

400th Knowledge Seekers Workshop; September 30, 2021

Note: Transcription has not been checked by KF. Please listen to original recording.
(Transcription by KF Brazil)

Production of Enhancement Units started, Collective human souls to colonize space, Mr. Keshe will return to Iran build first spaceship city, We create an idea then limit ourselves by it, Fear is biggest enemy, China offered solution to energy crisis, Black holes are plasmas - neutrons - all plasmas at some point,

ENGLISH TRANSCRIPTION

(:11). K- ... We started nearly this time some 8 years ago with some bits and bobs running before the Knowledge Seekers (KS) program. It's been an amazing journey. We have learned a lot. From what we see the journey has just starts. The journey of the knowledge and the knowledge seeking.

The spaceship center as you see it, will open up this Saturday, and will become the center point for the space T. In a way, a change of the course, from rocket and propulsion, to MaGrav positioning, and that kind of structure, the way the U works. We see new systems very much different than what was before. We see a new understanding.

Coincidentally, maybe the right way, the Enhancement Unit (EU) what we've just seen advertised, has gone into production. This week KF has submitted the production of the KF EU to the .. rate of 3 a week, from this week, to be produced in China, shipped to Austria, and somewhere by November, December every week we'll deliver 3 units. The initial units will be kept in the KF center for flight tests. As we said, we are getting prepared for the flight systems, (:14). As we receive 3 EU a week from China, and we spread it around the world. Hopefully by the back end of January, February, Chinese New year, we go into production of 1 unit per day. We have a full commitment for this. We see our production to increase around about a thousand a year, plus every year.

We don't see China to be able to support such an expansion, and we transfer part of the development to Iran. That the EU will be produced in 2 locations. As we see China is running into deep energy problems and they dropped to 3 days production. The way it's going, they might go to 1 day production a week.

It's very much when I heard about the 3 days production, ?? brought memories of 1972, when the Shah of Iran increased the oil prices from 1.5 dollar, to 2.5 dollar, and crippled the West. ?? no electricity and operations had to be done in the dark. Nobody could afford \$1 extra per barrel for 200 liters of fuel.

Today the same has been done, but this time the instigators are US. They allied with the Australian, and when the Chinese took most of the coal they invested in it over years, that

the have a supply guarantee, and the new alliance between US, Australia, Japan, and Canada made sure, that China will be brought under control.

We'll see the prices in China, the goods will increase. Shipment delays will be massive, (:16). and China will not be able to come out of this dilemma. They already gone to 3 days production. They will push them to 1 day production per week.

For this reason with the insight what we see, and instruction from the heads of the KF, we are splitting our supplies into Iran and beyond, that we do not rely on the Chinese supplies anymore. But the first series of our goods have already been placed and EU will be seen in public in places like Tehran, AZ and the rest of it.

Interesting enough we'll see an expansion into these T within the KF. We have already informed the governments who suffer from the energy production, lacks of it, and the rest of it, will come to understand the problem is getting bigger and bigger. Some of the nations in the world, the poorest, already lost most of their incomes trying to pay for vaccines. Now surcharges on the coal, where most of them have a coal fire burners from old times, all made by Chinese, have to cover more. In a way, the whole economy of the world is becoming crippled, by themselves, through their own, what I call, mishandling of the situation.

In either case, we'll see what will come. We celebrate the opening of KF center in Linz on Saturday at 10 o'clock. Please those of you who are coming do not turn up before hand. Our people will not be ready for it .. (:18). and this is more than we can handle. We don't want more than 30 - 40 people in the center due to a lot fo other reasons. I am sure there will be a recording of it, the opening and it will be shown in the coming time. You might get a tour of the KF and the new systems which should be launched and be seen in the public for the first time. We thank especially the Austrian team

This weekend is a very small gathering of the KS, but a bigger step for spreading the knowledge. The center is used to bring the world leaders, to bring the world scientists to see the change, from the permanent place. And to show that it works. It's not just an exhibition, to be. The proof, the confirmation, will be given to the government officials, and through the same.

On the other hand we congratulate the Iranian team for being able to establish the Iran space company with the permission of the government. KF has now, has officially become a space program through the energy production for the space. We'll see this is a breakthrough for what we promised for the 6th of June, it allows us to do the flight test by putting ?? new energies. We try to gather much more momentum by the time we get there. In so many ways, most of us are ready for the change. (:20).

There is a note written by Rick ... important for all KF websites ... Rick would you like to explain more.

R: .. New regulations with Youtube. .. we received a headline from New York Times which actually made statements about Youtube, as banning all vaccine misinformation

from its platform, as part of an effort to reduce the spread of false claims about immunizations. That was the breaking news ..

(goes over Youtube new regulations ...)

(:22).

R:

(:24).

