

373rd Knowledge Seekers Workshop; March 25, 2021

ENGLISH TRANSCRIPTION

(:38).

This is the first time we transmit these teachings on the KF TV. gradually we build it up to a full time 24 hour TV channel .

(:40).

(:44).

The Iranians announced, flight to moon in minutes. So we see The Iranians have breeched that barrier and now we want to share. In the coming weeks when we announce the first international space conference with leading scientists and plasma scientists in Tehran. This will done in conjunction with Iranian universities and will be held live with the scientists present in auditorium. In Iran we have curbed and understood the process of Corona and we will use it to show and demonstrate that the Corona, as far as Iranian understanding of T is over, and we allow people to openly attend, no masks, no cover, because we secure the place, the way now it is done in China, and Mallahat City in Iran. (:46). We have to wait for the transition time of the government, and once it takes place the conference in Tehran will be announced.

(:54).

(:56).

Teaching Starts

We go back to the original teaching. As I explained in the past few months coming in March 21st, teaching, we start on the structure of the books, the way the books were set to be, and why the books were released in the sequence. We taught .. you are all familiar with these 3 books ... but now there is a new dimension (D). (:58).

Everything in the world of creation is the same, it's just to the level of our understanding. Now we have come to a new level of understanding using the 3 books. Book #1 ..

Now we understand the transfer of the fields, this is where the new T and teaching starts. How the fields of the Creator in traveling the depth of the U, which He has created, ends up with the creation of man. In so many ways, the universal order of creation, the Creator, the structure, the Creator transmits, His love and His care, and the way He manifests Himself as man and not matter. Maybe now we all understand what does th is mean. It is as I take the capitals, the ultimate love for man from the Creator. In so many ways, we understand now through the process, (1:00). and in the teaching to come, how we learn the fields of the Creator has ended up with the man as part of the fields of his creation. In so many ways, the same book ..

It's just how we understand it according to our intelligence. In so many ways, the story of the origin of life, origin of the M fields, of the Creator was written in the 1st, 2nd, and 3rd book.

(1:02).

It's Him in essence by reduction in fields has created us. We have lead to the creation of maybe some others in the time to come. There is no end, there is no finish, no deadline, no Day of Promise, no the Day of Judgment, everything is a sequence of events, of interaction of the fields, and in some the fields travel the span of the U in different strength and when at some point manifest themselves as man, then through a short time by interaction of the field of the STM, and STP of the man, and the man himself we made dictate the movement of the fields somewhere to become a bread, to meet somebody somewhere else, to create another life, as a very little deviation, in a process of life of the fields of the Creator.

We Take Care of Our body the Way the Creator Takes Care of Universe

In a way, when you are a body you don't control every cell in the body, because it is set, in automatic production. (1:04). But if any harm, or any pain comes to one cell in the furthest point on your body on your toe or your finger, you feel it, and you do something about it. .. you take steps to heal it, to recover from the damage which has been done. This is the same with the Creator. The Creator as part of the extension of His existence feels the pain of the man, in what he has done to himself, and the pain of the creation on this planet, and this is why, the way when you have a wound on your toe, you plaster it, you put ointment on it, you look after it until it heals, that's why the Creator has taken the step to heal the process of the pain of the man and the creation on this planet. There is no difference between the Creator and the man in the direction of the physicality of the pain, love, and the rest. The way we nourish our children and we give them love. We create children for us to love, and through our love they love the Creator, it's the same way by the Creator. We are created as the children of Him, in a way for Him to nourish and to love.

Mankind has to understand this system. mankind has to understand the way in a physical structure as we are a collection of dynamic fields we call the human body, and we looked after every cell of it, the Creator does the same. When it comes to the point of love, He loves his creation and He gives like a father to the child. And He sees something is damaged and needs to be repaired, He takes steps to heal it, to bring it the correct way that the other organs do not fail. The other parts can function properly. If you have a damaged toe you limp, (1:06). and you don't let the rest function properly, you do something to heal it. This is the process, that's why the Creator and the creation runs, and the way Creator has decided to heal that damage which mankind has inflicted on himself and his community as a citizen of this planet. This process of healing has taken place, thousands of years. To the Creator, it's not the (this) second, I'll do. To the Creator I'll repair it that it doesn't happen again, and when it happens it heals itself. It doesn't become an infection that continuously stays on, but I correct it from its roots, I correct the STM that the man works in the essence of creation. This is where the new T and the new teaching of the KF will take us, to the essence of understanding the process of creation. Understanding the love of Creator the way we protect and love our physicality. In so many ways, the new teaching which will take step from today on is how we connect from the created to the Creator. How we take steps to understand the

