

408th Knowledge Seekers Workshop; November 25, 2021

Note: Transcription has not been checked by KF. Please listen to original recording.
(Transcription by KF Brazil)

Expansions of KF worldwide, universities, Institutes, Enhancement centers, Calling on KS to be part of KF universities and research, KS responsible to elevate souls of negotiators In Vienna to bring out technology, Produce 100% pure radioactive material to go to space; Field Replication Units; Hydrogen Plasma Energy; Concentrate on elevation of souls of 5plus1 negotiators, to bring the change.

Quick Index:

KF starts institutes for research, first year 300 KS will be paid; 1000 research groups by 5 years; Keep ethos - families stay together; 1,000 Enhancement Centers across the world; 30 factories setup in 2022; 5plus1 peace negotiations in Vienna; Mr. Keshe on stand-by in Vienna; Universal Council and KS job to elevate the soul of the negotiators and leaders; Ridiculous to sanction for 3-5% when we have achieved 100% pure radioactive enrichment for space technology; First time shows video inside Exhibition Center Linz; 5plus1 members will visit center in Linz; KF flag - Iranian flags next to American flag; Raise soul of negotiators to truth of new technology and share equally across planet;

Teaching: Enhancement Units will show man both STP and STM; STM continually makes plasma explosions like the sun; Left and Right brain have to merge into a single brain structure; Soul has to react to both sides emotionally; STP and STM work as one not 2 halves; physicality does not need to die - soul embraces it; Birth of Mitra will create a balanced field shape for the brain; Emotions created out of interaction between STP and STM; Emotions come inwards and feel peace - see the light; STP can go within the STM and create a new D of life; STP matures to accept becoming part of STM; Electron enters proton; Paper on "Inter-atomic fusion"; Selected number of mankind will go through this phase - ignite the totality of the change; Souls amongst you will teach you - part of Soul of Mitra; EU are for elevating the STP to see STM; Depends how much reality you have to face; Using the fields of your own soul instead of Gans's; Races in space who have matured physicality have thin bodies; Drop of soul to create fish or the man - in to the fish tank; Called "resurrection"; K carries a box of creatures of the U with him; Different salinity creates races of man - organs - etc; Cataracts change salinity of eye; Brings out Replication Unit early - soul has matured to receive knowledge; Understanding intention and the soul; You are the Replication Unit; Just look at a cow and be fed without eating; We already replicate on emotional level - why not physically; RU is Holy Grail; Uprising of Belgium's to take over KF dismiss K; Changed the chairs - cup of love - revolt converts to spreading of T worldwide; Criteria for transferring a soul and then elevating it; Mitra is the orange carries all strengths of creation and Creator - we are the Cups to receive; Mitra enlightens through the soul; Mitra's soul is the soul to bring the change; Soul of Creator is already replicated within us - but we are blind; Mitra is the lover - Romeo and Juliet; Take from Creator give back - point of balance; Material world have vibration - Pl is interaction of fields; Why this planet 50 Hertz?; All KS together create a spectrum of field strengths to match with the different negotiators and leaders - covers the lot; Elevation is already being done through Mitra; human race is about to mature;

Now we have the communications connecting whole planet; Those who work for KF will be taught the ethos; Love of the knowledge - love peace; To take soul out of body is most joyful thing; Lots about hydrogen (H) plasma energy >>> Convert H into energy before using - doesn't damage environment ;
Man has been taught beyond transmutation of elements to transmutation of energy; matter to energy > plasma transport > back to new matter; This is the key for mankind. Breakthrough comes when negotiators see how wrong they have been.

ENGLISH TRANSCRIPTION

(:09).

K- .. About the institute, is that very soon, the institute from a .. virtual phase, will go into the reality phase, as we are setting up of the structure of the institute as a teaching organization, as a, what we call part of the work of the what the KF is setup to do. That the next generation will have universities, have buildings to go and do tests, and a lot of other things. One of the things that which we are considering, and is in progress, is most probably by January, we ask you to submit projects for research for 3 years, to the KF. With it a team of specialists and a number of Knowledge Seekers (KS) who are first, understand the work of the KF, will assess these projects, and then you'll be invited to bring a team together, to do the research in KF .. institute buildings.

In a way, from January on, the company of the KF institute will invite research programs within the university, you'll be paid a salary, and the team you put together will be the same. You'll be employed to research for a period of 3 years, maximum, and we invite up to the first year, contractually, to 300 people. Then in the second and third year the numbers increases to 500 research group, and by the 5th year we increase to 1,000 research group. Which means if you had an idea, (:12). if you have a concept that you can work, and our assessment team assesses, that we can support such a thing, you'll be invited in to start working. Then you'll get a backup of the KF administration, to support you in every way, to reach that point of research & development.

I am not a follower, and I don't believe in giving one man given a chance to do whatever, in the lab as 1 year PhD. Because the knowledge has to be shared, and you are asked to bring in as a team at least 3 to 5 people, each team, that you are not isolated on doing 1 paper, or doing 1 research on my own. Collectively you have to bring in, at least 3 to 5 KS from around the world, be it professors, be it the others, on a full time basis into university, into institute.

We are not in institute teaching from the basics of the what we call, the T, we want those who are innovative, and they can bring and they would like to do research, in any part. There is a financial setup for it, that it will be budgeted for your group in 3 years, with all the equipment you need, and all the salaries that you take, and then we see how the development goes. If it expands more and you achieve a better result, then you expected,

or we see a position of change and development, you'll be put into what is normally called, as spin-off, but we call it additional researches program, which means it will be given the structure, just do the research, (:14). put a management around you, to develop this into a .. full scale application.

KF has set this up in a beautiful way, in a .. planned structure, we hope by next September, accommodations for this in major cities like Vienna, in AZ, Tehran, will take shape. Which means in 3 centers at least, we'll start this processes. But your projects have to be meaningful. It's not just doing something for .. just to see if it works. It has to show it has a progress, .. an end coming. and this will be advertised across all the universities, space institutes around the world. KS are not privileged, just because they are KS. We will bring from all over the world, a budget, for each project is set to take shape, 1 - 2 million. Instead of you doing something and then finding somebody to finance it, that it can go further, we reverse the position. We budget the finances for that project from day 1, and the funds will be locked. You are responsible for it.

This way you don't have worries about how things might go, with it we have a budget. Each year we can support so many projects. With it we allow from the beginning the process of achievement to succeed, not if the results comes, then we succeed. (:16). You have to make a team of at least 3 to 5 people, and then you get the backing of the KF management team, which is getting put together, to oversee your work. You're just being involved in the R&D, and the funds for it, from day 1 will be in the account of the research group.

This is the departure because we would like to achieve very fast developments for the institute, that with it, we can extract the talented ones into the next steps of the further .. space T development. The KF very soon will announce, you'll see it, and you'll be dealing with .. limited company, with a full responsibility for everything else. Then the spin-off, as part of our intellectual rights, signed a different part of the KF, and different companies around the KF, will be spread into .. application.

We invite you to join KF institutes as researchers, many of you would like to do research. The fees for the ... the salaries are in line with the management structure. Which means we don't give a little as is traditional, just for you to do research and have something to live, we treat you as a finished end doctorate position, that you work with comfort. You can support your family, you don't have to worry about other things.

KF has had this tradition, but now we do it directly inside and outside. We did that in Ghana, when we paid the first graduates, (:18). fees, and wages, and parallel to the European wages, and we ran into problems with the Ghanaian ministers, that their students were earning more than the ministers. We go back this time, we find our finance from inside your work. Think about it, talk to each other. You have to be relocated, which means if you work in AZ institute, you have move to the institute in AZ with your family.

I don't believe just because you do research you have to be broken up from your family. Whole family, that is what KF is to make, one family from the whole nations. How will we breakup a family for a father or mother, to go away do a research for 2 or 3 years and commuting back and forth or whatever. This has to stop. So we work as one structure. We consider these before we take you up, how much does it cost us to support a family. You can bring your husband or wife into the work of the university or institute, talent or whatever, that you become one. This is the whole purpose, and I set this structure that way.

It's important for us to keep this ethos going. Even today the KF, number of the individuals who have joined us we brought their partners in to be able to be even a part time, to work together, to keep the family together. We have now a number of families now joined the KF in this process. It's the whole ethos of us, we are not there to make profit, we are there to bring the change, because the profit is the happiness, and the way we bring T out, and the way we can spread it.

