

## **372nd Knowledge Seekers Workshop**; March 18, 2021

### **KEY-PHRASES:**

KF TV will start on Saturday , 21st March

Asteroids and Meteorites carry life around the Universe, created from fields

Soul Teaching:

Same soul, not reincarnation

Aliens living on earth

KF China protected from outside influence

Neutron divides to electron after conversion connection to Creator like neutron

### **SUMMARY:**

### **ENGLISH TRANSCRIPTION**

(:14). Rick introduction. Knowledge Seekers from Brazil present video of gratitude.

>> (:20).

K- Thank you very much, that was a beautiful surprise. I know other people were aware of it, but I would like to thank Brazil and the rest of the KF for success. .. the children of the future will be touched by the knowledge.

In the past week we have tried to share the knowledge .. on what the man believes, through the vision of the man. The words have different meaning but the vision brings confirmation of the truth, as man has come to believe. (:22). starting the KF TV in next 48 hours will allow us to share more. ..

The KF TV will be a learning experience. I saw in this video the board with eh magnets on it, the first time we were trying to explain the knowledge, and coincidentally this board was in my hand less than 48 hours ago. Nearly 12 - 15 years down the road it has the same meaning because it brings the same basic knowledge. How we go with it, how we develop the KF television, it's like that board, it's always there, it has the same meaning, it depends who looks at what magnet, sitting where, and what fields we look at. I am sure it will be a fantastic time for all of us ...

(:24). Neil has to teach them. .. people who never been producers, they have to produce, people who never been presenters they have to present, and many of us will build on this. ... the first nation to move on this, to allow the T to be recorded in public, national television studios, is the Iranian TV channel. They have facilitated in a very small way, but they wanted to be part of it. And it looks a very small occasion because they didn't know what to do with it, but in eh coming time we will see how it will develop. ..

Don't be upset, or set back that the Italians have all the facilities, gradually we'll establish this ..

Don't try to over do, and don't think that you have underdone, because this is what we can do. We have done our best. This is how this TV channel will build up .. we'll get blamed for a cup being here or there .. (:26). step by step we build it up.

KF (TV) as a company was signed in yesterday.

.. can give you press cards and everything else. ..

30 channels around the world

(:28).

no we bring the Belgium's back into the KF. Because the mindset was to continuously to set you negative. (:30). Now the KF sits positive and we are going ahead with ?? and the same way with television. We will have mindsets of negativity of people who tried to bring us down. Always look at what's the best things, what's the next.

With the television, .. with our team in the background, when I asked for Iranian leaders to be present at the opening. They said a very simple thing, "give it time, give it time because the enemies are so big, if we stand next to you now, we can create you more problems. We look after you, and we are there to guide you in the way it has to be done. But don't try to emphasize what is done to, but emphasize what to bring in and let people build it on that platform." In so many ways, as we give advice, we receive advice. It's the same for all of us. Try to make the KF TV channel a place where people come to hear the good news, where there is only good news about science and T and the future of mankind. We don't have a television where people come in, live every week, to participate in it to hear a good news.  
(:32).

Yesterday in communication with the heads of NASA, I explained to them in a very simple way, I said, we welcome you to AZ, let's work together. Let's see the next step in the future, because we have that opportunity. ...

(:34). Thank you very much it was a beautiful video. Thank you to Rafael and the Brazilian team, it brought back many memories.

In the process of development of the KF in the past week we have achieved another milestone, we are on position, and been given offices, in the first step to become part of the university structure. Now our team in Tehran are moving to take the books and the things they need, in what facilities provided for us within the university structure.

(:36).

### **Asteroids and Meteorites carry Life**

In the process of the teaching, as I said, by this week, we bring everything to an end in respect to the teaching of the KF, but we cannot ump into the next step. We have to understand what is the next step. We go beyond the boundary of the Earth and see how life been brought to us without us knowing. In so many ways, mankind has an opportunity to learn more about how and what are the possibilities of life .. of the knowledge or being in the dimension (D) of life. (:38). In so many ways, .. we are strangers to our own world. Many of us, we hear about asteroids and meteorites and everything else. How will these come about? How do they get to us? How and what information and life do they carry within them? Some of these, what is stone to you or me, is a home to colonies of life. In so many ways, mankind has not matured enough to understand that even some of these stones we see in the depth of the sky and what we call the environment of the solar system are not from this solar system. As you understand by now as KS, as we see the meteorites coming and entering our atmosphere and burning, or as they enter or they land, or we see them as light in the sky, or we see them as what we call the solar system, these are not all from the solar system. As we get

stones coming in and burning from the solar system in the atmosphere of the earth. We get the same thing from .. Milky (Way) galaxy into the atmosphere of the solar system. (:40). But the size of these plasma fields which convert themselves into the matter state, some they enter as a matter state, and some they enter as an energy and then convert to the matter due to the Inertia of the solar system itself, the way it happens on earth. They become part of the solar system and the through the D of the gravity and the pull, they become like asteroids. So once we see, and once we understand this, we understand that even life from different D of the galaxy, and the same thing that happened to the earth, the meteorite, we have galactic meteorites, then we have universal meteorites which in D are beyond man's imagination, but as energy packs, that when they enter the M field forces of the Milky (Way) galaxy then they convert to a meteorite, to an object, according to the strength of the solar system, and galactic system. So if you understand this, you understand that all the meteorites, all what has landed on earth is not necessarily from the solar system. As much as solar system creates its own asteroids, so does the galaxy and U. So if mankind becomes wise to this we already have receive many of these which have come through the U, which managed to pass the galactic fields. Our Earth and solar system being on the edge of the present galaxy, more or less, on the boundaries, (:42). receives most of, and some of. For the scientists of the future, especially KF scientists, is not to analyze the stones or the objects what we see to what they are. Learn the new T which you have learned through the Gans and Plasma T, and cultivate these to see how life, created in them, and is within them, which has entered the life of man. Maybe at the salt content of our atmosphere there is not life in this, but if we understand now that it needs an active condition to bring the existence and confirmation of life. In the coming time many universities will work in the, what we call, understanding of life in the space, will see and find, and mature life in these stones. Because it is not there, because we haven't provided the right condition. Now that we understand that life has to come and way the life was created. Meteorites and asteroids, are many of them containing life in what we call, as aliens, as those we do not know. Some of these meteorites originally were part of, or are what you call UFO, which has lost control, with life within it, and in energy transfer has changed to the matter state of what we call, asteroids as an object in our galaxy, and in our solar system and in our planet. Mankind has got to learn that this will happen to us in the depth of space. (:44). We will loose many of our spaceships entering in the wrong field without knowing and converting into its condition into the position of the fields of the environment they enter. So as especially, now we enter the cycle of life we have to see, even within the stones, within these structures we see on earth and now we become passengers of the U, we find asteroids traveling in the solar system and the galaxy, to understand what life they carry within them. What life was created in them when they were part of. In the U Community we see many of these, many spaceships which get lost in the process of transportation or travel, and then we find a ?? lump somewhere, and then we can say this is there. But because the energy of the life in them is a M field structure, we can revive the life. Which means one day when the knowledge of mankind reaches that point of maturity, if you put this stone in the incubator of the fields of the U, it might gives you who are the passengers. In so many ways, mankind has to learn the truth which has been hidden from him through the lack of understanding of the reality of life in the U.

