

393rd Knowledge Seekers Workshop; August 12, 2021

Note: Transcription has not been checked by KF. Please listen to original recording.
(Transcription by KF Brazil)

ENGLISH TRANSCRIPTION

(:11). K- I think today is a good day to bring this up, we give a free panel hand to those .. to ask their questions. ..

.. The TV channel is getting setup ... we will not do the live presentations on a regular basis ..

... you can request for your TV .. press passes ...

(:14). The conference of 4th and 5th September moved to October ..

New Plasma breathing masks for sale KF Store

.. the sale of the new breathing masks for prevention, (:16). and processing of the viruses. These are masks produced in the KF factories, which we are a major shareholder in China, and we ship directly in China in boxes of 20. At the moment we have valued them at 2 Euros per piece so each box will be about 40 Euros. It is for immediate shipping. We are in negotiations with major governments.

if requests exceed .. we will add factories in to this line in China.

New KF Oxygen machine through Iranian medical companies

.. The new Oxygen machines produced by The Iran medical companies, (:18). and adapted for the use of the Gans, in breathing systems, will be introduced and exported out of Iran 20 destinations around the world. .. we are linking up and working with the KS and companies ..

The expansion of the T, (:20). is rapid and you will see more of it. .. we are expanding in a way to introduce the T to as many people as possible across the world. We see the .. Gans enhancement T in breathing systems as a way to enter into international arena where everybody will see and KF will be exposed by its T internationally.

In the coming time most probably weeks a new sugar mugs, or cups and Pressure Cups, and what we call Enhancement Cup, and CL will be introduced form our factory in China. Where the Cups carry the instructions printed in several languages on the Cup.

(:22).

The new Enhanced Pain Pen .. will be joined by the new enhanced Pain Pad .. these will come out of the Austrian factory of the KF. around about 150 Euros. ..

.. completion of the enhanced system. ... many of you have tested the new Pain Pen and you have seen the rapid (:24). effectiveness of its operation. The same will go with the ..

Air EU this unit is .. final position .. for total disinfectant of environment. for operating rooms. different areas for the house.

We go back to our teaching part if there are any questions which are relevant to the teachings for past few weeks ..
Rick do you see any questions?

Teaching on what Graphene and Nano coating are - to correct misinformation

Q: .. what is the **connection regarding graphene and Nano (N) coating**, is there any relation and can you bring some clarity regarding natural processes, contrary to manipulated ones?

Groups using ignorance and innocence of KS to frighten away from KF

K- We were discussing this just before the teaching ... as it has been raised in the Spanish and the Portuguese KF KS. **They have started creating fear, and this fear again has started, (:26). we know through what we call, "a specific channels" to create mayhem through the lack of understanding of the Knowledge Seekers (KS). They are using the innocence of the KS to frighten them away from the KF.** It's done again, launched from the bases we have seen from the past. And it is deliberately targeted on these 2 communities.

Nano is single individual atom - Graphene is a shape

Understand the science, Nano is counting the individuality. Graphene is a shape. As I explained to the Spanish group last night, **N is the size of an atom** which will be in singularity, which is ten to the minus .. **9 zeros of the meter.**

Graphene is when N takes structure - an atom gets blown up to volume

Graphene is when the N, a single atom in the matter state takes structure. We've seen it. All of you know this if I explain to you in a simple way.

Heat popcorn it blows up to a shape - Diamond shape

A corn is an individual, it's a single N, it's a single element. When you heat it up in a pan and it expands to a popcorn, then it becomes a graphene, it has a shape, a diamond shape.

C as gaseous structure - burns - as individual atom

In the scientific world you have a C in a gaseous structure, you use it to burn for charcoal, for barbecue, you use it for conductivity in motors, (:28). that's in an individual, we can separate it to its individual atom.

C heated up in earth's core - blown up in air - becomes diamond- a graphene

If we heat it up in the central core of the earth, under high pressure and temperature, and blow it up into the air, in a way, into the atmospheric condition, it could be in the water or air, and that point of the transition of the high heat and low, it explodes into diamond. So C on its own is a Nano (N), when it becomes diamond, it becomes graphene ?? -ite

Intestinal gas becomes graphene - fart

The other graphene, which we know and everyone of us, during this program or during the day today, from the time you wake up and go to sleep, will produce liters of it in a form of gases which you, what you release from what I call, anus, and you call fart. If it has smell and odor, it becomes graphene of the gas.

Graphene is a dimensional structure of an atom which creates a volume for itself

This is the simplest way it can be explained. A graphene is a dimensional structure of an atom, which gets itself its volume.

Stomach creates a graphene of gas - goes to nose - warns brain about food

Odor, a smell is a graphene of a gas. Your stomach creates a gas and according to the fields of the foods you have consumed, to tell your nose if the food was good or bad, and if it was no difference you get no smell. If you get smells it tells by smelling from, (:30). your bottom end to the top end of your nose, that the nose knows what to process, don't eat this food again or there is a problem.

Matter to gas - bad food creates a crystal structure of gas we know as odor - warns

Or you understand your extraction of the matter into a gas, in the what we call, crystal structure as an odor, which becomes a smell, informs your brain, this food is dangerous or you ate something wrong.

Do not be afraid of Word - Graphene - now we have knowledge

So all of us know what a N is, and all of us knows what the graphene is. So people who have this problem, we discussed this before, it's them. When you eat food and you release gases to your mouth and you smell it, that's a graphene of a gas. Which in structure you ate the food in atomic, in your stomach, became individuality of a N structure. And then if it change to gases, which the stomach doesn't agree with it releases as an odor. So we are created out of N structure gas, and our body processes it into graphene. We do not have to be scared of the word.

KF first to create graphene out of atmosphere

The reason graphene has taken shape, if you read the book, which is to do, the paper with the graphene, you understand the KF was one of maybe, the first organization in the world in early twenties (?? 80s), which managed to create graphene from the atmosphere.

Coke-a-cola bottle created N layers and then trapped graphene inside

Which means for the first time we created a N layers in our Coke-a-cola bottle, and in that gap we managed to capture, (:32). a gas of C in that gap, which gave it individuality, and gave it the graphene of C, which means we managed to trap it as a gas inside , and then due to compression of the layers, as more and more was made , we could crystallize it like diamond.

Don't be afraid - KF introduced N technology in a simple way

All of us in one shape or another, like in our nails, our tooth, we have and we handle N and what we call graphene in the structure of our body. So we should not be scared of terminology. If we don't understand it, they scare you. In the present time, N technology in the past 20 years, has taken hold and KF has been one of the leading organization in producing, introducing production of N materials in a simple way.

Split molecules to single atoms - becomes the Man

We first showed it in a Coke-a-cola bottle and then many of you do it, caustic and the rest of it. So we all know what it is, we have a molecule, which is a combination of, and then when we split it, it becomes single atoms, it becomes what we call, man.

Nano of gold or anything just means individual atoms

We have a N of C, a N of gold, we have a N of anything, which means singularity, individual atom.

Nano of H different size than Nano of gold - they have no size and dimension

It has no size and dimension (D), because a N of a H has a different size than a N of gold.

Gans's can't exist individually - need G field of earth - Inertia connection -O

Then when you put these Gans's, as you produce them, they cannot exist individually most of the time, they need, (:34). a G field of the earth, which means they need the Inertial connection, which in the air is an O.

Create MG of C between plates - C from air - changes to Nano C

So we create what we call, MG fields of a C between the 2 plates of the Zn and N coated Cu. In attracting the C from the air, in its M field connection, it changed it into a Nano C.

