

387th Knowledge Seekers Workshop; July 1, 2021

ENGLISH TRANSCRIPTION

(:11). K- .. There is a point we have to remind you for this week .. KFTV will not be live. .. due to heavy storms in this area .. hail storms. many masts have been damaged. .. we record and transferred to Youtube .. 2 weeks to repair 100,000 of cars damaged.

In any case we start the teaching to day as part of the KF teaching. We go back to our .. with the Enhancement Unit (EU). ..

Those who want to place order .. we invite you to come in 8 or 10th this month.

KF opens .. auditorium of about 100 seats. The KF TV center will be setup as permanent place, (:14). and we'll see how it grows. .. the EU have been placed in position.

We will be ready next week to 10 days .. by invitation only.

We thank those who are calling landlords and putting good comments in. It supported us a lot and brought a lot of solidarity in helping to set the center up. It is nice to see so much support. At the same time we do our best to deliver what has been .. prestigious Exhibition Center. It's very near airport, accessible by train ..

In the came center you will see, (:16). one of the largest factories and production lines of the KF hopefully in next few months.

EU shipping ..
trouble shooters.

The KF technologies is gradually breaking through, and we'll see more and more developments .. new products, .. more support in different dimensions and directions. (:18).

Teaching Starts

Understanding the Work of the Souls - all the systems

The **teaching of the KF in past few weeks has been concentrated on the what we call the understanding of the work of the souls of the system**, which is the control system, the power unit of the system, the what we call interaction of the system, what we call a plasma (PI). The PI of the Soul of the Man (STM), the PI of the emotion .. , and the PI of .. physicality of the man, the Soul of Physicality (STP) of the man.

Plasma and Emotion can be Replicated with Systems

You got to realize what we have taught in the past few weeks it **can be replicated with systems**. In so many ways, we can replicate many things from what we understand now, we can **replicate emotion** of the man **in the dimension (D) of the PI**, which reacts and interacts very much like body of the man.

How the Earth/Sun create Matter - STM/STP create Emotions

Then how we learn these things, it come to understand to the truth about exactly what we have taught about in the past years, there is no difference. **The STM is the Sun, the STP is the Earth, the interaction between of the fields of the two entities one being the stronger, and one slightly weaker, creates as we see in the upper atmospheres of this planet the PI of the H, the PI of the O, the PI of gold.** In interaction of the fields of the body of the man, as they are in essence in the D of the soul of the PI, **they create plasmatic sections like joy, happiness, recognition, knowledge.** (:20).

Rotation in Blood creates miniature Earth conditions - Emotions

So there is **no difference in the process of creation.** In a way, instead of having a planetary system like Earth, fixed in a position rotating around the Sun, now the sun has kept its place, but the system instead of rotating as an entity, like a spherical object like earth, **it rotates in the blood flow of the man, in the smaller, smaller information, emotion, and everything else. And in that process creates a continuous flow of miniature earth conditions,** that in interaction with the fields of the STM, creates what we call, those Hydrogen's, those Carbons, those CO2, and the gold, which we call **different emotions.**

Flow of Fields in Blood create the Emotions

So the knowledge of the man about the creation of his life, is very simple. The **distance between the sun and earth is covered by a huge gap,** then some of the fields of the sun by radiating out, by the time they reach earth, **lose some of their strength,** or are given strength, reach, or what we call the upper atmosphere of the earth, then in interaction with fields of the earth, **MG they create these packages of plasmas of matter state, but in PI state, but in .. the D of physicality, when these plasmas come in touch with the Inertia of the .. earth, they convert into matter state.** But as the **flow of the fields in the blood of the man, (:22). is in a dynamic condition, and then in their interaction with the fields of the PI in the brain of the man, they create the emotion.**

Every Cell in Blood is Taxi destination designated - by field strength

But at the same time this blood flows to a given position as we said, from the beginning of the teaching. **Every cell in the blood .. is taxi designated destination, it only goes to one place according to the field strength.**

Blood in Releasing its fields to common denominator cells - transfer emotions

So when it takes the emotion with it, it goes to where it is supposed to feed. It's common denominator cell. In releasing that field it transfers the emotion of the man, which is created in interaction of the physicality and other emotions from different cells of the body .. , and the STM for that part.

Interaction STP & STM create emotion - radiate to blood and body - like sun

In a way, we even understand how, now for the first time, **our emotion, through interaction between the STP, and the STM, in radiating its fields, one way hits the**

blood circulation of the cell, which brought the information, and on the other hand its fields, spreading out through the body, **hits the body**. In a different strength fields from the sun itself, and creates the condition that it's been carried by the blood.

