ENGLISH TRANSCRIPTION

Teaching about Light - how it's created - essence of light

(:11). K- ... Today's teaching is very much what we see in the background (on screen), it's about the light, and how the light is created. What is the essence of light. Why in the world of matter we use cars, donkeys and rocket propulsion and everything else, but in the world of creation we use light. We have now today we are going to open another dimension (D), another understanding of the totality . What does it mean, light? Where does it come from, what is the essence of it?

Light as a means of transportation

Why do we use it as a means of transportation, .. system as transportation. .. in the world of matter state we create converters, we convert one energy to another. We go from a car to a bicycle to donkey .. to move from one place to another. In the present world of electronics and computers, we use fiberglass, .. rapid information data as noise. We use different form of the light in a matter state.

But what's the difference between the light in the universal cosmic direction and Unicose, and the light to the eye of the man? What would be the future of the man when he travels in the D of the soul? Would we still see white light, or would we see light, or would we explain light as means of Transportation and Transmutation (T&T)? We look at it as the position at the moment as it is there and we can see, allows our vision to be aware of the environment, but light in the world of creation is a means of transport. It's a means of position from one place to another. (:14). It's a means of understanding the totality of the creation and its positioning in the U.

We think of light as daylight or a light bulb

We call the light when it appears as the day time, .. when it appears on a light bulb. But in the world of creation light is totally different. Light is means of going from A to B, as the fastest time, to make it zero-time. We see light as a ray, .. or as a particle. In fact, in the world of creation we have both.

We can become a light - transport matter in a capsule of light

In the Unicose we can become a light. We can transport billions of tons of matter state in man's dimension (D) in the capsule of light, but we have not managed to understand, truly define, to comprehend the structure of the light.

Light is cylindrical plasma - transmute and put what you want into it

In Book 2, I tried to open the subject that the light is a cylindrical plasma (Pl). In a way, whatever you put in a cylinder, and be able to transmute it, you reach to the point where you want.

We become part of the light

We create the light in the world of creation, not the light as to be created out of interaction. We become part of that light, we enter that cylinder and we transmute with it.

First Transmutation systems show in Linz - Transmute into capsule then move

In the coming weeks by the opening of the exhibition center in Linz we will show you the first what we call transmutation systems. We show how to transfer the body of the man as a light from one to another. How we structure the body, (:16). to become in that capsule, and then we move the capsule.

Create a box out of Nano materials - it becomes an envelop to contain matter

If you read some of the papers written in the past we always said, if you can make a box of Nano (N) matters, it doesn't matter what we put in the box, it's like an envelop, do you put a love letter, do you put a note or do you put money in it. It's the envelope that carries it.

Life is that envelop - You position it for travel

Mankind and the scientific world have to come to understand life is that envelop. How do you want it to move, but with the difference that with the light you have to position the destination that it can arrive at that point.

It's like a mobile phone satellite - sends digital numbers anywhere on earth

It's very much like a satellite you have a digital number it ends up on the mobile phone you carry. It doesn't matter where you are on earth.

We use the Unicose to position in other Universes - as a GPS

We need to use the GPS of the other Unicose as the position of the interference and interaction within the U, and then we use the Unicose itself as a satellite of the position of one U to another.

Travel span of Unicose using other Universe to navigate

In time man will learn this. We travel the span of the Unicose this way. You don't have satellites, we use other universes for D and interaction with other universes, as a means of transportation satellite system.

It means we use the interaction of the one to the other, when it is not on the line of the view, or line of the interaction. In a way, it's very much like when you travel to go from one place on earth you have to stop for refuel, or you sit and divert to another position. It's the same way.

Satellites are limited by height - in future use the Moon for positioning

Mankind has got to learn. The satellite present time, which is made, (:18). is limited to the height from the earth. Once mankind becomes wise to it, he will use the structure of the fields of the moon for navigation, for transmutation, for transportation.

Can position travel using the nearest star as a reference

He will use the fields of the nearest star to create a condition of position and point. He uses multitudes of the stars to create a point in the U where he wants to be.

Man is mature enough to understand that light is a means of transportation

We do all these with light, light references and light packages, Which means we have become mature enough to understand, that the light in the world of creation is a means of transportation.

Add or take energies from light - transmute to whatever you want

It's a means of being able to transport, and within the structure of the transportation, to add or to take energies from it, to make wholly a transmutation, where you enter one energy as a gold, and you transmute it to silver, or to Cu, or visa versa.

The reference point are the energies of Life within the structure of (our) Universe

Again all this has to be done in reference to the point of the energies of the life within the structure of the U. This is why in the technologies, which will be introduced in a gradual way, and on the 6th of June next year, as we endeavor to go to moon. We use the (??this) means of transportation.

KF is developing first stage of "Transmutation Systems"

In the KF research centers we are developing the first stages of what we call, "transmutation systems." We hope you'll see the first ones for the opening, of early stages of opening of Linz Exhibition Center.

This in not a dream - It's real and getting developed

It's not a dream. It's not something to be. (:20). The system is on the table, .. getting developed that for man to understand.

In KF systems you enter a box and get transported to another box

Systems where you enter a box and you transmute or you transport yourself to a new condition in another box, in another position.

Sci-fi movies have become real

These things used to be the what I call, fantasies of Sci-fi movies, now it has become a reality. For man to understand the reality, he has to understand he cannot carry the man in every cell of heart, brain, the suitcase you carry.

Put man in a package of fields - Compress it to light - reverse process at arrival

But we put man in a package of fields, we compress it to the light D, we stretch it to the point that he can accommodate the totality as an energy, and at the point of arrival we reverse the condition.

Or we allow the point of arrival condition to dictate the manifestation.

We start to teach about the structure of the light - totally different

The structure of the light has a totally different meaning in the world of creation. We start teaching these as now we're reaching the point of maturity of the knowledge, to extend that man can see more, and that nothing becomes magic.

Transmutation of energy to the energy of emotion and the soul

Transmutation of energy to the energy of emotion, and the soul, is already on the table. We have seen the first results in past few days.

We enter fields of plasma change it to emotion within the body

We can enter in the fields of Pl and change it to the D of emotion within the body of the man.

We don't need to separate the soul or embed STP within STM to transmute it

The same, this transmutation can be made in the point of transportation, where we understand what our soul will do on the point of arrival. Do we need to separate the soul, or embed the STP within the STM to transmute it.

We can expand the soul that itself becomes the light

Or do we expand it in the new transportations systems, (:22). that the soul itself become the light, as we seen it.

Why do we see the Sun as a light - or the soul as light? - Matter state

But why do we see the soul as a light? What's the reason for it? Why do we see the sun as a light, and what's the reason for it? Mankind has up to now has looked at the structure of the light in a total different way, in the matter state.

Would soul manifest in the vision of man - or strength of Soul of Creation

But what happens when we look at the light in the D of the soul, in the D of the transmutation, ... transportation. Then would your soul manifest itself in the D of the light, to the point of the vision of the man, or at the strength of the soul of the creation.

Observing souls see different structure and color - depending on strength of light

Would every other soul which is observant of the transportation of the soul from one point to another, will see the light in a different color, .. structure, .. speed depending if it is self light or above that light of it.

We recognize where souls are from - by the strength of their fields

Would our soul and the soul of all those who live in the U appears as one type of light, or by the shape of the light, by the extension of the fields of its strength we can say where that light comes from. Our soul recognizes it, our soul understands its position, its strength, its emotion.

In one instant through emotion we can elevate our souls

We know this as we do it so often within the structure of the STM within the D of physicality of emotion. In one instant we get emotional, and one instant through emotion we elevate our souls.

We create diseases through emotion

We decide to change our physicality in one position, in one second, through emotion, we feel, "I want to die" and we trigger that point, (:24). through the life of the emotion through D of soul of physicality and we create MS, ILS and all other diseases. Then mankind has to understand the purpose of the light, the propose of the transmutation in ?? be on the D of physicality.

We do this in Gans making - Matter to N then through environment to plasma

If you have not understood up to now, maybe you understand in a simple example. In your Gans production systems you change the matter to Nano, and than in another condition of environment you change it to a Pl.

Same with light - different strength means different function

It's the same with the D of the light in one strength you change it to what we call, transportation & transmutation and in another strength it becomes a photon.

Photon means - it is just a carrier of energy - send message as energy

It becomes that which means, I carry none, but I am just the energy carrier. When it's a photon, it's ?? being carrier. When the world of science understands this, man will choose a new mode, a new ways of transportation, rockets and jumbo jets become obsolete, where the man will learn new ways to package, or to send a message as an energy.

Fallacy of Speed of Light as ultimate speed - You decide strength of light

Then what has been the fallacy that the speed of light is the ultimate speed, becomes absolute nonsense, because then you decide at what strength of the soul and what strength of the light you want to T&T according to the environment of the entity.

Mankind needs a lot of kindness to understand how foolishly he has trapped himself in this world of light. If and when the mankind understands the purpose of the light (:26). is another mode of transportation, he will understand that he has a new tool, a new D, a new way to move, or a new way to package itself.

UFOs are seen as packages of light - speed of light of U

You see the UFOs and you see they appear as light. It's not only they interact, due to the interaction of their fields with their environment, but they envelop themselves in a new D, a new package, then they can travel the speed of the light of the U, which is totally different, then the light the man knows.

