

# 383rd Knowledge Seekers Workshop; June 3, 2021

## ENGLISH TRANSCRIPTION

(:16). Hi Rick you dropped off ..

(internet issues ..

there are a number of announcements I have to make that are important for us. (:18).  
Next Thursday teaching at 7 PM CET. The teaching will carry on the same way ..  
scientific progress of the KF. As you are aware KF has acquired new position for KF  
Studios and the operation of the .. exhibition of the KF T on a long term permanent  
position. We are looking for competent people fluent in German to work ..

(:20). We have now a permanent position .

What we planned with the KF TV interviews with imminent scientists will go online.  
Which means if you know scientists and politicians ..  
We are still on target ..

(:22). this is fine tuning with groups that have already tested the T ..

In the teaching of past few weeks we have brought a new dimension (D) into the  
teaching. We have brought the knowledge to be understood to be part of the process  
and operation of the STM. In the recent past many of KS have found themselves in a  
two track layer, what happened with the Gans's and the rest. The discussion we had with  
the Italian community, .. the people who have come recently they don't know about the  
Gans making but they want to go to the soul and to the other teaching and other  
understanding. .. KF is a spaceship institute, so we have people who are in a first class,  
people in a second and we have people who think they have understood more and they  
are on different levels. We have to accommodate all the knowledge that people take  
from it what they understand and what they know and what they can teach. We have  
teachers who are teaching very different aspects of the F Nano coating, and there are  
those intellectuals who have grasped into it, they understand it, and they want to carry  
on with that side, without making the Nano coating and the Gans's. This is how it will  
be. Development of the T doesn't depend if you can make N coating and Gans's. It's  
understanding interaction of the fields, understanding the process of the creation,  
understanding how mankind becomes to be so. How we will interact in the depth of the  
U with other creatures of Creator. (:24). It is important for us to understand the  
knowledge and not to block the others. If we have new intellect, as long as we are in the  
framework of the KF, because we see a lot of people coming in and then taking it into  
their own, whatever they thought. We bring the T in that we all can understand. Teach  
it, understand it, and if you have become a student try to accept the understanding of the  
others. We have to accommodate. This T is .. very diverse, it touches every D of the  
creation and Creator. No one can say it has to be one way or the other. As I said, every  
change, slight change, creates one solar system. Slight change creates the same thing. If  
all the stars and planetary systems .. and universes had exact same characteristics, they  
would have merged, or they would have locked into totality as one. So we are all  
different, and the knowledge is gained by every one of us has to be applied in that way.  
This is important for you as KS to keep an open eye, do not become stuck in the ?? of

the past it's been set, it's in the book it has to be. What is written in your book, .. in your knowledge, and what does your knowledge in addition to what you learned from the KF adds to the totality and share it. In this process we have to be able to be flexible, .. as long as we don't come into to pull the whole T to another part which they think they want to push it, which goes back to all the problems of the past. (:26). We (on) track, we try to concentrate on understanding of the totality. The knowledge of the PI T, of the KF belongs to all of us, and it has to have a diversity in understanding diversity in T, .. in teaching, that we cover collectively all aspects fo the knowledge.

In the present teaching we have endeavored to bring, show and .. connect different part of the work of the body .. with the central control, which we were not aware, we used to call whatever, the whoever came up with, the soul and the rest of it. We have seen .. a lot of things taking shape.

A lot of KF knowledge and T has become the Knowledge in public in different ways. As many of you know we just recently have understood that one of television channels has created a program about the black hole, and what we said in the original ?? KF, that the black holes create radiation fields and they emit fields and radiation, they have called it a "Hawkins" radiation. So we again scientists have taken what was by one scientists and added to something else, what has been in the KF papers of the creation of black hole, now has become attached to somebody else. This does not matter. As long as the people understand it, is the matter, is important. How we can create it, how we added. Steven Hawkins, the rest of his life, the beginning of finding out the KF, the first paper of creation of black hole, spent all his life listening to the teaching fo KF, (:28). and setting his life, step by step trying to , what we explained here, to make it to his tune, that he has come up with something new. He failed miserably. If you listen to his teachings he never managed to come up with anything new. Go back on the last years of Steven Hawkins, you will listen to the KF teaching, because he was literally mesmerized that how he could not accept that such a thing, he could be somebody else's. This is normal with .. You have to understand how these people are born, and how they are kept by the government. In the Second World War Americans had Einstein. British wanted a match, there was nobody better than Steven Hawkins he could not say anything, they could attach anything to him. In a way, he is a fake scientist. In that process if you listen to all his work, even if you go and check, we said in the teachings of the KF, when we launched the third book known as the creation of, creation of universal matter, and the Origin of the Universe. He gave lectures titled, "Origin of Universe," immediately after the publication of the book. You got to understand, we have to allow these scientists who are in that position to be involved, to bring the knowledge, and in the future things will be put right. We are entitled to teach. We are not entitled to stop. Try to understand the T if you are people of influence in certain fields, try to explain it, at least the correct way that it could be understood. In so many ways, try understand the T from space, .. be open enough to accept every aspects of it. I have see, and I hear, (:30). a lot of old KS insulting and using different language that, "the new ones don't even know how to make Gans's and they are teaching," this and that. They don't need to. Just because you use a mobile phone does not mean you know how the circuitry is made, and what it is made of. Knowing how to use that telephone to expand the knowledge to the others is important, as for some people how to manufacture it is important. SO I would like to resolve this matter, because we see it coming up across Brazil, in Italian , Iranian, in Chinese KF. The old guard want to stick to N coating and Gans making and that's it. This cannot be. It's my responsibility to

enlighten you all to come to this point, to understand it. We saw how Brazil KF disintegrated when the old guard said, we did so much, make things, now it is there. You laid the ground, you help the others to build on it, and at the same time with more ?? rows for others to come up with the T. And we see the same thing in Italy .. Iran after 3 years they think they are in charge of everything. This will not happen. KF is going on a massive teachings in the coming weeks and we'll get people who listen to the teachings and jump to the end part. In the beginning and they serve better and bring the knowledge more. It's the responsibility of all of us to look at the T with open eye, accept all aspects fo development in it. We've seen people making a lot of claims, that, "oh, we taught Mr. Keshe and w did this and that." Let it be, as long as they can teach correctly. It doesn't matter. The totality is to understand the interaction of the fields of the PI