The Inertia created is plasmatic - like the cells

So in a way, the **Inertia is created by the interaction of the fields, but because the Inertia is plasmatic in both cases does not become a solid state, but it becomes a plasmatic state of the cell of the man.**

Blood makes HB by transferring energy to heart

These gives the man a new opportunity, but the whole essence of this matter is to be created is that heartbeat (HB). It's a **natural HB, which the blood itself makes by transferring some of its energy in the heart of the man.** (:24).

Every Cell has Many Functions - also carries charges to heart

In so many ways, **every cell carries a number of functions**, not only bringing **information**, not only bringing the **emotion**, not only **creating the M fields contain the STM**, not only **carry the charges which leads to transfer of the energy to the heart** created combination of what we call **rhythmic continuous heartbeat (HB)**.

HB can only be created by the Blood Flow which carries charges

This **HB cannot be introduced in any other shape, but by the blood flow itself. It's the one which carries the charges.**

HB controlled by Energy from Air - any one can recharge walls of heart

In so many ways, the combination of the **HB is controlled by what we call the amount of the energy through the air, through breathing**. And anybody (any one of them) can change, confirm, transfer and recharge the cells of the walls of the heart.

Create HB through blood flow through lungs - take heart out

In so many ways, **if we manage to create a correct HB in a continuation of the flow of the blood through the lung itself, we can take the heart out of the circulation.**

Zebra Fish can create its own heart

We have seen this with many animals. **We can take the heart out and the body will replicate the work and create the heart.** We seen this in ?? **zebra fish**, we have seen in a couple of other animals, we can take the organs out but the organ is replicated and made.

This is way cloning works - NOT through DNA

This is **the knowledge which man needs to learn. This is not the way that it works, through the what we call, the DNA and the cloning of the parts.** This is the way the cloning of the body of the man is made, or any other animal.

Need to Understand Plasma of Emotion to Replicate heart

This goes back again, **without understanding of the emotion, (:26). you cannot create the replication of the heart. Without understanding the creation of the plasma of emotion**, in interaction with the work of the lung, the air intake, you cannot replicate the creation of the heart.

Why HB changes when breathing changes

This is **why, when our breathing changes, our HB changes. When our emotion changes**, our breathing changes, and our HB changes. Now we understand more. Now we understand the truth about our own creation.

Many claim they can replicate making heart - impossible

It's not as we have seen, **many claim that they can replicate the making of a heart. Theoretically, yes, you can. Show us practically. It is impossibilities.** In so many ways, they have claimed they can make organs within the body.

We have seen some of the Knowledge Seekers (KS) who left, who have been taught by KF, have made these claims and systems, they are trying to copy. **But none have been delivered. In a way, because they never understood the truth about the creation** as we explained in the past few minutes.

Take heart out - Let body replicate its own heart

In so many ways, in the new Enhancement Units (EU), which should be delivered by the KF, all this has been taken in position. In a way, **you can take the heart of the man from the body of the man and let the body of the man create a new heart on its own.** There is **no need for what we call, heart transplant. There is no need to take a heart from another person.** Once you understand the process, you can even allow the heart in so many ways, to replicate its work. **We have shown this in effective way in the past few weeks.** With a few of the KS around the ?? who have these kind of problems. In so many ways, mankind has reached a point of maturity that understands the totality. (:28).

In so many ways, do we need to worry about how we look and what we loose in the space? Do we worry that how every cell of our body will replicate across the U according to time, place and position, and at the same time to Inertial mass of the fields of the PI of a cell.

Replicate organs by thought - memory of it recorded in RNA

In coming time, knowledge of the KS will reach the point, that **even by through the thoughts they can replicate, they can repair every organ within their body.** **Mankind has had such a knowledge for a long time**, but as he took more the D of physicality the **knowledge has been lost in the practical side, but still sits within the RNA** of the man.

