ENGLISH TRANSCRIPTION

(:06). Today's teaching is mainly based on follow-up of the last week, if in part of the teaching we understood, or come to comprehend the process of the creation, process of the changes in the dimension (D) of creation. Our team in Australia have made a small recording .. of the topic we want to carry on with in the teaching of today, a little bit more in depth. Rick could you play the recording, then we'll build on it, go into more detail.

Plays a "A New Tomorrow" .. (:14).

K- From what we heard .. see, many of us up to now in different part of the teachings have been taught, .. informed, have been brought to see gradual process of the change of the humanity. In a hidden way, in the KF teachings, and in a hidden way in introducing the Enhancement Units (EU), we have started this process. We have started the process of transition from the point of living in 1D, as you remember, when we showed the EU, most of the lived in 2D, especially the Body EU. This unit is so fundamental, is so beautiful, if the humanity understands its power and capability. When you look at the EU what is inside, .. on the walls, is the fields of the matter state of the man, but at the same time feeds back, to the man in the center. Man being the created thing, still becomes the center of creation himself. (:16). Where the field of the plasma (Pl) from the center, fields out, and at the same time, the outside feeds in. In a way, the totality of the shell becomes the creator, the feeder, and then the body.. in the center, as a matter state of physicality, becomes the receiver. That's what we call, the "Adam and Eve," but both live within each other, both allow one to be part of each other, exist. In a way, we have started understanding the 2 dimensions, but now we can explain it in more detail. We can go into the details of understanding how it's come about, what's the process, what's the purpose. When you look at the EU it is so beautiful, if you could realize the beauty of it. You see we have many reactors sitting around and being on it. The reactors would allow the whole system to be the creator, the part of creation. The system becomes, in a way, a new D, a new process. The whole structure changes, as we can see, as we understand. In that process, what we see, is that, you have many reactors sitting around the body. (:18). of the system, as you see, and these, each one gives some of its fields to the body. In so many ways, we have created the "love of Creator," within the structure of physicality of the man.

When you hear in the teachings, that we bring a new D, we, where the position of the galaxies, the position of the body of the man, will change. It's the truth about what is to come. In the D of the creation, we always look at things in a different way, then what we

could, and what we should have. When we talk about Mitra, what has happened, why is a new cycle all the races of the Creator across the U, and Unicose, move into the position of not consuming, but connecting. By connection we see what they need.

When the Creator, created Mitra for love of His life, to have a lover, to have a partner, Mitra never took D of physicality. Mitra always stayed in D of fields, energies of the Creator. The same as the Creator. In that process, when it came to understand what we call, the love of the creation. Mitra all the time, has gone through every strength of the fields of the U, (:20). and has taken the best of all, whatever that could be, beauty of the eye, .. soul, beauty of whatever, and in that totality, has brought that position of the creation of Mitra in the D of physicality. So when Mitra appears amongst men in D of physicality, she has the beauty and knowledge of the U within her. Which means, through it, she is connected to the new D, that, she has the power to be both, in the D of the physicality, and the D of the soul of the Creator, as energy.

In a way, when we introduced the Vertical EU a couple of weeks ago, was the beginning of the introduction of this work. To change the man from the energy of the Creator, to the D of transmutation and transportation (T&T), to the physicality of the man in another D. In a way, man now has the knowledge, as Creator has given to him to be, as he said, I made man in the image of Myself, but from now on that image is free, it is, it will be, and shall be, even in the knowledge of the Creator. This is the beauty of, very simplifying the knowledge in the systems, very much simplifying everything, that every man, and every creature in the U can understand.

This is what we said, when you go to space you don't need to know the language, as you are in totality connected to every language of the U, (:22). which the Mitra has brought and has made sure, that any new generation will receive the same. We have brought the knowledge of the U, in very simple systems for man, to frog leap, jump across without going through rigmas, of religions and all sorts, to understand in one go. In a way, mankind now has the knowledge, the same as what the Creator has released across the U. Man does not need to be educated in classrooms, man does not need to be educated with anything else. The Creator is peaceful, so, no being across the U shall ever kill. In a way, when you hear in the tape, when we say, that there will be huge changes, even in the position of the stars and galaxies. Then you will understand very clearly why and how. When we change the Soul of the Man (STM), when we elevate the STM to be able to interact with all other fields of the U, would man ever kill again. As he has what he needs, access to the language, access to the knowledge of the U, access to any energy that it guarantees his survival. Then the fundamental changes we discussed before will come into operation. As there is a new D, would the man need a digestive system, would the man need the mouth, .. the eyes to see, .. the breathing system. When he manifests himself in D of physicality. Then as the physicality of the man changes, and all the fields of the U go through the same balance, (:24). would the galaxies, would stay the same position, that allows the creatures in their process of life, consume other things, or destroy other things. So we understand the fundamental change has started.

In a way, what the Creator wanted, that the humanity to become a peaceful man, the humanity has become part of the U Community, and peace has become part of the man. For a very, very long time we tried to change the man, to become part of, to be the essence of the Creator. By sending the Messengers, and by bringing scientists to make the life more comfortable, for him to understand. But man has not understood. So this time around we brought the systems, that the man can see his own eyes. This time we have created the man of physicality, in the D of his own physicality. If you look at the EU, what have we done. You entrapped your soul, with D of your physicality. Now we entrap you with the system, that the D of the STP and STM open up. In a way, we have created a D, which has the both the giving and taking, and we can, in a way, at a point of sending, bring all the energies to center, and at a point of delivery, (:26). to move the energies to outside to become the D of physicality.

The essence of the creation has changed, the essence of being created has changed. And this process has started, by what we call, manifestation and birth of Mitra, the evolution of the man and the U shall start. It's not that it will be on a count of the finger, but in that process, many things over all the fields to balance simultaneously, will create the changes. When the cosmologists look into the sky, and compare the skies from now and a hundred years, they'll see the fundamental change. We have the records of the skies in past hundred years we see things, how they move, and they'll see a new horizon, they'll see a total change, and then in that process, all the creatures of the U, .. will have access to everything. Thy shall not kill, as thy, has been given the sources of the fields, and knowledge of the U, that it only taps into what it needs, at the time of the need, and position of the need.

This is why we start teaching for 5 - 10 minutes times, in teachings, not like before, for hours and hours. But this condensed 5 or 10 minutes is more than ever mankind can ever hope for, to receive the knowledge of the creation and the Creator. The new EU is the beginning of the process, (:28). of introducing the man to both dimensions. To eye of his own physicality. The new EU, especially the VEU, .. Body EU, will bring that change. We go to Mosques, .. Churches, .. Synagogues, to find the elevation of our soul, that by becoming elevated. Now through the same system of the EU the elevation of the soul to the parallel level of the Unicose can be attained. We don't make temples, but we make the position for the man to be. Once you are elevated, there is no need for another. But it has to be understood, that man has to fundamentally, has to change. Man fundamentally has to bring that process, of understanding of working of his own soul, his own D. "I do whatever I like, and then I go into the system and I am clean." No way. Would you like a position on arrival, of having an arm or a leg, half of something, or half of the other thing, arrives without you. As you want to arrive complete, you have to go into the system complete. Not only in the D of physicality, but in the D of soul, in the D of the STP.

Mankind has been taught the knowledge of the creation in past 10 minutes, but mankind needs to understand it. Mankind needs to comprehend, (:30). what these changes mean. I'll have everything, yes, but you'll have the Knowledge of the Creation (KOC), but does not mean you can abuse the knowledge. In so many ways, not only in the process of the teaching of the man in past years, we have taught you step by step. As I said, when I

teach the Unicose hears. Many races in different positions have moved to the same level. They are moving, and there are races, which are slightly ahead of this present time, but they will bring you to that point in the coming time.

