

# 391st Knowledge Seekers Workshop; July 29, 2021

## ENGLISH TRANSCRIPTION

(:11). K- .. in the last week teaching we started a new progress, a new development and we'll carry on with the same. As we promised we'll try to get the KF TV online by today, but they need 1 more day.... We enter a new era of teaching ... easily for those of you who understood it last week. We taught you about the Gans's for years, .. about eh soul 2 -3 years plus, and now from teaching on 387 if you listen to it in detail we gave you an insight in what is to come. And from 390 KSW we brought what was in 387 to the physical dimension (D) in understanding the process. So we see the process fo teaching has a rhythm and we are going in that direction.

Now from now on we try to bring the Soul of the Man (STM) and Soul of the Physicality (STP) and the physical condition of life for man in the space, and his self on this planet. SO after 7 - 8 years of teaching, now we come to the point where the physicality comes into work of what we call, "universal Creation of Matter," and then transmutation and transformation into the ?? lights ?? energy which we had in Gans's, and now the fields of the Gans's, and the production of the fields of materials which brings a new D, to bring the STM and STP of the man, and the motion of the both in the depth of the U, becomes applicable and now understanding. So in the next few months and maybe a couple of years we go into this direction, now that we understood the soul, .. the physicality how we will change the matter into energies. Now we are bringing to show how the 2 can work, (:14). anywhere in the U. This brings a fundamental change for a lot of us. Coincidentally we didn't plan this for thousands of years to be here, but coincidentally a lot fo things have said to be in line for the release of the new T. We see one fo teh most important factories that ?? kick the world peace treaty, and understanding of the man' knowledge and opening of the U Community to man in the D of the STM and the physicality, we start in the next 7 to 10 days. Gradually you will understand why and how. In the coming time gradually we build you up, gradually to the position of understanding how the world leaders will join us as operating, gradually as one. In a way, we bring the W leaders, the KS and geopolitics, and many other kind of diplomacy into one. This will not happen overnight. The first stages of this is on the platform, 2 - 3 weeks in the background is a lot fo work to be done. We wish those who are part of this endeavor a huge success. They need it and in that process we'll see huge changes in the direction and D which the teaching and the T of the new science, this will take hold and take shape. In that respect we carry on with the teaching, while we are dong other things in the background, to bring the teachings in line with the present science, and in line with life on the man on this planet.

### Teaching Starts :

Last week I opened a new chapter for you. (:16). About maybe 8 - 10 weeks ago I asked one of our KS in the Laboratory of the KF, ?? if you can make such a thing. I gave him an outline of what I wanted in a way, what you see now on the screen. Because we would have to look at the physical condition, what does and how does this system look like. ..

In the process of **teaching last week I opened a new D in many ways for you** to be able to be constructive and be able to work, to bring practicality in your what I call, the knowledge of the soul and K of existence. And in that process we can gradually build up this process. Which means we start understanding what is happening. What I think is the best thing to do is to start where you already have done things, you have seen things. You seen the result of this parameter on the table. Go back to the first things you learned, and than you see how this picture completes itself in knowledge.

### **Cu is main component of Body - red tissue allows us to be dynamic**

I tried to explain part of this last week. If you remember **at the beginning we had this (Cu Nano coil) as a main component (:18). of the body of the man, which allows man to be dynamic. Red tissue cells, depends on the existence of the Cu.**

### **Cu and Zn gives CO<sub>2</sub> - neural system - line of communication**

If you remember when we put the Cu with the Zn plate one of the first things it gave us was **CO<sub>2</sub>, the connection for neural system,**, .. for line of communication in the body of the man. So we have seen this work, so we know this set of the Cup is there, while it is doing everything else to produce this.

**The reason I do this is for you to gain confidence in why and how this system is set out,** then you understand it, because you all have done bits and bits of this in your work. You have been with it, you have worked with it, you have done a lot of other things with it.

The other thing we have seen with this is, if you remember in the work of One Cup One Life, we had a very simple system. In **One Cup OL we saved many lives around the world,** we had this with us. If you remember the way it worked. Nano coated Cu, spiral Cu and the Zn. In other Cups of Life we went through the same process.

### **"C" for Galvanized because it is a composite of materials**

In the beginning of the process we learned how to make sugar as we said last week. (:20). and then we see the existence of dynamic sugar. A lot of people say why don't I use **"G" for galvanized, because I choose "C" as the point of ?? combination of materials. You can put anything as galvanized, we call them composite materials,** and that's why I use "C" for. In the process of life as you change the .. the inner materials of what we call plating, or galvanization, we can do other things, we can galvanize on gold, we plate gold, we plate silver in Nano structure. We can plate any metal combination of what we call point of reference, that's why I use "C" as a composite, not as galvanized.

### **Increased the strength of Blood - Energized Blood**

If you looked at the operation of all this, you have seen in the past we used the **combination of these 4 in a very hidden way, to create sugar and blood.** At the same time **which means we produced energized blood.** We managed to **increase the .. strength of it,** and in that process we created more and more materials and conditions which lead to creation of life, support to life. (:22).

## **The CO<sub>2</sub> in Air needed to make the AA**

**Without the presence and existence of the CO<sub>2</sub> in the air, it would not have been possible the creation of amino acid (AA).** So there is one more important thing you all have noticed during all these processes.

## **Different types of AA started the process of creating life**

It doesn't matter how you took it, **you continuously produce different type of AA. Which means in the process of putting the material on the surface, the process of life started.** The AA created over this process where you created the CO<sub>2</sub>, is different than the AA now over the same plate, because now there is a mixture of AA of blood, .. of CH<sub>3</sub>, there is a mixture. So your AA on the top is a different AA as you had in individual sections and systems.

## **Nano coated Zn with Cu - Salts - AA on Skin allows life with in planet**

In the process of understanding more and more, when it came to produce the physical conditions and using the Cu in the process of the Cu and Zn, or the process that **not many of you tried Nano coated Zn with the Cu itself.** You always used the N coated Cu, none of you went and changed and see what happens when you **use a N coated Zn with the Cu. You did Zn with Zn. (:24). This now opens a new D,** with the use of Ca, K, Mg, and other factors which you had in the water, and presence of Silicon, and everything else **creates AA on the skin, that allows life to be created within this planet.**

## **Mg and K in presence Na - Determine what kind of Animals**

How you **change the factors between the Mg and the K, will decide on how materials will react, what kind of animals is going to be, and especially in the presence of the Na.**

## **Increasing Mg or K with Na - Get Vertical Plant Life**

Then if you **increase the Mg in a specific way you create vertical life. If you increase the what I call K, in the presence of Na you get vertical life.** In a way, we know this factor, but now we can put it in a larger scale.

## **Chromosomes depend on a Base Energy material - different forms life**

We say if one has a extra Y or X chromosomes or this and that, it will be a boy and a girl. In the world of creation **the whole chromosome depends on a base energy.** In the space if I change your body into a different material of the base, I take condition of the **radioactive material, which is the K, (:26). you will find totally different kind of life.**

## **Changes in Salinity get different kinds of tissues**

**Mg and Na combination will give a different kind of combination of white and red, hard, solid, soft tissues.** Then we understand the process of creation. **Small changes in the percentage of one or the other will create different tissues.**

A slight modification in the salinity in the presence of maybe Cu in a Nano (N) state or Zn in a N state, but a condition of interaction of ?? gravity, will give you Ca as a bone structure.

**In another Universe could have different bone structure than Ca**

**In another U, another condition it could be Cu. You could be walking with the bones,** which are made of Cu or what we call bone, as a holder of the structure of the physicality.