KF institute will start, (:20). receiving applications from you and we have told other people who work with us, the scientists who want to do the research or do the paper, they do it inside. We bring them in, with their teams from the universities, .. space universities, and education centers. So please think about it. You have an idea, we don't look if you have a BSC, or you have a masters, or you are a PhD, or you're a housewife, or whatever. The thought which counts, in the U. It's the talent, which counts and not the papers, which man has made with, what I call, ridiculous names to it.

This is vital for all of us. We have a structure set for university, the company is set up by the KF, will become part of the subsidiary of the KF Austria, as Austria becomes the headquarters of the KF international work. AZ goes under the leadership of John, and in Tehran goes under Josef. The structure we set and all that will be separately financed by the KF, as a whole to start a new structure. In a way, whatever you do become research papers, that gets published in your name, and we want to change the condition of the work. Most of the people who work around the KF they know we don't work 9 to 5. We work the way we enjoy, 5 to 9, in a way, work never stops. We always are there to support, and this is the way we want to change it, because the new cycle of life, working is a pleasure, .. a comfort, we don't need to worry about how it is, the things, as I said, is a leadership, that has to change things, (:22). and we are setting that up. We set the structure for it to go.

So if you are a person who thinks, there is a talent, or an idea, we send it to 3 or 5 KS what you think, and how you see it to progress, and get a positive answer, then it is your job to setup your structure to join in. We see this structure to be in position by September of next year. In a way, for you to start around that time. We have structured it, we have financed it through the KF, and through private financing, that there is no need to wait, "something might happen." I set the structure of this to see how it works, a couple of years ago with Knowledge Seekers (KS), which we said we give them a budget, and I wanted to see how KS worked with each other in different groups, and how they structured it. Some of these groups are very talented, we have earmarked them. We invite

you to come in, to work as a KS, if you want, to carry on with those researches,. But this is in the coming months, after January when we turn back into full operations as next 10 20 days is by the Christmas and most of the western world goes into hibernation in getting joyful with the birth of Christ.

The other point that we have to bring up, is the structure of the setting of 1000 Enhancement Centers (EC), Wellness centers across the world. This process is in process of being completed, most probably by .. mid February, then we announce so many Wellness centers around the world, for the following month. Because we have to tune it, (:24). with .. manufacturing production rates, with all the systems. This will go like this with 5 or 10 cities per month, to be announced ahead. We mass flow, we don't just open one place and wait for the others. As fast as China Construction can build the centers for us around the world, we tell them we can support so many centers. Now we have gone into the rhythm of doing this.

The next thing is the Water Power Production Systems, which many of you've seen, we started in Ghana, we had a good run of it, we understand the process. And then water purification, and water directly to be used the way we tried in Ghana will come into operation. We setup about 30 factories here and around the world to be done in 2022. We have brought in a massive capital investment into the KF, and now we bring the management to control it, the financial structure to monitor it, and to see the development of the KF, through its own institutes and universities.

Think about this and see where you want to be part of. We are not in to make profit, we are in to make the profit to work for all of us in different ways. In 2022 - 2023 we'll start structuring the first space centers, which means, what will come to be the flight path systems, and the development of the flight path T. This comes on the back end of the June & July, and finances for this has already been sorted to come into operation.

The KF as of 2022, becomes an international structure and with the companies and organizations, which we have, we'll back, to become the center. (:26). So think about it, and see where you want to be. It's not that you are going to become millionaires and billionaires on the back of the KF, I hope you do. But KF is there to make an international what we call, presentation, on this but in a very rapid understanding progress of development.

On the other hand we go back to what, last night the Universal Council organized what we call, "to support the 5plus1 peace talks in Vienna." I am in Vienna on a standby, as a backup end of the peace talks, to what we see, to bring the change. In support of the Iranian government and Iranian nation, to support, to show the reality with the whole situation, not the false fabrication. This is one of the problems that negotiators will face, in how to handle the facts, and not the fakes. As we said, we've seen how world leaders use pictures of even KF, to create mayhem, and lies, and deception. It's our job as KF to show the system we built is for peace, and not what it has been put forward by some world leaders, as a tool of war.

As I said to the members of the UC, in a meeting yesterday. Up to now we supported you, we taught you how to support your physicality with machines, then we gave you the position to opportunity to bring the world peace, (:28). which, with the soul of the wishes of the KF, and UC, and the KS we have achieved that point. Now we come back to front, I do the physical work of handling the governments, it's your job as the KS, to raise the soul of the world leaders, who are involved in this, and behind this, to understand the merger of the new T, which changes everything.

As I said last night, and to Iranian and American officials, it's ridiculous when Iran is sanctioned for, being put pressure under, for not going more than 3 to 5% enrichment that, they might create nuclear bomb. Where in the KF T we need a 100% pure enrichment of any material, that when we use it in space, instead of ending in A, we don't end in B, because we tanked the wrong fuel, wrong energy combination.

Now you understand the dilemma the world leaders are facing, and this is where the KF takes the leadership in the world. We are sanctioning a nation for not reaching 3 to 5% above, that they might make a nuclear bomb, the same nation in research centers, is developing 100% pure plutonium, uranium, to be able to achieve perfect flight.

This is where the dilemma sits. This is where you as KS are not there to unite, as I said yesterday to the meeting, but to enlighten the negotiators, to see the reality, the change. Then we take the next step. We sat here for 3 days, the Iranian team has arrived, the Americans and the rest are all sitting here. There is going to be a negotiation, and Iran will not produce a nuclear bomb. (:30). Iran never needed, because now we have a T which we have to enrich. Americans, Chinese, S Americans, S Africans every nation, whose is going to be developing into the space T, of future, has to have capability to produce 100% pure radioactive, of high quality materials, to be able to be in the space race.

We cannot say we are the only ones who have it, nobody else can come into space. With the knowledge we have brought all the nations, because you are from every nation on this teaching, have we become part of the space T, and 5 nations cannot say, you cannot have 100% pure material, because you cannot go to space, because we are the only one who can be. Use your monkey suits, use your what I call, "fire-crackers" and stick to it.

The world has changed, and this is what I told you, we need you as KS to raise the soul, to elevate the soul of the negotiators, to see that, how embarrassing situation Iran is sitting in. If you remember Iranian leadership, this year, in 10th February released our name. My name, in fact, the name of the KF, as the knowledge which was used, as the P1 T that the man can go to the moon in 1 minute.

So we need to raise, what I call, understanding, the soul of the negotiators, even the Iranian negotiators, that the game has changed. This Mickey Mouse game, that you are going to have something, and then they say, you can't have it, you are going to be punished, has to come to an end. Because the reality, and the fact of it is, what are you

fighting for? (:32). What are our world leaders fighting for, when you sit and see the most advanced T is sitting within the hand, within the grasp of the KF.

In so many ways, what I call, the new plutonium, uranium production unit is sitting right in the center of the KF Exhibition. They are fighting for 3 - 5% enrichment, we can give you 100% enrichment. We tune our systems to produce, .. to be, what I call, in accessible to produce, and as I said, last night, and as I showed last night, we are not hoping to achieve, we have already achieved this fundamental change. What is interesting, as I said last night, (shows materials produced by EU) the proof of the pudding is in eating it. This system knowledge, produces materials. You can even tune to what isotopes in matter state we need.

But you have to understand in EU materials we don't make the matter to go back into a Gans, we can produce the Gans of the plutonium directly, which becomes an energy directly. In reality, .. all of you understood the fact, that all of us, as KS, have been sitting on the most advanced nuclear reactor for space T in, (:34). .. the KF. You've seen in different ways, and different applications, for years the KF nuclear based total .. flight systems, have been sitting in the centers, we are not going to show, we are not going to have, we already have the knowledge. So we can deliver it. This is part of what I said and I keep on emphasizing , the KF has the capability, as the KS to bring that change, .. that beauty of the knowledge, that our governments, or what I call, people who think they are governing, are not deluded with 3% enrichment.

What are we going to do when we produce, .. the enrichment. What are we going to when we achieve 100% and then, do we need to dilute it to keep some people happy. Do we need to understand the process of change? Do we need centrifuges which costs millions, and that it takes more time and millions to produce 1 kg of the plutonium or uranium in a matter state. Then we have the beauty of the new T and knowledge. What it is, what is important for all of us, is to understand the beauty of the new knowledge. Where we bring the change. (:36). Where we are in control of the change. Where what we do will bring that change. As KS we are responsible for it. As KS we are there to make sure, it can be shown. The steps in development of the T is huge, .. in what is achieved is huge.

