

## **375th Knowledge Seekers Workshop**; April 8, 2021

### **Scientists Not Understanding - Fantasized Names**

This is interesting what we have started in the past few weeks, how many of you have started to understand slowly the process of creation. In the past due to the lack of understanding of the creation and now M fields are created, and where they come from. Many of us, always guessed, especially those who called themselves scientists. They came out with the names, fantasy ideas and in not seeing it, but one elaborating on the work of the other, they made it very real. In so many ways, in the world of nuclear they start speaking about Quarks, Up-Quarks, Down-quarks and everything else. (:12). But in essence these were all dreams, these were all something fantasized then the other followed. They created more names as they could not understand. As I was talking to the people who are teachers ... the structure within the Pl of a neutron, electron, proton, every single atom within the cell .. cannot be any different then the structure of the universal bodies, this be it solar systems, galaxies, universes, and the rest. One of the biggest problems for the world of science today, is to understand the totality, to understand what actually is going on. Where do these fields come in and how these fields once created hold on to themselves. In a way, how a cluster is created, and how the boundary of these clusters create position, field strength and the rest, in respect to the others.

### **Plasma Like Egg Yoke - How to Break Barrier to Interact with Inside**

In so many ways, mankind needs to understand more in the detail structure in the full understanding of the process of creation. (:14). Many times we consider that the strength is more within than from outside, but in interaction of the fields of the M and G fields of the U, this becomes something totally opposite to what we have been taught. What does this mean? In the world of physics, we can look at the structure, something we can hold, we can define everything within it, like an egg. You have a yoke in the center and you have the white. It's as its own element, but at certain points you have the shell, which creates a resistance or a barrier to whatever outside, could be. How does this barrier get created, and how does it stand the field forces outside? How do we break into it, and break the barrier and be able to interact with the fields inside as much as with the fields outside.

### **Simple Way to Understand; G = Pressure; M = Vacuum**

In so many ways, we have made a very big misunderstanding again of the field forces. We call it M or we call it G, let's change the M to pressure, .. (:16). Sorry, let's call the G the pressure, and M the vacuum, the sucking out the energy, or pulling out of the fields. We find out that there is no difference. And in a way, for those of you who want to understand more, and find a comparison between the physics and the plasma, it will be easier to understand, that if you call the pressure, gravity, you find a lot of similarity. The world of science becomes very different. The world of understanding the creation becomes any different. .. what we call the pressure or the gravity, is one pushed out, and enforced on, where gravity pulls in, and forces in.

### **Breaking into the Plasma**

At a point when G field forces, and in a matter state pressure, become equal, or gravity field forces within the structure stand the pressure, but cannot stand the what we call, the vacuum or extraction, then we find the breach, then we find one gives up, and the other one breaks through. The same is true in the world of creation of M fields, which this means, we have to find out the ways, M field strength pressures, (:18). that we can break into the PI, that we can spread the PI, or create a condition outside the PI, that by pulling it, or creating a vacuum of the field forces, be able to create separation, or division of the cell of the PI.

In the present world of PI technologies this has not been understood fully yet. In a way, the PI physicist, nuclear physicist are in a dilemma, where they see things but they can't define it. They observe changes in condition of the PI, but they do not know how to handle it, and as we have seen in nuclear industry, we use the field forces, we call it neutron to be split by other objects. And it splits but we this happens naturally in the neutron itself, and it divides itself into an electron and proton, as we taught last time.

The world of PI T, nuclear, and the present physics come to be one when they understand the totality. It's just again, different condition of the strength field. In so many ways, every man, every child, then can understand the process of what we call PI T, the process of creation. Because to every single person, (:20). the world of creation is something which moves, .. which is there, we can see, but the true world of creation is in fields, that we cannot see. They come together in a very hidden way, and in respect to the field strength outside, they gather and they create the condition of the manifestation, or exertion of their field forces or their strength on their environment. I have tried for many years to find a way to be able to make the world of physics and PI T, in a simple way that everyone can understand, that in the depth of U, as a traveler of U, we can converse. We can understand the changes and where one leads to the other.

### **Point when Matter > Plasma ; Decides Volume of Plasma**

The biggest problem in the world of PI T and present physics, is that we do not, we have not established the point of conversion. At what point the plasma becomes matter, and at what point matter becomes plasma. Or as we call plasma a collection of M fields, with common denominator strength value. Because that common strength value, denomination is what decides the size and volume of a PI.

### **Every Electron & Proton in our Universe has Specific Bandwidth of Energy**

It's not coincidental, it's not by accident that every electron in the U, in our U has a specific bandwidth of energy, a volume, and at the same time, (:22). its proton has the same strength and volume. What dictates this, what field forces dictates the size of the PI? This is what we need to understand. **This is what most of the teaching will be about.**

### **Process to Expand STM beyond Body - Encompass It**

Today we go in a soft way, but to the edge of science of man. We try to breakthrough, that mankind understands this process. As KS if you cannot understand the process of the size and the volume of the PI, there is no way you can expand the size of the STM, to expand beyond the physical boundary of the man's body. And this is what will come

very clear in the coming times of teaching. We know a neutron splits into an electron and a proton, but how can, and what does, dictate this separation, at what point the split comes, In that process, can the proton extend its strength that it covers the electron and brings it to be within?

### **Inter-Atomic Fusion**

This is the process what we call, interfusion, inter-atomic fusion. I have written a paper about this, which is published. In a way, in inter-atomic fusion, where the soul of the body of the man extends itself in strength that within it, covers the physicality of the man, because the physicality of the man itself is an electron. It shows itself because the proton, or the center, the STM does not allow the expansion, (:24). (lost sound ..)

