

382nd Knowledge Seekers Workshop; May 27, 2021

ENGLISH TRANSCRIPTION

(:11). K- ... we welcome you back for another session of beautiful knowledge. Last week we announced signing of one of the largest, up to now manufacturing bases of the KF in China ...

We have another goods for you, that we start, KF has found a permanent position that they move into in the next couple of weeks and that the whole operation will have a permanent studio. The KF had to leave the Linz Exhibition Center as the government of Austria has taken over the whole center as a center for .. injections and applications of the Corona to control and test. So we are moving out of the E Center. (:14). We have moved to a much more prestigious .. but permanent place for KF in Europe. .. this place makes it a lot easier .. now there is a tram and train to get to, which makes it easier for people to visit the center...

We are looking for Knowledge Seekers (KS) with a good knowledge of the KF T and fluent in at least 2 to 3 languages to join the KF. ..

(:16).

we brought the public directly in, as a retail shop where they get to know the T and the center of the Health C becomes part of it.

(:18).

Start of Teachings

In the teaching last week we made a very clear announcement that now we start showing you the combination of the use of the systems. How the Air Enhancement Unit (AEU) can be used in conjunction with the .. Vision Enhancement Units (VEU), in conjunction of .. environmental systems for field detection and field absorption. Today we try to expand on this in a different way. The knowledge and T has to be on the basis of understanding of the totality. We have to understand now how to connect everything together and how we come to interact with all the knowledge in different way.

In a way, we are bringing different pieces of the jigsaw to make different pictures, and then we open it up, and with the same pieces we make another jigsaw to be completed. Last week we explained the use of , and how we use the AEU in conjunction with the VEU in conjunction with the .. butterfly. Today we want to expand on this, in the knowledge. In a way, if we understand, what these processes create it will be very interesting for many of us to, (:20). extend the knowledge to extend the T. What is important... we have the body of the man, and we have introduced systems like the AEU, .. VEU, .. like the butterfly. But what does it do. Many of you made the Gans Water. What is the purpose of the totality of this.

Our ultimate goal is .. to elevate the son of the man, the STM where the sun shines, when the whole thing is created by it and through it. What is the purpose of all this work. **Mankind has fed the physicality from the beginning of time. But mankind has never understood how to feed the STM, the sun,** the center, that in conjunction

with this elevation it will become in touch with the rest of the structure of the U. One of the simple things... every sun has a heartbeat.

STM has Heartbeat - How to expand beyond physical boundary

In the physical D of the man, we listen to the heartbeat of the man, and we consider it as if the life exists within it. (:22). .. the **STM has a heartbeat** too. How do we tune into it. How do we excite it? **How do we create condition for it to be able to expand beyond the boundary of the physicality.** When we run, when we get excited with the beauty, or the presence of anything our heartbeat increases, and we become more aware of. We are becoming more .. intelligent, more giving when we fall in love, when we see the lover our heartbeat increases, we become more active, energetic. But we have a reason for it, we have a lover, we have a condition to create that increase in the beat, increase in the expansion of the fields.

To Exist - heartbeat of STM in tandem with heartbeat of physicality

Now mankind has to understand and **find a way to measure the heartbeat of the STM.** But there is one point which man has to understand, somewhere in some work, in the **heartbeat of the STM has a direct effect on the heartbeat of the physicality .. they are in tandem, otherwise they don't exist.**

One of the reasons man dies in the D of physicality, is when the heartbeat loses its tandem with the heartbeat of the Soul of the Man (STM). As long as you can keep the two heartbeats connected, you can keep the soul and the Soul of the Physicality (STP) of the man in working, in tuning, in operating with each other. (:24). So one of the main things for us to understand, is understanding of the heartbeat of the soul.

Man's knowledge has been up to now, that we have understood **the earth has a heartbeat.** The scientists tell us that the **sun has a heartbeat.** So what about the sun of the man, within the center of the structure of the man we call the STM. Isn't the challenge for man to develop T that can measure that heartbeat, the heartbeat of the soul.

Systems to excite HB of STM to fall in love - take over physicality

If we can find that heartbeat by using any of the structures we have in our hands, be it the environmental, .. your vision, .. your butterflies, be it your Cup, should be able to interact, that with it we can create a condition to **enhance the heartbeat of the STM that it falls in love,** or that **it is excited that it can take over the D of the physicality ...**

As I said in the past teachings, this is our target. How for man to learn to get excited, to be able to bring energy levels that can allow the STM, the heartbeat (HB) of the STM to get excited that moves beyond the boundary of the physicality but still is connected to the D of the STP and to the soul of the HB of the body .. within the heart of the man. In a way, it's a big question for mankind. (:26). Is the heartbeat we hear, is the combination of the heartbeat of the STP and the STM together, where we carry in the dimension (D) of physical heartbeat of the man. And why the physicians of the time have not understood, why the reason that the heartbeat changes. **Is it the STP, or is the**

STM which changes the heartbeat, or to what extent the 2 have interaction with each other. that they ?? leap to the sound of the HB of the man.

HB of earth control over HB of Man - Different Color Races

Does the HB of the earth have control over the HB of the man? Does the construction of the physicality of the man in the Gans's of the amino acid (AA) in conjunction with the HB of the man, the HB of the STM and the HB of the planet, dictates the condition of the physicality of the man, is this **one of the reasons that man has different shape and color in different parts of this planet?** Then it has to create manifestation of physicality that what we look in different colors and races across this planet. But is the essence of the HB of every soul on this planet more or less the same, or nearly enough the same, with different interactions with the HB of the earth create different physicality? Some look Chinese, (:28). some look black, Africans, from SA and the rest.

Through the HB of Creator man travels span of Universe

In a way, mankind has to **understand the process of the HB. How do we create it, and in that HB if you understand, then we can travel the span of the U.** Would there be a time **when the knowledge of the man reaches to have the measure of the HB of the Creator**, to be able to travel the span of the U?

HB is Key to Transmutation and Transportation and Everything Else

In so many ways, what is the process of the creation, and what is, if you understand with it, what we call the **HB, the key to transmutation, transportation and everything else** the man has been attached to.

How HB is created and can be replicated

The most important thing for mankind and the rest of the creation is, how that HB is created. We can measure it, but if we do not understand the process of its creation, **how can we replicate it.** We cannot be the "monkey sees, monkey does," because each position, each condition has a different strength, what we call HB. When we have a child they say the HB is 120 or whatever, when we get older we are happy with 150 ??

