## **ENGLISH TRANSCRIPTION**

(:16). K- ... We welcome you back as we endeavor to break new grounds, in so many ways, changing the parameters of what I call, the criterion for work of the KF. As you know we are closely involved with the peace talks in Vienna, and we see a breakthrough, this breakthrough will be coming through most probably in the next couple of weeks. The Iranian team has returned back to Vienna yesterday and with it, with the backing and support of the KF T, in the hand of IEA (means: IAEA headquartered in Vienna: International Atomic Energy Agency) we enforce, we push to bring what we call, the condition of mutual policy.

As a nuclear physicist we give our oath to peace. In that respect, we, like, if you are a doctor, you ought to, what we call, medical groups, we work the same through IEA. We respect the heads of IEA in being part of an IEA team, with the KF disclosing new technologies, that become available to 5plus1, excluding the European Community.

(:18). This will take shape, as we will see, and become gradually the cornerstone of the talk.

There is a major problem flow in the 5plus1, which now gradually has come to light. We know the American representatives are on the line, .. the Russians, and the Chinese are on the line, we know that the representative of Iranian government is on line. It has to be clearly understood, that Iran cannot be sanctioned for 3 & 5%, or 20% enrichment, where the T of the space needs 100% pure nuclear material. We have seen this in tests in Tehran some years ago, and a follow-up test. So the dilemma for the 5plus1 and the IEA, is how do we stay uneducated, trapped in the thermodynamics of the nuclear materials of today, or we all leap into 100% enrichment, pure material which allows us to travel the depth of the space. Which brings in new dimensions (D) of technologies in all sorts of applications.

In a way, we have, and we bring a D into the talks, that Iran needs to enrich 100%. It's, its God given right, it's an intellectual property right of the nation, but with a difference, with a proviso, that Iran mutually shares the T and knowledge of KF with American government, Chinese government, and the Russians, excluding EU. European Community will be totally excluded from all these, as you've seen at the beginning, Iran took the same pattern. (:20). As we discussed, European Community members, UK, France and Germany are excluded from any negotiation. This is what the KF required from the Iranian leadership and it was adhered to.

In so many ways, we have reached a point of breakthrough. But it will take time, it takes time to understand, it takes time to bring maturity to all sides. In reality, if we are sanctioned, or sanctioning Iran, or other nations, who develop into nuclear to be always, in what I call, third class knowledge seeking of the new ... (break in audio ..) the 100% enrichment changes the position. Changes the whole dynamic of what we call, "mankind needs for development." We are in line with the needs of his Excellency President Biden of US, where he says, and it was the backbone of his election, "new technologies."

In the coming time, in the documents which have already be offered to the Iranian leadership, some 10 days ago, and the documents, which is in the hand of IEA, and the Americans and the rest of the national securities, we openly challenge, to allow Iran to produce 100% enriched uranium and plutonium, and at the same time other nuclear materials, and at the same time we openly produce dimensions of the radioactive Tritium, for deep space travel. Iran cannot be sanctioned on one, and then the other side of the spectrum, (:22). Iran cannot be stopped to develop deep space T.

We have negotiated with Iranian officials for long enough, and we see that the Iranian leadership has taken the position, to hold back the sharing of the knowledge. As the inventors and developers and sharing of the T, KF took this right away from Iranian government. Officially we have entered negotiations with the IEA, not to negotiate with 5plus1, but collectively to find a solution for all the nations, progressively to move in the direction of the enriched, what we call, radioactive material, purity as much as possible to 100%, to 99.999, that allows all the nations together, move in D of the space T. We have no choice, KF with the T just delivered, and T and systems, which are already on the table have the capability to make any nation overnight, one of the leading nuclear technologies in the world. We shared with you Knowledge Seekers (KS) the foundation

and the fundamentals, but we share with the scientists on highest level, in a different way. The knowledge, which cannot be comprehended, and at the same time can be abused by others to show they are superior.

I gave the Iranian government a long time, a chance to take that position, we thank his Eminence Ayatollah K of Iran and his negotiating team in Vienna. We welcome them back to Vienna, as we see them coming with more proposals. But this time KF has put a proposal down to IEA. In our future meetings in the next few hours, we will expand, (:24). on sharing the knowledge on the basis of the KF, with the support of the Iranian scientists, and the backing of the American NASA scientists, who are working on the same. We welcome the Chinese who have worked a long time but they don't have the key and the coding of the system to fly.