.. in the center of the brain of the man, we consider to be the electron, to be very little one.

### **Discrepancy in Transfer of Knowledge - Upside Down**

But if you look there is a discrepancy of transfer of knowledge, in understanding of the knowledge. In the world of atomic physics we see a proton serene, and the electron moving. In the world of creation when the PI and the matter comes, the matter moves, the proton as the look of it moves, but in fact, the proton sits in the center. **It's the electron, the physicality, or is the physicality the proton? That it has encapsulated the STM, which is the actual, the truth of it?** This is where mankind will have a problem in the coming time in depth of space to convert from the STM to the physicality. At the same time changing the physicality to the STM in dimension (D) of field forces, but separately operating within each other.

### **Powerful STM Encapsulated by Weak Physicality - Why**

Part of the teaching of today and in the coming time is to explain, that how come when it comes to the matter state of the manifestation, the what we call, (:26). the electron becomes stationary, which is the physicality of it. But in being able to physically move, but the STM which is the proton, again becomes stationary, but controls everything. In a way, it's a inside out, compared to the atomic physics. In the atomic physics we look at the atom, proton is serene in the center, the electron moves. In the combination of the Gans PI T, which is the body of the man, in manifestation with the fields outside, which is the physicality existence of this planet, which is its fields, the STM which is the most powerful one, and the real center of what we call, the existence, becomes stationary, and accepts position within the center of the brain of the man.

### **Man will Keep STM - Change Physicality's**

One of the biggest problem is to understand the separation part, in how we can change the environment, in the M field strength, not in the matter state, that we allow this serene proton in the center of the brain of the man, be able to expand, maybe to the boundary of the electron itself, which is the body of the man, or beyond. This is why in the coming time when man travels the depth of the U, will find itself with one soul,

consistently, but different physicality's, as the physicality is the response of that electron in respect to the environment, (:28). where the soul consistently is protected within it.

### **Why Some will Stay Behind - Walk away from Knowledge**

This will bring mankind to 2 points in the future of the space T, man will have the fear to understand the process of the expansion of the U, and the same with his soul, in a M field strength, or man will walk away from the whole understanding of the process of the creation, as he cannot comprehend the whole process. This is why some of us in the time of the space travel will stay behind, and some of us will move to the D and direction of being able to expand the STM beyond the physicality, and due to its strength protect it, and then we become the true travelers. Those who go through this phase will need no ?? flying, they can travel in the D of U, and in that process they can travel with no limitation. Those of us who cannot go through the transition will choose the physical means, UFO's, spaceships and everything else you call it.

### **Your Child Can Do it - But You Cannot**

This process will effect mankind deeply, your child can do, you can't. Your grandchild can do, you can't. Then it will bring a new ways of understanding, and need to understand why some of us can and some of us can't. Some of us can expand the D of the STM beyond the physicality, (:30). or be able to bring the D of the STM to the boundaries of the physicality.

### **New Plasma System to Extend STM**

In the coming time KF will introduce a new plasma detection or manifestation system, where you can stand in front of the system, and in a way, by training and absorbing energies within the boundary of the system to be able to expand your soul for the energy of the center of the body of the man beyond the physicality where you shall not see anymore, but to you on the vision of the physicality of the man, you see lights. In a way, your physicality still can exist within the boundary of the plasma of the proton of the STM, and will not see anything ?? by light.

### **Point of Death - You See the Light of your Own Soul**

In so many ways, we see this at the point of death. This is the point where many people who reach this point, will come to understand they see the light. They see the light of the soul of themselves, not something outside, because when the physicality in the D of the dynamic M fields stops, the soul, the proton can expand. In a way, the physicality becomes irrelevant. Now we understand why up to now, we could not explain this fully. Because we see the light, many of us, we go through this ?? through this position, as still there are fields within the line of the physical vision of the man, through his nervous system, we'll see the interaction, expansion of the field of the STM, (:32). in spanning out, by ?? interaction of the fields, like the way we see the interaction of the fields of the sun and the earth, creating the light, blinds the man with the light.

### **Keeping Physicality Still Alive - with Field Strength of the STM**

At that point if we could bring the M field of what we call the D of the physicality, which is the blood circulation under control, then we can keep the physicality still alive, but allowing the soul to extend. Then we come to understand a new phenomenon, how do we control the strength of the fields of the blood of the man, that allows the physicality to be encapsulated with the field strength of the STM. Or at the same time being able to communicate between the two, where we can allow, the drop, in common denominator field strength between the STP and the STM, that allows the soul to expand symmetrically, not directionally or as a streamline.

### **Soul gets out - Dream; Light is Interaction STM with STP not Creator**

In a way, when we find a weakness in this process our soul finds a path to outside, we call it a dream, but now the whole understanding comes. How does the man in the ?? D of physicality learn to allow the soul to extend beyond it, but still be aware that in that position, he shall not see anything but the light, and that light is the interaction, (:34). of the STP with the STM himself, not the Creator.

In that point there is no point of physical emotion touch, because every cell of the man has become part of the physical structure of the PI of the physicality, or what we call, in the Gans state. Then there is a need for awareness that where, still what we call, the structure of the communication and interface, in the physical D we call it a brain, can move outside than within, but it can communicate with the STM, and in that point when the soul sees the right place, the right condition, can revert back to the D of physicality and take its position in the center of what we call, control interactions between the STP to create the D of the physical man irrespective of the position, time and the place.

In the world of science this cannot be done. But you as KS can start. In the coming days KF is going through this test, as part of the transmutation and transportation of the KF, within the next few hours and days we will be testing this. Where we allow the what we call, transmutation and transportation not only to be in the essence of the physical movement, but allowing the expansion of the STM within the new environment we create. The understanding for the man is, (:36). how he will be able to go through the transmutation.

