

376th Knowledge Seekers Workshop; April 15, 2021

Natanz Nuclear Power station "accident"

Phosphorus key in DNA and AA structure

Plasmas convert to other plasmas

Hormones part 1

Strength of STM steps down like power substations - hormones

ENGLISH TRANSCRIPTION

(:10).

Condolences for Natanz Nuclear PS in Iran - Was to be KF center of learning

K- ... Today we are deeply saddened, and we offer our condolences to the Iranian nation and Iranian government, and .. leadership. In a horrific accident in past few days, Natanz nuclear power station research center which was to become the center for education for KF in teaching the new space T had been damaged heavily. We have lost a number of people, ad we offer our condolences to Natanz Nuclear power center ... for this accident. The causes and how it started is unknown. (:12). And as usual in the KF we see positive things in everything which could be negative. ... this accident, this incident can open a new door, can bring a new opportunity for peace in a way that in transferring the knowledge of nuclear industry to public through plasma technology (T), Iranian scientists are devoted to peace, in a way becomes one step further. I offer my condolences to families ...

Teaching Starts

How Do We Change Plasmas from Energies to Matter

In so many ways, mankind has to learn what does the nuclear processes mean. What does the process of change of the energy to plasma (PI) means? (:14). How do we change nuclear interactions, nuclear energies, radiations M fields strength which does not carry particles but fields, Gamma rays, Cosmic rays and above, can be changed into energies of the matter, energies of the fields of plasmas which can bring conditions of life.

Plasmas Convert to other Plasmas - Source of Life

In so many ways, our present knowledge in the present nuclear is very fragile, very thin on the ground. In so many ways, we have not understood the process of conversion, where the fields come together and make a plasma. In the background in KF archives we made a video like this, some time ago .. where the fields come and make a plasma. If you can put that up, please Rick. ... This video was made .. by KS. Where we see fields become plasmas, and then these plasmas become a source of life, they become a source of existence.

Rays of Plasmas Interact with other Rays - Create Other Plasmas

In the process of the knowledge, .. in understanding we have referred to the Soul of the Man (STM) to be the sun, to be the center, where radiates fields. Where plasmas becomes fields and transformation and transfer from the center to outside, (:16). in interaction, in contact, and in balancing of fields, it becomes the beauty of the knowledge of the plasma nuclear technology (T). As we see in this video, M fields coming from a source the Creator, coming from the plasma of the sun, coming from the plasma of the STM, **in interacting with each other they lead to creation of another plasma**. They lead to creation of another source. **These 2 rays could be the sperm and the egg**, in an essence, which means creation of the STM.

Conversion of Plasma to Plasma

In so many ways, mankind has to understand in these simple pictures that you see how **the sun, the soul, radiates out and back to itself and you have fields to become the plasma**. This picture is very powerful if you understand it. This is the conversion of the plasma to plasma, and somewhere in the middle, if .. If we understand that somewhere in this process here (in middle from exit to entry), or ... here (coming out of exit point).

We Manifest Ourselves in Different Parts of Same Field

If the strength of the fields is as the vision of the man, man will see the matter state. Where in other parts it's not possible. In so many ways, now the totality of the creation is right in front of us. We come from the Sun, we come from the Creator. (:18). We come from the essence of creation, and in the process of the change in the field strength, **we manifest ourselves in different structures and in different materials in different parts of the same fields**. Then, now we understand, in a very simple way, and that is, we come from, we become ?? in the state of matter, and we go back to.

Life Exists in Both Directions

You look at it always, you come from, and you go back to. **But life exists in both directions, not in one**. As it emerges we go on the G, we go on the M.

Parallel Universes or Existence

In a way, this might answer some of your questions, is there a parallel life, that one exists in parallel with the other in the same position as a mirror. We see these in cosmos. We see a reflection of the galaxies, and we have to realize which galaxy is real and which one is a mirage. Which one is the reality, and which one is the fake. **Is the STM the reality or the fake physicality of the man the reality?** Is the physicality of the man the mirror of the STM that to us in the strength of vision we become visible, we become tangible.

Stars that are Mirages - 3 Suns of Earth

In so many ways, mankind in becoming man of space has to learn this, has to understand this. Go back to early teachings, we spoke about mirage, .. about what we call, (:20) reflection galaxies, suns, where we see one sun and in the horizon of the M

fields from another galaxy, we see 3. We see this in the northern hemisphere, part of Russia, part of Canada sometimes. The rise of 3 suns. One is real, the other 2 are the interaction of the fields of the U, from the earth's M fields.

In this way, it comes to one point, where does your soul sit. Is your soul the center, that by interaction of its fields, at one point in transformation back to its source becomes your physicality. Does the physicality rains back on the soul, like the rain does on the surface of the earth, when it reaches a certain point. Is the physicality the position of the boundary of the maximum strength that the STM can radiate, and then through the circulation of the fields of the blood return back to the soul, but in-between we see the emotion. Is this the same when it comes to our Creator, where we come from and in interaction of our emotions and the fields, and circulation of MG fields, we in interaction with the soul of the Creator, we create emotion between us and the Creator.

In world of creation everything is the same - One is a replication of the other

In the world of creation everything is the same. In the world of creation, nothing is different. (:22). One is a replication of the other in different mass strength and what we call, fields gathering. Or In so many ways, the new knowledge of the man has to become the cornerstone of its strength in traveling the depth of the U. When we look at this, and we can interpret different field strength of it, when we become to understand the power of it, then mankind will come to understand he has just started the journey to understand about himself. The journey in where he becomes more aware of the conversion of the fields into different dimensions and directions.

