

402nd Knowledge Seekers Workshop; October 14, 2021

Note: Transcription has not been checked by KF. Please listen to original recording.
(Transcription by KF Brazil)

Remember this day rest of life - release new flight system 4 seat spaceship
Vertical and Horizontal Enhancement units videos; HEU embedded in EU breaks all
barriers; advanced booking flights to Mars; illnesses processed during flight ; Gifted with
Mitra ; Checkmate on those who tried to rule man; The STM will run humanity; nuclear
warheads obsolete; spaceship is peaceful no defense technology; Birth of Mitra as soul
of universe; Deliver KF goods with systems ; How true are you to what you wish; Man
has to work hard to reach soul's desires ; Despite attacks KS keep on serving teaching;
STM will be elevated by flying in systems; Just the STP has chosen to go wrong way;

ENGLISH TRANSCRIPTION

(:10).

Creation Video .. (:28).

K- .. Today many of you will remember for the rest of your life, what is brought up,
what is to be shown, and what has become the process of the totality of the understanding
of KF work. We have come to a point of change. The KF and .. as of today brings a new
era, a new dimension (D), a new understanding in the process of what we call,
"intellectual rights and accessibility of the knowledge worldwide." Today is what we call,
not much teaching, but breaking of news, introducing new T, and in a way, opening the
hand of the man, (:30). from the shackles of this planet. We will introduce the T in steps
today, and with it, we begin a new D in many of our works. As you were aware we
started the opening of the exhibition in Linz... and with it we opened a new door, a new
D, in establishing the systems, which are not known, and unknown, and in so many ways,
extending the T, which were already .. released into the .. market of humanity. Rick
would you please play the first video of the vertical (V) and horizontal (Enhancement
Unit EU).

This is a commercial made by the KF, but in depth introduces a new T, a fundamental
break from the present knowledge and present world of science. We are very much in
advanced T, and this T is unknown, literally unknown, and it brings a new D to humanity.
In the process of the teachings today I will explain the major breakthroughs in the world
of science and T, which the KF releases today.

Many of you will remember 14th October, 2021, as the time when the history of man has
changed, (:32). and it will change.

Shows the video of the VEU

This is the new VEU which will become prelude to .. or what is commonly known as transmutation and transportation (T&T) of elements, of objects, of human beings without the use of what we call, the present means of transportation. This is developed for removable and enhancements of many conditions, (:34). in the body of the man. The beauty of it is, it has the ability to connect the man in any position in the U, to its environment, to its structure, where the fields of .. U, when in interaction with the field of the system allows the process of the development, and transmutation of the fields in both in the physical and in D of the Soul of the Man (STM).

This system is a major breakthrough in science and technology (S&T), and in the next few minutes, as we expand to the next elements of what has been released now by the KF will bring you to understand, man as of today, has become independent of this planet. We do not need rules and regulations, we do not need conditions of the governments and those who try to enforce conditions on us, we can use the system in the depth of the U. Above earth's atmosphere on the planet moon and the rest. Which international new laws. Man becomes part of the U Community.

Play the second video please .This units are present in Linz EC. they have been shown last week ...

You will see not pain pads and pain pens, but T will change the history of mankind in totality of S&T. (:36).

Shows video .. HEU

The new what we call, HEU this is a breakthrough for the world of S&T, where we can hold the soul and the physicality of the man, in the same condition and operation for decades. We can create a condition to change the position of the man's understanding of his own weaknesses within the physical construction. Where man will come to understand and develop new structures of control of every cell of the body of the man. We have the capability and the knowledge to hold on to the soul, but elevate the Soul of the Physicality (STP), till an illness has been processed by the 2 together. You can walk in a with all sorts of conditions, (:38). which are unthinkable today to overcome, and within hours and days you walk away with no condition.

The new HEU in conjunction, embedded in the Universal EU, creates conditions which man and modern science and T have never known. It creates a new condition, that allows man to breakthrough all the barriers, all conditions, all plasma (Pl) conditions, which now have created crisis around the world, can and within interaction of the 2 systems together, create that man will be free from every condition of what we call, "collection of the fields of the plasmas in the U."

You walk on the surface of the planet, you absorb energy pack plasmas, which can endanger the life. You walk into the what we call, HEU within the Universal EU, and within minutes the balance of the fields, completely, completely allowing a new D and a new .. field transformation. In a way, if you look at this system, if you see, .. if you look at this system and understand, at the moment today, we imprison our people, because of the psychological, because of the mental condition, within minutes within these systems,

man will commit no crime. We can reach not only the STM, but the conduct of the physicality .. which connects to the STM. The application and implication of the new, (:40). HEU is beyond imagination.

If you remember months or years ago, I explained that there is in the U, we have no prisons. No one misconducts, because man in the process of life, will be put into these systems, and you will see the change. There'll be no addiction, those who are addicted to cocaine, and heroine and the rest of it, within minutes of being in these systems will overcome the desire. The introduction of these systems brings a total radical change in the world of S&T.

These units are on exhibition in Linz. It's not a theory anymore. Some of these systems have already been tested and they show their effectiveness, they show their work. In a way, we change the prisons, we change sentencing people to life in boxes, to enhancing their souls and physicality, and within minutes, within days, they shall become a perfect man. These are not dreams anymore. These are the reality, systems, technologies which is available to man. It's the responsibility of the governments to promote and deliver these to the prison cells, to change and close these boxes, where we put many people for years, without knowing why and what's the reason. This brings a closure to mental institutes, where there is no need for man to be locked up, when the level of the understanding of the STP and the STM does not create the balance. (:42). This T, introduction of the new HEU and VEU systems is a major, major breakthrough in the work of the KF, and in the time to come. We introduced to you today a massive, major breakthrough, which many of you have been waiting for, and as of next year it's available to all of us.

Would you like to play the 3rd video. This video will bring a major breakthrough in everyday life of the man and opens man the shackles of the governments and situations and restrictions which have been put on man. With this new T you'll become the real man of U.

Video 3 flight system (:44).