So what we understand is the soul of the Mitra, when manifested in D of physicality, have the beauty of every single cell, which has ever been created in the Unicose, as she spent her time collecting them. Collecting the best of the essence of theirs, from the center of the soul of each one. Goes back to the writing, that even a stone has a soul, even an atom has a soul. In Mitra in the essence of the fields has gathered from every corner, has made her job to bring the best, to create, when it comes, that all are brought together. The mother of the physical condition in the new D. Where the man, the creatures of the Creator can transmute, between the soul and the physicality, or the Pl of the no D of physicality, to physicality, and any point in the U.

In a way, the new generation, (:32). of the man will not have egg and a sperm, it will be created from the fields of the soul of the mother and the father, from the love of the two. And the interaction of the 2, as the ?? originator of the fields, the child can be born on earth in the shape of the man, can be born in another D, in any shape or form as it guarantees its survival. Now man becomes truly, the man of Unicose. Now we truly become the what we call, the D of the creation. In that process, then you can have the child from the 2 earthly being, and born in another D, and have the shape and the D of the other. But this process allows the two partners to be from different races of the U, for the first time, that by releasing their fields, they can create the new child of the U. Where it will take shape according to the position. As did the child of the man, as will do, the other races of the U, In a way, this was essential to be done, that as we have seen, and man has been ignorant to it, many races became, not each others enemy, but they did not interact, because their interaction, and being, becoming one, has created a lot of other problems. With this position, with the change totally, like as I said, all these, which even man is not aware of these problems in the U, are resolved in one go.

In a way, we allow the races of the Creator, (:34). to intermingle, we allow the races of the U to understand each other, .. to be equal to communicate with each other, to love each other, and in a way, one of the beauties of the STP of the man, with the love of Mitra, was to understand the essence of the emotion of love. Which does not exist in the U, this is why earth was chosen to be the center of the interaction of the manifestation of the physicality of Mitra. Where man taught Mitra, the essence of fields and energies, what the love is. And she made sure that in that process, when she manifests herself in the D of physicality on this earth, she can feel, .. touch, .. be part of the essence of man's life. This will become one of the biggest gifts mankind has ever given to the Unicose and to the Creator. The essence of loving, .. of giving unconditionally, .. of existing without taking.

In a way, man shall never kill, as he is so busy giving, that he is not concerned in what he receives, it's a condition of the true love, when one falls in love, he doesn't care what is eaten or not, what he is wearing or not, because to be with the lover, is more important than what he carries in the D of physicality. In a way, with today's teaching we bring a

meaning to the essence of the work of our systems, to the work of the U, to the creation of the Mitra, and to understanding the love of the Creator. For the first time, (:36). all races of the man, will have the knowledge of the Creator, not in the image and soul, but in knowledge, in what I call, the love, and what he made him, to wait so long for manifestation of Mitra, to show what we call, the apple, the fruit of waiting so long for Mitra, the mother Mitra, to collect everything which was needed. We call it Eve, but Eve took her time, she traveled in every corner, she made connection with every cell of the U, and from the center of the soul of every single one, she took one string, one string of the fields, which was the strongest and the best, that in not only manifested, in the D of the soul of the entity, but carries the essence of the creation of the entity, and collection of all these, the best, has become, to be in the essence of, the seed, the soul, the physicality of Mitra, to be manifested. Mankind will understand in the coming time, how beautiful the whole process of the creation shall be. Where the child from the point of inception, is created out of the soul, and not out of the physicality, which has no need for D of destroying, taking, even taking the womb of the mother from the mother, to survive. Now it works totally different way, the child lives within the womb of the mother, but its soul has been created first, which means it's part of the level of the love of the mother.

In the coming time, I'll go through this in more detail. In the coming time, mankind will see this, (:38). and this is the reason why we brought the EU, for you to physically see the interaction of the 2 souls, the creation of the body of the man. When you look into the EU, when they run, when we create the condition of the, every source is available. and we put the two plasmas of the ?? two lover in the essence of their soul, we shall see creation of soul. Then by changing the fields, we shall see the creation of the physicality of the souls.

The EU are not there just for you to be busy with it, to get rid of cancer, this is the D of the man, to get rid of this, or to have something happen, The essence of the soul of the system is to create a perfect child, is to create the perfect man. Nowadays, you go and get the test-tube babies with your physical sperms and egg, where we create a condition of a perfect life, within the structure, for those souls who cared, to create that, what we call, the next generation. They create the next generation, not for them, to be theirs to hold and to love, and to present the child to the position of the, what we call, " the physical, mental condition of what they want," but we allow the soul to take its own D, and its strength, we allow the condition of the position of the soul, to be decided by the soul itself. And not (be) entrapped within the womb of the mother, that he has to manifest itself in the shape of the man or the other.

In the coming time mankind will be part of it. (:40). Mankind will become the totality of it. Mankind will come to understand how much, to what extent man has a need to change. The new EU are the window to the future of the life of the man. The new EU are the window for the changes of the man, to come. The new ... Vision EU, are there to create the condition for man to see the first changes through the D of physicality. Where he will see through the eye of the soul, but not eye of the man. Those of, KS and people who use the new Vision EU, in so many ways, will see the vision of the soul, and where they might receive the repairs of the vision sight of the man. This is what we want, .. planned,

what is to come. Gradually creating the condition, that the man slowly come to understand, the time of the change has come. The time of understanding the truth about oneself has come.

The time for man to change has come, to change in to the D of understanding, for man to change in the D of being the true man of the Creator. Which means to be part of the ethos of the life in the U - to do good, to act good, and to think good. When you think good, (:42). you cannot do wrong when you think good. You cannot do anything which could be outside the boundaries of understanding. When you do good, you do nothing to harm the soul. The thinking, the doing, and coming of the living, is part of the process of the creation, and when the all 3 are to perfection you live the life of the Creator. Then you understand what it means "I made man in the image of Myself." I don't do wrong, I don't , I don't think wrong, and I don't talk or do anything else wrong, as I take what I need, at the time of my need.

I have set this in the position of the beginning to the end, even in the setting up of the KF. Those of you who are close inside the KF know. I take what I need, and everything goes in for the others, and what is needed to be taken. This is not just a teaching, it's the way of living. It's the way that I take what it need to live, the process of comfortable life, but all is there for the others to be able to take to do. And when one takes from it, it means the other will suffer with it. When one steals from it, is when the others suffer from it. The KF is set that way, by the principle of the Creator. I was explaining, this to, (:44). people of authorities, a few times in the past years, I closed all my banking system around the world, that no one can tell, "he takes what he needs, hides here, and hides there." Everything goes in the KF, and I take what is needed. Everything the KF makes goes into it. I don't live a life of poverty just for the others to have. I live a life of good, that I can do good, for the others to do ?? (with). I wonder how many of you could live that life? Unless you live by correct conduct, of the process of the living. This is the way it has to be, and this is the way we live by example. This is the way, through our example through our soul, we teach the man to do the same process. God has no banks, but he banks on his creatures, and what he has created, and the souls which have been from Him, live the same process. You take what you need, and from it, the rest is there, for the rest to take. Then in that process you don't need to do wrong. You don't need to think wrong, you don't need to even talk wrong.

The process of the understanding is simple, if the man understands the process of the Creators work. We do the same thing with the EU. We give as much as the souls can take. Those of you who have used the new EU and the processes of it, the T of it. (:46). are fully aware of it, it comes to the point I cannot take anymore. Why? Why can't you take anymore, because you do not want to face the next step. Where if it is with you, you should fear no change, that you cannot take. But you'll feel there, for you to give. Not to take. Until you don't understand that process, the system doesn't work. It's the knowledge of the U, it's the knowledge of the soul, and you interact with your soul, when your physicality says, I had enough, means I cannot accept the change. I cannot be part of it. Because this way, I can confirm my existence, that I suffered, that I lived. The process of the creation from now on becomes simple, where you start life in the D of the soul, so we

do not steal from the physicality in the womb of the mother, from the mother. We don't become a sucker, we don't become somebody to be dependent on. When you are a soul in the D of life, you take from the field of the U.

