which makes that position, even the composition which makes the STM. Where you want a perfect replica you have to have all of it, all the salt, all the matter state, all the Gans's, and all the exact conditions for it to manifest itself. Now maybe you understand what I have said many times, give me a skull and I will make you the man. In that way, that is how we transfer the knowledge and the energy to that point, (1:12). that we create the fields and the conditions within that skull, that, in that process, in that cycle, .. presence, . that understanding mankind become to understand the totality of the process of the creation. Maybe one day when the man matures in the science of the Gans's, and understanding of the process of the creation in the interaction of the fields and transmutation and transportation of the fields, man will find out that he needs no computers, no cars, no physicality, but he can live in the beauty and wisdom of the essence of the creation within the D of the STM.

I wish it so, but it is the man to choose. But in that process man needs to extend his knowledge to understand further processes, For the knowledge which at this moment in time is not open to man, as man has not the total understanding to understand the totality.

In so many ways, human race has entered a dilemma position, how do I, and what would be. In so many, how, why, is to look at the essence of the elevation of the soul, and what would be, is, what do I wish it to be, where I wish it to be, and how I wish to manifest it, that it will be enjoyed by the others, and not for my pleasure. Then mankind will reach in that position and destiny of achieving the totality. Our wish is that man enters this D, that in totality becomes part of the total life of the U. (1:14). It's for humanity in how he teaches his children, and how fast it will reach that point. We have seen the teaching in the churches and mosques, and in temples. The man will progress very fast from now on. As the man of God have decided to enlighten, this time the STP and the STM at the same time. As we have seen in the mosques of Iran, and the churches of Brazil. The process has started, and once it takes hold, man will understand he has a lot to live for.

Many of you look at the Corona as one of the biggest disaster of mankind, but we see Corona as a key for the maturity of the man to the D of U. Where mankind comes to accept is what we call, feebleness, in the process of the creation of the structure of the U, and with it trying to achieve the strength to survive, will see a new D in the world of science and T. In the coming time, the knowledge of Gans and T will come to be the survival and savior of many people, and with it, it will be introduced in a rapid way to a new knowledge. And the schools and universities of man will forever work to complete the cycle, and in that process the humanity will mature. Nothing has been a bigger gift to humanity than the Corona, if mankind understands the reason and how it has come to be there. (1:16). For man to go through a process of rapid understanding between the energy the fields and the matter and move away with the ?? of material existence. As we see, religions to confirm their beauty, will attach themselves to the new knowledge

to show the beauty of the creation, and in that process mankind will be educated very rapidly.

The process of understanding the new T of creation is upon every KS to teach unconditionally, and at the same time across this planet to as may as possible, that no nation will be left behind. And the responsibility of KS is simple, teach through your soul as your physicality has failed you up to now. Teach, when you teach in these places, through the STM, not through the knowledge of the Gans and the Nano coating, but the essence of the beauty of this knowledge and T shall bring.

As we've seen the motto of one of the world leaders, is science. As man will enter a phase to understand the science of creation and not the science of the matter state of the man. And the evolution will come in the process of trying to save the life of man. As we have seen the new vaccines have already proven, as it has been stated by many nations, they have seen a new type of viruses of the same, and the present vaccines are not made to match. We have seen the mutation of vaccines will push man to create the new understanding of the totality, (1:18). as it has been explained in the KF document, that we need a collective dynamic environment to be able to handle viruses as they mutate, and in that process we understand the mutation of the elements, and energies that can handle the viruses. So in a way, the way many of you look at the virus, the way it is at the moment with us as a point of demise, we look at it as a point of demise of the old knowledge and T, and the beginning of knowledge, and the cycle of understanding of life in the U. Maybe it had to be taken this way that man has the fast track to become educated with the knowledge of the creation.

In so many ways, we have made it possible for the man to understand the process as the virus touches every man individually, and it is for man to go within the structure of his soul, to understand the totality of the process, not only of what we call, the virus, but the energy and field transfer, understanding of everything man wants to do. Life is not easy, but life is the extension of understanding of the work and life of the physicality in the D of transmutation of the fields and energies of the U.