## Teaching Starts

(:32). In the knowledge and the extension of what we have been teaching for the past few months. We talked about .. the STM. We talked about the understanding of the totality in respect to the soul and physicality and interaction with the fields of the creation, be it the planet earth. reactors in what we call, development of the energy in the 3 cores and with 2 cores, and singles cores, each one has its own beauty. Each one has its purpose. The knowledge of the creation of the physicality of the man, .. of the tree, plant, stone, follows the same procedure. It's just we, or how the soul of the entity decides to manifest itself. The mankind in the coming time will have the capability and ability to control its position and its possession. What can be its position and what would it like to possess within the interaction of the fields of the D of physicality and the STM. The star of its creation. If you turn the whole thing inside out you will have the physicality of the man. If you turn the whole thing inside out again, you have the STM. It's our responsibility to understand this process. .. to be able, that we are not chameleons, we are knowledgeable to understand the process of which one can move where. How can we manipulate the field forces through the strength of our own soul, our own energies. (:34). Nobody else can, it is this solar system because of the sun creates so many planets and so many moons. Another star does not create anything, it would like to be on its own, we see no planetary system with it. And then we have to understand how the planetary system are created. As we said in the original teachings .. we are dependent and we are part of the same process. If you look at what we call a planetary system or galaxy, or ... any shape or form, whatever size you take. We decide, or the planetary system decides at that position how it and what it might have. As you go to the center of the U we see different kind of lights. .. and galaxy .. , .. solar systems we again different kind of lights, depending on strength of, .. on GM field emission, and accommodating each other. In the center of the galaxies we see a tighter pack of galaxies, the same in the center of the galaxies we see tighter pack with solar systems, we do the same in our solar system, we see a tighter pack closer to the center. and how the fields increase or decrease dictate the condition of planetary and then the same the moon. The same thing happens in galaxies, .. U. (:36). and on this direction the same will happen in the Unicose and same thing will happen in the body of the man. This then for the first time for mankind it's important to understand how this works. At a outer boundary of the solar system a little bit away from the sun accommodates the facilitates life as we see it on earth. The same is in the galaxies, at the boundaries of the galaxies, we see physical lives more or less the way we see it. even though life in different shape or form exists in all of it. Then the same the lives in the center of U exists but allows different structures of life. But with the present knowledge as this

becomes to the man, man has the knowledge now to manifest himself at any point. Depends if you allow the STP to overtake the physicality of the man. Or you allow as we see today, our soul to be encapsulated by the physicality. The whole teaching by present time is the transition between these two. How you allow your soul strength to change to a position that it can overtake the physicality, the physicality is protected by the energies, then in this way we become the passengers of the U, .. those who now be able to travel all D. If we stay with the physical D we have what is today, the physical cars, and transportation, (:38). the physical manifestation. The whole teaching how to live this dual field forces. When you understand this you have different structure and manifestation in different parts of the U. In a way, you cannot manifest here in the same physical shape as here, and in the same physical shape as here. Those who live in the boundary of the galaxy, yes, they manifest yourself, as themselves, as we see in a galaxy and on a solar system. The field pressure, the strength pressure will not allow us to have the long arms, and long legs and the eyes and the rest fo it, because we need different understanding, different field strength position. So when we travel with the STM, when we manage to grasp the understanding and be able to create a position of the vice versa between the two, then we can travel the span of U in no time. But the whole dilemma for mankind is how to understand this process. How to be able to move from the STM to the physicality, and then when you manage to manifest yourselves in physical entity, then convert yourself and use the D of the soul and with different strength. (:40). In a way, going into the inner sanctums of the field strength of the man, decide where you want to manifest yourself. But the process will be the same, you still will absorb energy from the U, you still have to give energy back, what you don't need. You still have to find a position, .. communicate. In a physical D, we walk, we talk, we manifest ourselves in different positions on this planet. We get on a plane we put our physicality into something and we manifest ourselves in New York, Tehran or London. But physicality hasn't changed, it's still there, but we didn't have hidden it inside aircraft, we have put it on a ship, now we have capability, that that ship, aircraft present new knowledge becomes our soul. this is why it's so hard for many of you to grasp and understand. You are happy to get on a plane and few hours later get off in Tehran and land in London, you have traveled, you put the physicality in another physicality with a higher speed than you can do. Now the teaching is how we put you in that position. You decide the aircraft, .. the craft that will take you through the strength of what you control. You never been trained to be a captain of a plane, now you want to captain your own soul. This is where we try to open your eyes, .. give you the option. The teaching in how to travel with the UFO, (:42). and the flying objects is there. Now we teach you how you can become the captain of your own soul. Your own Messiah. I see in a lot of places writing, "Mr. Messiah." Yes, I am the Messiah, as much as you are the Messiah. Abuse of the terminology by those who are so weak is the way they confirm their existence. Many of you in the coming time will be able to do this. Then in that process of the conversion you will see the light of the Creator, the knowledge of the Creator, and the deeper you go in that direction the more you understand. Then you understand you are Messiah, your own .. captain. How many more passengers can you carry with you, or how many can join you in that trip. How many people can you enlighten that when you reach to this destination in the center of the galaxy, there is somebody to share the knowledge with, to confirm your existence that they come from the position from the time where you have been that you can talk about it. That you can develop more, at the same time bring other passengers of the U with you. We used to get on a bus and we didn't know who sits next to us, but we all ending up at the same destination. With the teaching of understanding of the STM, now we can travel alone,