process of creation. Mankind needs to be kind to himself first. In so many ways, we take steps to understand this process. In so many ways, we take knowledge from the Creator and decipher it. We open the knowledge, in so many ways, that we can understand what it means to be part of the Creator. If He is perfect how can we create a perfect man? The process of the teaching takes a new shape and D. (1:08). As I said, understanding the process of how we've been created and how we have gone through this transition over billions of years, for the field of the Creator to reach, to become the man, for a very short time to manifest itself in the D of physicality, where the STM will take dominion in the D of the universal condition that transfers the knowledge and love of the Creator with the new energy center, or what we call the STM, across to another D and position in the U that, in that dominion will manifest itself, maybe as a plasma of the fields, maybe as another star, maybe as another center point that it leads to creation, of another cycle of the manifestation of the Creator, at the point and the time and the place, through the love of the Creator. In a way, we take the energy from the food, which ?? again the creation itself from the Creator, and we transfer it into the blood and we take it from one position to another to manifest maybe at the strongest point, as a cell of the heart, and then when it weakens we transfer that energy to another point to become the cell of the lung, and then the body takes that energy to another point to transfer, to become the skin of the man. The one thing the KS have to understand the process of the biology of the man, is the process of the creation from the Creator. Nowadays we say, when the cell of the man has 28 days then it goes. It doesn't go. The body is the most efficient T center in the U. When a cell in the strength built from the top, when it reaches the level of its use, that the strength cannot hold, (1:10). if it is the cell of the valve of the heart, it does not get rid of that cell. It doesn't get rid of the energy of it. It has put a lot of effort to make it. So what it does, it transfers that energy, to another cell level lower, but the highest level for itself. This is what has not been understood in the world of the science of the T and the biology, where we just speak about the kidney, the intestine, we speak about the leg or a muscle tissue of the leg. But the body doesn't go and get rid of everything. No, the body starts at the highest level in energy with eh strongest, and then as it goes weaker, it takes it to another position. It's a second-hand use, it's a third-hand use, we, us as a whole, we are the millionth-hand use of the same energy M fields. So there is nothing different in the process of creation of the Creator. As the Creator reduces in the strength of ?? this still ?? from its source it does not get rid of the energy, it transforms it to another, another creation, another creation, another position in the U ready for the next creation. We call it the liver, we keep reserves. It's the same in the work of the U. We have stars and galaxies which are the reserve cycles of the U. No different than the body of the man, that when it is needed we transfer this through. Mankind has to come to understand the micro and the macro in the world of the creation is the same as the world of the man. It's the replication but in different strength. But in essence there is only one man, and in essence there is only one Creator. We are the creator of every cell of our body. So is the Creator in creating every being within the structure of His physicality. (1:12).

But there is one big question that needs to be answered. Is there only one Creator, and if it is, who confirms His existence? Or is it a collection of Creators that their collection, collectively create the true Creator. Are we part of a structure of existence of one body, that it shows its confirmation of existence to another. What is the other that confirms the existence of this? The world of theology hits the rock at this point. But if you understand in so many literatures over past thousands of years we have called it Eve. We have called it the essence of existence of another that confirms the existence of the

Creator, which created out of the original that it confirms the existence of. It's a neutron which then becomes a proton and an electron. Is that electron the Eve, or is that electron to confirm the existence of the proton. The love of the woman confirms the love for the man which gives to the woman. Then is such a presentation acceptable? Then it comes, if the Unicose, the child of the presentation of the two, the children of the Creator, and we are part of the organ of one. As I said, the truth sits in the structure with the Creator itself, has created.

In so many ways, mankind has to become to understand the truth in parallel with understanding the T. The ethos of life. (1:14). The ethos of understanding the totality.

(1:16).