My dear KS we have given you the key to the life of the creation. It's for you to know how to decipher the code, that you can use the key, how you have to mix, (1:20). and match, not only energy fields of the matters and the Gans's, but to put in from your own D of physicality, the STM, and STP for you to gradually become educated in the knowledge of the creation. In so many ways, through the 5 Cups we open the first steps, the toddling steps for you to start teaching yourselves to understand the strength of your soul, to understand how you can transfer the energies of it, through the transmutation of the fields to the STP, to the physicality, to the D of the Inertia, and to the D of the MaGrav, the soul of the planet, the position that you are. Then through that process you can create the D of the strength of the G point of the position of your wish, create the D of the Inertia of it, once you arrive, and then the condition of the physicality in that presence. So the STM in the transmutation of the energies will become the creator, manifestation of its own, at any point and distance. So we can travel to Moon through the understanding of the strength of your soul. Create the Inertia of the certain position of the Moon, and then decide the position of the physicality to exist in that environment, that through the STP and the STM, you give the shape of the man. Then you understand, as there is no O on the surface of the Moon as such, would you create a physicality which has a need for O. (1:22). then you understand, in understanding the

transmutation of the energies, mankind has been given the golden key, and the U Community has been given the knowledge, for all to be able to transmute and transport, and communicate with each other, irrespective of the place and the ?? worth in the U, irrespective of the place of manifestation of the soul, irrespective of the wishes of the others. But the soul on its own will create its own destiny, and its own manifestation. The point of the birth, is the birth of a perfect cycle. The point of the birth of a soul is to manifest itself with total beauty it possesses. In the coming time, KS will start developing these, in a much deeper extent. And in that process many of you, many of you shall see your Creator, which is your own soul. Many KS who say, I have not seen, how can I believe in it. Because you are within it, how can you see the beauty when you sit inside it. Creator admires his beauty through the knowledge of your self within your self. And then you receive the confirmation of the existence. In so many ways, do not stick as you did with the MaGravs, with all turning and twisting, but extend to the vocabulary of the knowledge and science to the new D of the plasma science and physics.

As I mentioned in the Farsi teaching last night, we have reached the point of maturity, we have developed a new fuel. (1:24). In that fuel we do not depend on the matter state, but we manipulate the fields of, that in that process we can extend the knowledge to the wishes of the STM, and the creation of the man. In the laboratories of the KF, developing new fuel, and new ways to create the fuel without the matter and energy existence. We have shown again, using the Iranian reactors which were built some 12 years ago, back in line, showing the flight creation and everything else is possible. We have brought the old boys back into play. We have recalled the 2 reactors developed and completed in Iran back into operation in their lab and we have seen the first structure of the lift, even the 3 legs trying to move with no fuel, no physical matter within the central structure of the system. We have created the conditions. Further more we release this T to the governments to understand we can have access to every position in the government, be it what, to enforce peace. In understanding we can create the soul of an atom. We can paralyze those atoms which are used to create tools of war. At the same time we can create the conditions that we can deplete viruses from the face of this planet, but at the end of it, they are energies which can be used for other applications and usage. With the new recalling of the Iranian nuclear based reactors, which were developed in Iran, and we tested it. Now developed the condition of cosmic rays within the center of the same reactors, (1:26). to lead to production and lift and motion, and in understanding the new structure of the STM. In so many ways, we will return the 2 reactors back to Iran to show their beauty. In so many ways, in understanding the totality, we show a new way that man can tap into to elevate his soul. In so many ways, as we learned years ago understanding of a knowledge and T is more important than the T itself. As once you learn to walk, you can jump, you can dance, and now we dance with the new knowledge understanding in totality. In so many ways, by production of the new environmental fuels which lead to creation of motion, energy, we change the course of humanity to move to the next step. We have no fuel, but we create a condition of the fuel as needed, using and manipulating the fields, which are available within the environment. We show a new T, in understanding the totality. In so many ways, in the coming months is to literally target their own understanding of the totality of the emotion of and understanding of the interaction of the fields. When we saw the first movement, the first position for the system to start moving to lift. It confirmed a lot in understanding the new T, that mankind's soul is ready to accept, that we could achieve the new step, the new understanding. In a way we have geared up to elevate, (1:28). all

the souls humanity at the same time. And the KF KS team will carry on till we reach that point, that the world leaders will understand the game has changed. The world leaders will understand that we do not need tangibility, but we can use the field forces of the U, to create a new condition for elevation of the soul of the Universe, and its citizens. In so many ways, we create the condition that by the interaction of the fields which we have created, we create what we need at the point of the need. This is what we promised from the beginning, this is what was set in the patents from the beginning.