Every Arm of DNA has Cell Replication Information - not how scientists think

At the same time part of the DNA cell chain is for this purpose. **Every arm of the what we call DNA, carries replication process information within its structure, but it does not sit in the sequence that most of the scientists in what we call DNA, what we call technology have taught about it.**

DNA and RNA sequencing within each other and in Interaction with the Creator

One of the most **important parts of the DNA of the man is understanding the parallel RNA, and how the sequence of the two sits within each other in consequence and in interaction of the Creator, creation of the soul, of every arm of the DNA and RNA. What does this mean? (:30).**

The Sequences are allocated to certain work

It's very simple, in the process of what we see, for example, **an arm of the DNA, and sitting with it, with arm of RNA, which are mainly the same. We see sequences, very simple, that we understand information, and we see the sequences, which is now allocated to certain work.**

Every arm of DNA and combination are AA based

But what in fact, most of the scientists in the world of DNA have not understood that when you look at every DNA, **every arm of DNA, every combination of DNA, they are all amino acid (AA) based.**

These Sequences are plasmas and their MG Fields interact with each other

So what it means is that the **plasma MG field of this, has to be considered in respect to this, and in respect to this, and in interaction of these fields with each other.**

Scientists have not understood how these plasmatic interactions effect body

At the moment **scientists only consider sequential numbers and series of the AA. But as they don't understand the work of the PI, that DNA works with the plasmatic condition, they have not learned to, or they do not understand, that the MG field of these and the interaction with each other, has a direct effect in how the body of the man works.**

Each Sequence creates its own emotion - plus other creations - lead to defects

And each one of these creates its own emotion. **When you have number 1 with #5 interacting, it's a different emotion in a creation. And then in that emotion, that field strength, creates what call, defects. (:32).**

In Plasmatic Condition interactions with other arms of DNA can occur

They only look at the space gap of the set. They don't look at the plasmatic condition, that these sets in interaction with each other, and even with the other

arms of RNA and DNA is created. This is why man still has a lot to learn in the process of understanding his own genetic code.

The AA is in Plasmatic condition and can interaction with everything else

Because our scientists at the moment are only involved with the physical D. They have not understood, that the what we call the AA of the body of the man, is in the plasmatic condition and it creates MG fields, which in a way interacts with everything else. And in interaction it has different reactions and the conditions.

Genetic Defects in human race can be corrected - by changing the field gaps

If the scientists of what we call genetic understand this, they will find out by adding or creating a slight field differences at certain points, they can correct most of the genetic defects in the human race. Because then they don't deal with proteins and AA but they will deal with the space gap positioning that allows what is short to be added. Or deformities to be ?? positioned.

Body is in a Vacuum - plasmatic M field condition - adjust the field gaps

In a way, they are still working with mortar and bricks, but they don't understand there is a M field gap spacing due to the position and the construction of the body of the man, which is in a vacuum, which is in a M plasmatic field condition.

Why so many genetic defects in human race - space gaps are interacting other fields

This is why we see so much defects in the human race, because these space gaps in the interaction will create different fields, (:34). in respect to each other, and this is why we have the condition of today.

Each one is interacting in a different way with its own cell and neighboring cell

And all the mayhem we have in the world of genetics, and replication of different cells in different bodies of the man, as each one interacts in a different way with the same and neighboring cells.

Scientists have not understood the Gans state

The present scientists only look at the observation of what they think is the absolute matter state, and they have not understood the Gans state.

They also each have their own emotional interactions as well

But on the other hand what is important to all this together is the fact that, even you have different strand and different combination of DNA on the arms, that create their own structure. All these have, in interaction with each other, not only create the field direction, but they carry emotional interaction with each other too.

The STM carries emotion of every part of DNA - collectively recorded

The emotion of the man, when it is transferred through the body .., through the blood, through the physical what we call soul, with the STM carries the emotion of every part of the DNA, which is collectively has been recorded.

How Genes Evolve - Permanent recording without materials on RNA

This is how we get what we call evolution of genes. Because this emotion through what we call DNA, once it is setup to do some work, it will work not only through DNA, but it becomes part of the information line, (:36). of what we call the RNA, which is permanent recording without the material.

The Emotion si

So we see **that the emotion even sits within the structure of the basic blocks of life**, within the basic structure of the body of the man. **This is part which has been ignored**, but in so many ways, in the science of the physiology of the man cannot be ignored if you work in the true D of the PI, and plasmatic conditions within the structure of the man, and in the environment of the structure of the man, and in the U of the structure of the man.

In the future teachings, one day, we might explain, that how you can even interact with these (genetic coding) remotely from outside. We can change genetic defects if we develop the technologies which measures the M field of the every genetic coding, and then slightly change it to be the right place for the others to move in the correct position and rectify and repair the, what we call the genetic damage. Even if the child is in the 20s and 30s born with total handicap, if the genes could be reached in this manner, gradually the life will go to normality for the defect.