Why does HB change - age - HB of Soul takes over

Or What **changes that condition, is it the growth or the process of the birth, or is it adjustment to the new environment that it needs a higher HB.** or is it **the time we reduce the HB of the physicality to be able to allow the HB of the soul to take over,** (:30). what we call, at the point of separation or death. Then it will be easy for all of us to measure the physical HB, the HB of the soul and dictate the time of departure, as we know the energies cannot be replaced or we decide not to.

It's Not Suicide - Transfer to new dimension

In a way, we call it, **at this moment in time, suicide, we decide to end the physicality, but in the D of the STM there is no suicide. We decide where to transfer, and how**

to transfer and interact with the HB of the physicality, the environment and the soul, that it manifests itself in any D and direction.

HB Created by Interaction of Giving and Taking - Maximum back to Minimum

If we understand how the HB is created, then we understand the process of the creation. the **HB comes from the interacting of the giving and taking, when it reaches its maximum and its minimum.** When the body charges to its maximum, that body being the STM or the STP of the man, or the physicality of the man, and **then at that point, has to release its energy that it goes back to the minimum,** because it has reached its maximum. It's the point of the balance between the point of the G and M, and where one reaches its maximum balance with the other. In a way, we learn a new process, we learn to create to tune between the G and M, that when one reaches the maximum of one, the other one gives up, and you go back to create the minimum, (:32). of the other, and the maximum of the other one.

HB of Creator beats across all created in Universe

In so many ways, **when mankind learns this minimum and maximum, and the maximum charge, then we will be able to create and replicate the process in any D. As the HB of the Creator beats across the whole of the heartbeats of the created.** This needs a deeper understanding of the technology of the creation, because this is where the knowledge is transferred to physicality and showing of the system we call the body of the man, or an animal, or of another creatures of the Creator in the U.

One Tunes to the Other - can be matched and controlled

In so many ways, **the tuning of the one to the other.** We see this In so many way, **we could see these in the beginning from the first reactors we built. This is where we discovered the HB,** this is where we understood the max and min and the charge balance between the two has reached the position of the interaction. If you look at the shape of the heart, if you **look at the shape of the physicality of the center of the earth,** the center of the sun, will **give you a clear indication that the HB is controllable. Or can be matched to.**

One HB is inside the other - to Moon we travel inside the Sun

When we travel in the span of the U, from the earth to the moon, we first have to discover the strength of the HB of the sun, or the moon, and than be able **to travel in the environment of the sun to reach to the moon. Because there is one HB inside the other.** (:34). Then the complication comes in how we be able to understand this knowledge, on earth we call it the high and low tide. In a way, it's the measure of the HB of the moon and .. earth, in conjunction with the fields of the HB of the sun. This is the reason why for the first time we understand we have different high and lows in different positions and seasons, as our position in respect to the HB of the sun changes, then part of this, HB of the man, part of it is what we call high and low tide. if you look at the overall, it **has something to do with the HB of the Creator.** Because it has an effect on the HB of the sun, the moon, and the earth, and the HB of the man, and the HB of the STM.

Technologies to measure the HB

In the coming **time we will introduce these new technologies, that you can measure the HB, you can decide where that balance point will come**, we have a very good example of it, look at the heart of the man in the D of the physicality ..

Heart convert MG field changes from energy to motion

The balance fields and the charge of the one to the other, **it twisted the heart so much, that the field forces, forces the heart to move**. In a way, we convert the balance changes of the fields of the G and M, in what the body pumps out as a blood, and .. gets back in from the blood, and the M fields of it, **releasing the charges to the heart makes that change from D of energy, (:36). to physical motion**.

Create conditions for same energy to move space craft

If we can create the conditions in our reactors, that instead of this HB physical motion of the heart, will lead to the motion of your craft to another D, to where the other HB is. Now you understand how in the future we'll travel through the understanding of what we call G and M field balance for the HB of the U.

In the heart of the man, **when these peaks, of the giving and taking**, what is given out, and what comes back, the balance field creates that motion of the heart, will lead to the motion of the physicality of the man, or can be transferred, **to transfer the, what we call, the STM to a new D, and extension of the life anywhere** in the U.

Don't need UFO to travel - Interaction of fields of HB of Totality

You do not need rocket propulsion, **you do not need UFOs, you only have to understand the power of the interaction of the fields of the HB of the totality**. Then we understand, mankind and the rest of the U Community has entered a new D of transportation and transmutation.

Transmute one element out of another - Create by HB of Element

How do we transmute? How we create gold out of a dust of a Zn? How do we create O out of Plutonium? We don't create fusion, we don't create fission. **We create the HB of the matter we need**.

Chinese KS have Created Gold out of Fields

In so many ways, many of you should have achieved that. We hear that some of our KS in **China have announced that they have managed to produce gold**, understanding the T of the PI, (:38). in past few weeks. We congratulate them, because this is what was achieved in Austria some 3 years ago, when matter state was done. But our KS looked at the physical condition of the field, but you have to understand the HB of the fields.

Enhancement Unit produces materials by HB - can tune to element

In the **EU which you have seen me produce material**, we leave it to you to understand that it's from the interaction of the fields, but in fact, **every system HB is tuned to tune with the sun in the center, and I can change the HB, I can produce gold this second**, and the next second it's the HB of Zn, Cu, O, Plutonium whatever you need.

We can produce Rare Earth materials - as much as want

With the process man will develop new T which **can produce the matters which are unseen to man in the atmospheric condition of the earth, what we call, rare earth materials**. It will not be rare because **we have the knowledge to create the most rarest materials in the U**.

Cannot produce space materials because HB of Earth doesn't match

One thing which mankind has to understand, **why don't we have the other materials which we see in the space on the earth. Because the HB of the earth cannot match the HB of the fields of the plasmas, which have created that matter in that position in the U**.

CO2 Gans tested - Fancy Elements Found

This was very obvious when we gave **the first samples of the Gans's to the scientists** in the **University of Ghent** in Belgium. When we had the reading, it says, this material which we **originally the CO2**, has "the characteristics of materials, (:40). what we call, fancy elements," that man knows about or thinks can be made, but was the first time the equipment of T could confirm the existence of it on this planet.