In so many ways, what we have is change of course. We've done the production of materials. We've done everything possible. Now it's the job of the KS to enhance the soul of leaders, the decision makers, that what they are sanctioning one, for very little of it, we are delivering one, for very little of it. Rick I sent you a video ... maybe for the first time you see the inside fully, of the KF EC, and the center piece is the two Iranian nuclear reactors for the space T development. In a way, we bring it forward, we change the position, and direction, and D, that we can show the changes. This is what we need to bring as .. a program, the work of the KS and the KF, and us, in this situation we are in, in Vienna. Rick have you received .. for the first time you'll see ..

..

Plays video .. you can play the sound, .. (:38). it's addressed to the Iranian leader, AK of Iran. This is a private collection which shows the power of Iran in negotiations. ..

(plays video ..) shows reactors in Linz KF . You can see the Iranian leadership is fully aware what is happening, and what we are. This is important for the KF to show the power of the knowledge we carry. This is the KF in collectiveness of .. change of position in the knowledge of man. You see the 4 nuclear reactors, which we are familiar with now, is the center point for discussion in .. Vienna. You can see how beautiful this center is. This is the first time what you see, is recorded for his eminence AK of Iran, the Iranian leadership. To understand how we are going to handle the new knowledge and T. Is a beautiful center and we wanted for the first time, you as KS, and the Iranian leadership, and I am sure the American leadership, to see the beauty of the inside of what we call, the nuclear reactor, which needs the pure material, 100% pure plutonium and uranium. If the Americans want to stick to 3 - 5% how can we negotiate it for the same nation that produces 100%. Because we want to go to space with you. (:40). This is where the intellectual right comes in. Where the T in exchange for peace comes in. Where the beauty of the whole structure of the change, which all of us as KS have set.

You can play it again, because I think, you have to understand the changes which have come. Slowly I explain to you. You see the Body Enhancement Unit (EU) in the background. You see the Vertical EU, what you see at the same time, immediately, the 2 Iranian space reactors, nuclear based plasma T. You see in the background the Matter EU, matter production unit. On the left of these 2 white steel ones, are the Defense T, this is where the Americans got wiped out in Iraq. The T blocks, absorbs, and carries a high density field. Then as you see the EU, you see the VEU, .. in a distance the new Brain EU, which is sitting, and standing in the exhibition, ready to fly to AZ. You see the knowledge of the KF in the spaceship center is there. If you look above, on top of the pictures, you see silver domes, the spaceship it is on top, these are like the old fashioned, what we called, rocket propulsions, which lights into .. the Exhibition Center (EC). Downstairs are the conference rooms, and .. the television center, and the rest of it. We have set a beautiful center for world leaders to see, understand, and to enjoy. You see the background the step by step, the books, the Gans's, the Cup of Life, the agriculture unit .. (:42). The knowledge of the KF has been centralized in changing the world.

World leaders and .. the members of the "5plus1" will come into this building in the next few days, to see the change. To understand how graceful the nation of Iran and Iranian leadership has been, not to abuse access to this knowledge, ?? and trying to prove their a superpower. In fact, the Iranian scientists are superior in every aspect in knowledge of the space and defense, but never they spoke with it.

This is part of our work in these negotiations, to show, to bring, not fame, but to bring to attention of the world leaders, while you think you are on top, you are actually on the bottom pit of knowledge of the space. You can still see the rockets above, and below you can see such a small things can bring such a big change.

It is our job, . responsibility as KS to understand the change, .. how delicately, how beautifully we can bring that change. We can change through our knowledge and nothing else. We have to understand where we stand, not how we've been hammered, that we are this and that. Once one of the largest organization in the financial world, wrote

recently, as I said, "they can write whatever they like on Internet, but we know what sits there, and what has to come out." (:44). We have the T and the knowledge to push through for world peace, and we'll use 5plus1, as a what we call, the spring board for the change. You fight in the conference for 3 & 5%, you'll negotiate for 100% with Iran on the other hand. The two doesn't work.

There is a need for understanding, .. for elevation of the soul of the members of the 5plus1, which is now, they come to your hand. You wished for the peace, we achieved world peace. We don't see wars, even if they try to start a war, the governments will stamp it down, because there is no weapons for it to go. because they can't even move soldiers.

We went for what we call, "health" situation to dominate. Now we see even in this picture in the background, the EU for Corona and the rest. If you play this video from the beginning you'll see in the background, something very interesting, that maybe you have missed. ... You see all the latest T in the space development, and then with one flick you might see something in .. stop it there, you just see it in the background, a little. The what we call, the VEU, which was shown originally in past. You see the Corona suitsthen you just see the edge of the black vertical EU.

Everything, the knowledge of the KF, (:46). sits in the EC. We sit, we change, to bring the changes. We have set the scene for one of the most prestigious centers, for the world leaders to come in. It has been set. In the past few days. As I have shown you before, and I explained to .. in the American teaching, a beautiful picture of the collection of how we sit, how we do things, and how we expect to change on the same banner, on the same structure, on the same wave for many of you which might, or would like to see the change.

The understanding of the work of the KF, comes from inside, from our strength of knowledge, from the strength of the T, and we will bring this. In so many ways, to show we have no boundaries. KF knowledge and T belongs to all of us, irrespective of the boundaries which man has made on this planet. We bring peace through sharing the knowledge equally. As you have seen, and many of you are aware of our work. We stand to bring the change, .. that change in a beautiful way for all of us. For our children irrespective of borders, nationality, or race. We share clearly our knowledge with everyone, and it's your job to bring that position into the front. (:48).

In many ways, we work hard, we play hard. We have paid heavily with our work, with what we done to keep the knowledge and KF, all of us in the front. This is what we stand for. It is what the KF as a whole becomes One Nation OP on the different banners and names we have chosen to be, and how we decide to change this, it depends how much we believe in our work, that we can bring that change, that we can change the situation in a different way than we thought. In a way, much, across this planet work, that we as KS make sure, that the flag of the KF stands proud wherever we might work, .. be, irrespective of what we are.

We've become the symbols of peace, .. the KS of peace, and many people don't like it. But with the Corona situation today, nobody has a choice. We are trapped in this dilemma. Sooner or later we will come out of it. We will show that, in so many ways, we have changed the scene.

This is the EC in Vienna, the flag of Iran as a center of the knowledge, not a nation, stands next to an Austrian flag, in an Austrian .. EC. (:50). We go to US where the flag of Iran stands next to the American flag, irrespective of the position. But what reads on the wall in the center explains itself. "One Planet ON OR bringing peace through T." This is the work of many of us. We see the same thing in the KF manufacturing in Iran, where we share the same in AZ. And then the same in China, .. Mexico, and many more factories will come. Even in Iran the flag of the KF stands next to the Iranian flag.

It's taken 50 years of work to be able to see this. And very soon in the coming months we'll see more flags of nations, where the flag of the knowledge, bears the flag of what I call, peace. We are all in an essence, "one KS" and the collective knowledge of us, brings peace to all of us, and then makes us citizens of the U. We sit equal irrespective of the flag we stand next to. The flags are just a symbol, but what is inside us counts as one, (:52). and we invite you to raise the soul of what I call, the negotiators to see the difference between the old and the new, and how we got stuck in the old version, and with it brought many sufferings, and wars to many places for no reason.

I hope, I brought you home to see where we stand, where the KF KS in .. every corner of the world stand, irrespective of flag, and what we are proud to be. You call yourself, "I come from US, from such a state." In the space you say, "I come from earth, from such an area, Iran, Iraq, China, and then would they know. "Can you show us what it is, where it is." How come you changed so much in so little space, for such a time things were rotating in the space.

Then the beauty comes in diversity and this is in fact, if you look, the beauty in diversity. We have put have put position, that we are ready to share the T with all nations, irrespective of color, race and religion. Nothing puts it in better way, than what you see in AZ. Hopefully we'll bring that change. It needs the back end now, which is, as I said, your exercise to raise the soul of the leaders and the negotiators to see how foolish it is. Which end are we going to negotiate, 3% nuclear or 100% space. And we sanction Iran for 3%, and we have to work with Iran for 100%, doesn't make sense. (:54).