**Everything explained by Cup of Universe - Knowing how to change Conditions**

Then in this process when we understand how the world can exist without any bone structure as such. **Everything in the world of existence can be explained within the conditions of the Cup of Universe. You just need to know which material to move in what position, to what percentage, what G point.** How do you change the energy Cup into the matter Cup. That's a wisdom.

**One Drop create Fish in fish tank - Manipulation of Fields**

This is why I explained to you in the past, with **1 drop of water in a fish tank, I'll show you the fish.** Now you understand, (:28). **that fish comes from this Cup. Because we understand the process of manipulation of the fields,** we understand .. of the different field strengths of the different fields, we understand the process of interaction and manipulation of the fields. Then as we see as with One Drop, we create a man within the womb of the mother, with **One Drop we can create a man in the fish tank.** In the **fish tank of the U.**

**The One Drop - Is the STM**

One Drop, **that drop is the STM.** Physicality of the man would be, in a way, under contention anywhere in the U, but his soul shall not, because he has no D of lower strength physicality to battle with.

**STM works as common denominator with the Soul of the Creator**

The **STM works at a higher strength as a common denominator as the Soul of the Creator (STC),** so it decides where it manifests itself, how it interacts with the strength of the STC.

Now you understand how I have taught you everything about the creation in the past years. Now it's your understanding, now it's your comprehension of interaction. **What happens when you appear on the planet Zeus, and there is no Fe or Cu. It means you don't have existence, it means there is no gravity?**

**How to Change the field forces of gravity - to Inertia - matter state**

How do you create the condition between the 2 forces of creation, **between the matter, and energy**, what we call, (:30). **field forces gravity, and Inertia**. What is the connection and **how do you change the gravity as a field force to Inertia as a matter state of existence?**

**Life, intellect, and existence is not exclusivity of earth**, never been, never shall be.

**Energy packages change to matter state also inside the earth itself**

You all understood that for example, at the boundary of the earth, **energy packages are created from the interaction of the field forces of the earth and the sun**. And we see ?? these approaching the center by the Inertia of the planet, **it changes to the matter state in different parts of the planet itself. Everything does not fall on the surface of the earth**. Some of the energies can only convert within the structure of the physicality of the planet, where in that position they become gold, and silver, and whatever else.

**Energies of U create emotions & physicality in Brain - we are in communication w U**

It's **the same with the energies within the structure of the U**, in the interaction with what we call, the physicality of the body and the brain of the man, **create emotions and physicality within the structure of the brain of the man**. Not everything is arms and legs, not all the interactions are the same. **Then we understand how we are in communication with the rest of the U**. (:32).

**Gain trust in understanding totality by doing your own experiments**

It was **important for us over years to gain you that confidence, to get you that confidence, for you to understand the totality of the physicality** of the man. In so many ways, it was important for us to be able to **gain your trust by your own, by your own doing**, by your own actions, by your own understanding of the process of creation.

**You have tested and made the Gans**

If I told you today (before), if you put a Cu and a plate of Zn, you will make CO<sub>2</sub>, you would have laughed. Impossibilities, but now it is possible because **you have tested it**. You have done this for so many years. **You have seen the AA, when we put in front of you the Cu and Zn, and you created CH<sub>3</sub>** you gained trust to it.

**Now you can further test the Cup of Universe**

Now the CU is **no different, unless you are in denial, or unless you are those who is a hypocrite, or you have no knowledge of the science of creation**. Those of you who deny the existence of the CU, today the way it's explained, it means you have no understanding, and it means this is not your time yet. You are not matured yet to understand the processes, because over years you have tested everything of this, what is on this plate. (:34).

**INERTIA TEACHING starts:**

**Matter state Fields of Inertia - interact w gravity and Plasma's G field - Matter**

In so many ways, **if you understand the difference and the process of creation of gravity and interaction of the fields of the plasma's G field, with the matter state creation of the fields of Inertia, then you have reached halfway** through understanding the totality of the process of the creation.

**You decide where to be Energy and where to be Matter**

**Where to be energy and where to be matter, you will decide this condition, it's you** who will have the say, on which you can say transmit, which one you can transmute, and whether you manifest yourself.

**Interaction with Inertia - You create Physicality**

The point of the interaction and creation of what you call physicality, is understanding the **process of Inertia within the plasmatic field of the U.**

**Inertia of every element is connected to G field force of its environment**

We understand how the **Inertia, every element like its mass, is connected to the environment of its M field G field forces. One is of the higher order, one is of the lower strength,** but in interaction and confirmation **connected to the G field forces of its environment.**

**New Principle - Plasma has GM field - Inertia has GM field**

In so many ways, we can confirm or we can understand **a new principle where we call the plasma's GM field and Inertia GM field.**

**When M field dominate expands - Plasma ; When G field dominate matter - Inertia**

In a way, (:36). what we call the **M field when it expands and dominates you deal with the plasma.** Where the **G fields and its strength in respect to its environment, dominates you become matter state or Inertia.**

**By field of thoughts you can manifest yourself as Energy or Matter state**

This will play an important part in understanding of how and **when through the strength of field of thoughts, you can manifest yourself as energy, or matter state,** or physicality. And **both are connected to the D of field strength of their environment.**

**Through this Process - never get sick - old - all problems solved by himself**

If mankind understands this, mankind in so many ways, **have solved all his problems of being young, never getting sick, being able to eradicate everything in the body ..** by man himself.

**The higher energy of transmutation adjusts all fields back to normal - Cleans you**

Where **through the higher energy as you transform and go through the transmutation of the field of Inertia, the matter state, you can adjust everything to the existence in comparison to the environment of life**, be it on earth, be it on planet Zeus, .. Mars, .. on any galaxy in U and Unicose.

**You work on Inner Sanctums of AA**

Because then you **don't work only by the level of the AA of the man, but you work through the strength of the inner sanctums of the fields of the AA of the man**. Then in respect to it, in every environment you can become physical, or stay in the plasma state. (:38).

**You Resurrect yourself from energy fields of Universe**

What we call, resurrection. Because **you resurrect yourself from the energy fields of the U into the matter state. Or from the matter state you resurrect yourself in the D of energy, of plasma fields, in the D of the higher order in expansion of the fields of the U**.

**Understanding the Power of Inner Sanctum of STM**

As I said, now we start teaching you to understand the interconnection, the understanding, **the power which the man has within the inner sanctum of the STM**.

**Scientific World never understood the plasmatic field interaction**

This has been one of the **biggest problems for the scientific world on this planet for time of the beginning of understanding the terms of Inertia and gravity, or what we call plasmatic fields interactions**. We know it is there but we connected it to, what was and what is.

**Become Tangible anywhere as Plasma - liquid - solid - gas**

When in reality it's understanding of the order of the strength of the environment and **you can become tangible anywhere, and if you get your Inertia M fields in the right order, in the Inertia section of the work, you can become a liquid, .. a solid, .. a gas**, or you can become what we call, the first order of the creation as a **plasma**.

**Come from Plasma- interaction w/ Inertia become solid - l - g - whatever**

Mankind has got everything in his cycle of understanding that went wrong with, right. **We come from plasma and in interaction with Inertia and the strength of Inertia we become what we call, solid, gas, or in a way, (:40). whatever we want to be**.