Transmutation Confirmed - CO2 has fields of 22 different elements

This was a **break point through**, if you read Book # where we explained about the Gans's you see, it has been inferred the system has identified some 22 different elements, because the what we call, Raman and Infrared Spectroscopy, could measure the fields, could see **these fields, confirm the existence of these materials within the Gans. The ability to convert this Gans to any of these elements because the HB of the element tunes to it**. The transmutation of the elements to any other 22 was very clear to us from the second we received the data from R and Infrared Spectroscopy.

It wasn't just anymore CO2. The fancy elements were for the **first time confirmed to exist within the environment of this plasma, within the environment of the HB of the earth**. When you send your Gans's (to the lab) ask them what materials do the system say, or does the system say that can be. This is the confusion for the scientists how can 1 Gans of CO2 as a collection, show the property of what we call fancy elements, which we think exist, might exist. And how can we see for example, (:42). O or .. He, .. K, inside a CO2 MG fields.

Need to find how to Transmute CO2 into different elements

So we saw the transmutation of the energy from the first tests we did in the Ghent University some 14 - 15 years ago. **Now we have to find how from this Gans, which gives us the possibility of the .. fancy elements, can be made, transmutation within**

the structure of CO2 itself. We are knowledgeable, read the books, go back to the chapters where you read about the Gans's.

For the first time we could understand, **we can transmute between the elements within the structure of the PI of the Gans.** There was the evidence, scientific manmade machines could confirm the existence of the field energies which the system converted it to the **possibility of the existence of matter magnetic field strength.** So we see what we teach about transmutation has already been in the books for the past 10 years. Now you can understand more.

Gans of different HB don't mix - Keep a space gap like magnets

Open the book, read it again, then you understand why even in one of the pictures of the book **we have put different color Gans's and we say they don't mix, even they accommodate each other, but they don't have the HB of each other.** Gans space, the way you put 2 magnets on the table they created, (:44). a gap space distance according to their HB, according to what M and G fields they get.

Same with Man's relationships - different HB don't mix

It's the same as the man, **when you have your lover, you bring it close, your child, you hug you transfer energies, but you don't' do that with every man on the street you keep your distance.** It's the same with the Gans's, what is connected and what has a relationship allows that connection.

Scientists to find media for replication

In so many ways, what has been taught now can be explained, understood more, in more detail. **Now the man's scientists have to develop the new T to be able to replicate. Find the media that allows the replication of it for the use of the man, which is that media, the H and O of this planet of different strengths.**

Explains Healing Water - Gather specific field strengths

When you go to .. the **holy waters, or the waters which comes from the mountains** or springs which comes out of somewhere and they say, this water is good for the eye, kidney, because people who have the kidney problem drank it and they don't have any more problem. .. same with the vision problem .. Look at the essence of it. **Where did the water pass across the span of this planet, that has gathered within it the field strength of, .. carries possibly AA which can interact for ?? liquid of the body ..** (:46). which is the strength of the liquid of the eye .. which allows it to function, .. allows what we call change of vision.

Illusive Element to Elevate the STM - can convert back to physical

Then mankind has to look .. **for that illusive element, which by man putting it in his mouth, or bringing it to a position near the STM can elevate the STM to the D of passing the physicality, where in the physicality that energy field, what we use now, the physical mouth of the man, has a still control to remove it, and convert back to the physical condition.**

Man will have no fear of Death anymore

As the brain.. within the central control of the man, is still in control of the confirmation of the physicality. This become the time when the **man will have no fear of death** anymore as .. today you have Corona you get the vaccine injection and you hope it works.

Tablet that Expands STM - Cells to harmony - back to physicality - No Disease

But this time **like a scanner, by taking the tablets of the energy fields you expand the STM, and you scan the fields right across the physicality bringing everything to the harmony and balance, and then retracting it.** You had **the cancer this second, and not the next. You absorb the energy from the fields of the U,** which gave you the virus which can destroy, separate the fields of the separation of your cells and now you don't.

Already do this with Gans Fields

In a way, **you already knew this, you put patches on your body, you wash your body with different Gans fields** and the same time you drink the Gans', then .. you inhale it. You have known this knowledge. (:48). It's not something new. Now it's for mankind to reach that point, the point of what we call the maturity of physicality that understanding **man can have anything he needs. You need to go back into it, increase the field strength of it, and then switch it over to expand the soul.**

Epileptic Attack Example but fields go to Physicality instead of STM

In the very first tests we did with the people, which what we call, "**epileptic attack,**" this was very clear, man has that power to do so. But he converts the energy into the STP instead of to the STM. One of the very first cases when we tested the ability of the fields of this T was with what we call an epileptic attack condition, where **we realized the lady was creating her own attacks, her own epileptic attacks. But when she was creating so much energy, instead of giving it to the soul, she was pulling it to the physicality to get attention,** was then, couldn't be able to control, and then she had the epileptic attack because the physicality cannot handle so much energy in a physical D.

If release Fields to STM become a light or Invisible

If she could transfer the energy instead of releasing to the neural system, instead to the STM she would have been able to become invisible, or become a light, and come back to a physical condition. But **she wanted the attention of the physicality of the mother** and the father.

Mankind Chooses Physicality over the STM

When we handle this, from the beginning it was very obvious to me that how **mankind chooses continuously confirmation of physicality, (:50). to the confirmation of the STM.** The girl was having some 20 epileptic attacks a day. She was under observation

from the age of 5 by the most top physicians in the country and when we saw her she was in the age of 35 - 37.

It was obvious for me from day 1, that **she is triggering the epileptic attack, but for me I had to understand how she triggers it. What is the condition of the creation of the fields that becomes a physical reaction where the vomiting, convulsions**, with the shaking of the body. It came to me very clear from the early stages of this that **she is converting the energy of what is created in the brain**, instead of feeding it to the soul finding satisfaction and elevation, to the D of physicality, then **she loses control and now the body has to get rid of it in pulses as the .. system of the body .. has a switch**. If we can increase this switch to a higher order then we'll find out, will come to be able to elevate the STM.

Epileptics Create Energy that can Elevate the STM

In a way, what the **people do with the epilepsy, those who can trigger it themselves, they create this energy to elevate the soul. But instead of that for being the center of attention, getting that attention, love, they change it to epilepsy. Some chemicals do the same**. We see some people when they take certain medicine give them that convulsion. and what we call epileptic attacks. (:52).