but at the same time when we understand the strength of the soul, there will be others who will travel with us. We don't know where they came from, but their destination point probably be?/ This is part of the T we have to understand, (:44). to get rid of all the problems we have with KS and others to understand the T. None of us was born out of the womb of our mother as a driver, pilot, train director and the rest of it. We train ourselves to become a pilot. We train ourselves how to drive, .. run. Now we have to train ourselves how our soul operates. It's a new vehicle which we are captain of, and we were born with it. it's part of us from the point of inception, because its inception created us. Now for KS is the choice to understand which vehicle you would like to use. (:46).

there are no schools, you will make a lot of mistakes .. a lot of good things, end up in places you never thought existed. But now we have to be able to understand the new processes of creation, the switching, the elevation of the soul to overtake the physicality, and the soul to become physical.

There are chances in the future most probably many of you will come to understand that you became a soul. In another position, the same strength field and environment change your soul to physicality. You did not, you still wanted to be in the position and the strength of the soul as you thought you were still on earth, in the position of the galaxies and the environment of this U. but in another U due to field strength of the environment you materialize at the same soul strength. Then what can you do except if you had the knowledge of the Creation, you go further in the strength that you keep the STM in control to be the soul. You have to learn when to change gear, .. how to change gear, .. what position what strength, (:48). puts you where. There is no school in the U for this job. We don't have universities, but the whole knowledge of it, the whole knowledge of the creation and the position, sits within the structure of the STM, enlightenment, understanding and in trial and error to bring everything in the position to be.

Mankind needs to understand how to convert. you don't become a chameleon you become knowledgeable in the life and the ways of the existence in the U. This is my job as someone who knows and understands and has been down this path for millions of years to share the knowledge in the voice and language of the man in the strength and the soul fo the U. This is your job to decide and in that conversion between the soul and physicality everything happens. If you extend the soul ?? wave field strength through the body physicality might change, you might not need anything that you thought you need. As I said .. is when you put 2 magnets next to each other you see them creating their own distance, .. own positioning, .. condition for existence in the interaction of their fields, but how many of you have seen liver, kidney, eyes and everything else in any of the magnets. But they receive fields from each other, .. from the environment, so where they are, in depending where they come in, and where they might go, (:50). in one shape or form, but they process the energy fields transaction. This is what will happen to the STM. This is why if you look in all my work in majority of the time, when I show you magnets. I always use a hollow system, because it has a lot of similarity to the hollow STM and the hollow physicality .. But none of it has the heartbeat (HB) to be there, but still carries a HB. It doesn't have an eye, but .. but it positions itself. If 2 pieces of metal can understand this, get rid of the fields they don't like, position themselves in respect to the field of the man, what is wrong with mankind that doesn't understand this simplicity, but he can do the same with the strength of his soul. you don't need to walk, to walk away from someone, you understand the field

strength of it, and you position yourself. This is what the new knowledge brings for mankind. .. what we try to explain then you understand. Walking you can do. You still can have the legs and the arms, but if you understand how to operate through the STM, you are no different than a magnet, .. a star, .. galaxy, and the solar system. This is what the new T , knowledge should bring to man. At the same time you have the control of. the brain of the man stays in position of the brain or what you call control, but does not necessarily, (:52). will be as you see as the white stuff in the skull of the man. It will interact and create the conditions of existence. We know this because when the souls come together interaction of them leads to creation of the brain. Brain is made of interaction of the fields. So when we have a stronger fields brain can .. still operate, but now it operates in ?? no D of physicality and then you travel the span of the U, not being afraid fo what environment I might enter to, and what .. I might change to because you manifest in the field strength as a drop of rain in a given environment, and in the same environment in a given strength in a different strength you become the snow. and in a different strength you become the water, and a different strength you become a mist, but in totality you are the same. Mankind in the coming time will face this as you travel the spans of the U, different strength of universe, different position and condition of the fields in the Unicos. Is in the writing it says, we test the fire (gold) with gold (fire) and then we test the man how he is made, by putting gold in front of him. A man should be from the fire to the gold to the man, all the same. Because he knows how to change the strength of his interaction with his environment. We a fire, when there is a fire, we become part of it. We become gold as we understand the strength of the gold, (:54). to become gold. And become a man as we become, understand the physicality of the man, but in essence the fire, the gold, and the man are mad of the same. It's us who decides the place, position time and the strength.

In so many ways, mankind has to become alert to his own existence in tow D of the soul and energy. In the D of physicality and existence, in the D of observation, and in the D of he can confirm his existence. It's us who has to decide I want to stay as a field and energy as a Pl, and not to take shape, or I want to take shape at this point to see how it feels. Would it be the same if I sit in the sun on another planet in another galaxy. .. if I sit in the sun of earth in our solar system our galaxy. Would I feel the same warmth, feel the same beauty of the air. Or is it different in other place position and solar system. Now man has the luxury to do this if he understands. It cannot be bought from a factory, it will not be produced in the Chinese manufacturing with the different understanding and the same thing to be manufactured in another part of the world. We do not have machinery for it. The machinery and the understanding comes from the understanding of the inner knowledge of the creation, enlightenment. (:56). I cannot tell you, KF tomorrow sells you a machine that can take your soul to the position. We can do, we have the knowledge, But how are you going to come back, because on the other end there is no machine to send you back except your soul. The old song, return to sender, there is no such address. But there is no one to return to the sender, because there is no postman on the other end except your soul, except the knowledge of understanding of totality. The transformation between the energies and in respect to the Inertia of the position, time, and the place.