Nano C takes energy of O from saltwater converts to CO2 Gans

But the minute the N C enters your saltwater it takes the energy of the O from your water, and it converts it into molecular Gans, which is a CO₂. So we understand the process.

We do NOT make graphene of CO2 - We make Gans of CO2 - energy form

We do not produce the graphene of CO₂. We produce Gans of CO₂, which is in an energy form. **You cannot eat a diamond, just because it's a graphene of C.**

If scientists say "Nano" - ask Nano of what?

In that process we fully understand, now the scientists have used individual atoms and they called it, Nano. Nano of what? You have a car. Is it a Mercedes, is it a mini, Volkswagen, or Jaguar. You have a car, call it N. When it's a N .. N of what? And people get frightened.

If scientists say "Graphene" ask graphene of what?

When they talk to you about graphene, a graphene of what?

Very Hard to make graphene to put in injections - not enough knowledge

What have you expanded in your injections, that you call it a graphene. 99% of material in these processes newly, (:36). come out because of the viruses we know, is not even graphene, because it is not easy to produce graphene. Not with the present knowledge in the world of science.

Using Terminology to make themselves look advanced - confuses people

They are using a terminology that people don't understand and it looks very advanced.

KS know more about Nano and graphene than advanced universities like Yale

KS you know this for 20 years. You know more about N and graphene, than the scientists in advanced universities like Yale, in whatever top universities in the world.

According to UN Iran is leading in Nano T for 15 years

In Iran, Iran has been the leading universities in N T for 15 years according to UN. Because we understand the simplicity of it.

They use big words to frighten you

They make it big to frighten you. So when they tell you they use a N, say, "Nano of what?" Cabbage, N of a carrot. What have they N sized? Which means they have managed to come its individuality.

Nano is dynamic - creates a M field -

And then when you have a N, you create a M field. Because it is dynamic, it's a single atom made of the plasma (Pl) as we know it, and it's dynamic. It's the way we do with the plates. We N coat, we create a new dynamic system, between the 2 plates, M field we absorb C from it.

When they put a N or graphene in something- It's a chemical graphene- but what?

So now when they say they put a N in it, or they put graphene in it. This is a chemical graphene of what? Hydrogen, Oxygen, of CO₂, because it could be in a state of the matter state.

It creates a M field in blood - because Fe and N is dynamic

Then because it is in the N state and it's dynamic, in interaction with your blood, which has a Fe in it, that's why it's red, (:38). you produce it in your Cup. It creates a M field.

The composition of different blood types create different M field strengths

It can create different strength of M field according to different blood composition. If you are an O, an A, or an AB or you have different composition of blood circulation. We do this in our electric motors. When we pass electric current through wires or whatever, we create a M field, dynamo.

Different chemicals in injections - can create M fields in body's environment

So now the chemicals they put into any kind of injection, in interaction with the fields of your blood, **which is Fe based, is in a Gans plasma state**, can create a M field environment in your body.

Fe based M fields - might stick metal spoon to your body

And because it is Fe based connected, it can show M field. You might be able to stick a spoon to you, and say I didn't do it.

Magnetization has happened with other vaccinations - not new

It happens with other vaccinations, we know before. If you received **injection from measles or rubella, or whooping cough**, or whatever . You had this. It's not something new.

Specific types of Chemotherapy can cause magnetization of body

If you receive a specific type of injections for chemotherapy you create the same thing, because the chemicals, in interaction with your blood, create a M field.

Aura is M field of body - what you eat changes aura

You call it aura. Your aura is a M field of your body, because what you eat, it changes your aura. Now they inject in your body something for the virus, .. headache, .. your back pain, it depends on the strength of the chemical and how it interacts with the Fe of your blood, (:40). in the PI condition. It changes your aura.

Do not be afraid of magnetization after injections - videos - scaremongering

If it can be reduced rapidly within the structure of the muscles and skin, you might get some interactions. So do not be scared with what is coming out. We saw the first M field changes with the original chemotherapies. This is not something new. Now people can video something and start the scare mongering.

Nano and graphene is part of understanding a science. Number 1 does not make is a car, 1 car, 1 man 1 car. It's just number 1, so it is Nano. When you make it to become 1 car, so now you know a car, so now it's graphene. Then you have to say what car it is. Then this is different combination of the chemicals they use.

Science is not yet able to produce graphene the way they want - just use words

The science of the man has not reached to the point to produce graphene randomly, the way they want. So they are using a word, which makes it very advanced, but it has to have a matching.

Belgium's made KF a terrorist organization because produced graphene from air

When we produced the first graphene in 2005, submitted to IMAK the most advanced Nano T company in the world. They said we produced graphene, and we are using a nuclear material and KF became a terrorist organization, because we produced graphene out of fresh air with a simple T, which we all use.

We gave you for free - technology worth billions

But we produced graphene of C, which came from the Coke-a-cola bottle. Add in diamonds, it is worth billions, we gave it to you free. (:42).

The lab results confirmed that KF produced graphene

It's in the book, go and have a look. The graphs the pictures of where it is submitted and confirmed.

If they could produce graphene in an injection - would eradicate most illnesses

So understand, yes, you have a N, a N of what? You have a graphene, graphene of what? What have you managed to graphite? If it is a C, **it's the most beautiful thing for your body**. If they can create graphene of C, in an injection, that enters the body, most of the illnesses will be eradicated.

They have Not managed to produce Graphene

But they haven't managed to do that.

You produce a spectrum of CO2 Gans - helps the neural system

When you produce a Gans of CO2 you don't produce one type of Gans of CO2, you produce a spectrum of the C energy, which can help connect, reconnect, disconnect all your neural system as it is needed by the body. So in a way, scientifically we have to invite the new knowledge in, but understand what it is they have, or they claim they have made a graphene of. Which car are we driving a mini, a Rolls Royce, a truck, a ship. Then understand.

Chinese took KF Gans recipe - but failed - Now asking for help from KF

We have seen this in China in past few days. How **China .. agricultural university, which collaborated with us in growing harvest in Inner Mongolia**. They thought they found the recipe and they added part of our T into the system they wanted to grow, (:44). **but it wasn't growing that big, the way they saw with us. So now they come back** and say, can you explain, we want you to be part of the Beijing University. We didn't do, they couldn't do, **they gave a lot of lectures around the world, but they couldn't explain** how we produce graphene in the structure of growth of materials.

Understand the knowledge - Nobody can scare you

Understand the knowledge, and nobody can scare you. this is one of the reasons all my teaching in the past few weeks, I have said, many times, when we take man into space, man will be knowledgeable, that no one whatever claim they can frighten you, or they become your prophet.

Those kicked out of KF tried to scare Spanish and Portuguese groups to leave KF

This is what has happened in the Spanish and Portuguese group, because of what we seen people who were kicked out of the KF, they are trying to say we know something just because we shared pillow, they have no knowledge of. They never even made N material, Gans's till a year before. Connection by pillow does not bring knowledge. I'll call it a prostitution. They are trying to prostitute their knowledge, which they have no knowledge of, and they are using the way they lived their lives .. to scare, .. the KS. understand the T. understand what it means and how it works, then nobody can frightens you, and nobody in the space becomes a prophet. because does something which you do not understand. (:46).

Man has to change from inside before we take him to space

Now you understand why we say the knowledge has to be understood, the man has to change from inside before we take man to space. Because then you'll be abusing yourself and the others due to lack of understanding the mechanism.

T is made so simple that a child of 5 years old in a bathroom in China makes it, understands it and knows how to use it

unless you openly allow yourself to be abused.