Head-on Collision - Energy for driving goes into soul - Coma

We do that in the time of just coma, when you have **a head injury, on a head-on collision**, what happens is, **all the energy which was used when you were driving, suddenly has no where to go. And then the body switches off, and then the soul operates** within the physicality, when we had the first coma case, this became very clear to us.

Reverse the energies to the STM - Elevation of STM

So we have seen how **the energies to elevate the STM is within the structure of the physicality .. now we need, instead of creating the convulsion, creating the epileptic attacks, or creating the condition of coma, to reverse that energy to go towards the STM within the center of the brain .. And then you'll see the elevation of the soul**.

I can show you how to generate energies for epilepsy - elevation

Everyone of us can make a condition to become epileptic. I can show you within minutes. With the first epileptic case we had, she could control it, **she could decide, this is the middle of the road, if I fall I have more audience**, so she triggers it every time she crosses a pedestrian crossing. Because there are people, I am on the floor, I get the attention. But she loses control, as she loses control, then what we see as the rest of convulsions, .. as the shaking is the energy which was supposed to be used for the elevation of STM. But the girl decided to use for physicality.

I Stopped Releasing Energy to Physicality - Epilepsy stopped in 4 months

Being aware of this knowledge, (:54). I could stop the energy to be released, to become physicality. In less than 4 months there were no epileptic attacks. There

were no need for using of the medicine .. according to her doctors, **she has taken over 100,000 tablets in 30 years** of learning the T of how to create energies, but not knowing where to send it. Within 4 months the same doctors confirmed there is no epilepsy and there is no need for medication.

CO2 Fields proof of conversion and elevation

So we knew this knowledge of elevation of the conversion of it into the D of physicality from the outset. We saw it in the Raman Spectroscopy of CO2 at Ghent University in Belgium. But how can you tell this to people who have no knowledge and no understanding. This is why the knowledge has always been in front of you.

Energy Transferred through Uvula back of throat - Different shape

I have spoken about this epileptic case many times, now you understand the process. **They concentrate the energy in the center point, what you call the little tongue in the back. In a way, they feed the energy to that, directing it to the, what we call the physicality of the man.** When you want to see, when you see people who create their own epileptic attacks, **ask them one question, open your mouth, the first thing you see is they have a different shape of what you call, (:56). the little tongue in the back, it's hanging, pointing south towards the physicality.**

They Suck on Uvula and imitate Heartbeat

This is where they transfer the energy through. **They suck on it, you hear the most of them create a noise, "cluck, cluck" the same noise as the HB. They manage to create the HB within the structure of the emotion** of themselves, that when it matches into the heart, it goes in to the D of physicality, **then it releases the energy** in process we call, epileptic attack.

By Controlling Energy - Transmute fields through HB

So mankind has been aware of elevating his soul, but he has never managed to bring it inside. You think I want to travel to planet Zeus, but you put that **tablet of energy inside your mouth. Instead of diverting it towards the physicality, you point it towards the STM, but now you have the control of it,** matches the fields, as it is the home for you and **you reach the transmutation of your fields through the HB of the man through the position** and the place where you want to be, pinpoint accuracy.

I want to be where my lover is - Connected through HB

I want to be where my lover is, where my home is and even the bricks of the house, the construction of the house, has the HB of me which is connected to it. The knowledge of transmutation, .. transportation, .. communication to the HB of the man has always been with the man, but man has never understood, as man preferred to walk, the telephone call, and the sight, as the way of communication, (:58). and confirmation of existence of position.

Start creating HB in Iran - Next 30 days

With the new understanding, with **the development of the new T to be able to match the HB, especially when I go back into Iran, within the next 30 days, hopefully, we start this process.** We don't start from the bottom, we achieve at the highest level and let the people to understand, and catch up. We are not going back to the process of teaching another 5 or 10 years to the science of, what we call Gans making. **We go to the direction and D of creating the HB, that gives rapid expansion in the knowledge of the man,** rapid expansion in what we call the T and the ?? of the man.

Window in Reactor allowed us to see Inner Core and Heartbeat

The **whole knowledge of the creation is within us.** We could see this, in the first space reactors we developed in Belgium and then tested in Iran. **We could see the combination of the two fields with the window we created on the reactors.** When you have the opportunity to go to the exhibition, when you see the Iranian reactor. When you see the blue reactor, which was one of the very first reactors we built **we could see the inner core.** You can see the position, how **we could look into the HB of the system.**

Rotating Ball reached maximum - Stopped - and reversed - just like HB

How we could the **fast rotating ball in the clockwise, reaches the maturity of the fields inside, it stops, and then rotates backwards. The same as the HB.**

Able to Measure Point which HB Changes - at that point divert to lift motion

We could measure at what point that HB, (1:00). that change of the reactor will come, that instead of returning back we create lift and motion.

Control Flight by Tuning to Lover's HB - Override Fields of Earth

We tune into the position. When you have a lover, you create a twin system of the HB. This is how we could totally control the flight, if you seen, the smaller reactor in respect to the bigger, without interaction with the field of the planet, because I could create enough field plasma inside one reactor to the other, that allowed us to do.

By Matching HB could direct flight

We were aware of the knowledge of what we call plasma (Pl) and the HB of the Pl from the beginning of time. But now that the KS are aware and understand this, we can expand on the knowledge. In a way, when I used to explain to the KS that ... when we started teaching about, and **we explained to you how one system used to fly in respect to the other, was not just by Gans's, was to create the HB to match, that one could lead to condition and position, to become a lover, or take the position which way to go. This was how we could indicate and preplan which way, in which direction we wanted one reactor to fly in respect to the other.**

In so many ways, the knowledge has always been there, but now you can understand, now we can explain that you can understand. (1:02). In so many ways, **you cannot create flight if you do not comprehend the strength of the fields of the HB of the**

physicality and the STM, be it your machine, .. the planet, .. everything else which you target to become close to, to come close to, to be part of.

HB in Double Core reactors

In so many ways, in the original reactors we always endeavored to understand **the HB through interaction of the 2 reactors**. When you look at the 2 reactors which were built and tested in Tehran, both have a HB, both are double core, if you look at them on the screen you will see. The far distant reactor ... they are both twin systems ...