It needs a lot of pride to be swallowed, and a lot of joy to see where the change comes. In our talks in negotiating teams, in Iran will emphasize on this, right through, with all the nations. It's the responsibility of the Iranian negotiators to be enlightened, with what they have, and not get involved with the dogmas of the religion, and what the path of belief is, like the others. I hope, I brought you some understanding of where the KF stands, and as we are in Vienna pushing for the start of the negotiations, to be the right way from the beginning, you support us as KS, to bring that space, and the time and the place. As we always said, "we are proud to be correct humans," and then let's see what the rest comes.

TEACHING STARTS HERE >>

In the teaching of today, we go back to the essence of what we talked, and what we set up, in understanding the totality of the knowledge. Understanding that how we can bring the position of the physical D of the man, into the position of interaction of with the Soul of the Man (STM), interaction with the essence of our creation. Many of you have a dilemma, how to bring the soul in line with what we call, the physicality. Where does it start and where does it end. In one of the EU you've seen in the background, (:56). such a facility for you to know both souls is set. It's there for you to understand and see how you can connect the 2 together, that one is not a stranger to the other.

As part of the work of this process, it is essential to understand the process of conversion. If you understand this, you have handled half of the problems, what does this mean, you have a soul, with a massive energy, like a sun, sitting in the center of your body, and it has to all the time, adjust itself in releasing, with a kindness with its own structure, that brings the possibility, that the Soul of the Physicality (STP) can interact with it.

If you've been to previous teachings, the biggest problem for our soul, is to be kind, is to be, in a way, structure itself, as what we've seen on the surface of the sun. We see huge plasma (Pl) explosions, we see little Pl mountains. The STM continuously does this. But these eruptions, and these ups and downs goes, in interaction with the fields coming from the STP of the man, (:58). will give the right emotion, the right feeling, in a way across the brain ..

As I said, once before, it's very complicated, how this sun, this soul, has to behave. This is your right brain, or this is your L brain side, looking at your soul. This has to handle the physicality, and this has to handle this physicality, because it's the way it's structured. You can imagine, on one hand you are holding a ball of fire in your hand burning, and on the other hand, you are holding the hand of your lover. How does this soul inside reacts, and what does it produce, that either one, has its own emotion and own feeling, what radiation it radiates, that you see and you understand.

Controlling this, is part of what you have to understand about the creation. Eruption on what end, and joy and happiness, on the other. When you can control the totality of the emotion in a balanced field, then you will create in a way, a totality of one field with a physicality. (1:00). Then you will understand the 2 emotions become one, and this is the time when the man will take shape to see as one. Is not 2 parts, it's not left and right. It's when you understand this, is the time when you are ready to take in to the next step, because this, at that point, will shine, and will grow out, and it becomes one. The fields of, not the Pl of. Then in interaction of these fields, with the other souls, will give you the what we call, the emotions, the understanding, the interaction with the soul of the mother, the brother, friend, somebody from the other part of the U, and many other things.

The what we call, prophets of God, what we saw with Solomon, is interaction of these fields, and nothing else. It's understanding this process, and nothing else. It's becoming

part of, and nothing else. It's being part of and nothing else. In so many ways, we have to be able to understand the process of creation and nothing else.

In the new EU we are set to do this, we are set to create that condition, .. to bring the .. the change needed for this purpose. This is .. , (1:02). what we asked U Council to bring the STM into this position, that the knowledge of seeing the totality, will bring the change to individuals. In the ?? middle of that center, is the collective soul of the Universal Council, and outside is the collective STM.

Now maybe you can see how we try to bring the things together, how we try to iron out, what have been discrepancies in understanding the existence of both for the man. Where the STP and STM, work as one, not in 2 halves, not in the right and the left. This takes the dimension (D) of bringing what you have, the physicality of the man, into the position of totality of the man. Where the physicality does not need to die, but the totality of the soul embraces it. This is what we will see, many of you, when you enter the EU.

Many of you. There is a system here which we have not shown, and it's not in public domain to see yet. But advertised in a different way, for the horizontal EU. In those units you'll come in touch with your own soul and the STP, because then you have to handle it. Then you have to understand why do I have the cancer of prostate? Why do I have the cancer of breast, and what have I caused, what have I done to myself. Do I need the elevation of my soul, that the STP reaches and sees enough, (1:04). to change the D, that there is no cancer. Then you understand the progress, the development of how you first have to understand the composition, and the way you are built inside, that you can understand, how you can change the outside.

The biggest problem for man is the 2 hemisphere brain, and part of our problem with bringing the human race out of physicality into D of the soul, is the physical structure of the brain. With the birth of Mitra, we look forward to the change in the process, that the brain .. in the due time, will take a balanced shape field, that is aware, and in the space will decide, on this side, at the strength, to be this shape. On this side, on earth to be the man. And on this side on the planet, whatever, be what it allows it to exist. Mankind has to learn the two phase, the two part, the STP interaction with what we call, the creation of the emotions, has to be brought into the surrounding area of the STM, that what happens, the outside does not exist. This is what happens to you at the point of physical death of today, as I explained before last week, as your emotions from outside will take shape, and comes forward in, (1:06). and you see, and then it becomes a peaceful place, then you see the light. It's the time when you are directly, as a physical soul of physicality, in touch, in front, of what I call, your creator.

The choice is very simple, to become again, the STP within the structure, or allow the STM to exist, and bring the STP within it. Then in the future, how you want to manifest yourself, it will come this point (from STM). It's understanding the knowledge it's the process, that you elevate the STP to become mature enough in the strength, to be able to accept, to become part of. Then go back and read the paper written about "inter-atomic fusion,' where it is not about atoms. It's about how you can bring the STP inside the STM,

an electron to become part, within the structure of the new .. proton, to create a new D of life. We think the mankind is ready for this transition. We think mankind in selected numbers, gradually will phase through this, and will see beyond it. (1:08). There are a few souls around the KF which have reached, and are about to reach that point of maturity. They will see, and through them they will ignite the totality of the change.

In a way, we have brought souls to teach you, and these souls are amongst you, these souls will come, because they know they are part of the soul, and interaction of the Soul of Mitra. They become the teachers, some of them silent, some of them verbal, some of them the combination of the two. The time of Gans making, and Nano coating, and understanding the Gans's and PI fields, was to bring you to this point. Then when you come to that point, the interaction of the fields of your body, it dictates to you, how you'll manifest, you change the PI to the matter state. Conversion and transition between the matter states and energy. The what we call, maturity of the man. The end of the what we call, "the final day," when the man matures to the totality of the conversion of the two. Not in matter state, but in the state of understanding the totality of the knowledge.

The process of elevation of the STP, to see the STM, through the EU, (1:10). is already been set. It depends how much of it you need, it depends how much of the reality you have to face. If you remember, I used to tell you, go back to some of the teachings, especially those of you who have been in the medical teachings, where always we said to the people, that use our T for their wellness. When we used to give them a system, they always used to say, "how long do I have to use it?" We always said, "you will know when the time comes," and after a few weeks, and when they used to come and say, "sorry, I have a problem, I forgot to use it." "Or this week I forgot 2 or 3 time to use it." To them it was something they did wrong, but to us, was that the Soul of the Physicality (STP), was elevated to the point, that they didn't need support of the systems anymore. Then I said, it's okay, you can bring the system back and we destroy it. Because we brought the STM in a D of his physicality to be elevated, that the STM could not see any fault with it. It was elevated enough.

Those days we used to use magnets. Nowadays you use Gans's. And today you use the fields of your own soul. It's the same fields, (1:12). but according to your intelligence, you release the knowledge. Physical magnet, D of the Gans's, now the D of the fields on their own without Gans's. Because you have seen one, you built trust in the other. When you go into the EU, we can still create those "volcanic eruptions," within one part or the other, if you decide so, because the STP needs adjustment through the brain and the emotion, that it all becomes one.

When you travel the depth of the space, and you come to those who have matured in the D of physicality, you'll see very strange structure, and when you are reporting, that you've seen what we call, very thin bodies, and whatever, or very thin structures, when you look into their physical brain, they are very nicely set, it's all one (brain is not in 2 halves), and when they release fields equal, the shape becomes very different, and because of the gravitational field of the earth, they take this shape. If I change the field next door, and they walk into it, because I changed the D of this, the soul will take a new D and shape,

and you will see it. They might become like this. (1:14). It's not a magic, it's understanding the interaction of the fields. Many of you will have that problem,

Now maybe for the first time I can explain to you the fish tank. There I explained before, maybe you understand, when I said, when I drop, a drop of water into the water tank, you shall see the fish. I don't drop, a drop of water of the physicality. I drop a PI of the soul of the fish, and the water, and the shape of the tank, will create the fish. Now you understand, I can drop the STM within the water, and you shall see, the man shall be created from it. Because the strength of the soul of the fish, is different than the strength of the STM. That's all it is, it's not magic, it's understanding the way the magic is done, the science behind it.