If we take this to be the STM (plasma on screen) and in interaction with the fields of the earth, this man has to create a physicality of itself in the new dimension (D) and direction, then we'll see what we call the brain of, and in ?? motion and interaction with the field of the sun we will see in the boundary the physicality of the man in interaction with the field of the earth.

But in the process of creation mankind has not become educated enough to understand that the STM, (:24). is the center of the life of the man. In so many ways, mankind has to become aware of the transformation and reduction in the strength of the fields. The fields that can be part of the existence. The fields which can lead to creation of the emotion in interaction with the fields of its own shell, with the environment of its existence.

Interaction of Fields lead to Creation of Organs - Blood - Neural - Hormones

In so many ways, mankind has to be more aware of the process of interaction of the fields of the U. One important point for man has been how these fields in exchange and reduction, and interaction with the amino acid (AA) of the man create packages, that we called them different names according to their strength, .. interaction, .. **the MG fields within the fields of the shell of the body of the man, that they lead to creation of the organs, lead to creation of hormones, .. of blood and neural system.** We have to understand how this, in the process of the evolution of the man has moved itself to the position and lead to the creation of different systems within the body. (:26).

Don't Want to Leave your Heart and Kidney Behind - Transmutation

This knowledge is important for mankind, because when you **learn to move your soul's energies to take a new position you don't want to leave your kidneys, or your heart behind from where you came and the rest is transmuted.** .. mankind standing still, might not even if he gets it right, replicate itself, if he does not understand the process of creation.

In so many ways, the knowledge and the understanding of the STM, the energies and the fields, that this soul radiates, that in interaction with the MG field of its environment and the essence of the soul and the creation of the man leads to creation of the emotion, the physicality, and the totality of the life of the man. In so many ways, we have to learn in what point, in what position does the STM, when he radiates, what it leads to. What does it creates, .. bring about to manifest itself in the D of the physicality. In so many ways, mankind needs to understand the totality, .. transformation, transmutation, and manifestation of the fields.

Interactions Lead to Emotions

What happens when you have the STM and in this soul, as it radiates, (:28). and in **interaction with the fields of the blood of the man, at the point of the skull**, this blood circulation leads to **creation of engagement and control of the field strength**, which from the soul reaches not only the environment of the man on the planet, but in the interaction of it with different **fields that mankind might call the sadness, the happiness, the love, and whatever else emotions we create. Each one has a gradient in the strength**, and in that process the knowledge is seeking the physical, what we call manifestation, sits at the boundary of its brain, where inside dictates the rest.

Different processes to reduce the strength of the STM to become these emotions, what would they come from? If we look at the construction of the brain of the man, when we look within the structure of the brain .. where we said the STM sits within it. Then we'll find higher order systems which sit within this structure, which leads to creation of materials and fields which mankind has called different things. (:30). But in a way, by understanding the strength of these fields we understand there is a soul, which in interaction of the fields with the STP leads to creation of what is of the lesser strength from the soul that the body of the man can use.

Strength of STM Steps Down like Power Stations and Substations

This brings us to a very important position and understanding of the creation of the man. Station by station stepping down, you have the power station, then you have a substation and another substation, and another substation, and **each substation in energy and fields creates a new strength, a new dimension.** This is an 11 kilowatt power station, 20 to 30 KV, then you go to the main substation, which divides these fields, but receives more from the center, so it has a bigger power. The STM within the center of the brain .. in radiating out creates these conditions.

Hormones Created from one of the First Substations

One of these positions, which is one of the first substations, which comes from the **interaction of the Soul of the Man's physicality, with the STM itself, is where the**

body.. in the center of the brain,, creates what you call hormones. Hormones are the center of the first, one of the first step down from the strength of the STM.

Every Cell and Atom in this Universe have a Standard Size

But you have to understand as every cell in the U, every atom in the U, in this U, (:32). has a standard size and it becomes electron at a given strength position and then it becomes a proton or a neutron.

Now we understand that in this process, receiving a high energy from the STM having a connection to the emotion, having a connection to the physicality, hormones are created. Then you understand what some of the most important power stations, those which dictates the existence of every STM, is fed by a higher order from the soul in the shape of what we call hormones, to every cell of the body of the man.

Hormones Interact by Field Transfer - Higher to Lower Strength

In so many ways, mankind for the first time now understands the process of creation. Where this **hormone in interaction with the cell** on the tip of your toe, or a cell in your heart **does not need to create a line of interaction, but the field transfer from the powerful one to the weaker one has a direct connection. This is how when we enter some of the fields of the body .. we feel the emotion.**

Nonphysical Hormones Interact by Fields

Mankind is not aware of the hormones which is nonphysical, we still call the hormones vitamin D, the way mankind calls radiation as vitamin whatever, B's and E's and whatever else. So in this new understanding of the creation mankind become to understand the interaction of the field of his souls with every corner of his physicality has one neural system which reaches it, (:34). and one soul interaction field, which comes in the dimension of higher strength plasma to the lower.

In Space Mankind will Live through Hormones

That is how mankind in understanding and opening the space T will live. **Will live through, what you call the hormones**, what we call the first substation from the STM, to be able to interact with other creatures in the U. **From the hormones down it becomes the physicality of the man. From the hormones up to the soul, becomes the line of the transmutation and transformation of the knowledge and the physicality** in every dominion in the creation.