Go deeper in soul - will see lights of U - understand knowledge of U

If the man goes deeper in the strength of his soul, he will see the lights of the U. He will understand the knowledge of the creation.

Man has chosen D of physicality - but Do of light is much sweeter

But as we said, man is too physical. Man has chosen the D of physicality, because it is much easier, "I taste it, touch it, I visualize it," where the taste and the touch, and visualization in the D of the light, in the D of the work of the U, is much sweeter, is much easier, is much more applicable and does not need to destroy and ?? from the depth of this planet, and use nuclear T.

Nuclear technology in dimension of plasma is totally different

Nuclear T is the opening of the knowledge of the man to the U. But nuclear in the D of the plasma (Pl) is totally different.

Offer Iran's centrifuges as souvenir - we have unraveled secrets of creation

Maybe now we understand as we said, in the new series of negotiations, we offer Iran the fastest centrifuge for Plutonium, Uranium as a gift, a souvenir to the other nations, as we have unraveled the secrets of the creation of the T&T in the D of the light. (:28).

Let the children play with the toys while the men create new D of the knowledge and T.

Man will make himself the light to travel at any speed he wishes

In the coming time mankind should be traveling in the span of the U, irrespective of wherever he could be, as he gains the knowledge to make himself the light, that any point as he wishes to, and at the speed he wishes to.

Weightlessness at the speed of light is a fallacy

The fallacy of the weightlessness, becomes the fallacy of the understanding no knowledge. The true knowledge of creation, no subject, no object traveling at the speed of light, ever exists in the D of no control, what you call weightlessness.

Can create Inertial weight even at speed of light

Mankind have not understood that he can create the Inertial weight and mass, even at the speed of light.

Compress light strength to become one within each other - stability of totality

We can compress the collection of different strength lights, to become one within each other, that they keep the stability of totality.

New Enhancement Units compress fields of plasma to a cylinder

In the new Enhancement Units (EU) for T&T that's what we do. We compress the fields to make a Pl into a cylinder, and then D of the strength of the light will manifest itself.

Rotating plasmas light - comes from interaction with fields of U

In the new EU .. in Linz in coming time, is very much the way the U works. You don't see rotating condition in the body of the man, as we see in the rotation of the objects.

When a PI decides to rotate, to manifest itself, (:30). in the D of the matter state, like the CERN, the light on its own, is the creation of the interaction of its fields with its own matter condition and the fields of the U.

You don't see any stars when traveling in D of light of U - it is above

When mankind travels in the D of the light of the U, he shall not see any stars. He will not see the state of matter, as it is above.

You become a neutron on your own - at strength of U

In a way, you are a neutrino, you become a neutrino, which means you become a neutron on your own, because the strength of the neutron of the U, not the strength of the neutron in the D of the earth, and this U.

With the light of emotion - you can enlighten the whole of the U

Understanding the concept of the light, is an amazing knowledge, which will mature man to a new D, will mature man to understand, you can even with the light of emotion, enlighten the whole of the U, let alone the knowledge of the man.

New D of light is a higher order strength light - not light of the body

In so many ways, mankind will enter a new D of T&T with the knowledge of the soul, which means at a higher order strength light, not at the light of the body of man.

When seen as a human - you're light is still in matter strength of this planet

When you manifest yourself, when you are seen as an object as a human, you still are in a condition of the light of the physicality of the matter state strength of this planet.

The STP can elevate itself to become the light - without interaction of the soul

Even the soul of the physicality (STP) of the man can elevate itself to become the light itself, without interaction with the soul.

STP can become invisible without STM - by interaction with the environment

We can extend the field strength of the STP, that we become invisible without the present interaction of the STM, but in interaction, (:32). with the environmental field energies of the light of the position and D.

I become transparent by transferring my fields strength to the environment

One minute you see me, one minute you don't, because I transfer my strength to the D of the fields of the environment, that I become part of it. I become transparent through it.

Knowledge of the light - Cornerstone in evolution of man's knowledge

In the coming time the knowledge of light will become the cornerstone of the evolution and gaining knowledge for the man.

We will learn in the D of the emotion of the light

Because we will learn the knowledge in the D of the light, in the D of the emotion of the light.

Each light is a position, is a speed, its character, has emotion of itself.

Mankind will learn to work within these structures of light

Mankind in the coming time will learn to work within these structures. The first part of this process has already started, and it will go on for a time to come.

The Soul of the Creator reaches the STM through the light

In so many ways, mankind has to learn to work within the new D, within the new structure, within the understanding of the process of the creation and the Creator. The Soul of the Creator (STC) does not reach the STM through engines and rockets, but through the light.

Voice of man is like photon when carries physicality - when sound - it is energy

The means of transportation within the D of M fields, the means of transportation within the structure of the U. In the body of the man we carry the physicality of the man, to be at one point or another, but we send the voice of the man to represent the man in the other. The voice of the man is what we call, photon, (:34). when it carries the physicality of the man, but when it appears with the sound itself is nothing but energy.

The process of "fraction of one to be both at the same time"

In the time to come mankind will learn the process of one or what we call fraction of one to be both at the same time. The sound, the knowledge, or at the same time the physicality. **We talk, confirm our information, and what we think.**

Fraction of light transfers knowledge - but the structure will stay within the particle

In the D of the light, a fraction of the light at a given time and position will be eliminated, that it transfers the knowledge, but the physicality of the structure will stay within what we call the particle.

Position will be dictated by emotions of soul and light

In the coming time, the knowledge of the position and time will be dictated by emotion of the soul, by the emotion of the light. By the emotion of the interaction of the light with its D and position. How do we do this. How does mankind will lead itself to use its soul or the light as a means of T&T than the physicality of the man.

The D of light can be reduced by putting it under pressure

In the world of the science today, you put the physicality under the pressure and reduce its D. In the world of the creation of the light you can do the same.

Pressure has to come from "Willingness of Both Fields" - to accept

But you have to understand that the pressure has to come from the willingness of both fields, and the acceptance of both, that accommodates one to the other. (:36).

Create strength through STP - allows STM to extend to light cylinder

Which means you create a field strength through the STP, that allows the STM to extend itself into the cylinder, that, within that position, it will take the D of physicality within it, that it increases its strength.

Change a sphere into a cylinder - by compressing plasmatic M fields

In a way, we create a compression through the plasmatic M fields, to allow a sphere to change into a cylinder.

Use STP to engage itself with STM - use higher soul fields to transmute

Mankind can learn, that he can do this with the beauty of his STP. Which means we use the STP to create the fields, that allows it to engage itself, and engage the STM at the same time, but use the higher field strengths of the soul, to create the D of light, to transmute itself, across the U.

Iranian Sepah paper says - with KF technology fly to moon in 1 minute

Go back to the paper, which we released, which was published by the Iranian Sepah on the 10th of February this year. It says, with the new PI T of the KF man will travel to moon in 1 minute.

Iranian physicists already understood concept and principle of new science

Which means the nuclear and plasma physicists of Iran have already understood the concept and the principle.

Teach rest of humanity - To be ready for 6th June 2022

Now we have to teach this to the rest of humanity. Then you understand on the 6th of June, for those scientists and organizations who have evolved to that knowledge level, they don't need one day return, they need 1 minute return to moon and back.

Understanding the concept - transmutation/transportation through the Light

The understanding of the concept, the understanding of the process of transmutation, (:38). through the light. Transportation through the light.

Understanding of the knowledge through the light.

To be enlightened by the light.

Exploring the Light is the new frontier for man to explore

(It) will become the new what I call, territories for man to explore, to understand, how to convert every entity to a light, or the soul, or the essence of his field structure. That's what the light is. Then in interaction of these fields with their environment, decides the color, shape, the knowledge, the entity which that specific particle carries.

We become neutrinos to souls which do not understand our work

In a way, we all can become neutrinos to the souls, which do not understand our work.

At point of interaction - convert to STP

Or the others can become the neutrinos to us, that at a point of interaction of the right fields, we can convert them into the STP in that position and D.

Souls given to the captain of UFO to transport - delivering souls like messages

Go back to teachings .. where I said in the future man will give his souls to the captain of the spaceships to transmute, and not the physicality, then the STP transmutes and transports these souls within it souls, of a separate entity, and at the point of arrival, like a messages, like a postman delivers. How that soul will take shape and D it's of the structure of the field strength of the time and position.

Cannot compress fields of plasma like CERN - Childish way

Mankind has to learn the compression of the fields of the plasma, not the way it is done in CERN, a childish way. Remember, (:40). birds fly with birds, and foxes walk with foxes. When you work with the PI in the D of the transmutation and separation, or speed of light, you have to use the field compression of the PI.

Electromagnetic fields are weakest fields - cannot compress plasma

You cannot use electromagnetic fields, enforced with the current, to compress a plasma, which has a different D of fields. It's like using a brick to put a nail in the wood, it does not work. It's got holes in it, it's got scientific data, what we call misunderstanding of a knowledge in it. This is why what we've seen with Tokomak and the CERN is full of flaws. It's a dream which will never come true, to understand in more detail the work of the U.

The earth fuses plasmas all the time - energy packages in upper atmosphere

When the scientists create a dynamic plasmatic M field, which can gain strength, then they can create the condition of the interaction and the fusion of plasmas, which the planet earth does on a daily basis, when the energy packages of the upper atmosphere, transforms and becomes matter state in interaction of fields of the Inertia of the matter state. Our scientists have not understood this.

