only thing unique to man is love - but he can't extend it to be universal, it's selective, problem is

In Brazil we use sympathy to heal .. leaf dry throw in river. is this force of PI and STP?  
Maybe a combination of the 2.

How will CO2 Gans change if you take it to the moon?

Lady asks to do guided meditation - this has nothing to do with KF

## **ENGLISH TRANSCRIPTION**

(:08).

K- .. a beautiful winter day in the northern hemisphere, and hopefully in the coming time, when the time comes we talk about the weather in other parts of the U in what we see in the public teachings. It's not far from where we'll be very soon, and hopefully our Knowledge Seekers (KS) and scientists in the next 5 to 10 years will take us across this U in different ways, and through different experiences. The humanity is getting ready for that change, for that what I call, opening, for us to see what's on the other side. What is beyond the village of earth, what is actually for us to come, to be, to enjoy, and to be part of. What is in store for mankind once he solves all these problems, it will be fantastic times, evolution in the course of the knowledge, and revolution and understanding a new way of living, understanding physicality is not the only option, and understanding that physicality is only to, (:10). what I call, registered memories in the physical dimension (D).

Human race is in for a big surprise as we develop, .. extend, .. bring a new D of understanding, we'll all be surprised, but what has been in front of us, and what we have missed. What has been part of us and we never understood, .. an extension to the knowledge we always had, but we never knew we possess. It's like living in a dual life, we always looked at the physicality side, but we never understood the D of .. information of the U, which is within our grasp, is part of our life. I always said, mankind lives in a schizophrenic life in the D of physicality, and then he calls the other side, a dream, because it is a dream. To be able to get to the other part of the U by instant thinking, and have it visualized, and seeing it, or being next to your mother, who died years ago, but now you are in touch with the soul, and you basically see her. It's a dream. But these dreams will become reality, once the man understands he lives both D. He has to understand, I manifest myself in the D of physical life to enjoy physicality, and the position. What does it matter, on earth or in another D in the U. But the central part which is the soul is expanded, and in touch, and travels the span of the U unconditionally. Mankind is in for the biggest surprise, when mankind sees what is in store. (:12).

In a simple way, in KF simple systems and T, and enhancement units (EU), and others which will come. We try to introduce you more and more to this new D. To the D, that we know, but we have never realized, it has been part of us, what I call, "you call it a dream."

Man in the physical D kills, .. creates wars, .. does everything else. But in the D of freedom of the soul - none exists. This is what Man will understand, to live in the D of physicality, the same as the D of ?? STM. In so many ways, mankind is in for a bigger shock in understanding the new, what I call, "himself." (:13). What has been in it, and what has been missed by it. In so many ways, of understanding, man has become to understand, the true nature of the man in essence of the Soul of the Man (STM). Mankind will learn in the coming time, that we can live in both D, physical and the soul. Soul will ask the physicality, "touch it," let's see how it feels. Then the physicality looks at it, touches it, and the STM feels it.

This is what has been missing and we have created the brain, to filter this. The emotion of the physicality. But now the man's soul has access to the totality of the emotion and the STM in the D of physicality. In as much as the Soul of the Physicality (STP) and the emotion of physicality has access to the soul, and the D of the emotion of the soul. (:14). Then the unison condition of the soul, and emotion, will create new D, .. feelings, .. essence of living, that man never knew. In the coming time, as we introduce more and more EU, developments, we take you to that position. We bring you to see the reality. We bring you to understand the scope of life, in the essence of the D of the Unicoise, not the D of the earth. But man has to be educated first, that when he goes out, he does not create mayhem for himself and the others.

The essence of the creation is the love of the Creator for His created. In so many ways, the essence will manifest itself in the coming time, for man to see. In a way, we try to teach how to be the same as the Creator, not just by word, not by, through fear, at "the end of the world," and the "day of calamity," but by the "day of joy," and in a way, rejoicing, to understand that we feel what He feels, and we live the way He lives. "He," being ourselves, in the essence of the STM, and in essence, being the connector, and the connection with the Soul of the Creator. The Creator does not live in the D of the physicality but through the essence of His created things, carries, understands and feels the D of the emotion of physicality.

In the coming time, in the teachings to come, we will teach you how to get in touch with, to become, to be part of the essence of the emotion of the Creator, through the contact of the STM. (:16). For many of you, these are words, but so many of you gradually will touch it, and then you'll understand. Some of you listen to the teachings, some you feel the teachings, and some of you have already heard it through the essence of the Soul of the Creator. As I said before, when we teach, we teach for all the created things in the U, not in the essence of the word, but in the essence of the emotion of the feeling, of the teaching. Many of you will start learning that way, then actually listening to the word. The words are in a way, putting it in the pigeon holes, this is where it has to be, this is what this new emotion connects to, and this is what I am, what I'll be, and what and how I am going to enjoy the time. The essence of the creation is not for man to have a good time and rob, and steal, and rape. The essence of the creation is to enjoy, to be able to give, to share. To be able to deliver the knowledge of the Creator through the knowledge of the creation, He has created.

Mankind in time will come to understand, we go to work to live. In the coming time we go out to teach in all D of the creation, as we know, whatever man needs at the point of what I call, "the creation and created," will be available to him. This is the difference. Man, many of you ask, "what are we going to do?" when everything is done, the peace comes, and there is nothing, whatever. The job of the man is through the STM, to become the universal teachers, .. the essence of sharing the knowledge of the Creator, becoming that mirror, (:18). which reflects the beauty of the light of the Creator.

This is what most of the .. pure stars in the U do. They don't shine from within, they shine from the surface, to reflect the beauty of the light of the Creator. In many ways, mankind

will mature to this knowledge. In time when he is mature to understand the existence of his soul, then his soul, becomes the mirror of the knowledge of the Creator.

Understanding this will bring the new D to man, there'll be no need for factories to go to work for, there is no need to worry about, what the next day will bring, because the day never finishes, to have another day. Having another day, another next year and whatever, does not exist in D of created, because all of it is so joyful, that there is no end to the day. We live through the D of the soul. The souls do not know day and night, .. time to rest, .. do not create conditions of mayhem, but the D of physicality does. I made man in the image of Myself, which means you become the reflector of My essence of creation.

In so many ways, mankind will become to understand the truth about the Creator, with it he'll understand about himself. He will understand what it means to be, to live, not to go to work to survive, but to go to work to give life to the others. Days never finish, days never started, it's one continuous life of joy, .. of giving and sharing. In a way, you already know this, your soul never sleeps. (:20). The physicality needs to recover, but in your sleep, as the soul works, and it interacts with you, in D of physicality, you call it a dream. The dreams are the work of the STM. The dreams are reality, but man never knew how real it is. The dream of the man to achieve, has already been achieved by the STM.

Many, many of you will come to understand this. We see this growth in the size of the elevation, of the understanding of the man, in a number of KS, who gradually reach to become, to become that shining star, .. the reflector of the light of the Creator. Gradually this will bring the others. We'll see pretenders, .. those who stay in D of physicality, because it gives them the D of understanding. We see what the mankind will achieve in the coming time, is to become the Messengers, the lights of the message of the knowledge of the Creator, as they have access to both D, like all other creatures of the Creator in the time to come.

In so many paths the man will take, will bring him to one point, it's a circle. You can live in the D of the Adam, or you can live in the D of the Eve, but you have the facility to be in both D, where the soul of the Adam and the Eve, becomes the D of the emotion of the U, in how we feel. In how we reflect the D of the existence. Mankind in time to come will be mature to understand, (:22). the totality of the work. In so many paths the man will take, will bring him to one position and one D. In the past, you have been taught about different religions, but at the end it all brings you to one Creator, to the God, to whatever you might call it.

To what we know, is mankind will become to understand, the difference between the reality of the time, and the reality of the existence in the D of the time. Where the time is non-existence, but the STM creates that D of existence. This is one of the biggest mysteries of the U, where the time doesn't exist, but by bringing the D of the "no timeless," into the D of physicality, which creates time for it. This is the beauty of the creation. The essence of the Creator, will still, at the point of His creation, where the man has created the time of whatever he likes when it brings him into D of physicality. Mankind has to become mature to this, then he understands, that time does not exist in

the D of the Creator, is the man or the D of physicality, which creates D of time, and space.