We don't teach ethics, we teach the knowledge of the creation. In the coming time many clergy will have a problem with this. Especially on my return to Iran, we will see this. Opposition to the KF will come from within the clergy of Iran, .. the Vatican, and other religions. because they understand monopoly of the soul sits with the man and not the

book and another abuse. We are prepared for this. We are prepared to teach the totality and KS have to understand this, that the time will come that the clergy's will put their hats down, and they will start teaching the ethics of the true understanding of the creation and they become enlightened.

But how do you change the physical man into the D of the soul, D of the fields? You have 2 choices, or maybe 3, (:58). or if you are very knowledgeable maybe 4. As you explained to you .. you enhance the body .. to take a new D, and a new ?? possession, and then reconstruct the physicality. I am going to come back that artist that knows nothing about painting and I give you the lips and the eye (draws a head). The STM has taken its position (in center of head). The Soul is aware fo the environment, the gaseous, the solid, and the liquid which he lives. But in the D of the creation he has .. the PI condition too, which is a field strength of the others. These are in the matter state, this (PI) is in a fields state. Somewhere in conjunction with a PI, and any of these Inertia, this PI can take shape of any of the 3. But in essence if we feed the man the right field strength, be it through his digestive system, be it through his nose, we create a balanced situation field, which can be at the strength of the STM. You got to realize 2 points, (1:00). That if you reach this point of being able to feed from what you take from the environment by the law of the PI the energy in what you take must be stronger enough than the STM that can feed the man. That he can elevate his level, that at a certain point reaches the point of elevation, and passes the boundary fo the man, the man become. In the present science and T the doctors tells you the heart .. on average works so many billion times in its life time, then there is no more life. So if you can calculate how many times each heartbeat has created the breathing of the lung, and the food, and how much energy at what level is, you can estimate the time of the saturation fo the STM. That it become strong enough that it can take over the physicality and we call the point of death. IN this process man should be able to understand .. grasp the concept, in this field, in drips in contrast at a higher level, elevates the soul.

Then it comes the question, are we getting, because of the pollution, the air, because of the bad conditions fo the food, weaker and less energies that this does not give enough energy to the soul to be able to create the point of separation. (1:02). So we need to live longer to be able to reach the point of saturation. The transformation that the STM can overtake the .. STM or circulation of the blood which carries the STM in D of field energy. This is what we call technological development. This is what we call the advancement in science that man can live longer, and we have polluted the air, .. the food, has created a weaker source of energies to elevate the STM. SO the soul needs to wait longer to reach that point of saturation, where in the past it could reach much easier. Have the extension of the life of the man, understanding the work of the PI has come through the new T taking the much weaker strength than it needs. SO through this point of interaction we can control the strength of the soul, but we can feed it at one end, but we have to encourage it to expand on the other side, to become physicality. WE showed this in the situation with Naomi. We placed as you call it, the helmet, we showed the soul, it has a new D and direction, and with the interaction of the blood circulation we managed again to place the brain cells back in position, but if we would have pushed the system beyond its boundary, mankind would have seen a new life within the structure, where Naomi could transmute between the two. (1:04). SO in a way, if choose in a helmet a position that can surpass the whole of the soul, the same as our skull, and then we introduce a control of the fields, we should be able to create a condition for the man to be able to expand the STM beyond the physicality.

This is part of the first trainings. In a way, if you have the skull you create a barrier, a system which allows the STM to extend beyond the D of the physicality to the new position, while you are feeding it through a new position. In a way, you are using the brain.. and a position and place to control the extension of the soul. But this cannot be a physical helmet because then you have what you had with Naomi, completion of physicality of the brain but no further. Mankind has to learn that the interaction of these two fields can create a new condition of the fields that goes beyond the physicality of the man and allows the STM to take possession, but still the brain inside has control of thinking and understanding, and in this position the STM and the physicality .. becomes irrelevant in the matter state fo his creation. It could be from AA of this planet, it could be from solid matter of another planet, another position, as long as the field interaction can be controlled and dictated by the STM, and the STP of the entity, man or any entity can travel the span of the U without manifestation. (1:06). to the decision of the point fo the soul fo the physicality and understanding of the brain and the control system. Then you become independent of where you are born, independent of how you are born as long as you can create this condition of understanding of the control of the totality in respect to manifestation of physicality or the STM. If you look, .. understand In so many ways, I gave you this opportunity in the EU. This is why .. sometimes we shall see through the window the light. Where the helmet becomes the structure of the soul of the unit where man sits within and the soul becomes part of the structure of the totality in the center. We allow the soul to expand. This is the purpose of the EU to take you out of the fear. When you want to drive you don't behind, you don't sit in the chair in the living room and pretend you are driving, umm, umm and change the gear. And they go and give you a key and say you can drive. You learned how to boom, boom in the house. You go and sit in the car, you take the car for a drive, you change the gear, you play with the clutch and the brakes. This EU are that car, are that for you to learn how to extend and to expand. This is the true essence of why I introduced the EU, (1:08). and from the beginning I explained to you, sometimes you might see a light. Now you understand the reason, .. the science and T behind it. Because when expand the STM beyond the D the physicality .. , where do you want the cancer to be., or the Fibromyalgia, or MS. The field radiation, going to expansion, to D will eliminate, rectify, and clear all this. Then now you understand why you will not have any disease when you come out of the machine, because now you understand the reason we introduced the EU, the vertical EU, horizontal EU and the rest of it.