.. It takes a second for anyone to understand the position and direction to the Creator, as we are connected to Him as He is connected to us. .. we see a stars, we see them because at the field strength, has the field strength of the vision of us, but within the soul of us we see we have the vision of the Creator. It depends if we want to look at the Creator. If we want, we see ourselves as servant to the servitude of His services around the U, and the Unicose, that we become part of Him. To do without, not within, to be a giver, not a selfish collector. We receive as we need, but the reality is, it's the same structure as the Creator.

In so many ways, in the new cycle of teaching we teach you how to make that cell of the toe. We teach you how to become the cell of the heart, we teach you how to become the cell of the soul of the Creator, that in essence you become the totality fo the creation, as through His soul leads to creation of the emotion of the Creator. In so many ways, the new cycle of teaching will bring mankind to question his integrity and his own identity. (1:18). In so many ways, mankind becomes wise to how kind he is, to the kind of man he want to be. In so many ways, we see ourselves as the intermediary between the Creator and what our souls will create in the future to be the beauty of the Creator. How beautiful you want that what you create to be. That is your soul. This is the understanding of the totality of the creation. I made man in the image of myself. In so many ways, I made man in the image of the love of myself. In so many ways, mankind reaches through the new position to find himself, his society, and his planet what kind of life he will lead. In understanding of this many of us will fail, or we'll see ourselves as a failure, but if we reach that point we have reached the point of maturity that we have found our weakness, and how we can use that to become the strength for us to reach the Creator. As I said, it takes a millisecond wish of a soul, true STM for his wish to become reality. Do not look at the time span, look at the end result. Many KS say, how do we see our soul? Look one you are at that position in your life, to ask yourself that question. What has brought you to the point of maturity to understand this, that what is my purpose. Which set am I that my creation and what is created out of me, as a soul of me, (1:20). will lead to be the perfect part of the Creator in the time to come. The Day of Judgment, what would I like to be? ..

with the EU, the Gans T, Nano T we showed you the way, how you can reach these processes to elevation to where you want to go. .. why I said, let the Gans's go, understand the field transfer, understand what the fields are, because these Gans's are like little suns. In that process we can fully understand the process of creation. ... we decide where to go, and how to be able to teach our understanding to the others, not necessarily by the words, which are an attribute of living man. We have to learn the

knowledge of the U, the language of the soul, ... the interaction of the plasma which we call the STM and the soul of the Creator. ..

In so many ways, we cannot see, we do not understand the process, (1:22). but In so many ways, we have to come to understand what the creation is and what we need to do.

.. the fields of the Gans is the path to the Creator. (1:24). If you understand how to collect it, how to connect with it, and how to develop it. The process of the creation in the coming weeks and months is this.

The Cup of Life is the fields of life, which brings man to that point of interaction. The way life is, and the way life connects, with what we call the Creator. We have to understand this process if mankind is to move to the next level of creation. If mankind is to understand his own purpose on the Creator. would we like to stay in this level (matter) or would we like to proceed to this (Gans) and the fields of this which lead us to the D and dominion of the Creator. Does what we call in the background, you see as a matter, material EU, is a way that changes the man from the material state to the level of the fields of the strength of the Creator. This is where the knowledge will come to be. This is where mankind has to understand to be physically in touch with itself. Then now you understand where I take you in the coming teachings. Try to show you the path in the strength of the field of the creation and the Creator, and see where you would like to go. Would you like to become another moon and then another life which comes from the lower level of the moon, (1:26). further away from the earth, that be further in a way strength wise, to the sun, and form the sun's position in the galaxy. Or would like to take a path directly into the galaxy and become part of the Unicose, independent. The strength of the field of the man, is the power of the knowledge of the man, in how to manipulate, in how to understand the T in the essence of the creation. The new teachings which starts from today, as we said, is the beginning of the change. Is the beginning for us to understand ourselves, and with this will come new T: zero time communication and travel, zero time emotion, and feeling and understanding of creation. In the coming days, when you see the new EU will be released, we will set the EU in Linz and we can control it with our thoughts and emotions in South America. Every plasmatic and EU will be controlled not by a central computer as you imagine, but by a system and T that we control with our emotion. In the past few days I have taught this to research center KS, that we do not need to be if you understand the process of the connection of the fields of the Pl. In so many ways, we have to understand in two ways, (1:28).

