

## 378th Knowledge Seekers Workshop; April 29, 2021

### ENGLISH TRANSCRIPTION

(:10). Video Cycle of Creation >>> (:27).

(:28).

K- .. Today's teaching is a follow up of last weeks teaching and we carry on the same way and we proceed further to understand more about the interaction of the fields of the Soul of the Man (STM) and the fields of the Soul of the Physicality (STP) of the man, and the response to and from these positions. In the past 2 or 3 weeks we start showing the strength and the manifestation of the fields of the STM in interaction with the fields of the STP which leads to creation of what we call the brain of the man. When we know a body has taken a shape, and the body is mature both in soul and STP is when (:30). we see the blood circulation which starts in the early weeks of the life by circulating the emotion of every cell in the physical dimension (D), starts leading to the creation of the brain .. Where the interaction of the fields of the soul and .. of fields of STP lead to creation of a physical structure of the brain. There has been a discussion for many years by the knowledgeable people and the scientists and theologians, when does actually the soul take over the body. When does it actually operate. Up to now the soul was created at the point when the fields of the cells of the body of the man which came from the sperm and the egg lead to the creation of the STP which is the first heartbeat, and then comes the first cells and structure of the brain of the man. So in a way, we can say the physical operation of the body starts when the brain is formed. When the soul of the combination of the, what we call the sperm and the egg, which is the original soul of the creation of the life, in creating its own D of physicality and the first heartbeat which creates the first cage for the M field to contain the interaction between the STP and the STM, and the brain is formed, then the life is ?? true. This is the time when the soul has taken shape and ?? works, (:32). between the STP and the STM. Then this closes the discussion between the scientists and theologians that when actually life is alive. When we respect life. Up to now when the soul was created in interaction between the STP and STM, that brain created, now we call life, has been a tradition on this planet. From now on we teach and we show how you use and create a full soul that it exists on itself, and then because that soul is pure and perfect, then it decides and creates the D of the physicality. This is how the change of ?? time has come. Where now the STM is fully created in advance of the what we call, physical life. This way physical life cannot go wrong anymore. Man will not commit a crime. Man will move into the next step, that with a perfect soul in operation the physicality will take a new shape and life. .. we change the situation and condition for birth, from now on, due to, and for the fact, that there shall be no more crime, no more what we call, breaks, no more failures in the physical life. In this process we shall see the first cycle of life's starting on this planet will go through this process. Where there will be no hunger because the soul will feed the physicality. These are not theories anymore, these are structures that we show, that we have setup and we will see the manifestation. (:34). This is where the STM could not support and it had to rely on the STP to feed it, to contain it, that when it matured it could leave, or when it had the position of the time of the field strength to expand beyond the physicality. For the first time the STM is in control from the point before the inception of the creation for the physical D. In the future time we'll explain how and the way it's done. So it comes to the fact that how come that the STM in creating the heart condition to be separate life on its own due to the understanding of the principle that

body of the man is made of Gans's, it's made of the plasmas, and the plasmas operate only through the heartbeat. If you cannot create the heartbeat in the body of the man or the soul, this is not life, this is not a soul. This is not a condition of living without depending. So when you come to the point that the STM which itself has a heartbeat, has come from the creation of 2 separate cells, from the egg and the sperm, has its own heartbeat that it takes over. When it creates the D of the creation of the physicality within the environment of the womb of the mother. Then when that entity gets its first heartbeat is the time when the STP starts growing. In a way, the total cells within the body start pumping. In the electric motors, we need electric current to start the motor. In the plasma world we need the heartbeat. This is why now, (:36). the scientists tell us, even the earth has a heartbeat, the sun has a heartbeat. Our U has a heartbeat. Because without the heartbeat plasma, M fields, cannot release their fields, they cannot expand, they cannot divide, they cannot mutate. This is why the man has a heartbeat. Pulsation is the essence to the creation of plasma, and life of plasma. As heartbeat pumps, creates variation in the dynamic strength of the fields. In that variation creates the division, interaction and in that process creation of new D, as the variation in the strength of the field of the pulse decides the D of physicality or the D of the life of the entity. As I said in the world of plasma, nuclear Pl physics, we don't look for frequency except the pulsation. This is why man dies when the heart dies. When there is no pulses to circulate. this is why the man goes through the process of aging, because as the heart gets weaker it creates a different M field which in interaction with the cell of the body, it lowers in strength to the point that it cannot. If the mankind could keep the heartbeat at the rate of the birth, man stays young forever. This is why they tell us all the time to exercise. They tell us, why to do more of everything else, that we keep active. This is why, (:38). we see most of the people who live an active life, live a very near close long life, because the heartbeat stays there. The biggest problem for physicians of the future is to be able to regenerate the heart tissues, that stay young. Then man will never die, in the D of physicality. Most of the time, unless there is an accident or something through the evolution. Then mankind maybe for the first time finds one of the keys to everlasting life is finding the processes that the physical heart keeps the strength of the M field of the blood circulation , the same as the point of the birth, maybe at the age of 18 which is the maximum, we generate the best.