This in the New Testament is called, the resurrection. (1:16). I can resurrect you anywhere. The salinity of the water, is the salinity of the womb of the mother. It has no choice but to create the man. The salinity of the water here, is the salinity of the fish, sweet water fish, or ocean fish have different salinity. Now you understand, how I have been telling you for years, I have been carrying a box of creatures with me, because I did not make the creatures, I allowed their souls to be created where they want to be. For the body of the man to exist in the atmospheric condition of this planet, it needs a specific salinity, and with it, it manifests itself black, white, Chinese, yellow skinned, white skinned and the rest.

This is what the man needs to understand, and this fish tank, in so many ways, if you understood it fully, is the fish tank of the Universe. The way in the different salinity of the body of the man, you get kidney and the others, in the salinity of the U, you get the different creatures, according to the interaction of the conversion of the fields to observing condition, or attaching condition of the man, (1:18). or the creatures of the point. When something is invisible to you, is very visible to me, because my eye has a different salinity of water in it, that, that liquid decides. When we see cataract, when we see people who loose their visions, they loose it or change it, it's not just because, just that, it's the water salinity inside the change, that the structure outside has to change to fit it. It's like as I said, we change the temperature inside, you get the moisture on the wall, or you get the ice on the window. It's the same. When we reverse a cataract, all we do, we change the water within, salinity of the eye, and then because it the changes, it doesn't need that blanket. If you understand the knowledge, the rest is there to be done. I hope I shared some knowledge of the creation with you, and gradually you as KS will translate this, and transfer it, and comprehend it, share it with the others, the way they will understand.

Thank you for the teaching part of the day Rick if you want to go on a break. Krashmere will show some things .. (1:20).

<<< **BREAK** >> 408 KSW Nov 25th 2021

(1:26). Krashmere presents Christmas Bundle for KF manufacturing .. (1:28)

(1:52). (1:54).

Q: Comment I am very happy to be with all of you. Germany Bavaria .

Q: Mehrañez , ... (1:56). .. talks about her experience ...

(2:02).

Q: Jefferson, what do you have for animals ..

(2:06).

K- Thank you. We are all doing our best to bring the change ..

Any questions

Q: .. Can you expand on the use of the replication unit. In what ways can it be applied?

(2:08)

K- Replication units have a lot of usage. We tried to keep away from it, in so many ways, till KS become more, gain more confidence in its application and its use. The field replication units will change drastically, in next maybe 3 - 6 months. Maybe sooner, maybe later, depends on how the KF, and sits to plan out for future developments. Field replication units are prelude to many advanced T, extremely advanced T. I have kept it away from the teachings, deliberately till everyone, or majority of the KS, and in a way the world population is ready for such a change. There is something very strange that many of you have not paid attention to. From the time the field replication units was put out, out of the teachings, and then some KS understood it, and tried it, and it worked.

(2:10). Is in fact, very straight forward, but very complicated question to ask, and only I've seen only 1 or 2 Chinese students. When I was in China, KS have understood small part of it, but they couldn't understand to expand it. Ask yourself a simple question, and ask yourself a very deep question about this replication unit.

I wanted to bring this into teaching, maybe next year, but you asked a question it means a soul has been enlightened, and it's our job to enlighten the soul of the others. When you look at the replication unit (RU), whatever they can, and you put an orange here, and you get the taste, the feel of the orange.

Ask yourself another question, you want to show this thing, how it works to a friend of you who is standing next to you watching the cup. You explain to him, that fields of the orange comes in, and then you can interact. Something very strange, the friend stands

here with a glass of whisky, (2:12). and in the other hand he has a ham sandwich. Then you give a cup to your friend to drink, and he says, "yes, I felt the taste of the orange and everything else." But the question to ask you is, you're standing in the same environment, how come he only tastes the orange and not the whisky and not the ham? You taste the same water, and you say, yes I taste the orange, but you never speak about the ham, and you never get drunk with the whisky. Why?

The reason for this, is what we call the process of the intention and the soul. Would you get drunk if you put the glass of alcohol, (2:14). the whisky over here too? And would you taste the ham & cheese in the drink. In a way, if you look at it, you had your juice, .. food, and your drink. Full dinner served, but why do you only go for the orange.

Then if you understand this process, then you go into the next phase of development of new cycle of understanding intention. Many times I pass in the lab, and in the ... packaging, and I see these things sent out by the dispatch unit, and they fill these vouchers and I say, "when are these KS going to become wise to see the truth." This is why I always tell you, you are the cup. If you go a step further, you are emerged in the cup, even with the Soul of the Creator. Then you understand why I say, 80% of the food we eat, is from the environment, and 20% we physically chew. (2:16).

These are the RU, it's for you to understand you are the cup, you are the replicator, but you have to understand how to get to it, how to use it, where to put the orange, .. whisky, .. sandwich. Then can I hold an orange, and taste it without eating it? Can I look at the cow, and enjoy, "nice rump steak." I would like a stew of the tail, and I would like the tongue, but you don't touch the animal. Is there something in the D of us by the point of intention, and expansion of the soul. Or is it, we still bundled, as I say, in the world of physicality, and we become ignorant to facts and realities of what these cups carry. Now who would like to be the field replicator? We know the field replication, we take, when it comes to emotion. But we refuse to do it in the physical D. We see somebody sad, our body, our emotion, which is again a replicator, absorbs it, and we cry because they cry. They laugh, we laugh.

We have managed to replicate the emotion, in a way, in the tank, in the saltwater of our body, but somehow mankind, when it comes to the matter state, has a bit of a problem to understand. Now, come you are choosy in what you replicate, (2:18). and how come you don't elevate the understanding, that you replicate, and then you see what the difference is. Is intention by D of what I call, strength of the STP, then you tap into the STP, to the environment and not with the STM. Where with the emotion you play with both. Now you can imagine what you can do with your field replicators. Would you look at a cup, and put field replicators (FR) around it, and you say I love you and everything else, and give it to your wife, says, drink it, I brought you a water. And when she drinks it, the way she tasted the orange, would she taste your love, .. your affection. Isn't that the Holy Grail? Now try to understand, what you can do with the FR. Do you want a field of an orange, or do you like to have a field of peace?

KS have been with me, and I put them through this without them knowing. (2:20). I gave them with love and affection, and then they change without them knowing. We had this situation, now you come back years later. Years ago in 2011, around that time, what I call, the uprising, setup by the Belgium's, to destroy the KF in Belgium. We could hear a lot of rumors, that they organized a meeting to depose me from the head of the KF. As we know the guy who died, and the person who left us, the KF, last year or 2, they were instigators behind it in a very hidden way, that we saw it again 2 years ago, the whole plan of what went on, to instigate, to get rid of me as head of the KF, and they become, and then they use the KF as a center of pedophiles for whole of Europe, that they are involved in it. Yes we open this book very soon.

The meeting was called in, and I did not oppose it, because I knew. You know, when Jesus said, "by morning you'll deny me 3 times." I knew what they were up to, and it was all set out deliberately, by the 2 instigators ... in the background in very a devious way. I called the meeting in, and the, (2:22). seating of the KF in ?? Nino, was like this, where if you came in, the chairs were set like this. The stand to talk was here. They all were ready to come to, as I stand here, to start what I call, revolt, to get whatever they wanted to do. I know the work of the fields. I took the chairs out, and I set the chairs like this. They had their instigators, knowing where they sit, that they could do the job. Now the circle was made and I sat amongst them. This way, those who were supposed to be starting the thing, the whole, what I call, the revolution to get rid of Mr. Keshe from the KF, and we do it ourselves, and hand it over to the Belgium pedophile groups, and the Belgium's, headed by the woman we kicked out recently, this and the one who is already gone.

I got up and I went in the kitchen, and I made drinks, and I served them one by one. You call it replication cup, I call it, the "intention of love" cup. What was to become the uprising, it became the whole process of what we call, unity, (2:24). because they felt the touch, the love of the man who was supposed to be their head, serves them. Christ did that with washing the foot. It's not the physical, what you do, it's the intention and the soul, and the beauty you give. And this meeting became the beginning of the growth of the KF so radically around the world.