They have seen some things in CERN - but haven't understood about plasma

We see the same thing in CERN, they are using electromagnetic fields, which is the weakest, and they are trying to compress to create, just because they see some pushes, and some speeds, they think they have gained something. But they haven't understood to create the condition, (:42). of the transmutation and transportation, and even separation of PI, you need to use appropriate plasmatic fields, then man enters a new D of science and T of the U.

Scientists not understanding what seeing - progress going backwards

How do you want to push a truck with a baby in pampers. The strength is not there, because the concept has not been understood. This is exactly what we see in the present nuclear science T, and in what we call, the rest of the rigma, we've seen how PI is used, and how mankind is trying to achieve something, which is actually going backwards, than going forwards.

We'll teach you how to compress plasmas - interact with STP - STM - Gans of body

In the coming time in the T&T systems, which you will see. We teach you how to create the condition of plasmatic compression, that allows to interact in a correct way with the plasma of the STM, with the PI of the STP, with the PI of the every Gans cell of the body of the man, that it allows the T&T.

Correct way - not to leak - disperse entity across the U

How do we package it, how do we envelop it, how do we seal it that it doesn't leak from one point to another, and we don't get half of the entity dispersed across the U, what was traveling.

Development depends on man quickly understanding the light

This is the knowledge that the man needs to gain in a very rapid way, as we cannot wait for the next process. Then we understand the new light, the new interaction of the light, the new understanding, (:44). of the transportation of the light depends on how man, how rapid he will be able to understand the work of the plasmas of different strength.

If you reach to inner sanctums of Plasma - travel speed of light of Creator

Then if you reach, as we said many times, to go to the inner sanctum of the plasma, then you can even travel at the speed of the light of the Creator.

Man has been gathering bits of knowledge over millions of years

This is part of it. What has not been understood, and this is part of the gathering of knowledge for man over thousands of years, millions of years, in bits and bits.

Put all knowledge together in one go - understand totality of interactions

Now we put the knowledge together in one go, that in space man directly has the knowledge of T&T at the same time, at the same place, in understanding the totality of the interaction of the fields of different strengths, different position and time in the U.

Are we enlightened enough to create plasmatic compression to release soul

So what is the light to you, and what is the light to me, and how well are we enlightened? Does mankind, would mankind be able to create the plasmatic compression, that leads to the compression and release of the soul?

Create systems to compress emotion to reach the soul - deep enough reach others

Or would we create systems that by transformation and transmutation of the fields of the matter state, and the Gans state, we create the impression, and compression of the emotion. That with it we can reach the soul, and with it, if we interact deep enough, we can interact with the soul of the others.

Create "telephone box" to reach every soul in U - without leaving physical D

In a way, (:46). we used to go into the telephone box and pick the phone up to speak to somebody across the world, would .. that be, that our physical D, which becomes that telephone box, and with, through it, we can T&T, and create the light to reach the soul of every entity across this U, without ever leaving the physical D. But how much can we

transfer energies in the light and D to our soul, that the soul carries and creates the D of the communication and field strength.

Problem is the plasma we have engaged has a lot of holes in it

The problem with us is that, we have engaged this what we call, plasma, in a cage with a lot of holes, and we have not managed to engage it, and engage it, in totality, that we decide how and where in, which hole we will T&T.

To see my son in another galaxy - I create strength of his soul

I want to see my son in the other galaxy, I need to create the D of the strength of his soul. The D of the strength and position at a given time. Does not matter if it is in the physical D, or it has already taking shape in the D of plasma of the U.

When mankind understands - He will have control over plasmatic fields of own soul

Mankind in a very short time will come to understand the new T of the space, and T. Understanding the science of creation of plasma, understanding the control of the plasmatic fields of his own soul. (:48).

We will see the Light of the Creator - No choice

In that process mankind will mature to understand, and see the light of the Creator. We have no choice.

When you enter a light cylinder - become part of structure - shall know everything

Once we enter into the cylindrical condition of the world of the transportation, we become part of the system, we become part of the what we call structure, that within it and through it we shall see everything. And the knowledge becomes universal knowledge.

Don't need universities - Knowledge of U is within

Then mankind does not need universities and colleges to educate himself in the matter state level, as he becomes knowledgeable to the knowledge of the U.

Man is everything as the Creator has been - Only needed the Knowledge

Then you understand I said many times, I made man in the image of myself. I am the image, and the man is the creator. Then man is the image and I am the creator. In that process mankind will understand how as a light, as a photon, as a particle he is everything as the Creator has been. It's just that he did not have the knowledge to understand that it is him, within him.

Question will be asked - Why did man give up his own knowledge?

In the coming time, in the process of the evolution of the science into the D of the Pl, many of you will wonder why and how for so long, mankind was embedded in this plasma of physicality. How did we manage to devalue our knowledge of the U, to the knowledge of the matter, and now we are trying to go back to the knowledge of the U. Where did we loose the link? Where did we lost the knowledge, and why did we have to go through, (:50). this process to become.

Is Man a new creature - created out of knowledge

Or are we new creatures, created out of the knowledge, that in that process, we have to learn the new understanding. As it is not new, but new for us. It has become the start of the education and knowledge of the man in the D of the creation and the Creator, but both sits within the same.

Now can you create the light - from the strength of your soul

Now, how many of you including the teachings of past 3 - 4 weeks, can create that compression, and create the new D in the structure of the light. Go back and look at all the new Gans's and new ways of the structure of what I have taught you in the past 2 - 3 weeks, with different connections, and see what have you missed, and see how you can use those to become to creator, the creator of the light. See if you can create the light which is the strength of your soul, that in that process allows you to become the photon, and not the particle, and in time to come you become the particle not the photon.

The whole teaching of past few weeks leads you to one direction, to the direction of understanding, not only to be one, and how to T&T to another, and become another, or the same.

Process of transmutation to light - in the 3 Books

As I said, it's Book 1, you go from the matter state through the light to become the Pl, to become the soul. Or you come from Book 3, which is the soul, transmute through the light to become the matter. (:52). The whole process is you, in which, where you are sitting. On the Book 1, you want to go to Book 2, or through it to Book 3, or the same from 3 to 2 to 1. In either case, you need the light, in either case mankind should have understood when we released the books, it was the principle of the knowledge of the transportation of the U, and not light as you see it as a daylight.

Process of transmutation - matter to plasma - encaging then transfer as energy

It was introducing the process of T&T in the U, where man manages to transform his field of matter state into a Pl, as a Gans, and encage it, and make it as one particle and transfer to the other D as total energy, in that process, which we call the plasma of the universe.

Every knowledge of creation - is within the 3 Books

In understanding this process we go back to the same thing. Now you understand why the 3 books were released. Every knowledge of the creation is within it. It depends on the level of understanding as we said, you take according to your understanding from this T.

Those of you who want to go to the D of T&T through the light, look in within, look in with understanding the principle of the interaction of the fields, and not the matter state.

Plasma made of fields - You decide the field strength to do whatever you want

It's the fields which creates the plasma. It's the fields which creates that cage. It's the fields which creates the condition of matter state. (:54). It's you who has to understand in

what field strength you want to be, or to travel with, or to manifest yourself, or to be on the energy level.

How to gather energies together to be in the soul - choose dimension

The process of the teaching has become very simple. The hardest thing is for the KS to understand how to gather these energies together, to be able to be in the D of the soul, or what we call energy, or the D of physicality, what we call, the matter state, or plasmatic state of Gans, or to be in the D of traveling from one to the other.

Can live in all 3 states at same time and place - unravel mystery

The beauty of it is you can all, live within all, the 3 states at the same time, in the same place. It's for you to understand how to unravel the mystery of change, strength, and the composition of the fields.

Mankind is ready for next phase of its life in the new dimension

Now we understand, the mankind is ready for the next phase of its life not in the D of the donkeys, cars and the jet engine and rocket propulsion. But in the one understanding of totality of the transportation, through the interaction of the fields of the U in the Pl condition.

Man becomes a neutrino - to manifest himself anywhere in U

This is the new tool for transportation for mankind and he has to understand it. He needs to understand it to become that neutrino, that manifests itself anywhere in the U, where it needs to release its fields, in respect to its environment to manifest itself. (:56).

Everyone can become a neutrino - therefore all are equal

Maybe our KS understand more. Those of you who are enlightened to this D will comprehend more, where the teachings are going, and what is expected of you. With this T all lives will be the same, and we shall not see a false claims of a leadership, or a kingship the other, as all the lives are all the same.

Next phase is to understand there is more in creation than the Creator - bigger D

In that process maybe mankind become ready to enter the next phase of the, what he up to now understood to be the point of the Creator, as there is more in the D of the creation, than the creator, and one day man will enter that D, and then it will open his eyes to a bigger D, to understand the totality of the creation.

In eye of plasma - understand the fields which lead to - creation of the Creator

He will see the whole of the creation in the eye of the plasma, in the eye of the creation of the field strength, and understands even the life of the Creator. The fields which lead to His creation, and the reason for its creation, that lead to our creation as interaction of His fields.

Mankind is not yet ready to understand Creator - But we open the door for future

But mankind is not at that point of understanding at this point in this time. But we open the door for him to understand, that in the future, there is more to knowledge and life beyond the life of the Creator.

Even the Creator has the emotion of religion

But mankind is not knowledgeable yet, and he is too entangled of his own way of belief, through different religions, and to understand that even the Creator has an emotion of religion, if you call it that.