In so many ways, how can we go from the PI, expanding it to cover the physicality, but at the same time, be able to do the reverse. In a way, if you understand the totality of the creation, it's very simple, how do I move you from one to another, and when the time comes right, and when the whole process is in the protection of the cell, I can go back to what it was. Where the physicality takes the D and the soul goes back to be in its position. The problem you will have, is this chap (Book 2), the speed that you can transmute between the two (Book 1 and Book 3). Our children which are created from the STM will do this very simple. But those of us who are created in the D of physicality, this transmutation, this speed of what you call, light, but in fact the transmutation of the cell to the matter, and the matter to the cell, as a PI will become the cornerstone of the future work.

In so many ways, mankind has to understand, mankind has no choice but to understand, (:38). this process. The biggest problem for mankind is when the 3 (Books) become 1. This is what you'll have a problem with. In so many ways, on one side you have the soul, going through the light you become the matter. But in what speed you transmute,

and would the effect of physicality, in the matter state of the point destination absorption, will be dictated by the PI of the STM, in interaction with its environment, or primarily the STP with its environment.

(proofed >>>

In a way, if you understand this, it becomes a very simple game to play. The simplicity comes in a very funny way. Because what's going to happen is, you can dictate in what shape you want to manifest yourself in the D, in the new environment, which you have manifested yourself. A neutron splits in a very fast way, and goes through the process, but in that process it loses part of it, what we call electron, to keep its balance. But can we do the same with the STM, expanding the soul to a new D, but breaking away from the field forces of the creation, (:40). in the point of interaction of manifestation. In a process of understanding the field of the creation, mankind will have to understand this process. The way we change clothes when we go from the warm to cold, or we go from cold to warm, we have to learn the same process, how, which fields we need not to overdo, but to be just enough in respect to the environment of its presence. In so many ways, I can explain this in a very simple way. If we get, or we consider this body (cabinet with books on it) as the new environment, this is where we are, as we live. In the transmutation and transportation of the fields of the U we manage to do one thing, and that is, we manage to move the soul into a new position (move Book 3 to table). But how do we carry the physicality (Book 1) into the new environment? This is 1 G (cabinet), this (table) is 20 G. But the soul has reached the point. How is it going to manifest itself in a physical D? Does it need to, or will the matter when it appears in the matter state (moves Book 1 to table), or the field forces of the new environment forces the man to appear as a light (moves Book 2 to table), because this is the only way it sees itself in being able to exist in the new environment. (:42). But we do this in the sleep, we allow the soul to travel, but have a hold on the D of physicality. The biggest problem for mankind will come when you come back as a soul (moves Book 3 back to cabinet), to the old, back to earth. Would you have the same physicality? Would I recognize you as the man who left with the original feature, or shall I have a new face? Would my children recognize me as the father who was, or be a new face, they would have to get used to. But again goes in the same thing, in what speed of light? Or would I manifest myself as a light in the new D.

The most important part for most of you KS is the hypocrisy to see this, to believe it. But the hypocrisy comes, that we dream about the father, even he is not here, but you recognize the soul, and the field of the soul, even the father is dead. With this process we try to mismatch the fitting of physicality, and the PI of life, and the STM and it doesn't fit. This is why many KS, I want to see the soul of myself, then I believe it. (:44). I have a simple answer for you. Even the Creator hasn't seen Himself, as He is manifested in the D of the STM. We have to understand this process. We have no option. Those of you who want to be able to see your soul, you'll wait for a very long time, because as I said, even the Creator has not seen Himself in the D of the soul. Because it's impossibility.

You will see this will be the biggest armament for many of you who become the traveler of the space, as you will appear in the D of the physicality or light, but .. you shall never see the STM. Unless some of you become very clever and create a mirror for the soul. This is the hypocrisy that many of you will use to confirm your ignorance of

existence. Where by the time you close your eyes this expands beyond, and travels to another D, and in so many ways, the father dead, is met and talked to in his environment. You say, I had a dream, I met my father. He is not physically existing, but the soul connected to his soul allows you to see him in the D of physicality, as you remember, even though in the new D he might look like this. (:46). As a flower to the people who are in that D. The field strength of what you call the father is that telephone number you have as a strength of your field in the D of your soul. This process will keep you busy for centuries, for thousands of years if you don't understand it. If you are ignorant still to cover yourself with the D of "when I see it I'll believe it." In a way, wait, the Creator has been waiting for the beginning of the time of the creation, and that's why He created us, to confirm the love of His existence. As it is the only way that He can manifest Himself to confirm His own existence. In so many ways, as I said,.. if you read these 3 Books, and understand its essence, its word by word, a mixture of the 2 or 3, then you understand the true meaning of the creation. Everything mankind needs to know to become the travelers fo the space in the level of the physicality or the soul are in these 3 books. It's how you understand it according to your intellect, and according to your prejudices more than your intellect. The ignorance of the man will come from his prejudices in doing what he has been told, and what he has been learned.

Yesterday I was talking to the most senior nuclear physicist of a nation. (:48). .. and it brought me to a question. Such a man who heads, as the most senior NP has a dilemma to understand the process of the field transfer. How do we expect an ordinary man on the street to understand. But we see those who become NP in the D of the limits of the knowledge of the physics, they get trapped with this one (Book 1 Matter). If we can show them the light (Book 2) they'll find the soul (Book 3). They find the understanding, then maybe they can translate this to those who have a problem with this. But in reality all of us, do a dream, we feel a dream, we taste the food, we feel the touch of the mother. We remember the caresses of the touch. We remember the colors she wore, the color of the dresses she wears at the present time with us. But we always had a light transfer, transmutation we call, the filter of the brain fo the man, in communication between the two, and this is where all of, not only human race, but all the races in the U, run into problem when they want to see a Pl, when you are within the Pl itself.