As you have seen, this is for the first time KF releases the first spaceship flight system. These systems have only been ordered to China to be built, and the first series of this system will be seen in Linz in November, December of this year. We start accepting orders for the sale of this unit and the KF Sales has opened the channel for it. You can book to fly to Moon and Mars in 2022, in advanced booking. As usual it's contractual basis, we carry 4 passengers with these systems. As we said, we'll try 6th of June, 2022 for the first flight daily return to moon. From today we start selling tickets for space excursion beyond the atmosphere of this planet. The beauty with this system is, that another version of it will be supplied to airlines and to governments and people who can, and bring a new D of transportation. As you see it has no wheels. It can, and it flies, and it can, in a way, be tuned to travel, (:46). between the cities and towns. This system is virtually a compact new transportation system without wheels. It's for the first time man breaks away from landing, having wheels, and following billion years of work, of wheels and attachment.

The system is set to fly above your speed of light in given condition, and within the atmospheric condition. For example you can fly from Tehran to New York in less than 5 minutes. This is a physical system and it will be delivered by the KF, as of next year to any organization at 10 million Euro on the least basis, that we can control for the beginning of the time, the process of the development. The beauty of mixing this system with the VEU or HEU is that, we can process any illness beyond the boundaries of the planet earth, beyond the rules and regulations, which is put to strip man from every development and every process. We free man from the shackle of pharmaceuticals.

In a way, we foresee to produce thousands of these a year that makes and brings a new D. It's a new .. transportation industry. Most probably many of you in the next 5 years will own one of thee in front of your house. In a way, you do not need to be shackled down with the wheels on this planet. In October, November of next year the first transportation system to airlines will be distributed. As of December of next year, (:48). we'll go into the cargo delivery with the same system. In a way, we use KF Jin & Jiang for example to deliver our goods to KF in Linz in 5 to 10 minutes. The whole of the shipping industry, the whole of the marine industry will change. I warned this to the governments some years ago. Now the system is on the table.

A lot of governments need to renegotiate the borders, how they handle their citizens. How collectively we become part of one structure. In a way, these units, you can fly to moon, stay there for a few days with the KF program for less than \$250,000 or Euros. But then you learn new. You enter a new D. These systems are, and will be delivered, before end of this year, step by step into the community and world public, that you can see.

In so many ways, today you have seen evolution and revolution in transportation, which moves man to a different D, to different understanding, and allows us to become the man of U. It's the first step, it's the first understanding, in a way allows us to become perfect citizens. Understanding while we are traveling in these units from Tehran to Washington, any emotional mishandling which might happen in Tehran to you, that could lead to cancer, (:50). or another disease, or you might have picked up another condition in Washington while you are going to Beijing. And then you always live within the systems, are fed, or looked after emotionally, psychologically. You see in these systems there are no cargo, there's no place for carrying food and medicine.

You can become passengers of these systems for decades in the space and U. This is why as part of the development of this T, we always emphasize a nuclear T, if and when man understands the beauty of what he achieved in the advanced nuclear reactors, and understand how to use them, in the benefit of the travel in the space, man will become very fast, detached from many of the material state conditions. Soon a lot of things will change, governments will not become as governments, governments become as working through the work, as what we call, the U Council soul of the members.

In so many ways, rules and regulations are broke. With this T we have no borders. We do not have conditions of, no barriers of one culture or the other. We can move you to the

moon, put you through the processing of whatever condition you might have, which has no regulations and restrictions of World Health Organization, or FDA, or another condition, where they have all been setup to benefit one person, or a group, or the other. This way you benefit by it. You will be returned back, this gives you new opportunity, the new processes, (:52). the new .. transportation, and EU, which are put on the table today, will change all your lives.

We started with an EU 4 years ago, we start delivering, developing, and now you have seen the expansion of the new T, all coming through one organization. Hopefully next week, you will see one or 2 new systems, which will effect and do specifically certain jobs, what we call, for example for the vision, for the growth of the brain, if it is damaged. These systems can be deployed very rapidly, the first 48 units of the what we call, Vision and emotion EU will be delivered to AZ in next 6 - 8 weeks. This will bring breakthrough, this allows us to work in the bringing the change .. that no man can go hungry. We can position these across anywhere. You have a disaster, .. earthquake, flood, many people will suffer with hunger, .. diseases, .. with homelessness. You can place one of these and expand it, and allow it to change.

You can join to become the first passengers of this flight system, by just going on the KF (website) and making a first booking. We welcome you, because with that process, allows the international organizations to understand the change of game. The change has come.

We do not need to have the mass production factories, as we've seen, to produce all the climate change, it's over, (:54). it's done with. The climate change that we at this moment in time, suffer with, is over. The new science & T, the new achievements in understanding the process of the creation, has brought us to a new D, to new arena, to a new understanding of the process of life.

In so many ways, today's teaching has started. And today's teaching has finished. We finished with the past, we have finished with what we did to our planet, to what we did, and damage we did to ourselves. We have seen a new flight system, .. transportation system, .. a new way that man breaks through the shackle of this planet. The T in these systems is so advanced, but as usual with the KF, so simple. The simplicity of it, is understanding the process of creation, the advancement of it, is changing the mindset of the man, with the new ways, of the way the U works.

As I said, we have gifted you with the knowledge, as you have been gifted with Mitra. In the coming time, you will understand the purpose, and the process of the interaction and the completion of the cycle. There are more and more T, which will be released this way, that the man is not aware of. The new flight EU, is not just to take you, onboard you are fed, onboard you are processed, onboard (:56). becoming a man of U, become part of understanding the process of creation, while traveling the depth of U. We have made it simple, .. easy, and in coming time you will see these systems right across, most probably before January in Linz ... in different versions and combination of it, the cargo system,

the new delivery structure, which is one of the biggest polluters of this planet. The shipping liners will become a thing of the past.

How fast our governments will transfer the T into the understanding and development is a new breakthrough. Many of you by the end of next year, will see Moon and Mars by walking on it. Because the T and knowledge has been delivered, and is in the process of what we call, "completion of the manufacturing." You can land on the moon for a day, and tell your children and grandchildren, that I have been to the moon. You don't need to be trained. You can travel the depth of the U. You can travel beyond the solar system, and come back the same day, and days. The knowledge, the delivery of the T is rapid. .. we made sure, when we deliver the T , we deliver the comprehensive change for all the governments. For this T with the simplicity to the knowledge of the P1 T, now we force creation of one nation, one planet, whatever. In a way, because, (:58). now with this T because you can land, you can takeoff as easy as you do on Moon, in New York, in Sahara, or in Tehran.