## **Plasma First Order of state of matter - Not 4th state of Matter**

So in reality mankind has no choice, but to understand more about the facts, that **plasma is not the 4th state of matter, but plasma is the first order of state of matter.**

Interaction of Plasma with Inertia - Creates Tangibility

This is where the **interaction of the plasma with the Inertia creates the condition of what we call tangibility.**

**When we move from the Inertia of the U to the Inertia of the planetary, or environment, then we become matter state.**

In totality mankind has to move into a new D and direction. **What happens that now that you are in the field strength of all these Nano materials**, which you have put in the system (? Cup Universe). How would you interact? How would you consider and work, because is it, or can it be, or would it be possible to understand new dimensions? Because now you have a totally different working in this place. What happens to this? **What happens where the N Fe interacts with the Fe itself? In the presence of Cu or Zn? (:42).**

**Many combination of many factors allows many configurations of Cells**

Now you understand a totally different game. In a **combination of many factors allows you to create many cells, many configuration of cells, and then interaction of the cells with themselves, and with their fields, of their fields with themselves, and creation of new matter.**

**Accommodation and Interaction with Environment dictates sight - feelings**

Accommodation of creation of all this, **accommodation creation of interaction with environment, which dictates sight**, vision, in a way, touch, feelings, and then you understand **why the fish don't have legs in the oceans, and man doesn't have a fin on the dry land.**

**How Environmental conditions determines the kind of Creatures manifest**

The **condition of the environment, which is created, in interaction with the D of the Inertia strength field and at the same time the MG of the planetary system and environmental systems dictates what creatures you will manifest yourself as, when you become tangible.**

**Man will survive anywhere in U without Oxygen etc - Soul adjusts**

Then you will understand that the **man will survive anywhere in the U without a need for O, .. for food, .. or any medicine, energy pack, because its souls adjust itself into the D of interaction of the fields of the U**, and the point of manifestation. So man understands he can live anywhere within the U, without a gas mask and O pack, and uniforms on his back.

But he **needs to understand, (:44). the interaction of the D of his souls in the D of physicality and the strength of Inertia of the point of manifestation.**

**Man already does this at death - manifests in another D in U**

In a way, **man already knows this but he was blind to it.** When you leave the physical D of this planet and you say **you have died, but your soul takes free into D of U and then manifests itself in another D as another planet and creatures,** then what happened to it. Has ?? anybody soul just explained. Now it's time to take a new shape and in another position in the U according to its ??

**At Death man release plasmatic energy equal to 18 Hiroshima Bombs**

**According to the nuclear scientists and the development of the T every time a man dies, energy, plasmatic energy equal to 18 Hiroshima bombs are released, at least in what we can interpret. So you can imagine what life this energy pack will create in the U.** When it attains its condition of interaction with its physical D in ?? its environmental manifestation.

**Cup of Universe collection of 20 years KF Teaching**

The **Cup of Universe (CU) is a collection of the teachings of the KF in past 20 years,** because now every element in your understanding up to now, of what we call, the Table of Elements can be added to this universal ?? What you see in the Periodic Table in the form of a Nano, (:46). in form of matter, .. liquid, as a Gans, or a solid or whatever added to this creates its own condition and D.

**Periodic Table is only fraction of Elements in U -**

Do not forget that the man's what we call this, **Table of Elements, is a fraction of the elements in the U. Not maybe even 1% of. The PT needs to be much, much bigger, in triple and 4 digits, elements, number of elements.** Man only knows the tip of the iceberg.

**Elements come from energy interactions - size of Unicose**

The iceberg is huge, it's **the size of the energy interactions of the Unicose,** not what man sees on this planet. This is why man will gradually say, he has found new elements in the U .. where in fact they have been there, **they are there from every interaction of every planetary system,** a new element is created that the man has not even understood.

**No Limitation in D of Creation and Creator**

Now **if you understand the process of the creation and the interaction of the different M fields, and the different dimensions of the strength of it,** mankind will become wise to understand that there is no limitation in the D of the creation and the Creator.

## **Increased Man's Confidence before introducing Cup of Universe**

What you look at this **Cup of Universe, thanks god we have taught you enough over the past years, that you have gained confidence**, (:48). in its creation and application. In so many ways, we are putting another piece of the puzzle, which has been hidden from you through the lack of understanding of totality, step by step forward.

## **By changing conditions in CU - Create variety of manifestations**

In so many ways, mankind is getting ready for what I call, another way to look at its own creation, and what has been created amongst and within him. Go back and ?? decide to remove one of these elements, and see what happens. **What happens to the emotion, what happens to the strength of the STM? What happens every time you change different number of the spirals?** Would 10 spiral, G Nano material, and 20 spiral will have the same effect on the rest of the group. Yes it will, of course it will. **It's a different planetary system, a different structure of gravity.**

**This is how every cell in body was created - vacuum condition Nano structures**

**Then if you understood this, (:50). then you understand how to create every cell of the body of the man.** As the body of the man is **in a vacuum existence of the N structures of many, many elements. It's a mayhem and a soup of the fields of the U.**

## **Empty Cup of Universe introduced in Einhooven**

In so many ways, I want to explain something very interesting to you, as I brought it up in the Bucharest Conference. Here you see 5 elements, N coated in different structures and you can see the interaction of this space in 5 and some bits, from the fields of the U, we have , which we have made differently, creates different Cup of Life, if you remember **in Einhooven I opened a box with 27 different elements, position and size, and I opened it and I said, "this is an empty Cup of Universe." Empty Box of Universe.**

## **How we created energy from Cup**

Now you **understand how we were creating energies from it, as every position, and every N coating, and every shape creates different D, and this Cup is not empty,** but is a Cup of Life of the U, very much like the Cup we showed.

## **Took 10 years for man to understand CU**

It took me **since 2011, now we are in 2021, (:52). 10 years for you, to show you the empty Cup of Universe,** and an empty CU. For a box to a cup. The knowledge has always been there, it's man we had to teach for him to understand, the **cup was not empty, it was full of fields of the creation within the U.**

Now you understand how the T has always been at the reach of the man, but man was not aware of the T. 10 years to open this box for man to understand. The process of creation is amazingly simple. The process of understanding, the process of the creation, is a little bit hard, for those who do not understand.

## **Soul of Physicality is his control system**

In so many ways, mankind now has to understand that while his physicality exists, itself **he has a control system as a soul of his physicality, and a totality of interaction of all the fields of it, has a soul, which works and interacts with every D and beyond.** (:54).

Where in a way, **the physicality of the man it's interaction of the fields of the STM with the Inertia of the interaction of the fields of his matter, which creates the manifestation of his physicality.**

## **Planetary System fields work from outside inwards - Sun rays interact with center**

Which in a way, **works outside, in, for the planetary system,** but for the life of dynamic life of the body of the man it works from inside, out. **We beam the rays of the Sun, we create the fields, and then in interaction with the center, we create the what we call the Inertia and the MG fields.**

## **Body - Fields come from inside STM outwards - Inertia - manifest physicality**

Where in the process of the **body of the man, the field comes from inside, and in interaction of the fields of the environment outside, and the condition of interaction of fields of Inertia, manifests as physicality.**

## **Inertia of Environment dictates how STM will manifest itself**

So when we tell you, **you travel with the D of the soul, the soul in any condition in the U as interacts outside, will create different manifestation, could be any shape, any color, any U.** Because the source itself, when interacts with fields of its environment and in interaction with the balance of the fields, and creation of manifestation of fields strength of existence, **the Inertia of the environment, dictates how the fields of the STM will manifest itself** in that environment.

## **The STM is image of Me (Creator) - not the physicality**

**I have made man in the image of Myself. Does not matter where the man is, because it's the STM which is the image of Me, (;56). not the physicality of the man,** which is image of Me. This is understanding the knowledge of the creation.

## **Man does not change - just different manifestation in different environment**

**Man does not change just because he puts a different frocks on him.** A clown or a pig, or a doctor, or a black or white. It's the soul of the man, which in its interaction with its environment, dictates the condition of the manifestation. Then ask yourself how, what, and which strength of the field of the soul creates the life in the shape of a pig, or a dog, or a tree.