We have to take this position as KF, as .. the developers of the T, the founders of the T, which is all of you. Literally, all of us knows, KS today with us, or those KS who have been with us, and have passed away, or they have moved to other positions in the R&D of their own maturity, to share this knowledge with our governments. As I said before, we gave it to the government, they hid it. We gave it to you, you developed it. You brought it forward. Now we share it with the organizations, which make the decisions on what we call, "the structure of the upcoming flight and systems." The reasons we have shared the, what we call, "the understanding of," with IEA, is because IEA is a backbone of all negotiations. In a way, IEA plays obedient servant to the governments. Where with this T, IEA become the dictator of, or in a way, not a dictator, but indicating, and dictating the new patterns of the use of nuclear material.

This does not mean that the enrichment of the 3, 5 or 20% by Iran, by Chinese, or the rest become the weapon of T. Using the 100% enriched nuclear materials, which KF has developed the T for, allows a direct control of a ?? only development. In a way, it stops the nations to develop nuclear technology as a weapon. (:26).

When I left for Tehran in 2008, I had one prerequisite to my agreement with the Iranian government, signed and sealed in the parliament of Iran in 2008. That my T would not be used as an offensive, but it will be used as a defensive. And we have seen over the years Iranians have kept to the ethos of the signed document. It has to be understood, that the totality of the knowledge belongs to KF, which is all of us. Which is the totality of what we do, what we've done, and each one of us, has carried one corner of this huge carpet of knowledge, to carry forward to the next step.

My request from the Americans on the line, the Chinese and the Russians, and the IEA members of the team, is as follows. Let us share the knowledge of Iran freely with all nations, and make knowledge as basis for One Nation OPOR that, that becomes the nation of knowledge and T. In my talks with the IEA, and what is to come in the coming days and hours, is very simple. KF, which is all of us, (:28). exchanges the knowledge with the world leaders for peace on this planet. Which means we request from Mr. ?? the head of IEA, to take a lead in bringing the condition, that the nations can understand, when it comes to T, we are all equal, irrespective of color, race, creed and politics. In my

upcoming talks with, and within 5plus1, excluding the EU, is that we have to take steps to make sure that the T is used only, and only for application in peace, application in development of peace, application in understanding the totality of the peace. It is paramount to all of us, and to all the KS, that we are in the verge, we are on the verge of work, that brings all of us a new D. We are not empathizing, we are not pushing with, "we have the knowledge, we have to be our way." We have the knowledge, it has to be all of us, our ways.

I emphasize with the IEA, EU will stay out of the framework of the discussion and knowledge, (:30). till the state of Belgium, situation with killing scientists, and my assistant is cleared. In creating conditions that brings conflict within the scientific world. The sanctions will go on the nations that carry out these kinds of work. And sanctions will carry on with the knowledge and T, with the nations, which are not, and do not have respect for children. We turn the table the right way, not for the knowledge, but for the abuse, which is the correct way.

This will carry on. I have informed the German, French, and British in the different ways that exclude the nations in Europe, who are in child trafficking, and killing scientists, ?? then we talk, you come part of. The way the sanctions was put on knowledge, we put sanctions on abuse. This will be taken through the UN in the coming weeks.

There is one fundamental flaw in our work, and that is we never put restriction on, no nation for knowledge, but we put restriction for development of the space technology for the nations who abuse it. This will carry on into the next phase. I thank the IEA groups who are in the background, and the Iranian administration for keeping to the ethos of the agreement. We don't work in the public in the front. We make announcements within the structure of the KF, which is our public platform of teachings of today. There is a lot of hope. There is a lot of breakthrough. (:32).

The 2 parallel line negotiations with Iran will follow. One on the proliferation of the matter state of the T, and one on the proliferation and production of the nuclear materials using the new Plasma T. which again belongs to Iran. In that process we see how progress shall be made. Do we run the 2 horses parallel, or do we bring the 2 together and run as one?