I tried to bring this knowledge to you, even in a simple position of the creation of the MaGrav system. When you use a MaGrav system you don't create energy, you take energy from the U. When you plug it into the wall, you Nano coat the wires, you take from the environment what you need. When there is no consumption, the wires don't need to produce. You take what you need, The first principle of the creation for man to understand is introduced with MaGrav to you. (:48). But you only got a stuck, with the physical D of, "how much more I can pay less, to be able to do other things." The whole process of MaGrav system is to create energy, and at the same time, as you connect it to your house, you take what you need from your own essence, even your own soul walking into the house, that it gives to the cooker, and the heater and the light. But man never understood, never wanted to understand, because then, there was something wrong.

If you look at every product KF has put out over years, has a connection with the working of the balance of the environment and the soul. The only thing anybody has been interested in, is, "would it take my pain, would it give me cheaper electricity, would it do this, will it do that." You haven't asked yourself one question, "would it make me a better man, to give, to find balance?"

Even when you have a headache you have an energy which you don't need, you use the system just to transfer it through to the patch, or pen or whatever else. But you don't look at it the other way. Did I need to have a headache? Did I, what's the cause of, why do I live in the D of physicality, be able to suffer in the physical D. Why can't I raise the level of my soul, that in that position, will sort out the headache, which I have created myself from the energies, which will take from. (:50). You take energy from the food, you give your energy to the Pen, why can't you give that energy to your stomach as a food, and get rid your pain and the headache. The headache of the man in truth, is his own lack of understanding about the creation, and the purpose of his creation.

Maybe today's teaching opened your eyes into a new D. And then the beginning of another cycle. Think how you can create children of the man, in the D of the soul first, and then see how you can allow it to grow to a physical D in the womb of the mother, or outside. The knowledge is in the hand of the man, the totality of the cycle of creation is within the man. Then you'll understand, the true "virgin birth" through interaction of the souls, and not in the D of physicality.

I'll leave this teaching for you to contemplate, try to understand it, and then add it to the other teachings in past few weeks, and try to see if you have matured, if you have matured to see the truth, and to understand it, and come to the point, that you do not leave in the D of physicality, but you leave this planet in the D of the soul. Maybe then you understand, (:52). if the soul of the moon accepts you, you shall be there in no time. No need for flying systems, and no need for anything else, but till than, we'll give you a

helping hand, till you learn to walk through the D of the soul, we'll give you that hand out to carry you like a father does, to his toddler as he starts walking.

Rick if you can show video once more. then go to commercial break. The whole process of the teaching of today, is for mankind to understand, how kind the Creator has been to him, and he has denied His kindness. He has denied the love of the Creator ...

R:

K- Can I ask KS, you listened to this at the beginning, you had a teaching, and listen to it again now. (:54). and see if it has the same meaning as at the beginning, now that you have the knowledge what it means, what is there to deliver. Thank you Rick ..

>> **PROOFED** to here >>

>>> **BREAK** >> 405 KSW Nov 4 2021

Plays video again " A new Tomorrow " (1:01).

(1:02).

R; Are you ready to start the workshop...

K- Yes ready and willing to share knowledge and the love of the Creator.

Questions

Q: We love you Mr. Keshe, thanks for all the love you give unconditionally.

Q: Ed .. (1:04). .. What I have been wondering over the last couple of teachings, is our inability to use our soul to fulfill our physicality needs. Is it basically an emotional impatience, where we are not willing to wait for our soul energies to create the proper fulfillment of our needs, that we want to short cut it, we are not willing accept the process, we want to hurry it up, our emotional impatience so to speak. Or the fear, we don't think it's going to happen, or what?

K- It's a combination of the two. We are impatient to find a way to get rid of the hunger, so we go and kill to get it. We are impatient to receive the energies of the U for our structure to work, within the fields of the M field of the containment. We breath. If mankind realizes, that in the essence of the creation, the D of the emotion of the fields on this planet, which create the amino acid (AA), are sufficient enough to be adjusted to meet every need of the man, then man will not kill. (1:06).

One of the best examples of this absorption of the energy, is what we call, now, the viruses. We get them to us, we attach them to us, and then we let them loose. Why don't we learn how to absorb these energies, without them becoming viruses. Why don't we

learn the way to absorb these energies, that they become the fields for the lunch, or the dinner. We don't take any water to space, .. food .., we don't take any donuts with us into space. How come we are setting it up, in a few months time to be done, and you are happy to be there, but you don't want to do it yourself.

In a way, you are using the transportation EU, as a way for man to start learning, how to tap into. Your 5 to 10 minutes onboard on, from one city to another, will not teach you, but will set the process to. The more people we can get into these systems, the more frequent, the more the body starts doing it. While you are onboard in the 5 or 10 minutes your body takes all the energies which it needs, you get all the energies. You go home, the wife says, "I cooked you the most delicious food your favorite." You say, "I am not hungry." Then what does she think, oh. And you do this, you frequent travel every morning between New York and Beijing, (1:08). and then you go back home to NY in the evening, and every night you are not hungry. I think you're divorce papers, to today's understanding will be on the table. Who is the mistress, who is feeding you? Then the wife gets to you. You say, you know something, come with me, I go to Beijing tomorrow you come with me. When you come back in the afternoon, she doesn't feel hungry, you tell her, "who is your mistress." Your soul. Now he feeds you.

The purpose of the transportation EU is not for you to get somewhere. It's you train you slowly, to become the man of U. Man wanted the tools, .. toys, wanted the gimmick, we have given it to you. It's right in the center, right on the screen. You are a tramp, you have no food to eat, you manage to get on one, or go into the EU, you are given everything, you are not a tramp anymore. You don't need to look into the bins, if there are any scrap chicken, as you already been fed. You find your dignity, you find the D of new thinking. You receive, in the process, not only the emotion of physicality, but you receive elevation of the soul.

This is what the whole T is about. Nowadays if you have tested it. If you put Gans water in the pot, you will see, put another water in another pot. The birds all love to, they come to where, (1:10). the Gans's are, because they get the energy, what they were looking for. Would they go and kill another? No, because they are fulfilled. This is what, this is about. We cannot get man to change, we change the man the way he wants to, with toys and gimmicks and other things.

As I said before, once you go into the systems, and gradually are a frequent use of it, your body, your structure learns to take energy from the environment. Would you ever go back to eating, because eating, you want a burger, you get all the feelings and emotions of it, without actually killing an animal, destroying another life in the shape of the bread or the lettuce, whatever. You just look at the burger, as it is the meat inside it, but the rest of it is alive too, the sauce, the bread, everything has life. We have destroyed them, only destroyed them for us to have the pleasure of their energies, now it goes back to the same thing, you feel it, taste it, it's not that, like the little girl said, "can I lick you, do you taste like chocolate?" This is the problem with our future, that many of us will gradually change.

What happens when you are a frequent traveler in these systems, you pay a visit regularly to the EU, when you decide to travel through the soul, instead of getting in the machine, in the VEU, everything you needed is there, and now lasts longer and longer, and the body does. What is your body going to do? Which organs are going to change? (1:12). I don't receive anything as a waste, .. water. Do I need the kidney's? Every energy I need, exists within the D. Do I need a storage capacity and a liver? I see the beauty of the people, with their souls, with their actions, with the emotion of their thoughts, do I need an eye? Because don't forget you can bump into the wall, but you forgot to remember, that even the bricks of the wall, and every dust in them has a soul - "don't come to us, you'll hurt yourself."

Mankind will come to be changed. You are not aware of what we are about to do. But in a way, we are aware what is about to happen. But in all these processes it needs you to want to have that change, .. to allow the change to come through. Thy shall not steal. Not even from the soul. You take from it, as you allow it, to be taken from. You can destroy all your cancers within seconds, but you need to have it, because that gives you a confirmation of my suffering. But do you need to have it, or by the elevation of the soul we create a new condition of life. Would mankind become kind to himself, and no one else, and that's where you'll find peace.