The important thing is we have to be careful when we produce broadcasts for Youtube, to not include the so called, vaccine misinformation. So people who are producing the video ...

They brag about removing 130,000 videos for violating vaccine policy.

K- I think you said somewhere, Telegram is going to go the same way.

Q: There are some rumors that Telegram might be cracking down as well

K- So whatever is not in line to what they say will be taken down .

(:26).

K- Yes, just try to avoid talking, or in the teachings, or in your private teachings about vaccines and Corona. We understand how it works, we understand what it is and hopefully in the near future there will be another ways of communication that is not mass controlled.

Teaching Starts:

The teaching of today comes from what we have learned from the past few weeks. What we thought we understood from the totality of the knowledge. We are here today, because of what our ancestors over millions of years have gathered as information and they have embedded it in our genes. What not to eat, what shape to have to survive, what colors will fit in which area and in what condition.

The most strangest thing that will come to mankind, in the space T, is that all these genetic modifications to fit the environment, the position, and the place, on the arrival of the man to a new destination, has to be done within seconds, within minutes. The genetic modification, to compare to what we live in, and surviving in the new environment will become instantaneous.

In a way, our DNA, which is an information of its own RNA, within the soul of the physicality (STP) of the man, has to decide within seconds, (:28). the evolution process, which took mankind for millions of years in the space of earth, to learn and modify to. It will be interesting in how our knowledge, in understanding of the knowledge of creation, will bring us to a point of understanding, how we shall survive, how shall we mutate to live on earth as a man, and on another planet, as a citizen of that planet, but not in the shape of the man.

For those who decide to travel the depth of space in spaceships, creating conditions, that they can survive in a physical condition, the span of the U. Up to now, every change we see within the structure of the body.. has been ?? actively worked out over billions of years. Where the eye to be, where the nose to be, which kind of intestines to be, do we need anymore appendix, and why not, that we all suddenly don't need it, and it goes through the earth process of all of us. These are the things, that the mankind in the depth of the space has to face within minutes of the arrival, conversion to the new environment, conversion of the genetic modification, according to the survival ?? and the criteria of the position, time and the place. In so many ways, how fast would our soul and the STP allow our physical body to go through mutation to be able to live, (:30). and survive in the new place and dimension (D).

For us to go from black to Chinese took centuries, thousands of years, and we traveled and went through different conditions. Now we go from man of earth, to man of planet Zeus. There are no eyes as we see with the sight of the soul. There are no arms and legs, as the place is like an ocean of love and fields, it travels you the same as you swim the oceans of the earth. You become like a fish, fish swimming in the D of the fields of the U. Then you'll find out, that the body of the man in that position, does not need anything, except finding balance with itself, and confirmation of the existence and presence in interaction of the fields in the environment. In the new Enhancement Units (EU), which will be shown in the KF center, we will see a new version. In the coming time when the new center is setup we create that condition, of what you have as the chairs, to another system, where 2 systems super passes or super imposed on top of each other, to create the condition of the transition from the soul, to the STP. In a way, what it means, is that the system within the Enhancement Unit will allow the other system to behave like the womb of the mother. Then they interact, will live according to itself, by itself in a different dimension, (:32). and condition. In a way, it's a multiple layers of fields.

What does this mean. This is your EU, you are creating specific fields through the interaction of the reactors within the system, which their fields comes outside. It's like a womb of the mother. Within it we embed a new system, where again, it's enhanced with different systems, which creates a new D of the fields, where now within the system we put the body of the man, which itself becomes another system, with its own multiple field dimensions.

Where you can hold onto the body, while we change the environment of the surroundings. Where we can hold onto the shape of the structure, while we travel the body .. in a different D across the U. (:34).

The new EU, which are built, and is a way, a prelude to a new spaceship program, not only will carry the man who wants to go in a physical D, but will carry the man who likes to go in the soul D. This is a new breakthrough, which allows many of you to decide, which way, and how I want to transport and transmute. Because if you have reached the confidence of working between the two, you will find out a very simple criteria, that the soul of the man (STM) within the center, in interaction with the totality of the system

decides how the system will run, to travel in the D of physicality, or to travel in D of the STM, depending on the maturity and depending on what the man expects to see.

In so many ways, the new EU, which you have seen the first of it, and from November on you will see more of them, will be combination of the works of the KF in developing new space T, and then we come to the fact, would we be able to travel the span of the U as individuals, or as groups, or we travel as collective souls within the structure of the system, that allows us to be able to collectively carry thousands of souls to the position and destination. Which means, (:36). from now on, man has the capability to travel collectively as a soul to new point, of destinations and create the colonies of man, but that way you know who all is from the man from the earth in that new position, and location where collectively land.

This is one of the reasons that we have said in the recent past, that the U Council in coming time has to decide on the level of the emigration of the people from this planet, that the urge, and the pleasure to see the U, does not deplete the life, and the process which is been made on this planet.