It is fundamental that we gather the knowledge in a correct way, and we can expand the knowledge in a correct way. So when we see the hormones we call it vitamin D which is connected to the AA of the highest order gathering fields, and one point of physicality in the dimension of matter state of this planet, it leads to creation of a specific hormone. In a way, when we see all the hormones are connected with the AA. Our beloved Mr. COHN. But they attach themselves to a matter state of this planet, like anything you like, sulphur, phosphor, then we see high numbers, of numbers of every element, (:36). 66, or 44 or 10 and 20s. If you look at these figures, it's very powerful. It has to be powerful that in transmutation has the capability to feed immediately to another COHN,

which is made of itself. This is the purpose and this is the reason why hormones are created. When you look at the structure of hormones, when you look at the understanding of the work of the hormones, then you understand why man has a physicality and a soul. One connects to the D of physicality and one connects to the D of the soul. there is a border, the barrier number in your Periodic Table, where we see the change, .. the conversion and the line of the change, from what we call the matter state of this planet to the D of the energy and field strength of the STM. When you look at the P Table, look at where you are matter state in this environment, and where you become the next step into the energy, you become part of the salt, .. part of the soul confirmation which leads to manifestation of the AA creation and connection with the strength of what we call universal hormones, universal line of connection at a highest order. When you look at your P Table, look at the salt. I have done this research some 14 - 15 years ago. (:38). In so many ways, had the answer and that lead to be able to control many things. When you look at sulphur, look at the phosphor on one side, and then look at the chlorine and further up, up to sulphur we are more or less equal proton and neutrons. There on we get additional neutrons added to. Then the number of neutrons increases, which brings man in a new D of work, which brings the physicality and the balance in the life of the man in communication with its physicality totally different way to the embodiment of the life of the man.

Maybe for the first time scientists can understand why phosphor has become the cornerstone of DNA of the man. Where the what you call variation in different plasma of phosphor allows the creation of the DNA, the backbone of the structure in connection with the AA without deviation in the strength. That means the strength of additional neutrons. In the future I will explain this more.

In so many ways, then this phosphor and this sulphur become in a condition of the work of the body with the different work of what you call isotopes and you call different plasma energies of the common denominator base, they become the cornerstone of life in transmutation and in the division of the cell of the man. Where some hormones connect to the neutron, (:40). as some hormones connect to the matter state of the proton and in that position in the body .. we even see nitrogen to take a place as part of the harmonic spectrum of the fields.

In the future when man reaches the understanding of the totality of the knowledge you will find hormones which are above gold and plutonium and the rest what we know as a base common denominator. But the AA of the body of the man cannot support the connection to these in a matter state of the physicality of the life of the man on this planet. This is why in the future when man travels the depth of the space he can mutate and find position in transmutation of the energies of the man into the new D of life. To man there are materials which we imagine to exist, because we have seen the patterns of the creation of the volumes of the neutrons and electrons, but in the world of the Creator there is no limitation. So when we come to a higher order life, in different part of the Unicose these factors and these strengths of the plasma in their interaction of the STM with the environmental condition will manifest themselves. So this allows man to manifest itself in the physicality of the life in any D in the U.

In this process, for the first time, (:42). maybe we can comprehend how as beings, we'll transmute and we will transfer our energies from one point in the U to another and still have the common denominator physicality of life in the essence of the source, as the

AA energy of man. Which means our AA will be protected and our physicality will manifest itself in the D of the strength of the fields of the time, place, and position. It means mankind has no limitation, even to reach the essence of the, what we call field strength to the nearness of the Creator.

In the process of creation mankind will come to understand it's the subdivision of the fields which leads to the creation of the subdivision of the matter itself, and if mankind become knowledgeable in transferring and transmuting the energy fields of the U, he can create hormones to, in a way, be the subdivision of the field strength of the creation anywhere in the U.

For those of you who understand this, will understand one point, that once the soul, the soul of creation is created within the structure of the environment, that soul shall exist, and its D of physicality is in a way, (:44). in an essence, within a strength ,within our, to manifest itself in any dominion and position. In a way, we can see, we can create condition of the seeding of the soul, and then transmute this soul to any point in the U, and it will manifest itself without being within the womb of the mother, or uses the U as the womb of the creation.

In so many ways, the knowledge of the man from now on has to extend to the point that he understands the totality of the process of creation, and this is the purpose of these teachings. To open your knowledge, to open the books of the knowledge of the U, to create the condition for the understanding of the totality. For mankind to be so kind, to be able to understand the totality of the creation, not just to the physicality of the man. Not just with the imagination that, "something is there," what we call, the soul, and some of you in the physical D you call it the spirit. In the teaching in the Italian interview last night I explained in a very clear way, what you call the soul and what you the spirit. And for mankind will have to understand, that he will have the same soul anywhere in the U, but it will have different spirits according to interaction of the fields of its environment in the D of the STP in respect to its soul. (:46). In a way, in a simple language we call the spirit the STP, and we call the STM the sun, the creator, the essence of creation.

In the process between the soul and the spirit we have what we need or what we call the substations of the energy division in agreement between the 2 souls in what we might call hormones, or .. another process. in the division of, in the reduction of, in the interaction of fields of the STM with its own creation, its own creator. .. in an essence of understanding the STM is Adam, and the STP is the Eve. There is no difference in confirming the beauty of itself within itself.