As we said, and it's thanks to you KS, who have made this possible over past years and years, is that, we are getting home. We are reaching the home of peace, but as was the motto, and stands for all of us, "knowledge in exchange for peace," works. It shows the governments how feeble they've been, and at the same time brings that, to all of us, that we need to accommodate each other. We need to understand the accommodation of the knowledge and T has to be on the back of understanding, that the T belongs to all of us .. as citizens of this planet.

In the due course KF will handle the situation, with what we know today as energy plasma (Pl) packs of different names and nationalities, which is popping up, that creates so much mayhem. We have to sort out the situation with .. 5plus1, and through the

5plus1 community, handle the situation, with opening the space and showing that the packages of PI are part of our new life, we cannot inject and reject. (:34). We've seen the new D, the PI strengths, which is traveling, and causing things, which we didn't know. What we've been touched with, the new plasmas, which now we understand, that African version of it, this is nothing yet, to what we'll see in the first excursions. In the first travels of the deep space. Because mankind will become so, .. in baffled by this new understanding, that one will come to be able to collect, and to use the energies of the PI within the structure of the work of what we call, the space T. We need to be able share this knowledge freely amongst each other, .. to understand, that this T belongs to every single one of us, and it needs all of us to be able to .. transfer and transmute, and at same time, be able to use it for ... application of our use in deep space.

### **Teaching starts here:**

We have made many, many cases in the past, with the special processes, with what we call, (:36). sharing of the T beyond understanding of the physical life of the man, but in the D of sharing of the knowledge in understanding the totality, with the whole of the mankind. What this means, this is part of the teaching of today which has to be understood by all of us. I am trying to find the correct way, that we all understand, to explain this, that in the process of .. teaching we understand the totality. In the process of the teaching we become, to comprehend the difference between the knowledge of the physicality and the knowledge of the soul, or space, to what we call Universal Community. Where the deciphering does not rely on the extent of the understanding of the D of the physicality. Both in the .. the essence of the Soul of the Physicality (STP), or in the essence of the physicality. We know that the mankind, (:38). has lived a 2 track life, one in the D of physical, and one in the D of the soul. But now we have to find to be able to understand that, "I made man in the image of Myself," as we said before many times, is even in the knowledge. Is even in the level of understanding, .. level of the emotion.

With the upcoming 21st of December, where the manifestation of the totality of the what we call, Mitra, is to understand, that the Mitra is all of us. It's the collection of us, in the birth of a new cycle. It's understanding that the child of this birth, is a child of totality of the knowledge of the Creator, within His creation. We have to understand, that the time has come that the mankind understands both, the level of .. the physical life, and in the D .. the soul, or Universal. As we said many times, man will join the U Community. But in reality the Universal Community (UC) has always been within the man, in the structure of the Soul of the man (STM). The physical D has ignored the existence of the U Community, through ignoring the existence of his own soul. (:40). It's the man who has isolated himself, it's the man who has punished himself in not being able to understand, that within the structure of his soul, as he has access to all the knowledge of the U, is the access to UC. This is where we have to, with the teachings, to bring both the D of the emotions of the physicality, and the emotion of the D of the soul, to become unisons.

In a way, that one understands the language of one, where the other one has already understood for billions of years, the language of the STP. The education, and upbringing

of the new knowledge, is not that we will go into the deep space and we'll see this alien, or that position. It's to understand, that through the understanding of the existence of the STM, man will get access to all the knowledge of the U instantaneously.

This is where the teaching is headed. This is why you call it, and it has been said, the point, "the day of the end." The day of whatever name you call it. The reality is, that day, as I have said before, is the day when you recognize, when you in a way, connect, you become part of the existence of the U, by acknowledging and freeing the STM, within the D of the STP, that the 2 can interact.

In a hidden way, in the paper called, (:42). "Inter-atomic Fusion," I explained this in a very hidden way. I brought this forward, I brought this, that the understanding of the work, the understanding of the whole structure, that man has been the cause of his own separation. The Day of Judgment, where we judge, do we want to be part of the UC, and be existing within it, or we let the physicality go, where our soul has always been part of the UC, it finds its position. In the past few weeks, we gone, and I pushed towards more what you call, theology, because it is not theology, it's understanding the field of life in the U. Theology exists when you put mysticism around it. The reality exists when we understand the knowledge, the truth about ourselves, about our own existence.