Why do we see a tail on some of the meteorites, why do we see tails on some of the asteroids, because of .. they say it's due to the entering and interaction of the fields of the sun. They interact with the fields of their environment and that itself, gives us a lot

of indication, (:46). which one of them carries life. Which one of them is part of? The question to ask mankind is, we spoke years ago about the shoe crab, or the crab shoe, whatever you call it (horseshoe crab - blue blood), and I explained the life existence. Did it enter as the energy pack in one of these asteroids, then become a meteorites, and then finding the right environment on earth gave life to the soul of it, and in that position, in freeing it, it took the shape that it can confirm its existence on this planet. This is why the mankind needs to explore the new science, mankind needs to understand more, now that we switch from the past years of teaching about the matter state and fields, now we have to understand as we go into the interaction of the fields. The essence of the creation of life. How we have even been lacking the knowledge to see and to know the stones we put for people to see, is another field of life. It's another life with essence, within it, but we have not managed to be able to understand, to create the environment for it to be able to manifest itself. Then it comes to the reality of, how do we realize this. How do we create life out of the stones, we create, and we keep in museums. And then what knowledge these passengers of the U carries for us. How do we decipher ever picture, to you it's a boil, or a crack. (:48). But what does that crack and boil carry for us? Why do we see these shapes. I have the pleasure about 1.5 to 2 years ago to go to an environment and a shop which was just selling meteorites, nothing else. The shop was everything, boxes open, this box came from there, so much they want for it. I was with WL in Beijing. As we held the stones in our hands and I looked at it. In the back of my mind I said, how can I tell people I am holding life. I am holding an existence, and we put it in boxes, and we put it in museums and not understanding that the way we make a difference between the animal life and the plants, and we become vegetarians, and we don't eat meat. How can we become more intelligent then to understand that within these structures there is life. It's for us as a human race to understand these first, before we go into the next step of understanding the maturity of time in the space travel. As we cannot see, we cannot create, we cannot understand the totality. Every hole, every grain, every position of the space in these stones, to me as a man of space has a meaning. It's life, it's existence. It does not matter how you pick it.

There are not, they do not come, most of them from the splash of the suns, (:50). and the stars hitting each other, and planetary systems crashing together. That was a fantastic fairytale we have accepted up to now, but the truth is different. The truth is we are interacting and from this planet, or for us in other places and positions in U, environments created, we shall become the stone, the way they have become us, but within it we see, it goes back to the reality for those who couldn't understand at the beginning, that it says, even a stone has a soul, because that stone carries many souls. To you, you looked at the atoms, protons have a soul. To me as a man of space every meteorite is a colony of life, and this is what in the coming time we have to understand, ?? this process. We are jumping into the space travel, but we have no knowledge of the space. We would like to live, and change this planet and make it a peaceful place, but we do not know what atrocities will bring to others in the U Community. But not knowing, but not being able to understand the totality. As I said many times when I let man loose into space, it will become like a bull in a china shop. You'll break everything and you'll think you're still right, because you don't have a knowledge that it is a china, it's got to be respected, and be enjoyed. it's got to be handled with care that it doesn't break. And mankind has to go through that phase. And this is why in today's teaching I brought you a line between, (:52). man and what is outside. That when we start the teaching with what we call the process of the interaction of the fields. What do we know about the fields of lives which have been here and has taken the shape of a stone, and

there is still life in it. How do we recognize it? How do we allow some of these what you call stones, the life which is within them, creates the condition that allows them to show themselves to us. Don't forget we stand 1 and 2 meters high as a man, and when we come to the point of demise, become no physicality not but energy we call the STM. So in reality in the time of change of physicality, how many souls are entrapped in these souls? Are they all stones? .. they are the systems which have life, are in travel, or we have captured them and we don't let go because they cannot exist in the condition of this atmosphere. When we understand this maybe in the future generation our children will take these stones back to where they came from and we'll see them to grow to life. This is what we have to accept as a human race, to become part of the world of creation. This is what we will see in the upcoming time. These stones, what we call meteorites or asteroids some of them are or have been part of the bigger structure of life, (:54). some time in their process of life on this ?/ planet or in this U or beyond. At the same time, we have the meteorites which come from the U into our galaxy and to earth, we have meteorites the size of universes that move from U to another. This is what mankind has to understand, and with it how many of us have seen, have touched, have been around a life which is from another U, which has managed through the process of its evolution entered our atmosphere. Then would we recognize, because the AA and the salt condition which brings conversion to life is a slightly different and we don't have these materials here at this moment in time to produce the environment for it to manifest itself. How many billions of years they have been in this position and they have landed on earth millions of years ago, and they are still in there, calm and serene, waiting for the condition to manifest itself that they can show who they are. We have these with seeds and plants, that the seeds are within the ground and they don't show anything, then suddenly out of nowhere when the condition comes right, man creates that condition, or the atmosphere does, they manifest themselves. We all know the story of the poppies and the battlefields of France, where nothing ever grew there and after they bombing each other for days . months suddenly poppies grew red. Nobody seen poppies for a long time, then suddenly out of nowhere, (:56). by creating, introducing what I call weapon T of the man to destroy each other, they create a condition that the poppies could grow, and they showed themselves in the red color, what we call the blood of soldiers. So even on this planet we have that condition. Now we have to understand we have the same thing amongst us.

A question I have raised many times, have the life on this planet in reality has started on this planet, or was it brought in by another meteorite that in the right condition and the position lead to creation of the life as we know it, as human beings with a little bit of adaptation, as we seen it with crab-shoe (horseshoe crab), or shoe crab. Either way man from now on has to become wise to the creation and the knowledge of what we have, what shall become of us in the space. And what happen if in the spaceship the man makes from the field interaction, in conjunction and entry into another D, becomes the stone which is in front of you. Can you hear the ones who are looking at you? And saying, "hi, I am in here, get me out of here." Or would you hide within the structure of the soul, I stay here, I don't know, that's man, he might eat me. Mankind has to become wise to the truth and the reality of the existence in the depth fo the space. We need to develop a massive understanding of the culture of life. How do we create an environment that it cultures life in it, irrespective of the place, position and the D? (:58). This T in a very hidden way is embedded in the EU. In the EU when we develop it and tune it to the environment that we like, as I have said, in what I call a very sweet and hidden way, that we can create a condition that when we put this stone in it, because

we can measure its field effect, the life becomes alive. We give, we see the stone will change to D of the life, because now we can create the condition of, doesn't matter which galaxy or which U, which part of the Unicose it came from, because the knowledge within the structure of the EU, is developed to create the condition for position in the U. It's not just that you go in there and you satisfy your hunger, or you save yourself from slight little cell in the liver which causes cancer. The EU, this is way it is called universal. You can create the condition in every position in the U that you give chance for life to exist, and for you to be able to adapt yourself to the condition you are going to enter.