I have said many times, if the U did not have time, our scientists would not have said, that the U is expanding. It cannot expand, if there isn't extra room for it, and that room is the love of the Creator. In the emotion of the existence, when it's love converts into the matter condition of the physicality. In the shape of the universes, (:24). in the shape of the man, the shape of the man in so many path ways, is the same as the existence of the universes, is the emotion of the Creator, the essence of the STM, in interaction with the D of physicality of this structure, what we call our earth, creates the D of the physicality of the man.

Man does not exist, unless he interacts his soul, with the soul of the planet, which creates the physicality of the man. So it's the same, the STM, in interaction with the Soul of the Creator (STC), creates that D of the physicality. If mankind has to become kind to himself, to understand how kind the Creator has been to the man. Then he'll understand the totality, the knowledge, and the essence of the creation. We are the creators of space and time, but we convert the love of the Creator into the D of physicality.

The STM within the womb of the mother, does not take shape and D, in the shape of the physicality, till it interacts with the soul of the mother, and the soul of the mother itself, interacts with the soul of the existence of the Creator, and the created, which is the child, within, but conformity, understanding, but D of the STC preserving the space and time for man in the D.

Then we understand the U is timeless, the U, the Creator has no time, as, at all time, it's at the point of what we call, creation. It's a fountain of fields, it's a fountain of energy. In so many ways, regurgitates. I said this once to a child, we stand by a fountain, (:26). and you see forever, the fountain spits and spurts the water, but where does it come from? It's the same water, when it falls, it goes back in the pool, and again comes as a fountain. This is the essence of the creation and the Creator.

The pool has no time and space, but in a way, holds the totality, and when the jets from the .. the fountain spurts the water out, it gives it the D and the beauty of how it looks, and then when it joins the water, it's still the water. We see it as the pool. The pool is the essence of the creation and the Creator. In so many ways, the drops from the fountain are the time lapse, that each drop becomes one world of existence on its own, till it joins back into the pool. There is no difference between that, and the essence of the creation. The totality is the Creator. And the earth, the what we call, galaxies and universes are those little bubbles of water, which spew out and have a time, that it goes back and it becomes "no time," but it joins the pool.

But when mankind understands this essence of creation, mankind become wise to understand the totality. When you are within, you are one, and are part of, but at some point, I become separated by essence of the creation, and I return and go back to. This is the same with the essence of the creation of the STM. We are that little, little bubble of

water, which spews out of the fountain, and in time, it has its time, its joy, it takes its own D and shape, and then it returns back to the totality. (:28). Mankind will soon understand this, and strives to go back to, the pool, then being on its own in the D of a drop. That drop, which literally drops back into the ocean of the creation.

Maybe, maybe we hope man through education of his soul will understand this, will understand the difference between creation and the Creator. Many ways, what you strive to have, is what you already have, that you forgot, totally, that it's already been given, there is no need for striving, there is no need for doing things that could be wrong, but it brings the essence of the creation, it brings the D of understanding, it brings the totality.

I have to take an emergency call, 1 second .. (:30).

**Break > 1 of 3** > 409 KSW 12/2/21 (:44).

K- ... Sorry about this, but as many of you know, we are here in Vienna sitting on the ground, backing .. We are here in Vienna, backing the 5plus1 negotiating teams, and when instruction comes, and things need to be done, has to be done as the world peace, and what we are striving for will come out of 5plus1. KF with all its knowledge, might and powers, standing by, when instruction comes, or we have to do certain things to support the teams in negotiations, we have to comply.

New T, mankind becoming to understand the Knowledge of the Creator and knowledge of creation is far, far beyond the understanding of the man. But in so many paths, and directions, man can find these roads, .. knowledge's, man can strive to understand it through his soul, and then convert it into the knowledge of physicality. Here we strive to create energy to survive. What about when we land through our soul in another D, energy is abandon. But something else needs to be understood, to exist, to enjoy the D and time.

As I said, D and time, (:46). is not existence, till the man, the fields of the Creator, through its D, through its understanding, becomes physical, become part of that understanding of totality. The STC, which reflects through the STM, will become one of the biggest enigmas to mankind, soul and emotion. Mankind the physical D ?? mankind what he has created for himself as time.

The Creator is timeless. The life of the Creator is timeless, because it does not have that essence, unless the created, creates the slowness of his fields, that in that slowness, converts to, creates that time. I am in love with the lover, but I cannot show my love if I condition myself, to where and how to show the love. Then I spend time on it, to show it, and this is the D of physicality, to show the love of the Creator, I create time. Otherwise I am in time, the same as the others.

In this change, in this understanding, in this position, man will mature, both in the D of the STP, both in the D of physical life, and then man will reflects, will understand to live through the light of .. the STM. Our planet does this, why can't man do? (:48). Our planet

is created from the essence of the fields of the sun. It does not kill to survive. It does not go and bash itself to the other planets, to steal their energies or other stars, or whatever. It absorbs the energy of the light, in interacting with the energy and fields of itself, absorbs the energy, and what it needs for it to live.

Between the earth and the sun, it's the size and the D of the emotion of the two, in respect to each other. The way between the STM and the STP of the man, within the gap of the brain of the man, it creates the emotion of the man. They cannot be anymore difference, between the sun and the earth, and the STM and the STP. When humanity matures enough to understand this, then maturity comes, that he will not kill. He will receive the rays from the STM, to feed the physicality through the interaction of the fields, without killing, without creating war, without creating what we call, changes, which are not needed, as it is not part of the process of the existence.

Humanity has to understand, to become that earth, with the fields, that the interaction of its fields with the rays of the fields of his soul, will give him the energy to exist in the D of physicality. (:50). Then man will not kill anywhere in the U, then man matures, that the wars do not exist, in trying to create life and maintain life.

The pride of the man, the joy of the man, will come out of the essence of understanding, the more he shares the knowledge and the beauty of the Creator, the more he can reflect and receive more. A cup when it is full, cannot take a water, but when it overflows can feed the others. Man should be the cup, which is overflowing, and is full, and he can continuously receive, to give. This in essence, is the essence of the Creator and the creation. Now put that cup in that fountain, and become the feeder of the fountain, directly into the cup. As the fountain feeds the cup, the cup overflows to fill in the pool, to keep a constant evolution and emotion. We don't see that drops of the water, which drips from the fountain, ?? the cup, outside, in the fountain, or in the cup. It only exists between the time when it leaves the fountain, till the time when it lands in the cup, and then a collection of the totality of the what that drop has added to the cup, will overflow into the pool. (:52).

This is the truth about the creation. Our life is that drop, just enough to leave the fountain of the Creator, and join back into the cup of another D, that itself, becomes part of the totality, and then it joins in the bigger rivers of the pool. Now you understand, in essence there was no time for the pool, and there was no time for the cup. We created that time, from the point of the separation from the fountain to the cup. That's what the life of the man is - that drop, and how long will take from it, to be the fountain of the creation, and to rejoin back in another D.

This is what we call time. In essence, the creation and the Creator has no time. It came from none and shall go back to none. As is the man who converts it, to the point of his existence, in the duration of his understanding, in interaction with the physical D of this planet. Then, we call that the life. Then in that lifespan, how much can we absorb from the environment? If the fountain comes out at 2 degrees, and by the time when the drop hits the cup it is 4 degrees, where that 2 has come from? Absorbing energies of the

environment, creating time and interacting with the environment, is the time when that drop has added to its knowledge, till it reaches. (:54). And when it drops in, that 4 degrees, as that added knowledge, that added information and energy, back to the cup, and every single drop which has been there before, will benefit by it. This is how the man should be, that drop ?? ?? the knowledge by the time it gets to the point of delivery, he shares instantaneously with everything and everyone.

Man should become that drop of water, in the essence of the thirst of the man. Thirsty to receive, and when you take one drop of water into the body of the man every cell of the man feels the beauty of the water, and the essence of its receiving its energy. As it's been said many times before, how come when you are thirsty and you drink a cup, suddenly everything in your body starts, and absorbs and enjoys the existence, and enjoys receiving energy from it. This is what man has to be.