(1:32).

with the new teaching we teach you how to educate yourself with the knowledge of the Creator, for yourself and no intermediary, because we show you the keys and the ways, and we show you how to absorb energies of the U to be able to reach that point by yourself, that no one can be intermediary and no one can abuse you. The love of the Creator is for the creation. And I love you so much, in totality. In that process we spread the knowledge of the Creator to the created, but you have to understand, there are 2 ways, 2 paths you can nourish the physicality to confirm the existence, and you can nourish the soul to confirm its true soul. In a way, I made man in the image of myself as I have the soul, (1:34). and man is part of my creation of physicality, so is man in the D of physicality and its soul to control and develop, and to love more. .. from now on we go on 2 tracks, 1 track is the knowledge of the creation and the Creator, and 1 track is

how to look after the physicality that it stays perfect in serving the Creator in the D of the soul and the physicality of the man.

In so many ways, the breakthrough which you all thought would be the end of the world, would be the Promised Day, it will be what we call the end and the beginning, is today, because now we start a new cycle. The end has come and a new beginning starts. .. mankind moves from being in the D of physicality and the fear of existence to the D of immortality understanding the creation of the Creator. In so many ways, do I love myself or am I part of the loving process of the Creator to love all. In that process do I need to hold onto everything I have in the D of physicality, or do I give everything that in that process through my soul I accommodate for the others to reach that point. .. I become this system (EU), my soul, my existence will become this system to elevate the other souls which come within me. I am just a tool, in a way, it's the way I lived, and the way I live. .. we still need the physicality fo fields, not necessarily tangibility to be able to elevate the other souls, that within us, within our energy they become that light inside (the EU), that they reach the perfection closer to the Creator. This is the purpose of the creation. (1:36). this is why we come as messengers, to transfer this knowledge, for man to forget about the D of physicality, but understand that physicality is part of the process for it to reach the Creator. In so many ways, the teaching from now on, .. a dual way, you are in the ocean of the fields fo the U, and at the same time you depend on yourself to become that meteorite, to shine in the skies in the U, not in the horizon in the night of the earth.

In so many ways, detachment doesn't come by talk, detachment comes by understanding the totality. In the past years we tried to explain the depth of the knowledge through books. Now the book comes within the STM. The book comes with understanding how mankind will be kind to himself. to take himself to any point of transition as he wishes ..

K- Welcome back 373 KSW we hop we learned a little more where we are about to go .. (2:16).

Questions:

(2:32).

Pain Pen

(2:34).

Two things, have you made it but not what you expected, or was your expectation too high from what you made. Some people are happy with 20% saving with MaGrav system, some people are getting it free, and saying something is wrong. It's got to be a generator. Because they never understood the whole purpose of the MaGrav system is to create a condition that it absorbs energy from the environment and it feeds back into it. It's a hybrid. It's a system if you can hybrid it the right way, it will gather enough that it has a surplus, then it ?? generation. or is that surplus you are taking too much from the environment, that you are not supposed to be. Some people take a MaGrav for creating fields for a specific condition. We have seen that in AZ when they put so many MaGravs they could light up the tube, so it shows the field exists. If you look at the pictures we have in the .. Exhibition Center, we have put many fluorescent tubes near, and around the system. We have hung magnets around the system. We have put UFOs near the system, where the free flow field interactions. There is a reason for it, because the fields shows it's in the matter state. The field in the light shows me if it is in the plasma state. The other one, the UFO shows me the fields are interactive which means we look for a new D. (2:36). When we run this system we see the system inside the motors don't work anymore, but the controls we have on the central cores tells us the energy is available, but we don't see any motion, which means matter state is over, we have reached a plasmatic condition. We understand this. And then what happened, we see people who are what I call hooligans, they tried to make, and people are totally ignorant, they never even went to school. The people who make claim against the KF and the system, they don't even have what I call a primary school certificate. Forget about secondary (school), you check into the background they have no education, and just suddenly they became, because they used to be close, now they can make all sorts of accusations. As the leaders of the community in Linz told them, he is a nuclear physicist he knows what he does. Madame do you have anything, "no." I am actually nothing, I don't even have a first school certificate. So if you get an explanation by a knowledgeable man you can understand and explain. When I speak with the Iranian head of the nuclear physicist, even they are puzzled by the full knowledge. How can you expect an illiterate, claims to know everything. How did they set thee things, and who did they dictate, unless you are illiterate, you follow an illiterate because this is the truth, nobody shows you are illiterate. That's what it is. A fool follows a fool. And this is the process you have to understand. You'll see this is how you have to be. You judge. We teach, we taught you a different way. Our MaGrav systems which are true MaGrav systems used in the Enhancement Unit (EU), (2:38). is no where even you've been shown the first line. We have shown you the steps. We showed you the first guidelines. And we waited to see how much you would develop. Nobody came out with a true system. A MaGrav should reflect the position and structure of the U, and none of you have done that. I made 3 systems with Alex system, in Ghana and we connected into the house. It's there, recorded, you can go to the electricity board of Ghanaian Board of electricity.. everyday 7 O'clock in the morning the Ghanaian .. they send you a text, how much the day before you used in the past 24 hours. We ran 2 large AC, all the night