(1:00).

(1:02). the new ways that we respect life in every D, "I am a vegetarian, I don't eat meat." If you are vegetarian, .. would you like to have a stone, because really has no life in it. Then because you haven't accepted that, that vegetable has a life too. This is what man is going to do in the space. Oh, I don't eat meat because it comes from earth, I don't eat vegetables because they come from earth they are alive, but I eat you because you are not from earth. Would you like to be in that position, or do we become selective to suit us, and in that selectiveness we create more problems for us as human being on earth and in the depth of the U.

This is why the teaching of the KF has to be for those who understand it, in-depth to understand, to respect the fields of the U, not for them to become something that you consider, that there is a life, or they could have a soul. Don't forget mankind knowledge is slightly tuned to it, but he never understood it. Why some things are rays, and some things are photons, and some things are particles. Now which D would you like me to catch you in? In a photon, a particle or in a light, or as a ray? Either way you are life. This is what in the coming teachings we teach you more, the essence of the creation. Then if you understand this mankind will come mature to the totality of the fields of the creation and the Creator. As when you take life (1:04). in that position, you take part of the Creator. Would you like to eat it? This is why in the teachings we take the teaching to the new D, that the man will even respect the fields of the U, not only the collection of the fields that might have a soul that you might eat or you might consume. And even when you take the fields from the U, you respect it, that what I give, I take, equal. Then I become a transition point, as the food is to the man today, but we go respecting a higher order, understanding the totality, not taking a ray as it passes, that we need, but somebody else might need it more than us. We can always take when it comes.

This is the step which I try to take you in the next stages of teaching of the KF, respecting the fields of the Creator, not, the objects and the matters, and the lives, that because they are collected, I respect. If you reach to that point of maturity to understand the interaction of the fields and respect it the way you respect your own life, then you become mature to become closer to the light of the Creator. Then we understand, to ask yourself one question. Is there a life in the stone on the street? I say, 99.99999 % yes. Because as a man of experience, a traveler of the U, I can even tell you where this stone has come from. Who these people are, how they live. How they interact. (1:06). To you a million years is a long time, for these people 1 million years is not even 1 day of life in their cycle. Then you understand how little we know. Then we understand what we have to respect when you pick up a stone. Don't forget even a stone has a soul, if you create the right condition for it that the stone doesn't melt, but it opens up, now that you

understand the T of the Gans and field interaction, and let's see what it shows itself in the field D.

Yesterday in the lab, I asked our KS to do this with another element. I know that answer, I know what is to come, but it was a surprise to him. What and how, but up to now I could not teach, because mankind was not ready for it. But gradually we are becoming ready for understanding the totality of the creation, now we can go to the next step. How do we mutate, how do we allow life through the fields of existence to come into operation? The point for us has to be one thing, how did the fields come together to create this stone, and within it hold life. And how those lives have chosen to be in that position, and what they are learning through the experience of their lives. (1:08). A very simple understanding will give you a lot of clues, how much life exists within the stone. You see the color of green, you see different shades, how much of it is earthly made, and how much of it is within the stone? What fields from inside comes that it is seen outside as green? What is the interface between the fields? Why only we see the green of it? What condition that green creates for inhabitants of the stone to receive energy at the level they like? When you like at inside of it, when you look at the holes in it, why do you have these holes? Was the stone melting what was boiling inside? Or is this a cavity of the possession where the soul could exist? Now the stone has a different story. Now we understand the totality.

### **Truth about Black Hole**

As I was talking to one of the KS recently, why do we call it the black hole? Why is it black? Isn't it the truth that the field strength on the boundary outside covers the full life of life inside? Isn't this what we wrote in the first paper about the creation of the black hole? The origin of the black hole, just because we see it black outside does not mean there is nothing inside it. Most of you KS should have understood this, (1:10). from the first time you made your first Nano coating. You hid the gem of Cu inside the darkness of the skin, you call it Nano T. You should have seen, life exists within. The life of the Cu or Zn or whatever you make exists inside that black hole. Just because it's on the tube you consider it's a N T. But that's the true essence of life in the U. You have to go through it, that 30 to 40,000 layers and you see life, the Cu inside, the soul of it. This is only one of the ways I could teach mankind the beauty of the creation and what, at that time was made not to be understood, that what is it, that black holes are eating machines. Because man never understood the truth about it. What is black, means it's protecting itself that the life inside exists in its entirety. Get a Cu ball, throw it in the caustic, create a new condition for it, that in respect to its environment creates a protection layer on itself, you call it Nano layers, and now you have a black hole in your hand. But inside it's Cu, you cut it and you see it. It's the same when you cut through, what we call a black hole in the U. There is a life in dimensions of a higher strength, that in reducing its strength, it becomes an interaction, makes layers and layers of shields, the way the earth's atmosphere does. Now we understand the truth about black hole, and now we can understand, if we understand the field interaction of the U, (1:12). in the coming times and teachings, how we can move through these barriers into the center and see the Cu. Now the knowledge of Transmutation & Transportation through fields of the U, paramount. Not to transmutation of the elements as was promised, to become the point of maturity of the man. That was the maturity of the physical man. the man who understands the process of the creation through his soul moves to the D of the actions of the fields of the U, not through the D and interaction

and conversion through mutation of the matter state. The totality of the knowledge has to be understood from now on, as we enter the next phase of the teaching and understanding. This is why I said, I resign, I step down as head of the KF, because to teach the new knowledge takes a lot of time and effort, to teach a handful of men who understand this, we go through the transition, and over time we'll teach the others for man to mature and become part of the U Community.

When I leave the KF, I leave the state of the matter condition as man is involved so much in, because I have matured man to that process that he can gradually enter the D of the interaction of the fields of the U. Those who do not understand it, through their lack of understanding of the knowledge, say, escaping or this and that. We don't escape, we open new doors for the scientific world to open new ways for humanity into the span of the U. If I wish gold I can create billions of it, but it has no value 500 meters above this earth. (1:14). Nobody wants it, it's a piece of dirt, but to man has a lot of value.

In so many ways, we can create whatever we wish, through the fields of the emotion of the man and creation of the field of what we call, tangibility. In so many ways, mankind has to understand, he has never been so kind to himself, and in that process mankind has come to misunderstand the creation through his D of his physicality. In the coming times of teaching, we'll show you, we'll teach you that you understand which fields have come directly from the fields interaction of the Creator and has not touched anything. This is not impossible. There are a lot of these rays, the essence on one end is the man, and the other end is the Creator. The way you call it, neutrinos, they travel from the strength of the field of the Creator. And there is no strength in the D of Unicoise slow them down, for them to interact, because they still have come from the inner sanctum of the Creator. Now you understand when we say servitude, when we say the purity of the understanding of the love of the Creator. Some men will travel that gap between their soul and the Creator in an instant, because they go into the depth of the fields as the strength of the field of the emotion of the Creator.