In so many ways, mankind has become mature to understand. Mankind has become mature to distinguish between the 2 with the teaching, which has been done in the past few years through the knowledge, which we have transferred. In so many ways, we see the soul and we let the physicality take shape according to the beauty of the soul and the creation of itself. In so many ways, we use the D of matter state transmutation and transformation to create the basis of the soul, for the STP of the man, where in the D of the creation of the STP .. in the balance fields of the present earth condition, atmospheric, and creation of its own AA of its life, (:48). we find phosphor to be the backbone of what you call the structure of the STP .. or your DNA. Above that of the higher order we go to the D of what we call, the RNA, or what we call the hormones

and we call the diversion and division of the strength of the soul of the creation and the Creator.

In so many ways, past half an hour of teaching has opened a new door in the knowledge of the creation for mankind, and it is for you as the KS to open this door, to extend the knowledge in the coming time. In the teachings which will start very soon from Iran national Defense University on the, what we call structure of KFSSI, we will teach the scientists of the world how to trace, how to develop, and how to reach the understanding of the process of the creation. Through interaction of the fields of the plasma, through new radiation and nuclear understanding of the work of the soul of the Creator. .. we open the door to the knowledge of the creation. And there is no place better then, where the STM has found peace within himself. within the structure and the position. To be near to the soul of the Creator, (:50). man needs to understand his position in respect to his soul, in respect to understanding of his totality.

If we look in another way, is the STM, in a way, the soul of the physicality of the fraction, or a division of the soul of the Creator. In so many ways, the answer is yes. In so many ways, by reflection of the fields of the strength of source, or what we call the Creator, in interaction with the D of the fields of, not only the STM but in interaction with the soul of the Galaxy, .. the soul of the solar system, in interaction with the soul of the earth, we create the STM, as a division, but in connection to the soul of the Creator.

I have created the man in the image of myself. We come from and we go back to. But in essence to be able to transmute, and travel the spaces of the creation, it doesn't matter the galaxy, universes, and Unicose. We have to understand what strength the soul carries in the position where it interacts with the soul of the environment, which leads to creation of the soul of its physicality. In a way, maybe from now on, the scientists look at the DNA in a totally different manner. Not as collection and interaction of 32,000 or whatever, 300,000 combinations, but in totality of the fields, in the interaction with the environment, which leads to the creation of every cell of the man. The hidden code is in the strength of the phosphor, (:52). not in the strength of the AA.

In a way, when you get a deviation in a genetic defect, what we call of the human body, the present scientists always falsely look at the position of the AA in the chain and in the number. Where in reality they have to look at the deviation in the spiral, in the spine of the AA and the phosphor, where is the building block, in a way, when the scientists realize that the phosphor in the DNA of the man is the pillar of the building, and the AA branches of it are the floors built on it. When a change comes it's when the pillar has a slightly different strength. When the scientists realize that by changing the strength, by supporting the strength of the phosphor in a given environment the whole thing will come into balance, and then you'll have no more what we call, defects.

In so many ways, mankind becomes knowledgeable in understanding of the totality. Today, the present time we have coded the, what we call, the DNA of the man, but in reality we have not understood, that the coding depends on the strength of the pillar, on the strength of the phosphor, which comes from it, which is the essence of the connection of its higher order strength in the physical direction and D in respect to the STM. It's the energy from the soul, (:54). which dictates phosphor to be the backbone of DNA, and nothing else, and the world of science has not understood this. We do everything to change the defect on the arms of the DNA structure, but we don't

understand that these defects, this juggling of balancing has come from the defect in the phosphor itself. Because the AA strength to be on the chain is always the same common denominator. It's in a way, like what I call, a trapeze on a wire. You want the trapeze to stand straight, the ball and the arms stand horizontal. The minute there is a slight movement on the wire, then the whole body has to move to balance it out. That movement on the wire for the trapeze is in fact, the what we call, chain in the phosphor structure, the rest of the movement of the trapeze comes from that point, and then it becomes a defect and needs correction.

If the world of science and the scientists of the man come to understand this, there shall be no defects. There shall be no, what we call, handicaps, no need for genetic modification, because when you provide what it comes in the right strength, there is no need for the modification for the actual truth about the structure will stay the same. Man will become peaceful because, in a way, even the essence of the peacefulness in man comes within the structure of his DNA in interaction of the field, and the balancing of trapeze, (:56). of the structure of the AA.

Maybe, when the scientists listen to the teachings of today, will understand the process of the creation. Will understand how in the future in the depth of space mankind will become the possessor of the knowledge to create his own DNA, or his own configuration by controlling the trapeze in the arm and not by the change of the strength of the string. In a way, I love to have a blue eyes, and I love to have blond hair today, and I don't need to go to hairdresser and bleach it and color it to yellow and another lens tomorrow, but in the essence of the strength of the STM, I can change my color the way I like.

This is the way the whole creation exists in the U, we don't have clothing manufacturing in the U. We don't have chemical plants to produce chemicals to change the color of the man. The knowledge of the travelers of the U has reached to the level that they understand the change in the strength of the soul at a given point in interaction with its environment and the desire of the STP will give the man the dressing of the U, where we do not need to wear clothes to hide what we do not want to be seen, but we create the emotion in the fields of the hormones of the physicality that our body will be shown in the direction of love, if you want to be my lover, you see everything I have. If I am in public in the creation of the D of the soul of the hormones and understanding of it, I cover myself that I am not visible to you, because it's not in the direction of the strength of your vision. (:58).