Many of you will come to question your integrity, your sanity, when it comes to be able to understand this process. (:50). Because it doesn't fit into what you have been taught. As I said, nuclear physicist tell me, it doesn't fit into what I have been told Mr. Keshe, what I have been trained and I accepted. But now as I said, move on. Move on to inside, don't stay outside. Move into the house and taste the food, smell the odor of inside. Try to understand the new D. In the physical D every thing has to be tangible or visible that we accept it, but in the D of the STM and plasma of the fields of interaction there is no such a thing. You feel the strength of the fields, you feel the D and strength of these fields. How does it centralizes, how is it created. What leads to the creation of it. Rick can you play the first video we showed the one I sent you.

### **Video of Black Hole -- Water pool**

In so many ways, this is a beautiful video, it explains a lot fo things about the world of creation. I was fortunate a few days ago to be in a place where it was in front of me, I could explain, and see the world of creation, the creation of Black hole, the creation of

the soul, the creation of how the fields in interaction with the environment bring this position. (:52). Have a look and see this video, it's taken in a waterfall and you'll see the rotation of the fields. You'll see how there is nothing, but as the environment of the flow of the water outside increases, then you see the change. You see the existence. ... (plays video ) ... This is the, if you look how the Black Hole or the field flow comes in, the water comes from different D into this pool shows you how the fields change, and how rapidly out of nowhere, a field flow creates that Black Hole (can see the black circle, on the side near the drain) Scientists for centuries, thousands of years have been waiting. (:54). You see the shadow of the man crossing it (pedestrian passes by). This is the beauty of it if you understand. You see there are 2 or 3 different directions of it under the bricks where the water comes in, and changes the environment. You come to see the field forces, the vortexes of the fields of the water are still there, but as the fields from outside through the inlets of the water to this pool changes, everything changes, and it comes back to itself. Shows the second video, this is the best one. How fields ?? broken up, they gather, they come in, they pull in at the same time (?? audio interrupt ) and suddenly the right strength ?? ?? this one. Now you see appears and takes shape. We haven't changed anything. You see how soul moves, but you still see that, now it's a circle. And how we can transmute and transport in so many ways, the fields of the U. We see the creation of the Black Hole and how it's done. If you look at it the direction, and the rotation, it's very much different. This in fact, shows us a lot in how we will manifest ourselves in the new D and in the new environment. The change of the environment comes from the flow of the water, (:56). inside from different directions. But the structure within which is the soul has still got its strength, you still see the fields flowing. Then when it comes to the point, the soul takes over. It shows the field flow D. As Pl physicist, as a nuclear physicist, this confirms even the first paper I wrote, the creation of the Black Hole. Fields coming out, as much as they go in, and going in, in every D, it's the environment which creates different shadows. ... This is what Rick has found (photo of Black Hole) it's been released by the scientific world as the latest picture of a Black Hole. You see the same fields. You see the arrows on the strings of the field forces into the center. But the most important thing for us is what are those gaps which show us the fields? Are those gaps where the fields are of a different strength? Or are those gaps where the fields come out of the source, at a higher strength, and a narrow field.

In so many ways, if you put the 2 pictures next to each other you will see and understand the total new concept about the STM. How we can extend the STM beyond the limitation. How we can bring the total understanding to this process. It's the environment to this pool, (:58). the way the waters come in, changing the D and the strength, which changes the manifestation of the physicality in the shape of the Black Hole. In so many ways, mankind needs to understand this process, how do you strengthen the size of the soul to become bigger, to overcome the physicality and cover the physicality with it? In so many ways, we have reached this point, and we have to understand this point, we have to comprehend the totality to be able to transmute between the STM to the physicality, irrespective of position, in the space where the two interaction, communicate, the two become one that it says, "here is a danger, I am going in, you take over." Where what we will see is only the light. In a way, the two interact that only one manifests itself. .. In a way that what we see is, we only see the light, the physicality comes in-between and the soul becomes in the center, and when the position is right, when the field strength is right, when the communication between the 2 parts become 1 field, to say, manifest, (1:00). we play the game back. Where the ?? light

become fading in the background, and physicality becomes the manifestation. The Prophet of God have reached this point. And those of mankind who become pure in soul, understanding the process of what we call, balance and unity, will reach this point. Many of us, the only thing, if we are lucky to see, is the light, where the demise of the physicality has taken over, and only the STM exists. This is the point that many of you will fail. That you become the light without the D of physicality, because you left the physicality behind in the world of the matter state for the earth. This is what it comes, the next step. This is how we have to understand the total process. In so many ways, when you even this (Book 3 Soul) out of the way, you become the light, and in this process you become the Creator. So there is not much difference to go from being STM D of the physicality, to become the light. As I said many years ago, I am the light. Because this is how we see the expansion of the creation, and the dominion of the Creator. In so many ways, (1:02). we become part of the totality. In so many ways, mankind has 2 choices, which way would you like to sit, from my point of view, or your point of view? Would you like to sit in the D of physicality, or do you want to sit in the D of the soul. This is what many of you start running into problem with, where do you want to be, and how do you want to be seen in the D of creation. Even the books have a problem in trying to find out what they want to be. So where do we go, and how do we teach you to be able to transmute in all 3 dimensions. How will you assess this? As I said, Many of you who are foolish, will have a barrier to move forward, and that is, "I believe it when I see my soul." I accept it when I see my soul, stay in the dilemma and doldrums of ?? and what one day you'll only be aware of the existence of the soul, as your conduct has decided its position and the place. As we have seen, (1:04). in interaction with the field of the environment. Many of you will breakthrough the light, and in that process .. will come to understand one reality, that we all end up in one dominion or the other. In interaction of the fields of the environment, which will dictate our manifestation, will dictate our possession and our position. We possess none except the fields which we have interacted and we will create the condition of the position when the balanced fields of the soul in respect to its environment takes hold. .. we are a physical manifestation of the present time, is due to the interaction of the fields of the soul with the interaction of the field of the environment of the earth. Where you don't carry the physicality, where is the dominion and the transmutation of the STM. Where would you end up, in what condition, even on earth would you be able to manifest yourself. In the coming time and through the fields and interaction of the fields and in understanding of the process of the creation, and the tools which we'll provide for you to be able to see this (soul) without the loss of this (Body). But that process will become very difficult for many of you, that you will deny your own existence, (1:06). because how can you be aware of the physical existence when your soul is not within the structure of the physicality of the body of the man.