I always said, birds with birds, wolves with wolves. If you are a bird who is free, (1:16). and detached and you match into it, you'll find your match, you'll find your love of Creator. Now maybe mankind understands how some will reach the level of understanding of the Creator in the original essence of his own fields, from the point of inception of the creation itself. Now that you are knowledgeable you understand how sweet and how the reality changes because now you have been enlightened. You have been enlightened by understanding of the totality. When I told that some of you might jump that in the last teaching in one go directly to the Creator. Now you understand how. You wish, if your emotion touches that point that makes you to get ILS or MS, to wish to die and the body organizes it, and it'll happen. The same wish, the same purity, if you wish, and the wish is pure, you'll join and you'll match to the fields of the line direct to the Creator. Maturity of the man does not need PhDs, and engineer, and doctoral and the rest of it. A little farmer, a little Shepard on top of the mountain in the sincerity of trying to help his sheep, not to die, or to take his pain, can reach the point of purity to reach the Creator's field of emotion of love and care, and then the Transportation and Transmutation is instant. The maturity of seeing the light of the Creator is the reality of understanding and enlightenment through the fields of the creation.

Mankind now looks for gold to become rich. By the time I teach, and you understand the totality, the human race will search the U, (1:18). the whole of the U to find that light which indicates it's the light from the Creator. The hunger to possess will change from gold to the rays of, to golden rays from the essence of the origin of the Creator. Then you understand which one do you value more. Something which has no meaning, or becoming part of the Creator, to become the Creator itself. Maturity of time. Creation of new life. Understanding the totality in the new dimension (D) of both the physical and the fields, what we call the soul and physicality is about to start. Then mankind becomes more rich, .. become detached form this planet, then mankind comes to respect the totality of the creation.

In so many ways, gradually step by step over past 8 years I took you from matter state into the energy, and now from the energy of the PI and the Gans into the fields of it. This is why in the past few months I keep on telling you let the physicality go, look at the fields of the Gans and then see if you can create that field that you can join in the center of the Gans. You become part of it, and then through it you will see the outside. Then if you learn this process going through your soul to match the fields of your environment, then one day, one day, one day, one of the souls will find that golden light, that passage of fields to the origin of the essence of the creation. That universal, Unicose, neutrinos that the origin is connected to the Creator. (1:20). Don't forget when you reach a point then you convert and you go back to. It's the condition of the emotion which decides where that point of return comes. The water on the surface of the planet evaporates and at a certain point becomes a cloud and rains down back to the water of the ocean. If you mature enough at one point you catch that temperature of the field strength of the Creator that becomes your passage back to the Creator, otherwise you are on a swing away from, and hoping that you will catch that field that you might return to the Creator. It takes 1 second to fall in love, it takes 1 millisecond to reach the Creator. If man understands the meaning of, because you travel back at a higher strength with a more powerful love of the Creator to welcome you back, within what He gave back to Himself that He can create more. Now you understand the game, or the teaching, when we say the origin of creation, the origin of the fields will start from 21st. Many of you were waiting to see what will happen, a creature will happen, you think you will go on and on, and something will be. You are looking again for that Methi, you are still looking for confirmation in physicality. We look for the maturity of the man through the soul in the D of understanding the creation and the Creator. Maybe now you understand what we celebrate from 21st of March. Not only the spring in the physical matter, (1:22). of the Northern Hemisphere, new life will start, trees will grow, plants will grow, birds will have children. Now we take man through the process of the cycle of birth in the D of nearness to the Creator. This is where the next level of teaching comes. Many of you will not understand but you hang on, that I hope one day I understand. But understand in the teachings to come, you have to understand the meaning through your soul, to the confirmation of it through your physicality, means you are still not mature, as "I can't feel anything, I can't see anything," but you do not know if your soul has already taken a trip back 2 steps, or going forward 10 steps to the Creator and the essence of creation. This is where the new teachings will come into operation that you can adjust and understand the position of your physical life, and the D of the creation within the center of you, where you stand in the presence of your soul in the D of its life, and its path to its creator, or within the environment of its creation. You were waiting for Methi, but in fact the Methi is you. It's your soul. It's the understanding of the creation and the essence of the Creator's fields of interaction.

In a way, when we become the body of the man, and we manifest our physicality, we are like a clothing which is worn and worn by many people before, and somewhere down the line it's been passed on to us, and we wear it, (1:24). the frock of the man to confirm our existence. Before this field was part of the galaxy. This field was part of another being, maybe. This field maybe was part of interaction of something else, and as a hand down energy fields has become the body of the man of today which we are. Which one of you would like to wear firsthand, untouched brand-new clothing of the fields of the Creator. And this is where the teachings will go. This is if you go back, I explained, even in one of the teachings at the beginning of the recordings we hear, you become a speck of dust, part of nothing, or you become the fields and rays of the Creator. Maybe some of the original teaching now has a different meaning if you listen to it, for the next time. This is from the 21st of March, from this Sunday we take steps towards. We are not abandoning mankind, but we are elevating the understanding of the man in the essence of the creation and the Creator. You don't need to be rich to be able to buy and be part of the first-hand clothing, that you reach and receive directly from the father as a gift. This is what the teaching of the coming time will be and that's why I emphasized many times, we'll talk about the interaction of the fields. This is why I pushed you and I pushed you for the past months and we've seen Alex in Canada has got a touch of it but can't understand the totality of it. And we see how the teaching has changed from the time we had Armand talking about making Gans and N coating. The maturity of the time, (1:26). that some of us now start understanding part of the interaction of the fields, and in the coming time we'll have more and more KS who are more pure, and the enlightenment of the knowledge will come to them, and they become the teachers of the next cycle. In understanding the fields of the creation, .. the process of creation, .. respecting the fields of the U, not the entities of the U. Because when you respect that fields, that field might be connected on the other end to the Creator. How and how are you that you could respect your own Creator. WE become humble through the knowledge, we become arrogant in being able, and reach the position to feel, to be part of the Creator, and even the arrogance at that moment, is arrogance of serving not possessing. This is what, now you might understand my teachings in past. Now where the T has no meaning except for you to understand the process of the creation, except for you to understand the interaction of the fields of the Creator that on the millionth time hand-me clothing down the line, has become you. Through your soul, through the interaction of the soul of your physicality if you become pure and mature enough you might touch the fields of the rays of the neutron of the Creator that it might show you the path back to its creation. Now you understand the process, (1:28). now you become intellect, to understanding the work of the Creator. In so many ways, mankind has no choice now that we have opened the doors of heaven, of the knowledge to humanity. Some of you will understand it through the D of physicality, and some of you through understanding through your soul will take a new D and direction in physical life, that brings you to the position that you are like, as I said to one person before, you've seen the bride turns around and throws the bouquet in the air, to see which of those behind her will catch, and become lucky to become the next bride. This is the same, that bouquet is the flower, it's the beauty from the rays of the Creator. Which one will catch it? Is it be intention that we catch, or by deception. Those who get (it) by deception, they'll never get back. Those who (through) purity of heart want to get married will catch the bouquet, and seeing its beauty, they fall in love, and create a condition in their souls that knowing that they have that bouquet in their hand they get to the lover. They'll find a lover that it leads them to be married, to be

consoled and in a way given the pleasure of reaching the totality. But I wonder how many of you will catch the bouquets which have been thrown by the Creator that you find the path to join, to be like Him, a lover and a giver.