This is what the essence of the creation is. Enjoy that short time, that short span, that little, little, little time, that you are from the drop, separating from the fountain, which is the womb of the mother, till you land, and you end up in the earth, at the point of death. But in essence, there is no time, but your soul will exist in the water of the cup, and it becomes part of the totality.

Now think, now understand, now be wise to enjoy the time, and when you can absorb from the environment of your life, that you can add to the others, when you land in the cup. (:56). There was no time, till the time was created at the point of inception, of the first molecules of the water, to create that drop, and the time was created from the point of the fountain to the cup.

Then the question comes, what are we fighting for? Why are we doing all these killings and mayhems for? Why have we chosen as the race of the man, to create such a mayhem? Where shall we stop? But the question is, where did it begin to go wrong, to get to this point? If we create the children of the man through the Soul of the Man (STM), then the physicality .. at every point, knows that it receives everything it needs from it, and shall not destroy or kill.

When you create in the dimension (D) of physicality, you need the physicality to guarantee survival. But when you create the sun, the sun by its essence, in interaction with its fields, will create that life, and was created out of. It will give it the essence of the fields of the creation, and the energy needed. This is why we have brought you to this point, to understand, that from now, by the birth of Mitra, the whole cycle of creation, (:58). would reverse for humanity, and the rest of the U. Where every life will be created from the soul, the way in the D of the creation of the Creator, has created the sun, and then from interaction of the fields of itself, with the environment in the womb of the mother, will create the D of physicality. From the time to come, when we give birth to a child, you will see the soul first, before the physicality. You'll feel the essence of the creation, before you feel the physicality of the created.

Mankind is in for a very big surprise, Mitra shall be born in that D, and shall be all, who are born from it, and exist at the time of its existence. A change of time, instead of physicality feeding itself, or being touched with the soul. The soul feeds the physicality, that the physicality does not need to destroy, to kill, to create that cycle of life. Mankind will become very kind to himself, through the understanding of the operation of his soul. This is sacrosanct, this is important to us, and to those who live around us, and near us, and through us. We will understand the ?? of creation, we will understand the essence of creation. Then we understand the totality, then we see how we have come to be in this D and direction. In understanding this, mankind will be kind to himself. Just 1 second please (1:00) .. (goes back to negotiations .. R: can we have moments of silence giving from our souls for world peace .. we can carry on till Mr. Keshe comes back.

K- Sorry about this. In position and time, and understanding the totality, we, all of us, will become wise to the new process of creation, will become wise to understand how our lives were created, and how our lives shall be created. In understanding this we all become mature to, .. the time, place and position. We become wise to understand, that our lives is part of the life of the Creator. We become the totality, we become part of understanding, what the reality is, and shall be in the essence of creation, and then, (1:02). when mankind reaches this point, then it becomes essential for all of us to understand the process, to understand how we have become so redundant in understanding the totality. Maybe, maybe in the coming time, some of our people, what we call, totality of the life, will become part of this life. Then we'll see how the humanity will progress to understand the essence of the creation, to become, to live within the structure of the creation.

Then maybe in the coming time, humanity will become to understand, how life has come to be. Then ?? ?? how much of the life have I understood? How much of the ?? .. what happens to a point, that when we become aware of it, and then we become part of it, then we have to understand, we have no choice, we have to bear the burden of being (1:04). our soul and the Soul of the Physicality (STP) to work to be able to live, .. survive, .. be part of the cycle of the creation.

The birth of Mitra is the pint, the point of reference, the birth of Mitra, on the 21st of December, is what we call, "the pinnacle point of the change for humanity and the race of the man." We have celebrated the birth of Mitra for thousands of years. In Christianity we changed the date from 21st to 24th and 25th, to suit, but to not to be, but be close enough to. In understanding this, mankind has no choice, but to elevate itself, and .. citizens of this planet to understand the change to come, for them to be elevated, .. to live, .. to be part of, .. to elevate in the D of the STM.

How far and how much shall we extend the knowledge of the STM, will depend on all the humanity. The burden of the elevation, becomes the responsibility of all, and the level of elevation, will depends on, how all will elevate together. When that drop falls in the cup, all receives the same energy. When you drink that sip of water, every cell of the body of the man will feel the satisfaction, of satisfying the thirst. The thirst has to come from the knowledge of the .. the Creator and the creation, (1:06). and not in the D of

physicality and the matter of the man, but even that is needed, but man has to understand the separation and the totality between all.

The truth and the knowledge is the same. It all depends according to the intelligence of the man, and what he understands of it, and how much he wants to be the part of it. In the time to come, humanity will receive the knowledge from the Source, through his soul, but he has to understand the change of time, the change of position, the change of understanding, and the change of ?? .. what humanity will expect from all of us.

(just one second) (1:08). ....

K- In understanding the totality, mankind needs to understand the reality of life. Not fictitious, the way we have been told, and we are frightened of - the "day of judgment," when we go to hell, when we do this, and that will happen. We have to understand the life of the man is a progressive process, and according to the direction and dimension (D) it takes, will dictate the D of the progress, the ?? and the understanding of the totality.

The Enhancement Units (EU) .. are not there to help you with the cancer, .. Alzheimer's, but in a way, at the beginning many of you will use it, because you want to get rid of the pains of physicality. (1:10). But as you use these systems, you start becoming more and more aware of the work of your soul, aware of how to be in touch with, and to see it. When you feel the existence of your soul, it's like when the first time you hold your child in your hand. You appreciate its beauty, and then you start to match yourself, that it goes with the pattern of his sleep, why he cries, and he wakes up to enjoy the time with.

It's the essence of the EU, to bring you to that point, to give life and birth to your soul, in the physicality, D of you, that you understand the beauty of your creator. In essence, what we put to enhance, in not to enhance your body, but it's to enhance your soul in every D and foundation of the work, that you see its beauty. In a way, you gave life in the D of physicality to the soul, and the soul has been there, hidden, but you work through it, and because of it. Now with the EU, we elevate the condition, that you enjoy the beauty of your soul - you see it, you feel it. Then as you adopted your child, coming from you, you will understand, this is another child, which is the feeder of you, the creator of you, in the essence of the collection, where your physical D lead to its creation. These EU are in that part, in essence for understanding the totality, in essence for being there, to be able to receive the elevation of the understanding (1:12). between your soul and your physicality.

Very recently, I watched, and I saw that elevation with one KS. The instant he entered the environment of the unit. It was amazing to see how fast the STM reaches the STP, but you have to be wise to capture it, .. to understand it, .. to see the way it wants you to see, not the way you want to see it. You feel the emotion, and that is the touch, where the STM reaches the STP. In time, of being in these systems, you'll gradually become graduates, to understand, to live to the D of the soul. When you enter these systems you understand different attributes of your soul, and then you become aware of the true essence of the creation.

In a way, these systems are a gift from the knowledge of Mitra to mankind, and in time she shall show you how to, she will guide you, in where to, and ?? if she will manifest to you, the beauty of the light of the Creator. I am servant to her, and in so many ways, the beauty of her existence, will bring us the kindness of the way, that the love of the Creator manifests Himself with Mitra.

Soon you will understand the true essence of love, (1:14). not in the D of the physicality of the man, but in the D of the love of the Creator. We have to create the condition, that this love, for those who cannot manifest themselves in the D of, is given the condition, that it can grow on its own. Sometimes it might look harsh, sometimes it might bring joy, but the totality of the life for man, will become to be that part.

Many times, in the coming time, when we are in the presence of Mitra, we will see that light, we will enjoy her existence and her presence. As I always said, I am servant to her service. In time, it will bring us joy, and educate many of us, to be with understanding of totality. I hope today's teaching brought you an insight in what is to come, and what it needs to be done, and clarify many things that you never knew, that in time and existence .. (broken up .. ) in the D of physicality. If you like to go for a break .. You got to realize we are here on a standby in negotiations, every now and then if we get a call we have to break and advise, needed to be given or received information ?? as it happened this morning in the teaching. (1:16).

The elevation of the souls of the members of the negotiating teams, is part of the work of the KF Universal Council.

**>> Break** 2 of 3 >>> 409 KSW 12/2/21 (1:27).

Questions.