In so many ways, goes back to what I said many years ago, as we understand this process fully, you give me a skull of the man, I will create that man for you. maybe now you understand why. As the strength of the field for the STM, in respect to his behavior and D of life, will create that skull, that physicality. Once you give me the skull, I have the cage to imprison the soul. Then in time mankind will understand how the whole structure of the creation in the U has taken different shape and dimensions. The best place to start with is to be the light, because then you can choose each D. The light means to be the fields and nothing else. The light it means to be the PI of the fields of the creation that in interaction with its environment leads to creation of the physicality, or creation of the STM. This is where the theology and the world of science meet, and

for those of you who understand this process, (1:08). will have a field .. will be a most beautiful time. Where especially with your children, in the D of the soul, you shall never see the physicality, but you confirm their existence, through the interaction of their fields and the emotion they create as light within . In so many ways, you can make what we call, the lover in any shape or D, in the dominion as your soul fits to be happy to be in, in that D and direction. Mankind is going through a transition of knowledge exchange. Mankind is going through a condition in understanding the 2 sciences of creation and the physicality. In so many ways, as mankind has been so physical, mankind has problems in comprehending the totality. Many of you will deny your Creator, because this way you justify your meager existence. And many of you will take the path to the Creator, and by the beauty of the?? is to create by your soul, you'll come to accept the totality of the existence and the creation of the Creator. We make the canvas, it's you who paints the picture. We make available the beauty of the creation, (1:10). it's you who has to enjoy the beauty of his creator. In so many ways, in the condition as you saw in that pool as the water flow changed, the soul changed, but in essence it's the same soul, we will create the conditions for you to see yourself in different D of physicality but within one environment. As I said, I will show you one Drop, in one water tank, and that drop will become a fish, or a man, by predetermining what it will be, the environment of that water. Don't forget the man grows in the womb of the mother in the water from the beginning. Would we be able to show your own physicality in that tank in the D, that way that you were in the womb of the mother. And then you'll take shape in the way that you fields ?? correct in that environment.

In so many ways, in the future time mankind will be able to take his soul in that fish tank, and depending on the temperature, and the field forces, not the tank filled with water, but the tank filled with different field strengths, the pooling of the fields, and the pool of water then you will see how your soul in interaction with the environment will manifest itself in the D of physicality. .. we can create the atmosphere, pressure what we call, (1:12). M and plasmatic fields of the ?? and you will see how you will manifest yourself on Mars. Then when we go to Mars, do we look, for a man with 2 legs, or do we find out the life on Mars is in the shape of ?? we become witness to it. In so many ways, mankind will have a fingerprint of his own soul, but in essence different fingers, In so many ways, different papers that ?? ??

Today's teaching and the teachings to come works in that direction ... It's awareness of the creation, and the Creator. become the essential part of what we call the existence of the man on this planet and beyond. We can create EU,

(1:14).

(1:16).

(1:34). that interaction with your own soul will become one, and would there be a D of physicality for you to exist in? You have to understand you cannot prejudice, you cannot be prejudice at all. If you mix a dough with a measure, a certain amount of flour,

and exact amount of butter, salt and sugar, you always more or less consistently get the same. This time the dough is the field of the existence of your existence, and we give you the dough, all the ingredients, would you dare to mix it to see your soul, and then would you be able to see it as you become part of it. you bring your own self to D of no physicality.

In so many ways, mankind is reaching the point that you can become that point, you can become the center of life, you can become a soul. Part of the ?? soul, in a way, to become part of the Creator, as we saw with the water. As it flowed in, and it came back out. it created a different mirage of the physicality. Many of you will have problem with this. Many of you will commit suicide in the D of the soul, as you will not accept in the D of physicality. When you call it a suicide, it's not to take life. It's in a way not to accept the condition of the field forces which leads to your creation, D of physicality. Maybe today's teaching is too deep for many of you to understand. Maybe today's teaching, (1:36). opens many of you, your eyes or your intellect to understand the process of the creation. Maybe this is, to introduce to you, the new way of teaching, not with the machines, but how you control with the strength of your physicality, within the STP, to allow the STM to extend beyond. To become that proton ?? ?? the electron covering the proton. .. when we look at the nuclear physics, and we see that tiny spot rotating around the proton, if we increase its speed, if we increase the virjility of confirmation in interaction with the field of the central proton, we become so fast that it creates a light around the proton, even the proton is inside. And that light in the D of we accepting it, becomes us in the physical D.