In so many ways, now we understand more, and then in that process.... we come to understand when you have the STM in the center, it radiates, and in radiating and interacting with 2 or 3 different MG fields leads to the creation of the brain with the circulation of the blood, and in that process to the D of the physicality of the man, where man creates skeleton of bones to contain and live, and the interaction between the fields of the STM and the STP leads to creation of what we call the brain fo the man. .. , (:40). for the first time we understand the full cycle of creation. We understand the full process how we are created and how we can interact. .. when it comes to the D of the STM, the bone structure it sits outside, when it comes to the D of STP the bone structure sits inside. Because this is the way the M fields of the physicality dictate the structure and then what the compromise comes, the STM in conjunction with the physicality creates what we call the skin of the man. Where the skin is part of the same brain, and with it condition of existence. But when we speak to the physicians they tell us the cell of the lung of the man, is made form the same structure, connected to the same structure, which this, brings a new D in the science of the .. physiology ... which we'll come to it later on. But touching it we can explain, that as the STP and the physical part of the MG field of the earth created the physicality of the man which is

from the solid part, then the air part, the atmospheric part has its own control, and with that control it has created the lung. In a condition, connection with the brain .. that in that process, up to now we thought was a process of just breathing, of actual the central control for connection of the soul with the gaseous part, (:42). of the life. This is the beauty of the creation, where the life of the man depends on the gaseous and the earth, and the liquid, and for each one, the body, the STM in interaction with each other, has brought its own process and its own control, that in conjunction with the soul they dictate life. You take the blood from the man, man will die. You block the O or circulation of the blood from the man, man will die. You stop the man to breath, man will die. Because even though we are combination of the creation of the physicality of the interaction of the STM, but each part in interaction with the soul, has created its own operational control. At all in connection and collection, create the heartbeat in the center, that all interact together. The physical part depends on the heart to beat, the lung depends on the heartbeat, the process of circulation of the liquid depends on the heartbeat. Now we even understand why the heart of the man is positioned where it is positioned. Because the heartbeat creates a vibration even in the lung that, that lung heartbeat allows the interaction of the fields with the soul of ?? This is why in the teachings, for the first time you understand, we explained how by breathing you can control the strength of the fields of the STM, (:44). because it is one of the 3 controlling systems. It's one of the 3 partners which have .. engaged the STM.

If one understands this, then in the coming time we understand how we can control life in the depth of the U. What happened when we go to a planet when there is no O. How do we change the process of the conversion in interaction with that D. What happens in an environment which is just a PI and the STM? Then the physicality of the man to manifest itself will become the interaction between the STM and the structure of the PI fields of the environment. We'll not have the lung. We'll not have the blood circulation we have but it will be a pure interaction between the STM and the STP, or the D of the physical fields of the PI environment, and then we'll have a plasmatic life. We will not manifest ourselves in the physical of 2 arms, 2 legs, then we have a different D of the control, and .. interactions. We see these kind of lives in the upper atmosphere of earth as it has been reported by NASA, as we have seen space cameras have taken the shape. Where the soul sits in interaction with the fields of only the gaseous part, the upper levels only has one D. We don't see Inertial field of the matter state to see a physical body of the bone ?/ We see this many times in the teaching of KF. Where NASA reports in their videos seeing fields moving in a manner. Because when you have a STM, (:46). interacting with the field strength of the environment, it has life, it dictates its position, it moves. Now for the first time we can see the upper level of us, in the upper atmosphere of this planet. We have a different life we didn't know. We have the fish in the seas, and we have a life above us, as it is too far from the Inertia to interact to give it a physical D. The soul of the entity in interaction with the fields of the earth in the upper atmosphere and the interaction of the fields of the sun, create a new life. In a way, as I said before, maybe for the first time we understand we are the bottom eaters fo the atmospheric condition. As we see when the body sinks in the oceans, lands at the bottom, there are scavengers, there are bottom eaters which take benefit from what falls, and there is nothing below us on the ground. So whatever falls from the top as an energy fields we take, we breath, maybe it becomes part of our life, it's fixed through the environment to become existence for us. WE are the bottom eaters of the top. In the very near future we will show this. Because even those lives on the upper levels have a limitation of interaction of the fields and if they change they loose the D of field

strength, they become closer to the earth, and they take shapes of physicality. They take and they become what to be. This is very heavy for a lot fo you to understand, but this is the truth, the way we shower the bottoms of the seas with remnants of the body of the animals, whatever which the bottom eaters eat, (:48). we ourselves are the bottom eaters of the life above us. But they live in the D of no physicality and just by the fields. In the coming time when we go into space in the D of the plasmatic fields, in the collective interaction we will get to know these animals. We say we have so many thousands, one and a half thousand creatures on this planet, and so many thousands in the oceans now we come to understand about the life above us, which is even more dimensions and diversity that we didn't know. We open the eye to the existence of the interaction of the fields of the environment and the soul created from the interactions which creates life. If Rick can go into the videos archive ... we see NASA reports these objects fly, this is not theory, this is a fact. Now for the first time we can put meaning and correctness.