We played with the governments, we tried to bring them to understand the new change. In so many ways, if you understand it, the game is over. Checkmate - for those who tried to rule the man. Checkmate - for those who tried to influence their school of thoughts on the others. With this new T every man is free. You have not only the freedom of the planet, but you have the freedom of the U. Mankind can travel the depth of the U, in a manageable, in a small unit enough, that does not need to involve massive constructions.

The race for the governments from now on, is how to deliver this T in a fast, effective way to all their citizens. KF in the next few weeks will show these in Linz, we'll show them to fly, we'll show them to transmute and transport, we'll show the man with cancer to walk in and walk out without, we'll show the people with mental diseases, which have been kept in mental institutes and prisons to walk in with handcuffs, and walk out free. This is the beginning of a change, and we have set out to bring that change through knowledge and T, and development and delivery of the knowledge, which has been unknown to man, through the understanding of the process of the interaction of the fields of the U. (1:00).

Become the passengers of the U, and learn how to become correct. Become passengers of what we call, the EU, that enhances the soul, and the STP of the man.

I think today is the day for many of you to remember. If you will remember some 2 years ago when we showed the first EU in Linz, a lot of people could not imagine the depth that these systems will bring, and the changes it will bring. Today now you see the first flight system. We made it easy, .. accessible, .. manageable, that can be applied, and can be implied by all nations and all its citizens. In so many ways, gradually we have changed, we took man .. from the shackles of wheels. What kept man attached to this planet, you see a change, you see a platform where the universal man, a new house for man. In so many ways, a new D for mankind. Walk into these units, you will never suffer from hunger. Walk to these units, you will never suffer from illnesses, which the man has suffered so much. in past centuries and thousands of years. You don't damage your

climate, .. change and burn and create more what we call, "leftovers" to bring what we call, the climate change. Many of you and many of your children's life as of today will change, because you gradually start using and understanding the process of the development of this T.

We used to have what we called, (1:02). "Blueprint Day," and to teach. This time is to teach the governments. The governments they need to go through that process of Blueprint Day. They have to reorganize themselves. We'll see by the showing of the first flights, governments realize, that the time of becoming separated is finished, becoming a unified government, unified, collecting, helping and developing new T for all the man, now has become a reality. We welcome you to the true, what we call, Universal Community space travel. Let's see how mankind will respond. How you as a humanity will take the challenge of the development of the T, into the hands of yourselves, through your souls, and through understanding of the new .. space T.

Many of you in a couple years time will laugh, when you see the car with the wheel outside. Many of you will laugh, when you spend 18 hours to go from Beijing to New York, or to Washington, when you do it in a few minutes. Where new rules and regulations needs to come into operation. In that process, you'll find out mankind as citizens of this planet, have more say in running of their affairs, as collectively, as what we call, KF KS you will effect the condition and the position and the way the knowledge will force the governments to a new D and new work.

In so many ways, we welcome you, (1:04). to a new era of space and what we call, EU. I hope many of you will enjoy this trip. You can testing it, and you can become passengers of it, and at the same time, the owners of the spaceships that you can bring man beyond the limitations and borders of the governments. These systems are undetectable to any radar systems of today. No government, no organization has the T to detect, to control, and have a say in how the citizens of this planet will run their affairs.

In so many ways of doing it, we can open a nest of these systems on Moon and create a condition that anything, any condition you have can be met on Moon, where there is no governmental organization to force medicine or whatever, that the pharmaceuticals impose upon us. This is the key to the freedom of the man in space, but let's see how mankind will use this, and how mankind will bring the change to himself. I leave the what I call, the demonstration of the units, and I leave for you to imagine what changes this will bring to you in the next few years. It's the first time the man is free from shackles of what he made himself to be prisoner of this planet.

Thank you very much .. show the videos (1:06).

R: .. this is amazing, beautiful machine, it's the most beautiful concept I have ever seen ..

K- This is not a concept, these are the systems are ordered and getting manufactured in China at this moment, the material and everything else for it has been ordered and is going through the process of production. We have already prepaid for these systems.

R: It's truly a beautiful moment. Congratulations.

K- All 3 of them and next week you'll have a new system. The beauty of it is, instead of developing new systems or new structures for the speeding up of the spreading of the T,

we use the present existing T, which allows us rapidly to deploy. You will understand more and more of these. Go ahead ..

3 Videos shown again .. VEU HEU Flight system .. (1:08). (1:10). (1:12).

K- Now we can see what are the next possibilities for all of us. This is not a dream, this is the reality of what is coming, what will be. Many of you can walk into these systems as they'll be demonstrated in Linz in the coming weeks and months.

Any questions

QUESTIONS:

Q: .. I hear big companies including Tesla and they are building "Med-Beds" en masse, was Keshe given a contract?

K- How many of these are reality and truth?

R: You've mentioned before these aren't med-beds ..

K- Med-beds do not exist, they came out of a space TV program. These are EU. These are not medical systems. (1:14). It's a big difference. You need medical treatments when you get sick, with the new T you never get sick to need such a terminology. This is the beauty of the new knowledge.

R: I think the med-beds came from the military as well. It's part of to rejuvenate them out in the battle field.

K- Yeah, it came through a lot of Sci-fi movies. .. changing. Now these are the systems, which are owned and operated, and will be owned and operated by the KF. As you've seen the flight system structure of it, given to .. airlines will be on the leasing basis.

We are not selling the T or systems to. They are leased to, and at a price, which if you look at it, 4 seats on a jet-liner at the moment is at around about 25 - 30 million dollars. Ten million leasing for such a program that we can literally fly point to point, and ?? take as many people as they like, will make it much more profitable for the airlines to ?? opt out of jet engines, landing by changing engines, and everything else. In a bigger picture of transportation and transmutation, this will bring a lot of news and ?? innovations for authorities, in how, and who, and way we can travel. The position with these is not a hovering system, it's a flight system. How do we change rules and regulations in the cities, who can carry them? (1:16). How do we bring new regulations of the international transportation? You can carry, in a way, if we can increase the size and D of the system, and then you can carry huge number of passengers. What we saw like Airbus 380 are useless way of traveling.