This is what it is, and this is how the physicality takes over and hides the STM within it in the D of physicality. We create too many souls, we create too many miniature souls, we call it the cells, but in their souls blind us to see the proton inside. We camouflage it, because we interact with the fields of this planet, and in a way we collaborate to hide the soul in the D of the physicality. Because if you look at the structure of the body of the man, it's a collection of the fields, collection of the souls, that these souls are so densely packed that they have managed to hide, (1:38). the STM itself within it, which is the more powerful. Go back to the teaching of last week, where I said in a very simple way, where I drew what I call, the electron and the proton, .. the cluster of cells and I explained the position of electrons, and I said the furthest is connected to the center, one which is more in the center. now you understand how your physicality has taken these neutron, these cell centers to cover the totality of the STM, as we have created so many of them around the soul itself (draws the body outline with dots) that it has covered the man, D of physicality, but in essence the STM, the creator, is with the center. We have in a way, glued it with the field forces of the environment to create and manifest little things to blind ourselves to the D of his existence in the center fo the body of the man. How can we reverse the position that in one interaction, one process, the STM can expand beyond the boundary and cover the STM, the physicality of the man, and in that process still exit. But the biggest question is, would it have this shape within the STM. Or it become one waking ??? or manifested in the future environments ?? this. (1:40). This is part of what many of you will have a dilemma with. In that process you'll understand the totality. What would be the future of mankind, and the soul of the mankind? Would we ?? beget children from the soul, then the physicality. and allow them to take D and love them the same. We know the process, it's for the man to accept. It's for the man to accept the physicality is not necessarily the existence of the soul. If you understand this, maybe you ask one more question, and that is, have we become so

ignorant and so arrogant that want to see the soul of the Creator that confirms the existence of us. Are we humble enough to become that electron, that by creation of totality ?? of the fields, become those cells which we have covered the soul of the creator, with , and that's where it exists within us. In the center of our existence.

As I said, as a nuclear physicist, as a man who has been at the depth of the knowledge fo creation life becomes very simple, .. very understanding, but as I said we have a time we have to pass in the D of physicality. In so many ways, it's a change of the clothes. In the coming time, (1:42). it will be the change of the strength of the cells of the man, that man needs no physical clothes, and then we'll dictate the manifestation, and then would we all shine like the lights. This is how it will come to be, and mankind will become slowly mature to this point.

I hope that we all understand this position, and sooner or later we stop asking this question, "when I see my soul I believe it." This is the worse thing, behavior, that I can fool you as long as you cannot see what you believe in. This has to end. In a way, ask yourself one question, why my soul has brought me to this point and what is the purpose of my life. To deliver, to be the provider, to be the pone who sustains the environment of the fields of the U for it to exist. In any case mankind has a lot of work to do. A lot of understanding, and a lot of what we call, soul searching. But remember one thing, goes back to the beginning of the teaching of today in many ways. You have to be able to control the strength of the field of the STP through the operation of the physical D to be able to manifest the STM, or to become aware to see the light of the existence. In so many ways, you don't need to go to a trance, but in so many ways, you need to understand the strength of the field of your own creation. I wonder how many of you, (1:44). understood the teaching of today. Many of you will change the course of your life because you understood the truth. Which one you want to make, the Pl Soul of the Creator, to the STP in the D of the Soul of the Creator to the D of the STP, and what kind of life you create in both dimensions. Would it be like the ?? flood of man which one goes out is brighter. and one is consumed comes back ?? ?? Is that the behavior of the conversion of the fields to the D of physicality in the world of the creation for the man too. Which ?? way shines brighter ?? and what we'll do with that ?? give light to the others in the D of physicality. Today's teaching is very heavy if you understand it, and it's very light if you understood, but in time many ?? on this planet and beyond will understand today's teaching. and it will become a path for them to find a solution and salvation for the operation of their souls in the D of the creation. We'll go to a break and come back and I hope the questions we get are more mature in the D of STM, not about the Gans's and ??? It's time to mature and extend the knowledge beyond the D of physicality and this is what the purpose of the teachings ??? (1:46).

>>> **BREAK** (1:50).

K- Welcome back to the second part ..  
Are there any questions.

Q: ... in our existence at the soul level, is our confirmation of existence, (1:52). at the emotional level, is that our ?? experience?

K- Could be partly. But in a way, emotion is where we get the confirmation of the interaction between the STP and the STM. But the question for many of us that rises, is that Do I feel the emotion as the STP, or through the interaction of the STP and the STM, or do I feel the reaction within the soul of, because as I said, I made man in the image of myself. So there is an emotion inside the STM that manifests itself in the physicality of the man too. But we to become aware of which one. .. which emotion. As I said in the teaching before, it gives you many new questions that in the D of physicality doesn't exist. In the D of physicality it's impossible to exist because the field strength doesn't exist in that level, in the matter state, even though we are in a Gans state within. .. we can explain it in a simple way, which is, this is the STM this is the physicality .. this is the matter state where the confirms existence. (1:54). Is ?? physicality a transition time? Where this is the source and this is the matter state. then it comes to understand in which strength does the man interact, and on which point the physicality manifests itself. This will be a part of the answer we have to have if we become the travelers of the space, because this environment dictates the position of the soul in the matter state, and the time of the transition from the soul to the physicality. And then you have to ask is the emotion here, or it's in this one. Because we feel the emotion of the soul in a different way. It's instantaneous, it does not wait, it responds immediately and you become aware of. In so many ways, the closer you become to the soul, the closer instantaneous becomes the interaction and response.

Any other question?