It's been a long time of teaching, from the time of every prophet. Man has been made gradually, for those who understood the process of the education, step by step to bring man to today's point. Be it the true writing, the true essence of the messages given to Moses, to Christ, to Mohammad, (:44). and the rest. It's been a gradual education for you to understand, the .. ultimate goal of the unification of the STM and the STP of the man, that the 2 can coexist, but one becomes the support of the other, when it is in the material state, and one becomes the support of the other, when it is in the UC state, or what we call the state of the dynamic plasma. Humanity has taken, a what I call, a diversion, for a long time, to ignore it through theology, but in fact, the theory of existence sits within the structure of the life of the STM.

When you call it whatever name, "The Day of Judgment," the "End of the World", whatever you put. That day of judgment is for you, when you mature to understand in the physical D. Because when you die in the physical D, your soul has already taken its position, and it's been what we call, "taken dimension," in where it was safe for it to develop, and to become the seed of another life. The Day of Judgment is the day when man in the present existing life recognizes the beauty of the creation, and understands to respect, to connect, and interact with his own soul in both D. Then we have reached the Day of Judgment. (:46).

This where none of the religious leaders, none of the religious people, none of those who looked for understanding the process of creation, could ever explain. The maturity of the man is not to be frightened from the point of the separation of the physicality from the soul, but to be able to work together, that the physicality will have no demise, as does the STM. The point of the recognition is the Day of Judgment, where you judge and you understand. The process of the teachings has been for you to be able to interconnect.

We are messengers from the soul, to the STP, but the message has to be read the same by both sides. In the D of physicality, man has brought, and has thrown more "spanners" into the work, that will clog up everything else, that he cannot understand ?? it. My call goes upon the religious leaders of the world of today, to lay down your frock, and understand the process of teaching the correct way. The way you all souls understand, to become the teachers of showing the true dimensions. Those who are fake will show themselves very rapidly, because they will be clogged up in the physical D.

On the other hand, it is the responsibility of each man's soul to understand the truth about his soul. In that way, man will understand to respect one's soul, it means to respect the others. It means to always be at the position to ask, (:48). and not to take. This is the change. I ask my soul to allow me to be connected to. I respect the existence of my soul, through the D of my physicality, and the D of my physical soul.

In so many ways, now maybe you understand more about the spirit and the soul. To understand, what stands between the man and his soul, and his Creator, is the man's conduct itself. When you ask with the purity of heart, you shall be given the right. When you take without asking, you'll be blocked, you will not be enlightened, you will not be given the right. Mankind has to find how to ask that question from his soul, to be given the right to live within the D of the knowledge of the U, and UC, and collectively within the D of the knowledge of the Creator.

Understanding the totality is the cornerstone of laying down the fears, that everyone will understand what is taught, but everyone can be enlightened with the knowledge, which has been released. Teaching is the way of life of man. Sharing unconditionally is the condition of the life of the STM. Somehow, (:50). the 2 have to intermingle, the 2 have to come together, that the humanity reaches a new D, .. come to understand the totality of its work. The mankind of today needs to be part of the essence of its own existence. Mankind needs to be part of the essence of the UC, which is the existence of his own soul.

You always looked that you will see a UFO, you will see something else, you will touch and feel something else, but in fact, it's all within you. It's you who has to bridge that gap, it's you who has to put the STP close to the STM, that it does not need the capacity of the brain to create emotions of the mankind with it. Where in that position, within the structure of the STM, you feel the emotion of the soul. You become that seed of the brain, not the soul to become the seed of the physicality of the man. Humanity in the coming time, in the coming weeks and months and years, will start to be enlightened in masses, to understand it, to be able to develop it.

My teachings will be released beyond your imagination across this planet in coming weeks and time. In so many ways of its own, will take its own shape. (:52). Will bring sanity to insanities, from killing scientists for the benefit of pedophiles, and those who attach to D of physicality. Use the physicality, enjoy the presence in what is given and what is made available, but do not make it a cornerstone of life, and the KF, which is all

of us has already reached unison in understanding of the connection of the STM. It's a collective soul of us, and KS who truly seek the knowledge of the creation will enlighten that position.