You bring in hundreds of people from different parts of One Nation into one point, putting them in, and then flying them to another point, and then spreading them out again. With this new T you takeoff from your home and you land where you want to be. Very much door to door delivery of ?? beings. These airport passengers, carrying, bringing everybody to one point is over. These are the changes, which we brought to ourselves in

the past few decades, and we've ?? got to change with everything else. When you want to go to another city, you don't drive all in one place, and then all the cars go together. You go from A to B, you decide. This is the beauty of this new T, you don't need to fuel, .. burn the fuel, a lot of mindsets will change with this.

A lot of things. Biden said, there is a need, looking for new T. I think this T will change even, the political and even diplomatic part of the whole process. We tried to negotiate with "5 plus 1", we tried to influence the Iranian side to take up the new T in negotiations with "5 plus 1". The KF as One Nation, one organization has taken that step. Now this T is available both to Iranians and Americans. Both to the Chinese and the Russians. (1:18).

How would our governments respond to this in coming weeks and months. When the first systems will fly, they have no borders, they have no control, there is no customs, there is no one who can control who goes to Moon and Mars and back. You don't let me have an open heart surgery without interference, and the doctors with all the regulations, I go to Moon, it will be done in 5 minutes, in 1 hour, and I come back. There are no governments on the Moon. Change is amazing what is to come.

As I said, when we throw the punch of knowledge, the whole of humanity will be "punch drunk" with T. How long will it take to gather, what can be done, is beyond imagination. There won't be any illnesses to cure, as the body will not be allowed to go through that process to become ill. What's the functionality of man to live for thousands of years across the span of this planet and beyond. This system opens a new D.

Amazing, small and Vertical, and what we call versatile, that it can be applied by everyone. You don't need a pilot, .. pilot anything. In a set process, we already have shown in the experiments, the people who sit in the car decide where they are going to go to. Their emotion, their school of thoughts will control the system. It will not allow man to do a crime. You will not be able to carry cocaine, (1:20). and heroine to effect the others with this system. You'll understand the mindset, .. the changes which will come with this T. When we showed, if you remember, the EU as video, some 3 years ago, many KS were surprised by it. Now it's .. the completion of the totality of the T in ?? We have at the moment, disasters in the north of China, we have disaster in Caribbean, we have disasters in America with the earthquakes and the rest. You just land these systems, you allow people to bring them to safety within minutes. Broken bones can be healed within few minutes. You can strengthen the man away from diseases. In the next couple weeks you'll see new T, which will bring this into ?? (audio breaking) .. operation. We have to be able to give the governments ?? this is not just a flying system, this is a change for humanity, away from bombs and guns, away from domination by destruction.

Any other question (1:22).

Q: .. What kind of training will be required for pilot, or would there even be a pilot, or would it be all automated ?

K- These are all .. You don't need a pilot. These systems do not carry pilots. Do you need a pilot when you drive your car? It will be controlled through the emotion and understanding, and the need of, "to be." Most probably most governments would like to GPS it, and they can control it, but more or less it is impossibilities, if you know how to handle the system, and how to run it.

Q: Guatua ... this is amazing T. There has been a lot of unbelieving promises. I think this completely brings an end to those who had any doubts, (1:24). about this new T, ... a new living free of any kind of exploitation by man to another man. or human to human. .. I very much welcome ..

K- .. we always said the breakthrough and acceptance of the T, will come with the space development, has no borders and no governments and no control. Once we deliver the space T, everything else becomes part of it. We were waiting for the time, when it's the right time to deliver the space T to bring the change. We see world peace, we see the end of wars. We see governments looking for new ways to create new scientific what we call, "busy-ness" to keep the people busy and the structures moving. And it is the right time .. the process of the space development is important for all of us, that with it, we create no doubts, with it we enforce new laws of correct and just, with it we bring condition of the STM to run humanity, not the gun policies we've seen.

As you have seen in the past in the past few weeks, the whole structure of the war, and war mongering is falling apart. It's not, (1:26). coincidental and accidental, the wishes of the U Council and the KF KS worldwide has brought that condition. Humanity has tried for centuries and decades to create conditions of conditions of isolated peace and tranquility. Now the KS, the wishes of the UC has brought that. In a way, this is our gift to UC. You wished it, we keep, we accommodated. Now we give the tools to push with the governments for world peace, for One Nation, through what I call, the STM. No languages, no barriers, no borders.

The impact of this T, .. this unit in front of you, will be felt in 2 to 5 years. When people will travel across the borders, governments have no control, but to work together to bring correct and just development. The application of this is huge. Once we airborne these within the city, within the environment, for example of a hurricane, we can control the boundaries. We can stop damage, limitation. We can create condition of the rain, where there is a drain and drought, shortage of rain and droughts. You have to understand the next step. These are very much like the satellites, but controlled through the plasmatic fields, which they interact with the environment.

The implication of these is huge. If you have a meteorite heading towards of earth, a combination of these by creating a condition of the plasmatic fields, can divert the meteorite, (1:28). because it is all interaction of the fields. The governments will find a new ways. The humanity will find a new application for this. As we go further and further, it allows man to create conditions to be able to live in the deepest part the oceans. Because you create a shield, you create a field barrier outside, you can live, you become like a submarine. You don't need to come up, you can stay under the water for centuries,

because the system produces everything you need, and takes from you what you don't need.

Mankind has entered a new cycle with this T, with this machine, and the impact of it will be felt in the coming weeks and months. When you will see world leaders of today will travel from Beijing to Tehran within seconds, within minutes. When you'll see the delivery of the goods, if you are still in D of physicality, from the factories in Los Angeles to West Africa within minutes. It will change a lot of things for us. With this T the ?? trade war is over, these systems will go into what we call, continental to continental transportation. Delivery of services through the same. Creation of the fields to feed the nation when there is a hunger, when there is a what we call, calamity, could be a virus, energy pack. You put a number of these as satellites, position, change the fields, drain, you had a problem, (now) you don't have a problem. It's for the man's scientists to develop this T. (1:30). We set the basic rules, we develop the basic knowledge and T of it, and the rest is for the humanity to develop. You can travel with this, tomorrow on Moon within minutes and seconds, depends what fields you create inside it. Depends what capability you give it.