Interaction of the M fields creates electric flow - how the U was created

Nano, graphene, M fields are all part of interaction of the fields of a Gans, creates electric flow, it creates a M field. This is how this planet and how the Universe was created. Now it has become a point of fright, because some people have found out how to frighten you. Understand the science then nobody can be a magician. . (:48).

You can resurrect body just like Christ - if you have the energy

I even explained to you how Christ .. resurrection has happened. Now you can resurrect anything if you have the energy.

You transfer one dynamic graphene - body - to another one - Soul

If you can transfer what we call, the graphene energy of what we call a ?? size to a body. Do you become Christ or you understood the T and knowledge behind it the way it was done. **You transfer energy from one dynamic graphene, which is your body, which is your soul, to another one. Now you become dangerous.**

Prostitution of knowledge

Understand my T, that no one can fool you, the way they have ransacked into Spanish, and Brazilian, by what I call, prostitutes of the knowledge, which have no knowledge of. They only knew prostitution. The only people scared .. understand the T. I especially attended the Spanish group last night because of this. **Cups of Life you've seen how it has saved millions across the world, One Cup One Life.** Understand how to use it.

Learn how to handle viruses - millions of viruses when traveling in the Universe

Understand how to manipulate it as the virus changes, because we are going to have millions of these viruses in the U. How are we going to handle it? Once we understand it we can walk it, .. run with it. .. because we know how to walk, how to stand. Understand scientific terminology and how we transfer from, (:50). one side of the science to another.

A Carbon is a conductor worth nothing, you blow it into its graphene, its what woman give their life for to have it on their finger as a diamond. So if someone tells you graphene is dangerous, ladies please throw all your diamonds away. The same with the gentlemen who like to buy it for them, you give them graphene that it can kill them. Next time you go to a shop and you buy a popcorn, don't put in the mouth of your child, the

graphene can kill you. How many of us have died of popcorn, and how many of us eat corn? It's part of our structure, it's part of our life.

Ignorant people using other ignorant people in knowledge can scare you.

Any other question.

Producing Gans of Oxygen

Q: . How can we produce Gans of O?

K- Gans of O is very easy to produce, but it needs specific equipment. Because its, if you try to make a Gans of Fe, you have the same problem. Gans's of Fe is very difficult, (:52). but you can make Gans's of Fe in conjunction with another Gans. You make a what we call, protein, or AA, and in conjunction with the Gans of Fe in N state you produce blood.

Gans of O is in both gas and liquid state because of moisture in atmosphere

Gans of O is GM fields in a gaseous and a liquid state on this planet, because most of our gaseous conditions in the atmosphere contains moisture which carries O in it.

Trying to create a magnet of O

So you are trying to make a magnet, and that's your problem. It's just trying to make a Gans of a magnet, that's the problem.

Gans of Radiation - x-rays - Gamma - Uranium - Plutonium

It's in trying to make a Gans of radiation. I can make a Gans of Gamma ray. I make a Gans of x-rays. I make systems that can produce massive amounts of uranium and plutonium in a radiation level. I don't need uranium.

I know how to create conditions anywhere in U

I know the process of how to bring fields, in G field condition anywhere in the U to create uranium, or plutonium, or O.

On Earth G reference point is O for liquid and gas - Fe 56 - for solid

You are dealing with G reference point, which is O in liquid and gas. In a solid state G field is based on an Fe, 56.

To make Gans of O - need technology for absorption / separation - KF has

So if you are trying to make a, (:54). what we call a Gans of O, you have to develop a T, which we have done, for absorption and separation. This is a technique well understood by us in the KF.

Easy to hold O in its N or graphene state - related to Inertia of planet

But holding O on its own in its Nano state or graphene state, it's not difficult, it's easy, but you have to understand principle of .. Inertia of the planet. You cannot make it so easy, many people have tried.

People think they have Gans of Deuterium - but really Gans of Fe

It's the same if you have tried to make the Gans of Fe. True Gans of Fe, it's easier for those who make, like N materials of it, Gans state, like a lot of people make Deuterium, they find out they have a Gans of Fe with them. It's black in color and very easily, you just put a magnet to it, push it by the side of the glass, you see it come up, you see it's an Fe.

True Gans of Deuterium very difficult to make

Because they cannot produce the true Deuterium. The TD is created through a different process. Many of you have made Deuterium, black in color, sometimes slightly reddish, and you say I made D. The only place I have seen TD we made is in China. We made it in the lab there, because it is done from interaction of fields. I have seen a lot of people, even in our lab, brought to me and say I want Deuterium, (:56).

Test Gans of Deuterium with magnet - Fe stick to side

I put a magnet against .. this is not D, this is a N Fe.

Have to battle with GM field of earth which magnetizes Fe

You cannot even convert it to a Gans of itself, because you have a battle with the GM field of the earth, which magnetizes Fe.

Our body doesn't stick to earth because our Gans is Fe 58 - 59

Those few Gans you see with the Fe, are what we call Fe 58, Fe 60 . This is more on the Cu side strength, not on the Fe 54 and Fe 56. Our body works on that level of Gans's. We have an Fe, but we don't stick to the ground, because our Fe is Fe 58, Fe 59 and some Fe 56, very little.

O is M field G point of liquid and Gans on this planet

And O is the same. O is a M field G point of the liquid and the Gans on this planet, even though 50 - 60% of it is Nitrogen. It's not easy to make unless you know what process.

Gans of O can create beautiful conditions - Nobody in KF has yet made

It's something we don't really need, but if you can produce it, it's a ?? valuable, and it can create a lot of beautiful conditions. Nobody has managed to do in KF, claims are a lot but no one. Because I know the system I understand the principle, it's very hard. (:58).
Any other questions?

New KF Masks for Virus and Prevention

Q: Can the new mask can be reused .. ?

K- Yes. No they are not washable but they can be reused. They are the disposable masks. I send pictures to you Rick ... We call it, "plasma enhanced breathing system".
(1:00).

K- These are the 2 masks which will be marketed by KF. (Photos).

(1:02).

K- I am going to release something to you. this is the way we'll be .. (1:04). This is the packaging of the product you will receive ... 20 per pack.

Plasmas have different structure than - Atomic Mass is matter state

Q: can you **clarify how the atomic mass relates to PI** and PI interaction.

K- **I know nothing about the atomic mass.** (1:06). I am just a layman nuclear physicist. The PI has a different structure than mass in the matter state. **It's field strength** and its back to **its environment always stays constant**, as mass is irrespective of interaction of gravity.

Plasmas, as we call it Gans's have dynamic expansion what we call mass ratio.

Gans Plasma dynamic - open up - match into any G field

In the paper I have written about the mass and weight, I explained this in part of it. A Gans PI as we have it, is a dynamic, it can open up and interact with any G field strength, and match into it.

Where **the mass is the collection of the field interactions on a position and a field.**

If you change field strength of matter Mass - won't manifest - disappears

If I take a mass of let's say C, and take it into an environment, which a C cannot exist, or with a field strength, is in balance, you won't have it there, it won't manifest itself.

Same Gans will manifest on Moon - matches field environment

But if you take a Gans from earth and take it to moon, you still have the same Gans, because due to its expansion of fields, it matches to the field environment, and can manifest. This is part of what we call, (1:08). transmutation, transportation of a future to come.

If I transfer your mass on the moon or another position, where that mass is the same, but it's a different G field of the environment, it will not show itself, even it has a mass of its own.

But a Gans always exists and adapts itself according to the spectrum of the fields, because it already has opened up.