These kind of technologies is what you'll see in the coming time out of the university of Iran. We will teach this in a rapid way upon my return. That we start (:38). creating a perfect man, not only in the D of the soul, but in D of physicality. When the man leaves this planet, he will leave as a smart, educated about his own life and about the U, but will leave as a perfect man in the physical and soul condition. It cannot be anything but this. Otherwise man will become a subordinate, as the others can see the weaknesses in the structure of the man, and man cannot be weak. We are not sending farmers in the capital cities, with the donkeys and the ??

In so many ways, the knowledge of the science of man, the knowledge of the science of the creation of life in the U is explained in this little sketch. You change each one to a man, .. to a cell, .. to a U. Still perfectly match in working. It's the same as the sun and the earth and creation of matter, like the soul and the STP, and the emotion, and the interaction of their fields to create what we call physical reaction.

What has happened in the science of the man is the lack of his understanding of the truth about the creation of the physicality of himself, that is not in the matter state, but is in the plasma state. Just because you can chew the meat, does not mean that the meat is a matter state. And this is where the man's confusion has come mainly from. (:40).

But the essential point to understand and to be able to what we call, educate the mankind on this subject, is for the mankind as a whole to understand the truth about his

own creation. The positioning of the soul, the interaction with the heart of the man, the interaction of the blood, which flows within the veins of the body .. that creates the STP, and at the same time creating interaction of the STM, the emotion of what we call the plasma of the emotion of the man. When the soul of the plasma of emotion. But to what extent the KS will develop this understanding is entirely upon their own understanding totality. And how we teach, and how we understand the subject of the creation and the Creator.

In so many ways, the interaction of the STM with the interaction of the Soul of the Creator (STC) must be creating some materials somewhere, like the plasma of the H and O, and in interaction with the STM creates that star. It cannot be any different then what is the truth, and what we see in the world of the creation.

It depends that what you have gathered in that soul, that in interaction with the STC, will it create a Saturn or .. earth, or would it be Mars. In so many ways, (:42). as we carry the essence of the STC, we only interact with the Creator, and in that process the Pl of the interaction of the G fields of the man, and the M fields of the STM, with the soul, and G fields and M fields of the Creator, create a new D in the space and in the Creator interaction world of creation.

Which means our soul on its departure, when it leaves the D of physicality in interaction with the STC will create that friction of the plasma of the H, O and gold, but that will become a new U. That will become a new galaxy, .. planet. It depends how much, and how strong we have created the STM before its departure from the physicality. What have we gathered in, that we go out.

The life of the man is nothing but the same as the planet earth. The fields come in and the fields goes out, and once within dictates how stronger it goes out, as we say, the North Pole has a higher strength than what we see, lesser snow on it, compared with the SP that the higher order are less of, but the lower order are more of.

And this is the Pl of the cycle of the life of the man, be it 10 days, 10 years, or 10,000 years. (:44). The cycle of the life of the man is to collect this Pl, and at the strength of what we collect from interaction with the other souls which we serve, will dictate in the interaction with the Soul of the Creator, what shall be created of the STM. And that is the creation of a dust, or the creation of a U.

The interaction of the G field of the Creator and a M, will lead to creation. When you have nothing, when you have created nothing within the STM to feed it, what do you expect this dust to be? Or have you gathered enough, have you managed to serve the totality in such a way, that you lead to creation of a U, that many dusts will lead to become galaxies and solar system within the structure of the soul of the man's interaction with the Soul of the Creator.

I have made the man in the image of Myself, that with it I can interact, and in interacting I create what you call different cycles of life across My Unicosé. Now we understand, would you like to be the soul of the cell in the body of the man, or would you like to be the Soul of the Universe. This is the whole purpose of the teaching, that mankind understand the process of the creation in respect to itself and what it is going to be, (:46). of his soul when he leaves this physical body of the man, and becomes a

free soul. And the only interaction with the Soul of the Creator, because he was made from and goes back to. Would you like to be a beautiful planet like earth, in this structure, or would you like to be a desert, a deserted planet, or a moon, or a dust in the speck of the atmospheric condition of the Unicose between the Creator and the STM. If human race understands this, you will do nothing but to serve. and to share, as he knows the more he shares with his Creator, the better chance to create brighter dimensions of the fields which creates the collective essence of the creation of the Creator.

Now we understand why we come, and why all these teachings have been about the soul and the spirit up to now for mankind, because that was the only kind of language mankind could understand. Now the KS are knowledgeable and understand the totality of the creation. And this allows us to teach so rapidly to bring mankind in line with the rest of the U Community, which is the U of the Creator in the D of understanding to serve the others. When you become a member of the UC it is not all "honey and pots," it's serving beyond reservation of the understanding what man reserves within it. It's more servitude then in a way, attitude. You serve, you give, and the more you have to give, (:48). the more powerful, the more beautiful creatures you create within the D of interaction of the STM and the STC.