In so many ways, in the depth of the space we don't carry not only food, we don't carry and material for you, we don't carry any clothing for you, because now you understand how to clothe yourself. In a way, in the ancient times when the Moslems came to Iran, they asked the man Zoroaster to cover their women, and the response was simple. We cover our eyes that our women are free. In a way, we create that D in our own soul, that In so many ways, we create in an essence of the translation of the myth into the reality, that we see what we are allowed to see by the creator of the life. The vision of soul sees no physicality.

In so many ways, with the knowledge of today I open for you another D in man's understanding, but the biggest problem for KS and the scientists of the man is how to feed the STM, and how to allow the soul in what strength to release fields, that leads to

creation of what the man wants to be. Manifestation of the physicality, creation of the hormones to create the condition of life.

In so many ways, in a very hidden way, but in a very direct way, (1:00). within the soul of the interaction of the life, I showed this in the life of Naomi. None of you have realized how we gave life back to this beautiful woman. Because we used the strength of the soul, and not the strength of the AA. The doctors said, that the brain is like being put in a mixer for 10 minutes, to the father. Now we see we have created a perfect brain. That no one can even see the deviation, because we used the D of the soul to interact and provide the strength of the love of the father to create the brain, because he was the seed of the creator.

This is the knowledge which was hidden to man. This is the knowledge that today we open up. This is the knowledge that the man needs to create his own brain anywhere in the U, irrespective of the place, the time and the position. In so many ways, as I said, as we go deeper in the teachings we open the hidden knowledge of the U, it's for the man to understand the totality.

We are not the Messengers, but we are the creators, we are the part of the creation who understand the process of creation. We are the creator, and in that we share knowledge unconditionally now that the man has matured to understand the totality. In so many ways, mankind needs to be more kind to himself to understand what kind of man, is mankind to be kind. (1:02). As I said many times, the knowledge of creation is simple, if man takes the prejudices of knowledge and creates limitation for his own intelligence.

Look at your soul on the screen and you decide what emotion and strength you want to exist in. What strength of the hormone you want to carry, and create a condition for its existence, where in totality it's you who decides the division and the leakage of the soul's energy to different parts of your existence. You decide the position of the helix and the position of the arms of your AA in the direction of the DNA, or you go through the field interaction of the soul, what you call, the AA of the STM in the D of the soul, and create any color, any race, any beauty of the Creator within yourself. One second you become a flower in a pot, and another you become a lion in the jungle.

The STM in understanding of totality will decide its point of manifestation. You do not need to travel the depth of the U to find out what you are going to be, and how you are going to look, test your strength of understanding of the knowledge, and see in what strength and division in interaction of the hormones of your body, (1:04). you want to manifest yourself. Can you become a flower, and the next you become a lion. This should be a very much what I call a sandbox for mankind to start to understand. Can I become a man of peace and manifest myself in that D and direction.

This is why we have said in many of the teachings, the time of the punishment of the man is over, because the only person who can punish the man, is the man himself. In developing and understanding of the knowledge of the Creator, those who understand and fall within the structure will go further. As I always said, I teach and I show according to the understanding of those who are near me, and those who understand the knowledge.

We cannot teach more as the comprehension of the understanding of the knowledge is not there. Like a father we go step by step, we hold the hand, we watch the tumbling, we see the falling, and we give a hand to right the man to stand up and walk again. Now it has reached a point that the man has to do this walking. That the Man needs to understand the totality of the creation of the STM and the subdivisions of the hormones to what we call the DNA and then the creation of the cell and the totality of the ?? of the physicality in a given D and a direction and a strength of the fields of its environment. In a way, you can sit in a chair, or you can be a man in that chair for 1 second, (1:06). and with the understanding of the transmutation of the fields and the strength of the interaction, you become the bird on the same chair, or the lion, or if you choose you can manifest yourself by changing slightly the second layer of the field strength to the D of the fields of entity, life which can manifest itself in another D in the U. If you can create the second what we call the ?? imitation of the soul in a new environment, then you can create the manifestation of the physicality within it. In a way, you shall see me if I decide on the chair as a man from planet Zeus. How I look on that planet, how you will look when you arrive in that place and position. .. we create manifestation of physicality by the interaction of the creation of the fields. I have hidden this knowledge in the teachings of the past, but for the first time I can open it up that you can understand.

If you go back to some of the teachings of the past I explained as part of the defense T what we call, the manifestation of physicality in a different D and direction. If you go back to where ewe showed the ?? UFO, and then we create, in a hidden way, take the what we called a magnetosphere around it, and I explained that by interaction of the secondary fields inside, we can create another zone around it. (1:08). Where this first zone for example, was going clockwise and the second zone anticlockwise. .. in the teaching I

>>>

(1:10).

(1:12).

(1:18). Maybe many of us will become mature to this

(1:24).

Today's teaching is extremely heavy ...

(1:26).

we started this path from 21st of March. Next week we pass 21st of April ..

(1:28). Is there a religion in the D of the U.

(1:30).

>>> **BREAK** >>> (1:44)

R: .. I would like to show an image about phosphorus. P4 Phosphorus, it's a gas. I thought it was a perfect symbol, because you have shown the tetrahedral ...

could you comment on it .. ?