Now the KF is proud to announce that we achieved that point, creation of lift and motion, but interaction of the fields without matter. We endeavor to extend this knowledge further, to be able to bring the world leaders to see the game has changed. We can even touch the essence of the soul of the leaders that they walk away from leadership. In so many ways, the development of the new energies, new structures using the Iranian nuclear based reactors which we developed in 2008 in Iran and we called back on the table of the laboratories in the past 2 weeks has brought a new D, new .

The first approach to 2 nations has been made. We stay loyal to the nation of Iran and China, and in that process through the peaceful nations, through these 2 nations we transfer the knowledge, on the signing of the agreements with world peace, step by step the knowledge will be transferred, that no man will sleep hungry, (1:30). and no one will be born with any defects. In so many ways, perfection has to come from the point of the essence of the creation. This is what the new knowledge will bring you, .. shall bring the humanity. In so many ways, as we go back and understand more ... more of the totality, we realize even why and how we went back to structures and understanding of the past, we understand more how we have managed to ... create condition to recall ..

(1:32).

(1:34).

Not the way you did with the MaGrav, where you all stole, and in a way you punished yourself with your misconduct. (1:36). But this time the knowledge will be shared with all the nations once we bring, reach, achieve the position of peace between all the nations on this planet, unified peace.

We choose the state of California, AZ, we move into our position in Mexico. Nigeria .. Australia ..

The knowledge will be spread in a systematic way.

We have 3 months left to reach the point of beginning of start of new life on this planet.

I thank the Austrian team ..

(1:38). In the coming time we'll show more of the same ..

We wait for the response of the government or we take the leadership to govern with the knowledge, T and science. At the end all ends up at one point ... of the Creator and no more. .. He is the creator of all and man the converter of some.

And now there is no better time to understand what is written in the last pages of the book. We just can transfer and transmute some of the energies of the Creator, and we don't produce nothing new, as all belongs to Him, and it's all the same.

Now you understand the gravity, and the importance of the teaching of the 5 Cups. As it is the cornerstone of the knowledge of every nation, and is the cornerstone of the understanding of every race in the U. You cannot exist if there is no gravity, you cannot exist if there is no Inertia for the fields to come together to create your soul, and in that creation of the soul, in interaction with the fields of the gravity, which is created to create the fields of the STP of the man, (1:40). in interaction of the 2 souls, understand the creation of the physicality of the man. Now one understands, that understanding the totality of the principle of the creation of the 5 Cups is the life of the existence in the D of the creation of the life in the U, from Creator to the man. In understanding this mankind has to understand the totality of the operation of the 5 Cups, and the interaction of the different sets, and interactions of. When you put the stacker of the vertical man, with the horizontal man, and you put it with the structure of the matter, how do they interact what do they produce and what would that lead to?

If you came to Linz you should have seen the structure. It was built and was in demonstration in Linz International exhibition, where all 3 stacks have been made, and is allowed for you to stand in-between to receive the elevation of the soul, the STP, and the matter state of the man. In so many ways, when you walk in you do not feel it, but when the time pass, and everything reaches its balance you will understand. There is one flaw with that design, in fact, which man becomes the creator of. You are used to creation of dynamic systems, but in understanding the process when you stand in-between, you become that dynamic system, where between the fields you change, elevate, and receive what is needed by every position according to your wish, but in according to the emotions which you carry when you go in the system. (1:42). If you go with the wish of the man, you will reach man. If you go with the wish of the STM, you achieve the totality. So what we teach you, what you see, is already been in Linz for past 4 months.

... remember one point, and that is simple. A collective point of knowledge of world scientists, have to bring man to understand the structure of his soul, structure of his STP, the structure of his physical life, and those who understand this science, by understanding and creation of what we call the soul of the position, and the space be it the Earth and the others, be it the Inertia which leads to creation of that soul's existence. We become part of the new research and development, that allows man to become passengers of the U. Mankind is a conjunction, that he can choose to travel with the tools of the man, with airplanes and your rockets, and fail as you did last week, miserably. Or you go into D of universal travel that you create crafts that you call UFOs, or to elevate to the knowledge of the Creator and travel with the D of the STM. A soul has, must and should have a choice in how it presents, manifests, and maintains, (1:44). existence across the U. This is the beauty of the freedom of the knowledge in all levels of the creation.