K-.. Please be aware if we get a call we have to break. It will be the same for the next 3 to 4 weeks.

R;

K- When we said, people thought it was just a talk, but the KF is a cornerstone in part of the negotiations in the background, and we are serving the Iranian nation and leadership to make sure, (1:28). .. the negotiations are not unfair, both to the Iranian negotiators, and supporting teams from other nations. We are one of the organizations, which are negotiating, and are embedded in the background with certain, what we call, "groups of negotiation," which will try to infuse and encourage the peace talks. This is the way the KF has worked since 2010 - 2011, and was the outcome of what we call, "releasing the Key" (USB Stick). We knew that knowledge is the key to breaking up animosities. This knowledge has to be accessible to all nations.

As our KS know, we have asked our team in US, in Arizona (AZ), .. in China, .. Tehran, and .. in Brazil to start locating and to find with negotiations with authorities or independently, for the first .. institutes of KF, which will go in conjunction with the one in Austria. The knowledge and the teams of the KF, have been instructed in the past few days to actively locate, where in conjunction with the governments, we can open the institutes, (1;30). in the next 12 months. The finance for it, has been backed by the KF.

This process has started, because we need to educate. We cannot educate only in English, just because we do, but it has to be transferred into other languages, and understood by. So in the coming year, two years, as we build these institutes, you will see, that these institutes will look exactly the same. We have asked our team to bring this out. We have a good idea of how we want it to be, we have a location, which we like the institutes, or universities to be the same. You will see a copy of the same institute right across the planet, a blueprint in Tehran, Beijing, Brazil, in AZ, and even in Austria. This becomes our pattern of work. It's where you feel, you belong to a new generation of life in the knowledge and T.

Our work has started, we cannot stop. In a way, we are using our knowledge as a gift to the nations in exchange for peace. Last time we gave the "key", this time we give the structures. Building the cities with institutes, Tehran and Beijing have already gone through the process, now they are starting.

We started direct negotiations with the Iranian government officials to build the first what we call, "CO2 capture structure," in one city. This city will be Tehran, and then most probably Beijing, New York, and Delhi has been chosen, .. New Delhi, (1:32) for the structure of absorbing what we call, "CO2 pollutants." It's not one structure, it's covering the whole city grid. We have setup, and it will be coming more, now ... the structural feature has come in. The Chinese team, and hopefully Austria, will deliver the first physical shape of it, and we start building by mid this year. Where we capture CO2 across a city, not in one location, and with the support of the nationals.

We will build 10 centers in each city, specially positioned, and then the citizens, some 25,000 members of the public, will become the supporters of running these systems, that we absorb balanced fields across the city. Then we'll see how the pollution will die in Tehran, before end of this year. Hopefully, if we can get everything sorted, by beginning of next year. The same will be in other cities.

The interactive change of the situation, we even know how many metric ton we will absorb from these cities, of what we call, "the capturing of the materials." It's the process which the KF will go, and then the same time this year we'll finance in 30 major cities around the world, to go for cleaning of the waters and cleaning the waters, and changing the water supplies, where the nations can benefit by it, health wise, and environmental wise.

We have entered the physical D of change and this is part of what you have to expect from a structure like KF. (1:34). There is a lot of work going into the background of it,

and all of us as KS step by step, have helped and supported, and specialized in different part of it. Now we bring the knowledge in, as a collective knowledge with the governments. I have worked 40 years to achieve this, and now I have put my own resources in the background to it, that everything established under the KF name, will be owned by the KF itself, in the name of the KF. We are not building under other names and trying to go, but we build the Enhancement Centers (EC), .. the Wellness Centers, the CO2 Capture Centers, all under the name of the KF. That it will all belong, as it is, One Nation, OPOR, T in exchange for peace. But we have to bring peace, not to the guns, but to the society as a whole. Let's see how we can achieve it in the next 10 years, and how it will change all of us in the coming time.  
Any questions.

Q: ... It's said that the soul of Mitra has already been planted, will Mitra be of the bloodline of Mr. Keshe?

K- Mitra is bloodline of the Creator. Any other question

Q: .. (1:36) If man is made in the image of God, then why has man made, create so much mayhem on the earth?

K- Man is created in the image of God in the STM. The interaction of the light of the soul, has created the physicality, which has gone haywire, as we see. It's not just the man, there is a dysfunction in the D of the life of physicality on this planet. Due to its structure does not allow the fields, which are needed for the conversion and sustainability of the soul, to arrive, to, in its interaction with the D of the soul of this planet, to create a life that can sustain, to attain all it needs from its environment. This is one of the reasons, that we are introducing all of these Gans's.

When a plant does not give the fruit that you want, what do you do? You cut into, and you change it, and you make it a new, with the taste and flavor you like. We do that with apples, .. cherries, .. with all the plants we know. Nowadays we call it, genetic modification, our ancestors used to do with different way, by changing the skin of the of the tree, by changing its flavor and taste.

Now we have the same problem with humanity. This planet due to structure, does not allow enough fields of the right order, according to the conversion of fields, to create a D of life, that can absorb the energy, (1;38). like itself does, from its environment. That conversion, lack of energy, manifests in demanding to survive, and additional, rapid, continuous energies, which we do that, by eating, by killing and whatever. If mankind or the creatures, which are protein based on this planet, manage to make that conversion, then one will understand. Then one will phase into it.

And then this is our job. All this introduction of EU, production of Gans's, and all this, these are the small, small works, which is needed, is like a "bricks in the wall," to be put in, that the wall can hold it this time. At the same time, introducing how this wall works, is another part of what we call, the education side of the KF. This is very, very intriguing, interlocking, but intervening with bringing the change.

When you plant a tree, when the soul cannot give energy for the plant to survive, what do you do? You add additional energy, as manure, as fertilizers, as chemicals to support it to exist. We are in the same position. This plant pot, which has given life to man, has not, does not sustain enough, to allow what it grows, to live. So the plant, which is the man, (1:40). now extends to get something, from somewhere else for it to survive. With introduction of .. the Gans T, because it's the easiest way for you as humans to understand, by introduction of the EU, we are bringing up the 2 together.

You will understand why you even absorb the CO<sub>2</sub>. In the process of the CO<sub>2</sub> absorption from the cities, we'll spray back the CO<sub>2</sub> on the cities. What was killing man, or what was Global Warming, now becomes a source of energy and life. But notice we always go back to the teaching, what we said in all the teachings, when you use Gans's you need CO<sub>2</sub>, because it's the connector. When we spray the cities we connect man to the new D.

People will flood into these cities to receive it. What is pollution, now becomes the source of energy, and in that process, we will see, man will change. When you read the business plan, which is set for, what we call, "structure for setting up the companies for capture of CO<sub>2</sub>," in Tehran, Beijing, and others you'll see this. We have put forward, in capturing the CO<sub>2</sub>, now we spray the CO<sub>2</sub> back on the city, in the form of energy. What does this energy do? Connects man to energies which is needed, and is within the environment to be absorbed. Man will not kill anymore, .. change anymore to destroy.

We will see in Tehran as the city of the light, but lit by the STM. These are the changes to come and it's too far for us to explain, because you cannot comprehend. (1:42). Establishment of the capture of CO<sub>2</sub> is not just the capture, is to bring a new condition of enlightenment, to bring cities of light, cities of where peace sits. We do the same across this planet. In the calculations coming down through the business plan, we need 5,000 cities, that we capture the CO<sub>2</sub>, and we spray back on it. What the plant could not get from the soul, we gave it through addition. Now we give the addition through a different new scientific way. When, what has been short to connect to the environment. The plants do this, the plants don't kill, but they connect to the energy fields.

Now it's time for man, and when we spray the CO<sub>2</sub> over the city, we elevate the soul of the cat, the mouse, the ant and everything else, it's not just for man. What I am doing, you can't even imagine, how far reaching it will be in the coming time, and you'll see. This is what I said, from the time of the teaching, when the man, the STM elevates, he is responsible for all creatures, and when I do, I enlighten all creatures.