In the new EU, which you will see coming up in January, you will see these new settings. We might allow certain people to enter to test. Not in the exhibition center, but in specific position, which is agreed by the governments, that we can see where, and how the situation will turn up. That we have, in a way, understanding and control of what is about to happen to human race.

The T & T of the physicality and the STM , and the energy pack, will become part of the normal routine work for the mankind on this planet and beyond, once it becomes aware of the totality of the knowledge, as it has been to many other races in the U.

We are not going somewhere unique, .. where we have been before. It's the first time, (:38). we are trying to learn, we are trying to understand the new ways, the new knowledge. This will be a fantastic time for many of you, and at the same time a fantastic time for many of the KS, who would like to know, as we said, what's that. What would happen to us then, in the space of the U, in the D of the existence, and can we, if need be, turn this ship back home. Where do we look for? What do we understand, that mankind wants to come home. How he will find his way back home.

The knowledge and the understanding of the principle of T, depends on many ways, how KS interpret the knowledge given. I am sure the way we collaborate with different nations, for different T, in the coming time, mankind as a race will collaborate with the other races of the U, to develop, to understand, the progress of the knowledge.

Today's teaching is very simple, what is about to happen, is about to be shown. It's a window to the future of mankind. It's a window to understanding that, not only we have the T, but we have the tools of delivering the T. (:40).

How do we create the energy fields in the bigger shell, that in interaction with the inner shell, will allow the shell of the STM to accommodate itself in the D of physicality of the U. This is part of the structure. In a way, the EU becomes that womb of the mother, that EU, the fields of it, is the fields of the U, where the womb of the mother carries the fields which fit the environment of the earth. The knowledge and understanding of it is part of the T, which will be revealed. Gradually we'll explain to not only KS, but to the scientists and the rest, and then they will have to go through the process of understanding how, who, and the way we will send groups of people out, how they will return and what they'll bring. Would they contaminate us with, would they bring us new knowledge in the shape of the fields, and many of other new adventures. This is part of the practicality of the new T. Now that we have gone into full production of the EU, different applications of it will be delivered, and for KS to expand on it, to develop it more, and to understand how this T can be used for a specific job, or specific purposes.

What I would like to do is to allow you to ask questions, (:42). and with it to expand the knowledge. As we can carry on you'll see the new EU in the new .. KF center from Saturday. Where both, you'll see this unit and this unit. And this unit is the man who is going to be in it.

When we add one unit to the other, for combination of one unit to another, how far man will be able to be ready to see, that not only its soul, but STP can carry the transformation through the D of the U. The transmutation will come with the presence of the new fields from outside to inside. But what happens when the fields from inside, superimpose the fields from outside. In a way, STP will take over the soul of the system, and then what would the humanity do in the process of the transportation and transmutation of the energies and fields of the U.

As I said, we have just started the game of the space T. After 400 sessions of teaching, and plus many others. There is one point, that it has to be understood, that this T cannot be used for harming another person, harming another soul, dictating, imposing one soul over the other. The system is so balanced, the system will not allow such a thing, (:44). as it would be going back to the ethos of, "everything has to be correct."

I hope in the past half an hour, I opened your eyes to a new method of .. T&T and containment. The biggest problem for you is to contain. To be able to contain. To be able to contain the STP and the STM together, that on arrival one does not become free of the other, and create a condition of what we call, the death on this planet as we ?? The scientists of the future will have to understand this process, if they are there to launch a successful trip. If at any point you loose one or the other, you will create the demise of the separation of the STP and the STM. It's not so, all the time, sweet and hunky dory, if one has not understood the process.

The elevation of the fields, the gathering of the fields together to be as one, is more important, than trying to achieve movement. Trying to achieve T&T. Collective conscious of the fields balance, will become part of the process of the future.

In so many ways, mankind will decide how many, where and to which position in the U we'll send the men of the earth, for them to explore and bring back the knowledge. Not in hundreds of thousands of years, not in decades to go and come back. (:46). But more or less instantaneous, as we learn we use the fields of the U to reach the position of the U.

In the teaching of today, you'll understand the practicalities of the new T, what you will see, what we call, as a horizontal units, as in vertical units, which is going to be shown in the .. Linz center. These systems are built as a prelude, to the next extension of the D of the teachings. Next extension of the man to be able to travel different D and positions in the U. We will try to explain in a much deeper way, how to be able to achieve position, time and place in the space, without interfering, or interacting between the STP and the STM.