In so many ways, (1:30). as we cannot do ourselves we create children that might be in their process in the development of their physical life, one day, one of our children in the future will catch that bouquet and find the path to the Creator. This is in fact the essence of the creation of the man and life in the U. We create so much souls that one of, one of, the ones whose been the bigger wearing a torn clothes of the thousands and millions times by others, head of them, will become rich by catching the bouquet that can reach the Creator, and wear the frock for the first time, be part of the totality. To be the creator, to become mother by married, that leads to the creation of the totality of more to be generous and to love. Maybe some of you already have been enlightened today to understand what is to come. And some of you still in the tangle of, "I don't feel anything, this is all talk." Has to be, a neutrino doesn't show itself as a photon till it reaches the right environment, and a ray of the U and the galaxy, does not show itself as a light in the eye of an astronaut till it reaches the right condition in the eye of him, that he can see that flash and beauty.

In so many ways, as you were hoping to catch the bouquet, understand one thing, what is, and what is the bouquet that your soul needs to catch to find a way to the Creator. The elevation of the soul by creating more fields to be within it, like as you see, (1:32). you have a CuO, you don't know which one is a Cu and which one is an O, but you know the collection is CuO. Man by serving, by servitude, collects more things in that oxide, Zn, Cu in that plasma, everything else in that plasma, that maybe at the point of maturity, and by coincidence, if he enters a room he can catch the light of the Creator, that because he has a full spectrum of it. This is why we say we praise and we bless our people.

This is why we give to the soul of the Christ, that we continuously add, that he gets to the point, that through his soul, be able to catch the fields of the Creator, and be within that realm. Then when we call him the Son of God, does it mean that, that soul was directly enlightened by the rays of the Creator, and he became the manifestation of himself, as we are the millionth down of the son of the Creator, that's why he is still part of us, his essence is with us, as in amino acid (AA) and genetic construction, we see he has the eye of the great grandfather. In that process we carry the soul of the soul, of the soul of many millions, of the grandfather, to be a creator. Or we mature to the point that our soul reaches that maturity in one instance.

As I said, in the Sunday teachings with Americans, that they say, do we call you a doctor, or what title? I said, I don't need a title, nobody carries a title, it does not exist. The only title a man has to carry is his closeness to his creator. If you come close to Him, and you serve, you have reached and achieved the title of Him, this is part of being, (1:34). a lover and a giver. I have found peace, I have found love within the creation of the Creator, and in that process my soul is free, but I have to manifest myself in the D of physicality, that I can transfer and translate the knowledge of the Creator. But how much you understand, and as I said, when I teach, I do not teach the mankind, but I teach the totality of U, as being part of the light of the Creator we reach and enlighten the whole ?? lot. It's not directional or D. In a way, when you throw a fireball into the air everyone can see the light of it. It's not exclusively to one who has thrown it.

In a way, that's what we are, as part of the universal messengers, what we do, we enlighten the whole of the environment, not just for the man who threw it, or came from us. Then you understand the totality of the creation in the D of the Creator. If you feel what I feel as I ?? want to teach you, I feel no physicality, as the physicality is a D of nonexistence. It's the knowledge of the Creator which runs within me, and which becomes the knowledge to you. In a way, physicality has no meaning, as I take you into the realm of the creation and the Creator to share knowledge, and as I say, how many of you at the same time ?? by your souls across this planet, and beyond have become receptive to understand, that it is time for me to take the next step. I have matured to understand the position and time and the place. (1:36). We have a beautiful saying in Farsi, .. it means if you don't want to stand out, become part of the crowd, and this is what we do. But within the crowd we herd the crowd which way to go till they reach the destiny, till they reach to the point of understanding.

In so many ways, we had the birthday of Mitra, past few weeks, and now we understand the birth of the STM in the D of the realm of the creation from 21st of March. Beginning of the new life, beginning where the structure of the STP and the STM will spark with one soul, and then does that soul need to take the shape of physicality to confirm to humanity, or become the soul of guidance of the man to take mankind and those others to the point, to all see, reach, and hold that bouquet which comes from the rays of the Creator. And that process will begin.

Many of you, or those of you who were looking for physicality and all sorts of escape routes, you can still choose. Those of you who made a lot of assumptions, you can still assume, because you are still entangled with the D of physicality. One thing will be for sure, as I said many times, touch me and if I feel, feel the physicality, but if I feel you touch the fields of the creation, you will see nothing but enlightenment within you. You will touch the physicality of the soul, not the physicality of the man. As long as you find pleasure in physicality of the man, (1:38). you have not achieved maturity of STM to create that position for the creation of the soul. As I said, look at the stone and contemplate what are you holding in your hand? As even this stone, at some time in the back billions of the generations of it, is part of the Creator. Then, would you still respect this stone or just throw it away, that something fell on the earth. Where this stone entered directly the position of a life, coming maybe closer than any of us from the source of the Creator. Man has to respect the D of the interaction of the fields of the U, and then mankind becomes mature to live in the D of the fields of the STM, and not in the D of the physicality of the man. Mankind has to understand the totality from now on.

Then we understand more, .. we take position to be able to mature to become that police officer who shows the direction to get out of the trouble. When there is a flood or disaster you wait for the man in the uniform who has the knowledge, which way to go to guide you away from the disaster, to new pastures, to find peace and tranquility, to start a new life. This is our job. Everyone of us has to become that policeman, .. to guide the STM to the direction, (1:40). that where might be that neutrino, which started from the soul of the Creator itself. If you can guide one soul to that point we have achieved, served the purpose of existing, even in the D of the soul of the Creator and the STM.

Maybe some of you will understand the purpose of the creation and the purpose of understanding the totality of the creation, and then you understand what it means, "I

made man in the image of myself." As the man is the so many frocks down the road, part of the interaction of the field of me with me, ?? that ?? He's the Creator's manifestation. You cannot come from anywhere else but the Creator. Does not matter in the D of the physicality or the soul, your soul is no different than your physicality, it still have come from the D of the soul of the Creator, but has not converted to the D of physicality.