What I call, the candle, has been lit, and it will shine across every dominion on this planet and beyond. The life of peace for humanity has started. The new life has taken shape, and that new life, is collective effort of, not the D of physicality of the man, but the D of the soul of humanity, and as I said, I always ?? the two, those who carry the candles and those who think they have the candles. And one day, one will light the other, and the other will support the other one's to be lit.

My call goes out to all you KS, be proud that you have been touched with the knowledge of the Foundation, that , that knowledge, is the key for you to find the essence of understanding of the totality. My call goes upon all you KS, endeavor to understand, (:54). endeavor to share, endeavor to comprehend the reality about your own existence. And then try to reach your soul, by understanding the operation of your STP, but at the same time, be humble enough to live amongst men, that in time, every single one of you will become a messenger of his own time and place, for your own STP, where you bring the message from your soul, to the STP, and you enlighten according to what you need.

As I said, in the world of the U there are no universities, and there are no central banks to rob. The only punishment for man, is when he deprives himself from attaining and receiving the new knowledge. There is nothing worse than that punishment, what we call the hell, and the heaven. When we deprive ourselves from gaining the knowledge of the Creator, is the worse hell man can ever live in. And attaining to understand the knowledge of the creation is the heaven that it brings, and opens doors to all of us. As I said many times, the gate, and the key to the heaven is in the hand of the man himself. All comes through understanding the Knowledge of the Creator (KOC), and not in a way, the gates to house or wealth.

Today I opened up a fundamental key point for all of you as KS, as these recordings will be listened for millions of times across this planet and beyond, by those who understand, the change has already started. It is your obligation to enlighten yourself. (:56). There is no punishment, except you who deprive yourselves from gaining the KOC, and through understanding, you become a member of the UC. Then with that knowledge build your own UFOs, build anything you like to travel any D, because then you have access to all the knowledge of the existing totality across this planet and the U. We have brought the D of the knowledge and the love of the Creator on the planet, for Mitra and the Creator to enjoy. In that point, mankind has become to understand, that the Mitra is the soul of the totality of the creation.

This is what you have to understand, and this is what we endeavor to change, that you understand more about your own existence. It does not matter how you play the game. You do not need to be human to be enlightened. Enlightenment can come to the animals and the trees, and those who travel the depth of the U, in the far corners of the Unicose. As the key of enlightenment has been released. It's for you to use it to open the STP to

the soul of yours, direct without intermediaries, without the prophets, and without what I call, religious leaders. We invite even the religious leaders of the world to open the gate and access their soul, and see what they have done in the past times, has been correct, for their soul of the humanity, and the mankind, at the same time.

We ask the KS, as you have done in the past few weeks to raise the soul of the negotiators in Vienna. (:58). To raise the soul of all, of the humanity, and the ones beyond human D and positions in the U. As now you know through your soul you can reach every created things in the U. As Mitra brought every single line from them, to be part of the creation of the new generation of the life for the children of man.

Understanding the process is not easy, as we have been put through different dogmas by our leaders, and religious leaders, and our own feeble understanding of the creation. Mankind has entered the point of understanding the totality, but it's mankind, who can keep himself from becoming part of the totality. I have taught enough for those of you KS who understood the teaching, to walk away from the path, and to join, to understand more to enlighten the others. The souls like Jalal, and Alex, and the others who have been with us, to guide us through different steps of these progressive developments over past years, has brought us to this point. Now it is us who has to become that next teacher, to teach our own physicality, and not the others, in how to become connected to the D of the STM. And then thy shall need no Messengers, except the message of the Creator, which is given from the STM to the D of the STP, then the man will exist and live for eternity. As eternity is the existence of the Creator, and the man is created from the D of the existence of the love of the Creator. (1:00).