I hope many of you will enjoy coming to the Linz gradually and enjoying the presence of the new T. Every week, every month new systems will be added, and as we develop, and as the Chinese, Iranians, Americans, Brazilians and the rest, develop more T, will gather all that in this center. That mankind come to understand, it's a center of knowledge. It's a center of understanding about the creation of the life, and how this life will change for all of us. We never had such opportunity, now we do, and our knowledge and understanding, (:48). is part of the process of gathering more, from interaction of the fields of the U, that it creates more for us, a new D of understanding about the Creator.

In the new Exhibition center when you come in, don't look at the systems anymore, look beyond, what the systems can deliver. What are the opportunities that man has been given and needs to expand to understand.

In the past 3 - 4 weeks we tried to build everything towards this point, that once you come into the center, once you see the systems, entices you, it sows the seeds of the development within you, that brings you an enlightenment, that you might be able to create another condition of the, what we call, existence. What you might take from it, and what you might bring from it, to add to it, to expand it, and to enjoy it. These new Exhibition centers we do our best to create a condition, what's then, what else can I develop with it, what are the options? We try to do it this way, that we stop the copycat business, that there is one there, we have to copy. Do not copy, extend it, add to it, and see how you might be able to contribute towards a betterment of the human race in deep space. (:50).

How do we go from the STP to the STM. In the Exhibition center you will see these two. They'll be set in a specific way, because this is the horizontal people, and this is the vertical people, and the mankind has swung between the two. And would that in process create the new D of life. New intelligence, new understanding, new process of adding to the knowledge of the man in the depth of space. Encourage you to look at new angles, creating new conditions, and creating and understanding of the totality of the system.

I hope I opened your eyes to another new D on the 400th teaching, that you will understand there is a lot to come. There is a lot to learn, and there is a lot to be shared.

Are there any question. Or am I going to far for you to catch up, then it becomes, to be ignored, as it is not understood. (:52).

R: Thank you ..

K- They are used to asking question after the break.

R: putting the pressure on people.

Q: .. When you are in the workshop translating teachings, and the Creator starts speaking, are you in a conscious or unconscious state? Would you please comment and explain.

K- I have never been in an unconscious state.

R: .. However there is a separation that takes place at times when during your talks and the workshops, where Source is speaking more directly let's say, is that true, or is it always Source?

K- It's always the same Source.

Any other question

Q- (:54). once the units are installed around the world, will they be able to supply energy so that people that are in the centers waiting to go into the units, will not need food and water?

K- The systems are set to supply energies, which the STP and STM need to survive. It's not water, it's not bananas, it's the energy fields, which is needed for the T&T. You'll find out when you move into the energy, and what we call plasma state, there is not much need for what you call food. Because there is not much what we call, physical burnout. It's more balancing so there is never has been a shortage of, will I get a water, because when you land on planet Zeus there is no water, what's the use of having, creating water to be in there. You might get drowned in it, because it doesn't exist, it doesn't need to be. So we look at the D of the fields, which is needed for the time, place and position. Where there is no need to eat, as the energy needed to convey the plasmas, and the energies are already so minute, that you can survive billions of years.

When we say, a man needs 2000 calories a day on the physical D, then we say that's only 20% of it, the rest comes, (:56). from the environment. Then you calculate 20,000 or 10,000 calories a day is absorbed from the environment or eating to be able to function. In the D of the plasma you need maybe 5 or 10 calories, not 2000 calories, because there is no D of physicality, there is no motion of physicality's. Calories don't exist, energies and motion, or what we need, are so simple, the physicality creates this condition of need for conversion. In the D of the soul you don't need this, your whole, hardly use any calories, because everything is in D of the field interaction, not physical movement. This is important for us to gradually to understand. With 1 calorie you might live for a year. But you have to understand, do we even need that 1 calorie, as you work through the interaction of the fields.

Any other question

Q: ... comment on 400the KSW been an amazing journey .. (:58).

Q: Ed .. I am trying to understand the utilization of these machines, .. you drew the inner parameter, outer, and the man .. I am trying to understand in the experience of the

man, how we assimilate this. .. when a field is inside a field, is inside a field, they all intermingle ?

K- Yes

Q: So is our ability to accomplish this dependent on our acceptance of merging into these other fields, that are beyond our experience?

K- Why do we need to do that?

I think you'll learn in the new structure, we allow things to happen according to our wish, according to what our soul sees to be the perfect combination.

Q: .. I am imagining, especially with the STP, that there is a resistance to this, because ..?

K- Why do you consider that?

Q: I guess, I just think that in the physicality, there is a fear of going beyond. (1:00).

K- Shouldn't the fear be gone by now, gradually?

Q: Yes, if the knowledge, yes .. you continually expand our mind to see these new D. I guess that they're not something to fear but, so maybe the question is meaningless, but I am just trying to understand it a bit more.

K- You see we create the conditions, and then we enforce the conditions, and then we accept, and believe in the conditions we created. Happens with individuals, happens with the governments and happens with the societies. How we consciously allow these to happen is limitation we bring on ourselves to accept the next step.