It's not only for elevation of the STM, the plants will change, the trees will change. (1:44). We see a new cycle of life, which does not need to kill, .. to destroy, does not matter wherever you are. When it rains, it rains equal on the cat, the man, the dog, the ant and the rest. The implication and application of new T in the life of the man, will be immense, when we rain the energy connection to the U, and the pattern of this life, most of these rains will wash into the rivers, and it will change the life of the animals and the fish in the oceans.

We know what we are doing, and it will be far reaching. In the next 5 or 10 years, most of the humans will not even recognize the way they lived. The way we accepted the computers, and the mobile phones, we'll accept to be peaceful as part of us. Some of us will not even remember the wars, because we are not from that generation. It didn't exist in our time. You meet people who have been through the camps, and they've been through extermination camps, and they escaped, and we've see those who've been in prisons through the forces of the political reasons or whatever. When they came out, and they live, they just don't want to talk about it, and they forget about it, the man will go through the same process. This is one of the gifts we have bestowed on Iran, to be the first nation to do so. The land of Mitra. You will understand soon, what I am doing with humanity, you cannot even imagine. (1:46). What was short, will be given back by the fields of the planet, but not by the matter state of the planet. You killed and used it that way. We give it, that you don't need to kill.

Any other question

Q: .. Is there a date for these machines to start working?

K- These machines are working. It's just that we are waiting for all the nations to come to an agreement in 5plus1. Because 5plus1 as the world leaders, in economy and industry, so called. We need to bring the change on the top, that it reflects all the way down. This is one of the reasons, we are sitting here in Vienna, and .. work with the members of the 5plus1, in the background, those who influential.

We don't consider France, Germany, and UK as essential part of these negotiations. They are parasites into the whole process, because they have been colonizing, and they think it's their right. In a way, we work through different structures, in the front we let the KS say one thing, but in the background we negotiate a different way. We shall see the outcome in the coming time. If we manage to change the situation the way we expect, then you will see the EC bubbling up everywhere.

At this moment as we are talking. (1:48). As Rick was showing the EU, 3 EU a week is under production in China. They will be shipped into Europe in the next 3 or 4 weeks. We are going into mass production. The .. Vision and the Brain EU, tons of it is getting produced and assembled and ready to go out. I gave a promise to John, he'll be the first one to receive it, it will be as part of the gift in the negotiations, that we share equal with the US, and then with China and the rest.

It's not that it, we kept it back to get to the point, it was the right time and the knowledge could be spread the right way. Now the ... VEU, 48 of them will be shipped to AZ, once we have the agreements on the transfer of T and peace with the US, in these negotiations. We hope to achieve it very fast, and what I hear from our negotiators, there is a lot of good development has been done, but this development, have been done on the nuclear side, and not on technological side, now we have to change it, and it needs this kind of work to be done. We thank the office of his eminence Ayatollah K of Iran, and his chief negotiator, Mr. ?? . It is important that we understand, that there is some sort of personal positions, which have to get solved, and is getting solved. And there are others on the national level, which is getting solved, but it takes time. (1:50). As I said, to one of the

negotiators very recently, this situation between Iran and the America is like what I call the Iranian girls and the way they like. They push away by the hand, and they pull under the table with the leg. Now we are in that position. We haven't managed yet to bring the shake hands on the table too. But it will come very soon, through the right way.

Any other question.

R: Maybe they need more woman.

Q: Azar: .. ?? ??

K- It's part of the culture.

Q:

K- we have good woman advisors in background, don't worry.

Q: ??? ?? the drop of water in fountain, I don't remember if it was in the fountain or the cup. In the coming time .. After the changes would I remember when I was a drop of water in the fountain, or when I was in a cup or visa versa? (1:52).

K- Yes, because you share the knowledge with all, within the cup. This is what I keep on saying, and maybe now we can understand a little bit more. Once you are in that water as a drop, your knowledge becomes knowledge of all, as much as their knowledge becomes knowledge of all, which you are part of.

We don't have universities, we don't have .. schools in the U. If you want to understand this, it is very simple. We go back to beautiful things which Rick used to show with the magnets. When you put the magnet, or you put the knowledge, in that magnet, all the other magnets on the table respond, and position themselves, because they understood, they have a connection with that knowledge. And that's how it shall be. When you put a magnet on the table. Rick do you still have that video somewhere, where you play with magnets on the table?

R: Most of them have broken up ..

K- No I mean if you have the video.

R: Yeah, no I don't have that separated out...

K- when you see this video, it's beautiful the way Rick done this years ago. When you put a magnet, that magnet has different attributes, have different composition of metals in each part of it, and when you set it down in the middle of other magnets, the other magnets respond collectively with all the things, which are in that magnet. It's knowledge, it's power, (1:54). its cells, everything. And this is how it is. You are that drop in that, so every single cells, .. molecule, .. atom in that cup already moves to accommodate for you. And there is another drop, and the other drop moves, and all have to be done.

So the knowledge in the D of creation is uniform, and with all, now maybe some of you understand. But we say there is no university and college, and PhDs in the U, because the knowledge is instantaneous, and when it is learned by one, it is shared with the soul, with the others. That's why we don't have a worry when man goes to another D. It's just taking this factor of killing out of the man, is a bit cumbersome, but we are getting there. The only way is to uproot it from here, the brain of the man, the CO2, and bring the

connection to the U Community, and he'll stop. I told you it's in one of the teachings very recently, that even the stars, and moons and galaxies will change because of this new understanding. Not just by man, we have the same structure across the U.

Q: ..

K- Jalal you always come with 2 questions

Q: okay .. When a man changes, goes through this process, (1:56). is our essence going to be more, you know like how what makes you "Mr. Keshe" is something you like to do as you, we call it your personal character, and mine is as Azar. Is it going to be more profound, and is it going to change, because each of us have a destiny or something that we , that makes us ...

K- Of course you will change, but at the same time, you have a say in that change. We all have a say in our changes and what we'll accept.

### **About accepting the abuse**

I always say, I look at myself, than outside. I did not want to change anything for years, and when I made the change, it has brought a lot of change, because I accepted, that I was responsible accepting all the abuse. It had to end, and it brought the change. And it brought the change to everything else, because I feel different, I react different, I stopped the abuse, now we see, it reflects on the T and the knowledge and everything else. It's what we accept, counts.

If, I said that very recently, I go back to this in the recent, past few weeks deliberately, because we'll explain to you very soon why. When in past year and half, 2 years, you lot have received a whack of what is on the Internet about me, and how it is. I lived with this for 30 years, but to me, I never stood still, "why do I accept this abuse." This abusive behavior has been the pattern all the time, but too busy to make wealth, too busy to expand the KF worldwide, I never stood still. When you stop that abuse, everything changes, because there are new energies which come into your life. (1:58). The abusive behavior has been there, not only about me, the whole people around me, we've been set that way. We've been frightened, we've been threatened. One of the KS was told this, because of what, he has a job, and that fear has stayed in the KS for years now. The abuse hasn't been on one, and what we accept brings it to that point. There is no more time and place for abuse. ...

Q: .. When we go through the change ?? the whole planet and cosmos goes through the change. So does every soul, be able to move between physicality and non-physicality?

K- That is the beauty of the creation of Mitra. We have the ability, we have the knowledge, we have to choose. Do you want to always sleep, what do you call it, stay in the state of dream in your sleep, or do you want that to be part of you.

It's a huge difference .. Where you look at the plant and enjoy its beauty as a physical, and then at the same you are in touch with your soul, and the soul of the plant in D of the soul, and you see what the soul tells you, what is my beauty, have a look at this part, because you haven't seen it. You don't have the eye to see it. This is what is missing,

confirmation of both existences, at the same time, but being aware of it. Not needing to go to sleep to become aware of it. (2:00).

It's a very big difference, and this will bring us to that point. This is why I tell you, I am servant to her, majesty, to her beauty, because the beauty is not male or female. The beauty is the sense of enlightened, to see the beauty of the light of the Creator, the knowledge of the Creator. It's not again, in essence of the physicality, in the sense of the beauty of what is to come, what changes are there to come, and how this will bring us that beauty. Comprehension of the, what was missed by us in, as in essence of our own creator, which is our own soul.

Q:

K- ... Thank you for your teaching on Friday .. you are doing a good job

Q: ...

K- It's enlightening. This is the beauty of when you are there to create that condition. It's what I call, "love unconditional." You just give, and are there, and it comes to us in its own ways.