This is exactly, when I tell you, we need to do this job with the negotiators in Vienna. It will become the uprising for the next cycle of man, generation of peace and unity. In this process we see how we become that cup of replication. We see how we can give a cup of life, not necessarily as a water, but even as a soul, and then to elevate it. We meet the criteria, (2:26). of transferring the soul, and the people around us become the cup, they receive it. But we transfer it with the level of the soul, through the intention to give unconditionally that you can pick from what you need. Then when they pick from one strength, and when it's fulfilled, they go to the next, because you are still here unconditionally giving, and then they go to the next strength, and go to the next strength, till they become part of you. When you give, you don't give one intention, you give the totality of the intention, the totality of the purpose, and it's just filling one, and going to the next one. When you give only one, that's, you're stuck with it, you have to establish the next one.

We see these things, you feel .. understand these things. Then becomes the cup of replication. Mankind is so physical, that he does not see the hidden knowledge we have put behind a lot of the T. Because that is the only way we can reach you. Then in the future maybe some people understand.

One touch makes you to fall in love, one look makes you to give your life for it. One word changes your life, because the word carries that essence of Replication Cup, because it matures you, brings you to the point of understanding. (2:28). When I got up and served tea and drink to the KS in Nino, one thing they had, "the guy is always above us, he is there he shares, and so now we can do." Now that man didn't exist, because he was one of them.

It's understanding the psychology of interaction of the souls, not the physicality, that's where I work with, and that's where most of you are still looking at the replication cup. This is why I said, it only needs one to change the whole lot. You look at one cup here, and you put an orange and you stand here, and you drink it and taste the orange, what this orange is here, will do if I make many cups around you. Is it only this cup, or is it all enlightened, and receive it. And would it have a different energy and taste, if I change slightly the salinity of each one, while you have your replication units.

Now you understand when I tell you, it needs one to be enlightened, and the rest receive. Is this the reason why I tell you when Mitra comes, she carries all the strength of the creation and the Creator. (2:30). This is what we said, Mitra is the collection of the every strand of the best fields of every creature in the U. So every cup in the U shall be fulfilled, does not matter where. When Mitra comes every strand of every soul ever created, and to be created in the U, is within her. She does not need to talk, because she already enlightens through the soul. She is that orange. It depends if you are emotionally ready to receive it, to fulfill your soul, to fulfill your emotion and physicality.

Don't forget, you asked the question, because it was the time to answer the question. Your soul knows it's the time to ask, and this is the time for a lot of people to understand. In physicality when you go, you see these presidents or PM or people who give a speech, they write a few questions and give it to some audience people, "ask me this question that I can answer." That is to support of us. Or they have been told these are the questions you are going to ask. That piece of paper with us, is a message from our soul to your soul, to ask the question, that it enlightens the rest with the knowledge which is spoken. (2:32).

It means mankind is ready to mature to the next level, by answering the question. Now you understand why and how. I said many times, it takes only one soul to mature, and enlightens the other. Get an orange, make 10 replication cups and taste all of them. Is it only one, which is taste the orange, or all of them taste the orange. And change the salinity and see how the taste changes. Then you understand, irrespective of color and race, religion, and position in the U, you still receive the beauty of the essence of the orange. That orange, that soul, which bring that change, will be both D of physicality and the soul, is the soul of the Mitra, blessed be the name.

Any other question.

Q: .. Can the soul of the Creator be replicated?

K: It's already replicated within you, you are blind to it. (2:34).

R: Could you expand on that ?

K- When we talk about Mitra, Mitra does not collect, or did not collect the rays of every race in the U, the best of, to create her child, her manifestation of physicality. You have to understand, that all these rays came from the Creator. She collected the totality of what she loved, from the best thing of the lover, to create the perfection, that she can feed back, to the lover. Not only I take, I give back, then we are equal in loving each other.

I become the source of manifestation to show your beauty. This is why with the birth of Mitra, we see both, the created, and the Creator within. The soul, and the STP within the tangibility of all. The meeting in the presence of Mitra, is not just that the human race will see them, but every race will confess to have ?? beauty in their existence, because they are all collected from, the same, the best of. She did not collect from the STP, (2:36). she collected from the soul of created, the best. This is what it is, and we have been waiting for this, for (since) the time of the creation. You call it, the "Adam and Eve," because we could not explain to man before. We gave you different names ?? (Arabic .. Hama) we call it the Sheena ?? in different languages, and Romeo and Juliet in the others. but in essence it's giving life for the beauty, collecting the best of, to show the creation of the Creator.

In so many ways, in term of what we call, scientific way, as I said before, it's the same. We always said, in another way, if you understand it, you go clockwise, and then you go anti-clockwise. Where did you come from? You take from the Creator, and what you get, you give back to the Creator, that you are always equal and in balance, it does not matter where. This is the beauty of the creation. And it is the same at every strength, that's why wherever you go in the U, you'll find every one speaks about the Creator and Mitra. Point of balance, point of manifestation, (2:38). point of confirmation of the love to give unconditionally.

As you give me unconditionally, I give back, to you unconditionally, for you to give back, and not to have gravity. For me to take back, I have to receive it from you, to have that gravity back. As I said many times in the teaching, if you are on this side and it comes to you, you are gravitated to, when you are on this side., you are the giver, M, but if you are the Creator, you are there, what about if you are the created? It's the same, but in a different direction, but in essence they are all the same balance. I made man to the image of myself, which means I created Mitra to be me, as a reflection of my own.
Any other question.

Q: .. Is it possible to make a system which allows communication between the physical world and the non-physical world through the adaptation of an electronic circuit through some of the Cup configuration, for example, the Soul Cup or the 5 Cups, and in this way

allow people on this physical plane can communicate with souls on a nonphysical plane? (2:40).

K- Make it and we'll see.

The important thing is to understand, in the physical world you work with the vibration. In the soul level you ?? link with the strength of the fields. In a physical world you have to create that ?? atom ?? that is vibration, confirm existence. In the D of the soul, you work with interaction of the fields, which have not reached the position of vibration. They have not reached the environment, that they try to penetrate. So they go through. The frequency ?? mode. This is something that in the future teachings we'll come to it.

If you want to understand the base of it. Why do we have a 50 hertz? Why does it best work around 50 hertz? Why an electron needs to vibrate, (2:42). at us, as an electric current to see it as 50 hertz. What about if the environment we live, works at 100 hertz, or 1 million Hz, or 10 million Hz. What would be the difference in emotion in each one? Don't forget still it's the same cup, the Cup of Man. The embodiment of life, man himself.

This is what when we tell you, concentrate and try to, as KS, to elevate the soul of all those who are involved in negotiations in Vienna, because in fact, there is many of them, as I said before, of all backgrounds, different kind of tastes, love, and hate and other things. When (2:44). we ask you, that all of you as KS, to give from your own soul, is because this one field strength of the soul, might be still spreading, but does not fit none to elevate, because it's at a different strength. This one might just about to fit this one, (one from KS to one from negotiators), but misses the others, because it's of the different strength. This one might fit half of this one. And this one might fit this one, but part of it, not all of it. And this one might fill part of the one, which the other one cannot fulfill. But when you collectively put together, you radiate the whole lot, and the elevation is the same, in totality you will fill at least 70 to 80% of it, which is coming from the D of the environment, from the STM.

Now you understand why we ask. It's a collective work to enlighten those, who have not been enlightened to understand it. We have KS, we know for a fact, we have KS in the negotiating teams. KS who learned the knowledge, and they have been brought in, in case Mr. Keshe appears, we can hit. Mr. Keshe comes we can handle. Such and such a minister comes we can handle. (2:46). This is why then, we become in totality, in essence, the totality of us to become knowledgeable to all of it, to become part of the Creators knowledge.

Understanding and transferring the knowledge and the totality, hits very deep if you understand it. In some of my teachings I release some knowledge, you think is a joke, but in reality, hits exactly where it's got to, reaches that soul, and then it creates the next step of what we call, "cycle of motion". In our lives we come across these positions and conditions a lot. It's our awareness, that brings the next cycle of work. How we be, how we can be, how we have to ?? serve to everybody, to change, and to bring that change in. As today's is mainly based on what is going to happen in Vienna in the peace

negotiations, is this. Is mainly to target to enlighten the world leaders, (2:48). that we bring the change to totality. We are in that position to bring about the change, .. to bring the difference in the work of that change. This is why and how we set the change through our souls, to understanding, to share, and to give unconditionally, that we can cover part of it.