K- We don't look at the structure this way in the world of Pl. We look at it as singularity. In so many ways, phosphor and its interaction with the sulphur, (1:46). is part of the process which gives physicality to man. If you look at the plasmatic condition of sulphur and phosphor, you'll find the interaction and presence of both sulphur and magnesium leads to the creation of, absorption of the fields which then becomes Ca, which becomes the center of every cell of the body.. In the body .. the process in the Thymus allows the field radiation to, and for elements of the fields of the phosphor and the sulphur in a diversion system of the man to lead to the MG field of absorption and creation of what we call, vitamin D, especially D. Which in essence allows the bone marrow to create a condition of the pull of these fields in the essence of totality for the intestine to release plasmatic fields in the strength of the Ca, that in passing through the wall of the intestine into the lymph, and then the passage through the bone to convert them into the bone structure into the Ca and the seed of what we call every cell in the body... there is not a single cell in the body .. (1:48). which does not have Ca as its center, and this has a reason. If you look in the background, backbone of the physical creation even in the interaction of the DNA. DNA cannot exist if it is not attached to a Ca plasmatic condition. In so many ways, phosphor is the last barrier between the physicality and the field energy of the U in the atmospheric M field of the earth. within the sealed body of the man, in the plasmatic environment of the capsule of his skin, phosphor plays a controlling role inside, and Thalamus and Thymus together work within the what we call, another ?? inside the Thalamus, inside the Thymus to create the condition of the field, which the interaction fo these 2 leads to plasmatic control of the phosphor in the intestine and what you call the gut of the man. .. it's a controlling system for monotonous food eaters like the people in the North Pole who don't have access to so much variation of food. The body creates a condition that it changes the phosphor to sulphur and sulphur to phosphor and uses ?? chlorine, and then in the back of it, if you look at the true M field interaction of the O as a double O, in a way or two, (1:50). which gives you something round about 32 - 34 which sits within the structure of phosphor or sulphur and then you understand how man creates his materials without eating them, and then this is a D of plasmatic field interactions. .. in the body .. 2 nitrogen's, or 2 O in a specific combination within the existence of the plasmatic field of the fields of the radiation coming especially form potassium, will give, and allow the amalgamation of the phosphor and sulphur and the division of these in creating and holding life. Man has no physical life if he hasn't got a Ca. So the body has created the condition of the energy fields, because in the body we are not matter strength, because the what we call phosphor, in a condition of continuity absorption of the fields, where with the sulphur in connection with the high level of the energies which come from the STM, we call them hormones, lead to creation of hormones of B3 or B, or other hormones. and we find this in understanding the totality of the process of the physical creation of the man. .. if you at the Ca at about 40 and then you start playing with the existence of the C as an inter-connector and S then you see how Ca is created out of the elements of the matter state, (1:52).

Any other question
I hope I answered your question.

(2:02).

Q:

(2:06).

(2:14).

K- As I said before ..
vaccinations

(2:16). In being in line, and being capable to understand what is the clandestine wishes
of certain organizations to promote this situation ..

(2:18).

(2:20).

(2:36). in Book #8 I'll unravel this mystery.

(2:38).

Any other question.

R: there is a question, that the knowledge you give takes away the mystery. ... before I
expected the experience ... now you reveal the knowledge so that each one can know

looking from below it was easier .. so the mystery is over, finished?

K- We have just started, the first page of it. It's you who has go to unravel the ?? of it.
Mystery sits .. in the lack of understanding of the knowledge. Unless you understand it,
there is no mystery. In so many ways, that ?? we have created for ourselves, (2:40). ??
?? We used to worship the light and now we understand how the light is created from
interaction of the fields. We used to pray when the sun will appear, during the time
when the moon was ?? ducking the light. We sacrificed many lives to get that light
back. But the light came back, but the man was never enlightened at the time to
understand that it is the process fo understanding that it is the position of the moon in
front of the sun. So nothing has changed, it's just that now we have become more
knowledgeable and we gather in places to see when the sun comes to be covered by the
moon. We celebrate it and ?? ?? we don't sacrifice anymore lives ?? Nothing has
changed, it's just the understanding of ?? of man ?? Do we sacrifice our lives in the path
of ignorance of others, or do we celebrate our lives to understand more the knowledge
of the creation and the Creator. That's all we ?? nothing ?? It's the understanding of the
totality which brings man to understanding how to ?? If you look at the picture we had
with the plasma, the fields around it, if you look every field in every position
experiences different field strength and different ?? ?? so no one in no place will go
through the same experience, at the same time. But to be able to understand most of the
positions, (2:42). it means you have to travel many times to the soul of the Creator and

back out again, to be rained upon, to understand, and to experience every single field and position of that, that in totality become the life of the Creator. Lack of understanding is the biggest problem for mankind. But once you understand the harmony and the pattern of creation, the rest becomes easy for you To understand physicality ?? Then there is no mystery, there is no dogma. There is no what we call lack of creation and Creator.

Any other question.

Q: (2:44). Brazil. .. in the labs the exams we do for the virus positive and negative, so how can they know we are positive for a virus if they cannot see this virus as you said today?