Any other question. (2:02).

Q: ... mentioning the island of Tonga. ..

The capture of the CO<sub>2</sub>, will this be used not just to spray on the cities, but will it be used for farming as well. Can we buy the product, the CO<sub>2</sub> captured from the plasma reactors, whatever they are ... ?

K- Yes it is, and part of the captured thousands of tons of CO<sub>2</sub>, part of it goes to farming, .. to cleanup of the rivers and pollutions. It is part of creating that connection.

We have a facility now in our lab in Austria, where we dry Gans's in a different way. It's an Austria invention. We have bought the unit, and there is an industrial scale of it. (2:04). That it will be brought into all of the KF .. CO<sub>2</sub> centers. We cannot hold so much liquid, we convert it into .. dried state, or a gel state, it depends what it need be. Then yes, it will go into farming, all sorts of health applications, the gel-packs and pillows you buy , these dry Gans's are embedded into it, in some of them. It's the same with the EU, which you see coming up. The dry Gans's are embedded into these. It's not just the normal systems. Yes, agriculture is the back bone of the use of it. We in time, work, we have a surplus capacities, we'll return these into the oceans, as a liquid and dry Gans, because in evaporation, this will change the climate totally. This is part of what is to come.

Q: ... I am aware that Tonga is an island, .. they have problems with high levels of arsenic in their waters. Your water purification T, would that be easy enough to extract this arsenic out of their waters, because it is effecting their health?

K- Yes, it's not just there, we have a number, hundreds of them, locations around the world, with different problems. Arsenic can be done, and can be supported to be extracted, yes. (2:06). We have the T, just now, industrialization is another problem.

Q: .. First of all I would like to express how happy I was with the news of the university in Brazil. ... Mr. Keshe you love overwhelms you, I thirst for the water of life, and hunger for the food of the Creator. You commented that physicality does not have to die,

is this soon to happen, will we be able to do this.? Will we use this on the "day" that is to come. Will we transmute, .. have to master this ability, this ability in the day of what is coming? How will we convert the cell of man into energy?

K- You convert the cell of the man into energy every second you live. But now it's understanding the process, that you can control. (2:08). We have in a way, the wrong mentality towards this process, and once we establish it, and understand it, we'll see that there is no limitation in the totality of understanding of the knowledge and T of the creation. We can solve it very easily.

In respect to the Brazil university, .. we have asked the Brazilian KF team to start looking for the accommodation, or the premises. It will be a replica of the other universities, or institutes. We are opening an institute, there is a very fine line between institute and university. The institutes we will not teach the basics of what do you call it, "the alphabet of the KF knowledge of the conversion of Gans or whatever." It's where we do the research, to develop new T, to understand more, to be able to comprehend more for all of us, the process of the creation. This will continue to be so.

We made the decision to go for university for Brazil, because we have such a large active community in Brazil, that we .. have to support them to extend it to the rest of the places. If you see how the Brazil team has reached the remotest Amazon jungles. It's our responsibility to support that, for the people in Amazon to understand as much as, (2:10). a minister in the cabinet, in Brasilia. About the knowledge and understanding, this is part of the work of the institute. It's the greatest pleasure what we have with Rafael, and the team of the KF in Brazil, to invest 500 million in building this institute and leave it in the hand of the KS of Brazil to expand it, to bring new technologies for the nation. We will interconnect all the universities, which the knowledge will be instantaneous, whatever is learned in the other one, can bring the rest in. The whole thing for the Austria KF is in the final phase, in the next few days, and then we go, we have received the agreement for 4 more universities, which will be built, and Brazil is one of them. It's a great pleasure to serve the nation this way with the knowledge.  
Any other question.

Q: .. Could I make the comparison with the manna that fell from heaven, and the Gans from cup one, both are white like flakes, they feed, heal, and must be donated. Could you make this comparison?

K- You made it, you don't need me.

There is something we got to... Go back, why did you make Cup 1. Cup one, or CL was made to support .. the Corona in the first infant stages, (2:12). .. 2 years ago, more or less, we are reaching the second year of.

We have received request from the Chinese leadership, and government officials if we can support the new wave of African Corona. We have responded, we are waiting for the response back from the Chinese L in the coming days. That KF will enter in the second phase in respect to all Corona's, Covid, or what we call, "combination of energies."

I have a message from his Eminence Ayatollah K of Iran, and his Excellency President Xi of China. The T of the KF in respect to the new energy packs, will be delivered in respect to what we achieve in .. 5plus1. It's another condition, that we have the T. We can deliver it.

You cannot use Cup 1, anymore for the new African version, and then we know there is another version will come out very soon. We think they might call it, the Argentinean, or the Brazilian version. The present African version, from South Africa, is a mutation of the virus for the high temperature. You got to realize, there is a very much big differences in the variations of the energy packs in the southern hemisphere, than the northern hemisphere. When you can manage to transfer the ones from southern H to exist in northern hemisphere, they create havoc. They create a lot of other things we don't expect. (2:14).

We know that the South African version of this pack of energy is set, especially that forces the African nations to take, whatever the controllers of this process have. Because the Africans were not prepared, they didn't have the financial means, they will not support the use of anything else. So they have introduced this especially, and they call it this name, that is to bring the African nations in line.

But the problem is, when this hits the northern hemisphere, it creates a heart attack. This is why, it is very random, .. undetectable, we don't any senses to it past. This new version is known to man before the time of Moses. It's not a new version. This version goes back billions of years. It's part of us, but now in the new strength has been introduced, in deliberate.

Research on this was started deliberately, again by Bill Gates Foundation in the background in 2015, to be cultured, to be ready. The history of this is very open to us, we know how it came in. The next version, which will come from Brazil, or maybe they'll bring it from Central Asia. We don't know where they are going to deliver it, will effect the brain, and emotion.

We saw some of this with the others, which were brought in, in the first two years. We saw people jumping off the cliffs, .. of places, all sorts. Now this time it is specific to the brain. (2:16). This uses part of the Herpes cycle. Herpes when you catch it after age of 60 - 65, 85% of people who have a Herpes online, will end up with Dementia. We know this, scientifically, data collected. But this .. new version, maybe they bring it in next month, 2 or 3 months, will go directly to the position of the fear, it will go into the position of other things to do with the emotions, and we'll see huge number of .. suicides.

Where with the African version, now we see a lot of heart attacks. It's uncontrollable because it shows a small fever, then the energy hits you. The body cannot hold it. We saw this in the first cycle in Tehran, where we were handling .. the first version. The rapid heart pressures and everything else. So now it's in the process. We are aware of this.

As has been the request of the Chinese government in past few days, to deliver a new solution for this. We are waiting for the Chinese L this time officially to put the lines down, and as I said to the Chinese L CCP, I am prepared to travel to China for 3 days next week to deliver the T, on the recognition of the T being there.

And they are playing with time. But you don't have time. Our message to the Chinese administration is, your Excellency President Xi, the T is at the disposal of the Chinese nation as it was before, (2:18). but this time recognition of the peace in exchange for T, through the Iranian government, and the 5plus1 negotiation, is sacrosanct. We'll respond to you as we said, tomorrow to your team in Vienna, and we expect to see what will be delivered by the Chinese in the long run to their nation.

Any other question

Q: Mehranez, ...

This teaching was sweet like honey and easy ... I have a difficult question that I have kept for years. (2:20). What do you think about the phenomenon of shadowing the soul. For example, .. the spirit of Christ which shadowed the spirit of Jesus, at the age of 13 until the end. The other examples, probably Prophet when he was bringing ..

K- What do you mean by shadow?

Q: Like taking command of, yes, taking command of the spirit.

K- You see, I explained this before, I live in the D of physicality. I carry the STP, because I was born to it. But at the same time I carry the soul of the knowledge of the Universe through Creator, and when I teach, if you listen, there is a very clear difference between the teaching and sometimes the question part.