Now we understand the truth about the creation and the Creator, and why all this has been said, "I made man in the image of Myself," because that is the only way I have a common denominator, that I can interact with, that in interaction with the STM I can create new dimensions, new energies.

Then maybe one of the most mysterious questions ever mankind has asked himself will be answered, why do some children die at the point of birth? Is their soul mature that it leads to creation of a new U without being tempted, or tainted with the present life of the man, eating another life, destroying another life, having a plate of ?? right of different elements on it, and still thinking I lead a perfect life. Is the soul, what we call a fulfilled soul when it leaves at the point of departure from the womb of the mother? Or are we born to live a life, to gather a balance of what we learn as a correct, or misconduct. Or how the STM having been born lets say at a thousand level, becomes to leave at 200. Because the rest has been lost in the process of the physical life of the man through misconduct. (:50).

In so many ways, the soul of the emotion of the man is one of the most important parts of the creation and the created, where the interaction of the, what we call, elements of .. the STM will create their own cycle of life, and shall never finish.

I hope. My wish is that some of you understood the teaching in past half an hour, because if you have understood you will grasp the .. the statues of man which we just, put the clothes of man on, we leave them on the street.

The teachings are becoming shorter and shorter but with a lot of meaning and understanding. In so many ways, humanity needs to mature very fast about the truth about his own creation, no one . In the process of life we are set to see through the eye of the STM and not through the eye of physicality of the man. (:52). In the earthly life we use the sight and the other senses. But we got to understand, that there is still a sight in the D of the STM and in interaction of the STM with its environment, and depending on the strength of the soul, we will understand the information transformation.

How hard it will be for mankind to cross this line, time and history will tell. Would it take the mankind millions of years, thousands of years, to understand and become part of the UC, or will understand and with what we call, a small helping hand, he become part of, but then the man who gave you that power, now you owe him the knowledge.

Today's teaching is very short but extremely sweet if you understood. Thank you for today and I hope many of you have understood that, and many of you soon will mature to the point of understanding the totality. Be aware of interaction of the what we call different conditions, and different structures, (:54). what you or your masters give you to understand. It's you who has to have the capability to understand, otherwise you are force feeding a child with a ?? rim, and cannot understand the totality.

If you are ready Rick we go for a break .

>>> Proofed to here >>>

BREAK >>> 387 KSW (1:00).

Q: .. What is the name of the AA formed in the Gans capture kit? . David Wilcox says the 20 base AA can be mapped out on a ?? doca-dihedron I wanted to see what the name of the AA formed on it, so I could find them on that map. It's a geometric universe. ?

K- The AA you create depends on the material you use, the way you chose your material, the salinity, the space gap and the environment which you created. These are fundamentally change every AA which you create, (1:02). that's why not two AA are the same. You create AA which in CO2 Box which is connected to the C and the O,

Any other question?

Q: WL, .. (1:08). and now we understand, still before we are the creator, but we don't know how we create a world. But today you do, tell how to create a world .. our world is created by thought. I understand it is created by our soul. .. Any other question.

Q: Salomeea, .. what are the differences between ?? pen tics plasmatic ... (1:10). Are RNA and DNA are immortal, and the soul of emotion is a memory of the men ?? ?? all what can elevate our soul to create new cycle of creation.

K- .. for your first question please read the book #1, it's all well explained in there, plasmatic M fields .. For question #2, it's the reality in the body.. we see the reaction interaction fo the fields, in physical response as electric current, in the D of .. physicality. the emotion which is created in the D of plasmatic fields is what is shared and given or taken from the STM or the STP to be added to that it makes the impression or taken away from. In a way, DNA is the connection of the transformation of the

plasmatic fields information to the physical body .. within the cell structure of the brain .. (1:12). where the RNA is the fields, it's like the gravity, where the brain is the mass of the earth. It's a M it depends with it takes and what it gives and what converts, and what it gives or we add to the D of the STM , or we take from the STM.

In so many ways, we have to understand one is the link to the D of physicality, confirmation, and transformation of the energy and the emotion, and the other one is the connection to the soul. And they all carry the same information as a base, in what is added or changed. It's very simple, but the 2 even they are connected they are intermediary between the D of the PI and the physicality and the other one is the collection between the fields of the PI between the 2 souls. In a way, keeping up to date and in line with what is needed, to be, to manifest the physicality.
Any other question.

Q: .. (1:14). no response.