If you look at it, it has very much the shape of a light, a ray. It's been designed this way. It arrives in the matter state, it arrives in the plasma state, and in the transition, both ends, it travels in the shape of the light, as a ray, with its own shielding, with its own transportation & transmutation. The game changer, this system will change everything man has known in every D, which he ever did. The EU was an entrapment for changing, what the man was entrapped in physicality. This system frees the man from the shackles of the earth, and from the shackles of the 4 wheels as we always call them.

Come to Linz and see these systems, they are not theories, they are realities, which now will come into fruition. Systems have been ordered, you can buy them, you can own them, you can be part of it, and you can become part of the new generation of the change. Register yourself to be the first passengers to travel to Moon and Mars. We have .. they charge you \$250 (,000) for a few seconds, (1:32). weight-free. You travel to the Moon, spend the day, with the full weighted-ness, with full operation as you are on earth. This brings a new D. Go to Mars, be the first generation that will bring that change. Be those who with doing it, force the governments to look at new D.

With flying 2 or 3 of these we can paralyze the whole of an air force, it doesn't matter how many Migs, Phantoms, or F-18s you have on the runway. As I said, I will make ?? metal bird, and now this is the system. The field interaction between 2 or 3 of these on the South China Sea paralyzes the whole of Chinese, what we call military bases. The game has changed. The governments need to talk peace, come and meet and find a solution to become one. The color of the skin, the race of the man, should make only one man. This is the man, who becomes mankind in the depth of the U. This is the purpose of the delivery of this T today.

You can walk into Linz in next few weeks, and literally walk into one of these systems and bring a new change, and bring the change to the governments. We tried to talk to

governments, now governments have no choice, but to talk to us, (1:34). in how they plan the structure of the governments internationally. .. superiority of the knowledge has to be ?? .. for the benefit of the whole of mankind.

I warned you were going to get hit by something big. This is the tool of peace in the peace negotiations in Vienna. All nations .. ?? from nuclear T. We can literally bring all the nuclear reactors around the world to a halt. I know how to do it. I know how to transfer the energies of the nuclear reactors ?? to space ?? where not a single reactor will run out of control. We know how to transfer the fields of the energy of the radioactive materials, making nuclear warheads obsolete, literally empty, just piece of matters, that have no interaction.

The implication of this system and combination of the use of it, in interaction with each other, is beyond understanding of the man's totality. It's amazing how our KS will take the next. Those who have taken the step with us with the EU, will be the first who will benefit by these systems. (1:36). We'll explain more and more about this, how it will be implemented and how we'll apply it.

The beauty of it is, that we share the knowledge at the same time with all the nations and all the governments, so none has the superiority to overcome, be better, or do something different. This pushes mankind to the next level of understanding, .. of in totality understanding what is to come, what is for us, what is the humanity, is about to get hit by T. This is the beauty of it.

This is what we see, this is what is needed to bring that change, to bring that understanding, .. the totality of the knowledge for our leaders to understand the change, to understand what is to come, to understand what is the next step in space development. This is important to all of us to be able to deliver (1:38). T, which are part of the work of the KF. What are we there to do, when we have such a beautiful T, and we do not use it for the benefit of mankind. For all of us to take the next step to be able to understand what we have and what we can bring.
Any other question

Q: Dean ... so the transportation unit I just bought, I can take the wheels off and take the engine out. Thank you very much.

K- But you can't park it in that unit. ?? put it in a museum.

Q: The 4 souls that become present within the unit, how will they experience it ?

K- We'll ask them when they use it. (1:40). You have to ask them, and let them see what is to come, what has come, and what is about to hit them. How they feel when they come out, what change of a man they become.

Q: ... about certain conditions, where people would not walk into the unit if they have an incorrect position, is that still the same?

K- That is still the same. These systems are set for a specific application and job. This will not change. We are set to bring peace. We are set to change what we call governing, and a lot of governments would not like to see such a position. But on the other hand,

governments cannot govern anymore. Because the situation and the conditions has become unbearable. We don't need to inject man, or control man, or imprison man anymore. With this T we free the man, and that he has to taste it, .. understand it, go through the process of maturity.

Q: .. So the souls that are going through certain conditions on this planet, you've spoke about if there is a hurricane or natural disaster, (1:42). how would these transportation systems help individuals support within this condition?

K- That's the job of the humanity, how we bring them to be accessible with this. The accessibility of it, has to be done by those who have access to the T. We want to deliver.

In the coming time, when mankind develops a further understanding of what we released today, it will bring a condition. For example in the depth of the space where you can position a number of these systems, that in that position, you create very much like a cubical, where you create a condition, that in this environment, so many people can exist. By placing a number of these you can create a condition and environment for existence . Many .. passengers of the U do this. Many of you, you see, like what you call, stars in the sky, and you think they are stars. but they are actually combination of the spaceships, where they have created a condition for citizens to live within the environment of the U.

The problem with the present knowledge of what man has, what he observes, is that you think every light in the sky is a planet or a star. But in fact they are SS, (1:44). positioned to create condition of life within them, and the atmosphere of the others, to be able to survive. It's an open fish tank for those who are for example, travelers of the Unicose, or for those who lost their .. place of life, to accidental conditions. When I look into the depth of the skies, more or less I can tell you which one is a planetary system, which one is a star, .. a UFO, as you call it. This is the problem with man's lack of knowledge is that, like I say, "everyone who has got a mustache is not your uncle." Every shining light in the sky is not a star. Man doesn't have a knowledge so he accepts it. Now with these T we release, especially these new versatile small EU, man will get to know more, what is real, what is not, what is there as part of U Community to interact.

If you noticed, these systems we released today have no defense T. In a way, there is no way you can abuse it, to create a condition of false alert. It's a peaceful system. It's a system where, it brings man to U Community as a peaceful being. There is no weapon T. When I designed the original EU, where you've seen in past couple of years, (1:46). was to bring this into operation when the time is right. And the time is right. We'll have the birth of Mitra with us as a soul of the U, and with it has to come the gift of peace for U. With it has to come the understanding of the change for humanity. These units the EU which is now shown today as a flight system, is not just a flight system, it's the freedom of man from the shackles of his soul, shackles of his physicality, and the shackles of the STP which has entangled itself with it, and brought so much crisis for itself. It's a detachment from every condition, but you'll be attached to enjoy the condition. We don't make you without home on the streets in the space. You still enjoy the presence of your child, .. of the physical food if you want, but you know you don't have that condition of pain, that "what happens next."