Then it comes the fundamental point that last week we touched on it, the hormones. The interaction of the fields of the physicality of the man , in nearness to the source gives us what we call, the hormones, which we explained in the center of the body of the man, with the ?? which is the conversion of the field interaction between the two. This is where the hormones are ?? In so many ways, mankind has come to understand in the interaction of the STM, (:50). with the containment of the STP M field we call, blood circulation, mankind to benefit from the existence of the presence of the .. the soul, it has created substations near it, as glands to convert its energies when it comes to the physical D.

Mankind speaks about the position of the gland in front of the head. This exists, because this is the interaction of the fields of the STM with the outside environment. Some people they have given different names to this, but in fact, the way the planet, the body of the man interacts through the physical side, conversion of what we call the hormones, the same thing happens with the outside D, with what we call, other souls. This is a substation that can in a way, be more powerful than the inner, from other glands, that allows, and this is where we get our, what we call, interaction of vision and the hearing of, in conjunction, in passing through. In this process, what we see in the body.. in all of us has created itself a new way, that most of us have not been aware of. But in the process of completion of life, this process lead to the creation of a brain, (:52). which in 2 halves creating Yin and Yang, balance between 2 parts of the soul fo the body of the man, leads to the left and right brain. In conjunction with the matter state balance of the physical body .. , the Cu as we explained in the past teachings, brings this process of the creation fo the physical left and right. Where is has to stay in balance. But there is another D to this, that in controlling the physical life, the brain .. has played a purifying game. What has happened is that the STM in the center, in conjunction with what we call the glands, in interaction with the blood circulation, in the fields in coming in touch with each other, and with the glands, and with the field strength of the themselves, creating fields, that's what actually what the glands do. In that process different D of the fields on the bottom part leads to creation of the physical life. But in the brain .. the same game played. Where in interaction of physical part we have the liver, kidneys, and the lungs, and everything else positioned to be able to interact with MG field of the earth, and the other side the same shape comes to operation, where the specific position is the place for the speech, this special position is for happiness, (:54). the special position is for emotion, and different things. The same way we have a

structure, for interaction with the physical life, where the earth. The interaction between the STP and the STM leads to the construction of what we call physical D ?? contract. where at the end of it the two agree that, we let the physical life part of the brain to stand outside, that it can have a control system. This is why when we look at the body .. , when we see like people in a stroke, the field strength in the middle part of the brain becomes your shoulder, and the upper part the upper arm, your elbow becomes this part of the brain, and in that operation we see for example, the fingers by your ear, the fingers control, hand, and the ?? rest. The same position is your legs, your upper leg which is here, and then the shin. And there is a specific point in the body .. which is in charge for and only of, .. femur. Then you have what you have as lower arm and lower foot, and the toes and the feet. Now we understand the full process, and then we see how these interact, and in the interaction of the fields ingoing and outgoing, every emotion of the man is recorded. A man who has an ILS by the wish of the field of the STM and the wish of the STP, decides no more walking, (:56). I want this section to be dismantled. When this section is dismantled, then the body has an energetic field which cannot handle, and that energetic field ?? heartbeats, the body dies. This is why the emotion in interaction fo these fields with the STM leads to what we call death. Because the STP has pre-agreed the condition with the STM that this guy doesn't want to have the use of his arms and legs, so we disconnect it, and it takes time to disconnect. That's what we see people with ILS, MS go through paralysis, and then they die, because even the heartbeats, the physical connection has been disconnected. And this is why it is very hard to reverse it, because you have to be a master to realign all these at the boundary inside. This is why we see the success with the use of what we call, external energy field forces which can create these secondary fields in a ?? false condition, not what we call, "has to be there but there is no physicality," and then if you succeed, physicality takes shape. This is why in the coming time, we say, if they take your kidney out we can produce it, because your kidney has created a MG field in its position of creation. All we need is to create that field in this environment and the kidney will manifest itself, because its position of field strength sits there. (:58). It's not no more magic, it's no more hidden .. information. We have deciphered the secret of life, ... that the mankind will see the totality of the strength of field of his existence. You do not need to go through kidney transplant anymore if you understand to have your kidney operating, you need to create a field that allows the kidney to restructure itself to its original position. There is no need for dialysis machines. This is why when you go for the Cups of Life, for diabetic, we tell you to wash your kidney, because the kidney condition in interaction of the hormones from the brain, in a condition of psychosomatic creates the structure of the kidney to change that creates the condition of dialysis. This is why many of you when you take the cups, or when you make, what we call, "you follow the procedure for the diabetic," you say it doesn't work. You missed 2 things. First of all you missed to cover your kidney and liver area with the Gans's back and front that you bring the balance back to it. With out this cleaning up, without repairing the kidney, as I said, it's like a car that continuously has an accident and you keep on repairing the body, but you never repair the brakes which is not working and hitting you, letting you smash your car here and there. Then we understand the process, then we come to understand the totality of the creation. Why do we tell you to breath, because you have to bring the agreement, (1:00). of what we call, the gaseous part, which is controlled by the emotion of the interaction of the field of the lung and the STM in order and in balance with the physicality to repair the kidney. Otherwise you are still limping. You haven't done the full job, you put the pad on but you forgot to put the pin in, that the break works. This is why in all dimensions all of you when you use the Cups, "oh I am drinking 3 times a