Energy field transfers leave part of matter behind - mouse without tail

This is a part of a new knowledge, which we gradually try to bring in. This is what I explained last week or .. this is part of the problems that the scientists have had, they say they manage to transfer 1 atom, one part of it was left behind. Or you transfer a mouse, but its tail is left behind. That happens when you create through matter state, you try to create energy fields. It's a different way when you work with Gans's.

Transfer the Gans of the structure of mouse - to any place - mouse can still exist

I transfer the Gans of the structure of the mouse on the moon, or another place it will take the shape that mouse can exist, and creates its own mass in interaction. But in essence it's the same PI. You cannot do that with a mass.

A Gans of C will exist anywhere in the .. U. A mass of C as a matter state is environmental dependent on field, and strength and Inertia. Because then if it doesn't ?? feed it disappears, or cannot manifest itself, (1:10). due to whatever, it doesn't matter it has the same mass.

Flaw in present science - they want you to accept

This is **part of the flaw in the present science, and they have convinced us to accept it, because they never have understood it.**

High Field Strengths mass state cannot remain what you are

In the high strength fields you cannot stay what you are, impossibilities, if you are in the mass state. But as a Gans, as a PI you accept higher order strength in the what we call, the volume of the Gans or lower strength, you ?? adapt into it, it's like elastic. But in the mass you don't have that flexibility in the matter state.

When CO2 bottles moved to another location - can change strength

If you understand this in different way, when we send you Gans bottles. When you receive a CO2 see how much is in there, and when you receive a Cu, see how much is there. That reduction comes from interaction of the fields of the Gans's when in fact, should have no matter state. If we tried to give you the 100 gram of the metal, it would just be the dust at the bottom of the bottle. But when we give you the Gans of the Cu, it has a volume. Try it. Weigh 100 gram of Cu in the dust form, or 1 gram of it, you can't produce 100 of it, and then weigh 1 gram of Gans, (1:12). and look at the expansion of the height in the bottle.

This exhibition center is coming. We will release the pictures of the new permanent E C of the KF very soon. Keeping this picture .. the same people who are scaring you with the N and graphene, calling them frightening them .. Any other question.

Explain more about Salts

Q: Lisa in the CU we must use a mix of salts, .. expand on these salts in a general way in relation to the human body. .. (1:14).

Salts in body create "Reverse Inertias" - convert matter to plasma

K- .. Different products or different materials create different Inertia field forces like as we have on earth, or somewhere else. We, to get away from Inertial levels of let's say, Fe or Cu, or whatever, in the liquid state form of the body of the man, the Inertias for conversion of what we call, "reverse Inertias" by conversion of the matter to PI, or field, is done by the presence of what we call, salts.

Salt in plasma physics is an Inertia system

Or, in a way, salts, you call them, in the terminology of PI physics, in the direction of the life, or dynamism, or flexibility, we call it salt, or Inertia system.

Different salts create different Inertia strengths - for materials to open up

Different salts create different Inertia strength, that different materials can open up from matter state into what we call, Plasma state.

Different Inertias creates different materials - like sugar

And different variation of salt, create different Inertia like ?? Inertia which creates Cu, you have an Inertia which creates sugar, what you call, let's say C.

The body adapted itself using salt to do what Inertias of earth do on planet

So instead of creating Inertia of matter in the confined body of the man, the body has adapted itself, has created a mixture of material, which they do the same thing as Inertia on the surface of the earth.

Magma creates dynamic reference point for creating different Inertias

In the earth condition, (1:16). you have a magma, which creates that dynamic .. reference point for interaction of the creation of different Inertias.

The blood does the same as the magma

In our body the blood does the same.

Variation of salt and salinity dictates - what changes from matter to plasma state

So the salts are, variations of the salts, and the percentage of the salinity of the salt, is what dictates what we call, a position and composition, of what changes from matter state, into the PI state. The Inertia level. As simple as that.

On earth we have Inertias and matter state. In the body of man to create that Inertia, we create salt to do it.

Using same plasma - but different salinity - get different manifestation of materials

Different Inertia levels salts, what we call salinity, and mixtures allows different manifestation from the same PI.

Same AA can become a cell of heart or cell of kidney

It's the same AA with different salinity or different field strength Inertia. The same AA becomes the cell of a heart. The same AA in different salinity becomes a kidney. That's all it is.

Unless you want me to make it very complicated to tell you I am very clever. That will not happen. You have to understand the principle. Salts are in a way, Inertia creation in the body of the man.

Earth - Magma - M field mass ratios - creates Inertia - absorbs energy to matter

You have earth with what we call the magma and different plasmatic M fields of the mass ratio of the matter, it creates Inertia, **which creates a M field, (1:18). which absorbs like what we do in your boxes from the energy to matter state.**

(It's the same what happens in Gans CO2 Box)

Same thing happens with the salts in the body

So is the same with the salts.

Emotions create salinity for what matter needs to be created

And that salinity again dictated by the matter which needs to be created, which is connected to the emotion.

I need to get rid of what I ate in liquid state - Body creates kidney

I need something to get rid of what I eat in a liquid state, so the body creates different salts, creates different system of filtering, creates a kidney that allows you to get rid of the extra water, which you intake.

Emotions are partially the reason for creation of salt

So in fact the cause or the creator of salts is partially embedded in the emotion of the man.

How emotions create cancer by changing the salinity

This is why, how we get cancers, through emotion, we change the salinity, and the prostate from not being cancerous, becomes cancerous, because it produces different material.

Any other question.

Today you just got 4 PhDs - you understand more than professors

Now today you have 4 PhD degrees all of you. You understand more than professors in universities about N, and now about salinity, and the other topics.

Animal Souls will Elevate at the same time as Man

Q: salomea, (1:20). When our soul is lifted and we no longer eat or kill the animals what will they do, will carnivores, are they elevated too and how?

K- **The same, they are another animal, why do you think you are the only ones that gets elevated. The process is understanding, the stronger PI feeds the weaker PI.**

Process of Elevation has already started - but hidden

If you reach that strength of maturity, you'll feed to the others too. We already started this process. But it is so hidden, but it is so beautifully getting done.

Sunday spraying of Gans across planet elevates - Gans in sewers

A lot of you are spraying Cup 1, CO2, Zn around the world every Sunday and many people continuously produce Gans's and wash their pots and pans, which puts Gans into the sewage system.

Gradually the soul of planet and those who live on it get elevated

Now see how many KS are making Gans's and how much energy in matter state we are putting back into this planet. In that process, (1:22). gradually the soul of the planet and the man who lives in it, gets elevated. The animal drinks from the same water as the man does.

Contraceptives in sewage weakens sperm - field transfer process

In London and major big cities, many men can not produce enough sperm to father a child, they have weak sperm. As we said before and it is **scientifically proven, it comes from the conception pills, which women take not to get pregnant. They leave the residue in the water wastes, and the man eats it** and it effects his, from being a man, to more or less, no man.

Gans spreads on same process of field transfer to elevate souls

If you understand that cycle of work, how many of you in the cities and countries are **washing your Gans plates and cups into the drain systems and the others are drinking it. The fish, the rat, process, another man. I'm getting you all very, very slowly.**

Better to Spray half of Gans in air and half in sewers

Many of you make Gans's and you spray. **Put half of those Gans's in your drain system, you feed it from the top and the bottom. (1:24). The soul of the fish** and as much as those that swim in the waterways, elevates as much as those you spray for the man.