Emotion of longing to be part of - exists even in the Creator

Which means there is a bigger D in the D of the existence. I made man in the image of Myself. (:58). The emotion of longing to be part of, exists within even the Creator.

Maybe explain - one day - there is a life even bigger than the Creator

Then mankind will come to understand there is a long way to understand the totality of the knowledge of the U and creation. Maybe one day I will explain that to those of the KS who have reached the point of understanding that there is a life even bigger, than the one man calls the life of the Creator, the God.

Man had a problem even to understand there is only one God

This has been hidden from the eye of the man. As man even had a problem to understand that there is only one god. Now we try to explain the next step, it will become very much different.

"Seven Valleys" of Bahuala - Mankind not even the first valley

It's in the writings of the "Seven Valleys," mankind has not even entered the first valley, let alone wanting to understand what is beyond the first valley, that it needs understanding of the totality of the knowledge of the creation of the Creator.

The knowledge lies within the strength of the light -

That all lies within the strength of the light,

Transmutation to a higher strength within the creation of the Creator

transmutation in the D of higher strength within the creation and the Creator.

Will explain the truth about the Creator - and what lead to His creation

One day I might explain, but I hope at that time mankind will be ready to understand the truth about the Creator, which has lead to his creation.

It's Book 8 - Origin of the M field - Beyond the creation of the Creator

We called it the Book 8, the origin of the M field, which its origin goes beyond the understanding of the fields of the creation of the Creator.

Unicose will understand it was part of another creator - even bigger structure

One day .. the whole of Unicose will come to understand that, its creation was to manifest itself to another creator, (1:00). and to be part of it. In a way, even the Unicose becomes part of a bigger structure that, it has been constructed out of.

Unicose is a speck of dust in totality of the commission of the creation

So what we see as a total energy of all this U and Unicose is a speck of dust in the totality of the ?? commission of the creation.

Where the totality is ?? embedded within it.

Further knowledge about emotion of higher levels - even beyond citizens of Unicose

The further knowledge of understanding emotion and the higher level, beyond the present understanding of even the citizens of the Unicose.

Maybe mankind mature from 1st to 2nd (level - Valley ??)

Maybe one mankind become mature to reach to that point that he can go from the first to the second. Very much as man is trying to get out of this earth, just to peek through, and be able to live within the solar system, as at the moment he cannot even imagine that, he can live in the galaxies and universes, as he find himself lost, as he cannot carry enough food, enough O, to even to get to moon and back.

Living in the Fields - Never a shortage of energy - tap into universal fields

When you live in the D of the fields there shall never be a shortage of energy, as you can tap into universal fields of different strengths, different structures, and different understanding.

Many of you will start to peek - travel - and exist in the new existence

I hope today I opened your eyes to the new world of existence, new world of transportation and new understanding of the creation, and a new way that, in the coming time many of you will start to peek, to travel and exist.

First transmutation systems in Linz - historical

You will see the first series of the transmutation systems in Linz, and these systems become historical, as many of you, (1:02). and the knowledge of the man, in collaboration with the systems of the Unicose, will bring new understanding to everything the man thought he has understood up to now, and has become what we call, the most intelligent being on this planet.

Maybe Trees and Animals understood long before man

Maybe the trees understood these long before the man does, but they never confessed to their knowledge. Maybe the animals in the D, understood the source of creation, more than man does with his voice and his actions.

From now on we have to try to understand transportation through light

Now, from now on we have to understand, we consider the life as the process of transportation. We understand that life as a system of transportation, and we try to

develop, as man is his habit, technologies to be able to replicate the process of the movement, creation, and the position of this energy we call light.

The Light has a heartbeat - possesses understanding - can balance fields

In the coming time we'll introduce much more in depth, the process of, but you have to remember one point, it all factors in all divisions, the light. Even the light has a heartbeat, even the heart possesses the condition of understanding of synchronizing his work between his G and M field balance, that **leads to creation of his existence**.

Tuning to heartbeat - it becomes an entity - anywhere in U

By tuning to the heartbeat of the time and the position, it'll become that entity, at that time and position anywhere in the U. (1:04).

Then the heartbeat of the plasma dictates the heartbeat of the man.

And then dictates the manifestation of the presence of the man.

When the heartbeat of the man stops, the man stops, at the point of death.

Everything depends on understanding - creation - control - of rhythmic action

Then maybe you understand why, everything depends on the creation and control of understanding the rhythmic action, **at any point in the strength of the fields of the M and G in respect to each other**.

I decide point of manifestation - (by balance) of what I give and receive

What I receive and what I give, as a checkmark, and checkbook at the real strength, and at that strength point, I decide the point of manifestation.

A lot was taught today - KF is developing systems for this

I hope I taught you a lot today. I hope you understood a lot today. I hope mankind will come to understand as of today, a new method of transportation is open to man, and the systems for it are under development within the KF research centers.

We'll show making of packages of energy - for transmutation

In the coming time we'll show you. We'll make a packages of fields, and we transmute you in a field strength, not as a suitcase, as a skin, or as a clothing on the body of the man.

It needs a man to understand the knowledge - otherwise just a fairytale

Thank you for today, the knowledge given to you is much more than even mankind could imagine, could understand. In so many ways, it needs a man to understand the knowledge, otherwise it is another fairytale. It's another thing that is for the others and not for me.

This is the reason you are here as a KS - it's for you

If you are KS here, it is the reason you are here. It's for you.

Understand the emotion of the soul and you'll live without suffering

And you have to understand, if you are here to become the passengers of the U, to live without suffering, to understand the emotion of the soul, (1:06). that does not create the failures of the physicality.

Thank you very much Rick, would you like to go on break

>> **BREAK** >> (1:11) 396 KSW

K- Let's see what KS want to know more of.

Compares our souls to shooting stars in sky

Q: .. shooting stars are the way we will travel in space? (or meteorites)

As a particle - if we interact with higher energy - we become shooting star

K- In a way, if you look at it. If you become that what we call particle, somewhere in the U we will come across higher order energy, that in interaction of it, will become that shooting star, we'll manifest ourselves as a light in that environment, of the order of, strength of it in that position in time.

But a shooting star of - What strength?

Yes we are, we become a shooting star, but in what strength, .. capacity, .. understanding, and this is what is important to all of us.

As a package of energy - we find point of interaction - become shooting star

We are that, as a soul, that package of energy, which is traveling the span of the U, and then when we find a D, which is a point of interaction, and manifestation of us, we become that shooting star, (1:14). in that position in time.

If have knowledge - don't evaporate as energy - convert through Inertia - visible

But would we evaporate as a light in energy there, or would we have enough knowledge that it becomes a point of conversion for us at that energy, and Inertia position of the time and space to manifest ourselves in the visible D of that position. That it becomes our manifestation.

In D of soul we are shooting star - depends environment - how manifest ourselves

We are all that shooting star once we take into the D of the soul. It depends in which environment, we will manifest ourselves, we'll show ourselves, **to what strength and to what purpose**. So, yes we are all shooting stars, without a doubt, but depends where and how we want to manifest ourselves.

I have shown people around me shooting stars

If you have been with me, people near me, I have shown this many times. Even in the very recent past, I can show you a shooting star on same position, from 2 different D and directions, which is one of the impossibilities.

I use the energy of my soul to create shooting star

Because it is the energy of my soul which creates that manifestation, not the presence of another entity, particle. Usually when we see shooting stars they all come in the same directions, depending on their entry and their position.

It's not a matter state entity interacting with atmosphere of planet

But if you have been around me I can show you shooting stars entering from exactly 90 degrees, 180 degrees from each other. Because it is not the matter state which interacts with the atmosphere of this planet, that it creates that shooting star. The shooting star is created out of the energy which I release, (1:16). to manifest itself at the point of observation, you got to understand how long, and what should take place, that a piece of stone enters in the atmospheric condition at a given point when you wish, and you are talking to someone, and you say, "do you want to see a shooting star."

Multiple KS will see the shooting star (SS) at same time

This is even not understood by KS who have been around me and many of them have seen this. I create shooting star by will and they see it. Not only one, 3 or 5 people see it see the same time. I create SS coming from 2 different D in the same environment, because **it's the energy packs which I release to create that SS** at that point and D, through the soul, not through the D of physicality.

We touch the soul of observer and ourselves to understand more of creation

So we all can become that SS depending on where and how we wish to manifest, and in a way, have touch the soul of the observer, or the soul of ourselves to understand more of creation.

When we become the soul - no matter state but we are still in physical D

So yes we are, when we become the soul, we have no matter state, but we are in D of physical.

When 2 plasmas interact - create light - as in our daylight (sun and earth interact)

When the 2 plasmas interact, the creation of light from them is the light you see today as the daylight.

To observer outside (solar system) earth is SS to the sun

That is themselves, that on its own is a kind of, what we call, SS. To the eye of the observer from outside, earth is a shooting star, interacting with the fields, of the M fields of the sun. (1:18).

We are burning to sun as we go towards - even though made of it - our creator

We are burning to it, we interact with it, even though we are made out of it ourselves. It's our creator of the condition and D we are in ourselves.

We are burning towards sun and getting pulled in

You look at a SS as a light, which enters and you see it, but if you stand outside and look, earth is a shooting star, in the atmospheric condition of the solar system. We're still burning, we're still moving forward, we're still getting pulled in.