First Triple Core reactors - Physicality - STP - STM

Later on the smaller one came to have a triple core. in the other system which were first shown in Italy, the energy system was the **first shown 3 cores system which we introduced**. The advancement of the knowledge was so much that we could even go one step further than production of the condition of the **physicality, the STP, and the STM**. When you look at the picture, (1:04). of what we call the past, now we can explain what we teach you has already been in front of you from the beginning of time.

Miniature 3rd Core inside the Soul - copy HB of another position

In so many ways, when you look at the energy system, which we showed originally in Italy ... is a **triple core, which means we created such a small reactor inside the soul, that we could even copy the HB of a planet, the HB of another position in the U.**

Allows to keep STP & STM - create soul of position

The first triple core system gave us **the interaction and indication that we could keep the STP, we could keep the STM, but inside create a D of the soul of a position, that inside the physicality wants to be within, to get, to reach, to be part of**. Now we had the power to understand, **we could work from within inside out, we could create a miniature small D reactor inside the physicality of the system**, which allowed us, not only to change the D of the Physicality, it allowed us to be able to create a new D and position.

Third Core hidden in upcoming EU - Transmute & Transport

This is what you will see in the **upcoming EU. We have hidden within the structure the creation and condition of the third, which man has to decide in how he will use it to elevate** and to bring the condition, (1:06). of **the change of position**, or the energies to create **or transmute from one element to another**, according to the strength and point of the observer.

Creation of Third Dimension - of Position - Strength of Soul of Creator

When you look at **the original reactors** which a lot of people were expecting energy from, it was **tested for creation of the third dimension, D of the position, D of the strength of the STC, D of understanding any matter or element within the D of the existence of man**.

Ability to Introduce Plasma to Create Position

It's the **first time we disclose the understanding of**. But if you go back to where we originally showed this reactor we always explained this is a 3 core center. The outer, the inner, and right on the tip of the system **inside we could add, increase, change, add introduce plasmas which could create the position of D**.

We Could See Aura of Position - Needed for Transmutation Transportation

When we did the tests in the labs **we could see what we call the aura of position** and D. These reactors which in **the coming time will be introduced**, is needed to create the condition for transmutation and transportation, and to be able to convert matters in different D and positions.

Transport STP & STM through the Inner Core

A 3 core reactor is .. inside of inside of inside, where you can change that inside to the position to the strength of the galaxy to the position, of the position on the earth or on moon, and **then transport the STP and the STM within the structure**, (1:08). the center.

Structure of Motion - Create a Third Field with Fields of Physicality & STM

In so many ways, we always had the knowledge. Now you can understand the way it is done, the way it was planned to be, **Now we can explain the structure of the motion, .. creating a third field within the fields of the physicality and the STM**.

Can Create a Soul within structure of STM within its own physicality

You can choose, I can take you within the soul of a stone, as I can create that soul within the structure of the STM in the D of his own physicality, and D of his own soul.

Go within Soul of a Stone - see vision of the soul

Now the knowledge has to become deeper and understood and in the coming time upon **my return to Iran, ... and National Defense University we will show these processes where we let go within the soul of a stone, and explain to all of us what you see in the vision of the soul**, that the rest of us can understand.

Through Center Core of reactor - Take you to Center of Sun, Galaxy or Universe

Now we understand more. we appreciate the knowledge in a deeper way, **we can take you to the center of the sun and you can go to the center of the U, with understanding the strength of the soul within the center core of the reactor**.

This Was Tested in China

We tested this in China, as the KS were not aware of the knowledge. For me to stand back and see and understand how the systems can be used was very clear, **because I**

knew what I was looking for, while they were looking for something else. (1:10).
We were there to produce and deliver something else for the further advancement when the KS are knowledgeable enough to be able to enjoy the time and space and the place.

How Man travels carrying his STM and STP - Manifests 6 arms

Now you understand how the man will travel the depths of the U carrying his soul and carrying his STP that at a given point and D he becomes, he manifests himself in that position in the D of physicality which space and time allows it to. **Maybe with 6 arms and 2 legs.** Now you understand how much the knowledge has been in front of you. Go back into the teaching and look at the energy system which was brought in and shown for the first time in the Insano, when we went to Italy it was part of .. that T.

In so many ways, **nothing has been hidden and everything has been in front**, but as the mankind does not have the knowledge could not see, could not comprehend that the knowledge of the man is far beyond what is far beyond what is on the table .. what mankind could understand. Now we start sharing the knowledge, .. the existence and confirmation.

Put Soul of Atom in 3 Cores - Through the HB reach the Creator

If you understood this, in the coming time **if you can find the soul of an atom, (1:12). that you could put in the center of the 3 cores and you could understand the HB of that stone within the plasma of its structure you can reach the soul, the center of the creation of the totality of the Creator.**

Secret to Transmutation is that you Embed - not Encompass - reach moon

You don't encompass, you embed, and that is the secret of transmutation and transportation in the depth of the U. In a way, you work within and not to cover to be able to go, to move **to reach to moon** and do everything else which the man considered.

Start Spiral from Center - H then C build on top

Always remember what I have drawn for years. **I start the spiral from the center and I go out**, and this is how mankind in the coming time will be able to achieve such a process. **You have to work within, you have to understand your H, it takes the center point, where the C will build on top of it, and so forth.** This is part of the process of the understanding, .. of being able to **create a common ground to build on it to every other element to which you might want to add or create or move to, or convert into.**

You Sit in Center - not carried from outside

You sit in the center not to carry from outside. Man is used to get into planes and cars and to be carried. Where with the work of the Creator, (1:14). the energy moves within to move the body of the man, not to put the man inside to carry the man. Totally different T, .. understanding, .. proposition for man's knowledge expansion in the work of the U. Maybe mankind now understands what it means, I made man in the image of Myself.

I Live within the Center of Everything that Exists

And I am within the center, I live within the center of everything which exists. Now it is the work of the KS to develop this .. the understanding and the **process of conversion, and transmutation from the center of the body .. and not from outside.**

Energies of the Viruses Fed Directly to the Soul

Would there be a time when mankind will use this knowledge to use the .. **energies of the viruses to feed them directly to the soul and to the center point of the creation** that man can become a compact energy transportation that can move anywhere in the U.