I had this case in the past few hours. We told the Chinese a few days ago, there is a solution for your crisis. Up to now every time we came in the recent past, they said it has to come from the Iranian government, not from you. Today we sent them to the Iranian government to get the permission to speak to KF, which is a bit harsh for the Chinese to do so. When we gave everything as a gift to them, they became arrogant. Now they have to be humiliated to go to the Iranian leadership to ask, if they can speak to the KF. Because they set the terms, not us. You understand, we set terms and then we go back with it. When it's free. (1:02). When we gave it free, it was too much for them, because then they became arrogant in their success.

We do the same in our souls, many of us .. as we succeed in the space T, we become arrogant, because we achieved this, but we don't see the problem around the corner, and we hit another problem, which is non-returnable. This is what is it, always stay in a position, that you don't have to be afraid of, you understand it and you can be correct. It doesn't matter in what shape, to be in the D of the soul, or anything else to go with it. Fear is the biggest enemy of the man.

Q: So opposite to the fear might be, you get to the place where it doesn't matter what is to come, you are just willing to accept it. It doesn't matter.

K- You don't will it to accept it. You go with it, because you believe the other souls who brought you to this position know the best. You understand.

Q: Thank you, yes.

K- Balance of the fields, which brings you to that point, is the best.

Even, I was explaining this to a KS, .. it's in the writings. Even a stone has a soul. Even the collective of Gans's you have, in the what we call, in your jars, they have a reason, they have a soul, they can distribute, they can decide. (1:04).

Very recently .. it's never happened, as long as I can remember, I was working with some Gans's, and a jar of a Gans fell and broke. And I thought, I never do this, why? What happened, what's the reason? And then I stood back, and I said to myself, what has this soul of what is in here as a Gans's, trying to tell me? I am going the wrong way, or I don't understand it, because I was relying on it, they are telling me, "you don't need us, look in another direction." Even it means we don't need to be here. We served our purpose. Then is brought me to thinking, "wait a minute, now I understand why this jar fell." I was relying to much on the material inside it, and my eyesight was limited to what was in there. Are we losing it, I had more of it, it wasn't the only one. It brought me to understand a new principle, a new method, a new material, which is needed for a new condition.

It was very interesting, how , when they say, even a stone has a soul, collectively your jars, when you see it breaking, and it's not to be used. They are trying to tell you something, and it was beautiful, the knowledge which was gained that way. Or the insight, which was created. It was so perfect. It was so perfect. It completed the piece of jigsaw puzzle, which was missing. You can imagine, "oh, it was, happened accidentally." No it has a reason. Out of nowhere. Because it means, they tell you, " you are looking at the wrong end." (1:06).

Q: So perhaps that occurrence of the jar breaking was constructed by those who were guiding us, because you were ready for that?

K- I don't look at it that way. But I look at it, collectively our souls lead us to a position. .. Collectively our souls lead us to a position. Why do we go to certain extent to do things, and then, we find out it cannot be done. Because we set track, and then something happens, and we change track, and we say, "oh, now I understand why that thing happened." We used to call it, accidentally, but now we understand, that even the cups, plates, and a cat, and a dog, and a man, all have a soul, and collectively, sometimes they see the best for the man to be ?? where he is.

Q: Brazil, (1:08). .. about EU. .. but you said the vertical units for Vertical People, and Horizontal for horizontal people. Could you explain more ?

K- These new units are for different purposes. The vertical system is ?? paramount to the new transportation systems, where we should be able to transmute from one position to another. But at the beginning, we bring a D to be able to transfer energies and the fields within the body of the man to a different application and position. The horizontal system is, bring practicality, deals with the .. totality of the body, as one field. Where the vertical, the horizontal one, is section by section. This when you deal with ?? as one is enhanced in that way. (1:10). This is set in a way, that we can go section by section, you don't need anything to do with the legs, you don't need it, if you are dealing only with the heart, or with the brain. This is to do with the combination of the use, but vertical position is part

of the next step, ?? when we do transportation. These are big units, round about 2 - 2.5 meters tall.

Any other question

You have to understand we start teaching gradually different applications into the new T. It's very much the way you, when we had the first car engines, then we had to learn, that we built more advanced car engines, and everything else, then they became rockets from what we learned from the engines. Now we go through the same process, but this time through the fields, the interaction of the fields of the systems. We allow different applications of the fields, we manifest different what we call, principles.

Q: Alex - Nigeria ... sorry was a mistake .. (1:12).

R: you have to say something ..

Q: I just did some little experiments with reactors that gave me some very, very good results. So I want to encourage everyone not just to talk, talk, talk, or listen to these lectures alone, you have to go and do your own research, because if you don't do no one going to do it for you ...