Q: .. with heart problems will this PI T generate a new heart or create a separate heart?

K- It can do a combination . if you can take it out, and hold on to the operation of the fields of the body .. in time it will create the heart. If you want to repair a heart you can do it easily by that way too. If you get a bullet shot through the heart and explode it to pieces, repair is impossibilities. better to take it out and let the physicality fo the man in conjunction with the G field of the Inertia G field of the position, and interaction of the fields of the soul of the emotion to rebuild a new heart. Take a little bit longer but it works. The scientists are on this track. There is a lot of work is going on this, but they don't understand, they need to move in a more PI and M fields to be able to solve the dilemmas of present time in heart operations. (1:16).

Any other question.

Q: Will the perfect man have eternal life on earth and in the U?

K- I can answer in 2 ways the easy way is, what do you think? Secondly, is eternal in the essence of the Creator as you are all part of it, it is eternal. But would it be that individual soul would have eternal life. No soul has eternal life except the STC which is created the totality. So don't expect much. You got to realize ... a thousand year life of the man is a flick of the finger in the life of the U. How long do you think you can keep that flick going and how many times.

The only problem is what is the greed of the man who wants to live so long, and to be ever there, to see what to do, he gets bored. U has the same habits and the things are moving in the same direction and D. (1:18). You go from one U to another you see slightly different. You want to be a soul sightseer, then plan it from day one. There is a very big question for a lot of you, if you find the answer to it, you might find the key to life. If you are asking to have eternal life, knowing that the Creator put so much out to create all the universes, do you think His life is eternal, and if it is where does it come from?

Any other question?

Q: Ed I have 3 questions. 1- You indicated we need to be perfect in physical and soul? When we leave this earth because others will be able to see our weakness. Does this imply that they will take advantage. You have expressed before that the U is a peaceful place.

K - can you repeat that again .

Q: Repeats .. (1:20).

K- Nobody will take advantage of you, that is the biggest worry of the man. Man is always worried that they are taking something from him, or he is losing to somebody because they know. He doesn't understand that it is him who is stealing from himself. Nobody need to steal from the man, he is the bigger stealer from himself. If people from the U were going to use man's shortcoming and his stupidity to steal from him, they would have done it millions of years ago. They didn't have to wait till now. And those who keep on talking, the aliens are going to do this., boys, they have been here long before you lot. They haven't taken anything, they won't take anything. You know when you go on biology (field) trip, they take you to rivers or whatever, or what we call a field work, you cannot touch or take anything, you are just there to observe and put it back where you took it from, be it a shell, be it a stone, be it a fish. It's the same principle in the U, we don't collect souvenirs and we don't interfere. If we were going to use the man's .. weakness in knowledge and stupidity, (1:22). it would have been done a long, long time ago. They wouldn't have waited for you to understand a little bit, they would have stolen from the cave man. These people who come up with these notions, shows they have never understood the process of life.

Any other question.

Q: #2 you talked this morning about a soul that comes into existence at let's say 1,000 level and loses to 200 because of misbehavior. Why would a soul allow this to happen?

K- Physicality does it, and soul has to pump it up. As much as it takes it has to give, it is responsible for it. It's as simple as that.

Before we take another question do we have anybody from Romanian group to speak about conference.

(1:24).

R: We have a couple of emotional questions.

K- Do we need tissue papers ..

Q: 3rd question, is the main focus of our development truly emotional in nature?

Q: Where do our thoughts come from, how do we create our reality?

K- We answered that last week.

Q: What then is the connection to emotions?

K- It has nothing to do with it.

What was first question. repeats ..

Q: is the main focus of our development truly emotional in nature?

K- More or less In a way, partially is.

(1:26).

Q: Q: Where do our thoughts come from, how do we create our reality? ..

K- It's partially from the interaction of the fields and conversion of the emotion to physical. In the world of medicine we have a part ?/ motoric, how we use our fingers and to what precision .. but there is the same sense of , if you call it motoric, I call it ?? soul-ric. which means it is interaction of the souls, what it gives you, how fine tune it can work with your souls. This cannot be taught, it is something you are born with and we inherit with our, from the point of birth.

Romanian team ...

(1:28).

(1:30).

(1:32).

K- .. can you clarify if you need the Covid test for the conference, or do we need immunization what is the situation?

Q: .. new restriction we don't need test

K- So we don't need to test to enter Romania altogether?

Q: Yes . (1:34). we don't need, we are in a green position with Russia, Moldavia ..

K-

Plasma is a Conscious Entity - it positions itself

Q: Is plasma a conscious entity? (1:36).