The EC like in AZ and other places, will be the first centers which will receive these flight systems. KF points of references where we have established, become the points where the first peace movements will come. The first systems will be flown in and out of. We are there to bring the change, but as a race, not as a nation.

I know the release of this new unit today, will bring shock to many of you, as you start understanding what it is going to do with you and your , (1:48). loved ones, and your way of living. Do I need to go to work 9 to 5, or today I go to Mars, they say they have found something new. I'll go to another galaxy. If you understood the shape and the operation of this system, it gives you a totally new horizon, in the way the mankind will live. You don't need the roads, you don't need the shackles of the fuel, you don't need the shackles of what's going to happen when I arrive there, would I have a food to eat.

The change with this new system we brought today is fundamental. It's absolutely fundamental and it's not going to be in a few more months, or a few years, or whatever. The units have been ordered and you will see them. As we said, by June of next year you'll fly them.

Q: .. So once man actually takes a position within these units and frees himself from the shackles of this planet, will there be interactions with the U Community in any ... ?

K- It depends how true are you to yourself. It depends how true you are to yourself.

Q: Do you want to explain a little bit more about that?

K- You'll understand, mankind will understand soon. (1:50). It's how true are you to what you wish, and what you actually want. It's not all hunky dory (without care), man has to work from now on, to achieve, to reach his soul desire.

Q: So thinking good, speaking good, and acting good, is very ?? foremost in mankind's abilities, if they wish to interact and travel in the Unicose.

K- We shall see. We shall see how man responds to what is about to come.

Q: I am ?? Mankind is ready. I am sure they are, I am sure all beings and souls are ?? ready to experience incredible things It's most wonderful journey to know mankind will reach the position where he attains ?? once more the position that we have always known, ?? mankind's position as part of UC .. wonderful moment ..

Any other question

K- Go for a break .. (1:52).

>> BREAK >>> 402 KSW October 14, 2021 (2:00).

K- ... There will be more T coming up in the next few weeks and months, which will be revolutionary, but it will create a condition of what we call, One Nation government, where KF will enforce our way of peace, and what we call T as One Nation and one organization. It's very interesting one article published about the Linz exhibition, in the publication the journalist says, that the KF is bringing in T in exchange for peace. That people are becoming aware, that we are an organization not just for T, but we have a purpose in sharing our T in creating peace. Which I thought is very interesting when an article appears, and they say, the aim of the work of the KF.
What the next question.

Q: .. he has a concern about how you are going to handle for example, the criminal organizations, (2:02). that might be preventing the unveiling of this T, or preventing the progress of this T to be presented. Or other 3 letter organizations that we know of, that might not wish this to happen. How is that you survived the last 10 years giving out all your secrets, and how is that you have this fearlessness, that you can present this without agitating all these organizations, that want to keep the status quo?

K- We have agitated all of them, without a fail. There is a very interesting thing that came up by Jalal. Amazingly, going through one of the teachings, he says, can you listen to this message. This is part of a teaching done in 2018. When you listen to it, people close to us, they tell us, they know they are going to damage us. They tell us, that they are part of that process of damaging us, themselves. These are the closest people to the KF. This is a recording, it is actually recorded, voice recording of the person confirming, they know they are going to damage us, and how she has done wrong, trying to do wrongs, to be shown. That is part of the whole structure. We haven't stopped. The people who we kicked out of the KF in past 12 months have delivered 2 TB of information to Iranian national security to stop the KF to go to Iran. (2:04). 2 TB of everything they could have collected over the last .. Iranian national security has put it on the table. "Mr. Keshe the closest people around you are betraying you."

But have they stopped us? Has it stopped the collaboration of the KS. We don't look at the governments, we look at how you as KS are working together. How closely each one of you is developing part of it. Teaching part of it. We are a government, we are a structure. Now the governments will follow the structure. It's not chasing them to accept us. Now it is for them, "we want to be part of it." We've seen this with the Chinese government in the past 2 weeks. we've seen this with the American administration in the background. We see the same thing with Iran, .. with Russia and Japan.

Because we carry on, we don't stop, we don't choose, we don't attack a government, we teach KS in Hawaii as we teach the KS in Canada, as we do in China, as we do in Iran. We've become a new structure. The fear of governments is not a hidden structure underground. It's a very open structure, which is helping the people, the agriculture, the humanity and the rest of it. Yesterday the Iran KF has signed one of the most important agriculture contracts with, for collaboration with one of the major agriculture universities in Iran. (2:06). They wanted to sign it, they wanted to be, it will be announced by the KF Iran. It's the same with China, it's the same with governments. We are not underground

attacking people. We teaching so openly, that the governments have to bring the change. It's there. We have become an influential nation as one nation without borders.

We are a scientific organization with evaluation and respect for the STM through T. That's where we have reached you. They can come as much as they come together. Have they stopped us to appear. Everything we've seen, attacking individual KS, attacking the T, banning us from all the television radio and stations, everything else you can imagine. Can you imagine 2 TB of information, which has been gathered over 20 to 30 years and been given to, and falsified, to a government, to stop the government from receiving a new T. What do the national securities do, they just put it on the table, "Mr. Keshe, this is what the closest people, ever you have thought, have brought here to stop you. You do not know how much damage is getting done in the background. But has it stopped us? We attacked only the spread of knowledge, we attacked front line to spread knowledge, for everyone to have access to it, the man in Amazon, the professor in Chinese university, space man in NASA and god knows what. (2:08).

This is what is bothering the governments, openness to share knowledge and T. Everything has been tried. Everything ever, any organization, any scientist, been, and could be done to, they have done. Have they stopped you growing your fruits in the garden. How many of you have been effected by Corona and you have found a solution through with the Gans's? How many of changed conditions around you with different applications of it. What we show on the screen, the technologies, is a very advanced understanding of interaction of the fields. In 10 years time it will be as common as you change your, most probably pots and pans. But this is a process, this is where we set out, we never think of our enemies, because they are there to serve us. It was amazing to listen to what Jalal brought to our attention. In 2018, they knew they were part of it, and it's a pleasure to listen to it, that how we still supported them, how we still stood there to be. One day their soul will elevate to understand what they have done. When I look at the top groups of the KF several hundred people, who work in different ways. Have any of us have stopped serving, sharing. Have any of us got anything for it, (2:10). but the pleasure of knowing we can change somebody's life in the coming time.