day,' you can drink 200 times a day, what about the emotion side, .. the gaseous side, .. the physical side which you have to put on top of it. The liquid you drink covers the fluid side. The material you put on your kidney covers your physical side. But what happens to the gaseous part if you don't breath. You're still limping.

And then all of you have seen problems continuously, it works, but sometimes works. Because my dear, can you tow a car when you haven't connected the towrope. You can have the most powerful engine with a towrope hanging on the floor, when you don't connect it to on to the car you want to tow. Where is your AA, the towline is not there. The tow rope is not connected. Then you come to the position of another towrope. If you put the towrope up now you, now you have to put the lights, that the light in the back of the tow car shows, somebody is towing and it is comfortable and safe. Where is your connection with the emotion of the man, which is the Zn? (1:02). You have to connect both tow bars that you can pull and keep safe, and none of you follow the procedure, one or two people understood, Dr. Rodrigo's and they disappeared. Because all of you have to understand this, because it is not a magic, it's understanding of the totality because the doctors understand, and they understand, appreciate the essence fo creation like Dr. Rodrigo's, they see right through. Then all these brings question marks. I have all these right positions why can't I help everyone, only some, because then you have to extend the condition of understanding fo which part of the emotion with the direction of physicality, with the essence of STP, and the STM bring these positions. This is why many of the physicians who join the KF get frustrated because they cannot see the whole picture because their knowledge is ?? not enough. It's not to be the physician anymore of the physical life. The present and the cycle of the physicians we start training have to understand the totality of the creation, interaction of the fields in the fields of the gaseous, interaction of the fields in the D of the liquid side. Interaction of the fields in the D of physical life. And then interaction of what we call emotion, which is created from the totality of the fields of the 3 in interaction with the field of the STM. And in fact, if the STM did not have all the characteristics, (1:04). which is within the physical brain of the man as emotion, how could he understand and control. And then we understand why in the physical life something very precious, and that is, when the STM creates an emotion, and the fields which in interaction with the field of the STP, we see manifestation of the position. Which means this is where I feel joy. So if that's the case, within the STM, there is an essence and emotion of joy, that in a given field strength, and in a given position in the structure of the man, in the brain of every man leads to the position of the creation of the combination of the matter state to the Gans, in the different strength and combination, a position , where M fields created that creates the emotion of the happiness for example, that both the STP and the STM ?? Then we see why .. the brain of the man has very much structure like the physicality of the man, the liver, kidney and everything else, and we call it the happiness, (1:06). the sadness and every other ?? thing. The fallacy in the present world of science they say only the brain, the maximum brain used by the man, in an intelligent man and he uses maybe 10% - 15% of it, and the other 85% is not used. What a fallacy, is it true when you are not using your finger the rest of the body is dead. Is it true when you are not using the legs to walk, the arms and the intestine and everything else is dead, or are they functioning in the background to make sure the leg, the blood is there, that everything else is there, that the walk can happen by the leg. So we understand for the first time the brain of the man is on work 24 hours a day, not only used for the part which man sees as intelligence. .. the structure of the brain .. is set as a last memory computer system that it knows continuously on its work 24 hours a day, which cell needs to be changed in the

physicality, when is the time for the blood cell to change, when is the time to change the bone cell somewhere, .. kidney cell somewhere. So those to tell you that the brain .. is only used by 15% is those who actually believed that the earth is the center of the U. In fact, just because we don't see using it, doesn't mean it doesn't exist. If there was any part of the brain .. which the interaction of the field of the STM, the STP .. would not interact to give assistance to it, it would have not been there. (1:08). It would have been an empty ?? gap, empty space in the brain cell. In the coming time we'll explain in a very detailed, why even, what you seen in the brain .. for example when we look we see shapes like this, and we look at everything else, on 2 sides of the brain.