Path to Creator Sits within soul of every created thing - Detachment reach lover

The knowledge of the creation is within the created. It's for man to find the knowledge. .. to understand the process. **The path to the Creator sits within the center of the soul of every created thing, even the man. It's man who has to go deeper inside, to become more detached that he can give everything, (1:16). to reach the lover, to the Creator.**

Coils of MaGrav allows you to spiral in to Creator

Then .. you'll understand why even we created even what we call **the coils. Because it allows you to spiral, to become stronger to reach the center, to the Creator. One day mankind will understand, the development of .. the coils which you use in MaGrav systems,** what knowledge was given to man, and man through the greed of the few light bulbs missed the light of the Creator. In time man will come to understand the totality of the knowledge. Our greed for a visual seeing, allowed us to miss the light of the Creator, with the same mission.

Detachment is Strength - Attachment becomes demise

But in time as we become knowledgeable, man will overcome these weaknesses. Of **detachment become the process of his strength, and attachment becomes his demise, be it the love, be it the physicality of a car, or a lover.**

In so many ways, **the knowledge of the creation sits within the STM, it's for man to find that knowledge, to understand the power and the strength of the HB** of that energy center within itself that it leads to its creation.

Heartbeat of Soul of Creator is within Himself

In so many ways, **we listened to the HB of the man,** physical condition. Now we listen to the **HB of the STM** and man graduates to understand totality, then man, (1:18). then mankind will listen to the **HB of the Creator within himself.** Then you understand what I have said for such a long time. That **it takes 1 second to reach to the level of the Creator,** to be with the Creator, as its HB is within the STM.

In so many ways, it controls the man, it teaches the man through his soul directly from inside, and not from outside. In so many ways, mankind will become very wise to understanding of the totality. **When you look at this reactor you see the progress in understanding.** The reactor on the corner this is the reactor with the 3 (cores), this reactor has 2, and this has 1. The reactor has 2, and this 2, this reactor is the same if you look. All the knowledge has been there from the beginning. When you look at this system. .. what do you see? (1:20). 1, 2, 3 motors. When you look at this system. ... (long silence) .. if you expand it you will see rings.

We Measured Strength of Plasma and Heartbeat of System

You will see the expansion of the rings. Each ring ?? links to one position in the center of ... your systems. **One measures feeds, or allows the elevation of the center where the position of the planet to be the soul of the Creator, to be controlled.** The knowledge has been there from the beginning, but now we can explain. **We could measure the strength of the PI in the center of the reactor. (1:22). We could even measure the HB of the system.**

So much Knowledge of Creator in Systems - Now can Explain

When we put these systems in front of you, **there is so much knowledge of the creation and the Creator inside it.** But now as **man's knowledge has progressed we can explain.**

Tiny reactor 3 mm Inner core - Travel anywhere HB matches

This far system here, **has a little tiny reactor in the center, it's less than 3 mm diameter, sits inside another system,** and sits inside what you see from outside. You could **make a condition that this system to travel to any point in the depth where the man's HB matches its existence.** Because when you look it's very simple, we created a small reactor which is controlled and fed through a dynamic feed.

Then we have created a second reactor, which again the **soul sits inside this.** (1:24). . where we could **feed this one through a hole here,** and this one through a hole here, and then we created the third core where we could do the same and feed this one here. **We could control the rotation of this one,** .. this one, .. and this one. **But in essence in the center there was one soul, what we call the STC. With it, in interaction with this soul, this field, and this field, we could create a condition of moving the soul of the system,** and the soul of the creation this way.

Can take the STP & STM with us

Then when we interact with this one and this one we move the soul of the physicality, in conjunction with the center. Then at the same time we **still have the connection with the STP and the STM, that we can take both with us, and when we land in a new environment,** wherever it will be.

These are Not Theories

We see instead of the circle system, most probably, a man. **These are not theories**, you have seen the system. it has been in front of you since 2013, when it was shown for the first time in Italy. It's always been in front of you, what you saw the reactors next to each other sits in our office in Austria, in the Shop. (1:26).

We Travel in Space by Tuning to Heartbeat

The history of the space travel sits in front of you, but as you have no knowledge you looked at if it creates lift, if it does this. But in fact, **we tune the HB of every system to be able to be in the D of physicality, in the D of the STM, or in the D of the galaxy, or U, or whatever we need.**

All Elements come out of Center of Spiral - Soul of the Creator

Do you remember in all the teachings, many times, I wrote and I drew this (spiral) and I explained it to you. **If this is CO2, that is the O, this is the C**, and you can go the same way with other materials. But if you look, **the pinpoint of the whole thing, is this, they all have this center in common.** The interaction of the red and the black gives you the green, now you see Cu. The same thing the interaction with you, between the yellow and the black will give you the white for example. You see it. **But it all depends which fields. But in the center they are all the same.** If you reach to this point, you see all these elements as a new element, has one common denominator. And if you **go in the center you see the Soul of the Creator.**

Go Within - Every Cell carries Image of Creator

Man has to go within himself to find himself, to find his Creator. (1:28). Not to look outside where can I find the Creator. In the galaxies and the universes, because **the seed of His essence sits within us. "I made man in the image of Myself." Because I sit within the man. Every cell of the man carries my image**, not only the physicality of the man with 2 arms and 2 legs.

STM is Built on Top of Soul of Creator

I even sit within the STM itself, as his **soul is built on top and above my soul.**

STP Entraps the STM who Entraps the STC

We always said the **STP has created the physical D to entrap the STM, but the same is true, the STM has created that entrapment to keep the STC within it. One thief has become the thief of the other.** One prisoner, has become the prisoner of the other.

Connect inside with Creator - He creates our wishes

Then you understand the process of T&T and every communication, **go within you, understand the strength of the communication with your Creator, and He will respond, because he has access to creator, has the D to create whatever that wish of the man has been.**

Through Detachment you reach the Source

The more you wear the less chances of getting to the body of the man. The less you are detached. **The more you are detached** and the less you wear, **it's easier to reach the physicality to give directly from the source. (1:30). There are no armors to keep the man away from the STC, except the greed of the man in the D of physicality.** It's the man who wears that armor, and not the Creator hiding himself inside it.