I explained this very recently, .. (1:14). many of you who start using the EU in any shape or form. When you use travel EU, inform your soul of what you want to be, not lie to yourself, and the soul knows you don't want to be, what you say you want to be. Thy shall not lie, not even to himself. In understanding this, is important for you as KS to take that next step. You can build all the universities to teach you everything, when you don't allow your soul to be elevated, because you live in the D of physicality, what is the use. We teach you everything from the D of every knowledge to get, to position of releasing and elevating the soul, but are you ready to let it go, to elevate yourself. No, because as a prison masters you have learned to find an excuse to stop the elevation of the soul, because then it shows, it's you who has been the guilty party in D of physicality. Now you decide which one. Now this speaks different word, than the action, and the action says, totally different thing, than what the soul says.
Any other question.

Q: Was there every a time, (1:16). in humanities existence, where we did allow our soul to feed us, or was there something wrong from the get go, or have we just adopted and made habit of relying on the physicality?

K- From the beginning man could live, man as a man, as an energy source, could live without, by taking energy from the environment. We made it a habit when the soul was created, and the D of the STM, the STP created that emotion, if you could link the 2 souls without time and space gap, in a way of D of the PI, that you cut out the emotion, the U would be a perfect, perfect picture. But the loss of the fields in the transition, creates that imbalance, creates that emotion, creates that fields, that we call emotions, which man needs to keep it under control, man needs to keep it in a distance. If you find in the structure of the man, a position, in the position and D of the soul, where you can constantly keep a strength field distance gap between the STM and STP, in a way, that it

would not need anything for its survival, then you have achieved the ultimate goal. If you learn how to reduce the field strength of one, for the other one, when it gets closer, that gap, that square box, still exists, we can live in that D, (1;18). with the same emotion.

This is the secret of the creation, be aware of two, and this is where the time has come, where the creation of Mitra, we always keep this (the gap between) it doesn't matter what strength, when you are born. The space gap of the connection with the strength field in the box, as you call it, will be the same for all created things among the U. Which means all shall become one. We are not looking all, to look like man, but we look like the man, the being, the creature enjoys the position and D, does not matter how it's created, and finds balance between the two.

You cannot have an atom if you don't have an electron. You cannot have an atom if you don't have the proton. And then, you cannot have the true atom if you don't have what we call, the neutron in the structure, that it feeds both in the D of absorbing from its environment. That D is a still blind to the man. Up to now we speak about the STP and the STM. The Hydrogen is incomplete, totally incomplete, because at the end has to find energies from somewhere to keep this. The third D is ?? ?? of essence of knowledge that man will come to understand, and in the future we'll explain, creates a perfect world we call, atom. But there is always a source energy for both to tap into, (1:20). and keep this distance, the creation of the neutron in the structure of the atom. But this knowledge is beyond understanding of the man at this moment in time. You got understand, .. realize that in the process of creation, how things will turn up to be, how everything shall be, how we tend to change things the way we want . How things will turn to exist in that D. Why perfection comes out of the addition of the third party. But that's another mystery for the man, which we will discuss in the future.

Any other question.

Q: .. I was tricked by the German Intelligence agency, they gave me a liquid and recorded my brain 24/7, is there ea way to change the frequency, so that I get my own thinking, privately back again?

K- I don't know what you are talking about?

Q: They tricked me with a liquid, and they recorded my thoughts ... (1:22).

K- Who are you, who are you that they tricked you into it.

Q: Well they thought I was so important for them to get out of my brain, by I hadn't at that time, so they gave me that liquid . ..

So that they cannot record my thoughts any longer.

K- I am not aware of such a thing, and I cannot comment.

Q: So they can record the thoughts as long as they want to, as they got near to my brain. About 50 meters is the range. I'll have to get used to ..

K- I presume if that is the way, (1:24) of your thinking.

Q: .. Again I have an idea for the beam formation in combination to the Star Formation.

K- What formation? ...

Q: To beam the UFO .. the flight formation..

K- yes,

Q: To another planet ..

K- Yes. I don't understand.

Q: The flight formation makes 20 times the flight speed. That is correct I guess. ..

K- I don't understand what you are trying to raise.

Q

K- It doesn't matter, it can go at any speed. There is no limitation .. in the speed of travel. If you can go deeper with a stronger field. This is the beauty of the T, you decide on the span of the, depth of the PI, where to tap in. That gives you, this is the essence of the flight system, create of G and M fields.

Q: saw a video of UFO in Paris, 2008 there was a SF, there was a white screen, and they were beamed to another planet.

K- The white screen, if you see a flash of light, and then movement, (1:26). These majority of it, is what we call, space flight. I explained that in detail in the "flight over Jerusalem". But you do not beam the speed of light, the creation of the light around the system is due to the rapid expansion of the field, in a strength to build up. and as a dynamic system, as the systems are dynamic M field, their interaction with the atmospheric condition of the earth, creates that flash of light. You see a flash of light, and then what we call emotion , this is how you do. This is very normal in atmospheric condition. Most of the flight system you see in space travels as a rapid light, these in changes of the pulse is, very clear, I have seen it twice on the tests, 3 times, in the tests in China. Where we run the tests. Because I was looking for it, you see it within the structure, where we could create plasmas within the ball, and creation of the PI within that ball creates a massive interaction of the fields fo the environment and the Gans's. It's a normal effect.

Any other question.

(1:28). ... (mistake Azar)

Q: Salomeaa, We are all interconnected, but the science wants to prove this or not. This is the problem. Our ancestors just believed in our inseparability at energetic level and they helped each other from a distance. .. how can we learn all of humanity of this truth, .. Mitra could activate this information, emotion in the soul of man, our common consciousness, is this.?

K- I don't understand what she is trying to tell us in the first two lines

R: repeats .. (1:30). ... She's saying, is this transfer of energy form one person or being to another, is that the solution and can all of humanity learn this truth. (I think that's what she is saying)

K- In a way, it always has been. .. mankind has .. In a way, we always have had connection, as we come from and we go back to. We have connections with our parents, with our ancestors, and even the D where our soul is ahead of us. We decided, to be blind to it, and never to allow it to grow. When we are younger we have more of it. because we are not aware of our physicality, we become knowledgeable in existence, and we use it in a different way. But as we grow older this changes. We move more in the D of physicality, we allow, more than the other side, to the point, that we don't accept anything. And today's scientific, those are the people who want to use the science as a

way to control, they say, "show me, then I believe it." Then what I say, I say, "then go and do it, then you'll believe. I don't need to show to you nothing." (1:32).

In many of our conversations with many people, I always tell them, very simple, the question of show me to believe it, is on your shoulders, not on mine. When they send you to an organization to decide. I say, how can they decide when they have no knowledge. I am prepared to sit in front of a bunch of donkeys, and professors, which are the same as the donkeys, because they don't have the knowledge. Their knowledge about, what we told them, the same as donkeys. They hear the voices, and they just sit there, and they kick. Because they have been the fools, which believe in their own lies. This is the process of the creation. We have become more and more reliable on our physical D, and those who understand, is the way to interact, and to control you, or dismiss you, they say, "show me". It's not my term to show. It's for you to understand, show to yourself.

We have connections with all our ancestors, .. to the, if .. you understood the teaching of today, we can even find a line of connection to the Creator, but we decide, we ignore it. Does not need our ancestors to. Because when you put a magnet on the table, it does not matter how many magnets are on the table, big or small, they all react. (1:34). So you have a connection to the small one and the big one, at the same time. It's you who has been put in the middle, you are created, so you have to find what is, and where is the connection to the big one on the table. Then, if you going to have his energy, you connect to him and the others, be provided to reach there. This is what mankind has not understood fully. Understanding the ease and accessibility to the Creator, is easier than drinking a cup of water. But man chooses to ignore it and he goes for the cup.