K- Due to the way we broadcast both on Youtube and other channels and KFTV. I prefer not to answer these because it can jeopardize our section on the Youtube and the others as they are sensitive to these question. But overall what we understand no one has physically, no laboratory, (2:46). anywhere in the world, physically, in the world expect Pfizer, test such a virus. Because we asked many governmental officials, and there is no lab who and test or confirm ?? So we are afraid of another ghost. But this ghost has a D and we know it's there, but how we can handle it, what the knowledge is about to create this. We have been brought very rapidly to be afraid of the health, which is in fact, created by man himself. In so many ways, we see the effect of this disease, it's not phantom. But the solution for it, as far as it comes from the new T, Iranian scientists, is not the vaccination. It's understanding the process of the environment which leads to its existence and its creation, and creating the condition that it can change ?? As I said, ??? ?? through the structure of the Iran nuclear plasma T, we will teach the new science of the plasma ?? ?? to world leading scientists in Tehran. In that process we will finish with this process of vaccination on the ??? of many people, who see an opportunity to create mayhem. ?? physical profit they create for themselves. ?? instruction, maybe in a very short time you'll see this instruction, and if it comes through, it will be the voice of the science, to lead the true science, (2:48). then those of the fear. ?? ?? we will gather leading world scientists in Tehran in a very short time. ??? ?? waiting for the Iranian election. We cannot operate freely within the present structure of the Iranian political ?? I obey my rules, and we are obedient to the instruction of his eminence Ayatollah K. of Iran, not to deviate from the governments. Let them go through the same process. As we respect his position ?? ?? of Iran. He has asked us to stay calm, till the term of the ?? government is over, and we stick to, and we abide by his rules. After ??? when the new leadership in Iran, will emerge a new principle of peace and coordination of science and T will manifest. I have accepted this responsibility clearly, and in that position we change the structure of the present political scene in S&T and Space and Defense. Iran will take a new position in the leadership what will lead the science and T in the true understanding of the science and creation. In so many ways, I am proud to be part of this ... elevate the present knowledge of mankind through the correct conduct and correct knowledge and not by mysticism and fear. I ... respect and honor .. to stay obedient to the government, (2:50). and the government that is in power. That we don't create deviation and division in Iran that allows the enemies of Iran to benefit by it. We stay solid .. after 18th of June, the knowledge in the true sense will be dispersed through Iran National Defense University, which KF has become part of and that process we teach the true knowledge, the T knowledge in how to handle viruses. Not be ???

Viruses, what we call energy packs, because of the position, strength and the speed, create different conditions in the body .. and now we have to learn how to interact with them, how to benefit by them, how to use them to the benefit of mankind in the coming time on earth and in deep space. Maybe when we convert some of these viruses, they become tools of elevation of the STM, and we cannot discuss this. Our lack of knowledge cannot ?? lead to destruction of opportunity to elevate the soul to understanding of the knowledge of the U. .. I stayed Iranian, with Iranian passport for 46 years out of Iran, and I'll return to Iran to spread the knowledge of peace, space, and Creator through the essence of Mitra, and faith and belief of Zoroaster. Maybe mankind needs to go backwards, to go forwards and see ??? ? (2:52).
Any other question.

Q: Mehranez, ... Fe 56, and how the fields of this Fe .. creates an environment that can change to C or H, what is the relation of this 56, mass, or number of protons, electrons, neutrons. Can we predict what is going to be created as an element in this environment?
K- I don't understand your question? (2:54).

I am lost in the maize of the knowledge of the question you asked. Can you explain what you are trying to ask .

Q: Fe was 56 ... it comes to C or H .. How can we predict what these fields will become?

K- These fields are created out of packs of plasmas that the interaction of the field strength of the blood and the new system dictates the manifestation. In the lymph of the body .. we don't have the Fe floating some place, and the sulphur or a Ca. In the lymph of the man exists one plasmatic field strength which is mainly of the plasma of the H, as in fact what we call the Deuterium, the complete cell. So as the .. the fields of the nerves, (2:56). and the fields of the blood go through, in respect to the MG fields in respect to each other they decide the creation of the elements. In the world of creation there is no fusion as we have been taught, and this is the main problem which has been spread into the world of biology and chemistry. In the world of creation there are plasmas and what Inertia we create, that part of the plasma becomes manifested as that element.

(2:58).

(3:00).

Creation of life on this planet is very simple.

(3:02).

Q; Is this Selenium field forces of masses?

K- It's all field forces. We don't have masses in the body .. (3:04).

Q: So it's just the strength of it, so each PI has a strength?

K- It's always strength, yes. then in respect to the environment of it, it ?? and mutates. The environment of it is created by the salinity, the collection fo the materials. We allow you to be created according to this salinity to become the cell of the kidney, we change the salinity slightly, it becomes a liver. .. we dictate Inertia. I always call salinity as an Inertia, which in respect to the fields of the environment allows the manifestation fo the matter in that ?? This is what the world of science has made too many names for

it. If you put the salinity as Inertia then we know how cells are created anywhere in the body. It's like you have the salinity, and the field strength of what we call the Inertia, and you create the sand in the desert, you change the Inertia you become the gold in the ?? .. the field of interaction from the plasma state to ?? what we call Inertia, is the true understanding of the creation in the matter state. What is the strength, that change you, convert from matter to what we call ?? matter. .. this is what we see with sulphur, around about 34. because the next step 35 -36 and on will bring ?? imbalance, ?? additional (3:06). ?? energy interactions. You see the chlor on this and we see the .. phosphor on this side. Physicality and the ??? ?? that's what we see, cleaning, cleaning material in the body ?? bringing balance between the 2. ?? ?? works on both sides. the balance of the proton, neutron ?? in other states ?? maybe we see it .. some of the inert gases, ?? not all of them. Because now we have to learn about the plasma inert gases which we have no knowledge of. ?? ??? in the matter state >??? which leads to plasmatic radiation of the inert gases ?? unknown to man. I used them in the first Iranian space reactors. It's not something new. If you read in the patents ..