K- I hope you are well in Nigeria ...

R:

K- And if you are going to go through another cycle of lockdown, if they bring us to that point. you have plenty of time to expand it.

(1:14).

>> **Proofing to here** >> continue proofing

>> **BREAK** >>> 400 KSW Sept 30, 2021 (1:20).

Q: .. Would you be returning to Iran soon, after election. or have you changed your mind?

K- Yes, we will return to Iran, definitely for sure.

R: You have to make sure the Exhibition Center is situated ..

K- The priority for us, at the moment the Iranian team are working with the people in background who support us, to complete in finding, completing the process of the first spaceship city in Iran. They are looking at different options. Once it is done, we will go back to Iran to build the space city, what we call, the spaceship city of Iran.

Which as part of it, as we have discussed with all the people, is bringing in all the space agencies to work from the same center. At the moment, (1:22). if you agreed to peace over, we agree all to be in one place. There are a lot of things taking place.

It's not easy, especially now that the new government has taken shape, they're realizing how much the old government have damaged everything beyond. We had a corrupt

leadership, .. and now that Mr. Rohanni has gone, we have all this corruption ?? We see a big changes, but it takes time to uproot these people who are sitting in these offices .. ?? because they have been well, they were used to lubrication their pockets. The new regime is trying to change that position. But yes I will be returning to Iran sometime in the next few months. But it has to be completed, and there are a few things has to be done in Europe before I return.

Q: .. Can we through the soul travel into a Universal EU say, from Australia to Linz, or do we need 2 units one here and at the other end?

K- Both possible, depends what you decide. It's not tricky, it's just understanding the knowledge, how to do it.

There are no GPS in the U, so you decide on the place, which you have chosen, the field strength. In a way, you measure ahead, where you want to be. (1:24). Then you transfer the right energies to appear at that position, place and time. Then be able to stand the conversion at the point.

Where, when you can go from one unit to another, you already know what is going to be on the other side. If we take you from Rome to Paris, we know you are on earth condition. But if we take you from here to another position in space, we have never been, you have to be able to use the same understanding, but put certain parameters around it, that guarantees survival at the point of manifestation. Not necessarily physical manifestation, but manifestation of energies. You will learn, mankind will learn these very quickly.

There is a race, which is not far sitting outside the earth, who specialize for this, and when we achieve full understanding of the peace, these races, like teachers, are ready to come in, to teach man a lot more. But man should first change.

Q: .. technical question .. Could you explain how the protons which are made of quarks, and B quarks, and an invisible force field, the Hicks fields with its respective bosons, (1:26). that is responsible for attributing mass to other elements, or particles works in this state. Below the Hicks boson is what has been named by science as a quantum vacuum? How does this act on the ship?

K- I am trying to be very polite, and find an answer to this. Hicks, and Bosons and whatever, up quarks and down quarks, are all as the fields we know, but are a bunch of what it call, hot air.

Up quarks or down quarks are what you call earth or moon, or matter state in that position of field strength. When 2 entities in an environment which are MG dynamic it creates field forces, whether you call it bosons, or buzzards it's the same. Understanding the T, understanding the process of creation is which counts. Mankind has made too many names, without understanding what actually it is. If you call up quark earth, and down quark the moon, and then whose quirky ?? job is.

We didn't understand this, and we accepted all the rubbish which was put in by scientists who thought, " oh I'll be imagining, thinking and do something, and people will follow." We seen it with the biggest liar Stephen Hawkins, he lied and cheated, and he came out with things. We saw the same thing with Einstein.

These things are now, understanding the process of the principle, or the central energy, the transition from A to B, and B is manifestation of entity, and it says everything. It just depends what energy and what, (1:28). So there are no quarks, the only quirksiness is the scientists have managed, or tried to fool us for such a long time. When you have dynamic fields as plasmas in different sizes interacting, you get different effects and different fields in motion. You call them whatever you like. It become the 1 and 2 and then you understand how much we've been misled.

Now you can understand it, you don't need to imagine it. You can put names into it as you like. The proton is a shell of the solar system, is earth a quark? Or is Jupiter up quark? If you understand it. These things were made by a bunch of illiterate scientists who thought, wanted to show they understand something. The time of these things are over. You understand what is in Book 1, you create the name as you like, or what you do. Any other question.

Q: Can all KS connect at the soul level, or by spraying the Gans waters on Sunday, connect to the Linz conference and enhance the plasma dome on Sunday to a higher level? We can do this every Sunday

K- You can do it every Sunday, (1:30). and many people around the world do it nowadays. You don't need to wait for a Sunday. You chose a Sunday. You can do it any time.