Maybe many of you will understand more when you take the path of fields, than the path of physicality. Maybe there is a need for contemplation and the silence of the man, to understand, to listen to the voice of the Creator, through the D of His soul, but not through the D of ears of physicality. (1:42). Silence of the soul is more tortuous than the silence of physicality, because the soul knows when it is silent it's not interacting with the D and the direction to find its way towards the target, towards the position of the Creator. In physicality we look for a bigger. In the D of the soul we look for the light of the enlightened, and those who lead us to the Creator, to the light of Creator, to the beauty of His manifestation, and for us to become part of the totality, not to be a second hand, million time down the road, as physicality.

In a way, what I said about the black hole, .. and the creation of the black hole, would we when we come to see the Creator, a darkness, before we enter the gate and see the sun inside, the soul of the Creator. Is that creation of what we call, black hole, the essence of the Creator, that it manifests itself in the D of the physicality of the strength of the eye of the man. Not everyone sees everything in the U. Some of us when become that electron, in enlightening, in being enlightened by the interaction of the light of the Creator, will shine to manifest ourselves, "I am here, I would like to be part of you even though I separated from you." Maybe now you understand more.

But the beauty of it is, with what we have given you, what we call the Enhancement Unit (EU), (1:44). mankind can see the path of the fields of the creation, and in some of the conditions, in some of the strength of the universal system, in the strength of the totality man might find that pool of water, which man has made that one day one neutrino might hit. Mankind in these systems find the direction and the light that has come from the Creator to elevate his soul. This is why if you go back in the teachings, I always said, that some of you being in the system might see the light of your soul, because you interact in the D of the strength of maturity, and with it to interact with the soul of the Creator.

Many people in the past few weeks, we see frightening people about the soul this, and it takes your soul and the rest of it. As I said, the devil exists within the fear of ourselves, and those who try to fire it, because they are so far away, that they know they lost it, and they will never get it, so I frighten the others as I don't have, they will not get too.

This is it, and this is how it shall be, and I hope you listen to these teachings hundreds of times, not once or twice, and understand through it the path to the Creator. The path to the soul to interact with the soul of the Creator to show your beauty in the presence of the Creator, that he might one day fall in love with that light, and with it bring that soul to be the companion, and to be part of the spread of the knowledge of the Creator amongst His creation. (1:46).

Maybe, maybe many of you will understand what we call the "virgin birth," where the light, the soul of the child to be created, comes from the Creator Himself, and not second and third hand. It's virgin in essence of the totality from the beginning, not used and abused, and then re-clothed millions of times in the physical D. In so many ways, mankind becomes mature from now on, teaching, to work in the D of the strength of the creation and then we'll find the travel in the depth of the U will become a child's play for the man, if he decides to travel with the physicality or in the D of the STM.

I hope I have given you the present you have been waiting for, for 21st of March, as the gift came before the time, that you can understand it, that when it comes the time of the teaching of the man, physical D, on 21st of March, you can start enjoying the gift, and start understanding the totality. Maybe mankind will be kind to himself to understand which kind of man has become ??? And then we progress to the next steps of understanding of the totality.

You have got to realize you have been taught today in two levels. some of you heard my voice through your ears, and some of you received the message of the Creator through your soul. (1:48). Search for it and if you can match the two, then you heard the same thing in both D, you might have found the path to your Creator, as both have the same message of love and care, but one was to the soul and one was to the physicality. If you have only heard in the ear of the man through understanding of the physical emotion, try to find out the voice of the soul, and when you match you start the trip towards the D of the Creator. You will find the fields, which might take you a little bit closer. In a way, less second hand clothing and you move forward, and in that new position you might find another strength that takes you, makes you richer in understanding the strength of the soul to where less second hand clothing of the creation through the ?? light of the Creator.

But if you made a mistake, you may never know that the frock you take a step higher, by your own misconduct might put you back beyond what even you had as a STM, further down the road, instead of being closer to the source. Then it comes the maturity to understand, that the man has to be correct in conduct, at all time in the D of his soul, let alone his physicality. Then the true essence of Mitra comes and manifests itself, do good, talk good, and think good. Thinking comes from the D of the soul. Doing comes from the D of physicality, and somewhere between the two, (1:50). man has to find the essence of the reality of the creation, not only in the D of physical life, but in the D of the STM, his creator.

I hope, some of you and I hope all of you have matured to understand the teaching of today, even though we start teaching more in-depth, more in maturity of time. This is what I call the promised day. Many of you have been waiting for the message of Methi to enlighten you to find the way. Today is that day. It's you who have to become the Methi of your self, and understand the totality of the knowledge, not to look for someone to guide you, but you become the guide light for the others that you take the right path. And then maybe you understand, it doesn't matter in which path of life, religion you believe in, today is your Judgment Day, because now you know the truth, and it's you who has to judge. The judgment is on you and not somebody else to decide how much you understood.

Take the path in the direction of physicality and starve yourself from reaching the goal of the Creator. Enlighten and enrich your soul to understand by detachment from the physicality, but still using the D of physicality to gather more to may be able to reach, to find that light which comes directly from the Creator, to be the rain which it turns back directly, without interference, without changing more clothes back to. Then you understand the totality, (1:52). of the essence of our teaching. I am the beginning, I am the end, as the end comes from my beginning. Then you understand the position and the elevation of the STM in the D of the physicality, as much as in the D of the fields of the U.

Loving is an attribute of the Creator. Man has not yet learned to love truly the way the Creator loves. We talk about love, but the love man loves in is still a phantom, in comparison to the true love of the Creator. Maybe today I have opened your eyes into a new D, as I said, where the teachings will come from. I warn you always months and months, and weeks in advance.

As a KS told me, you talk too much about, everybody expecting now, but you deliver later. Because for a wine to be sweet it needs time to mature. And for a knowledge to be understood it needs to be educated that all gather and do, not one to grasp and grab the chalice of wine, just for itself. We took time to mature more souls to be able to go through the transmutation and conversion of the souls of the man to the souls of the Creators, those who will elevate faster. It's no good to have 1 perfect student in the classroom, you strive to have all your students in perfect condition of the knowledge. (1:54). and this is what I have been trying to do for past centuries and thousands of years here. Now it is time for man, he has reached the point of maturity, that we can open another gap, another light from the light of the Creator, the knowledge of the man's soul and not his physicality.