When you put, Rick has a beautiful presentation, done it for years, all these magnets on the table, you choose different sizes and shapes of the magnets, when you introduce a new magnet on the board, everybody moves to find a new position. So when you create a new soul, you already have made connection to every single atom on this planet.

I was explaining .. the problem with most of you, is you have not accepted that, you stand vertical, why? In the world of physics, you should be on the floor. What holds you up? (1:36). Except MG positioning between every cell. And knowing their position, you will not be able take a foot off the ground to do the running or jumping if the whole mechanism of the STP has not adjusted itself to magnetically move the body, even you call it, it's a mechanical work. You try to get the mechanical work to do ?? that, which is no matter state, but is a bunch of energies on top of each other. Once you understand this, then ?? part of things, even absorption of the energy and fields, feeding yourself all changes.

Any other question.

Q: Mehrañez, .. first is the story of the Popol Vuh, (Mayan legend) the legend about tribes in South America, (1:38). some time in the history they had a catastrophe, so they go under the earth through the graves ??? ?? they come up, and maybe pray on top of the hill, all of a sudden they could not talk to each other, even though they were sisters and brothers. How do you explain this?

K- I don't know legends can be anything man makes it to be. I have no idea

Q: You always say you should not kill, and we are trying to learn it. How do you feel with women who do abortion, without knowing it's a child, an early, early child, before 2 months. How can, by their actions of abortion, towards the soul which they have medically exterminated. How could they do to.. ?

K- It comes by the position of responsibility and being able to carry. It comes with the capability of understanding, I can bring to develop, to full maturity, without harming myself or the child. We see abortion nowadays as tools of just pleasure, which goes to the next step. But in essence the soul live in the new D. (1:40). But it's not allowing it, it's understanding the process, that what it means. Which life will be in danger, the mother or the child? On the other hand using abortion for the birth control is not acceptable. But when it come to the point you see the mother in real danger, if the cycle goes through, has to take priority, the life of the mother, it's a mature soul. That's the, we call it the postnatal depressions. We see many mothers kill their children, or themselves. When you see that point, that's the time when you are in an accident, when the life of the child can endanger, or the mother. Then that is a different position. But abortion the way the man does, as part of the pleasure, is not acceptable. It's a priority of soul, priority of life. It is, this is the only purpose, the only reason, we see many mothers. We just seen very recently, when the mother calls that, take the child out of the window, or I jump. Because we see this, change in the structure, or status of mind, or hormones create that condition. That is the only condition, which you can, nothing else. If it is a birth control, they have to sort that out between the souls. (1:42).

Q: Stephanie, ... from Carlos .. (1:44).

?? the Virgin Mary give birth to this new soul. (1:46).

As a symbol has the anti-matter ...

K- When it's a symbol you can make it anything. This is the totality.

Q:

You see .. I said, it depends on .. The whole understanding of Virgin Birth is not a physical condition, not the way the man thinks. It comes by the word of purity, means detached from, clear of everything. What you call a pure soul. ... (1:48). I said the VB is not in the physical D, as the man thinks, virgin is purity, detached from everything. Being what we call, a true .. condition, that physicality doesn't come into it.

You got to go back to the history of VB, VB doesn't come from Christ. VB is, comes from Mitra, born from a virgin mother. How could they say, Mitra is created from the Soul of the Creator, from the D of the Creator. So they put virginity in it, and then when the Catholicism was made by the Romans, and the Christianity started, and they put the whole thing around it, they brought that VB. How could they explain to man, that the .. you are not talking about Mary to be virgin, you are talking about the son of God, you are talking about creation of the Creator. It's pure because it comes from the source, so it's virgin, it's pure, it's in a way untainted. Especially, in Christianity they have brought it to a woman, and then in that woman, become the process of the birth, and then there was a woman , gave birth there. Whatever, and the rest has to be built, to make it reality. (1:50). VB is when the Creator created the soul of Mitra. We say, now he took a rib of him. He

took a strength, which was closest to him, and allow it to become separated, to become what we call, Mitra. That, to make it stick, has been changed, and turned to everything else, because Christianity of the, what you have, as a VB comes from Zoroaster, comes from birth of Mitra, and we don't have the physical D, of physicality, of purity of Mitra being born from a virgin mother, which even in that mysticism, could not be said, that it's from the soul of the Creator, from the inner sanctum of the existence of the Creator.

In the past we have explained, that even the Creator has a soul, let alone the others, This is why every creature has a soul, I made man in the image of Myself. How can the man have a soul, when the Creator doesn't have a soul? The center, the collection of the fields of it, the interaction of all the fields of the Unicoase creates the D and strength of the Soul of the Creator. So when you hear this rigma, with VB, go back, it's a Chinese whisper, but with its own twist. The Christianity has come from the Chinese Whisper of the Mitra, added to the virginity and the rest of it. Because it suited the Romans, (1:52). and it suited the Christians, half of them were Zoroastrians, or Mithraism, and half of them were Christians, but those who had more power, because they were the seat of the power, they could kill, they put their powers as a Mitra into the writing. It's not questioning the physical virginity of Mary. It's questioning the reality of the facts of the, what we call, Chinese Whisper, if we make it this way, then it gives it a mysticism. It went in the background of the work of Mithraism. In Mithraism, no one has ever explained that virgin birth comes from the purity of the Soul of the Creator. Virgin in the essence of pure, not a physical, no interaction. Because the Soul of the Creator works with the soul of Mitra, not in the D of physicality ?? So then, you have to answer how all this has been written and they have come, to made us to believe in certain ways, and put words to it.

If as KS, you could understand what I have given you as a gift from Creator, in this machine in front of you on the screen, you would have all give your life up.
Any other question. (1:54).

Q: It is wonderful to know how all things are created in the essence of the Creator. However, before materialization, there is the design of form and function. Where in space is the design center?

K- We don't design, we accept what manifests out of the interaction. Sorry, the only thing, God forgot to open a design center in the process of His creation. When we have an address we'll send it to you.

R: Could you say that in a different way, where does everything come from?

K- Nothing ...

R: For example, where did this design we are looking at, this beautiful (EU), when was it first conceived. Or did it appear from as you say, the interaction of the forces at that time.

K- The design of this unit, goes back over 40 - 50 years ago. The design of this unit if you look at it, is .. in the 1970s .. when the MRI came out, we saw partial interaction, but then you had x-rays and gamma rays. The condition and the way, (1:56). this system is made, was designed, is accumulation of years of work. There was no system to build this, there was not enough knowledge to build such a thing. It doesn't matter what you built, system with interaction in this way, was not available, till a few years ago, when we start seeing it in China coming up in different .. applications in health, and the banking and all

sorts. This allows this expression to come out. The future version of this system, will be amazing. I already know how it is going to shape. That will bring a new D with the capability to carry hundreds, millions of people. This is a taste. We have 2 choices we give the knowledge to common man, that everybody can have it, and then build on it, or build such a system that we get entangled for years with the governments ?? ?? we wanted humanity to have this shape, manageable, position-able and everything else.

This system can take you into the depth of the U and come back. If you know how to use the system, you can cross universes. It's not the physical feature of it, it's the fields, which we have created, within this structure, to bring the balance. (1:58). If you look at it. You look at the body, we look at the fields. How these fields will create a balanced position, that you'll have a new position. We have deliberately suppressed the fields, to maintain the flat position. We have deliberately positioned reactors to create the curvature. We used the curvature to put it in , but once the system become .. in flight mode, this physicality is irrelevant. It's not the physicality, which transports you, it's the fields, which keep the shape, because of their positioning. It's very much like the life of man. We create the physical man, and then we give you the fields of the soul. We've done the same thing. We created a body, which always stays the same. You always have a Chinese man wherever you go, and then we change the soul to get a different Chinese man.