A single Gans can fill the solar system

Don't forget a single atom in Gans's they can fill up the solar system. How many Gans's you have thrown into the sea and waters, and waterways, and how many of you the Gans's you wash your dishes in, with you not knowing has gone through the water pipe and maybe the next door neighbor uses some of ?? and down the road they use there. Receiving energy has changed his ?? diaper and nobody notices.

Placing Gans in specific way changed aggressive behavior

We have **done some tests .. we had an aggressive sick behavior between 2 - 3 different families in he house between husband and wife, extremely aggressive.** They had no control more or less. All we did, **we placed Gans's on specific order in the houses, and we saw the houses changes. The families changed,** the behavior changed.

If you can pass through the air in the family by just putting a jar of specific Gans's, then you can see what we can do with the rest. We have changed the man. They couldn't stand talking to each other, now they don't get enough of talking to each other.

Gradually the bird passes you, (1:26). the fly who sits on the Gans's you sprayed. The butterfly which passes, and the drop you put on the railroad station all are getting elevated. ?? As I said to .. what are we going to do when we clean the air from CO2? I said, nothing, put it in the drainage system and change the citizens too.
Any other question ...

CO2 - Convert to plasma - from danger to feeding planet

I explained this before, some strange thing, maybe you'll understand more. We **call CO2 global warming and danger. We take the same CO2 from the air and we convert it to a Gans and becomes the basis for life for bringing comfort to life.** The same material nothing else. Now you can imagine how much you can change the society just by converting CO2 into Gans's and energies. One according to the scientists is killing the planet, by conversion it is feeding the planet, and will bring changes.

The first of these units, conversions, will be tested in Tehran in the next few days, and we'll start seeing the change of weather in Tehran. (1:28). Hopefully, thanks to the work of the KF in Iran. ..

If you buy CO2 conversion to benefit others - You get all the benefits

As long as you buy a system from KF try to see it only benefits me, you get a part of the benefits. If it is there to benefit the others, you get all of the benefits. If you buy a CO2 unit I have no use for it, why should I buy it. Buy and let it produce CO2 Gans's and feed into the water systems. Cleanup it's one of the most charitable things you can do to the whole human race. Converting the damages back into food, which the plant and animals can use. Not what it gives has to have benefit, because you benefit the others. I explained this to the officials and they understood. And now there are tests.

Any other question? (1:30). Rick dropped off ...

Liquid Oxygen is not a Gans - compression of fields in matter state

Q: Does the neutron inside the Uranium atom have the same field strength as the one inside the H atom? How can we rank the strength of the MaGrav units in the Periodic Table?

Q: Is liquid O a Gans?

K- Liquid O is not a Gans, it's a compression of the fields in a matter state.

All neutrons have a spectrum of energies - not exactly the same

K- All the neutrons have a spectrum of energies.

Bandwidth of neutron dictated by central G field forces of Universe

All the neutrons are not exactly the same, but the bandwidth of the field of a neutron is dictated by the central G field forces of the U.

Neutrons have different field strength spectrum by position in that Unicose

So in each U, we have different field strength spectrum according to the position of that U, (1:32). in the Unicose.

Neutrons are a minimum common denominator

Because its field strength control to a minimum common denominator of a PI, we call a neutron.

Neutrons controlled by G by strength of position in Unicose

It's primarily controlled by the G pull on the whole structure of the inner strength of the position of the U in a galaxy of Unicose.

Clusters of universes make a galaxy of universe in a Unicose

The way we have galaxies that make a .. a U, we have clusters of universes, which makes the galaxial universes. In one of the papers I have mentioned this.

Central G field of a Unicose gives it - its identity

This structure is the same, and the way each Unicose creates its own central G field gives it an identity.

Our identity is an O Universe

Like this U we call it, is an O Universe, because it has a field of the O, and the one is Cu strength, and this dictates how much, of fields of what strength can be maintained in that U. Our Nitrogen or our H equivalent to another U is not necessarily the same amount of fields in it. (1:34).

Any other question.

Q: .. How does enrichment of uranium to a high level contributes to increased security and peace for the inhabitants of the planet?

K- The enrichment of the Uranium the way the KF has put forward creates a condition of equality access to energy supplies. Where ever nation can produce its own .. energies, without a need to look for another to do. The access to enrichment of Uranium with the Iranian government is not for the purposes of defense, but is for the purpose of the space T development. (1:36). I developed this T in early 1980s and in late ..

The production of Uranium Plutonium or Hydrogen in the new understanding of the clear processes of the creation of the U will create a condition that enriches all of us with whatever we need, and this creates a condition of peace. We don't enrich Uranium to use it for ?? we use it for distribution of the energy and fields. (1:38). It's a T I developed in the later 1970s when I was in University, and 1980s, because working with , as I was getting trained to become a nuclear reactor control designer I could see easier way to create energies using the nuclear industries. I developed this knowledge which is part of this now, T of KF for deep space travel. We don't look at Uranium, we look at totally

different aspects of what large amount of fields can give us. The production of Gans's is for all our human consumption. production of Uranium is for different aspects.
... (1:40).

Any other question. (1:42).

Plasma T can stop forest fires - Careful not to imbalance Nature

Q: Can we use the PI T to curb the destructive fires occurring every summer?

K- Yes.

R: ... including Gans's in the water that they put fire retardant to prevent flames. that can get into the water system (1:44).

Forest Fires are part of process of lie on this planet - change ecology

K- **We need the fires as part of the process of the life of this planet.** If you stop all the fires. ... can stop... **But if you stop all the fires the forest fires and the rest, the ecology of this planet will change. We interfere in a big way.** The trees have to burn out during the cycle, they will fall ... We look at the short time. No tree has lasted from the day life started on this planet. No animal has existed from day 1. We have to respect the cycle of life. If 100,000 trees

(1:46).

That's how man learned how to cook , saw the forest fire.

There is an Iranian team works on this. They use the sound to enclose the fires.

(1:48). We have the knowledge and T it's not something we are going to work on. .. we kept huge numbers of T in the background till we can launch it collectively in one go that we bring rapid change. This is part of that change. .. gradually we are building it up. With the position we have in the new Iranian government .. you will see new T emerging out fo Iran which has been the dream of the man.

They have been in power a week today.

(1:50).

(1:52).

R: controlled burns .. (1:54).

K- We force our way .. then we find out the forces are bigger than man's greed and thoughts. We submit to it. We have this situation in Holland. they made dikes and claimed land ..

Dubai .. claiming land ..

(1:56). We can claim in small amounts .. South China sea. ..
Any other question

Q: Does a neutron inside an (repeat) (1:58).

>> **BREAK** >> 393 KSW (2:06).

Q: .. Pl water produce by Gans with good intentions, is it that the information will last forever?

K- One doesn't know.

Q: .. (2:08). (R: does it have a shelf life)

K- When you make the Gans's they have a shelf life as they give the energy to the other plasmas, yes. But as an energy lifetime process.