The light at the head of SS - is just like our daylight - M fields interacting

In that process our fields, our M fields in interaction with M fields, create the daylight. Our daylight is what you see in the D of the U, as that SS head, moving forward. It's just that we never considered these things, we just look at it in a matter state, and that's it, when we see the light, or something enters our atmosphere. We have entered, even though we are created by the sun itself, into the atmosphere of the sun.

When our soul interacts with other fields becomes SS - so we are a SS

So we are a SS. It's the same with our soul, our soul in the D of interaction of other field strength, we become that shining, what we call SS. Maybe we understand a little more.

Try to use your will to create SS - that it brings joy to others soul and emotion

Maybe go outside and see at will, you can create that SS that the others can see, that it brings joy to soul and their emotion.

Then you have entered a new D of creation and creator.

Many KS around me have seen many times. I was walking with one and I created one, and I said do you want to see the second one, he said, yes, there is the second one. (1:20). In walking with a few of KS, I said to them, you will see 10 shooting stars tonight., and counted

You emit these lights through your soul - to enlighten others - elevate

It's understanding that through emission from your soul, you create these lights, that it brings joy to the soul of those who are the observers, enlightens them, and elevates their knowledge and their life. I have shown this a few times to KS who are very close to me.

I can create as many SS as people around me

I can create as many shooting stars as many people around can ?? not just observe of.

I can move from one position to another, and say , now you can see in this position, because the environment, the condition is perfect for creation of such interaction of the fields of the soul.

You see the light of my soul - not another entity enter atmosphere

In a way, the light you see it, the light of my soul, not another entity entering the atmosphere there.

It's the power of the Messengers of the Creator - Message of knowledge

But it brings you joy and is the power of the Messengers of the Creator, that we carry the message of knowledge, not becoming another prophet.

Any other question.

We don't give medical advice in teachings

Q: .. (1:22). .. about a tumor operation .. procedures .. I'll give him the email address for medical ..

K- I am trying to read what is in the chat. We don't answer these things, you have to go through private channels of the teaching. We never respond to medical in these teachings.

Any other question

Do we compress fields by increasing G fields - Am I right?

Q: Ed .. I am trying to understand a little bit more about the (1:24). compression of fields. The way I ascertain it, that for fields to interact with one another they need to be of similar or same strength. So they need to interact with one another in such a way, and the only way I could think of compressing the fields, using the fields is to increase the G field forces, is this anywhere near being on the right track?

About as close as the moon

K- You are as close as you are on the moon.

Understand interactions of plasmas - it's a spectrum of fields

Again in the D of the Pl, you have to understand interaction. When we speak about the Pl, it's a spectrum of fields. When we speak about G it's a spectrum of fields, which are radiated inwards from the pull of the entity itself.

To have gravity - you need something to pull you in

When we talk about gravity even as light, speed of light, is, you cannot gravitate unless there is something which pulls you in. I cannot pull you to myself if I don't have your hand or a rope with you, or something attached to you, that I can pull you to me.

This is part of the knowledge we'll teach you in the coming time.

What is the mysterious knowledge called - Gravity - man doesn't have

What is that hand, that it pulls a field to itself. What is that mysterious knowledge the man does not have? You call it gravity. (1:26).

A plasmatic line of connection - is needed - to pull you in

I cannot pull you to me if I do not create the line of connection, if I don't put a hand out, if I don't throw you a rope. How do you create that rope, that ?? the connection in the plasmatic field.

Gravity has a full spectrum - on strength of every entity - within its creation

Where does it come from? How is it that it has a full spectrum on the strength of every entity within its creation.

I deliberately put a simple reverse G field - on back of Book 3

A simple reverse G field is on the back of Book 3. I put that in there deliberately, that one day we will explain this, when the man has matured to understand the totality. If you look at the back page of Book 3, the back of it.

It will solve half of the mystery of gravity - no one has understood

You will understand half of the mystery the gravity. No one up to now has understood this. No one up to now has understood why we put this picture in here.

Detailed explanation of gravity in Book 3

In a more detailed explanation of it, you go to picture 31, of page 187 of Book 2, sorry 3 and you'll understand more about the process of creation of gravity. (1:28).

You have to go deeper - a "fulfillment of knowledge"- how entities are born & die

If you want to understand in principle, how the whole structure of the creation works with the creation of gravity, you need to literally go in much deeper understanding and a fulfillment of knowledge, I call it, and see how the entities come to exist, and how they finish.

How to go from one plasma - to creation of another - chapter 14

Read chapter 14, of the Book 3, how would it end, how we go from one Pl to another. How you lead to creation of one to the other?

What is the strength that leads to creation of - Pulse - the understanding

In that process, what is the outcome, what is the strength, that leads to creation of the pulse, the understanding.

Even being so enlightened - you still have condition of black hole within

To what extent does light manifest itself. Go on the page, which is picture 21 of Book 3, and you'll understand the creation of the light. And even being so enlightened how you still have that condition of the black hole within, even though we never said ??

Understand gravity from pictures - look at what you give and take

In the books we try to explain many of these things in a very simple way, that could be understood, could be expanded upon, (1:30). that KS in the future can understand how gravity is created. Go to .. figure 13, and you should be able to understand the creation of gravity from the pictures. You always looked at what is given. Look what you are giving, what you are creating to take as well.

Figure 13A - fields expanding - but lines going backwards

In figure 13A you completely understand while you look at it, the fields are expanding out, but the lines are backwards.

These are the G pulls, that exist within the M field of every strength.

Pictures drawn for future - when KS more knowledgeable

The way we choose and we drew the pictures was, in the future we could explain more in detail, when KS become more knowledgeable.

How does gravity pull? - Why only end up in one position - not other

You call it gravity, but how does it pull, and why does it only end up in that position and not the other.

How come you have so many G fields at the same time running at different strength.

We have a G field forces within the structure of the cell of our body.

Each cell keeps position - by G field forces from cell to G field of earth

At the same time we have a G field forces from the same cell to the G field of the earth, that's why it keeps its position in that condition.

We have G fields from sun and galaxy - even from every cell in body

Then we have G field forces in respect to the sun, and then to the galaxy, even every single cell of our body. (1:32).

Without G fields - cells in body would not keep position

Otherwise we would not be in that position. You would not have that cell in the position of your heart.

It's a balancing act - between all the fields of the U - effects time - space - position

It's a balancing act between all the fields of the U, which can effect the position and time and space.

How do we get pulled by all these G field forces?

So what is and how do we connect to all these, how do we get pulled by all these towards it.

This happens through the Light - we connect as a photon - exist as a particle

This is part of the structure of the light, do we connect as a photon, but we exist as a particle.

Different photons of different strengths - keeps us in touch

Do we produce many different photons of different strength to keep in touch?

Like tentacle of octopus - we grab to find contact and attach to

It's like the tentacles of the octopus, to see which one we grab, and when we grab, we find contact, we attach to.

The knowledge is much deeper, than looking at it in a very simple way.

Does G field forces cause the compression of plasma?

Q: .. without getting off the subject, back to the compression of the fields. Is it the G field forces that causes the compression or ..?

No - M in same strength of the G - But

K- No. It's the M in the same strength of the G.

You have to know how to compress - or the thing will crush - or explode

When you lock into to compress, you have to have the knowledge of, when you compress what you have to take out, that the thing doesn't crush, or doesn't explode. You understand? (1:34).

It's the M of the outside - it's the G of inside - they have to link up

Q: No, but, I was trying to understand, if it's not the G field forces, it's the M , so it's the interaction .. ?

K- The M. No, no let's put it the right way. It's the M of the outside, it's G of inside. That they have to link up.

It's Not interaction of fields - It's interconnection - which is totally different

Q: So it's an inner action of the fields, it's not like a pressure created?

K- It's not interaction, it's interconnection. It's totally different.

Connect at given strength - create a balance within itself but knowing limitation

They have to connect up at a given strength, and find a way, that they can create a balance within itself, but knowing the limitation of. It takes time to understand.

Q: I think that is as far as I can go right now.

(There has to be a link) - so the field forces can interact with each other

K- We create a condition of the field force. Look at it this way. When we use the Gans's on the body of the man, what do we do. You put the Gans's and you say, there is no interaction.

People said - Pain Pens didn't work - forgot AA in production - needs link

We had this with some Pain Pens, people say, "we don't feel anything." Because I could immediately relate to it, that when it was produced, in the production line they forgot to add the amino acid (AA) to it. It's not that the system doesn't work. It's that, in the process there is one ingredient missing. Because it is important to create that link, otherwise you are there but you don't interact.

Making Cup Life - take off AA - wash - put back AA - linkage with body

This is why for example, when you use Cup #1, we always tell you, (1:36). use the AA. Take the AA out first, and then wash your Gans's, and then add the AA to it.

Pen Pains Work - need to have AA to make connection to body

Because you take the line of connection out. To somebody who takes the PP and says it doesn't work, it's every simple, it's not that it doesn't work. In the production they have forgotten to add the link connection. When you don't have a link connection how do you expect to connect.

To travel to the Moon - we need to make a connection to travel on

It's the same. You can create all the fields, but if you don't create a connection to moon, you cannot travel to moon.

Moon has specific characteristics that we tune into to make that link

But moon has specific characteristics of its own, that we can specifically tune into and make a link.