Everyday you have so many Gans's sitting in your kitchens or whatever, for months and years, what are they doing in there? Just free them up, and everyday just put some of the water in the sink, in plant, outside in the garden. Don't wait for a Sunday, and only one (day). You might have it, mankind is a hoarder. How many Gans's you have in your house, in your kitchens, labs, they are sitting there for years. Why don't you use it to add, to change. Once or twice a week, just go through them. All you need to do is fill them up with more water, and you have more for next day, next half an hour. Don't wait for just Sundays and just 1 cup. Change. You'll feel the difference.

R: Can people use their intention to help support the event at Linz, through that action?

K- Yes you can do anything to support, anything at the center

R: Okay that would be a good one for them to focus on ..

Q: in this way we can bring all souls to balance themselves to peace.

K- There are a lot of different ways. (1:32).

This exhibition center is going to be here for a long time. It's preset for a lot of things. It's preset for a lot of changes. We'll see how it goes along and how it takes shape. It's protected by another UFO, and we'll see how this UFO shares knowledge and itself with

all of us. It's a very beautiful place to be in. We'll see. We will bring it the soul of humanity for it to grow.

Q: How can we use the principle of creation and functioning of black holes for flying. I am studying your article concerning black hole ..

K- Depends what you call a black hole. Black hole is a point black, but inside it, it's bright, it's a sun. It's just at a certain point it's in balance with its environment, what it receives and what goes out. It's like a Nano layer. When you have a tube, a Cu wire, you N coat it, outside it's black, it doesn't mean there is nothing inside.

So it's the same. Inside a black hole is a star, in balance with the fields it receives and takes, it creates its darkness, what we call the blackness. It still has a point of transition. It still has the point of gravity to pull, and M to give. What gravity you want to create and what do you want to, (1:34). gravitate to. Or when you become, that becomes the black hole of the knowledge for you to test, and what do you want to achieve.

R: What would be the relationship between what, we call the free plasma, and a black hole. Is there a relationship there?

K- They're all plasmas. Every plasma, or black hole, or neutron, or whatever you want to call it. Even if you look at a neutron. If you approach a neutron at a certain point, it will look black, even an electron. It's like the atmosphere, at a certain point every plasma will look black. So you become a black hole., because you become a black energy. It depends on the interaction of the fields from its environment. This is what, some times ago, it's a point of observation. If you have a neutron and you have fields, at a certain point one of these fields will surely be black. Then does this neutron become a black hole. (1:36).

Even earth at certain points will become black, cannot be seen, depends on what the speed, and what weight, and where and how you approach it. You have the Cu, inside it's still there Cu, for that a few layers are black. If you extend it, here you get Gans's (above the N layers). If you push it inside you get the solid matter of the Cu. But you still here (surface) are black. Every plasma, every structure has a black, what we call, a black hole, a point of balance of the fields. If you understand this you can make yourself invisible, 1 second you can see me, 1 second not.

Any other question.

Q: ... since we are on short before traveling, can you explain more on the cleaning process, (1:38). not to create harm to other souls. Is the cleaning also required when you travel without the physicality.?

K- What does he mean by cleaning? We don't have showers in the U.

R: You have mentioned in the past like a chamber you would go through or some kind of process you would go through, before entering the spaceship, as a cleansing process.

K- I understand. It's a recognition process. In a way, you have to understand what you have done. You have to understand what you carry with you. What is the reason for it. If you remember we always said, not many people will board the spaceships. Because they know they don't carry the right ethos, they know what they have done wrong.

A spaceship has a soul, and the soul of those who carry it. If you don't fit in with that structure, you cannot fit in anywhere. That's what we call, we change, not change, but we separate, as we say in English, the ?? wheat from the chaff. Your soul does it, in conjunction with those souls who are the passengers of the U. Do they want a murderer with them. Do you want someone whose, what is not, as part of. (1:40).
Any other question

Q: ... If you are traveling to planet Zeus or wherever, how long would you know, you were away for. .. for weeks or months ?

K- It depends what you want to do, and what is the time for you there and here.

Q: You got to sort that out in the beginning, how long you want to be away for?

K- Depends how long it will take you to be there and come back. We are planning an excursion 6th of June, 1 day return, to the moon. The day is nothing. What about if we do a daytime, of let's say Jupiter. How long would it be when we come back, (1:42). to earth 1 day. It all depends, and secondly our day here on earth is a meaningless thing. It's just we entered ourselves to the daylight and we call it a day, and a night, but there is no day, or year in the U. The citizens of the U are not like the chickens, that everybody goes to sleep 6 o'clock earth time. .. It depends. The life style for man will change drastically the way we live. We learn new dimensions, new principles. If you are getting replenished continuously with the energy, do you need to sleep, do you need to rest? Or the body gets used to creating conditions of life, that you can survive any D.

It comes from the back of the principle, that they call it, Einstein didn't understand it, and they called it a "funny thing," that when you turn one atom the other atoms, on the other side of the world turns, because you couldn't understand a condition of polarity, as we are connected.