Am I shadowed, or it's the same but at the higher level, the same soul speaks. You get enlightened to see further on. That's how it is. We don't carry 2 souls, we are not schizophrenic, but we get enlightened to a higher D of the knowledge, that we can share. It's not a shadowing, it's part of the access in the same environment to the higher order knowledge. It's like you stay in a library, all the books are there, (2:22). it depends which book you pick to share knowledge of. With this process, in this library, that all the books of knowledge of U is there. Each time we pick one book and we speak, and read that book. It hasn't changed the book, and it hasn't changed the man.

Q: I understand, is it all the time, or are there times of personal activities?

K- What do you mean?

Q: For example the prophets of Islam, they were asking him, are these words that are coming out of your mouth, the words of God, or is it your own word.

K- It is .. it depends on what we speak. When you speak to a child you speak the language of a child, and when you speak to professor you speak the language of professor, and when you speak to a world leader, you speak the language of a world leader. Is it the same man who talks to the child? Can you do the same thing with a president? But in essence it's the same, same man.

Q: Is it hard for people?

K- At the beginning, when I went through the process, it was very, not difficult, but it's comprehending what's going on. Once you setup up into it, you understand it, sharing it for the others to understand, at the beginning is very difficult. Once you, (2:24). become aware of it, that it can bring the change, and reaches the state of understanding the totality of it, it's a normality.

When .. I still have a book somewhere, I don't know if it still exists, I've seen it a few years ago. When I drew the pictures of a UFO, and how it works, when I was in ?/ Winchester College in Manchester with a bunch of our friends in a pub, in Knotsford, and I explained to them, and this is how it will do, and that's how it's got to do. The first time, for 15 minutes they were fascinated, but afterwards they could not extend the knowledge or understanding.

At that point I realized the knowledge which comes to teach, and sow the depths of it, it's beyond the understanding of the man. So I had to step back. I tried to share it in universities with my professors. They could understand a little bit more, but they were more pragmatic. Now teaching it, the way we do, it's the same man, the same knowledge, but it puts it a different way. For me to tell you there is a UFO, and I show its flight, and then it becomes another magic. But this time we taught you everything from the basic, that you all understand how the UFOs work.

So, but we carry the knowledge from the beginning, but it had to be watered down, tuned up, and shared in a very, very slow way. It's the same soul, it's the same understanding, the same knowledge, and it's been there for years. (2:26). It's just now we know how to what do you call it, water it down, that everybody can benefit by it. The soul is the same soul, nothing has changed. It's just that, the same soul, you understand more of, because you are more tuned to it.

A man teaching is not that difficult. You try to teach those who are much more infringed to a deeper knowledge of the creation. They are sometimes, a little bit of choppy waters, you start sharing knowledge in that level, at the level of the soul with them, and they want to know more.

Q: .. I am so moved by your sincerity, that you have always been sincere and simply with us. ...

K- Thank you

Any other question.

There is a request, which goes to all of you. Is try to understand, and try to connect to what you call your dreams, and then through it, you might start understanding the work of your soul. Then do not connect it to the physical D of physical life, but look at it as how it could exist without the physicality. And what does it mean, and what is it supposed to serve, and what is the outcome? (2:28). When you have a dream try to understand that dream, not in a physical condition, but in the process of how it took place. How come that, you had a dream about the mom today and what does it mean, and what is she trying to tell you, bring you to understand, and then look at the connection between the soul. How your soul is connected to your mother. And don't connect it to the

physical life. Then let's see how you start progress to understand the separation between the STM and activeness of it, and the physicality of the man. Then you might break some grounds in understanding your own existence, a little bit more.

Any other question.

Q: ... (2:30). Good morning from Vienna Austria. R: So you have an ally there?

K- We have many allies in Vienna at the moment. We are doing a lot of good work, especially thanks to Iranian officials in the background without us knowing they are there. But overall everything looks good.

## **Commercial Break** 3 of 3 >> 409 KSW 12/2/21

plays creation video .. (2:48).

(2:50). Q: Kay .. doesn't have good connection .. (2:52). Rick talks about Canada ...

Q: Kay ...I have a question about Mitra, (2:54). obviously, I understand that Mitra's soul has been reborn this year on 21st of March, and you have mentioned about this physicality .. when do we expect Mitra's physicality to manifest, in our time, or maybe next generation our children, .. would we have the pleasure of feeling Mitra's physicality now in our lifetime?

K- .. wait and see. It's the recognition, it's not the birth. It's a big difference.

Q: I understand, so this is when we elevate and understand more of the knowledge you have been trying to teach us, and we collectively understand and have more access to our soul, and to the ethos of the universal being and existence. Is that when we feel Mitra is being present?

Q: repeats ... (2:56).

K- That has been felt by man for thousands of years. We only changed it when it suits us. This is one of the things, which is essentially part of this work. We only choose when it suits us to recognize. This is part of the .. we only go back to it if we need, when we are desperate, and there is something we need to solve with it, but we don't handle it, that it is always there that we can nourish it.

I had this physically with the Chinese authorities in past few days. They come back, they ask for .. urgent help with the new energy packs. "Can you give us another solution," because they said, "can we still use Cup 1." You used it, and it didn't work, that's why you are back, or you wouldn't come and ask a question. I said to them, .. in one word. ... that is, you came and you abused us, when we delivered the virus for the pig. Once you took it, we showed it, and then it went disappearing into your system - stealing. Then you came and you used it for the first energy pack in January, and then when you got away with it, you again went on a path of abusing it, instead of recognizing it. And now, (2:58). that you have been to all the KS, and you couldn't get help, you are back asking me to help, but don't want to recognize, or go public with it.

So you have always been aware that the knowledge is there. But the answer was very interesting from their chief negotiator, or their spokesman. He said, you have taught all

your T to the KS, and we are using them. I said, go and use them, see if this time they can save you. You teach, and they have helped us. They said, now the knowledge belongs to China. I said, the why are you here? Go and ask them. I am sure you asked them, and they have no use. Some of your leaders have already died.

It's the recognition of understanding. It's oneself to understand and nothing more. What I said to the Chinese is very simple. I said, you want it? Talk to your negotiators in Vienna, the Iranian government will put it on the table on behalf of the KF. I informed the Iranian authorities, this is what is going to happen to the Chinese. It's recognition, it's the same, and exactly where it sits. Not just use it when it suits the ?? demand of your need.

This cycle of the energy, which has come from Africa will kill many of the world leaders. Because there is a discrepancy in some things. None of the world leaders, and politicians and diplomats need to receive the, what, they force everyone of us to have. We see, .. (3:00). this new energy pack was nationally based, the Chinese, Iran, the Italians, now African. Then now, have become position, job based. None of the leaders need to be using it, or their families. This is a shock to many of you, to understand for the first time we have an energy pack, which is man, position dependent. But this one is different. This one, the new African version, knows no position, ?? .. now everybody is at it. Everybody is vulnerable to the new pack of energies.

So they know, but they abuse it, and then they come to understand, that we have to recognize it. You know, we have to be able to recognize our position, recognize the reason for our position, and recognize what does it do for us in that position.

Q: ... what I have been hearing, to what you have explained, the arrogance... (3:02).

K- It's not the arrogance, it's thinking you are privileged. It's not the arrogance. It's thinking that you are privileged. That sense of privilege is what causes the problem for them. Do you understand.

Q: Entitlement. Feeling entitled.

K- Entitled .. yes, more or less, yes.

Q: God bless our soul's direction, not the arrogance, the sense of entitlement is totally banish the sense of entitlement. .. Embracing the new knowledge with a humbleness ...

Q: In future as time goes by and humans are having more access to the soul, and we live hopefully in both D we live as one. Lot's of things will be changing. So humans in physicality will lose its appearance. Do we want to get rid of the human race, because obviously this is a race, she is representative of what has been created in us. ??? this physique, this shape belongs to the planet earth ..

K- Can I .. I am going to stop you there. Correction,?? Did we change, (3:04). as we became Chinese, or English, or African? No. It doesn't matter what changes in the D of physicality, the essence of the emotion, and the rest of the true man will be the same. Nothing will change. There is no reason for that change.

Q: .. we have certain characteristics which are unique to humanity. ..

K- Of course we have 2 eyes and 2 legs, of course.

The only thing unique to man is love. There is still love in different D, but the way the man loves is unique, it's the beauty of it. But he cannot extend that love to be universal,

it's selective. It is possessively selective, and that's where the problem is. That's where our problem sits in totality with the human race, or with ourselves. Selective - why can't we love everyone in every way? Selectiveness of it is the problem of it.