## **Pig wiser than King - works with his environment does not kill**

As so many times when you look from outside in the D of the strength of the soul, you don't see the farmer and the king, you don't see the man and a donkey. **You don't see if that brain belongs to a king, or a pig, even though the pig is much wiser than the king, because he understands how to interact to survive within the structure of his fields, in his environment.** Where it does not kill and supports his life with what is available ?? , whereas **the king has to kill because he knows no other way**, and he has more soul than a pig. because he is ?? and taken the life of another life.

This is why we always teach, we always promote understanding of the knowledge. (:58). Where **a pig is higher than a king**, because his soul has chosen a different life. So shall be even **a tree is bigger than a king, because it never kills.** Does not possess as what is agreed with its environment, and its possession. Now we understand.

### **Process of STM as plasma - forming Inertia than to manifestation**

Now we understand how the STM manifests itself in the different dimensions in the U. Where the STM sits as a plasma, **it interacts to the D of the fields of the environment in a M direction. And once it reaches the point of the balance of interaction with its environment, it creates a D and strength of the fields of what we call the Inertia strength, and then manifests itself, with the interaction of fields of its environment.**

### **Without Interaction NO Inertia will be created - No manifestation**

**Otherwise the soul of the environment, and the STM, as long as they don't interact, they shall not create the condition of acceptance of physicality** in the strength of the presence and manifestation, what we call the **Inertia condition.**

I hope in today's teaching I opened, in a way, peeled another what I call layer from the onion of the knowledge of the U. Step by step we take you deeper to understand the ?? gift to ?? receive, ?? to the center, to the essence of the creation through understanding the knowledge of the creation. Mankind, (1:00). has a lot to learn, as long as he understands the process, and can take steps to further understand what is the next step, where does it lead to, and what is its functionality, and what is the response and the reason for its creation, at that point it will respond. We go to a break ... but now you have seen the process of 10 years of teaching, how **we brought the matter, and the soul, and now CU we show how the 2 interact.**

### **Another step Inertia of environment is the STC - mankind isn't ready yet**

There is **another step to come, which as we said, is depending on the Inertia of the environment, where that Inertia of the environment is the Soul of the Creator (STC). Mankind is not ready for this topic yet.** When we understand more.

Rick would you like to go for a break ..

>> **BREAK** >> (1:06). 391 KSW July 29th, 2021

## **How Inertia is formed**

Q: ... regarding Inertia (1:08). .. **the different elements form with the earth environments, like in the atmosphere or the heavier elements within the earth ..**

.can we say in general the stronger plasmatic field strengths .. stronger energy packs, that they form the physicality more towards the center of the earth because of the Inertial interaction happens closer to the center of the earth rather than higher?

K- .. can you explain more deeper or explain exactly what you mean.

Q: **My understanding of the Inertial field is that it is a point of interaction between, for instance, the earth and the sun, or any other 2 plasmas, the point at which their respective fields find a balance point, a certain region which we call Inertia is formed. ..?**

**Inertia is dependent on Strength field of environment - plasma - entity to observe it**

K- **Inertia, let me redefine it, maybe in a different way. Inertia (1:10). is dependent on the strength field of not only the environment and the plasma, but of the point of observation, or entity to observe it.**

**Invisible - when Inertia not in balance to another Inertia - no interaction**

If we create **the Inertia**, or the earth's Inertia creates manifestation to our and earth's physicality, (if it) **is not in balance to the point of observation of another entity, earth does not exist. Inertia has a point of confirmation of existence in respect to another Inertia** or field observation point.

**Many matter's in Universe are Invisible to us - Inertia doesn't interact**

There are **many matters in the depth of the U we look at, but they are invisible to us, because our point of reference of Inertia in the matter state** of the existence of life of the man, **in that environment does not find common denominator field interaction. So it's invisible to us.**

**To be visible - Has to interact with field strength of STM**

If we change the D of the strength of our soul's interaction with its environment, then we will see the U is full of things we never knew. Because **then their field strength of Inertia interacts with the field strength Inertia of the STM.** This Inertia is only manifestable when it interacts with the Inertia strength of the field of the man. (1:12).

**How you can walk through a stone**

Then if you understand this, then you **understand how even you can walk through a stone, because its Inertia does not exist in the interaction with the Inertia of the field of the STM.** Do you understand?

Q: I am not sure. it seems

**Vacuum condition of life of man has an Inertia**

K- You see, **earth has an Inertia**. The STM when the environment of **the vacuum condition of the life of the man has an Inertia, and these two Inertias have to match for it to matter condition to be visible to us, tangible to us.**

### **Soul decides the point of interaction**

In the **D** where our soul has decided the point of interaction. **Field strength, common field strength denomination.**

Q: .. When you say, it depends on what our soul has decided. Is it a decision of the soul,

K- only

Q: or a factor of the strength of the soul?

### **Our Soul created out of fields of planet - this is common denominator reference**

K- **Our soul is created out of the interaction of the fields of this planet. So it already has a point of reference common denominator Inertia interaction. It's a child of the child.** You understand. We are a child of the Sun, and the interaction of it, with the interaction of the field of the earth has created us in the condition of the visible condition of the man.

### **Body is like another moon of Earth**

And we are entering, **what we have created another moon, which we call the body of the man. But because of its close proximity and the field interaction of the Inertia of the body of the STM, we see the manifestation of the physicality of the man.**  
(1:14).

### **Take AA of man to another position in U - A different kind of manifestation**

**If you take the amino acid (AA) of the man in another position in the U, will not survive, he'll survive, but will not be able to manifest itself the way it does on this planet.** You understand?

### **We confirm our existence through existence of soul of planet**

**We confirm our existence through the existence of the soul of this planet, because we are created out of the strength balance of its fields.**

### **Would have been created differently on Moon**

**We would have never been created on the moon this way, because it has different Inertia, and different interaction.**

### **Our body is an independent Solar System on the Earth's planetary system**

We are humans, we are any independent **body, is another solar system, another planetary within another planetary**, which we call the earth planetary system.

### **Body is higher vacuum than space - why exists close to G field of planet**

**Our body, it has more or less 1 or 2 order of magnitude higher vacuum condition than the space. That's why it can exist so close to the G field of this planet.**

**We are another vacuum solar system with own planetary system inside us**

We are not just a body walking on the street, **we are another solar system, vacuum, totally vacuum with its own planetary system, its own solar system,** and everything else.

**By adjusting field strength of Soul - don't need to walk over planet**

**If you could adjust the strength of the field of the soul, you don't need to walk,** you can ?? shift over the planet.

**How Do we alter the Strength of our Soul?**

Q: So what dictates how we alter the strength of the soul?

**Subconscious Discipline - acts as a filtering system**

K- Our subconscious discipline, or filtering system as I call it. (1:16).

**Disconnect from any Attachment to planet - Fly - Transmute - Anything**

**There are a number of factors how we are attached to this planet. If we can loosen or disconnect step by step of any of them, we can fly, .. transmute, .. transport, we can do everything. It's just realizing how to connect, and know how to take out.** You can physically.