R: Would you say the Gans itself would last forever, but the dilution of it

K- It will dilute into different strength and what are the needs to take from it. This is what we say .. you cannot steal, but what is available freely is for you to use. So when you make a Gans of Mg, full bottle, after a few weeks you see you got half of the bottle Gans, that energy of the Gans's has been distributed to what is needed in the room where you are. If you produce very .. soft, not density Gans's and you put in bottle, you will see them, they reduce and deplete partially it's to due ?? inertia both in G of their own mass, or their own fields, and partially it's that they are feeding the environment. They set in Gans's when you put .. in the houses, (2:10). with huge emotional problems, you'll see they deplete, but the people change. What kind of aggression will change, what do we feel? The spread of the strength of the fields is part of .. new space cities, by dispersing fields of a given strength of the Gans's, we can change even the mood of the man. If you have a .. especially .. let's say if you have a riot in the city, or people are there to create condition. With the new T you can change that. It doesn't mean, what I said to security guy, we change it from demonstration to protest, if you understand what it means. Before you have a violent acts, .. if you have a drone that it can spray or create the fields of a given strength, you find out people still talk what they want, but they don't move into the aggression part. It's not a mind control, it's satisfying the emotion. (2:12). We are not creating head of lambs, you still have your opinion, we don't change your mind, it's just we change the aggression behavior as part of the emotion. You don't touch the line of thinking, you change the emotion from being aggression. These are the part of the development of the T in the .. institutions, like prisons, and hospitals. It costs a lot to keep people locked up, it costs very little to change .. the emotion. Those technologies we have developed years ago. As I said, time for a lot fo things to be released.

Any other question.

Q: Water have substances, frequencies, protocols in the water network, so the water is not in a Gans state. how to remove everything with Gans . except with its own light. .. (:14).

R: how to remove stuff .. information in the water to make it pure?

K- Gans's is the answer, but you got to know which Gans to use.

R: You addressed this somewhat in the Fukushima teachings.

K- Yes, Gans's how we do it. It will be very interesting because we have seen it in agriculture in China. I would love to have access to .. sea life which have mutated to, due to Fukushima and put them in a tank with specific Gans's and see if we can reverse the evolution .. of the Fukushima as we call it.

But there is another point to look at it as we said, about the fire. Would this accident lead to mutation or creation of sea life, or wildlife that in the future will lead to much more intelligence life on this planet? Are we if we interfere to reverse the mutation, or what has been created stopping a much more advanced lifecycle, not necessarily like man, but a fish cycle , (2:16). to be created. Not everything is negative. Maybe man's life started from one of these deviations? One of these accidents. Maybe a block of C fell in the water and changed the acidity and in that pond, started the cycle that life could exist.

R: for example there are certain pines where the pinecones don't grow until the temperature goes up enough to melt the reason to allow the pines to grow ... pine will take over after forest fire. ..

K- We got to accept evolution and maybe because of it a new advancement in the cycle of life on this planet. (2:18). This is part of the process, we cannot stop any of these processes. But some accidents can lead to creation of new kinds of life. We don't know if you are here in a million years and trace it back, you say, oh there was a nuclear explosion started when that was the point we can see the start of a mutation. The best example of this comes from Lisa and Jim in Australia. .. as they have an aqua farm. they found some fish in the main tank, which they didn't think would be there. They had grown so much, and they changed so much. But by literally digesting the Gans's in the bottles, the energy from them, and growing differently. We all get effected one way or another by changes, we have no say in it.

Are there any other question (2:20).

K- There are people who want to go to center in Linz

R: Rick presents tribute to Paul Hellyer. Passed away August 8 2021, 98 years old. (2:22). Defense Minister of Canada 1960s . Aeronautic Engineer June 3, 1967 .. to official inaugurate UFO landing pad .. keeping space free from human warfare. (2:24). future travelers to and from space safe ..

(2:26).

He was one of my heroes.

(2:28).

(2:30).

That's my tribute to Paul Hellyer. he is helping from the other side .. (2:32). end ..

K - Any other question

What happens when you breakthrough to see the Light of the Soul

Q: .. if you break through the light, so that you see the light of your soul, do you just stay there, and what is happening with your body, when you are there witnessing it?

K- repeat

Q:

K- **Not much and a lot.**

In so many ways, we become aware of transition. (2:34). We become in both dimensions when the soul expands and when the soul retracts. In a way, when the physicality takes over. The physicality from its sense of vision through the brain sees the transition, not with the eye of man. Because the eye transfers the fields of whatever, and then we see the visual D. When you go through the transition of the soul, is the part of the brain which responsible for what we call, transition of light or information to knowledge of, "okay this is a book of what I see," we call it a knowledge of what has been seen. In the transition of the soul, the STM works with that part, not with the physical vision, as we see it. We become aware of it in both dimensions, when the soul expands and retracts to be engaged in the other.

In so many ways, it's, as I always say, it's like a sheep's skin, you turn it inside out, what is out goes in, what is in goes out, and when the time is right you use it the other way. The vision of the expansion of the expansion of the soul does not come through the eye of the man. It comes through the senses, (2:36). of the brain, which translates the information to what you call, the transition. In so many ways, the D of physicality in this operation, when cannot exist will merge inside the energies of the soul. In a way, it takes protection from what it has. This is one of the biggest problems with the present man. As we are so physical we want to be always in charge, in control. We don't allow the soul to show its beauty, be its way of understanding of the work. This is what we call, the "collaboration" between the STM and STP. This is part of the teachings, that how for man to understand to trust. To let the soul to expand that he can protect it. It's just something that we are afraid of, till we know it, and there is no fear, we become familiar with it. This is the part which is, man, and with the teachings we try to in to you, to understand. When this happens do not look for a visual manifestation of a light, or dark or whatever we hear people talk. But understand the transition over, what we call, another D of the sensation we are not familiar with, at the moment, but we are aware of it, and we live through it. This is what I said, there are many sense that man is not, we cannot explain, (2:38). and in time it will be added to. what I call the sense of vision, not the way you call it a sense of vision, but vision in the PI condition, the plasma of the STM is very different than what we see with the eye, even though it is the same parameters.

This is part of what the human race has to learn, that when such a thing happens the soul is in charge. When such a thing happens the physicality is in charge and how do I work within each one? We talked about the disasters. If you suddenly find yourself surrounded in a forest with the fire, in a physical D, you burn, and the soul is freed. But if you have the knowledge, the capability to transform and cocoon the physicality within the fields of

the soul, as a field extension you can move it anywhere, and pop out on the other side of the forest when the fire is done, is clear, and then go through the transmutation.

This is not something abnormal, man and many of our ancestors who have been in touch with the civilization beyond this planet, have seen it many times. Now it's turn for man to learn the process, and it is done through emotion, nothing else. (2:40). this is what we are trying to teach. When you look at the structure of the man in his brain, it is very simple. We all have it, but we have never used it. When you have the brain and you have the soul in the center, as long as all the energies of the soul, majority of it can be absorbed by the brain, you control, you dampen it, you blanket it. What about the point when you learn to do the other way. To feed from the physicality into the soul, that the soul expands and the brain and physicality still intact, but the soul protects, expands its D. We do this when we are asleep. But in our sleep we have learned a very clever way, we allow certain channels for our soul to open D of communication with outside, or expand beyond. It's if you look at magnet you have fields coming in and going out. In structure of our brain we have many create or in time, that we allow only these fields to go out. We block the others to keep the physicality, and lock the soul in. (2:42). This is the process that we have to learn and is a process fo individuality and the collective work of the fields of the body of the man, be it the soul or the STP. This is what we call the spirit and the soul, and how we separate them. And how we allow one to transmute within the strength, within one to the other D and come back. Where we see the D of physicality we want to manifest ourselves, we reduce, and now we become physical. When we choose in another point we create the D of the soul as we like, even to the extent of creating out most of the functionality of the brain. Then we In so many ways, we take over, we choose. But when you do this, when you take to this position and you have to supply enough that the physicality can keep on existing. That in a way, not physical function of the brain, but the emotional function of the brain, (2:44). still exists that you are aware of what is happening outside, but if need be, you can become physical D, to see the outside.