We can create a very much ... we sit on a platform like this, in the future we change the platform like this (vertical). Where this ?? means, that we can expand the base. Again we use that expansion with the units. Where we tested these units, fields, when we didn't have the physicality of this sphere. We put the reactors in the lab on the floor in different positions, we created the fields. (2:00). We didn't, if we would have strengthened our fields, we would have never need the physicality. We can change the position as long as we keep the balance of the fields, in the D of the what we call, application ... We can change the shape of this space to this, increase the numbers, but then we have to change the D and strength of the reactors. If you look at this, and turn it 90 degrees up, you have .. the vertical system. Here the man is in the center, and here the man is in the center. Any other question.

Q: Kay, .. (2:02). .. The past 2 teachings you have stated we could go into the Transportation unit ... and probably we never leave .. when you open it up you'll see us standing there. You mentioned our soul may not allow us, may not be ready to take that shift...

K- Are you afraid of it that it might do that to you?

Q: Perhaps. .. I would love to travel .. What is the difference between a goat, or a vegetation like a watermelon or something, or even a rock? What they turncoat as well, or would there soul they are not ready. Because at the end of the day, the vegetation, and particular the animals, grazing or carnivore animals, they do what humans do, for sustenance they devour and kill, what about them, would they transport, what about them?

K- It's the same with it. You are looking at the man, (2:04). we are looking at the soul of the being. If you bring another creature from the U, and he does wrong on this planet, yes? Then can he leave without the souls, are balanced? You understand? It goes back to

the same thing again, the beauty of the creation. The understanding of the creation, .. the totality of the creation. It's not exclusivity of man. That's all it is, it's not exclusive to man. As long as man has that habit ... the king of the animals, you always have that thinking the ?? of soul.

If you have a key in your pocket when you go in the machine, when you land on the planet Zeus, you still have the soul of that key. You say, what have I brought with me here. If you have no memory of being on earth, the way you become ?? then you loose it, you find something in your pocket. Will it be the shape of the key. Just because here it was in the state of the matter state, doesn't mean there it's the same. Maybe it appears as a mouse in your pocket, or the shape of a moving thing that you consider to be a mouse. This is how mankind has to move on, has to add to his knowledge. (2:06). Has to become part of that structure of understanding.

Q: I wish we could get there as soon as possible. ..

You mentioned .. how humans have not managed ?? the Creators power and we are not connected with it, and carry on behaving the way we do, too much involved into realm of physicality. .. humans have no choice ... emotion we have no control over, nobody told us how to control it, has blocked us in order to do the right things, to stand by the ethos of the Creator. Why do we have shortcomings as humans, and why are we being the culprit. If we didn't know to begin with. I understand we shouldn't kill, lie and steal, so that is being the pure human. (2:08). If your morality is in tact, you do those things anyhow. But in terms of not eating and having access to the universal knowledge, or knowledge of the Creator. Our own soul has created us. We have, thanks to you, you have introduced it to us, we are aware and trying to get to that level. Why are humans being held responsible for not having that knowledge, because it was taken from us, or blocked by our emotion. Why did ?? why being held responsible for not being like the rest of the U Community. ... I wanted to know how deep human is responsible for their actions, without knowing such a thing exists?

K- Now your second question goes too far. Let's go one by one and see what we say.

Q: I stretched it a little

K- Yeah, but you broke the string, start again.

Q: Why humans are being held as culprits, if we did not have access to our knowledge, in the first place?

K- We always had access to all the knowledge. We never been denied it. It's the way our ancestors choose to go. The knowledge of the flight, (2:10). .. of the enhancement unit, .. movement without physicality, .. of absorbing energy from the environment, without killing, all, we had it from time one, we decided, no, we don't want to use it. And some of you, or some of us do, when we need, and become magician. What is the reality? We had this guru visit us years ago, when I opened his hand, how he feeds himself. We can teach all of you, every single one of you can become that guru, for months and months, you don't need the water. You are the water. I have said this many times, and somehow we can't get through with this, to many KS, to most of the KS. You produce field replication units. And then we had the taste of the orange or whatever in it. What is in here? Just a saltwater. You ?? have a man and his physicality. What is the constituents of a man? Just saltwater. With system which can take energy from it. If all we do is we put enough of

these field replications around him, and we go in it. Then what happens? (2:12). You become. You taste orange. But we have to have an essence of, "I like the taste of orange in order to receive it. What happens if I put a sheep next to the replication unit? The orange doesn't speak, but the sheep goes, bah. Would you do the same, ?? bah and ?? Because you take all the emotion, and would you feel you had a nice kebab when the sheep stands there, without eating the sheep? You need 1 single orange for all of us on this planet to have the taste of. Or 1 sheep that we all have the taste fo kebab or whatever we like ?? from. But would this be able to connect to the universal energy, that you can feed from it and produce continuously the fields that we need to create that taste and emotion. This is what we chose. Now we are bringing the option back on the table. But showing the advantage of it, or the benefit of it, or what we call, (2:14). "the side kicks of it." Humanity needs to move on very rapidly, .. be on it .. , if you are there to catch up.

Q: ... our ancestors have put us to where we are, with no choice of our own. They knew the knowledge and they took it away from us, they didn't ever allow us to have a choice. Because obviously I never knew anything about it, and billions like me never knew anything about it. .. that we could have access to our soul. .. and the universal knowledge. Our ancestors or forefathers knew about it, and as time went by, bit by bit they just ditched it, or totally forgotten it. It goes back again we, the present generation ... we don't understand .. there is such a thing as a soul there, is our creator, and has got the essence of totality, has got universal knowledge. You can do everything one could ever imagine. But at the end of the day, we in present time, we never knew, we were shrunk of such knowledge, such power. and such a power of creation. So we are being held culprit, ... for what our forefathers have done in the past, in a way we are being punished. (2:16). I go into the transportation system and I just stay there, because I didn't have any access to such a knowledge because my forefathers decided to stop it.

R: Could I say something. In my opinion this knowledge has been there, always available at the point of need, but most of humanity doesn't need it because they are so busy in their lives. But I ran into this knowledge 40 years ago. I know it's been around 40 times 40 years before that. So where were you during that 40 years? Where was your attention? What have you done, why didn't you run into that knowledge? Why hasn't humanity run into that knowledge. Because most of us are too busy in our lives to pay attention to it. But now some of us have been forced into it. .. Maybe it's time for Mitra to be present on this plane. That resonates in the soul of every single human being. Besides on other places in the U. ...

(2:18). and the message is getting out to the masses instead of small group, that usually the case, small groups here and there might have retained the knowledge, and it may be fragmented as well because it's not always interpreted and presented clearly. .. What do you say , Mr. Keshe?

K- It's not been there 40 times 40, it's been there since the time of the Creator. It's just we chose, which part fits us. Depends what part of the information ... depends on how we decide to accept the facts of .. the reality. How we push with the limitations in D going deeper to understand. How we can live within the fields, but we don't need collection of fields. (2:20). The knowledge has been accessible from the time of Moses, Jesus and the

rest, and sometimes they showed part of it, and they became, and mankind treated them like magicians. In the very near future, much, much nearer than any of you can imagine, mankind will bring bodies to this system to see if they revive their souls, that through it they can revive their physicality. They will attempt it. But then it depends if the physicality has already taken shape to go. To us it is the parameters of holding to the soul. The way we see now, they air ambulance from one country to the another, they will air ambulance people to the nearest machine, that they can put in there, to see if they can get the brain, which was in an accident, or whatever, the bullet which has caused the D to kill, they keep the machines going, mechanically with a heart operation of the machine, of the body, and then put them into these machines, trying to revive them, back in D of life. Don't be fooled with the simplicity of this, man will make a "magic machine" out of these machines in the coming time. But the soul has to be there to accept it, (2:22). to accept the change. Maybe once they go to new D, they don't want to come back in D, doesn't matter what you put them in the machine for.