Those of you who have achieved transmutation and transportation through the ?? past structures of the UFOs from the past millions of years, now you are allowed to elevate to understand the work of the Creator. Those of you who have just achieved understanding of the flight through the physical D, you are allowed to reach the same D. So all creatures of the creation will stand the same point, that no one is higher then the others. As we said, there shall be no kingship, kings, and leadership on this planet, so shall be the same across the U, that all creations that are created, become equal, that no one is higher then the others. If you go back to my teaching from the beginning, I made

one promise as a Creator, at the beginning, that I take man into the U Community, not to be subordinate, but to be equal in knowledge and T, and I have fulfilled my promise, it is for man to complete the cycle, that the rest of its citizens and those who are the citizens of the U, to complete that they don't fall behind the man's progress to reach the position of transmutation and transportation with the D of physicality, using the interaction of the fields of the U. So as much as we give the man to elevate we give the same opportunity to the other races of the U to elevate at the same time, that one day man will not become the leaders of the knowledge, that they start the same abuses that they did on their own race on this planet for centuries. In so many ways, the knowledge of the creation has to become the key for universal peace, (1:46). and that shall be achieved through our wish, and understanding of the wisdom of the creation. Try to understand more in depth the interaction of the fields, try to create matter in the palm of your hand as man is physical and he has to see to accept, to believe, and then fulfill the wish of the Christ, and the wish of every prophet, that "this is my body, this is my blood." This is the wish of the soul of the Christ not the physicality of his ?? In so many ways, complete what we called the old and ancient promises of fulfillment that there shall be no man hungry, and there should be no thirst anywhere in the U. As the hunger is for the knowledge, and the thirst to drink from the river of the knowledge of the Creator. So mankind has to take the next step, in the months to come. We know that the KS will strive to create the new systems. Try , you are so physical, create matter in your own palm, that it gives you the strength of the belief, and strength of the understanding of the knowledge and allows you to take the next step in the D of the creation of the Creator. mankind needs to be kind to his own man, to his own kind and then man will find the key to space, to the knowledge of the space, (1:48). and to receive the knowledge of the Creator. In so many ways, as I always say, ,my teaching is complete, but we take time to explain more, and as every time I look at these 2 reactors made in Iran some 12 years ago, and understanding what it took us, with it, it brings me pleasure to understand, mankind has the choice to become dynamic and in the shape of a plasma, as we see, in the small reactor, or still live half plasma, half physical D of physicality, as his biggest brother in the background. The choice is man's and we have given every knowledge to the KS, to develop and to evolve the knowledge of mankind. understanding it, and with it, create the conditions that you change the course of humanity, not only for yourself, but for your soul, that through that elevation your soul might be part of the soul to come, to change the course of the U. As to change such a vast fields of the Creator needs a strong soul. I hope you learned a lot today, and I hope and my wish is the mankind uses it for a rapid development for structures for peace, understanding of the totality of the creation and the wisdom of the Creator. Are there any question. (1:50).

BREAK .>>> Video .. (1:57:15)

K- you know how to do it. We just had a call from the research center that they have managed to achieve a reduction from 10.8 to 8.8 kg, (1:58). in the small reactor. So we have proven weight reduction, ready for flight, and I thank the Austrian team . . we have managed to bridge the M of the system. flight without fuel.

What are the questions

K- The system reaches the flight is imminent there is no fuel, it's just understanding the interaction of the fields. (2:00). within the reactor, within the central reactor we have created the fields of interaction, where we pull in the fields of the U.

R: .. you attract the fields and they play with them.

K-

It depends on the state of mind, how you keep yourself physically fit.

Correcting Wrongs you have done - Elevate the Soul

Q: If anyone is in the wrong path can the soul correct the conduct .. to be able to give.

Q: In regards living correct and serving. Do we need to correct the things that were done in life that were wrong too, or to choose never to misconduct again and be able to move forward?