Q: Definitely a sticking point, and a very important point ..

K- .. It's very sticky, because when you stick, why do we need to just love one, or can we love everything else? (3:06). Then why do we push it?

Any other question.

Q: .. Here in Brazil we use a way to heal, we use sympathy. For example for a spur on a foot, we cut a leaf from a palm cactus and remove the thorns and place the sick foot on top of the leaf, and cut it into the shape of the sick foot. Then we put it on the roof of the house to dry, after it is dry we throw it into a river, and the sick foot will no longer be sick. Question, is this the force of the PI, the STP?

K- I lost some of the question repeat ...

Q: repeat ... we use a way to remove some disease using sympathy. (3:08).

K- Maybe a combination of the two, maybe the confirmation of the two, in how we see, and how we would like to see the results ... ?? confirmation of it comes with it. But do we put into the leaf, and changes in the leaf, because we have connected, now we have what I call, a Gans outside, with the new knowledge we can explain these things. Do we create the emotion of what is wrong with the foot, as a weaker PI within the structure of the Gans of the leaf, because that's what it is, and then we dry it, and then dry can be taken into atmosphere, whatever, when the energy is transferred.

It's a very interesting, but in so many ways, with the new knowledge we have, intriguing to see how we interpret the new knowledge, in the shape, (3:10). and condition of the new understanding.

R: So it's a similar principle to what's called the Pain Pad, and how that can work to remove certain afflictions and so on. Sometimes we get rid of the pad after its job is done. So it's similar to using a leaf, which is the same multilayer amino acids .. involved.

K- Yes it is.

Q: .. How do you define the spiritualist doctrine.

R: I am wondering if perhaps, that is part of the spiritualist doctrine maybe, that removing disease using sympathy. I am not sure, I have not looked up spiritualist .. Is that a familiar term?

K- I don't understand it either. It is what we call, part of that process, we understand. "I transfer part of my energy to you, and you transfer it to somebody else." But it has to be understood in totality.

R: This is probably the doctrine is, that there is a spirit in everything, even things that are inanimate and so on. Which you have you talked often, even a stone has a soul, for example. So in a way this is a spiritualist doctrine. But that is just one tiny aspect.

K- Yeah, but that is in the writings of Bahula, .. it says even a stone has a soul. (3:12).

So we understand more and more as scientists, understand more and more. So ?? ..

R: sorry we are missing your voice ..

K- ... it's for us ... hello ... I said, it's more in a manner, that we understand part of it, or some of it. But it's very much if you look at it again, it's that situation with the Gans's. We have to understand how we define the spirit, and how we define the soul. Then what we call, spirit, which is the STP. Then if I can transfer some of mine, if you are humble enough to accept, than you can carry.

This is what we say about the future, what we call, pilots of the flight systems. Do they become that, that they carry the STP in the D of his soul, stands on its own as its center, and then deliver it, that the STP takes the feature at the point of the destination. Now we understand, we can do more, now we understand more in the truth and the real condition. (3:14).

Any other question.

Q: .. if we put our CO2 cup in the middle of our garden, or surrounded by plants, will it create better quality Gans?

K- It certainly ?? will absorb energies from its environment, and will give to its environment. As your environment is in the garden, has plenty of trees, shrubs, whatever. They are the CO2 capturers, but of a different strength. Maybe .. added to.

I said this to a KS.. put the CO2 Gans under a tree at night, and then put the same batch of the Gans CO2, under the same tree during the day. And use another batch of CO2 outside away from the tree. Then take the Gans's of it, and see how you feel. Or give the Gans's to another plant and see how it feels. How we change it, would one plant die, would one plant grow faster. So there is a reality about this.

In so many ways, if you think of it scientifically, why do the plants absorb more CO2 at night? Because different M field connection with a field of the rays of the sun, (3:16). are created. But ?? are still absorbing. it's not that they switch with the light. Look at the evergreen plants, how come they always stay green? Because they use a spectrum, which is always the same, winter, summer, cold, whatever. So they don't need to be specifically linked to a certain given strength of CO2. Now we understand this knowledge, it's a lot to be done.

These are what I was saying before, it needs to be researched by our researchers. One of the interesting points is, now that we open the space to man, the key point is, what happens if we take a Gans of CO2, and take it to the moon, or another position in the U. How will it change? Would it stay as a Gans? Would it change color? Would it change its volume. ... ??? go forward with ?? need to be answered. Then what we learn from it. We change the M field of the condition of the C in our body, and in one point, it becomes huge, to become a cell of the .. body of the man for the meat. And the same C in another position in the liver, does different thing, different M field. (3:18). Would the CO2's we take into space, or any other material will be the same, it will be like a gel, you go through it. Do we need to produce new conditions, materials can stand new environments in space.

These are what is to come and what is to be answered. This CO2 will change. Yes, 100%. Because from the tests we've seen, from Raman spectroscopy, from Infrared .. we don't see one peak of CO2, we see a spectrum of the CO2, which is a Gans isotopes. If one of these isotopes is in your Gans, ?? locks with one of the plants, it might, it will change itself, and bring others into play. And would the same, the CO2 you put under an apple tree, would it be the same if you put the same Gans patch, under an orange tree. Then if it's not, why do we have difference in fruits. These are the things which we have to be open minded, we can't have ?? because this is what it says. We have to look at the totality and understanding, and then we can change this.

Any other question. (3:20).

Q: .. What does it mean when you rarely remember your dreams?

K- ?? .. physicality so we don't remember it. .. I said, we call it, forgetfulness, we prefer to forget it, or it has nothing to do with the D of us in a physical D, so the soul does it job. It's just like walking down the street, other people having discussion, the other one cuddling each other, it has nothing to do with me, you just walk. But you know you have been witness to something, but you don't know the name of the guy, or the name of the people there. It has nothing to do with you. It's the same process. Go back into the memory bank of the soul, and you'll find out what happened in.

Any other question can we finish in next 10 minutes.

Q: .. (3:22). I do not know how they isolate and identify the new strains in physics with this madness in physics with genetic modifications, but in PI how do we identify the different fields of the energy packages for which the Cups were used, Alpha Delta etc.?

K- Go back to Book 3, there is a paper published, I think you can buy it off the KF, it's called, "microbes, bacteria's, and viruses." read it and then you'll understand it.

Any other question.

Q: .. Germany Bavaria ... I would like to ask if you are interested I give some deep meditation for what is, (3:24). healing, and to guide the people to use the higher ?? ascensions, in this life to heal ourselves and free our souls, ..

K- This I think has nothing to do with us.

Q: Yes, when you like, I have time to give some sessions.

K- That doesn't come within the work of the KF.

Q: What do you mean .. I can't hear you.

K- That does not come within the work and the scope of the KF. We don't get involved with these things.

Q: It's to integrate what you are teaching ..

K- A lot of. I understand what you are trying to tell me. A lot of KS of different expertise are bringing their expertise, and using the Gans T, to bring to, to make a better things for their, whatever field of work they are in, be it doctors, be it psychologists, or whatever, or being in a pharmacist, or anything else. This is what the beauty of the teaching is. We teach it freely for you to see how you can integrate part of it into your work. Into making a better life for others.

But don't use the Keshe T in a way of trying to use it, as a new PI T to elevate the wrong ways of teaching, and wrong ways of bringing what I call, "school of thoughts." That's all we ask. You are not the first person, many .. We've seen it with the artists, (3:26). they put the Gans into their paints, and they make a new painting with the Gans's. ?? not to use it, but it's ?? ..

Q: Okay Mr. Keshe thank you.

K - .. that's all depends on you. Shall we call it a day.

Thank you for today. It's a little bit choppy this time, when the ?? breakthrough comes, I hope it will not be the same next week. But even it comes as part of the work, we have to be with the teams, where we are, will shift rapidly, in the teachings, if it needs to be. And we delay the teachings or we bring free teachings forward, because this is part of our work. We are here primarily for next 2 or 3 months, as a backup to advisors, or in a way, pushing and shoving things with these people, to get them on the right path. Thank you

...