Death by accident will become a very rare thing, because they will have solutions for everything, even accidents, if you can get to the machine to do, you do it. Christ didn't have an EU on the floor. He gave from the soul. The STM raises the STP, and the STP raises the body of man. And I said this many times, haven't we done this in the case of Naomi. Haven't we done this in the case of, other cases of the KF. Because now we have the knowledge. But the man should want to receive it, anyway. I gave you the example of the blind girl, took a few seconds, she said, I can see, but I don't want the sight.

Q: Thank you ... one more last question. When physicality of the man dies, .. the STM , the creator, (2:24). will take all the energy back it has accumulated from the physicality, and goes to another D. .. what happens to the STP, what happens to that soul?

K- STP in a way, transfers its energy to the STM. It's like it goes. Now the STM becomes the physical D, and the STP sits inside it. It's the reverse of before. It's the physicality, in the D of strength of the position of the M field of the earth, which stays behind. But the STP, which made the body of the man, to hold on, to be in touch, and in interaction with the STM, comes collectively, to become now, within the structure.

Let me explain this to you, because I know this has been a lot of questions for many KS. If you have the body of the man , and then you have the physicality of the man. Every cell has a soul, and then you have the STM. Every single soul is in touch, and position wise, with the STM. What is leftover, above that, is what we see as the Gans of the physicality, which makes the sum body of the man. (2:26). At the point of death, those, all these fragments will become in a way, up to now the body had the position, now the game reverses, these become within the STM. And what is left in the matter state field, with the interaction of the earth's GM matter state, stays behind as a physical body of the man. In a way, up to now, physicality of the man encapsulated the soul. In the position of the death, the STM encapsulates to protect the soul of every cell of the man. In a way, it becomes a solar system, where all the souls are like earth and other planets, finding position in it. In time and position, those which have the strength, the collective ?? strength, become part of the soul itself. In position and D of the new position man arrives to, the soul will still, can stay as a soul of the D of physicality within it. Then it depends

what it needs to manifest itself in the shape of in the new position. There is still the soul of the point in the kidney of the man, which knew how to dispose of energies not needed, in the shape and form, that knowledge still sits, between the soul, and that soul. (2:28).

What we leave behind is what is in interaction of the fields, with interaction of the fields of the earth, and the matter state becomes leftover. That is why if the body burns in the fire, we don't get, because the physicality has taken different shape, in the strength, but the soul is still there. If you understand this, in the long term, you should be able to give an answer, why when you have an amputation, what happens to the soul of the part, which has left it. Has all of it, still sitting there, but, and that's why the body tries to feed it, through the soul connection, and through the neural system, to feel it, and it's not there, and you get phantom pains. Our neural and blood system is not the only connection to the soul, every soul. Our soul has direct line to the soul too, doesn't matter what ?? feeds it. Any other question. (2:30).

Q: Ed at death the souls of the cells transfer their souls energy back into the soul existence. They carry what they have done with them. What is the case when they have done incorrectly .. wrong .. they have collected and incorrectness, because of their action, That energy what happens to it, does it just get dissipated, or re-figured or used somehow.?

K- What do you mean?

Q: I know we carry our experiences and our learning with us ... all that we leave behind is the physical interaction with the environment, but the learning the wisdom knowledge, we carry with us, ... but what about the case when we have done wrong?

K- It's still part of the knowledge. It's the part of knowledge, which is open to you. You know. There are very, different ways of looking at it, and that is, sometimes we do something without knowing it was wrong, which our soul is not aware of it. Sometimes we deliberately go out and do wrong with the full knowledge, or we do something, which turns out wrong, and we know about it, we don't do anything to put it right. This is what, what is important is how to correct what is wrong, this why I always say, always ask, because what is done by the others, when asked, that decision is made by them, and you have received their answer, you make a decision on those basis. What goes, starts from that point, what is wrong, is for them, not for you. This is part of understanding this process, .. this change. I have gone through this quite a few times in the past. You make your mistake, you are not aware of it, when you go in the system, (2:34). does it effect you, no. If you made a mistake, and you know you are aware of it, and you don't put it right, then is it your position to go in, and will it be done, or have you put it right? Or you do wrong and you think you can get on.

That's why I said, none of the world leaders will ever be able to. You want to travel from A to Z, get onboard after somebody who has been in the position of power for over 2 years. You fly at your own risk. If you heard me before, I said, being a world leader, be a very lonely job. Anyway, we'll see how mankind will do, and what mankind will learn from this process.

Thank you

It is for us to decide the future of us, not others, what they have done. We will go through a process of understanding for ourselves, we'll go through a process of understanding for the others. But in overall, we have to be able to understand our own position. (2:36). When you ask, and you are given, you've done no wrong. When you take and you don't ask, then you have to stand for it. Maybe what you've taken, without knowing, without asking, has brought a position of relief for someone, then that stands on its own. Any other question.

Q: Ghana .. how to receive and give enough fields to get in the center of our being, and stay in the state of non-tangible equality with soul?

K- Very easy, understand your own strength and your weaknesses and understand which one you need to move, to reach to that point. It's one of the easiest things to know, when you are strong, when you are weak, try to take what you need and no more, then you'll find out, you have found the balance.

Q: (2:38). .. the powers that be try to get a grip of more and more parts of the physical life at this moment. Why are they allowed to do this, or is this bringing new possibilities for us?

K- What are the powers to be? We allowed them to become the powers. That's all. We allowed them to become power, what are the powers.

Q: .. Is it correct to say, that we are not so evolved as on other planets, compared to other planets, but the quality of love, is a quality of our planet, and is very special for it is embodied physically. Or is a love a quality that all planets have?

K- We are not behind, and we are not ahead. We are in the cycle of our evolution. Many races never took to the physicality, and many races took only D of physicality like man. But in the process either one had to progress to know where to connect and how to be, and how to create, and the rest of it. Just because you don't have D of physicality, doesn't mean you don't have D of emotion. Emotion is a common denominator, (2:40). across all created things, even a stone.

In so many ways, emotion is part of the confirmation of the existence of the both, STP and the STM, you can't have a reaction unless you find something to react to. You can't see a plane flying, unless you send a radar out, and unless it hits it and comes back, confirms its existence, needs ?? another one to confirm, or make a communication. This is part of the life of the man, the knowledge has always been there, it's the man who has chosen to go the wrong way, or to use the part which is suited him.

Any other question.

Q: from Macedonia .. after when I made the Cup of life 1 and 2, I felt like my soul was traveling ... I went to a place where there was a library .. should I believe what I saw, is there a library or not? I really believe I was traveling with my soul and it was not a dream?

K- The reality is that as we enhance our, or as we use the Gans's and we enhance our body, (2:42). and our soul with it, we'll come to understand that we have new

capabilities. A new D of life opens to us. In what we are receptive to, and what strength and D, then it gives us manifestation of realities, or being able to see, or being able to travel. It's not something new.

Q: .. Is it that we are looking through colored glasses and cannot see clearly and as we evolve, the fog becomes clearer?

K- I think it depends on what side of the glass you look at, but in general, not necessarily, not necessarily. Depends on how we will negotiate with ourselves, how we try to understand the possibilities of the interaction, to what extent we will accept this. Maybe a few of you will spend time in these EU. But in the first few minutes you will receive, you settle, and then you will not feel that again, because the correction is done. Then it's left to the D of physicality to sort itself out. Many of you will feel this. You'll feel this beyond imagination of the man. (2:44).

Q: .. Can a Keshe absorbing field Butterfly, be used in a jacket or clothing to help to absorb energy when needed?