We are talking about a T unknown to man. This is the T of U. I am a man of U. I created it and I live within the creation. You have to understand for us now to explain how your soul will extend beyond the physicality is because now we, the reactor system we built we have created that hat, we have created the helmet we gave to Naomi now in the ?? size of the womb of the mother. In a womb of the mother you don't carry a chair, but you still exist. .. we can reach the soul, and in understanding to transmute the STM to the outside. (1:10). and then let it take the shape of physicality as it needs, as it will see itself fit. In the new EU we will use, it is the purpose In a way, as a delivery room for the soul, and then the child when it comes out decides the size, shape, color and what he needs to be loved by the father and the mother and the creation and the Creator. You shall not see all this what we see in delivery rooms, the blood and god knows everything else. But the mother has to have the presence of understanding which way she likes to deliver, in the D of soul or in the D of the physicality. In the U this is how we deliver, mankind has used their own way. You deliver into the physical D into the

environment of the earth. We deliver in the D of soul anywhere in the U. Where the time the place and the position is not important. The presence of both parents, the creator of the life will allow the totality of the life to be decided within the system. This is why we said that once you choose that path there is not adultery, there is no way to do anything, because the system is locked.

Creation of a child through the STM is unique, and it's the way it is in the U. Once that child is created in the soul, (1:12). there is no break in the bond. Anyone who touches it, will receive what you call in the world of the man, a balancing of fields, eye for an eye, tooth for a tooth. This is the principle fo understanding of the new knowledge. That now with the EU. We create this condition and we give birth as in the U, till man goes in the U and uses the whole of the U and Unicoise as an oyster and there is no need for EU.

In a way, you have a delivery room in the hospital, deliver the physicality of the man or choose the use of the fields of the U to give birth in the U, or in the system which replicates its existence. The totality of the knowledge depends on the intellect of the man according to what he understands of his own creation. There are no machines to replicate, there are no systems to be in the back of, or plus to be inside of.

### **Reason for Small Tongue (Uvula)**

If you look in the structure of .. the physicality of the man, many of you might have had a look at your mouth. And what do you see in the back of it? A dangling thing. (1:14). We call it a small tongue. Have you ever understood the reason for this, and why its position directly and immediately below the soul? The position of your bits in the back of you, in the mouth, has a reason. You could be a man, .. animal on 4 legs, always look at the position of the soul and physicality, and then you understand why you stand where you stand. Every animal has a position and a strength of the material in one shape or another which replicates this part (back of throat) in the body .. Even in some animals we see it, not necessarily there, but as a pinpoint facing the soul. But man has never understood. In the worm, in the lizard we see this. In man we see it as a dangling tongue in the back of the throat. Each animal has decided position in respect to itself. We see the same in the vertical people where their soul sits, (1:16). and where the .. extension of the confirmation to physicality will sit itself. This is a knowledge that the scientists of the man have to find out. If you could understand this you can create any animal from interaction of the fields. Be it cow, .. lion, .. a worm. The small tongue, and the shape and the position in the back of the throat of the man, if you, where does it look to? To the center fo gravity fo the earth, where its interaction will create a position , direction, physical condition of the man, where the fields reduce and you become thinner, what ever. This parallel condition we'll teach about in the future. But in most of the animals, this point, in pointing of, has been very cleverly in the shape of a dot. It's a single cell which does the same thing, dictates the shape and flow of the animal. In the position of the stone, sits within itself, directly inside the soul of the stone. That's why we see no movement. (1:18). It's the third condition of the existence in interaction with the Inertia of the physicality plus the, what we call the MaGrav of the environment.

The knowledge of the man has to be at the level that understands the totality of the creation. In so many ways, we try to enlighten you. This is why in teachings of past weeks I explained in a very nice way, soft way, that we introduce material that you put

it in the back of your throat that you control both ways. In a way, by positioning such a position, (1:20). in a given position, as we discussed before, you .. bring that point which is hanging in the back of your mouth to a position which elevates the soul, and disconnects from physicality. Then you can make this here (back of throat) of different strengths and different penetration fields to what strength you want it to be. Now you understand the structure of the teaching. .. how we are taking you slowly to the next step, the science of the creation. When you take the position and you cut the line of the information carry, to the physical end. by placing a new entity order here (back throat) you reverse everything back to the top. (1:22).

In so many ways, mankind has to understand, now has the ability, knowledge and T to be able to create this. As I said, we used to take a tablet of cyanide to enhance the physical part and create the death. Now we take a tablet of the soul of the plasma and we enhance the STM for man to take the same D but in existence, not separation of the STP and STM. One is the sweet tablet of what we call enhancement, and one is the bitter tablet of the death, separation without physicality. The new way, this way we carry the physicality and the STM and STP together, because we sit within the framework of the brain .. at its outset, at the bottom, where all the interaction of the fields of the physicality come into.

In a way, mankind does not need the spine to behave life. Mankind can use even the nerve system through the jaw to do the same. Because In a way, if you look at the jaw of the man it gives you that freedom over the physicality. You can control the whole functionality of the man through his jaw. Movement of arms, legs, heart and digestive system. We have shown this years ago. (1:24). When we brought the first coma patient out, the connection between the neural system of the brain and physicality was distorted. We went through the jaw, we repaired through the fields of the jaw and then we connected the physicality by its own, neural system. Even that time we had a student, one of the doctors with us that his daughter was becoming a scientist, tended to the presence of the volunteer. And in coma, by fingers through the gum, through the jaw, she could dictate to the body what to move. Does not need me to be there, it was done by a young girl. It's understanding the position that the nerves and the neural system of the man is part of the distribution of the STM. In the smaller measure, contained, directed and channeled. This is why we always say, and you always see the neural system and the blood vessels, STP and STM always move along each other in the body.. and interaction of their fields leads, according to their strength and their position to the organs, limbs, and the rest of the man. (1:26). The potential difference in the strength of the G and M dictates the position, shape, and the cell and the operation.