One of the most important structure in the physical structure of the brain .. inside the skull of the man, are these gaps, they are more important in some cases, than the physical matter. When you look at so many brains x-rays, or MRI's you'll see the beauty of these gaps. You can see and decide on the intelligence by the gap created among the cell, among the structure. If you looked at as many x-rays and MRI's as I have done with the people with MS, or Fibromyalgia, with ILS, with Depression, you see the shape of these gaps, the shape of the brain changes as they recover.

Because these are the space gaps. These are the gaps between the earth and the moon. The gaps between the sun and the earth which stays the behavior of earth. What earth produces. And thee gaps in the world of science is totally ignored up to now, and it cannot do so. When you look at an x-ray, an MRI, (1:10). to me I always look at these gaps structure. Where it is closer, when it is separate, how its shaped in the brain. Then because of the gaps you understand, if you have a Venus, you have an Earth or you have an operation of Jupiter. This is what the man of science of tomorrow has to learn.

(1:12). When you are an Indian doctor sitting in an office, does not matter to you if a red Indian comes in, a black man, .. or a white man comes in, it's all the same because he understood the physicality and physiology of the body .. that everything, where it is and how it works. Now the next generation of the scientists, the doctors of the man we call them. In space, will look, because he has understood the totality fo the creation, what does fields in the center, what's the strength of the soul, and what is the strength of the physicality in respect that he is of this planet or another position in the space, will give me that I can repair the emotion of happiness for him at this ?? Then you have an overall view of understanding fo physicality, then becomes very easy to be the physician of the U and not the physician of the man. In understanding in comprehending the process of creation, mankind has become wise the totality of for the first time we show in the coming time how we create life from interaction of the souls, not from the interaction of the sperm and the egg that it leads to creation of physical life in any dominion.

In so many ways, mankind will not have in the physical D what I call, children in the space because it stays the physical structure of the AA of the man which created the STM, (1:14). has a different combination of physicality than the others, what we call inter marriage in the physical D, some of the impossibilities. But if you can work in eh strength of the soul you can create the strength of the soul D that it decides and creates its own manifestation in the environment of the womb of the environment, be it the womb of the mother, be it the womb of the center of the galaxy, be it the womb of the center of the U, or somewhere in-between the Unicose. At the moment if you are born

in air you get a UN passport because you have no nationality. What happens if you are born within the gap spaces of the universes? What U do you belong to and what combination do you get, because then you have the collection fields of the, "all combination of the fields of the U."

Mankind has to open his eyes to the facts, that through these teachings we raise your horizon of understanding beyond the point of your imagination of today, but the reality cannot be ignored. You cannot shoot the messenger because you don't like the message, because it doesn't fit with your program. The message is on the table, it's for you to understand it, to comprehend it and if need be to develop it to become the next step.

In the coming time in collaboration with different nations, in Iran, in Beijing, in Washington, New York, or in London, or in Paris, the scientists will work to decipher the process of the creation. All these scientists we put behind the computers to design the killing machine, they will be given the opportunity to find the secret of life, to create the machines, (1:16). to travel the spans of the U, through the process of understanding the operation of the STM. We have educated them, now we have to change the machine from tools of war to tools to peace, and to everlasting. From now on, .. the race and the position and the prestige of the nation will come not by the bank reserves and by the killing machines you have, but by the knowledge you have added to knowledge of humanity in conquering the U. By learning and giving it freely as fast as we can. We have called it "Bitcoin," now we call it bit brain, bit travel space, that collectively we all mine the knowledge of the U. Collectively we add into the totality of the knowledge of the creation. Man will get so busy in adding that he will not have time to think of war. He'll see the beauty in creation and knowledge, then in creating wars. In the upcoming talks between the world leaders there will not be the discussion who leads in the military and commerce, but who leads in the knowledge.

(1:18). In the coming time as we are developing systems in the research centers, we will not give birth to the physical life ?? give birth in the, what we call, delivery rooms of hospital today. In the processes that now have started, I was discussing with KS yesterday, we transport that soul of the body of the man to the environment of the earth, and then the physicality which is established within the womb of the mother, or womb of the U, will manifest itself as the beauty of the creation, that I am present. In the coming time as the evolution of the science the delivery of children in the delivery rooms becomes a historical point, that now if you like the same as we send you to the other side of the U in UFO's, or you can travel with the STM in any D, now the mothers have an option, allowing the life to be created by transmutation of the soul of the child into the environment and not in the D of physicality and all the problems we have seen in the death of the mother and the child in the delivery. In deformation of the brain and long lasting physical damage. These all become point of past in the next few years. KF through its research centers have already processes and has started this process, to deliver systems that can transmutation the D of the energy of the STM in one pint to another, that the soul of the child moves from the mother, (1:20). at the point fo what we call, completion. and then it takes the shape of the physicality according to the wish of the soul itself., ?? fundamental ?? and the wish of the mother, child, father, and the society. These are not fairytales we have shown the knowledge.