Understand Heartbeat - become the taker of Soul of Creator

Try to **understand the process of the HB of every element, and in that HB become the position that is the giver, then when it collapses to become the taker from the D of the STC, you come close for it to exist.**

Through Devotion and Detachment you become part of Creator - to create yourself

There is a point of determine, as you have seen, as you go to the maximum alkaline you become acidic. **If you reach the point of devotion and detachment you'll, become part of the Creator as being the created, you'll become the creator of. This is how we create our children. this is how we create the soul of our children.** Then the whole thing has a new meaning. We give everything we have to create, that, that creation becomes part of the essence of our ?? created.

Replicate it through Fields of Gans's to create Heartbeat

In so many ways, the knowledge of the creation T&T of every fields of the U become understandable and **we can replicate** it, because now we have access to what we call, not the physical strength, **but we have access to the field strength given to us by the Gans's** we have created. In a way, **mankind has to learn how to use the field strength of the Gans's that in interaction creates the HB needed, (1:32). that with it allows the man to transmute, transport and everything else in the U.**

Interaction of Fields of Gans creates Heartbeat

Now you understand why for past months **I keep on telling you work with the fields not with the Gans's, because with the interaction of the fields you can create that HB, .. you can create T&T conversion from one to another, position from one place to another.**

New Enhancement Units will be so advanced - Creates HB of every cell

Now you understand why we tell you **the new EU are so advanced, because the new EU have taken all this into consideration, it creates with condition of creation of the HB of every cell within the body of the man, every element** within the structure of the body .. or the combination of interaction of the fields, which can field interact with every cell of the man, **but still it has a soul.**

Your Soul allows the fields to interact to overcome the cancer

It's your soul which allows that field to interact to overcome the cancer, overcome the depression, because you are still within that structure of that ?? spine (spiral) of the fields of the creation, even though you are getting fed from outside by the system. You decide if you want to match it to receive. It's you decide if you don't want to match, and not to receive and hold onto what you have.

We create our own cancers - Interaction of fields of emotion with physicality

We create our own cancers, we create our own creation. **Cancer within the body of the man is not an alien, it's the creation of us. It's the creation of the interaction of the fields of our emotion with the interaction of the fields of our physicality.** (1:34).

Cancer is the weight - the Emotion is the Mass

You remember the difference in the Book 1 between the weight and the mass. **Cancer is the weight, and the emotion of the man is the mass. What we carry as a base in interaction with the fields of our body creates that condition of the weight, of the element of what it to be, you call it cancer.**

Fields of our Emotion Interact with Physicality - Creates Diseases

Look within you, you'll find the answer, to every disease in man. Because it's interaction of the fields of our emotion and physicality which leads to the creation of that problem. Be it the **cutting of the neural system that creates you Alzheimer's.** Being engagement of the physicality, be it to become everything else we want to be, from Parkinson's to MS, to ILS, to every creation of cancer in the body.. We can change it, we can introduce D of and directions. We find the reason for it, we will create it.

Mr. Keshe's Hay Fever - Life was Not Happy - Cancer in Pancreas

Many of you .. I suffered from hay fever for years, but I had no reason to, the life was not there to be happy, to be living, and there was no reason to remedy. But now I have a reason, I love to live to be able to teach and create and help the Mitra. When I was poisoned as many of you know, my pancreas was damaged ?? by cancer.

Be with Mitra - Show Love of Creator

For the first time .. being, wanting to create, wanting to get rid of all this, (1:36). for years. **I set out in the past few weeks to get rid of it, because I want to be with Mitra, I want to show the love of the Creator.**

Cancer Gone with One Move - corrected himself with technology

Now with one move I have no more side effect of the cancer within my body. Because if I could eat one berry I could see the whole pancreas collapse. Now I tested myself last week, I eat a bowl of every kind of berry which could trigger my pancreas, no sign.

We Need Reason to Live - Strength of emotion Brings Change

We need a reason to live, to accept the change and then with that, the strength of the emotion we can bring that change. And the tools of it is given to you in every way through the production of the fields, where you have been **given the tools with what you have, you call Gans's, which came from the creation of the matter on a lower level.**

In a way, with the knowledge of the PI we are elevating you to understand more and more, a higher strength position from Matter state to Nano, N to Gans, and now the fields. In the coming time to ?? fields of the PI to ?? creation and Creator. But the man needs to take patience .. I made the first reactors which you have seen , the first time 20 years ago. **Because I knew I have to prove it in a scientific way. When I bought the first centrifuge to create the conditions of separation of the first elements to be able to create the plasma.** (1:38).

In 2003, the target is where we are today. **We have all the knowledge but it is hidden within, and we decide when to manifest it.** Be it the knowledge of the creation, be it the knowledge of reaching the Creator, be it the knowledge of producing anything we want, or position where we want. Now you have knowledge, .. been given the possibility to be able to understand more of.

From now on depending on your own intelligence, your own understanding. Look within, now you understand. Within you, you will find the Creator. In so many ways, now those of you who have been so busy with building the double core reactors, get busy with bringing 3, but understand the process. The limitation of PI, .. creation of the PI is a limitation of you to what you can convert, to what you can go, and how deeper you can go to reach the Creator and His knowledge.

Because once you move within, you become enlightened with the presence of the others, even the Creator. But don't look in the D of the physicality but look in the D of what we call the STM. Maybe the knowledge now, (1:40). has a new meaning. .. a new understanding. Maybe mankind will be able to understand more of itself and himself.

Maybe one day the KS collectively will reach the total understanding of the creation, that collectively mankind will move to **understand their own created, and their own creation, and will be no need for intermediaries as religion, because we learn the correct conduct,** .. the principle of the existence, and with it we set outside, or in a way, we set ourselves not to sit outside, but to be part of, be it using a Cup, .. air filter, .. whatever, we have chosen in the D of the light of the man. In so many ways, from the Cup to .. creation we can choose.

We are that Cup and we decide what's in it, what goes in it, and who we allow to drink from it, be it our lover, be it our physicality, be it our soul. The physicality of the Cup is irrelevant. The understanding of the interaction of the fields which is created within the Cup is the essence of the creation. (1::42). One Cup One Life, that's all it ?? means, the totality of existence lives within that Cup, it's you who has to find the Cup, and find out what kind of fields are within this Cup. That Cup being the physicality of the man, and the water within it, the liquid within it, be it the essence of the creation of the man itself. You create a cancer in the Cup, or you create the elevation in the D of reaching the Creator.