In so many ways, understanding this you understand how we can even extend the amputated toe, foot or the rest of it. As now we make the physical prosthesis and then we let it be there. But if we can create the condition of the nerves and the blood vessels field interaction, the limb of the man which has been amputated can be put back in no time, if we can replicate the 2 in a given way within the structure of the physicality of the man. In the space we will not find man with one leg disappeared and cut, and they'll be in eh space with 1 arm and 2 legs for the rest of their lives. Mankind has a knowledge to replicate. Now understand the purpose fo the neural system and the blood circulation system in the body .. The strength that the HB can pump dictates the position and strength and the shape of the physicality .. because the STM radiates always the same. What comes form the D of .. field of the Inertia of the planet, (1:28). of the field

of the interaction with the MaGrav of the planet dictates if you look Chinese in one place and black in another, and it's part of your AA and memory line, it does not matter where you go you are still looking Chinese. Because your preprogram is setup, is dictated that position. But if I keep you as a Chinese long enough in a position of Africa, you'll become black and African looking, because you came from Africa originally and by change and movement of time and place, and by different tablets you put in your mouth as a food, and different Inertial G field forces of the water and mountains, and the field forces of the air you breathed, it dictated the shape and color of you that you can survive in that position. So it will be the same with the man when you go to the fields of the U. Interaction of the STM, and the STP, and the Inertia of the place and time, and the field strength of the place, MaGrav system will dictate how you will look. If you need any kind of what we call disposal units, liver kidney and the rest.

The process of teaching how to make this tablet for man will come during our work and return back to Tehran. In that process we will teach how man will be able, (1:30). to reach the elevation of the STM. This is why the EU will be move to Iran to show the light of the soul of the man, where Mitra was born. Where she came to earth as a soul, and took the shape of the man in the physical D of Inertia and the G field of the earth. It was ever the first time the whole U could see the manifestation of the Creator as Mitra. A soul ?? arrives, being memorized with the beauty of this planet. One thing to manifest yourself in the D of physicality to enjoy the beauty of it and understanding the love which this environment creates and make it home where the Creator has taken place to be with Mitra. Up to than, Mitra was an energy, a plasma field, on earth she took the shape and physicality fo the position and the time, and the beauty of it, brought the Creator to be as a love needed to be with a lover. Mitra returns back to the point of manifestation of its physicality to complete the cycle in the coming time. Understanding of the elevation of the STM needs the STM to be able to see at the soul level for the physical D. Those of you, (1:32). who elevate to understanding of the possession and the position and the strength of the soul, you shall see Mitra in this D and direction fo the soul. Those of you who still crave to stick to D of physicality the time will come that you will see.

In so many ways, mankind needs to understand the process and progress of interaction of the fields in the D of the STM and the STP. and how man to be the creature and the created from the love of the Creator will manifest himself in any position and D. In time we show you have to create that helmet of energy, .. that tablet, but till then man should have understood how we came to show this.

In a way, if you understood the teaching about Corona as a virus. In a way, you create that virus from inside, that energy pack from inside, that interaction with the energies of cell of the STP leads to the manifestation of physicality to the eye of the observer in the D of field and energy transfer.

In so many ways, if you understood the process and teaching on how PI at the strength of the AA of the man leads to the creation fo the shape of the crown in the, what we call, (1:34). Covid or Corona, then you should understand how to create a soul energized from inside that you release a higher order fields from inside the soul, that it becomes the cover and the connection between the STP and the STM and the manifestation fo the man in the interaction of the environment. In a way, if you could release the energy of Corona from strength within the structure of the STM, you would

have still seen the crown, but this time the energy comes from within than coming from outside to ?? where you have the control. The next time if you change the strength of the fields released by the soul, you might not see the shape we see with Corona, you might see monkeys, shape of mountains, and then we call the new virus, mountains, or something else which we relate the shape to. In a way, we release the PI energy from inside, from a higher order strength, channeled from our own soul where we have the connection and the control. Our job is to teach you how to release that energy to become to be able to transmute between 2 energy fields, the STM or the STP.

In the coming time we have no choice, to teach you to move and extend the knowledge of the man, to the next step, next level. (1:36). The systems for it are in Linz. Many of you when you go to the system you will see the light. It's not that you have died, you have managed to fit and allow the strength of the STM to go beyond the boundary of the physicality and at that switch point you see the light. This is why many people who go and say they went, and tested, they have been through what we call, "crossing over," they have gone inwards in the direction of the soul. and in interaction of the STP and STM has created that light. This is the light of the conversion, and if the STP still has connection to the physicality of this planet you return, but you have made the trip. The light you see, that everything is peaceful is the light where you move from one strength to another and

Many of you will understand this very soon. Many of you will come to comprehend the totality very soon. (1:42). But the stepping stone for man is that man in physicality has to find peace with himself and amongst the others. The end of the war inside the man, when there is end of war amongst the man. When you find peace within and with it you transfer that to the others and create conditions for the other souls to become peaceful.

We go for a commercial break .. we'll answer some questions, depends on your enlightenment, if you are still entangled in the Gans's and Nano coating or if you have understood a little bit more where we can speak of the transmutation of the physical soul of the man, and the STM. Would you like to go to break ..

**BREAK** >>>> (1:50).

K- .. we had multitudes with problems today ..