and day, and everyday the consumption was zero, it's there, it's registered. You go the

...

How come I can produce it when I need it, because I know what I am doing. How come it is only in my house. How come I produce so much that it overrides to 92 amps, transfer switch, damages the huge transfer station which is just about 500 meters away. When it comes to me I know what I am doing. ..

(2:40).

(2:42).

Any other question.

Q: if you take a Zn Gans water would it basically elevate Zn in blood if you take a blood test?

K- In reality no, but in essence, (2:44). how do you use it that it brings balance in the body of the man.

(2:58).

Q: Suez canal blocked

K-

In totality, (3:02). we are observers ..

(3:04).

What is the next question?

Q: (3:06).

.. what does it mean when you have high Zn content in your blood as opposed to the rest of the elements, just high Zn, and you have a brain cancer, what does that say?

K- The Zn is one of the main constituents for the brain of the man, and the brain mainly consists of CO₂, Zn, fair amount of Ca, and Mg, and with it a specific salt content which allows the brain to stay in a transformation position without the need for blood.

In a way, the property of the (3:08). C in a CO₂ state, in the brain is as such that it's in a superconductivity condition. You know superconductivity in a matter state, there is a superconductivity in a plasma, which is a specific position. The brain works that way.

When you have a high blood Zn and brain tumor

holding on to, heavy gravity ..

(sound lost ...) (3:10). (3:12). .. we see what was going on in the body. And we understand the totality of the process. (has any of it been recording. ... so we start again

..

In a new science and T of plasma we look at the plasmatic field structure, we don't look at the matter state. The body is made of Zn in the brain by large quantity and CO₂ ...

when you have a high elevation in the blood and you have a brain tumor, you have to look at other elements. (3:14). In so many ways, look at the composition of other elements in relation to Zn, and If you see elevation in the ?? then we advise doctors what is pulling ...

new ways of evaluating the blood through Raman spectroscopy, through field transfer which creates and shows us the emotion in the blood, through understanding and transformation of the material inside the body, within that state. The extension and change of the salinity of the cell, you cannot convert ?? position in the brain where the Zn suddenly becomes in the solid state on its own. The salt content, the salinity is a main factor, if when I consult with eh doctor to use the T, I always tell them measure all the salts. If your salinity, if you do a simple alkaline test and you are in a lower region, you are in cancer, 100%, you are going for it. Because there is no salt to create that position and the energy is transfer changes, and now it's the creation of solidification opposite to the structure of the man and then you are in problem. you need, the salinity changes the matter state energy to a plasma state energy, (3:16). and when you are in a plasma state energy with the right salinity, then you create fields, you don't create matter. It's very simple, you create G field forces, then matter state field forces, that's why you take everything which is sugar, or alcoholic, in that level, your acidity rises. Acidity allows matter state to grow, alkalinity allows the fields transfer plasma. If you have, .. the first test you do ..

(3:18).

(3:40).

(3:42).

Q: Any plans for audio books?

K- W don't have any plans ..

(3:44).

Shall we call it a day.

R:

(3:46).

K- Thank you for today ..