**Change Inertia of body - Can enter body with fingers instead of knife**

If you understand it, ... **if you could change the Inertia field forces of the body of the man, add the arms and legs of somebody else's, could do, you can penetrate the body of the man, you can take an organ out, fix it and put it back, or do it while it's inside you with another.**

**We need to change our Subconscious Decision - as knowledge increases**

You see **we have made a subconscious decision to these things, that it needs to become changed, as our knowledge increases.**

**Subconsciously we allow surgeons to operate on us**

**We allow a surgeon, to cut into us. We allow another foreign body to enter our body environment to take things out, and to put things back in, and sew things up. Because our body has accepted in the subconscious control of.**

**Adjust fields of STM can do surgery with fingers**

**If you can go into the system of the STM and readjust it, the way you put a knife in the body, you can put a finger in the body. It's not magic**, it's understanding the principle of creation. We allow a surgeon to go inside our body, because subconsciously we see it as a point of survival, something we can do. If we allow a knife in the body, depending on its GM field state of it, (1:18). solid state, so we can do a finger. So you can put your hand in, but we never think about it, because to us it's something beyond the point of reference of understanding. **If I can lower my condition of ?? expectation by the field interaction, and allow a surgeon to put his hands, as he has the same field as me, he doesn't need a knife to get in.**

**We Control the Inertia field barrier of our body**

**It's us who creates that initial what I call, Inertial field barrier. So we can control it.** It takes time to teach. It takes time to understand. I teach many things but if you don't understand it you can't use it.

**KS in Bucharest stopped eating for 14 days - Energy directly from environment**

We had a guy, one of the organizers of Bucharest conference, he said, **he has moved into the plasma energy, that he hasn't eaten anything for 14 days.** We've seen it in China. **Do we need to create that barrier to convert the energy of the man, or we become like a plant, takes the energy in any shape or form from the environment.**

**Many Knowledge Seekers start practicing using plasma instead of food**

**Many KS have started practicing**, and once you practice this and understand it and start practicing, then why do you need to take only food as a water, **why can't you take the energy into the soul.** Then do you need my permission as a doctor to enter my body to fix something, or does your soul agree with my soul, that it allows the physical interaction and D. (1:20). ?? without resistance.

There is a lot to come. KS from all over the world will open up new frontiers to the world of science. I see this start coming because some of them start understanding, and they don't become magician, but they understand the process.

**Making Child from Soul**

**Feeding your soul without the physicality, and then gradually changing over. And then you can create a child without a physical sperm and egg, where the soul decides**, and they can .. a egg and sperm is created. Because we allow conversion. ..

**Q: Does this control of the Inertial fields come from our understanding** or is there something in our physicality, that is actually able to sense these Inertial fields? At some point there is a touch point, where our understanding and our control ..?

**It's Fear that stops us from taking control of Inertia Fields**

K- It's a fear. It's the fear. Fear is an emotion, and that **fear, is what stops you doing things. It's one of the safety valves, one of the important safety valves ever created by D of emotion.**

## **Jump out of Spaceship and know you will survive**

If you jump out of a space ship and know you are going to be alive because now you switched to another D and strength field of your soul, you will jump. But the fear of not knowing, is what you will not do.

## **Baby goes through same fear in birth channel - Diabetic**

But at the point of the 9 months, (1:22). when the child goes through the birth tube, goes through the same fear. That's why we see the diabetic born. If you have no fear and you jump, on the other end is the air you breath, and you survive. If we get 100 people to jump out of the space lab into the space, would all die, or those who have no fear will survive, and switch to a new D field strength of the body. If the whole 100 numbers have no fear of, they all will survive. They start the new generation and cycle of life in the space.

## **We train ourselves to accept more pain**

We do that with our physical life, we go through training to accept more pain, more pressures, more and more. We go through the courses, we train ourselves to withstand very low temperatures, we go and sit in the ice for hours. We go into the frozen swimming pools, where if I go with no experience, no training I will die within minutes. We call it a hypothermia. Why doesn't it happen to them? Because they accept the new condition. We have to accept, this is another stage after the life in the physical D, if we go through it.

And that fear holds us, encapsulates us, and imprisons us. But fear with knowledge is different then fear with no knowledge, and just jumping and seeing what happens. The guy who goes and sits in the ice water pool has to train, has understood how to adjust his body. (1:24). How to create a fear bigger than the fear of death that you can go in there and beat it.

## **Chinese KS going to level of Soul very soon - West too materialistic**

Q: So it's our understanding that develops, that creates the ability to, the sense of the fear will alter as our understanding grows?

K- In a way, I see a number of Chinese KS moving to the level of the soul very soon. A few KS in the west, because we are too materialistic, may do, in time to come. But the KS of Chinese KS, who went and are going through the process of no physical food will gradually reach a point that they connect to the soul, and then they go through the feeding the soul that it feeds the physicality, they don't need to drink or eat.

It's not the first time, many people in the past have reached this position.

## **Rick using Gans Water and Maple Syrup - fasting**

R: I myself have just gone 5 days without food, ?? without. ?? So that's

K- What did you do?

**R: I used both the Gans water and what's called the ?? master cleanser, lemon juice and maple syrup and water drink, and it works quite well.** I start to feel better now than I did at the beginning. (1:26). I was having trouble and that's why I started fasting.

**K- But you are still taking the magic maple syrup of Canada.**

R: Yes, it's a sugar, but it's a broad spectrum sugar, it's got multiple types of sugar in it. It's from the sap of a tree, the blood of a tree. ..

But it works for me, I have done it 2 or 3 times before in my life and I saved myself with an Indian Summer Ulcer, and all kinds of pain and they wanted to operate on me ... so as a last ditch effort I decided to fast and I was cured of my stomach ulcer, that had doubled over and pain for a month, within 3 days, the pain was gone, the stomach ulcer cured within 10 days. So now I know the power fo being without food is amazing

..

**Half of Man's disease go if he doesn't kill**

**K- I think half of man's diseases will go away when he doesn't ?? kill**

R: I had that exact thought yesterday. It's the consumption of food, in excess of course, that ends up giving us problems. Maybe I ate too many of these power bars. I think the chocolate did me in. on the physical level. I was down and out for 2 days solid. I had to start fasting to cooperate. (1:28).

K- What we'll see is the number of KS will slowly go through the what we call transition process, especially the Chinese ??

R; Definitely fasting you get much closer to the soul. the outer layers tend to fall after no longer eating something, looking for food, preparing food ... all of that ritual. That frees you up .. time of reflection. going inside .. reprogramming yourself.

.. a lot of our energy goes for digesting of the food. and you get 80% from the environment only 20% from the food ... (1:30).

**K- .. We gradually progress towards this direction and D. We gradually more and more KS will come to this point.**

R: .. I went for a walk ... I encountered a person . had her hand on tree ... I asked what is this tree telling you. ... how she sometimes gets visions and mental images from trees . healing for herself and sending the healing back into the tree (1:32). as well. ... a local person with "Ascension website," .. I told her about KF ...

...

It's amazing how the interconnection with people can happen ...

(1:34). ..

K- That's fantastic. We connect in different ways with people according to how and the way we see our or the way our soul sees our position in respect to the environment we are in. I think more and more KS in the coming time, will start a new path in evolution in understanding the totality, and become part of .. cycle of life which is more open to understanding more knowledge about the creation. It's a new creation, new generation of man who will gradually come back to the condition of "no consumption," it doesn't matter what.

Any other question.

Q: you said last week there is **only one way to connect the Cup, having all our emotion in common, isn't that the way to connect?** if not, could our fingers be the connection, our skin be the Nano?

K- **I said that because, I said, there is one way to connect the Cup, (1:36). to get the response. In a way, you can connect this Cup in any shape** or form and D and get a specific response. But if you connect the whole structure of the Cup in one way, which you'll find the only way, which will give you the final outcome, is the creation of a new life. or creation of interaction with a new soul in the center of the Cup. That's what I was ?? talking ?? as long as this science ?? jumped .. A couple of teachings before when I spoke about the crystal, and the ball we put on top of the table in the KS teaching. Once you create the right balance of fields, materials and conditions. in the CU, that circle I put in the center, which I said is the soul, that will light up, then that you create ?? you become a creator of a soul. Energy fields that they light up. That in interaction with the fields of your existence lights up. .. and then you will see the Cup light up.