Q: So in a way, .. the emotions you are speaking of we may have never experienced in our physicality? It's going to come down to our trust, (1:56). or acceptance of these new experiences that we have?

K- Possibly. Most probably yes. Possibly maybe. in the D of physicality of the emotions, and the strength of the emotions is very much different then the emotion in the strength of the STM. In time we come to understand that, much easier in the coming time as we get more and more familiar with our own ?? strength.

Any other question.

Q: Mr. Keshe how are you my friend?

K- It's nice to see, I am still alive.

Q: I did experiment .. I manifested little sparkles in-between a funnel, and when I took my balls away it manifested into an actual thing. So you could see the funnel, you could see the sparks run within it, but when I took my empty balls away it manifested into Carbon or some sort of C, (1:58). it's not attracted to a magnet. Isn't this what you are talking about? .. what you were talking about before with your book 1, 2 , 3, because everything that I understand is in pages 19 to 21 of book 1.

K- So you have a lot of pages to read.

Q: I do. This is the beauty of it. .. when you see loads of little sparkles going up the funnels, when is a good time to tap into it ..

K- I don't understand exactly what you are talking about unless you can show us some pictures.

Q: Rick has a picture of it. .. but one has to understand when I took away the 3 carriers

..

K- If you create energies or fields in motion, (2:00). you can bring them to the point that in respect to the environment they can interact, and release or become in unisons, partially with the environmental field forces, they lead to creation of matter. So the sparks you speak about, if it is there, and then it becomes like a C or whatever, this means that you have managed to transfer energy fields in interaction with the fields of

the environment in the matter state. This is partially what we do in the EU, but we have a control over it what material we create and how to be created. .. if .. in the coming of time you will see it ... if you go to let's say Moon, and you want to produce gold but you don't have the strength fields, because you lost the information somewhere, you can transmit for you from earth to Moon that you, that in interaction with our fields transfer to you instantaneously, you can produce that material. Because you can create that material, it's the line of interaction and

(2:02).

You can all do this ..

(2:04).

Any other question.

Q; The amount of salt in the reactors influence the Gans what is the reason for the amount of salt in the Cup of Life, (2:06).

What is the role of the salt to reactor ratio to produce Gans?

K- The salt is the balancer, it's what dictates the environment allows to be created in the water. .. when .. you are looking at the whole thing, maybe as a KS the wrong way. You have a container you put your water in. You have your Nano material, and you have your Cup, then you have the residues of salt, whatever it is, any kind of salt. These salts here are not in the matter state anymore, they are in the environment of the M fields of N material, so the behavior is not a salt, it's creating G field centers that in the interaction with the balance of the fields of the two plates leads to creation of .. manifestation of nucleuses, we call the Gans's. The absorption of what we call different salts or acidic conditions, (2:08). which is again, an alkaline bases of a weaker strength of a higher strength, if you look at. Then you find out that the salts, .. are not in a M field condition, they are in a normal condition, they are in a M field condition, because .. when you look at the structure, you put .. but in fact what you have is this, combination of the fields. The balance of it, because the Cl here interacts with the H and the water, and creates acidic condition. It's not all pure alkaline, or creation of G. When the field balances between all this.. is left, .. what you get, the CO<sub>2</sub>. which the 2 itself comes from the interaction of the fields of the water, where a NaCl itself, has separated Cl-H which has taken the Chlor with the H, to make it the CO<sub>2</sub> release. But these are all in a field strength, not in a matter state strength. This is what most of the KS don't understand and they look at it, it is alkaline, yes. We create an alkaline condition, but because you are in a water environment you always lead to creation of CO<sub>2</sub> through the process where the freedom of the O comes in interaction the Chlor with the H (2:10). in the water.

(2:14).

### **Pain Pen - Number of Turns in Coil, and Thickness of Nano Coat**

Q; Brazilian. .. Rafael to translate. (2:16).

It's about the teaching you gave us about the Pain Pen. It was said a long time ago, that the number of turns you had in your coils, to make the Pain Pen, and the diameter

change the behavior of the Pen. A lot of people are making this, and maybe not doing it correctly because they don't know about this change. He would like to know more about this, if the diameter and the turns of the coils can make a change in the effectiveness in the Pain Pen, (2:18). and what is this change that can happen by the diameter and the (number of) turns?

K- The thicker diameter gives you more, what we call Nano coated area, more powerful fields, or more surface in interaction of the fields. The turns, gives you more combination of the fields available. When you look at the coil, or you look at the coil in a different way (draws one PP with 3 turns, and one with 6 turns). This coil (3 turns) has less Nano field area than this one (6 turns) due to the surface area. But this one (3 turns) has less combination of fields interacting with each other, where here (6 turns) you have more combination of fields. So here (3 turns) you have possibly 2, and here (6 turns) you have 4 combinations of fields, because here (3 turns) it's only this with this (2 combos), where here it is this with this, through this (4 combos). Or this (on the 6 turns) with this, minus this one and this one. Or you have a field which could be these 3. Where this one balances out. So when you have more turns each one of these is different MG field strength, so you can interact with more fields. If you use it for the pain this (3 turns) might be good for the small touch pain, but this (6 turns) will be good, (2:20). for a needle pain or a burn pain. You might not find this (3 turns) working as good in the pain, as does this one (6 turns), because the pain of a burn is a multitude layers, or more cells. That's all the difference is. With this one (6 turns) you create more surface (area) extending the power.

Next question.

### **Cold Fusion confusion - Plasma Totally Different then Present Science**

Q: .. When Mr. Keshe refers to field strengths of specific elements, is that what others call, the resonance frequency and vibration?

K- Can you repeat that?