K- Yes, because it positions itself, it interacts itself. Conscious is field strength for it, that it positions itself according to its environmental fields. This is how life in any position in U starts. When plasmas try to accommodate each other, and the environment creates that condition of accommodation. You have an O, and C, and N, and now you have the what we call, O as a G which creates a condition of holding to the other 3 together, with the environmental condition, which is the water itself, which is another link between the water and what we call AA, then it's a sense of accommodating and balancing, and this a part of the structure. It's fully conscious. In a way, it's not conscious, but as it accommodates it has to ?? position itself, we call it consciousness, ?? we call it in world of physics, MaGrav positioning. When environment dictates you have to be born in a water condition, with such a salinity, with such a combination of so many of the AA's than of course it's consciousness. (1:38).

R: So what would be the difference between a magnet which maintains its position with another magnet, and the type fo positioning you are talking about with the plasmatic fields, as a conscious entity. Or would you consider the magnets as conscious entities.

K- In a way, they are but they have a mass related Inertia connection. according to the planetary field interaction. In the body of the man it's different, it's a plasma mass, what we call Inertia, which is a ?? loose combination of the fields interaction, with Inertia of the STM, with Inertia of the STP .. Then the body is created. Then it is very important for us we keep on repeating this over years, the body .. is a closed galaxy, it's a self contained ?? planetary system with its own vacuum condition, and its own .. cycle. It doesn't matter you put a knife in it, you open it, whatever you do with it, but still immediately creates that space gap vacuum condition. So the body .. is another planet on this planet. the Inertia on this earth has limited say in its structure, because it is inside itself it does what it likes. You don't see the Inertia ?? too much, part of liver jumping out, or part of your kidney jumping out. (1:40). So this is what we have to have in mind and understand. It's a self-contained operating system, and with it has its own self-contained emotional system, and when all of it decides the emotion to be one, man reacts, laughs, cries, runs. ??

R: You mentioned even a stone has a soul, so we could think of a magnet as a stone basically ... ground up earth in certain elements. It would have its own realm where its soul operates, but that is different than the consciousness of a human connection, human soul and STM and STP .. that emotional connection .. a conscious entity

K- anything you mention has a M field strength conscious, ?? joy, happiness, you just need to find that strength. Then you can make a man always happy. Why do you see, when I see a certain flower makes me happy, but that flower has a preset mind and M field strength which matches my happiness, D. SO I see anywhere this flower I am happy, it makes me joyful. (1:42). Or could be another human being, could be an animal, could be anything.

Have to repair the Emotion first or keeps coming back

Q: My heart needs repairing, but according to you the emotional factor needs to be addressed.

K- Yes, we can repair the tire, but you haven't fixed the brake. We can keep on repairing the door handle, you keep crashing against the wall here and there, but you forgot to change the brake. That brake is the emotion, fix it. You'll find out many of these problems will go.

We Don't Go Public Anymore - special fixes

You can do certain things with it. **There are certain ways you can handle it. We know how to do certain things with it. But we don't go public with it**, as I mentioned in the teaching of Jalal last night.

It was very interesting I went to Jalal teachings as a student ..

(1:44). I was left there, I went to become a KS , a student, he teaches very nice actually. I was there for a couple of hours... when he realized so we have to come in anonymous so nobody knows who we are.

Ceramic Cups - Only 30 mls at a time

Q: ... with the **plasma Cups if you have one Pressure and one Sweet Cup is it important to drink them at separate times, or drink one after the other?**

K- **Yes, .. and you have to drink only 30 ml, very important.** We know people who are drinking cups with it and then they go haywire with it. 30 ml each time is the maximum you can drink. The Cups are there for inhaling and .. body use. (1:46). Only. It's .. dosages for these things have to be small dosages .

We will introduce New Technologies after TV gets going

We'll introduce new technologies once things move on, on the TV channel.

New Ways to use Gans - Already Tested

Where we'll introduce new methods of use of Gans's. It's been tested and results are very encouraging.

There is something I have to explain, the Air Enhancement Units (AEU) after a lot of testing for maximum results, shipped out some time this week ... When you receive it, you receive a white disk with it, make sure you put the white disk facing the unit

wherever you put it. If you .. the nozzle of the air flow has to face the disks which are given that it creates a current flow. This is one of the reasons we delayed because the ARU were to be used for the purpose of enhancing the air, but we have found out adding this piece to it, increases the work in enhancing the air, (1:48). for negative O levels, in very high levels, especially in the mornings, so when receive these units, now that the second part has been completed it will .. create a beautiful condition. All the ones which are coming through ... originally we had 2 units facing each other, but this is a more practical way. Once you receive you will .. feel the change. The same with the glasses they'll start leaving this week Please with your glasses there is a report sheet, please fill it in, send it back, as these are put out as a test, for you to be the one to use it ...