The new vertical EU, .. present generation is very different than what we showed 6 weeks ago.

In the coming time we place the vertical EU inside the horizontal EU, where the mother is inside the vertical and we transfer, (1:22). the soul of the child in the horizontal environment that we see the and delivery to the physical manifestation

You will see radical systems which will appear in the coming weeks and months, from the KF both in 2 -3 nations at the same time. Upon my return to Iran in the backend of the June we'll create the condition of space centers which are devoted to serving humanity through elevation of the STM, as we ?? did the physicality, as we teach to NASA and Russian Space Agency as they like to have something to play with. The growth and intellect of the man of today has reached the understanding of the totality.

In so many ways, we cannot move backwards ..

The only course left for us is to move forward and then choose different ways to stay on this planet, to take ?/ fields of the plasma of the U and travel in the D of the soul, (1:24). or take the D of the physicality of the man, and travel with the UFO's or the car or the jet. They are all now in the hand of the man. I like the bicycle ... ..

(1:26). in past 8 years we have matured it to the point ..

(1:28).

This is why I said we are all Messiahs, we are the Messiah of our own physicality and no one else. You are the Messiah .. you have no control over mine.

.. There is no point for no one to call themselves a king. The only king is the king of God, Creator, and that is all of us to be part of it. There shall be no king and there shall be no rulers as we rule ourselves through the correct conduct of the soul. As I said, Mitra is among us and that process has started. And in that process we understand the totality, the mother of creation, the mother of change, the mother of new beginning. In that process no man can obstruct the process, any one touch, or tries to stop the process will meet with his own match of, and conversion and diversion of demise. Every man and soul has to

be free. But no soul can change the process of understanding and evolution and agreement of the souls. And collective admiration, and collective elevation of the soul of the totality, not only of one man but of the community of mankind and the total elevation of the soul of the Universe. and ?? this is how we have become, (1:30). the visible part of the U community, up to now we were dismissed

(1:32). We create a manifestation which fits that environment and strength of fields of that environment and if it manifests and attraction of the 2 we shall see a different ?? light. In the world of the creation we interact on 4 levels. Plasma level, liquid, solid and gas. There is a 5th level which man is still blind to, in the coming time we open that door, when man matures a little bit more his understanding. In so many ways, the field of the U are not only there to create and interact but they are there to manifest on the totality of the creation ?? Mankind in the coming time will come to understand the process of creation ..

In so many ways, mankind has started to live 2 dimensional, 2 strains reaction with the totality of the creation. Mankind (1:34). is with understanding its own creation. Maybe one day we come to understand the total truth about our own life and our own creation.

My wish is somewhere in the coming time enough knowledgeable and men of theology come to understand the truth that we abandon the dogmas of the science and religion and we all become one to understand the essence of the creation and the Creator. I leave you today with this, because I have opened a very deep knowledge which needs to be understood. Please try to listen to past at least 4 or 5 sessions, one after another, and start building the picture where we are taking you. Where we are leading you, (1:36). and how we come to interact. We have to understand that the knowledge of the man, the essence of the life of the man sits within the structure of the physicality .. within the interaction of his fields with the STM. We would not be here if there was no soul within the structure of our inner physical body, as there would have been no earth, if there would have been no center to create fields to interact with the fields of the sun to manifest itself as earth. In the coming time mankind will become very wise ..

All the knowledge of the creation is within the structure of the STM

I would like to go to a break .. teaching will be short today (1:38). then we'll become passengers of this planet . we'll be in Rome, in London, Tehran, Beijing. and return back in August ..

July in Bucharest, capital of Romania, and then we extend the travels other parts. We expect to be in Washington sometime in September. from then on it will take shape, the new understanding. We announce our plan in advance ..

We need to bring the essence of peace to our own leaders  
Some of the world leaders to sign in public  
First Ayatollah ..  
(1:40).

The signing of Iran's religious leader and nation leader is the key to the next step of the peace talks. around the world. The Iranian nation will commit themselves to peace. with that effect we'll open all the nuclear centers of Iran to the world ...

thank you .. we go for break ..

>>> **BREAK** >>> (1:42). 378 KSW (1:46).

K- .. Are there any questions? ...

### **Fake "Silence" Imagination - Silence of Soul**

Q: Salameea, ... (1:48). I would like to proposal for KF TV, if it is possible to teach about the power of silence, or to transmute our fields, our soul.....