K- .. If you are aware of your misconduct, (2:02). and you know how to put it right, and you don't do it, you carry that punishment. If you are aware of your misconduct and who you've done it to, accept that it can be forgiven, it can be overlooked, that the souls can accommodate it, you'll achieve elevation of the soul. By denying it, by lying and cheating, in a way, you deprive your soul to elevate. This is what I have said many times, you ask, if you are given it is your right. And when you understand what you have done wrong, and it is accepted by the one you have done wrong to, it's not a punishment, it's the way that the soul accommodate that the two find a balance. It does not matter how much it hurts, or what it does, it's understanding it, and in the cause of understanding you create the elevation of both your soul and the others, because you have added to, you have gained with it. And so there is always a room to do.

In a way, if you go back to the so many ways that the Japanese do, it's one of the ways they do when they come and they apologize for what they have done wrong into public domain, if they are sincere, they receive the soul, and they receive that elevation. Those who understand the misconduct and by taking their own life with the methods they have developed, then that soul stays in dark. Stays in the point of not receiving to give. Or not in the process not to give as it already possesses. (2:04). We all know the strength of the love, understand the strength of giving, but it's us who gets deprived from to do so. In a way I hand this out to give, but there is no one to take, as no one sees the hand. There is always a way out, but you have to understand your own misconduct.

Moses

Any other question.

Q: in the Quran .. elements of gold, silver , (2:06).
with 999 turns for the elevation of the creatures

K- Not necessarily, the physicality of the man, the STM is not made from those 4 (elements). Most of the physicality of the man, which controls his emotion is made of Zn. What does man going to do with the state of his emotion and his soul. Those are in the D of physical D. How are you going to elevate the STM? These are the knowledge which was not open and available to the prophets of the past, to understand the effects of all elements, because at that time man could only understand the value, of what he valued, gold and silver, and what he could protect himself with tools of brass, he could safer for him. Now we understand more, the knowledge is deeper, what's the use of man making Gans's from gold and silver which is hardly any of it in your body. Fe

which is partially, without existence for the soul has no meaning, and you don't have the main ingredient to put it together, which is the Zn, (2:08). Silica, Mg, and Ca. Mankind has to move with time and development of the science and T ..

Q: .. I really enjoyed the teaching .. our punishment is our own withholding upon ourselves. I was wondering how the Inertia works .. Ph, when it's moving it creates the Inertia, is that like a good way to understand it, how is that achieved, how do we understand Inertia in regards to a system that is just your hand, and creating a field of Inertia, is it a field of Inertia that leads to presentation of matter itself. .. what is the order

K- Yes. .. you see it is not matter for order of physicality. Inertia creates D of manifestation. (2:10). In the middle of space where the fields of the U, where .. MaGrav exists. The Inertia is in the level strength of the fields, not matter state, you can still manifest yourself, but you will not be in matter state, because there is nothing there for you to exist. But if you create the Inertia at the field strength of the environment, it's to create the strength field of presence, then you'll be present. We have a wrong understanding for the Inertia as it will be the D of physical existence manifestation. Inertia is the confirmation of the existence, not manifestation of physicality. If the condition creates that you will, you can manifest yourself in the middle of mosque without anybody seeing you, but you use the Inertia of the environment, but not in the physical D. Soon you will learn you can be amongst people without them knowing and seeing you, but they feel you, because if the man matures to that point of understanding the emotions for the fields of the soul, they feel soul. You feel the Presence, and it's your choice to do or not to do, or to extend it or not to, to the D of physicality. When I walked into the EU, for the body enhancement I said to one KS I feel the presence of Cu, .. because I am sensitive to fields of the U, I feel them. (2:12). The same I went to the material production (EU), I could feel the existence of the Cu in there too....

Q: When it comes to the Cup of Inertia

K- The Inertia creates out of the

(2;14).

Q; Does the Inertia

K- Let me explain before you go any further, this is important. Inertia comes from the interaction of the soul within, and the fields outside, that allows the creation of a matter at a given point. You have to have the central soul, the soul of the planet, that you can go and with its interaction, create the condition with the interaction of the field of the U, or solar system, the production of totality, which is life. In that process we have the freedom to do it.

Q: when I have been trying to use my hands .. it's easier to see results, when I am not paying attention .. (2:16).

How the communication between the soul and daily thoughts.

K- What do you mean by that.

Q: When I am trying to use my hands,, when I am thinking a lot .. we don't have to know every ins and outs of every star ..

Is there any advice you can give me how to calm my mind just to allow that to happen?

K- What do you mean? What do you need to be explained?