I saw this recently, this has no relationship to what we teach. This is different diamond the old cut I call it. This in fact focuses on many things .. (1:38). that you can light up, .. create that what we call, condition of the light in the center ?? and it becomes the soul ..

**(1:40). You've got to become like the Creator, a perfectionist. Everything has to be, otherwise you get something else you were not expecting.**

Any other question

Q: Azar, 2 hemisphere in the CU .. Can I use the body as a CU, and each organ as a plate, either spiral or flat connecting all the organ al the salts are there. ?

K- The body of the man is a CU.

Q:

K- It depends where you want to place ?? (1:42).

Q: So how can I play with them ...

It's how you interact, because don't forget most of the things in there, are already predetermined over billions of years through different ancestors of you. Now you have ?? open a motorway through ..

Q; So you said there is a lot of junk in there, so I have to remove the junk.

K- No, not a junk, it's just there. it's you because of all those things put together by your ancestor blood holders. The body of the man is not just as you see it today. Every organ, every cell in your body is added preplanned added, to be there to create that condition. Even the position of your kidneys is not the same position as everybody else's, because somehow this thing in your body has to be in a given position to create other conditions for it, so the other cells and organs can exist. Changing a body of the man, is a big, big job. It's easier to work with the soul than the physicality, if you want to make any changes.

Q: I understand it .. because when I was 30 years old .. check up with doctor, with my liver. He said, where you come from when I told him (1:44). he said, okay that has to do with that region in Iran that has this, come form that generation, that is normal, and he dismissed (disease) he said it's okay. Now I understand that.

## **REINCARNATION and Buddhist Beliefs - KF Only one life**

Q: .. This comes up anywhere I go, because this comes up with **especially Buddhists community, they believe in reincarnation**. I keep talking with them, but even with **people that got enlightened they said, even Buddha, if you look at his script he described every life he lived on this planet, even single cell with detail**. So when I said, there is no reincarnation, they said, yes it is. So .. there are people now as gurus when they got enlightened they talk about all their past lives. .. **when they got enlightened they don't accumulate any actions anymore, because at the time of death they are not going to die, they leave their body, because they don't want to come back. But you say, we don't come back, we only have one life**. So how do you . ?

**Humans only have one life because you have chosen that way**

K- Humans, **humans have one life because we have chosen that way**.

**Souls can choose a cycle of lives - but remain the same inside**

**If you choose a cycle of life, which is to achieve a target you can change different clothes. You don't change as a person, just because you put different clothes on. You are still the same man inside, but with us, that inside is the soul, it doesn't matter what frock we put on.**

**Mr. Keshe knows exactly the Oasis he stayed for decades**

I was explaining this to KS ... **I can tell you exactly, precisely where there is even today an oasis, 1 tree, 1 water wells, and I stayed there, (1:46). till the time was right**. I explained this to the KS, I remember clearly the whole stages of the life, existence of the life, **because we are present as a soul**, not in the D, we choose the D of physicality to be present or not.

**Man chooses to have One Life because he comes from physicality to the soul**

**But man chooses one physical life and he carries on because it comes from amalgamation of physicality to soul.**

**We come from the soul to physicality. It's a totally different position.**

**New Life on Earth will come from Soul to physicality**

This is what I said, **the new life on earth to come is created out of the soul, interaction of the souls and not physicality.**

**I remember the hammer of the nail in palm of hand**

This is why I said, many times, **I even remember the hammer of the nail in the palm of the hand. We choose .. mankind changes clothing**, we change the clothing of the physicality of the man, which is a big difference.

**Do NOT remember past lives - It's in the RNA**

Then we don't need to remember, because it is part of the process of the soul, it's not in memory bank, it's in RNA.

**Many People say Past Lives - Fake Talk - We see the Soul**

Many people I have spoken to, I can tell you, they just talk, because they recognize .. because they don't understand, this is just a fake talk, because we see the soul.

**Same Soul - Moses - Christ - Mohammad - everybody else**

We walk .. you change clothes, we change bodies, but it is the same soul, be it the soul of Christ, .. Moses, Mohammad, and everybody else. (1:48).

**At Death the Soul gets Free to start the learning process**

There is a **big difference, when you come from the soul, you change the physicality, or physicality you change the clothes, because you have no control over it, you just, the bird free, now go and learn.**

**We from the Soul have already learned - We come to show (teach)**

Where we have learned we come to show. There is a big difference.

**How did you show up in your mother's womb? if not human**

Q: .. You said **you are from planet Zeus and you come here.** How if there are other people who are not from here but they live on this planet, **how did you show up in your mothers womb? How did that happen?**

**We take the body - Not the process of birth**

K- We **take the body of man, we don't take the process of life of the birth of the man.** it's totally different.

**Planet Zeus means the Creator**

If I tell you **the planet Zeus is the Creator, how would you take it? You'd go crazy so we are happy with planet Z so we play with planet Z.** the understanding is according to the intelligence. The process of creation and the physical D or the soul D. You can create through the soul, then the physicality can be any. Or you go the way the physical D goes, you create the physicality to create the soul, and that soul moves its freedom, to take new D.

**(Does not disclose yet the way he came to human body)  
But we come a different way. We come through the soul.**

**Soul generated humans can live anywhere in the U**

That's **why I start teaching that the new generation of man will create the soul first, (1:50). and then through it the physicality decides, because the new generation can live anywhere in the U** because he changes just the clothes, but the soul in essence is the same.

### **Soul Created beings have the Knowledge of the Universe**

**When you are created out of the soul you carry the knowledge of the U. Because when the soul is created all the fields of the creation will come together to create that soul.**

### **First Soul Created Human about to be created - Mitra**

**We are about to witness the first such a thing on earth, in the what you call, creation of the birth of it, very soon. That is what we call, the Mitra, the mother of the creation. We give it a name but in essence it's the soul which can allow the life a new generation of life to be created, through the soul of the existence, and not through the physicality. This process is part of the teaching, gradually we'll come to it. As I said, in the past, we don't have a delivery room in the U, because it is created out of the soul. You **don't need a birth passage because it comes out of what we call the beauty of the wanting to give, what you call love.** It's a big difference. We are not visionaries, we are creators of the visions. It's a big difference. (1:52). Any other question?**

Q: . Inertia of the environment is the STC, please elaborate on it.

K- Nope, listen to it, you'll understand it. It depends who is the creator, and what you want to create, and who is the observer of that creation. You can tell someone how much, you can tell people around you how much you love something. When they are not in love with it they don't understand what it means. He is crazy, he is in love with a chair or a picture, but to you, you have established a field strength of understanding and connection, it means everything to you. So it's a point of observation, what is, what connection you have made with it. It's the same as Inertia.

I was with a KS and we saw girls, (1:54). get dressed up with brides clothes ...

.. The KS said, who is falls in love with that one, that she is getting married. I said, very simply, it's in the eye of the beholder. But you want to see what you want in that , that you manifest through it, ?? she love to him. This is what we call the Inertia of the manifestation. How it will manifest or how we want it to manifest, a physical D to the STM. This is the simplicity of it, the understanding of it. You change the love for such a thing to love for creating a ???

(interruption by Rick ?? couldn't hear K)

Q: Please explain how the interaction between us .. or the STM

K- Can you hear me Rick. (1:56).