K- I don't understand what do you mean the power of silence?

Q: The power of silence, I mean we have two spheres of the brain, and the logical one, and to silence this logical one in order to give more possibilities and freedom to the emotional one. This can create us the potential to transmute and go out from our body to get the freedom to travel in the space, wherever we want .. you did with us a lovely exercise .. we repeat in our meetings many times, and we feel quite well everybody. In order to get harmony and peace of the soul, I think we get many benefits of the silence ..

**K- I think this is the fake imagination of the man. Just because you don't make noises, (1:50). through your voice box, doesn't mean that the brain is not functioning and creating its own noise.** And the environment, then you speak about the silence through the mouth of the people talking, does not mean that the brain and the soul is in silence. This is what I always said, in the previous teachings, the earlier teachings some 2 - 3 years ago. Is that you don't need to hear to see, to know what the man is thinking. Man of space do not speak man's language, even though us as human beings don't speak each others language. When you sit in ?? a room with hundreds of nationalities, you don't speak each others languages, all smile and ??? there is no noise, no communication. But all the souls in that ?? point are in communication with each other, and cross to others.

### **The Interaction of the Fields of the STM always makes Noise**

In so many ways, **silence is a D of physical man.** As we say there is nowhere in the U, that there is no M field, and as the ?? brain of the man, as **the STM is made of fields, their interaction always makes noise.** How we accommodate and control these, brings to the motion of what we call sounds, or D of understanding the presence of existence of another.

### **Silence is Manmade by Those who think they have Achieved something**

**So silence is a man made, and those who are very physical, (1:52). rely on it, and they think they have achieved something.** It's very much as we rely on the television ?? television to tell us the truth. It's the same way. We don't need silence. You can be as noisy as you like, break the whole city down with noise, but have a very low interactive soul. Or your soul is making bigger noises than you and interacting with the other souls which you have ?? avoided through your noise.

### **Silence is Biggest Punishment**

The biggest punishment, is the punishment of silence. And in that time ?? ?? for man to contemplate. But in so many ways, we are created to interact, and in that interaction, silence in the world of physicality, when the 2 are together, is a prison sentence, that no soul has to sustain, but sometimes allows for emotions to process themselves, that in that process allows the elevation of their souls maybe or direction and D of the evolution and transmutation of the soul's energy to deeper understanding of ones failure, or interaction to success of understanding more. So when you go on the silence, just understand one thing, it's you in a physical D have chosen that, not your soul, and no other souls in the same room. Maybe souls have much busier talking when you are physically silent. (1:54).

In other question.

Q: I have other questions if you allow me.

K- Rick what do you see in the background.

## Plasma Dome - Made of Fields of Gans

Q; .. is the plasma shield a magnet field, if so what metal or combination of metals causes such a wide dome as the one on the island protected from the hurricane? So she would be referring to the Tom Sallsa dome on Caribbean island. Is the plasma field a magnet field, if so what metal or combination of metals ...?

K- The interaction of the fields of Gans's leads to creation of these domes. It's not a metal. It's a plasmatic field extension, and we see it even in our laboratory parts when we do testing, depending on how you test. But it is not a metal. It's ?? not ?? necessarily metal. If there were metals, In so many ways, partially it would create a different manifestation. (1:56). And it's mainly through the condition of fields which are ?? not strong enough to manifest tangibility or physical what we call, ?? But strong enough in combination with the environment that they can divert and convert these kind of ??

In 2 or 3 years when we were testing in South China Seas area, we had a very strange position. We were not very far from .. Chinese Naval headquarters ..

>>> talks about China experiments flight system.

(2:04).

(2:06). hardly any metals in our systems.

I was talking to a KS yesterday explaining some things in the process in our experiments

(2:08)

My knowledge of creation is complete in line with what man needs to know for centuries and thousands of years to come. (2:10). If you go back on all the teachings in past 10 or 15 years. Go back to papers I have written before establishment of KF. Go back to during the work of my University time, there are some papers around still. Some designs of the deep space reactors, were designed in 1978 - 1979, I have them somewhere, you will understand what you see here in 2021 was already known 40 years ago by me. It just took in a way to water it down, step by step for man to understand. I remember I was not more than 18 - 19 sitting in a bar, in a restaurant called Swan Head ,outside Manchester near British Nuclear Fuel with a friend of mine and I was drawing him for future space reactors for creation of materials and space units. And he said, "no one understands you, because you are talking so advanced, people don't even have the knowledge. At that time I used to work with ?? field scientists, just about less than 5 km away, in B N Center, this knowledge was very clear to me from the beginning. That if you look at it, we understand this process, now in a deeper way, but more, many more of us. In the coming time what, (2:12). if I can find that, those notes those papers, we don't see any different. Knowledge has to be understood, and once understood does not need to be remembered. And the knowledge of creation was very clear by age of 13, but