Thank you very much for today and I hope you received the message from the Methi from your soul, and the Day of Judgment, for some of you is today, as you judge where and how this position will be, and if you don't do, it's just another voice, and some of you who will go through that transition, and become detached from the physicality and it's bondage the it is. Become detached like me, I accept life the way it is, at the time it is. I accepted a lot of suffering over centuries here by the hand of the man, but now I see the light that all that was worth it, even the ones in the past few months and the past few years, and ?? of the scientists ?? man to guide mankind to this point. We pray, and bless the soul of those, even our enemies as in the way by creating enemy many of you have to judge your own soul and intellect, and in that process mankind become the wise men of itself. Be wise to understand the truth, not to accept what has been given to you as the truth, this is why we teach this way, for you to touch, for you to understand, and in judging for you to mature 1 step, that you gather more fields that you stand a better chance that you might catch that bouquet to return to the Creator. And I hope, my wish, (1:56). that all the 7 billions of you, ?? that man , other creatures only, and plus all the other creatures on this planet, and the soul of all those within the U and Unicose will catch today bouquet, that we all return back to the Creator, and become the creator and creation of the new life, with joy, with peace, and understanding of of the totality of the fields, that we all come from one light ??? even though by interaction fo the others and other fields by diffraction and other things we become to become the clothes of the man. And even in the clothes of the man we bare another clothes to hide the beauty of what the Creator has created in us, as with the frock of the man we hide the beauty of

the soul, which is within us. I hope many of you matured, and I hope many of you ?? make that path that the D of physicality becomes a joy to be the manifestation of the physical D of the Creator, and not the suffering of the life of the man in the D of physicality. Blessed are those who have matured and elevated. Thank you very much for today and I hope you will find peace with the understanding of the totality, not by enforcing the D of physicality through the lack of understanding the rays of the Creator and the beauty of His ?? .

I think it would be a good time to take a break, Rick .. (1:58).

>> BREAK >>> (2:10).

Q: ... (2:12). you were explaining how meteorites and comets carry souls with them which could be seeds when they land in some other planet or manifest, they could start out as energies as you were saying and manifest with the Inertia of what they encounter. .. my feeling is that when a comet passes through it leaves behind energies that influence the planet, .. my thoughts were that it would carry the purpose of the Creator by the seeds that it sows. Does that make sense at all?

K- No, I am still trying to decipher.

Q: (2:14). .. about the planet coming closer to the sun.. .1988 the planet slowed in evolution. Is that what you are talking about the time coming closer to the sun.

K- We are always moving closer to sun, we think we are a big planet, it takes us 24 hours to go from one point to another, but in fact we are a speck of dust. It has 2 factors, it goes through a point of conversion, if you look at a far point Saturn and Jupiter, you gather a lot of gases, as you come closer you gather, due to higher strength you achieve .. higher strength from the fields of the sun, you gather more materials. The rate of the expansion of earth, compared to where it was, at the point of Jupiter millions of years ago is totally different. We convert much more energy to matter, now than we used to. We used to attract the fields of the gases, that's why there are such big gaseous planets on the far end. Gradually as we come closer to the sun, we change, we convert more matter from energy, because of the higher strength fields of the sun. So we have never stopped gravitating toward the sun. the center of the Planet has .. (2:16). attracts more neutrino fields of the sun or the U or galaxy, that, that energy creates a new condition for earth to find its position in respect to the sun. as it comes close .. would it go in a way of changing its motion because on earth up to now we only looked in a very narrow way in existence of planetary systems ...

Change of rotation to horizontal ..

(2:18).

(2:22).

.. is partially dependent on the Inertia interaction, (2:24). with the field within the center. It's not all one, because the Inertia itself if it comes in the mass ratio, energy level. If you understand the Inertia is on the surface, if this mass ratio of the field strength, become big enough that can interact will influence this change, because now it's tow of them have to interact. Earth's crust is very thin so Inertia interaction stays on

a very thin layer, but if earth creates a bigger and thicker fields by conversion, then this will have a bigger interaction with the center, and will change this. We see that with the stars, we see that in the creation of the stars. Where if you have the seed of the star you have nothing, and then you have the layer of gaseous as you call it, motion of fields. In fact, in the center it's just interaction of the fields, that in the slowing down they manifest themselves as a new inertia layer in the sun. And the interaction of the fields from here, with the interaction of the fields from Inertia, creates the light we see. The light we see is only the spectrum of the fields which is eye, at the level of the AA of the man. We don't see, if you had a different what you call, AA strength, you will not see the sun this way. Maybe you see the sun more from inner, because you do not come in interaction with the field of these. Or some of us according to the strength of our AA might see the sun D near to the earth. (2:26). It's from the point of the observer and where we fit in the balance of the fields.

K- You got to remember one simple fact. We have been told by mistake by our scientists, over time, that the earth's M fields, .. comes like this and goes like that (out North and in South Poles). But in fact the fields come from every D. in every direction, and it doesn't come only from the bottom, they come from every angle into the equator. And some of it, depending on which way they enter, they might come this way (right through the center), so we have the fields this way (coming out the sides) too. Depends on which strength we are going. The one thing if you were in the space T, ... they say the earth's M field on the North pole is 3 to 5%, but follow now the understanding of the fields of the plasma, earth is a plasma, so for it to be more, to get the traffic, this polarity (North), has to be weaker, than this polarity (South), that the stronger feeds the weaker. (2:28).

Q; That looks like our lungs.

K- That looks like our brain. Many of the cancers created by the division of the 2 spheres ..

(2:30).

(2:32).

Any other question.

Q: (2:34). ... the meteorites. are the field interaction where they manifest in physicality. When they do fall down and break up, those that disintegrate where do their souls go, to their origin? Do they ever go back to their origin to the life they had ... ?

K- In some occasions yes, depending in that process. You can see when the man become knowledgeable to this, you will see (2:36). in some cases in the process of conversion

(2:38).

(2:44).

## Aliens Living on Earth

Because they are a part of us, they are amongst us. You see a lot of them in South America, you see a lot of them in Africa. They have a typical features that is connected with their conversion. (2:46). When they convert to be like human race they all take certain shape. It's like you go to church, oh, these are black from Ghana, or these are black from Kenya, even in the Chinese community. You identify them because you know different cultures of Africa, and it doesn't matter where they come up, we can say. They are all like diamonds, they have their own beauty, and it doesn't matter which river or mine, or ocean you capture them from. This is what we got to mature to, then we will see around us. I was sitting with someone in Ghana in a shopping center, .. and then came, and they knew I recognized them, they tried to go and hide between the lift and the ?? and they was somehow blocked. They had to come back. I confirmed to them, I respect you for what you are, and as a guest, and it was amazing how they changed. I recognized many of them even walking up the streets in Linz. They become adapted to us, to live on this planet, maybe because they lost their homeland. We don't have on the streets of London, just the refugees from planet Earth from Syria or Iraq, .. we have refugees from other planetary systems which they have been lost in the process. Or they have educated themselves in the travel of the U, and by coming here, they choose to be here because their home has been lost while they have been away. Galaxies collide, (2:48). Star Formations collide. It's the same as we have hurricanes, earthquakes and people have to move and go to another point of the earth to live. It doesn't change anything, it's the same truth.

Q; ..

(2:50).

K- We got to understand that mankind has to teach its children not to be prejudice ..

(2:52).

(2:58).

Any other question.

Q: Italians, expand on the CO2 salt.?