K- Yes, yes, One of the things you can do with the what we call, the butterflies, they are in a sealed vacuum pack, or they are supposed to be, I hope. If they are not punctured, or they are not touched, you can put these .. Butterflies into a glass of water, or put 2 of them in a glass of water, use one bigger one, and a smaller one, put them on either side of the glass, and then try to see the condition, the emotion or whatever, that you might want to see, or you might feel in that cup. You need, because of the changes in the transportation of the fields from one butterfly to the other, (2:46). you create a condition of absorbing emotions, and fields, and strengths, and what we call, dimensions into the cup. The butterfly is put in there, now you use, has many, many applications - many, many applications. If you have a .. emotional condition, put a butterfly on either side of your head, see how you feel. They are totally field replication, there is no matter state with it. But you have to understand how you use it, and the way you use it. If you use the butterflies the correct way, you can even warm the body in the winter. Any other question.

Q: Why do we live to 100 years old, if our body is so fragile? (2:48).

K- It's you who decided. There are people who are 100, you don't recognize them, they are 100.

Mr. Keshe Request to UC

I would like to make a request from the U Council. You know that the U Council (UC) is arranging to meet for the first time, as a full council, sometime in the near future, they have to announce it. Please when you do so, make sure you give enough time for those who want to be with the Council to add to your work, for the time and the place. Secondly, please make sure that all organization is in your hands, and not to the people ?? .. in Linz center.

Those of you in the UC who are planning to for such a meeting for the first time ever, UC members will meet. Try to understand and bring a new soul and dimension. You'll meet at an appropriate time. The time and place you have chosen. It's perfect for what is to

come. But you have to understand, that you meet as the heads of the humanity. You come to what you call, your meeting with an emotion and with an understanding that in your meeting, it will bring the change in, and for sure the soul of Mitra will be with you. (2:50). As your decisions will bring changes for the humanity. I hope the mankind will come to understand this.

I have another request for UC. As I don't attend your meetings ??? Due to your work, the success, rapid success in Vienna talks between "5plus1" , as that will bring a new dimension to the whole of humanity.

In so many ways, mankind is ready for a change, but mankind has to make that move, to bring that change. That move needs to be done in Vienna. The way you wished for peace and the changes. We would like to have your wishes for the end of conflict across this planet, which 5plus1 will bring it into a new dimension.

We have made the request to make it "5plus2", and the 2 is not just the condition of the end of physical atrocity of one group or the others, which the Palestinians or Israelis, but the 2 is the symbolic of everything else, that the man in the position of power and knowledge ?? has done.

In so many ways, the 2 becomes the children who abused. The 5plus1 have to address it as the world leaders. Those who are involved in the drug trafficking, (2:52). 5plus1 has to find a solution. I'll explain to you in many ways, why it is. The support of the UC to be present is needed. To receive the soul of the elevation of the position. Is not just trying to change centuries of one nation or the other.

As I said to the Iranian leadership and to many people around us, it's the first time ever a nation has been sanctioned and its people have been put under shortage of everything, because of their knowledge. It's the first time we have seen the rest of humanity have risen against a nation, because they have access to a massive knowledge, and they have gone forward very fast. Sanctions of this knowledge, is what we call the 5plus1, where we change it, knowledge in exchange for peace from the motive and motion of the 5plus2.

We would like in the negotiations, not only the condition of the sanction on a knowledgeable nation, through his knowledge, but sanction on the totality of those who deal openly in harming the others, to be sorted too. One of the biggest questions which sits in 5plus1, is not the position of Iran, why does so advanced, and they are advancing so much., and how we can stop them has to be. It has to be, how can we join them to learn more with you and our knowledge to speed faster, to access more. (2:54).

This is what is the job of UC, to enlighten, to elevate the soul of the negotiators, to with it, to become mature to understand. One of the main positions, which we'll see has to be taken, is sanctions have to be on the nations heavily involved in child trafficking. Children are the future of the man, and how come we sanction a nation for knowledge, but we don't sanction those who destroy the life of the soul of the youngsters.

There is and there will be a request in all position, for now that we have reached peace, to find a new way to handle atrocities of man on each other, Palestine, children, hunger and peace. This has to take priority, because once we learn this, now we become mature enough to become part of the Universal Community. The sanctions has to be on the nations who are recognized by UN to be abusing. Those individuals who are involved in massive works, to harm the others, especially the children. There has to be, not talk, but a reality.

One of these talks we open very directly in one way or another. We cannot reach peace, if we don't find out we have to forgive and forget, for those who created animosity and atrocities, and then to feed it.

So my wish, my request to the UC is to elevate the members of the negotiating teams on all sides, that they put away, (2:56). their dogmas, and be there to create a new condition. What I said, to the Iranian leadership is very simple, we are the only nation who has been sanctioned for knowledge and T. Then it's formed in other shapes and forms. 80 million people suffer, because their scientists are too advanced. And the others have no access to the knowledge.

As I said, before, we open the doors of Iranian nuclear T, as it is obsolete to us, we don't need, but we still do research, because we need to understand the mysteries of the creation. This process will carry on the same. This process has to carry on the same. We see different ways of approaching the present problems, but the 5plus1, will be used to, in a way, open the eye of the man to the new realities. Sanctions against knowledge, where we gave knowledge in exchange for peace, from the same nation who sanctioned.

We have to stop what has been, come 40 years of imprisoning for millions of people, in Gaza Strips, and ?? We have to bring peace between all the nations through our knowledge and T. What's the use bringing peace, when our children suffer. The nations like Belgium traffic children heavily, and we put the center of European, what we call organization in Brussels.

I put a question to one of the diplomats very recently. Are they all the member of the European Council, going there, (2:58). because of their reputation, Belgium state. Why Germany, France and England put sanctions on Iran, but they do not put sanctions on a nation, which UN found them to be the center of the child trafficking.

The European nation has to ask its members, are we sending our members to European, to Brussels, as they are part of the same game. Or if they aren't, why don't they stand up. We have a replacement in Strasbourg, we can move.

These are the questions which need to be answered in the coming time. These are the questions and elevation, the UC has to bring to the soul of the members of 5plus1. With understanding this, we need to bring the change.

Protection of our future generation which are born of both dimensions of the soul and physicality, should not be jeopardized by those who are the centers of the abuse. Football coaches in Switzerland abusing children, the same the priest's did in Austria, in 2005. allowed to be going on. We cannot allow what we call, the states which are involved heavily in trafficking humanity across the borders.

The question for us to solve in the next few months is by introducing the .. flight system, that we do not allow these systems to be used for these kind of trafficking. We need in 5plus1 to negotiate a new understanding of the border control. Or accepting the totality, that we bear the responsibility of the totality of mankind. (3:00). Five or ten minutes from Johannesburg to London or Paris, or to wherever else, should not become a tool of what I call child trafficking. We have to solve these at ?? source, then we have introduced a new T. The guidance and the support of the UC is sacrosanct, their responsibility sits within the soul of the UC members, support team.

We start the negotiations sometime in the next 3 weeks, in Vienna. But it has to become in a way, "5plus peace," not only for arms, but for our children who have been abused heavily by the traffickers, and they see it as their right. It needs to bring sanity to ?? , to what I call, "mind of those who allow one, and they sanction the others their knowledge." I wish the UC has understood our wishes. And we wish for ?? ?? it is for those who understand, to put in action that it elevates the STM.

Thank you for the teaching of today, we hope we meet each other next week.

(3:02). R: announces about 5-D conference

(3:04).

R:

Anything to add ..

K- We have participated in conferences with them, 2 or 3 times before. It is just to enlighten with the new knowledge and what is to come.

We have a small thing to clarify. KS asked for job in KF process, factories, no knowledge or background, they say we want to learn to come to be there because then we can do things. (3:06). At this moment in time we need people who can complete a process for us

...

Austria is one of the most expensive places to live. Don't be fooled by 2000 Euros per month, lucky to have few penny's left...

(3:08). if you requesting KF as KS you go through the Austrian process of work ..

(3:10).

Shall we call it a day.