This is part of what we'll show with Enhancement Units (EU), .. we'll show with new T and science which will come. We show this transition because it's important for us to understand and once this is shown the dogmas of the religion will finish. Because is the priest talking to the soul of the Creator or .. talking to the physicality of the man? These are the things which will come with the education and understanding and to us at this moment is abnormal, but when you understand you work in 2 different dimensions it will become very normal to you, me, or next generations become enlightened with the knowledge and the process of working with it. Just because the knowledge, you don't understand, does not mean it doesn't exist. KS are becoming very open minded in understanding the transition between the energy and matter, you understand and you can do. But when you want the soul to be in operation, (2:46). the energies, not the soul itself, or when you want the energies of the physicality to be. But do we, would we have eyes on a planet, on the surface of another planet? Do we need it? Or the senses of our emotion of our brain is good enough like a sonar to see everything, what I call, the emotion of the vision of the STM. Very soon, most, majority of you KS will reach that point.

We are in the process of producing Gans's, without you knowing, that will reach to the point that it creates the emotion of, what I call, trust, between the STM and the STP. Then we will see. I explained this to .. it's related to the point of trust of letting. Most of us have what we call, a barrier. We don't let nobody pass that barrier, it could be 1 cm, could be 5 cm. Some of us are, we only allow certain people to shake hands with us, certain people to cuddle us, but we don't go beyond that point of ?? contact, and we feel safe with it. Some of us a certain, within the structure of the body of us, we allow, what I call, having a closer relationship. We decide on a matter of trust, (2:48). how much we allow, who to be. On the street somebody knocks you, say sorry, you intrude into what they didn't want to share, and you can knock to someone on the same street, but it's a friend, and it turns out, "oh, it's you," and you get a cuddle and kiss for it. the same one we knock on the street, shoulder by accident and you end up being their lover. We decide the process of accessibility and process of emotion acceptance. This is what we we have to do between our soul and the STP. The trust. At the moment human beings are the ones who are knocking on the street, and sorry, I am on my own, you are not allowed in. We trying to create that position gradually that when you knock somebody on the shoulder by accident walking, then you find out it is a friend, you cuddle you kiss, you are there for me as much as I am there. Then we have to move to a position that we become lovers, that the other becomes more important than me. In a way, what I said in the forest position with the fire, I love physicality and what I have created that I stand out to protect it. And when the soul is in a position of not wanting to be, I take the position of what I call physicality. Man at the moment is in that position of knocking shoulder on the body, on the street and still having the fear of trusting to be a friend. (2:50). This is where we are in this cycle of man. This is what with education we are trying to bring you to understand what you have ignored is a friend you need, if you are going to go and find the love of Creator, to become a lover.

This is where the knowledge of the KF sits, allowing a man in the D of physicality to meet his creator, through the D of his emotion or what we call without tangibility and physicality but in the D of the fields of the emotion. Then where the man falls in love with his Creator in D of soul, that man has the freedom to be what he wants at any point, physical D or fields of energy D, as we call the STM. This is the process we all have to learn, if we will like to go through that transition. we go to Churches, Mosques to pray to help or see the Creator, but it is us who has engaged the soul who has the capability to be in touch with the Creator. We have put it in prison, and we would like to be able to dance with it, and we are standing outside the prison, and we are the prison keeper. To enjoy, to be able to enjoy your prisoner you have to let him out to be there on the dance floor to dance with you. This is where the fear of man is, and this is an emotional lock, (2:52). which comes from the interaction of the field of the 2 that you are always afraid that if the soul takes over, the physicality dies, where it is actually in reverse, when the soul takes over the physicality gets a chance to survive.

This lack of trust in ones existence is what the is used to abuse the man in D of physicality. When we shall meet with the world and religious leaders we will ask for their robe and their turban, it doesn't matter what they wear, because they are not being enlightened to the truth, not to oppress. This is what you shall se in the coming time,

when the conditions are made that the man becomes enlightened through his own knowledge and not by control of the others, be it the physicality .. or be it on the banner of any religion. We shall see this very soon. Sooner than you As I said to a very religious guy very recently, very soon the churches and the mosques which were created to shackle the man to fear of Creator, become the school for teaching how to become free. (2:54). The same building, same structure, the same man, but instead of frightening him from his existence, we'll enlighten him to see his Creator through the right way, to build trust between the STM and the STP, and then you'll see the changes.

Any other question

When EU unveiled in Iran - "Sooner then you can imagine"

Q: Iranian .. when Iran comes to unveil the Enhancement Unit (EU). R: when will the EU be unveiled in Iran?

K- I am trying to be very diplomatic, and very political at the same time. It will be sooner than you can imagine, and at this moment in time, the way we see it, it will be shown in Iran ND University. (2:56). as cornerstone of defending humanity, than the nation. We expect it to be in Iran in the coming weeks, We have stood and supported .. the correct outcome of what we see developing in Iran, and with it, we support the nation with science and T. We are in the early stages of this transition and we will wait and see how the office of .. president of Iran takes the next steps in S & T and all the sciences are extremely good. We have 100% trust, and we pay our respect to the Iran P Minister., he is an extremely knowledgeable man. As he was brought from head of ND University to become the minister of the nation. Or in a foreign language as Prime Minister of Iran.

..

He is instrumental in expansion of Keshe T the way you see it, and his wisdom has part of the KF expansion in Iran, that is why we sit very close and in being the head of (2:58). Iran ND University and now become the PM of Iran has opened a lot of channels for KF. He has monitored our work for past 2 years very closely and he is extremely knowledgeable man ...

ELEVATION of STP through humbleness relieving suffering and serving others

Question: If I keep getting elevated will STP match with STM - transfer to RNA

(3:00). Q; Azar .. you said in the past, you have the ability to make man peaceful and take all of us to space, but the problem is, since all of the information is in RNA we'll still make the same mayhem in the space. The question is, if the STP keeps getting elevated. Say for example, I keep getting elevated, at the point my physical soul and soul matches each other, is that elevation of the physical soul that it comes to the point of highest point, being transferred to RNA and DNA instantaneously, or is it time lapsed, that it is going to be taken in order to be imprinted in RNA and DNA?

Answer in different way - not ME getting elevated - Humbleness

K- I am going to **answer in a very, very different way**, because it needs to be answered that way. .. Secondly, what we forget, is the cornerstone of the PI T and teaching, (3:02). and that is **the words you use, elevation**. In the world of creation **humbleness is the process of development of another soul**. When you speak about the elevation of the soul, you speak about the elevation of the STM, but you speak about **humbleness of the STP. This is what the man has not learned** yet.

Not elevation of STM - make STP so humble the STM shines

You do not elevate the STM, as you consider. You make physicality so humble, that it allows the STM to show its beauty. **Totally 2 different ways**.

Elevation is not by thinking "I am humble"

As long as you become, **thinking you are humble**, while you are **actually hoping to elevate the soul, you will not reach there**.

First have to empty jar - to be filled with humbleness

We take .. in a way, **we empty a jar to fill it up** with something more. We humble the STP, that allows the STM to show itself, that's what **we call elevation**. (3:04).

KS chasing gurus who show you things - You have not understood

This is what **many of KS and mankind have not understood**. You go, **you travel from India to South America, and everywhere looking for all these gurus** and the rest, but one thing **I am sure you have not realized**.

Worldly gurus do not walk the talk - they do not show you their soul

Have you ever seen a man who can show his soul, be arrogant, and talking, walking talk (walking the talk).

Humbleness comes from virtue - soul shows its beauty (by itself)

The humbleness comes from the virtue and the understanding of the being so humble, that its soul shows its beauty.