K- What do you mean? (he's gone ) (3:00).

Q: are the Cups for individuals or can they be used for more than one person.

K- We already answered that one.

Q: Can you use them when you don't have any health problems.

K- You use them when you need them.

Q: Any contraindication for people with metal in body ..

K- you have to go through all these have been published in KF ... effects of fields on the body. (3:02).

Q: Salameea, .. can an electron and proton again become a neutron ... this is the aim of us to become the Creator?

K- Depends in the proton you become, what strength of proton, ?? or electron, you have as a composition inside, or you achieve, or you receive from within the structure. Every proton in essence, once you have created, or every electron, now is a essence of a

neutron itself, because now it's a beginning of the next cycle for it to be ??? part. As I said .. mankind's knowledge has not completed to understand, that even an electron in the process of its life goes through the conversion of to a smaller, and gets to the point that it reaches such a minute position, that the strength of the fields of the Creator can change its position and its strength, or the environment. (3:04). So at any point, at any structure once you have gone through the division, now your structure is another neutron that is ready in time to convert or to divide, or to absorb.

Q: .. can you elaborate and positron and electron more?

K-

Q; is our blood the secret to elevation of the STP?

K- (3:12).

(3:16).

How the accreditation in Europe was interfered with by Belgium monarch...

Committee has put it aside, not dismissed ..

We'll become part of the university structure..

(3:18). We had it until 2012 ...

(3:20).

(3:26).

(3:28).

K-

### **Chinese KF Community Protected - Don't Try to Contact**

We had a problem with the Chinese group because not many of them speak English, but they are very good KS. Yesterday I received a message, we want to be in, put us in because it's all in Chinese. I said, yes, but we need people to speak to be able to. We brought the Chinese in, but this group that was brought into the things, they are part of the structure of the KF. Please do not communicate with them they will not respond. It's a very strict structure we follow with China, We respect the integrity of the homeland of China, and its leadership and the way they run their nation. We do not intrude and many KS don't understand this and can cause problems for the KF unseen. The KF Chinese have a strict structure. No response to any KS. ...

(3:30).

(3:32).

Chinese Intelligence officers are on line ...

Any other question? (3:34).

Q: peace is easy

K-

(3:46). You will see the products of KF on Amazon, and other platforms ..  
.. if orders come through your TV channel you get the backing of it from KF, you create a business through selling the products through your promotion, the TV shop will be open in the next week or 2.  
.. I stay in Europe until I complete the peace process with Iran. On completion with eh peace process, with what we plan to do it. If we achieve it the way we want to do it.

I will head the space T in Tehran an invite world scientists to Tehran.

The essence of the space T will shift and even we might move a lot of things into Iran, AZ, China, and our base in Europe. It's a lot to happen. It has to be freedom of access (3:48). No government can stop us to bring in T to benefit the nation.

(3:50).  
You order one I will get you the doctor.  
Any other question? (3:52).

### **Reincarnation or is it the Same Soul**

Q: .. You must have been reborn a few times since you have been engaged in raising our consciousness for 6,000 years. I would like to know what cultures you have already gone through, perhaps you were the ancestor of many of us and by affinity we are today KS?

K- I was talking about this to one of the KS, very recently, and the interesting is, what was said, that, is it a reincarnation, or is it the same soul? It's the same soul, and with it different physicality in the D of being able to understand how things can change, and how you can bring your race to a position. In different ways and different structures. The biggest problem for this race has been, race as totality of life on this planet, not just man. That due to lack of the energy from the center, or what we call the inner core of this planet, not providing sufficient strength fields for its inhabitants. Inhabitants have come to steal from the others to survive, if I can put it that way. You know when you are living, given a certain amount of money to live and it's not enough you get a second job and if the job is not there you go, because you need to feed yourself, with people who steal and everything else or whatever. (3:54). This has happened to this planet. Due to the lack of, and the condition of it creating life, has not managed to sustain life by giving to its citizens, that they do not need to steal. The whole structure of life on this planet come on killing and destroying other lives for them to survive. The nearest only structure which is not killing, but creating a condition for absorption is the vertical people. In a very indirect way they do that, because they don't kill, they create a root base that they create the fields, that the fields are in the U get absorbed to them. They have compromised their freedom of the seeing, to be stationary but not commit a crime. If the rest of the life on this planet, which is what we call the breathing side of AA, mobile, or what we call the horizontal people, being the ants, the man, lion or mosquito, go through the other process like receiving all the energy they need from the inner sanctums of what we call, earth, mankind will change. So the only way we could compensate for it is to develop a T, to teach a T, that we can compensate for the lack of the energy, the fields, and this is the Gans production, and then the field interaction, and the way, .. the way we have polluted the environment of this planet, with CO2, and

what we call the global warming expression, (3:56). and it has taken time to happen, the process of the use of the Gans's will gradually become to the point that the same thing will be achieved over time. We have to do it in a slow pace otherwise we create more problems for, more lives will be lost, because a lot have adapted to this condition of the present time. But by overall by increasing the fields which creates the stability of the emotions, doesn't matter what animal you are, which is mainly through the Zn and combination of interaction of the Zn and Fe, as a blood. Now with increasing that, it's like the way we polluted the air with burning the fuel, now adding, the more of this conversion of the energy, the way we fill the planet with it, will reach that point of the balance that the planet will take enough, create enough condition for it, hopefully, in very small steps and measures, that will create a peaceful animal, that we start more tapping into the planetary system and the fields of the U. That's the whole purpose of the work with the Gans's, that we change and we reduce the dependence on the package of energy, and we receive more and more from the environment of our existence and then become passengers of the U. I said many times it will be interesting to see when we allow the first child in the U to be born in the open space of the U from earth. Will he survive, and would it directly being born into the environment will switch over to the higher strength that he lives through the structure of the U. This has happened many times in the U, (3:58). and it will, man will not die in the space. No man will die in the space unless he chooses not to convert. This is why we in developing, and understanding of the creation of the new physical structure of the life and the soul together, that the conversion, when it's not there, when you panic in the physical life that you might loose the physicality, you go within the inner sanctum of the STM, or the creature, and then when you find peace you manifest yourself. Or you manifest your self even in physicality when you want to protect your soul from ?? the way man does. We are becoming wise to the knowledge of creation so we can openly put it on the table.

Thank you for today. I hope and I wish one of the most beautiful years for the Iranian community and all those on the Silk Road, and Japan who celebrate 21st March as the beginning of spring and the cycle of life, and many of us across this planet will find the process of change from 21st of March, with the creation of new life, new understanding of the fields of the creation and not matter state of the man who is so much dependent on.

(4:00). We start at 10 AM CET on Saturday ..

Till Sunday 9 o'clock we'll try to have an open discussion with KS around the world ..

All the KF programs are on CET... (4:02).  
Maybe next Thursday will be live on TV.

(4:04). Youtube live and Saturday and Sunday ..

372 KSW

(4:06).

END