Any other question.

Q: ... If K can put the soul of a fish in a jar and create a fish, then why does he not put the soul of Mitra in the jar, or has he already done it, or are we collectively doing it together.

K- It's already being done, and collectively we'll be elevated by it. It's the time of the maturity, (2:50). and it's the understanding.

Any other question

Q: .. Is it time to celebrate and enlighten the humanity with the positive way, instead of being fearful of what might come. That will create a completely unexpected reality, why postpone paradise?

K- That's all in your hand, nobody else's. That's in the hand of the KS. We are about to reach that point. The human race is about. We have reached the point of maturity, thanks to the present communications. I was talking to one of the KS .. If you've part of it, or some of you are still in it, or you passed it, when I used to work in Congo, and even go back 15 - 20 years ago, when we were students and we wanted to call to speak to our parents in Iran, from England, we had to call a central station, (2:52). to book a time, that they give us only so many minutes, and the lady will call only 3 times, if the other side is not picked up you lost your turn, and you have to make another time 3 - 4 days later, to pick up the phone to speak.

That was the extent of the knowledge and understanding, and how we could share knowledge. Today, even 6 - 7 years ago, when I was for example, in Sierra Leone, and we were in the car with the Ambassador going to a meeting, he pulled the window down, he asked for something, a cigarette or whatever, and he just put his phone, and the other guy puts his phone, and he got the pack and we went. I said, do you know how advanced you are compared to Europe? We don't have this in Europe yet. 2014 when I was the guest of the president of Sierra Leone. We came, if you can imagine 30 years ago, we had to book a time. In Congo when we wanted to speak to our other officers, which were remote we had to book 2 - 3 days in advance, and we used to be there with those clicking machines, "hello, can you hear".

We didn't have the line of communication, now we have. Now you go into Africa, anywhere in the world there is a mobile phone. There are 7 billion of us, and nearly 15 billion telephones. Somewhere, somehow everybody has one, or gets one. The line of communication has made that possible to understand, and to be more involved in.

You go to the American teaching, (2:54). You are lucky if you get 40 - 50 people on a Sunday night, 60 if they push it sometime. This is the most advanced part of the world, and half of them are from the rest of the world. So about maybe a third are Americans, N

Americans. You go after this teaching today, to the Vietnamese teaching. Only Vietnamese, I was the only foreigner ... and there are 60 - 70 of them. In the remote villages, whatever of the Vietnam, the teaching of the KF is much stronger, than the educated west and everything else.

We see that now the knowledge can be transferred right across, irrespective of position and time, which we didn't have that opportunity before. And now it's time to spread the peace, .. the next cycle. These 60 - 100 people in Vietnam which are there, and there are more of them there, the 20 - 30, which is hundreds more, thousands more, you make that 300 - 400 million, which ?? work or do something through the KF, as One Nation, one family, as one thing, it does not matter it's One Cup.

This is what the purpose is. Now the human race is ready for that change. We are about to get that breakthrough in, as one KS says, "you know Mr. Keshe, if you appear in the 5plus1, the whole future of the KF will change internationally." Is it the time for it, to do? It's not, if the 5plus1 is ready, (2:56). is it the time that our leaders in Iran are ready for the change, that it can allow this change to come in. Even though they know what will be the consequences of such a revolution in T to come from Iran, both in respects of the religion, and in respects of the standing of the T development, and what is to come from it. It's not just one side, we can give as much as, but are they ready to receive, and when they receive it, will they feel the same as we do? And they carry the same emotion?

I see this everyday in our working environment in the factory and the show rooms, and the places we work. You can clearly say who is a KS, and who is somebody here just to earn their money. KS work beyond, to make sure things are done. Wage earners, quarter to 5 they start packing. The KS takes the whole ethos home. The wage earners, 5 o'clock we have nothing to do, we talk about business tomorrow, we are on our time off. We don't go to teach them, .. to reach them because to them it is something, they came, and now they do.

The heads of the KF in China have realized that, and changed the process, like changing the process, (2:58). the workers will be taught first about our ethos. they have to fall in love with the knowledge, then they can work. What the knowledge can bring. Not come here, and that's it, we earn a living and go. This is what we have to change, to fall in love with the peace, .. with the change with what it is going to bring, and then we transfer that cup, you become that orange. We are just about getting ready to make that move. Human race is on the verge of the biggest change in the coming time.
Any other question.

Q: Azar ... I just want to have a good understanding of what your teaching was. Because what goes in Macro, also goes in Micro .. you look at the body, location of each organ ..

K- Macro is the Creator, Micro is the man. .. So what's the difference.

Q: When you look at the human body everything is salinity and fields that makes the location and position. When you go to the Unicose the same position is a different place. (3:00). Say I am from Jupiter 2 legs and 10 arms

..

K- yeah, but why don't you change yourself to the Chinese, go to China and become a .. South African, and Eskimo, and change yourself to according to what you feel like, according to where you are.

Q: that's going to be easy . . .

K- In a way yes, but in a way, that's the beauty of it. Otherwise God would have created, (3:02). one stamping factory all the same.

We are active interaction of the fields of the U. In a very short time, we gather enough to become the physicality of the man, compared to the whole cycle of the creation, and then it moves on. ..

Can you imagine .. Let's go back and explain something, and then you can understand the scale of how mankind has riddled himself into a lot of problem. If this is the sun and this is the earth, and it takes us 365 days, and we say we live 80 years. Now we go to Saturn, how long does that take? And we live again, the time of earth, 80 years, but here you only live a quarter of a year. Still that 80 years, and in fact only a quarter of the cycle, maybe. Then go back to the next step, you are .. 80 years. now our solar system, still itself is a satellite to another central point, to a star. You're just a tick of a few seconds in the cycle of the .. the sun in respect to this point.

Have you changed anything? Does it change anything in your life, or would you like to move out, (3:04). here and live the cycle of this one, live for 350 years multiplied by 80. Or would you like to go and travel to this D and wait for 1 year of it, and then 80 years of it. 1 million years times 80 (80 million years). Man's life is so insignificant in the cycle of the life of the creation and the U. Because it's the same span of time, nothing has changed, But in the life of the man we always have this bracket, it will not change, it is just the position of what will change. Our 80 years of life, is that much in the cycle life of the creation and we can see what happens in the universe and the rest of it. It's a perception of time, and time does not exist, because we gave that D of creation and time, which we want to give it.

In this cycle of 80 years, on earth you have 2 legs and 2 arms, how would like here ... to live that 1 year you have to change D, to preservation of the energy has to be longer, (3:06). here, and here has to be slightly longer.

Q: I have another question .. there are some people the soul comes out, but it doesn't engulf the physicality, it just and then go back in. But how can we make the physicality go inside, and why is it painful?

K- Why do you need it go inside. You embrace it.

Q: What do you mean embrace it?

K- You know, when you see your daughter you embrace her, you don't put her in your pocket do you?

Q: no

K- So it's the same. We have to embrace what we are that it has the freedom to give and to take. Not to capture, even life, even attachment to life.

Q: And when the soul wants to come out, it is very painful, why is that?

K- Who said it's painful? To me it's joyful.

Q: to you. Initially when it wants to come out is it like..

K- No, who says, are you presetting your mind that it will be painful, I don't want to do it. It's the most joyful time, since when the freedom has been painful.

Q: What if it doesn't want to go back in?

K- It's the same, back in where? So it's the same process, it's joyful.

Q: ... (3:08).

K- It depends what your perception is, how you understand it. It's how and what you are conditioned to. If you are conditioned to and continuously put on the point of pain, of course you want to escape. But if you are put in the same position but condition of love you always want to come to it. Depends .. what you expect. When you have a husband who fights you

Who says it's painful when you go out, and painful when you go back in? The love of creation has the same emotion in both directions. It's from the point of observer and receiver which does. In Farsi ... "one roof and 2 different kinds of weather on same roof". .. (3:10).

Q: (talks ...) (3:12). ..

Thank you Mr. Keshe.

K- .. It all depends how we feel and how we go about our lives. It's the beauty of it. How we sit in respect to understanding the totality of it. Part of it goes by expectations.

Any other questions or shall we call it a day. (3:14).

Q: Salomea, Austrian minister was against of getting H by nuclear ..

There is

What is your opinion on it, and how the KF could help on the energetic strategy of the EU?