( Rick is disconnected .... ) (1:58). (1:59) 40 )

### **We prefer to hear noises than communicate through the soul**

Q: Could you explain how this interaction between us in this moment is creating a new cycle of creation, or acting over the STM?

K- Both ways, but we choose to use the physical D. (2:00). As simple as that. **Your soul hears before my voice goes, but the way we are geared up we prefer to hear it by noise than by soul.** ..

There is something .. the 4 and 5th of September conference in Linz .. (2:02).

(2:08).

Any other question

### **We Don't transfer consciousness to trees - we connect - feel pain**

Q: .. **I tried to shift my consciousness into a tree. To my surprise and shock I was in the tree.** I retreated back into myself, fear perhaps made me return. ?

K- **It's very easy you can do that.** We can do this very easily.

R: ..

K- **We don't transfer, we connect, we understand. In English language you say, I feel your pain, or I feel what you are talking about** because I have been through the experience, we have some line of connection.

### **We Block connections with Plants because we eat them**

**We have a lot of connections with the plants and trees and everything else, but we decided to block it, because then we can't eat them.** It's the same with everything else. I always laugh when I hear pigs are 99.5% the same as humans. We are all the same, because we are created out of the same protein mixture, (2:10). which came down.

### **Soul of Pig knows you are going to slaughter it - it runs from you**

The environmental condition made you to walk on the 4 legs, and the environmental condition made me to walk on 2 legs, ?? ?? it's no different. Why you think when you go to, and you're **a pig, it runs away from you.** Why do you think when you go and get a **chicken to slaughter to eat, it runs away from you? Because he knows from the soul what you are up to do to him.** It doesn't need the language, he doesn't see the knife. It's not the fear, he keeps his distance, I know what you are going to do to me, and I don't accept it. We got 2 legs we are faster, more agile e catch it, but in fact the soul of the chicken already knew what your soul was planning for it.

### **Sometimes you ignore the pain - it's too bad - ignore emotions**

It's a very strange feeling, and **sometimes it hits you so bad.** Sometimes you just ignore the ?? pain, to go, and that's the way it has got to be, the way it is, **to come through an experience and to go.** I had this feeling yesterday very bad. We were invited for meeting ??/ and made a beautiful soup of chickens, ?? just before we start I was told the family has slaughtered a chicken this morning to make the soup as we were coming.

**Now you can imagine how I felt eating. It was too late to do anything.** In so many ways, (2:12). we choose in the ?? wideness, to be able to carry on. This is how we become, who we become, ignoring emotions, because we are more important than those ?? emotions.

Any other question?

Q: Dean ... 4th and 5th September, elaborate on this ..?

K- Nope, at the moment it is just a conference. I know you are there, you most probably speaking from that center. We are trying to readdress this in a different way. We do not disclose this ...

(2:14). that we spoke with the lady and bla, bla ...

E are planning to do totally different things with it. We haven't released the center position ... today the center will receive its first visitors .

4th and 5th opening of the conference center. Now we are permanently there, will be there for years to come ...

(2:16). The audience may part of them .. there's a different way, we don't put outside.

Q: .. the building looks very impressive .. The EU positioned well.

K- You are there everyday.

Q: .

K- This is going to be a departure from what we done before. ... The Exhibition Center in Linz, .. in next few weeks we try to open it ...

(2:18). Every time we announce what is about to happen, especially 2 or 3 pedophile groups targeting ..

The game of the T is now in the hands of space scientists.

we show flights. We don't expect to see people around the KF who were internally destroying ..

Q: .. it's wonderful .. (2:20).

### **Queen Mary College acknowledging Mr. Keshe send representative**

K- One of the interesting things. **London where I received my degree .. Queen Mary College will have a representative in a way, acknowledging the knowledge came through the University**, in the opening of the conference. my last visit to Queen M College 4 or 5 weeks ago in London, the scientists from there .. has achieved such a goal, will be present.

Hopefully we'll see leading scientists from universities ...

we'll see how it goes ... (2:22).

Q: ..

### **Scientists attended Bucharest Conference**

K- **We saw a number of professors and lead scientists in Romania in Bucharest conference. Scientists now are preferred to look and to see**, and we will use

conditions we have. We'll have a conference outside for world politicians to decide, and seeing what is on the table of knowledge, that what we are going to do next. This is the way to do, this is one of the big ways to do. We talked enough with KS now it's time to bring the scientists and professors in a very secure way to see what it is about, what it is.

Any other question.

(2:24).

### **UK Company setup - factory coming**

K- KF holding company is already setup in UK ...

Our first EU center will most probably be opening end of this year, beginning of next year, will be opened up, as we have received orders in UK. setup manufacture in UK collaborate with universities in UK.

(2:26).

Any other question.

Q: ... when I was to pass energy to somebody

I felt a lot of love ..

K- No it's the expectation, not the expectation, intention you know what you are going to do. You are aware of the intention, either way you choose, tune yourself up.

We expect to be in city of Beijing China.

(2:28).

### **Using Cups to transmit emotion and intention from our soul**

Q: In order to **transmit the field emotion is it enough to create with intent from our soul**, the peace emotion. How can we change some element in our CL or CU to create the new emotion.

K- I have seen a lot of people, (2:30). have started .. developing the CU, try to work in a different way. You already made the 5 Stacker CM with the soul.

### **Put yourself and intentions between Cups you have made**

Now **when you make a CU put them near to each other and stand between them.**

**Both made by one man, one soul, and see what the intention, what you feel in communication, when you made the CU and CM.** And try to extend the strength of your soul to the 2 cups. Sometimes put a camera on and see if you see the light of your own soul to extend to the two. This will give you, because both built by you, the intention the purpose of your thoughts, see if you can extend the soul beyond the boundary of your physicality through the 2 systems you made yourself.

### **Point of Transmutation Expansion of soul through structure you create**

In a way, it will **be the first time you enter the point of transmutation, expansion of the physicality or D of the soul within the structure of the framework you have made.** and then you'll see, understand, this is part of the process we will gradually take you through for KS to understand. Then we'll teach you how to transmute, or what you call

we don't teleport you, we allow you to transmute your intention of soul and D of travel. (2:32).

**There is a lot to come, a lot to teach. maybe those of you who are working, first thing before you do this find out how you are connecting your CU,** and then when you have understood, then right moves, then use the CM stacker of 5, and UC as you are the creator of both, you will see how we can extend your soul, beyond the boundary but limitation ?? you ?? It will be an interesting time ...  
( I will switch from one system to another ... (2:34).

### **How does the soul handle humiliation trauma of past - hammer and nails**

Q: Mehranez ... you still feel the hammer in your hand .... **How does the soul handle these traumatized humiliation of the past,** I imagine it so ?? colors the body

K- Can you repeat .. (2:36).

Q: ... how does the soul handle trauma, and humiliation .. **I can imagine the soul covers the body so it doesn't feel all that, .. soul uses this incident so it doesn't bother it anymore.** Because here when somebody has a trauma the healing .. ...

### **From Soul point of view we don't see the trauma - final objective**

K- Let me explain something to you. **There is no traumatization, there is no what do you call, what you accept to be, and what it is. It is interesting to see how we distinguish between the ?? child (2:38).** Trying to find the right word. When you look at it from the man's point of view, .. I am trying to explain in a way which is .. we look at this from the way **you are talking, from the human point of view. We talk about from soul point of view. When you look and work from the soul point of view, the final target, what it is to achieve is the objective.**

**When you look at it from man's point of view, the fear and what is going to happen and the rest of it,** what is going to be, I am not going to be here. I am going to be .. When man dies, you see man dying, (2:40). they always fear, what happens to children, bla, bla, bla. When in the D of the soul we change the physicality, **we look at it what habitual in that D of physicality targets or brings us to the end condition of what is to come. What we planned.**

### **What religion calls prophecy - we planned to be**

This is why in the D of **religion you call it prophecies,** but in the **D of soul it is what we set out to accomplish.** But is change in the word for the man to ?? wrong ?? We plan it to be ?? when the next one comes, these are the things and the conditions, because we have that time, a thousand years, or 600 years to create conditions we said is going to be.