Now man has the opportunity and ability to choose. With the knowledge we give, we create that condition for man to choose. Now you understand why I always said, the heart of the man not the physical heart, which creator of the HB is the temple of the man, and man should never bow, bend to no structure, to no man, to no created thing, except the soul for himself. How much that soul allows the physicality to understand more of the creation.

The temple of the man is within the heart of his soul, not within the buildings, churches, and mosques, which man has made himself to become a prisoner of, then he can be controlled. The Messengers came to open the door for the teaching of today, and it is for man to understand he is the prophet of himself, and it is him who will profit by his own understanding.

Now you understand why there is no more punishment, (1:44). because it is you who decides to which level you go and how you punish yourself not to understand, and then there is no heaven and no hell, as it is you who decides how closer you want to get to that center or how far you want to be from it, because all is within you and understanding of the its totality.

Thank you for today we go for commercial break .. and we'll see how the greed of the man brings what questions to understand more. about the conduct and the life of the man. (1:45).

>> **BREAK** >> 382 KSW (1:48).

K- .. it's interesting when you teach this way, your physicality is aware of the presence of a soul, and it goes through the emotion, and it is not easy to watch within oneself what exists and what is hidden to share soul condition. (1:50). And it's beautiful to see you are an observer to a process, which is the sharing of a knowledge which sits within the hidden knowledge of the Creator. And it is amazing to see what will come out of such a pure sharing of the knowledge and knowledge of the Creator, so pure. What will mankind and the rest of the creation will make out of it. and what path they take to see its beauty. It truly makes you cry.

Any question.

R: Thank you Mr. Keshe ...
(1:52).

Q: Salomea, .. how can the KF using PI science cooperate to climate change ... ?
K- The KF is not the only F but we have the T which we already captured the CO2 .. it's just that how much is the CO2 an excuse for global warming
(1:54).

The CO2 is worse with electric cars ...
(1:56).

(2:00).

(2:16).

Cryptocurrency is the start of

(2:18).

When we launched Keshe Coin . the European Central Bank objected ... they accepted the Coin within the structure of the KF.

We don't give speculation to it .

(2:20).

Q: .. they are trying to perpetuate the system of control ... (2:22).

K- Look at you, outside the window where you sit, you might see a bird flying .. does any of them carry a bank card, or pay for food they eat. (2:24). How humanity got to this point baffles me ..

Q: This PCR test you can find anything you want.

K-

(2:26). In a very short time .. the T of KF is 100% perfect for any virus ..

(2:28).

(2:40).

K- You know you said the best of .. we are bringing teams to

(2:42).

Best selling books on Internet ...

.. I have found peace, that has brought me opening of the T in new ways ...

Any other questions . (2:44).

K- There is something interesting Germany .. workshops about KF ..

You are charging 130 Euros, for weekend registration. I know you are listening. You need to get a permission from me to use my name in the conference and then we have to know what you are doing .. July and August. I don't like to see my name used the way you are using it. But it is nice to see you are trying to spread the knowledge. But advice us what you are doing .. but don't go out and use my name and pictures ...

(2:46).

Any other questions.

Q: What is the relationship of individual human beings and the energy of the planet, how can we interact to eliminate the evil to the evolution?

K- The answer to both of them is, nothing to do with each other and it is just a state of Next question.

Q: .. is this like matching your HB to the HB of the place you want to reach in order to get there? (2:48).

K- That's what the idea is.

Q: Can this HB be displayed in numbers like GPS ..

K- (laughs) I was waiting for that

Q: is it just a concept something that we just ???

R: ..

K- You ... song return to the sender there is no such address.... Have you had a dream about your mother ... and you went there during your dream . if you have Did you ask the GPS to be in the soul of that place .

(2:50). The GPS is in the will of the man, the structure and need of the man. So next time when you ask .. where and which dream you saw your mother 30 years ago. there is no GPS , it's the will of the man ... souls know exactly where everything is.

Any other question.

R: .. the idea of darkness we rely on the light rays hitting our eyes to judge where we are .. (2:52). ...

What is it, it seems the less distractions we have

K- Have you ever played the game .. you touch a person to say who they are, their face

..

(2:54). it's touching the physicality. When you touch the stove you don't feel if it is happy or not ... when you see through the soul you see the real happiness Man will do this. Like what I said last week with the whiteboard ... Man has been too blind to the existence of his soul. .

(2:56).

(3:02).

Any other question.

Q: a Gans we create from the field for example C.

K- What ??

R: ...

K- Can you repeat ..

(3:04).

K- We always get new materials form different interactions from different fields ..

(3:06).

It took 10 years to make the first CO2

(3:08).

Next question

Q: .. the drawing of the splitting of the universe ..

K- I don't know is it.

R: what about the soul of the leaf. would that be at the center of the leaf or the tip .
K- it is constructed in a different way with verticals. It's position with the central being .

Any other question. (3:10). or should we call it a day. I think we taught to deep today , and we enlightened too many people.

K- Thank you for today ..

(3:12).

R: There is one thing to address ...

Q: about calling on the KS from around the world to spray the PI water and generate the dome of peace next Sunday, (3:12). special Zoom meeting.

K- The KS are working to bring the scientists for the KF TV ..
we bring world imminent scientists on KF TV ..

R:

(3:14). (John translates ..)

Q: .. invite all people 6 PM for a special spraying , if everybody can film what they are doing .. then put together for TV channel. ..

The UC together with Spanish group putting forth invitation for next Sunday .. (3:16).

(3:18).

(3:20).

K- there is a small announcement .. (3:22).

(3:24).

(3:26).

Q: we know the immune system by its emotion it creates a HB ..

K- What can you explain again

Q: ... this HB in which category can I put it ...

K- it's from the physicality immune is protecting the physicality ..

(3:28).

Q: KF store have new plant food .. how to use it ..

K- There is an instruction goes with thee now ...

(3:30).

(3:32).

R: Would these products be useful on a trip to space let's say for astronauts that went in the physicality for a couple of years to eat ..

K- I give you a small insight. Our plan is to create a flight condition by June 2022 .. to create interaction between Chinese, Iranian and American space agencies sometime in Sept Oct. as we have the T advanced... first flight round about June of next year. if we can achieve it in cooperation with a government it will be much better. We have a target ..

(3:34).

(3:38).

(3:40).

Thank you ..

R: .. 382 KSW (3:42).

END