I could not explain the totality. It's a very interesting .. A couple of weeks ago one of the close friends in Iran sent me a video that one of the Iranian scientists was speaking about the soul, and the process of the life, the STM, and I said, can you please take the video of what you just listened about the cycle of creation and tell him about what imminent scientists in Iran goes, this is from their point .. this is ?? afterwards, we understand so much more. This process of creation should be very simple for us. In that system we created them, but the same as you have the STM in the center and the skull of the man to contain the interaction of the fields, in what we call physicality, the STM is the machine in the center you see. and the body of the EU is the skull. The system inside are the creator for the fields of what we call, physical soul. With these systems I can not only create the material status, (2:14). I can create for you in any position to see the strength and the fields of the emotion of the man. .. .. if you understand in interaction this (center reactor) and this (reactor inside EU) I can create the strength of the sadness, and with this (center r) and this (a different reactor inside) happiness.

(2:16).

... Most of you have not gone far enough to see the beauty of these systems. You are looking for gold, and I look for knowledge for Creator in this systems. You are too much entangled in physicality. And I am too interested to see how and what level I can create the fields that, that fields become the strength of the fields of the Creator within the center of the system. Can the knowledge of man reach enough that one day we become close enough that the interaction of release of fields of us, (2:18). we can see ours in the interaction of the D of the U. How would we shine? In the old say, what we see in the energy parts I see in the ?? glands. It's the level of understanding the knowledge. and being open enough to accept the truth of the knowledge according to the understanding. We have all the knowledge, and we have access to every knowledge in the U. It's just that if we choose to use the knowledge, except that, when and the reason we choose to use the knowledge.

On Sunday in the NACT one of the KS said to me, it's recorded, about how I can not help myself with the knowledge I have with the hay fever. And last night talking to some KS I found so simple. It took me less than a minute to make the mixture, and since last night I suffer from none. Because it was to prove that I have the knowledge. (2:20). As you have seen today, I carry no handkerchief, .. no sign of hay fever, which I have suffered from it for years, March and June. .. We have access to every knowledge but it depends on the emotion, the field, and what I call, the emotion of ??

It's not just because you have you use. We let the physical D, the mistakes of the physicality to take shape, that with it we learn, with it mistake become a game in the knowledge, but not mistakes. but opportunity to learn. For that reason you see the evolution in these systems, I am looking for the totality of the knowledge of the creation. You for the sun, you look for the system to make gold. I look for the soul of the Creator, the ?? ?? the same system. Is my knowledge enough to interact with direct soul of the Creator to see how ?? a ?? star or a shining star, in the presence of the reflection of the light of the Creator. It's knowledge I use. Or am I the Creator that in interaction with the knowledge we see how the others shine. ?? we all come from and go back to. It depends are we on the M cycle or are we on the G cycle of the distance in the U. (2:22). And what don't we ??create in interaction of the fields of us. ?? in the D of the Creator.

Any other question.

R: about the processes you brought up in last workshop... energy transformation, which then lead to energy transportation, and then to energy transmutation, within the body .. and that it can be learner. (2:24). Can you discuss that more .. what and how is it that we can learn about those processes?

K- Okay, go back to the 3 words. .. transmutation is the last one.

R: Transformation, transportation and transmutation.

K- Isn't that Book #1 2 and 3.

R: Exactly.

K- That is the same but in the level of energy of the STM. .. transportation is going from one to another. Transmutation is the manifestation of end products in the solar. And transformation because we are there we can see physically the process. It's which part of it we want to be. But at the same time all 3 are on a field level, not on a matter level. You would have to transport themselves from one to another, that they manifest themselves at that point at the end. .. with the present knowledge we can dictate and control most of these systems, (2:26). and in the coming time we will show you how you can amplify field strength, you can change field strength, you can create combination of the fields. The answer is very simple, just move up from matter state into the PI state and then from then on understand the totality. I made man in the image fo Myself. But if I am here to manifest man in my image I have to travel to a point somewhere that I can manifest myself. This is what we say, it's a very interesting point if you look at it in a physical D or in the energy D. You stand in front of the light and you have a shadow, ..if the shadow is in front of you, ?? enlighten you, which means the stronger light form behind. Or is the shadow behind you, that you are between the light and the shadow. Who is creator of which, and who is manifestation of what? Is the STM still exist in the shadow on the ground? Does that shadow contain emotion? Or how come the reflection of our physicality which is the Gans itself, (2:28). if it is changed slightly would there be a shadow. If we live in the D of the PI field ..

(2:30).

(2:46).

Thanks see you next week 7PM CET

R: 378 KSW (2:48).

END