Important to create - measure - understand link - can push away or pull towards

Creating or measuring and understanding that link is important, then through that link you can pull or you can push. It depends on which side of the fence you sit.

I understand gravity from standpoint of Fe magnetism - not plasma

Q: I have always understood the gravity from the stand point of magnetism, .. we've been taught about magnetism of Fe..

Understand from point of plasma - then much easier

K- Let me tell you one thing. Try to understand the gravity from the point of plasma-tism, not magnetism. Then life becomes much easier ...

Are things outside our U not pulled by earth's gravity - or by deeper connection

Q: .. the gravity of the earth is just much more comprehensive (1:38). ... that it interacts with the things that it has created, there is a link there and it interacts with everything it has created. But I can imagine there are other things outside of our solar system or our U, that it would not interact with, unless there is a deeper level it interacts with, because it came from the same creation.

It's not about becoming deeper - It's about having a given field strength

K- It doesn't become deeper, it becomes of a given strength.

Little boy takes down giant by finding the right position and strength

I explained this once before. You get a giant and if a little boy finds the right position, and right strength, can bring a giant down. Where the most strongest man cannot do so.

Breaking through the line - distorting the line to link to

It's just finding that line of the breaking through. That line of, distorting the line to be linked to.

Fields of moon continuously pull on liquid part of earth

We get the field of the moon on a continuous basis interacting with the fields of the planet. Which on the liquid condition.

Does the Moon also pull on the solid part of the earth?

When I put this forward years ago, and that is, have you measured the strength of the pull of the planet earth, the solid part in respect to the moon. How much of it does it pull. Or is it only the waters which get effected by the field strength of the moon? (1:40).

Moon field absorption test - change between 5 - 7 o'clock morning and evening

When we did a test for field absorption, we saw the change between 5 and 7 o'clock in evening, and about 5 - 7 o'clock in the morning, and the rest of the time in between stays most or less constant.

Weigh yourself between 4 - 10 AM - see changes

Try to weigh yourself 4 AM , 6, 8, and 10 AM in morning, and see how much your weight changes, on the same scale.

100 gm/hr loss of energy from genitals - to environment

Allow 100 gram per hour for loss of energy to the environment. Every one of us on the man part of the human being, or women different, uses 100 gram of energy, weight as energy in one form or another per day on average.

This is the 2,500 calories they tell you - you need daily

This is what they tell you, you need 2,000 calories, or really 2 and half thousand calories. This is roughly about 80 to 100 grams per day. If you don't eat anything for 1 session and you weigh yourself, more or less ever hour you reduce your weight between 80 and 100 grams.

Where does the energy go - in body's interaction with the environment

But in that process where does the energy go, and how do we interact, or can we use it to interact with the environment?

We have to understand these energies - that are used for body to exist

It's these energies, which we need to understand, that is given and used for the body to exist.

Through this spectrum of energy - we can connect to the Moon

Where in this spectrum, is there energy where you can connect to the moon. (1:42). We have done a lot of these experiments, and it is fascinating to understand how much we have never understood.

Q: ... if the PI water is frozen then it is super compressed would it become magnetic?

K- What?

Q: repeats ..

K- Would it manifest and compress by what? that is the point we have to understand. ... by what? Fields or matter compression?

R: matter based water not compressible in some ways .. (1:44). but still have the pressure.

K- Yes,

R: .. what purpose you have

K- That would bring a change It's just the way we have been taught we always think in matter state

Any other questions.

How is a psychopath created?

Q: Lisa .. Please explain how a psychopath is created, a lack of emotional connection and empathy seems to be an abnormal state for most humans?

This is a specific definition of psychopath - towards everyone or just specific people

K- You got to understand, this is a very specific definition of psychopath. Is a psychopath towards everyone, or just a specific people?

A psychopath may look normal in a different environment

Does a psychopath in a different environment looks normal. (1:46). or is it just in respect to one or two people.

Psychopath is a mind controlled state - of emotion - towards behavior

So we understand psychopath is state of control of emotion towards behavior, given behavior. We have seen this many times, somebody sits in front of you with 2 or 3 people turns on one side, and one way behaves psychopathic way, and the other side and so generous and kind. And the kind one never sees it, that how psychopathic is in respect to another.

A given condition and interaction - triggers a psychopath

So what we call psychopathic is very much emotion control direction. You got to understand what triggers this towards a given condition and interaction. We've seen many times, I have been in many positions like this, when I sit and watch a person smiles and laughs, with the others, turns around and becomes a snap ?? could ever be.

Psychopathic condition is a state of mind control of emotion - respect to receiver

So psychopathic condition is a state of mind control of the emotion in respect to the receiver. It's very much like a serial killer, they kill in specific position and condition, because that is what triggers them or we have seen it in the case of child abuse. Each of these people are triggered by certain age and bracket of the structure. It is mainly state of mind and emotion condition. (1:48).

One person is not psychopath all the time - to everyone

To me, one person is not psychopath all the time to everyone. To others could be angel, and to you is a devil. .. or visa versa. So it is a state of mind control and interaction.

.. the Australian group and stores and products will be linked to main KF store. . (1:50).

Q:

Will we travel in the form of smoke rings

Q: (1:52). . Will we travel in the form of a smoke ring, that's what I always think of when I blow one, It's a very interesting shape when it travels.

R: I am reminded that in the Book of the light .. there are pictures that show ...light travels in a cylinder . with the inner part moving forward and sort of folding back on itself ... is that a way to understand that?

K- If that makes you knowledgeable why not.

R: Elongated torrid .

Motion is created by pressure between the forward and backwards moving fields

K- You always need the back pressure G fields and identical front pressure to be able to create the condition of motion. In the plasmatic condition.

As dynamic Pl moves to front loses strength goes to back - cycles around

In an aircraft today a front nose is always a front nose, and nothing changes. But in dynamic Pl you have the front continuously interaction with the fields of its environment losing strength, and getting pulled back to the back end, and than gaining in strength in the process, and moving forward, and again becoming the ?? front.

R: .. that's the way the smoke ring goes too.

Depends on helix effect of internal fields - light is dynamic

K- Yes, but it is very much on how and what condition of the helix effect the fields of the internal fields of the Pl of the light creates itself, because it's dynamic. (1:54).

The dilemma is to hold position of cells - that they don't cycle around

This is one of the dilemmas of the transmutation and transportation (T&T), that we hold position, and we don't get the cell of the toe coming to the head and going back down again. These are part of the work and the processes of the interaction of the fields in the Pl condition.

R; hard to imagine how one would keep it together in the middle of a torrid basically, where there is so much change in direction and acceleration going on, ..looking at it as a matter level .

We create dynamic envelop for plasma - inside it stays constant

K- This is why we speak about the envelop, we create a dynamic envelop, where the inside, doesn't matter what happens (outside), (the) inside, as it is it stays constant.

Skin is an envelop - whatever happens outside - organs still do their work

We have this envelop in the skin of the man in the atmospheric condition. Whatever happens inside liver works, kidney works, and heart works, but the skin keeps that shell, that inside is separate than outside.

The body is in vacuum condition to hold itself together

It creates a different vacuum condition to be able to hold on to.

When the vacuum condition of body cannot be held - people explode

When this, in some cases the vacuum condition cannot be held, you see people just explode, literally.

Cellular explosion happens at death - in the coffin - converts the plasmas

Cellular explosion it happens more or less on the point of death, to many of us in the coffin. We go through that process, it is not just gases, it's cellular explosion which converts the plasmas, convert into. We see, we open a coffin, (1:56). there is nothing left but skin and bones, where no animal has been in there.

Explodes into energy patterns of plasmas fields - leak through coffin

Our cell's energy converts, and explodes into energy patterns of the fields of the Pl, and they leak through the body of the coffin.

Why Zoroastrians leave body exposed - to release its fields

We understand and look at the process and in a different way. This is why in the path of belief of Zoroaster they leave the body in exposure of open, that it releases its fields, even in the physical D to the other structures. Where in the others, we put them in boxes, and we wrap them, or whatever, and we hope that all the energies are released in that D of the Pl.

Can do research on material composition in graves and how it changes over time

Something which hasn't been done by the world of science, is that, if in the future, now we open the knowledge, someday somebody might decide to do research on it. If we take a composition of a grave, of all the materials before we place a body in it, and than over time analyze the structure of the materials around the grave. It doesn't matter 10 or 2 meters under ground, and see how the material composition changes by receiving the fields.

Understand the emotions of the person by composition around grave

Then we can even understand the emotion of the man from the composition. (1:58). Was it happy to be released of the physical D, or did it still want to stay in the physical D.

Leave impression within our environment - living entities carry information

We leave an impression within our environment, and within that environment there are living entities, which can carry that information. Then mankind will become more knowledgeable about the cycle of life.

Energy of shooting star dissipates into atmosphere - becomes matter through Inertia

In a way, what happens when you are a shooting star and your energy dissipates into the atmosphere. Where does it go? Or does it become part of the energy of this planet, and if it matches that light, that field from the SS, with the Inertia of a given point in time, would the matter condition of that energy appear.

SS creates new materials on planet as fall out - interaction with environment Inertia

We see the what we call, the fall out of the new materials on the earth, or within the structure of the earth. We have this all the time. A SS meets the creation of this, in respect to the environment, and becomes matter by Inertia

Scientists did tests - found cosmic dust on roofs of houses

They have done these tests in US, and in Russia .. that if you don't wash you're, the roof of your house for 6 - 12 months, and then go on it with a jet washer and collect the water, and analyze the dust you collected.