Q: Saloomea, ... STP have only electromagnetic field, and STM have only G or MG field, (1:52). and related to this, the link between STP and STM ... ?

K- We don't have any electromagnetic field. In a plasma field we work only in field strength. and both STM and STP have both M and G, giving and taking. The STM does not just take. SO each system has its own dual M and G.

Q: .. and electric field how ..

K- Does not exist in the body of the man. We feel, electric shock if you call it, or that kind of thing, but that is at the physical interface with the physical D. We do not have, because electromagnetic is in the matter state, and in the body of man we do not have

matter state, except in the bone structure, and the center of each cell which has a Ca. That is within the structure of the physical matter state, but still in plasmatic condition. Any other question (1:54).

WL: .. today's teaching let me link about Buddhist, different color of light. .. you are telling truth that is not usually disclosed to people.

A book (Tibetan book of dead) when people dying what they can see white light and different kind of light. then you go back to the matter world, which light you see go in different world . became an animal of something else. .

K- Different light comes from understanding our own position and possession and interaction of the fields of our soul in respect to the emotion. IN the physical world we talk about happiness, sadness, everything else. In the D of soul we see happiness as a color. (1:56).

(2:22).

Cup 2 .. Cu use AA

(2:26).

Q: Corona swab testing in back of throat

(2:28).

K- .. there is a lot of pushes in the present testing to put the swab in your nose or the back of your throat. Officially lot of governments. .. they can do back of throat, they don't need to go into nose every time they want to do the test. some people say very painful ..

Q: changing the position of tongue towards the soul

K- What does that mean? (2:30).

R: I don't know ..

Q: vocal cords vibrates due to soul, or tongue position or emotion. ?

K- Combination of. combination.

Q: .. ring formed around earth completed in 2020 . what is it made of why was it created?

K- We talk about this in depth in the coming time. We are setting the conditions of the change of the soul of the planet. In what has been the short fall, and what has not managed to transfer the energies to its inhabitants, that has brought this present situation. (2:32).

Q: .. teaching someone ethics. Is telling someone to follow the 24 Commandments, ethics, if not then what is?

K- In a way, yes, In a way, it sets up all you need, if you understand it. Because the ethics of the 24 Commandments is the ethic of the STM translated in D of physicality. So it does not need to be anything else.

Any other question?

Q: .. video of successful fertilization of an egg .. (2:34).

At the moment of fertilization related to Zn

K- It's the level of the emotion of the STM. Don't forget Zn is one of the encapsulators of the soul. You have the Z, that's why we use a lot of Zn in what we have, the brain damages. because it's part of its constituent of the physical structure.

R: billions of sparks of light.

Q: Kay, ... ?? if you hold the uvula back towards the soul (2:36).

stuck at back of throat pointing it backwards ... for expansion. ?

K- This is used quite a bit by what we call, understanding of it. We can use .. the small tongue, how to divert and control energies. We have seen that and we explained that in the case of most of the people who create epileptic attacks. How they channel the energies form the brain ..

Any other question.

(2:38).

Q: Alzar, if we cock everybody tongue .. sounds of creation. When you create these sounds and use rapid breathing , change of direction soul because my ?? tells me , I .. is this a way to open the gate that the soul can take over the physicality combination with sound and rapid breathing I am trying to figure out if I am in the right direction?

K- I am going to answer you in a very strange way, correct way .. I don't think anyone of us, or very few of us has seen as many, (2:40) of a "small tongue" (uvula) as you as a dentist. Every time you open a mouth you see it. From now on .. try to see how you characterize the person with the small tongue.

Then you can literally define how a man feature, and then guess or decide how they will be ...

Q: .. what I noticed .. constantly moving, same way their tongue is moving .

K- If I was a dentist I should be able to tell many things

If they suffer from such and such a problem ..

Don't forget the Chinese doctors are good at it.

Q: as a dentist, understanding the plasma. .. I already know who they are , I can read the patients ... the way they talk ..

My Chinese patients are very difference ...

K- ... we are not use to in the West. Couple of years ago WL and I went to a scientific machine looks at your tongue and tells you

WL would you like to talk about that

WL- Chinese Medicine has a lot of

Doctors need to practice years and years to tell you , pulse ..

K- But they computerized it now ..

WL:

Q: Talking about the Chinese . my husband studied that, he can tell

...

eyes close together not tolerate other people.

K- You use your mobile husband .. .knowledge of small tongue studied by a lot of cultures .

WL:

(small talk ...)

Q: Alzar singing bowls Tibetan ..

R: So where did you feel it in your body?

Q:

R: What about chanting ?

Q: ..

WL;

R: is the (uvula) the throat Chakra

Any ideas Mr. Keshe, you allowed us to ramble on here?

K- No, it's good to understand different opinion, to listen to different opinions it has to be shared ... different races of man have achieved the same thing.

### **All Things in Universe Same Age**

Q: Jalal, .. about the soul. What is the extending of the life, take place in this condition?

K- What are you talking about, explain yourself first.

Q: You said, the most important thing, that we create the soul, and the soul become interaction physicality and the emotion. And when this **soul gathers strength it can leave the physicality**, (2:56). like we talked a lot in the past, like a cocoon. .. **cocoon to this butterfly to mature and go out of its cocoon. So what is the purpose, in reality, of extending the life in this case?** Or it's not the (doesn't) matter here, enhancing the way of your life, of the knowledge, that when it is needed to work with in the space, the soul can handle it? Is it lack of information in this case?