This unit we released today, you'll understand how you have been with one of the biggest hurricanes in the world of science & T, in the next few months. When people abandon cars on the street, they don't need. You were looking for hovering car, you were looking for flying cars with wheels on it, this is a different kettle of fish. This is different understanding. Thanks god I was stopped to show the flying car in Einhooven in 2011. Now they can't stop this. This is in the hands of manufacturing in China. It will be developed completely further, completion further in Austria, and secondly manufactured in Iran. Iran factory has gone into operation .. they are already in it. You think I need permission from the Iranian government, or I need permission from American or Austrian government, or any government to fly this system. I land you will see. I fly you will feel. We brought the change. Now it's time for them to understand what change is going to do with them.

How many of you are going to be the first passengers in these machines? How many of you are prepared to go to Moon? (2:12). .. Mars, .. to go beyond the boundary of this solar system for the first time, within minutes and days. We flew a satellite how many years ago? And we hope it has reached the boundary of the solar system and has gone through it. Where is the nearest star to us? It will be landing there or one of its planets, in matter of hours and minutes if you know how to run this machine.

But you have to make sure you don't interact, that you bring the interaction of the soul and STP with the system. You still keeping intact. This is a fish tank, which you have been looking for, and the fish inside is the man and his soul. How many of you millionaires, and billionaires around the KF will buy these and just put them in the cities for people just to walk in, to overcome their hunger. How many of you will give a gift to prisoners, with the VEU and HEU to change the man. We don't need Cassius Clay to become Mohammad Ali by change of belief in God and different name. Both believing in the same Creator, and the creator of the same system in front of you. Man will mature very fast. (2:14). We gave every opportunity to governments to follow. With the wish and the soul of the U Council we'll achieve world peace. Now with this system we'll enforce permanent peace, unconditional permanent peace.

Q: In enhancing the soul of the individuals within these units, is there also a collective enhancement of the human soul of the people present on earth and in the U?

K- In a way, we connect to, yes. We become part of a totality. Earth has been a rocking ship, and now with the introduction of these new T, we bring it to its balance, to become part of the stable part of the U Community. When the first .. start flying and delivering around the globe in the next few weeks and months, governments will change, they have no choice.

This is part of the delivery of the systems and "5 plus 1." In the way of, 5plus1 plus Iran is a new structure for world peace. Outside the framework of what you call ?? of United Nations, (2:16). it ?? hasn't represented, why we work and push with the universal, what do you call, 5plus1, is because we have the Chinese, Russians, the remnants of what we call the Catholics, you have the Americans which sits in different ones, and representative of Iran as Islamic nation, and with it we can bring a good balance. Where America represents in the background, the structure of the state of Israel, or what we call Judaism, or the belief of the path of Moses. In a way, it's Buddhists, the Christians, Jews, Moslems are all around 5plus1, and we can achieve peace through it, not just peace for Iran, but peace internationally for all the nations. There has never been such a collective, what I call, unisons, bunch of religions, sitting around in the name of the politic, and we are all in it.

You have Germany, which represents Rothschild's, who has been one of the biggest betrayal of the whole system. Germany is there for us to bring Rothschild's under leash, and we will do so. We will return the wealth of Rothschild's back to humanity, what they stole. And with it, through the other channels, we bring representation of the humanity. The Buddhists, America representing the Jewish state, the French and the Italians representing the state of Catholicism and Catholic religion. Iran representing the Islamic

world. It's a best pot, that we could bring peace to all nations, (2:18). and nobody has seen it, and this is why we work with it. It will become position that, all nations will accept, peace not just through T, but through equality of all of them together. We know what we have done, and we know how it will change it. You look at 5plus1 as a political position. We look at 5plus1 as unification of whole religions and paths of beliefs, and with it, with are the politicians which are involved in it.

Carry on.

Q; Ed, .. the pricing of these units, I know they are quite fair compared with medical devices, I mean the T is just out of sight. But you refer to many of us being able to take advantage of it, who will be the first ones you talk about. For many us of to pay for a trip on one of these as advertised in the store, is still quite high. How do you see us being able to participate?

K- These are set for very much, what we call "KS who can go and break the barrier." There is a reason for it, .. we put this kind of figures. There will be, a bunch of KS will be given what I call, (2:20). "different valuation for it." It's not the price, it's just showing the man can go, with what value can go. And then opening of the space T the way we want it.

Whenever man has been given free, he abused it. We gave you the MaGrav system free knowledge, and you and people around it used it to ridicule the KF. But if you look at the HEU, just have a look at the HEU, it has the most complicated, sophisticated in that ad, of the MaGrav unit. You don't know how to use it, we know. This is what the nature of the man is, has no value when he doesn't pay for it> As I always said, in a serious, but in a joking way, why man have no value for their wives, but they have a lot of respect for their mistress. Why if it is the right of way, mistress you spend money on, you have respect for the money you spent. This is what it is, when we gave you the technologies free in blueprint, everything, and everything came with it, now you pay for it, you respect it, you apply it, and you employ it.

Thank you

Q: Jalal, give me 2 minutes.. (2:22).

Any other question

K- This machine on the screen has changed, and will change the destiny of man.

Q: .. congratulations in delivering a paradigm shift to humanity .. Will you and the KS teach a program to help the KS attain this direct connection with the soul. I understand all your teachings give the hints and insights for us to make that connection. But will there be a specific training to advance that ?

K- Through use of the T many KS will find the path, the connection between the soul and the STP, and that will become a path of knowledge. That knowledge will be gained once by the KS, then they will teach it through the soul, not through the word. This is the way we do.

R: In may ways, that is being now through various workshops public and private. The topics can be different, but the underlying theme now is about the connection with the soul, or feeling the fields, and this kind of thing. (2:24).