As we have seen with the cups. .. maximum use is 30 mls.
Any other question. (1:50).

Magnets Sticking to Body Video - Stay away from

Q: .. The latest research in Nano materials and specifically so called grapheme , one of these investigation is the so called reduced grapheme oxide, which in conjunction with H in a biological organism becomes magnetic?

As all research has its positive and negative aspects. Doe the KF with wonderful plasma have some configuration that defends humanity from this danger .. ?

R: Have you heard about this reduced Oxide?

K- No ..

R: I think people are referring to this in terms of vaccines , that people are worried about it is in the vaccines and gets in the body and becomes magnetic. And then we have all these **videos showing up with people sticking things to their body**. Videos like that note, have showed up even before Covid, before vaccines. ...

K- Maybe you have too high of content of Fe in your body.

R: The debunkers have found out they have something sticky on their body that they put on, allows the things to stick to it that makes it look like it is magnetic. So I am not sure, (1:52). how much of that is true and how much of it isn't.

K- I think we better keep away from this situation.

R: Yes, it is bordering on medical misinformation ..

K- Yes, there is a new what I call, ?? they call Delta version of the.. a new name has come out with the Corona. Now they finished with the countries, now they started with alphabet. They are supposed to be more dangerous than the other.

I think in **time if we learn and follow the process of the KF work**, we'll see a lot of understanding, **it doesn't matter what it is**. The understanding of the T should help you with any kind of virus in any position in the U. **It depends if you want to be the orange, or you want to be the Cup of water. Or if you are the orange, or you are the Cup. The vastness of the what I call, "right use of what I call viruses," is so huge in the space**, that when I listen to these thing it just makes me laugh. But at the moment they are riding on the ignorance of the people. (1:54).

Joke - Billy wouldn't take the second shot - must be something in it

You've heard about the new joke, they say, do you know why Bill Gates is split? They said, because Billy didn't accept the second shot. Did you understand, Rick.

R: Not sure if I got that or not.

K- He was good as long as his wife had the second shot. He wouldn't accept the second shot. So there must be something in it.

Any other question.

Q: How do you use the dry Gans you see in KF Store.

K- .. but why did you buy it for. what purpose. We see Romanians are adding it to paint, and they are showing how to use it for a paint brush ?? You can use it all sorts of conditions. the only thing is you cannot eat it.

(1:56). You want to use it as a paint diffuser, ..

You can use dry Gans the same as wet Gans.

But with

the wet Gans is dynamism, the energy loss is higher to the environment. Dry Gans is for specific cases. KF carries hundreds of kilos of it. In new factories we deliberately go for dry Gans.

Q; he cut himself deeply, lost consciousness, woke up with Pineal gland burning and hurting since than he feels differently body also. The doctors don't know what to do .. (1:58).

He wondering if there is any solution to his uneasiness, he doesn't feel like he is fully in his body ...

From a spiritual point fo view is there something you could say?

K- In a way, from soul point of view you can do something. Mankind has to do this in the space. When you cut an arm or loose a leg, or any configuration of arms or legs you might have at a given point, ?? effects you emotionally, which is physically. It is within our structure of DNA from time fo birth to regenerate new organs, new parts. But we have decided to ignore it, and part of it is done through emotion. As we explained, emotion brain in interaction fo the ?? STM creates a field in interaction of the the body of the man, leads to creation of cells in that position. (2:00). But there are ways to do it. There are specific ways you can do, be it a gland you can repair, be it organ, .. cut you can repair.

R: Many people are concerned about Pineal calcifying. any maintenance you can do?

K- We see a lot of this at the moment on the internet. We prefer not to get involved in this discussion, because according to latest studies which was published, I heard about in the past couple of days, it's they have found the effects of the injections in every organ of the man. It's not just Pineal gland, in every organ they are finding traces of the vaccination.

R: A lot of the people with the Pineal it's not necessarily related to the vaccines, it could be other effects of life. ?

K- As I said, we are not going to get penalized for Pineal pushing .. (2:02).

But now we have structured the KFTV press releases for the new part. We'll be able to openly discuss this as a ?? channel. We have set our structure to be that way. We will structure to have open discussion ..

(2:04).

Q: Jalal ...

K-

(2:06).

(2:08).

R: 387 KSW

END