K- The truth is, when we talk about extending life. **The life in the U has never changed. We all have the same age, be it the man, be it another star, galaxy, the U . Our time, our source, our essence of creation is the Creator. So we all have the same age.** None of us is older or younger, **in respect to the true essence of time, because we are all created from the essence of the same, same origin, the same time. The Creator wasn't created in parts**, and then you are part of section 1, part 2. (2:58). But we are **manifested at a given place, position, and strength for a certain time of visibility or observation, by the eye of the man.** Otherwise we are that length, we are just carrying on. And we are just physically visual at this point. This is the reality about our existence.

But we want to say, extend life, we want to extend life at this position for how long. But in essence we came from the Creator. And from interaction of many fields, He ended up

with us, at this position in time, but in totality we are the same, continuation of. If you look in a galaxy where the center is here, and earth is somewhere here, or our solar system somewhere here, so the extent of the life has past us, and it's growing that way. So in true essence from the center we are the same, we came from ?? center, you still have the same reality of time and place, where our time is the Creator, and our place is within it. But where, from that point of creation, we are positioned ourselves, and what do we see in that position. If the earth is here or our SS is here in ?? a million years. How does life look for those who are here (further out)? But what is on the other side of that position, on the edge of it. because these field forces of other universes, (3:00). have to block the movement or they have to retract that this (our side) can carry on with its expansion. But the time, the reality that comes, is this (our side or galaxy) the creator, or what we call the Creator. Or is this including what is the other side (draws a circle around both sides), is the totality fo the Creator? Do we have a creator of our U, and galaxy, Solar System (SS) or do we have one creator which has created the totality.

So we are all from the same source, has no time, because we all have different position, but time is the same. This field at this point was part of the Creator at point of inception. It's not coming from somewhere else. So time is meaningless in the bigger essence of creation. It's a position and a strength, which that has taken to become manifest itself at that position, and time, place and the strength. Because you could have this strength in the edge of U, right here at the beginning of time. It depends how many collisions it had and what strength reached that, so it's not exclusivity, and we could have the same strength anytime across this span, and within this boundary. (3:02).

Zero time zero positioning. This is part of the defense technology. We don't look at what we sent, we look at the span of time which we have created and can bring all the same. .. when you have a rocket coming towards you, it is standing still, it doesn't exist, because it is you who expands inside beyond it, and it becomes part of you.

So what is life, why do we want to extend it, because itself is part of everlasting, ever existing. We just want to expand this by a few years, where we are, in that framework to be more physical. Or with what we taught today even, you have learned you can make sure you exist in all D, then you are always living, and you always exist. Is the fountain of youth the true essence or the reality about existence through the STM, not the physicality, because you ever stay young, you are as young as where the Creator started, because you are part of the original rays and the fields of creation. I hope I answered you. .. one step at a time.

Shall we call it a day. (3:04).

Q: .. Heartbeat of the soul , tune to HB of where we want to go. What is the HB dependent on?

K- It is the balance fields between the G and M, in respect to given environmental and HB. Our HB is what it is, and it is conditioned to the HB of the earth, and to the condition of the HB of the solar system. If you change the HB of the solar system, the sun, our HB will change, because it has to interact in different way. In a way, it's the Blood Pressure if you call it. SO its, but hat pressure is a M field pressure, not .physical pressure. We create the HB very easy. and we can change the HB very easy. it's part of the arsenals of the KF new T. We don't teach it, we stay away from it, because it can be used the wrong way. But we control, (3:06). we have a very much

say, and KS are learning more and more how to control it. When we say in Iran in the next 12 months we can travel to the moon. It's not that we are going to build huge rockets, huge launching pads. We go to the essence of creation. How we understand this, and how fast we can control it, and how fast we can manipulate it to create a condition of .

Q: Is our ascertaining of a HB, the essence of a rhythmical occurrence, or is it a perception of a strength?

K- It's the interaction of different strength in M and G crossing point. It's very much if I explain to you, where you find the surface of the earth and then the gaseous layer, it's a change in the HB of the Pl of Inertia. We got to realize , we have HB within the HB with in the HB. which they interact and they are independent in their own. I envisage upon my return to Iran in next few days,.. as I have with officials, (3:08). we directly go for space travel, space transportation , the rest is the by-product. It's not we are going to build huge laboratories, we are going to make smallest entities man could ever imagine that could fly. Mankind has gone for these huge gas tanks, solid fuel or what, liquid fuel. We go for an atom in that tank to take man across the U. You know what they say, how many atoms is in 1 gram? And we go for that atom in that 1 gram, where the present science goes for how many toms of that can be put in to find position, and it has found limitation with it. They work in a different way, as we call it, micro and macro in ?? of plasma there is no limitation. We show the governments in the next 12 months, and we change the course. And nothing can stop it anymore, there no way, there is no world leader on this planet who can stop the course. (3:10).

Q: .. I want to know, has anyone been able to contact their own soul. If so, how can we do it. How can we ?? our soul if we don't even know what or where it is?

K- You have a good view of the god, ask.  
.. chose a different name.

Next week we start at 7 PM CET ... hopefully we learn more form each other in the coming ..

We don't disclose where we are.

There is no process that can stop us from the new cycle of development. Even those who tried before they find out they fail the path. Mankind is in, (3:12). for a new cycle and generation. Do not forget there is a scientific conference July ..

We expect to give a conference in Tehran before my departure into Romania, and a lecture in China and Washington ..

We will let you know.

Thank you very much see you next time.

R: .. May 28 the recording for that is available.

K- Yes, in that conference we explained and announced for the first time, (3:14). that the KF has found a solution for Corona, and we wait to go through the systems achieved by the Iranian scientists, and the elevation of the totality after the election of the new president. shared with channels of government ...

disinfecting the environment .. setting examples for other nations to follow ..

Thank you very much.

R: thank you Mr. Keshe (3:16).

383 KSW

END