Scientists found huge amounts of cosmic dust with metals attached to it

There is huge amount of cosmic dust on your roof. If you put a magnet in it, they have shown, many scientists, that you collect a lot of metals, (2:00). attached to it.

Daily interaction of fields of U - with Inertia of matter state (of planet)

This all comes from the daily interaction of the fields of the U in interaction with Inertia of matter state.

Most of fields turn to Fe - because of G field of earth

Why most of them change into matter state of the Fe, due to the G field of the earth, on the end.

SS enters earth atmosphere as light > become fields > Inertia > back to matter

They enter this atmosphere as SS as a light, ?? light then they become fields, and then again with Inertia goes back to the matter state.

Some of these SS fields convert to gold 10 km inside the earth - gold deposits

Now we understand the knowledge. If some of these fields are at the strength maybe 10 km down in earth, converts to gold, that the energy, you have your, find gold in that position.

Q: ... light both wave and particle A photon is a carrier of light as a photon, and ... is a photon similar with the wave aspect of light? (2:02).

R; ...

Sometimes a photon - wave or energies - due to G pull - becomes a particle

K- Yes, but you got to realize, sometimes, a photon, what you call wave, or energies in a given condition due to G pull, they become particles themselves. We know that this is part of the structure of manifestation of entities in a given strength field.

Fish tank brought to Linz exhibition center - we'll manifest a fish

We have brought a fish tank in the Linz EC, and in the coming time we'll show you the manifestation of the fish within this tank. It's deliberately brought in, but accidentally planned.

With 1 drop we'll create a fish - with 1 drop even a man

You will see with 1 drop we'll create a fish. With 1 drop in that tank we'll create the man.

We convert the energies of photon - to matter state - Gans state of plasma

This is how we convert the energies from photon to matter state, Gans state of Pl.

In Womb of Mother - 1 drop changed to life - no difference

This is what you do within the womb of the mother. You change the drop to life. There's no difference, just because you can see, now it's transparent in a tank. (2:04).

The point M turns to G - depends on observer and point of detection

Q: ... Where exactly does the M field turn to G field?

R: which is the same line of field

K- As we said before, it's the point of observation, point of detection. ... That's what it is. In reality that's what it is.

Coming towards me you are G - as you pass - you become M going away from me

It never changes. Are you going to or are you coming from? Are you .. which one are G, coming towards me, and as you pass me you become M. It's the same ?? in passages ??

I can ride on the fields (that came with you) - to go back to your position

Can I use that field of coming to me, to go back to where you were before. Get attracted to the point and the position and D. This is why I keep on emphasizing to start working with the fields, not with the Pl or Gans's. You'll understand more. (2:06).

Q: Dean .. I have been having some interactions with the fields ..

Interactions when I go into nature animals. ..

soul with the light. ...

can we connect with them when we feel we need them?

Fields always there - if find a given strength - they link up

K- It's always there, and always will be there. We cannot do much with it, and we cannot do much without it, but if they find a given strength they link up with us. It becomes part of the interaction.

With signature destination - (we have a direct link and interaction with Pl - being)

But when we signature destination ?? it will happen that way. (2:08).

(following questions not direct - answers vague)

Q: .. if someone goes in the EU is it a thought process or the position to initiate the Pl exchange or interaction or is it a thought process within the individual in the system?

K- What do you mean

Q: will the system be the stronger field that will dictate where the entity goes, or will the entity inside, the soul that is present will that have a direct influence on its destination.

K- Could be. It all depends how and what the strength is and interaction >>

Q: The interaction with the many different planetary system. a day trip or an hour trip through the knowledge myself and many KS have gathered we understand this is an instantaneous transformation (2:10). Can you travel to Mars in an instance... and bring it back ... if you have the envelop. .. you can exist there ?

K- Possibly yes. But again it depends on the intention and what is to be achieved.

Q: many people from earth love their physicality for them they would still want to materialize in a physical body

K- Can you explain what do you mean

Q: Say I am from earth .. attached to physicality .

(2:12). if we go to .. Zeus and we decide we would like to would you have a dome around the physicality so you could interact with the environment . would it be ridiculous to try to do this, or much better traveling with your soul. .. ?

We expect too much (from technology) when we don't have the knowledge

K- We expect too much to do when we don't have the knowledge of. When we have the knowledge of, many of these questions won't exist.

Q: ..

(2:14). to experience this they would have to travel by their soul?

Two ways to enjoy space - connecting to fields of knowledge - or by soul

K- Mankind will learn there are 2 ways of enjoying the time in space, by understanding and connecting to the fields of the knowledge, or trying and understanding and do by the presence of the soul.

Both will bring the same result.

You have to know what you want to learn and gather from the travel

But you have to find the D and direction where you want to be in present, and what you want to learn and gather from it.

Do not need to physically travel - to gain emotion and information - by soul

So we do not need to travel to gain the emotion or the information. We just need to tap into D of the soul, which carries that information.

Q: ... We do this (travel as a soul) on a regular basis as a soul when we sleep each evening or whenever .. can it be in a vertical position as well?

Soul doesn't have a position - rotates and interacts in its dimension

K- Soul doesn't have a position, it rotates in its D, or interacts in its D.

When you move physically - doesn't mean soul moves - interacts on same line

Just because you move doesn't mean the soul has changed its position and D. It's interaction is always of the same line. (2:16). The earth doesn't change if its .. when it reverses its polarity. It's still the same, it's just how you create the links between all.

Vertical People - don't connect with soul of earth - mainly connect through Inertia

Q: Our vertical friends that greater intelligence than us, ... because of the gravity they decided to grow vertically and send their soul down is this where they connect with the soul of the earth, and making that connection?

K- Actually they don't connect with the soul of earth, as such, its main connection comes with the Inertia of the position of the time.

This is why certain plants have certain mineral content - connect through Inertia

Because that's why each one takes, or becomes good in certain minerals, and they are grown in certain conditions, or certain seasons.

Plant soul - is balanced between G and Inertia of environment

It's partially the interaction with the G, but in essential the soul is balanced between the both and Inertia of the environment.

Why some plants (only) grow in alkaline or Ca conditions for example

That's why some plants work in the alkaline, and Ca based environment, and some in other conditions.

World of agriculture has not understood

This is something which the world of agriculture has never understood.

If you satisfy soul of plant - can grow them anywhere

That's if you understand it, we can create that condition of the field strength and then we can grow anything anywhere, as long as we satisfy the soul of the plant. (2:18).

Q: The direction of the plant and the field spectrum ..

Plants manifest according to conditions - same as humans

K- It's very much the way some of us are Chinese ?? , some of us are black looking, some are brown looking, some are white looking. Some plants are short, some are herbs, trees.

Interaction with Inertia and Emotion at same time effects manifestation

We interact with the Inertia of the condition and the emotion at the same time.

Emotion was never considered as part of the evolution

This is part of what we always, in the evolution of life, never considered.

Different parts effecting manifestation - Inertia - Emotion - MaGrav of planet

Our lives, or manifestation of life in physical D is partially G field, partially is Inertia, partially is emotion of the fields within the structure, which comes from the interaction of the physical D of the creation of Inertia and the .. MaGrav of the planet. (2:20).

Emotion causes trees to die, shed leaves - not wake up next season

Good example of it is how we change our season, trees die, or shed their leaves, and some plants decide not to awaken the next year, once they go through summer or winter season. . . .

Plants die without water - because we cut their line of interaction

If we don't water a plant we cut it's line of interaction. We see plants die where it's the summer time for them, their winter time which they live.

Physicality is combination interaction - fields of earth environment Inertia emotion

A life, a physical D life, even a human, is a combination of the interaction of the fields of earth, field of the environment, interaction of the Inertia of the matter state within the earth, and interaction of the fields of emotion.

We create the characteristics of the man from interaction of the fields

We create the man, man can be any color, then we give it a color, and we give it a height a and then we give a field of emotion, ?? aggressive behavior, calm behavior, loving behavior, then that comes from the interaction of the fields of , then it becomes the pattern of that, .. environment, and we say, oh all the ones from there are behavior like this, or are like this, or they look like this. (2:22).

Not accepted that Emotion has direct effect on physical manifestation

We have not separated in our knowledge that the emotion has a direct effect on the manifestation. We always look at even the world of science at part of the totality. Now that we are aware of the knowledge we have to look at the totality itself.

Example - Indians and Pakistanis - belief has changed characteristics

We talked about the Indians and Pakistanis, how the path of belief has changed, 2 of the same blood in 2 totally different structure of the understanding and being.

Emotion is interaction of fields of physicality with STM - soul cells of brain

What creates that condition, it's the emotion, which itself is the interaction of the fields of the physicality with the fields of the STM, and what the soul of the cells of the brain in that position would like to manifest, or manifest out of their balance fields.

I can create emotion for plant - it can grow anywhere and any condition

It's not anymore a simple, I take a seed, I can create a plant. I can create the emotion for the plant, and the plant can grow anywhere irrespective of the time and position.

Create greenhouse of the emotion of plants - see how they grow

We always create a greenhouse of environment. We haven't create a greenhouse of the emotion of the plant and see how they grow. We can create any environment and they'll still grow.

How we feel in a dimension will dictate our feature and manifestation - interaction

This is a lack of knowledge of understanding the totality. So how we enter into another D, and how we feel in that D, will dictate our feature, our manifestation, and our interaction. (2:24).