We do not elevate the soul - We give unconditionally - Detached - Soul shines

We don't elevate the soul. We always, if you go back to all the teachings of the KF. We teach unconditionally, and we give unconditionally. We are detached. It comes from humbleness.

You realize you have nothing compared to the knowledge behind

Because you realize what you have is nothing compared to what is behind, and the knowledge which sits behind. Then when you share the beauty of the main knowledge, that manifests itself.

Don't look for the elevation - Be humble and serve the others

It's the same with the man. Don't look for elevation, look for humbleness. Look for what we call, the servitude. We still live the life of the man, but with it, with the thoughts and with not the physical work of it, with understanding the operation of it, you allow instead of the elevation, or the freedom of the soul, (3:06). to come at a point of death, to be all ?? thanks. ...

Q: (she interrupts) Mr. Keshe, what you are saying is, instead of when you constantly thinking about elevation actually nothing is happening, you have to be humble. Like when you want to have a beautiful flower you don't constantly think about a flower, but if you put a seed down and water it and take care of it, and nurture it the flower shows up. .. it has to do more with our action then thinking about elevation. Because thinking about elevation nothing is going to happen, but my action actually justifies. The elevation happens naturally when you are humble, but when you think about elevation nothing happens actually.

Elevation through 2 types - Physical action and Emotional action

K- You see there are 2 different ways of action. One is a physical action, one is an emotional action.

Elevation through physical action - Not many

Not many men have found what you call, elevation, through the physical action.

Elevation through emotional action - Many men have found

But many men have found elevation as you call it, of the soul, or freedom of the soul, from the emotional action. And that is the difference.

Gives you access to what you never want

It gives you access to a different D. It gives you access to what you never want.

You give to a beggar - you get self-satisfaction - nothing more

You take someone's suffering - you get elevation of the soul

You walk on the street and you think you are very generous and God will give you this and that, and you give money to a beggar or somebody, you think he asks for money, he needs money to do, (3:08). to him. And you think you are very humble. You get nothing for it, more or less very little, except self satisfaction. You walk a few meters away and you see a man in pain, and you wish I could carry your pain that you don't suffer. And then you find a few steps further an elevation, and a knowledge, a freedom, and you think, "oh, because I paid the man," it gave me the pleasure of this elevation. But it was actually the man who you took the pain of.

These things show man he is still attached to physicality

This is where mankind goes very, very deep in understanding, that he is still attached to physicality.

(Concepts) or physical terminology has an end - Emotion and Soul does not

Because physical terminology has an end, but emotional and soul has not. Even though in time it will come to its own cycle of dispersing its fields.

The Soul has a transition time - Depends what you give for the next step

Even our soul has a transition time, but it depends what it goes to, and what it gives to be as part of its transition to next step.

If you give nothing in life - You become fertilizer for others in the future

Or you just become what I call, a fertilizer gathered, and then you disperse to grow some others in the future. So you have to understand what it means.

Building churches/mosques without proper intention - Brings no elevation to soul

Building mosques and churches and giving, (3:10). charity has not brought no such a single, one single elevation, to no soul.

Building churches/mosques to relieve suffering - Brings elevation to soul

But if you in the process of building a mosque or a church, you built it for the souls to be elevated for a man who needs a food, come to church or the mosque, and you look after it by giving the comfort of home, then you receive that elevation. Because you took a suffering from a man.

Priests kick beggars out of church because they themselves are beggars

This is exactly what is the opposite, happening today. You get a beggar to go to church, the priest kicks him out. "This is not your place, this is my place to beg from the people and steal from." You cannot steal from a man who already robbed the other people from their soul and their pocket.

Homeless around Vatican - Christians sleeping in boxes

I have told you many times. Go to Vatican and walk around the bridges, on the bridges, the walkway to the Vatican, when you walk into the square, and just on the border where the line of Vatican is, move back 50 steps and look to the left. You see a lot of homeless people sleeping on the window sills of the Vatican's car park, hidden behind, bringing coaches and coaches of Japanese, Chinese and Filipinos and the rest, to put money in the coffers of the Vatican. (3:12). And these people are Christian and sleep hungry and in boxes.

When you give to that - you become part of the criminal act

Then you pay more to, in a way, become part of the criminal part, to steal from the physicality of the man. I have said many times, and I see hungry and homeless people literally around the richest church in the world. They do not feed them and they do not help them, and they sleep in the winter and summer in boxes on the window sills and underground bridges around Vatican. You cannot rob from someone who has already robbed everything.

This kind of charity keeps you from being elevated

This is where it comes and you gave something to a beggar and you think you have done well and God will help you, that act itself, has taken from you even being elevated.

Elevation does Not come through physicality - But through emotion and thoughts

Then you understand more. Elevation of the soul does not come in the D of physicality. It comes through the D of emotion and thoughts.

Any other question or shall we call it a day? (3:14).

Q: .. whether there is a relationship between .. the Gans and the CL, and the similarities to the alchemy of old, as well as the Baghdad battery. ... it seems K is reviving a lost ancient advanced plasma T and science?

K- We have taught man many times but he never listened, now we teach him again. You understand? It's just like going to a class and failing and going back and you sit for the same class again by the same teacher.

R: Alchemy 101 once again.

K- You haven't learned you have to ?? The knowledge we have taught many times, but the man has not been ready as today. Part of it was due to communication, part of it to isolation , and part of it was through control.

It's the first time man has the true mass communication everybody can listen at same time and be able to share knowledge in that way. This is why KF has such a capability to reach. And we reach, very deep, and very far. (3:16). We hear everyday different events and we realize how big is KF, how far we reach amongst the people. The more I talk to KS, or we hear it's amazing how many people know about the KF. they take from it what they want. It's so frequent, they know the KF ..

We are amongst and we have grown amongst people. Different time of communication, different ways. This is how Christ managed to cross for Jerusalem to Europe because those days nobody knew who he is. No means of communication to explain how he knows. Only a few people in Jerusalem knew him. Now it's not that way. (3:18).

People know (about the KF) and it happens all over. This time the knowledge can't be hidden. The governments have tried, the kings have failed, and the kingdoms will go with it, because they fail, and many others will go with it, and the change will come. But this time due to mass communication the knowledge will spread, it's not like before. Every time we gave a knowledge a few groups, cities, or whatever it is, or they used it to create more mayhem. this time we use it to create peace.

The knowledge is the same and the teacher hasn't changed for thousands of years. It's the same teaching, just moving from one city to another. Now it's time. We have access to mass media and we teach again, but in much deeper way, much understood way, and this time we'll bring the change, because we made the facilities for it, we made the communications to be done, that this time the whole planet listens, through the soul, (3:20). through the understanding of the knowledge.

The ancient books you read is what we wrote. Now this time it's called Book 1, 2, and 3, but in essence it's the same path.
Any other question.

EU is in 14th place of contest

R; There is a little piece of news, in our contest with Universal Enhancement Spaceship Unit is coming along nicely.

K- How much, how far have you moved up to.

R: I have to tell people about it first, I am building up to it. This is **the Create the Future, design contest put on by some major engineering technical firms. Here is our EU entry. It's now up to 105 votes.** .. we haven't made it into the top 10 yet, but we are tied for 14 position. If we get another 10 to 20 votes we'll be in top 10 in over 500 entries in this contest. (3:22).

K- So you are trying to get KS to go in and vote for you

R: yes that's the bottom line ..

(3:24).

K- Thank you for today. Hopefully we meet soon starting our 9th year of teaching. We'll how we go.

(3:26). There is a huge shortage of oxygen systems ..

..

R: 393 KSW