Q: So for specific elements their field strengths, when you are talking about transmuting them, or producing them in the electrolysis, cold fusion reaction, (2:22). is it ..

K- We don't have any of these. We don't have cold fusion, we are in a different field of knowledge. In a field of KF understanding the work of PI fusion is a dream which will never come true. So it doesn't exit. You amalgamate fields but you cannot create atomic, what we call fusion as you talk about it, or ?? cataclysm. That's in the world of physics and chemistry. In the world of plasma you decide the portion of the fields, and that portion gives you the material or the condition you want. Totally different ball game. That's all fallacy, and theory which is accepted because they couldn't understand it. Now we understand it, we know fusion is impossible.

Q: So you are talking then about standing waves of fields coming out of plasma, yes?

K- Can you repeat.

Q: So I am not talking fusion as in the nuclear world of fusion, I am referring to what you are saying, of bringing matter out of the PI field state ..

K- We don't bring matter out of it. We create the condition that interaction of the fields create manifestation. Totally different. That's why we said it's a mist, then you create a condition that it becomes that (rain) drop. The environment, the interaction of the fields of the environment leads to condition of manifestation. (2:24).

Q: ... With the space T is it simply astral projection of the consciousness, or do you create a physical plasma field, like a PI orb a ball lightening for instance?

K- I don't understand, can you explain more.

Q: The plasma T behind the propulsion of your units?

K- We do not propel, we find position. In the PI T we tune to the field of, the G field of. Propulsion is when you burn something to propel yourself. We don't propel, we find a position in a strength in respect to each other.

Q: That makes absolute sense, thank you. I appreciate that and understand the different dynamic between the two, thank you.

K- In the world of space T, in the past, or up to now, we rely on extending, increasing field forces defined as, creating motion, and we follow Newton's Laws. In the world of PI we do not have such a position. We follow the strength of the fields, (2:26). and interaction between the fields. This is important to understand. Propulsion is matter state conditions, and matter use, where PI T and space T is positioning in interaction of fields. There is no such a thing as propulsion in PI T. Actually, that's what NASA does. NASA has a team working on what we call propulsion plasma reactors, which they are hoping will be ready by 2030 that it propels them to moon within 4 hours. We know the guy who is heading this operation, one of the most frequent travelers, pilot of shuttle technology. He is from South America. And now he has been put to head what we call the propulsion Plasma T of the NASA and when we speak to him, he is very, He says, I am here because they want me to, I haven't a clue what they ?? want to do.

In a way, what you create, why do you need to burn a plasma, you can create a PI which is the fields and interact, and it attracts you to. Or it .. positions you into M field strength balance in respect to the environment. We are hoping very soon to be able to show a lot of these things, and to be able to see man, to understand it. (2:28). Because when you create these fields, some of these fields interacts with the body of the man and we find positioning in respect to it, and how we do it. When I explained ... when the fields travel through the PI reactors, in interaction with the body of the man, they create a physical interaction. They run like a pulse and they create themselves invisible atmosphere.

I used to do and still do tests sometimes. Some of the KS used to work with us. When they work with these new plasma combinations, they feel changes even in their digestive systems working, or feeling in their stomach. I used to call it a "tickle factor" in Iran, when we used to do a flight test, because when it touches the body, you bend into it. It looks like someone tried to tickle you. We see this quite a lot. The miniature version of this is, if you put your hands in some of the Gans's unit, depending on the Gans combination you feel tingling, you feel that pressure, exchange of the fields of the Gans of the cell of the body of the man, with the Gans's you are working with. This way, you can create a balanced condition.

In the future we'll show you Gans's that, for example, you can put your hand in and you can walk into the snow and pick up the snow, you can walk into the fire and pick up the fire. Because these Gans's in combination with the cell of the body create a field barrier, (2:30). that the heat transfer, or energy in the matter state is impossible. This is in a way, how some of the animals we have seen like shrimps in the depth of the oceans, at 700 or 800 degrees exist, because they live through this principle. We'll show you how to do it, and how you can. In a way, you can get a fireman covered in such a Gans, and let him go inside the fire, building, and bring people out, and at the same time create that protection for them while he is in there. These are the new technologies which merge out of the KF in the coming time. This is not something unusual if a shrimp can live at 700 degrees in depth of the ocean at such a pressure. The knowledge is there, we have

to understand it. We have to decipher the field transfer, because the minute we understand that the body of the shrimp is not in the matter state, it's in a Gans state, and the Gans state is in a certain condition, are temperature independent, so life is easy anywhere in the U. I have done this, and in so many ways, it's easy to do.

There is a team ... in Iran which are working on a new type of fire detectors they are trying to ?? merge it with the KF T. You don't need a CO2, you just create a M field, plasmatic M field which O cannot exist. You don't need to create a water or blanket. (2:32). You just need to create a plasma condition.

I will be returning to Iran very soon, to work and head Iran space T into deep space. This will be part of the work. We'll have a wonderful time to develop these, because then we can fly into the depth of the earth, through magma, because we understand how to do it. It's the process of change, and the process of bringing a condition that PI fields accommodate physical temperature, which most of the animals do, and once you understand Gans's are not in the matter state, then it is very easy to handle it. This is how you protect yourself in the space in respect to the cosmic rays. there is a certain amount of cosmic rays without which we cannot live, but there are those which are over the limit which we do not need. We create such a shield.

Any other question.

There is a big problem with the KS, by now most of you should have deciphered the plasmatic fields in the environment of a Gans or plasmatic state, and fields of the matter state. Then it becomes very easy for us.

Any other questions.

The 6th of May teaching, (2:34). will be transferred to 7PM CET, not the normal 9 AM usual time.

(2:48).