Q: .. the mage on the screen we see now of the plants in KF plasma pots ... feeding the emotion of the plants .. ???

How will the seeds from the KF pots be next year - what effects

K- It will be very interesting to see if we put these plants, in these pot this year, we buy from outside to grow here. The way the gardeners will reproduce them, next generation. See how the next generation will show itself. Would the flowers and leaves be the same, would they change their color and size. Why do plants create different colors of themselves, different color flowers. I might not like a red, but I make a blue or green one .. that somebody else might like, and gives me a better chance to appreciate and enjoy my existence. This is what we have asked from the agriculture side. We want to see what is the outcome of the next cycle of the growing of the seeds, the emotion of the people who use it. In a way, creating a new cycle of life, (2:26). without flaw. without shortage

Q: Will the KF pots for plants bring about elevation of their soul .. bring about elevation?

Doesn't mean plants will elevate souls - could be evolution - new way to live

K- It doesn't mean elevation, it could be evolution in a new way to live. It's a way to understand a new environment is created so we adopt ourselves to it. How will it change. This will come very soon when the most of humanity will go through the phase of not eating anymore.

What will happen to all animals and plants we tamed to eat - find balance

What will happen to the number of animals which we tamed to eat. Plants which we tamed to consume. Now we are not consuming them. How do they control themselves. Or does one goes tot eh maximum to produce as much as possible and override everything else. Or would the plants and creatures find a point of balance. I am not eating you, (2:28). but don't block my path and grow everywhere. Would we understand each others emotion. Would we see aggressive grow of one plant to take over everything, or they will come to see the need of the others. There is a lot to be learned from interaction of the souls, a lot ..

Q: .. will the plants and humans reach a balanced position

When we consume plant - enjoy it - created connection to its emotion - AA

K- We already do that but we are not aware of it. When we take a herb, consume , enjoy it. We connect a line of emotion to it, through it's AA, through its existence. Scientists have shown emotional connection between humans and plants, very clearly how the plants respond, ... but now we have to look at the D of emotion interaction is created, what strength, and what's the cause of interaction.

How will the animals respond to not eating or killing anymore - transfer emotion

How we all can interact, not just humans. What about the cow which can walk the fields but it doesn't need to eat anymore. And the grass can grow so much that, it (cow) can not go anywhere. And can he transfer the emotion to the grass, "stay at the height that I can go through too." That we don't need to cut to destroy. (2:30).

Moon carries field strength of AA of life on earth - connected to it

While we are going through the structure of the fields by T&T why does earth waters, respond to Moon so radically, everyday, every cycle? Does the moon carry field strength in the strength of the AA of the life within the planet, that they are connected to.

Gravity has to have a line of connection - push and pull on ocean tides

There must be a line of connection, it's not just gravity. Gravity has to have a line of connection. What does it connect to that it creates such a movement? Such absorption, then to a certain strength the G earth pulls the matter back down. When the earth is on the wrong side, the field of the sun cannot interfere so much, then the field of the moon which are slightly different, but of the same, create such a pull and push.

Man and woman both go through monthly lunar cycle - connection

Q: Is that people experience such a shift connected to the moon cycle?

K- Should be somewhere, some ways yes. We have this in many ways but we never connect. We never understand. We have this in the month cycle of the moon, which part, where is the highest, where is the lowest. We have the same. you change the moon to a woman or a man. WE go through the same cycle every month, why is it cycles, (2:32). in such a way that it repeats itself. What decides the end and beginning of the cycle?

Q: Would other entities .. soul experience this

K- According to the cycle of life we always ?? doesn't matter where we are. Man on earth reacts to the moon. the others in their D, react to their D, and not necessarily to the moon.

Q: that fields strength same field ?? across the Unicose ?

Every entity in U is field connected - depends on what strength want to connect

K- we are all field interconnected and this is what we have not understood. Every entity in the U is field connected, depends on what strength you want to connect.

Q: you said,.. it depends on what field strength you want to connect with.

Sometimes we have a choice of interaction - sometimes we don't

K- .. sometimes we have a choice, sometimes we don't have a choice. (2:34).

Never have a choice where you'll be born - because don't know strength in place

You never have a choice where you'll be born at, because we don't know the strength of the ?? life at that point and position.

If field strength changes - can fall in love without wanting to

They tell you, "oh, shoot, how did I fall in love with this one." Because the field strength has changed.

Q: Jalal this is a small video to show, with my plants here. (2:36). Lets see what this soul decided to be.

(2:38).

(2:40).

K- But the biggest question is how can you do 40 days holidays

You see, did you use any AA in the water, what kind of Gans's.

Q: this is Cup of teh man

Key to successfully using technology - is creating line of connection with AA

K- So you put AA in it, so you have created that condition to the plant. The key to a lot of work when it comes to human , plant, animal interact is to create that line of use. AA on top of the water is not just AA, it's a connection line between above and below. When we don't have that connection, how do you want to make a connection.

Interesting enough on this planet, due to combination of the material, (2:42). without you knowing about. a Cu, different strength Cu, or different atomic structure Cu, you created a composition of all the elements and then one of those, or some of those are at the strength of Cu the plants, because it's the strength of AA.

AA in Gans Box - comes as a composite - spectrum of fields

Now we know the connection between us and the U, .. and the plant life, so we know somewhere in the spectrum of this AA we see on top of the water, it's not just one type of AA, it's a composite.

It's not just AA - what is the genetic code of the plant

So some of it has connected to the plant, and it connects to it and takes energy. But again has a cycle of life. Will it stay for whole winter flowering, or is still as part of its genetic information will have a time span of so much, and then you keep it, and next year it becomes another flower. Why do the plants die, why do they have a 1 year cycle?

Use AA when the plant is at end of cycle - flowering and making fruit

You went on a holiday but the AA you put in there has made the link. This is why in agriculture, the people who do the tests, they put a lot of Gans's at the beginning, but actually when it comes to the fruit part, to the end part, it is the most important part to put the AA and feed the plants. (2:44). At the beginning you attract a lot of it, but if you want a mature end, flower, wheat, whatever, the last part where the most AA is absorbed, matures the plant. So you introduce the AA. and it's there.

Q; In this respect why are linked much more in a grief than happiness.

K- ... Because you are born in Iraq and Middle east, that's our nature. It shows we are very mature. Living in England and other parts it's just fun whole day. Who wants to work. you become Jewish guy and cannot moan, you don't spend any money on the ?/ so you are always happy. It's the culture which we are brought up

Lady in pain - left her body and manifest in another part - Did she use emotion?

Q: .. what you taught us about this lady, which was in a position, and she leave the body, and she manifested herself in another part, she used this connecting from her position to another position, how? using the emotion part?

She used emotion - to take the soul and manifest physicality somewhere else

K- It's the emotion we use, we don't want to be in that environment, you can have the physicality, I take the soul somewhere else and I manifest myself somewhere else.

Did she use gravity of her soul to reposition? - Not gravity

Q: Is it going up in a way gravity of her soul?

K- It's not a gravity, (2:46).

It's positioning in respect to somewhere else - where she associates freedom -no pain

It's positioning in respect to somewhere else, she could have gone to the Moon or Mars. Nobody else .. she doesn't know the environment so she prefers to go somewhere, maybe, her soul always wanted to go. where for her there is freedom and no pain. It depends what we associate with. This is part of our total ?? problem, and association, and how we associate.

We choose to go through pain structure - Or we choose to not feel it

We choose or we go through a pain structure and if that pain doesn't exist. Or we go through the system that we don't feel it, then we can be anywhere and do anything.

Mr. Keshe fell off horse - broke ribs bleeding - continued to walk

I have explained this before, I fell off a horse and I started walking, but all the bones were broken. I felt no pain. I felt no pain literally till they brought me out of coma, days later. and there was like an pneumonia infection in my lung, otherwise with my ribs broken, everything, bleeding inside.

I didn't associate with pain - therefore I didn't feel it

I never felt the pain, because I wasn't associating with pain.

A cut off point - we choose not to feel pain

I know .. I got up and I knew the body is there, but it had to do something. (2:48). It's what we call a pain, .. pain threshold. Do we like to be in pain, or do we cut off a point, and say this is it, as much as I can take. ??? you never remember the pain.

It's not being numb to pain - It's not accepting it to be

We choose, we are the choosers, we decide in what point we don't want to feel certain things, It's ?? not becoming numb to it, it's not accepting it to be.

... Thank you

Q: show pictures of orchids that came to life.

K- Yeah, orchids come to life all the time. In Linz .. (2:50). every table had a white orchid
These are very resilient flowers .

Q:
shows orchids (2:52).
(2:54).

K- I hope we learned a little bit more today (2:56). as we go to .. another phase of teaching we refer more to the books . can refer to it ..
Each part of the knowledge uses the same words, same book, but different enlightenment,
This is what universal knowledge is ..

Man has chosen to use his intellect up to the point of material condition, and he has trapped himself in it. Now he has a choice to go further and use new intellect and new understanding and expand the horizon of his existence in different D where what we call, death does not exist, where eternity exists in millions and billions of years, in comparison to man's D of life. where in that D it could be a second. This is how we transmute life from one to another where and how to manifest our existence.

Thank you for today
(2:58). depends how we want to use which one
Thank you

396 KSW

END