(3:08).

Any other questions.

I'll show you something very interesting. .. if you look. If we look at especially ??? ?? this is Ca, this is the essence of the creation of the physicality of the man. That's why you stand up. without it and in respect to position of it, you will not be able to have arms and legs, and fingers to be in a position. here you have the Zn which is the essence of the emotion field transfer. but of you have never seen this, because you don't produce it. But this is phosphor. This essence of the backbone of ... DNA, (3;10). what this does in respect .. CO2 and Zn, and in respect to Ca and itself, this by coming into operation in respect to CH3, the original sugar of creation, gives you a combination of .. DNA of the man. The structure, that the DNA has within its structure a condition to ?? build physicality. Without .

This is why I said many times give me a skull I make you a man.

(3:12).

Intelligence comes from how much we vibrate and shake things together ..

(3:14).

Any other question (3:16). Teaching of 6th of May 7 PM CET.

Q: ... (3:18). ... I'll share a funny story. .. I would do this practice thing, we had a pet rabbit, I would practice raising my ?? my level .. I could see my hands slightly glowing. The rabbit jumped right on to my lap .. that glow, it's a funny phenomenon. you see it in young children. (3:20). Q: about when you talk about manifesting yourself. I always think of a movie, .. a guy appears naked in the street. . if you wanted to practice manifesting yourself in an environment .. would you manifest naked, or would you jut be a self awareness? If you needed to come back, you have to be comfortable with the 2 different position, in order for you to come back. Would that be right or wrong? (3:22).

K- Actually you raised a beautiful point, a fantastic point from man's point of view. When you pass the extension of the position from your soul to your physicality would

you take your ?? thoughts with you. Or do you just transfer translate the energy fields which the STM has lead to its creation? The answer is yes, in a way you might see a bunch of clothes on the floor. Or the fields of the material you wear as a garment becomes part of the energy of the environment. But would you manifest with the same clothes with 4 legs, 2 arms 4 heads and another condition. It would be no. So you manifest as ?? or in a condition that your soul is happy what to be seen. Would you have your ?? with you, or be covered ?? to the eye of the presenter ?? that depends on you, what you want to explain. This brings back the position of understanding the totality. We don't have clothing of silk cotton ... (3:24).

So what you raised is the truth about the creation, you are naked, not only in physicality but in the D of the STM. In essence we travel with nothing. ..

(3:26).

(3:34).

How to use the effects of ... the bases of, (3:38). the hormones to change the possible effects of the injections. If it comes to, ??? but you have to understand the knowledge ??

Q: Would it be for all these people who are handicapped can help them out ..?

K- You got to understand a very fundamental point, I do that with respect to a lot of understanding. Is not that you are handicapped, you are born handicapped, or with a handicap, a condition. But handicapped to me is manifestation of the physicality, not the strength of the Soul. but you have to understand that each soul is created with a purpose and a D to balance many other fields. Why does somebody become physically impaired with different ways and shapes, or condition in respect to the environment they are in. What is to be taught by the soul to those who are supposed to be effected by it. I pass a person on a wheelchair with all sorts of diseases MS, ILS, Multiple S. .. whatever, from point of birth whatever, what effect that soul has and has been created to have on the people who look after or come in touch with that soul. What's the purpose of it?

Otherwise when the man becomes perfect we should see no handicaps. (3:40). Because there is nothing there to be balanced. This is the process we have to learn. And the people who ?? these responses they come to understand they have to balance it themselves in the future. We got to understand the process of creation and now that we understand it, there's a whole part of it, speck of duct of it, we have to understand what is the purpose. Why some people become so horrible in their behavior, and they think they are always right, because to them they have to destroy everything, then they have to balance everything in the future. They look at this minute and moment I do what I like. But what is to come when it comes to the balance? This is part of balancing of the souls. Then you understand what you call handicap, physical handicap, what ever shape or form, creates or are created for the people who are around that person. Why do we put handicap children, or we call them ?? people, children into orphanages, which is mainly done in many countries. The soul of the parents who left it behind still is aware of it, and it still has to find balance with it. What is the balance work for the people who care for them? (3:42). How much can you change to make life different for them as you are responsible for the soul of ?? In Iran we have at the moment a special case, .. last

year due to Corona KS went everywhere and they took over to help and orphanages 100 children, for them not to get Corona. And we have been successful, we had no cases of Corona in 12 months. In the process when the team of the KS which is 100 handicapped in the worst conditions, you can see. We saw an opportunity, as you know the emotional way the Iranians are, we decided we take this orphanage up. This orphanage is part of many other orphanages ... And the caregivers are so loving that they accepted. And we started developing a process. This month it's exactly 12 months. According to the head office ... it was impossible that they had no Corona .. how we can elevate them ..

(3:44).
The use of Pampers have decreased ..

We cannot change the DNA, the physical damage to the structure ..

(3:46). We let the

(3:48).

I asked my father what is going on here. he said, we brought you here so you could get a fundamental understanding of life ..

(3:50).

(3:52).

Any other questions

(3:54).

K- We hope you learned more ...

(3:56).
Good bye

376 KSW

END