### **Soul lives as different people to arrange for the prophecy to be fulfilled**

Because we **live in different souls with the people, or the physicality in the position to do what we want achieve.** Where in the word of the man you call it a prophecy. You want to go to your mom's house for lunch, you hope, you wish that mom loves me enough that she will make your favorite food. But when mom invited you for the food

she already knew what you love, she has gone shopping for it to the butcher to get that specific meat, the grocery to get such and such to have that food. We go through that process, we making the food ready for what we know is time to come ?? another ?? We create that expectation through different physicality's for it to be there. (2:42). So **mom didn't become a butcher or a grocer. She went to arrange it to be.**

**We are in that position of the soul. It's the same soul.** We go to mom the next and she has another, but you knew you would like this but it is the thing you need next, a lot fo vitamins you have in the last food, the next day you did. So she goes shopping arranging the same thing from the different butcher, different places. So as we work through the soul we organize everything to be what we said.

**You look as a man, because your life cycle of physicality is small, you call it, the prophecies,** it was said to happen, now it is going to happen. But **on the soul side it is the same man organizing everything, that when you come home the food is there.** Because he promised it would be there, he completes it, because he makes all the arrangements to be, it's going to be this at such a time and such a date, in such a position these things will happen, because he has already made it to happen. This is the difference between you as humans and us as souls.

#### **It's not a belief in prophecy - We make it happen**

We talk through the D of the souls, and then the physicality carries. And in the process you see what parts are not there, you go to aunties house you wanted some food there, you put some things she needed at aunties house, but you are still home cooking because they will come for lunch as well. **So we make, there is no belief in whatever, all the animosity, all the worship of the statues, we put a bit of food there for them to be like this when we come for the final diner. That everybody has the same thing on the plate when you come for lunch.** (2:44).

#### **We live a few billion years - it's a few seconds to man**

So we don't look at it the way you look at it, because we live the cycle of the soul. You live **the cycle of the man, and the soul especially at our level exists for few billions of years. So a few thousand years to you, is a few seconds to us.** But we still go through the process of planning time to be. **Then a lot of things becomes much clearer, how things are done. I have said that in the teaching before, it's the same soul, it just has time.** And it has to take time for everything to be ready to catch up.

#### **We started process to go to Moon to be ready for next step**

**Why do you think we started the process of man going to the moon, and rocket T and everything else.** To open the man so he can go to the moon, out of this place. and now we teach you a step further.

We give and control the knowledge ?? application and implication. But it is not all that big, because man still develops and has a sense of creating and intellect.

#### **Sacrificing life through suffering - Catholic belief in pain**

Q: .. **people who give sacrifice of their life** ... I say it is like the military, you can be a very low soldier when you sacrifice and you are killed for your integrity (2:46). .. then **you get higher and higher degree** . is it true ?

K- **That is from the human, it is a kind of human thinking. This is in Catholicism, the more pain you have, the higher you go.** But why do you put yourself in pain to go higher. Why don't you choose another way to understand the soul. It's the way we have been taught

(2:48).

Vatican thought Iran is threat to Christianity .. 9 million land mines to Saddam against Iran.

Ayatollahs gave green key of heaven to children to walk on mines ..

### **Vatican responsible for mass murders of children in Iran - End of Christianity**

One man as Pope decided to commit such a crime. In fact by that act he brought **the end of Christianity, where the religion should not get involved with mass murder.** This is why we said it's the end of Vatican.

### **Vatican doing same thing again - End of Vatican**

And we saw the repeat of the same thing with the present Vatican. (2:50). ?? **biggest arm manufacturing to initiate another cycle of killing. This cycle of Christianity has to end.**

Because in that way what we saw happening creating so many children to die in Iran, creating martyrs as you call it, brought so much suffering. unneeded suffering. We allowed to consolidate a new D of I wish. .. Iran held borders .. .

(2:52).

Any other questions

Q:

(2:54).

### **Every Cell of body has its own salinity**

K- What would you like to have **a cell of heart or cell of a toe, then you have to find what's it salinity** .

R:

### **Ever Organ - Kidney cells have a common denominator salinity**

K- .. no but the thing is every cell has, and manifests itself in a common denominator salinity and then its own division salinity. **When you have a kidney, has a common**

**denominator salinity which all the cells produce in that environment of salinity,** have to have a specific common denominator.

**Each tissue in organs - kidney have their own salinity**

**Then you have different salinity for different walls of the kidney, or different tissues of kidney.**

**Different Rooms of Spaceship made like different tissues in kidney - salinity**  
This is how we construct the spaceships. .. a lot of KS just go, it has to be fields, ?? hold on, where is the salt of it.

**Salt is needed to create the physicality dimension**  
**Without salt you don't create the .. physicality D.**

**KS have not understood about salt up to now - First time explained**

**None of the KS up to now have understood this. This is the first time I explain it.**

**Inertia and Salt are same - needed for manifestation**

**When I make a flying system I consider, it's to just the fields, you have to create that Inertia, or what you call salinity, (2:56). for it to manifest itself, and this is a knowledge KS don't have, so we leave it at that.**

**You have to create environment for fields to manifest - Inertia**

**You can have as many fields interacting as possible, but if you don't create the environment of it, what we call salinity, or we call the Inertia of it, or give it the space, the matter will not appear.** I have seen KS for years rotating reactors. We do rotate reactors but we put something else behind it to manifest physicality, and this is something we have not understood.

**A stone carries salinity within it**

**Even a stone in D of manifestation of his physicality carries a salinity within it,** within its own environment. You call it a salt, we call it Inertia. We call it D and conditions of manifestation.

**UFOs outside of earth manifest differently - based on environment**

**The UFOs outside the surface of the earth, outside the solar system are different than what is here, they create that condition, even though it is a knowledge within.**

You see I **have been teaching a little bit too much today.** It's not time for it yet.

R: maybe next week.

K- It depends, on what new political situation turns up, we'll see.

R:

**Depends how the Iranian Administration responds - to release more T**

**K- It depends on how they come, as I requested from the new Iranian administration, please no talk of revenge, (2:58). please no talk of an end of a nation, work as one team, bring everyone together then dividing, and we hope the Iranian administration has the wisdom of listening.**

**Vatican is online listening - just received message**

Wow, you know something. very interesting. As we talk **I just received through chat line, message from Vatican.** Very interesting they are online. It's okay I ?? Carry on please.

.. it is from Mr. So and so Vatican, they are online.  
there is a lot happening.

**Icccaps melting - don't know**

Q: .. fear that the icecaps will melt next year completely.

K- .. with change in environment will create some changes for us but for the whole icecap to melt in one go. (3:00). I have no idea about that one. It's a very big ice and cap ...

(3:02).

(3:06).

K- We are ready to interact. .. nuclear physicists understand the plasma T very fast because we can show delivery of the T systems .

(3:08).

(3:16).

K- Can I suggest something, **Tuesday August 3rd is beginning of Iran new administration. I would like to ask the U Council to pay attention and bring the soul of the new Iranian leaders to a new level of understanding of peace and maybe we all benefit by it. Maybe it is not coincidental the 2 matching the same day.**

Thank you

R: 391 KSW