Q: Well the thing about it is, that daily life .. (2:18). constant battle of trying to achieve the soul connection and Messiah connection, and to be that one soul that is strong enough, I think it is up to all of us to do that simultaneously. Like I could be the one, but it would be better if he or she is doing. .. What I am saying is I am tired of holding myself back. I guess the support of the KS group is nice. .. I don't really need much explaining , I will leave it at that, thank you.

K- The understanding of what expect, what do you actually expect to achieve, this is what I am trying to understand?

Q: .. is I really feel I have a potential, I know they are attainable, because of my studies of Christ and what his teachings were, I have an idea

I am trying to take control of my physicality ..

(2:20).

It's pleasurable to try to elevate...

K- Let me cut into your talk. You said something ... A lot fo KS maybe 100%, maybe 1 or 2, if they went halfway through it. They thought ... we taught you the MaGrav for create of energy. If you look at the structure of MaGrav system and they way they're built, is the structure of the body of the man.

(2:22).

(2:24).

Q: Is that how our wishes are working

K- Yes in a way,

Q: Explain the difference between mass Inertia and MG fields ..

K-

(2:26).

(2:30).

K- The 3 Books in Iran have been given a license to be published .

(2:32).

They have allowed the Corona Paper to be published.

To be officially approved as a scientific research .

(2:34).

(2:36). (bad connection ..) (2:38).

Q: Salmeea, If the Bahai could science and religion ... They believe when all the people of planet become Bahai, we'll have peace .. Could be your science considered a revelation after Bahuala. how to reconcile your science to teach. what is your position?

K- We don't have a position. For those who don't know, Bahuala is said to be the promised one in the cycle of Mohammad of faith, which is Methi. He came about 200 years ago. Bahais managed to become about 8 million. (2:40). over 200 years. KF in past 15 years has passed 200 million, authority, becoming part of the structure of the science. In a fact, the way the Bahais take it is totally irrelevant, as they have not

managed to achieve what was put to become the process of the peace. They become again in physical matters and building, buildings. and ignoring everything else. it has become irrelevant. .. we have seen another structure of Vatican and nothing more .. In understanding the science and religion ..

(2:42).

2 plasmas creates the physics, 2 physics creates chemistry,

(2:44).

(2:46).

It has become an irrelevant belief in a path of belief. They have a big problem with the KF, a massive problem. They know we explain the truth and they guide many of their followers not to listen to KF teaching, "not the truth we heard."

Q: No one said to me, don't come to KF.

K- We have people who have received instruction.

Q: Maybe I will receive. I said, I became Bahai to please my mother. (2:48).

K- You see, the biggest problem with the Bahai faith is devaluing the knowledge of the creation to fit their own new structure. The opposite to even pretending to be new.

The promise was bringing the world peace.

Q: I also told them ..

K-

We see they have done nothing but building gardens and statues . If you go with hands to

All religions go to one, correct conduct.

(2:50).

You can't go to another planet and make them all Moslem. .

(2:52).

Q: I was feeling the same ..

K- Yeah, live Good, think, do good.

Any other question.

Q: How do we create a vacuum, what creates a space vacuum.

K- I think you need a lot of knowledge to do that. You need to have a lab to do that

(2:54).

(2:56).

Any other question

R:

(2:58).

(3:00).

I would really like to leave in next 10 minutes, return to the lab.

Q: .. you put your hands between the Cups and make a wish. (3:02). I did that and made a wish. ... if you allow me to read this letter from a small boy..

K- I read that somewhere I think it is irrelevant to us. .. it is irrelevant to our work. Sorry about that. .. I don't see a position of it in our work. Thank you. I receive a lot of messages all over the world. Some is not relevant.

(3:04).

Q: Mongolian KF,

K- Where it's the first time we have Mongolian. I have been to Inner Mongolian a few times. ... (3:06).

Q: We hope to have a great opportunity for this leaping forward T. The channelers gave us this message, on your earth there will be a new T that will change the planet in very white level.

K- We don't understand what you are talking about.

Q: From C based to crystalline based body.

K- I understand this, this is something we don't work with , we don't follow, with work of energy and crystals. we understand but we don't see any relation to

R: What about the C structure (3:08).

K- You see the crystal structure of the C is what we call grapheme, it's a gaseous state of the element, it becomes odor ..

(3:10).

(3:16).

(3:18).

END