K- Depends what color H, and what we define hydrogen (H) as, in the KF. H in the KF is defined as an energy source, as a Pl. H in the way they talk is totally for different purpose. They work on a matter energy level, we talk on a Pl energy level which is very different, and it creates different D. I have shown this many times. When we talk about releasing the energy of the Pl of a H, we talk in Giga watts, and without anything to do. (3:16). They talk about H with what energy it does, with all the tools which needs to do it.

In tests we did in China, South China Sea, we see the energy released from little , little balls runs into Megawatts. How much of the H they need, to create such an energy. The understanding of H, the way the European scientists speak, and what they want to do with it, it differs from what we do and how we process things. This is part of our work in the

negotiations with 5plus1. 5plus1 is going to be comprehensively discussion, not only about nuclear weapon T, but breakthrough the new S&T and how we can bring it. But how far we can push it is another way. Do we need the H system, that they are talking about now, or do we change the H into its what we call, field strength and we can use it more efficiently, much cleaner, without any damage to .. environment. This is what the whole structure is about. There is not much you can do with it, compared to what we can do with H, there is not much you can do at the present knowledge, (3:18). of what you call scientific level. That's why they have a dilemma.

But when it comes to KF H, we use H in a specific way, a very specific way, to create lift and motion. This is part of the understanding of what you call H. I don't agree with the H, not I don't agree, it's just scientifically with the knowledge we have the talk which is going on about H is totally irrelevant, absolutely irrelevant. We talk about the PI, a free condition of it, plasma, and they talk about how to use the matter energy of it. When you talk about the PI the way we do, then they tell you about the CERN's and everything else. Where we talk about the small balls and their work and their effect. If you look at this picture, these are the Chinese trial test, and when we built this one, if you look at these ... reactors ... here, you see they are in orange color, if you look at these dynamic reactors, they are slightly lighter. When we finished testing, and we had an incident, (3:20). these were see through. All the PI of H was gone, there was a clear water. What we had was a surge of energy which we know the damage we created in the environment, and what we did, and you can empty the energy in a different way.

This is what we call the H, these are carrying different mixtures of .. Gans's. The beauty with what you learned as a Gans, is you have already prepared the food, it's just how you are going to use it, .. apply it, .. put it in that you get the maximum effect. To what you combine it with. Are putting in front of, or are you adding to it. They can't do that with the (matter) H at the moment. The dilemma with the H and everything else is so ridicules. It's not ridicules, it's so advanced for the matter state, but they don't know how to solve it. Where with the PI a child in the second class can do and see the effects of it, and use its energy depending on what .. You add to the C it becomes sugar, in the PI condition, you call it CH₃, natural sugar in the PI condition. you put it with ... opposite to different amounts of itself, you create a wind. In matter state you can't do, You put 100 liters of H in one place and 50 liters, (3:22). of the H in another tank, nothing happens. You put 100 liters in Gans state and 50, you just stand in the wind, M field of it. You already developed, converted the matter to energy. How you want to do it.

If you go into the H, what they talk about, PI H just for a space. How much H do you need to burn to get to Mars? And how much PI of Gans do you need to go to Mars. One most probably a few thousand tons, one a few milligrams, because you create that field of that ?? absorption. The knowledge is different. Technology of H today in the matter state is very .. advanced in the matter state, but very backwards when you compare it to what we call, the plasma T.

R: They basically want to burn the H to get the power, just combine it with O. But it's funny, ironic because in your initial reactor O was the one gas you tried to get rid of.

K- You had to get rid of it, otherwise it causes .. it's too cumbersome to handle.

R: It reacts with the H, and very reactive in a vacuum type environment. That's why you have the vacuum pumps to pump out the reactors so much to get rid of the O. And here the EU wants to combine all that lovely H that you could put to better use., than burn it up.

K- It's part of the development of the T. It's maturity of man understanding more of the same. It's not just exclusive, (3:24). the KF, it's us maturing and .. we play the game with it.

R: Imagine all the reactors you could create with the H they wish to generate.

K- You know if you are experienced with these kind of things, when you buy H to convert it into .. Pl condition. H is the only one which we have a different mechanism over the tanks. With the CO₂, Helium and the others, we, I think I am correct, it's been years since I have used it. You use like a right hand turn to open, to close, and with H you use a left, right hand turn to open. It's just opposite and the mechanism is very different. In some cases when we go for a high pressure H, and it's amazing when you mix the H, when you allow the system to be filled up with H, you wash it first, and then we go to process of what we call, creating a Pl. Then you see how scientists who have no clue about the way we create the Pl, they start shivering and shaking, that you don't do this with H. This is against the laws of physics. Because we convert the H into its energy level before we use it. We don't burn it, and we allow what is left to, we release in the environment of. (3:26). This is the beauty of working with these kind of things. We are the next step in the science, .. understanding the work of the science. We'll see.

Q: .. People with arms entwined with the Creator have been waiting for the great encounter of Divine Science, revealed by prophets and sent throughout history as fragments of the totality, with the science of men. The later was established from the beginning as a one way, when each scientist suspected something and then defined the theory, which remained correct until it was disproved and discarded.

Question, did that day come with the science of Pl, or are you the forerunner of the days to come, that divine science and the science of men may be one?

K- It has already become one in the past decade or so. It's just for people to mature to it. KS gradually understanding, developing and the cycle of change is very rapid, in how we will understand what has been taught. As you look at the teachings over past 15 - 20 years, so much knowledge has been released, that it will take man hundreds of years to digest all of it. Maybe thousands of years. (3:28). there is such and such a ??

But in essence, what was the most important thing for mankind to understand was conversion of matter to energy, and energy back to any matter. You even as an energy of the man, we transfer you as a Pl to a position, and then we take you back in another position, and manifest yourself in a different matter. This was the biggest change, and it's in the writing, "the time of .. Man matures when he understands the transmutation of the element." But we have taken the man to the next step, that to understand the transmutation of energy, then you are complete, because the energy, when it reduces in strength becomes matter. It was important, as we seen in the writings, that man matures, when understands transmutation of elements, that you can make the gold out of the Cu, how you change it. In ?? effect is it in a lower level of understanding that ??

transmutation, is how you transfer energies into matter. This was the key, the rest is how you work it, and how you make that PI, to move from one position to another to become energy, and how you transfer that, how you move it to another position to become matter.

You go from Book 1 to Book 3 and back to Book 1. But one Book is on this planet and the other is, on Jupiter or a position in the U, but in essence once you become energy you can travel anywhere and convert. You don't need, (3:30). you've been taught A to Z, it depends where is A for you, and where is Z for you. The knowledge is complete, it's now how you want to play with it.

Q: I put food and honey between several Cups of Life to take the fields of these foods, and that each being that takes from these waters is energized and nourished. I still do not add fruit for a specific flavor. Is this the same .. as the replication process?

K- I think what maybe, you have to understand a little bit more, or maybe you missed about it, is the emotion of what you want. Go back to the very first time when Alex brought this out, he wanted a ... anise in morning, something else, and at night he got drunk so bad. Because he wanted to get drunk at night, it was time (3:32). to rest. So he took that energy from what was already within him. For breakfast he wanted anise, because if you lived in Africa there is nothing more delicious than a Anise first thing in morning .. and the rest.

So in essence it is within us, we already have it. It's how we handle it with our emotion. What do we need to be loved, and then we feel the love. Or do we want to give love, and would the person receive it. Maybe we want to give it. It depends on both sides. On which side of the cup you are. Are you the cup, or are you the man who uses the cup?

Thank you .. for today. This week concentrate on the elevation of the soul of the negotiators in Vienna, because fundamentally it's not only the change in the peace talk, but it's the confirmation of the acceptance of the new T. The breakthrough will come when all nations walk out of these conferences and meetings, admitting to themselves, how wrong we all have been. Some use it for different, and some we use it, to abuse the others. Either way we hope this will, to the negotiators, elevate to understand the new. As I said, my job is on the front line, and your job, this time is from the soul side. (3:34). We reverse the position, we elevated your souls, we gave enough. Now as I said yesterday, it's a time of test. Let's see we brought the peace, now let's see if we can enlighten the leaders of the world, to the change to come. This is the whole purpose of .. 5plus1. We'll let them battle for a few weeks, and then we'll see, which one of them becomes wise to it, through your elevation of their souls.

Thank you .. and hopefully we bring that change sooner than later.

...