Now our selves, our souls, as energy, will interact with fields of the U, and switches according to strength and time and to the position, to elevate to a higher levels, (1:44). of the strengths, which goes to inner sanctum, or lower strength which goes outside the boundary. We'll learn a few new things in the next few times to come.

Q: Spanish. .. we have seen several homes in Canary Islands have not been effected by lava ... ?

K- Don't know but we see this in most of the volcanic eruptions where .. the lava passes around, and the things stay there on their own. It's not the first time. It's just the way the fields move. The lava moves. I don't think there is anything behind it.

Q: (1:46). Today a bottle of soy sauce fell on ground ..

Q: Is there a way to take a photo from satellites at the exact moment when the dome of peace is made on a Sunday. Perhaps the energy that is formed in the moment is visible and helps us in the expansion of knowledge to others.

K- Maybe the time will come that many people will produce these things, and then we create a permanent dome.

Any other question.

Q: Jalal, ... The change is happening, we know for sure that it is coming. How we prepare ourselves and what we have really to increase to do. To be in the right position to be part of all this beauty?

K- You see the (1:48). when you look at today's situation. When we look at the Americans for example, have withdrawn from all the wars as a gun policy. Two weeks later we see a new war, economical warfare started on China. This is the way, when mankind stops all these clever moves, then they become enlightened to new understanding of new things. It's becoming who gangs up better on the others, that they can do something else. It's become a kindergarten warfare I call it. Who will have the top pick of the playground and who will be underneath. In fact, they are all the same problem.

But when the change will come the whole lot will change. The whole lot will change when that comes to. We all will be ready for it ... You'll feel it when it comes, we'll be there when it takes shape.

Q:
(1:50).

It's secret and you expose it to the public.

K- Everybody knows about it. This is KF, souls bring it out. So we are waiting for a new MaGrav system to appear.

Q: with the help of all KS we'll do something good.

K- That's perfect, Thank you very much.

Any other question.

In the coming time we'll do some teaching, that open up new technologies, and new understanding of the new systems, where we go back to more or less understanding the physical process, how to use a physical systems to create systems for elevation of the STM, for new T&T and with it, new materials, access to new processes, that will bring a lot of joy to many of us, that how advancement to new T.

If you have no other questions we can call it a day today. You had your 2 hours of teaching. (1:52).

Q: Mehraneze, ... how STP and soul of mind can travel. ... can we do the 4 Cups for someone in the family?

K- You can do anything for anyone in the family

Q: Even the 5 cups (stacker)?

K- Yes you have to understand you don't use it, it is made for them. Made for them.

There is a .. I am trying to be very diplomatic. Through Cup 1, 2, through Cup of Life, to show you the way to battle with this plasma energy, past 2 years.

If you are vigilante with the system, and understand the system working, and on the points, we see, the mutation of these P1 energy, (1:54). in how it's becoming more or less elusive, and some KS, they say, Cup 1 doesn't work, the same as before. It's not that it doesn't work as before, it's just that this plasma energy has mutated to a new D.

The bigger shell, which was the original we saw, we could manage, now it's become the inner shells of, which is much stronger, but deeper inside. So you need to change direction and composition with it.

In the coming time, in the next few days, .. few weeks, we'll introduce you to something you all knew, but if we see the new process with the new energy plasmas, which has been created, all this mayhem, we tell you to go back to a very simple version, and you'll see it works perfect, because the Gans's .. the Gans's you produced in Cup 1 and 2, was a complex Gans energy fields. But these new versions of the PI energy, has taken a different direction, because the top layer has been cooked, now they go to the middle layer, and this middle layer needs a different T, but we all know it.

We'll tell you next week, or the week after once we do it. As usual we announce it through the protocol, through the Dr. P in Iran, that how you can handle the new variety, and the versions, in a different way, but we all knew it, but you'll see a better result, faster results. (1:56). But let us build this up, then we explain to you, exactly how things have changed.

Shall we call it a day.

Q: Is there an update on the release of Huawei CEO's daughter?
released by Canada. in exchange for the 2 Michaels held in China ..

K- No, it's just that it was obvious that it was going to happen. They couldn't get a headway, they played their game long enough, now it's over, and now we see a new change. They released this one, but on the other hand, they have brought the Chinese economy to its knees. This is the childish game play, which will play until the energy balance is coming in and people see equal. That was obvious that this lady, sooner or later was going to be released, with one excuse or the other. Don't forget there is a big game in the background, political, (1:58). and influential, in so many ways, to go with a lot of energy and food industry. We'll talk about it when it happens, in its time and place.

Teaching is very short, but a lot of meaning behind it if you understood it.

K- more about Linz conference

(2:00).