K- Yes, it will come, and the process of the understanding it will come. When you look at this unit, if you look at it, if I can draw it. This is a ray of light and it will travel with the speed and D of the light. In that speed of light, spectrum, sits the spectrum, the STM fields too. This will not transmute the physicality of the man, but will transmute the STM and the elevation of the STM in the process of the transportation. Then you have, as you enter into the D of the STP, you have your STP to it, too. Then you understand how the 2 become 1.

In the past few month's teaching, I kept on referring to Book 1, 2, 3, And now you understand the Book 1 is where you started from, where in the D of the PI or the soul, Book 1 is where you land in the D of matter state, if you decide. The same way is, you can go the reverse. But now you have a tool, where the STP and STM in both D are protected, are part of, are within the structure. That was the dream of every prophet. (2:26). To bring the STM and the STP to understand the ?? of position, and become one. And they always taught the teaching of the soul, they tried to bring that D, but they taught the punishment with the D of the soul. It's the first time we share the knowledge as a gift, and that gift allows the two to become one. There is no punishment, elevation of the soul is the only option, Both in the D of physicality and the STM, the STP of it. As I said before, when the Creator works, He works to perfection, with no failures and no pitfalls. Any other question.

Q: Jalal, there is a group that sets themselves to serve. We were wondering how to apply by materials and in 1 day materials supplied to us as a gift outside this group, one who has been touched by your knowledge and he showed his appreciation to your knowledge and to your gift, and he supplied us about 3000 meters of material. It was beautiful, this is what when you say, when you give you shall receive. So this is a confirmation of this. (2:28). Congratulations to Mr. Keshe for all this advancement and knowledge. Thank you

K- I think you .. you will see the benefit of this T, where KF cannot be kept away by news. There are many of those who are followers of the KF, but they kept quiet because of the negative information's, which put in. But in the background they are there to serve humanity. What will be interesting is, when the KF will put one of these systems soon, in the landing, space center in Linz, and for the world to see. The reality is we have touched the STM, it's just the STP of the man, which ha chosen to go the wrong way. This EU, this flight system is, a lot of KS should have seen it coming. It's about to come, but now, we, even within the KS, people who work around, close to us. I kept this away as a secret, that when we are told to be ready for it to go. When we are there, when mankind switches to understanding of the next process. Now we are ready. Mankind is ready to move. It becomes part of that light, .. that ray, and many, many people will turn to be that way. This is part of what we call, "the peace process between the STM and the STP of the man." (2:30). Where mankind will find peace and then we'll start all going in the same direction. Thank you very much for your hard work Jalal, in the background. I thank you for the information you brought us.

Q: Stephanie, .. did I raise my hand to talk ..

K- Yes we can hear you as usual, you can't hear us as usual.

Q: I didn't raise my hands.. Rick want me to talk

K- Yes, you are here, you had better talk. (2:32).

Q: ... this is fantastic ... I am so happy. I couldn't wait for this any longer. yes, I agree it is a perfect timing. .. This change, it will happen like a quantum jump, like it will happen all together? The moment one elevates, we all going to elevate together as one?

K- It depends, if you are ready to. We all have different strength, and we all operate in different strength and understanding. If you have reached that point of understanding, and strength of emotion of the soul, yes, we can. It can be done.

R: Are there a minimum number of beings, that we would have to elevate themselves in order for this, sort of a ,more of a quantum jump like Stephanie mentions, a defined change happens at a certain point, or is it more gradual, happen over time.

K- It will be gradual, all man will not be elevated at the same time. They ?? do take according to understanding and the strength of the work. (2:34).

Q: .. you know Mr. Keshe, the first day I met you .. I didn't know nothing about all this, nothing. But first time I met you, something in my head said, you will be the one who will bring the change ... even now, I don't know nothing, but it's just like .. I am so grateful you are here with us sharing your knowledge and I am super happy I met you in my path ... I always trusted you from the first second. It's not something you could buy or whatever. ... thank you

Any other question

Q: But the 3rd of October was my birthday, thank you for the ??

K- Happy birthday. (2:36)

Shall we call it a day. I think we had a good representation of what the T is, delivering it, to be delivered.

R

K- I think we brought a massive change and understanding, and a change in humanity, in how it can be. One of our targets in the KF is, as soon as we start sharing the EU amongst the KS, we would like to do the same with the enhancement transportation flight system, for the KS to stay in control, and become part of the structure of this system. Where we dictate the, everything else which comes as part of this T, to bring the change. I am sure many governments will start changing their position and understanding, once these system are literally demonstrated in open, and soon we'll bring the change. This will be a massive step change, for many governments to accept the new knowledge and the new T. Thank you very much. ..

I am sure next week we'll see another EU from the KF, which is life changing for many of us, and will bring a lot of change in the D. As I said it's not just bringing the Pain Pen and P Pad, (2:38). but bringing the edge of S&T in knowledge, that it brings that change, which we are pushing for.

Q: It is a earthquake in order of magnitude 20 shaking them ..

K- I think we need 21 I think the governments have just start realizing how things have changed. ..

I don't think there has been more fundamental change teaching, than today, if people understand the implications and applications of it.

R: It's interesting we had William Shattner, otherwise known as Captain Kirk, become the oldest astronaut in the world. He went up on an Origin spacecraft went into at least the blackness of space, and his comments were quite incredible, completely shook him and changed him. He was actually, had tears trying to express himself for the experience he had, and that's on top of the fire breathing rockets. So if we can make that experience more gentle for souls like that, he is now 90 years old. Strange coincidence, (2:40). that this T is being revealed now with this, we see now clear how the future will unfold.

K- I hope we see many of these in the next 12 months, landing on the moon together, and bringing a lot of changes, where governments realize there is no, they cannot govern above 1 - 2 meters above the space of this planet. Or we'll see the new changes where people have the freedom to decide.

This is what I said, there will be no leadership, kingship, because now we are free, as man with soul and physicality. It will be very interesting the changes which will come. The faster we push these units through. The first 100 units have already been ordered to Chinese manufacturing, part of it will go for the EU, and part of it will go for the flight system. But the combination of the 2 will force governments to a new D and new approach. Where we can fly from Jin and Jinag with goods and materials and land in Linz in less than few minutes. Then the governments understand, we use the KF properties for our purpose. We don't need their landing rights. We use Mexico as a place to land, we use AZ as a place to land. We use our rights and with it we'll bring the change.
.. I hope next week we'll give you a bigger surprise ..