Today's teaching, if you understood, has opened a new door for all of you, irrespective of your color, race and language, and the D of the positions where you are on this planet or beyond. But there is one thing for sure, the love of the Creator shines, and will shine amongst all of us, and at equal share. It depends if you want to hide in what I call, "the holes of the underground of the ignorance," or we stand in front of the sun and absorb every single ray, that it can shine upon us. Mankind has 2 choices, to hide in the rat holes of ignorance, or to stand outside and shine like the sun itself. As the STM, when its truly understood the knowledge of the creation, will shine the same as the sun, and some of the souls who have elevated, when they shine, the sun will absorb from them, then shining on them. This was given to the state of the soul of the Christ, bless his name. This shall be repeated by every man, who wants to reach that state of what I call, the Son of God. Which means the lights and what we call, the knowledge of Creator in man, not sun as the created thing, but the sun as the rays of knowledge and love of the Creator.

Maybe today we have broken the path, .. in what is to come in our negotiations with 5plus1, (1:02). will bring to the point, to enlighten totality of humanity, to protect the children of the new cycle of the children of man, which with the birth of the new cycle, will bring the new D to all mankind. Amongst us, within us, and within ourselves, we'll find both the STM and the STP of the man, to work together to become one, to serve the totality of not humanity, but the UC. Maybe then you shall understand the position of the new universal messengers, which is in a way, the light of the Creator.

We go for a break and we come back, and during the break think of one thing, not the products, but the product of your soul which can enlighten and support the negotiators, and especially the members of the IEA, who now will have to walk the path, very fine path of how to bring the KOC, and the knowledge of the man to understand how to use both, to create prosperity to humanity in both D. Maybe sooner or later we achieve it, but until they don't understand, we still stand still, with the totality of the knowledge.

Thank you if you would like to go on break ... (1:04).

**Proofed >>>**

**>> BREAK >>** 410 KSW Dec 9 2021 (1:09).

R: (1:10). I thought we could take 2 minutes SILENCE for peace talks in Vienna to give from our souls to elevate ...

(1:16).

K- .. Yes any questions you have ...

Q: .. would it be pertinent to clarify for us, despite your modesty in making it difficult to speak about your mission for these new times when human science finally meets with Divine science. Could you tell us the source of so much divine knowledge and how you perceive it and interpret it for our understanding? I think your answer would help us to bring in more .. (1:18). BC.. new KS perhaps.

K- Would you like to read again ..

Q: repeats .. would it be pertinent to clarify for us, despite perhaps your modesty in making it difficult to speak about your mission for these new times when human science finally meets with Divine science. Could you tell us the source of so much divine knowledge and how you perceive it and interpret it for our understanding? I think your answer would help us to bring in more influence to the new KS.

K- The enrichment of the knowledge comes from within, not outside. It is, when we talk about the generality of the knowledge of the past, or the present. I am trying to explain it in a way, as a unification of the truth. (1:20).

The knowledge we had, or we gained up to now, doesn't matter even if it is in boiling the water, which kills the bacteria, or nuclear weapon T, or anything else. These are still part of the knowledge of the Creator. These are not the knowledge of man. Any knowledge we gain, it is part of the knowledge of creation. It's not that, as I said, if you read the papers, the scientists, are prophets of, are Messengers of the Creator, the same as those of

theology. So there is no separation, except what you want to put on it. The extent of the knowledge, which we put on, is that the whole structure of the knowledge is all the same, it's one line.

It depends how much you are enlightened to see further down the tunnel of the knowledge. In what purity we see, and what we decide to see it, in which part. It's very much like, when you decide in the science to go through the medicine, or become an engineer, or you have one which sits and sees the whole lot. (1:22). So we are those who see more, and have access to more knowledge. Our knowledge is the knowledge of the creation and the Creator. The same as yours, but you have chosen to see, let's say 10 cm ahead of you, which is all physicality. We choose to see directly to the light of the Creator, to the end of the tunnel.

In that process all the knowledge's within that, is open to us. In a physical D we are no different. In other dimensions, when it comes to the knowledge, we understand more, we see more, and in a way, even us getting enlightened in stages by stages, that we understand the process ourselves, that we can transfer the knowledge the correct way.

When you look at the what I call, "3 holy books of the new science," Book 1, 2 and 3, opens the knowledge of the U, and not knowledge of the man. But if you are materialistic you look at it in a matter state. But when you put book 1, 2, and 3, you see the Knowledge of the Creator. It depends which end you sit and look at, you look at the Book 3 and down the tunnel of the light to Book 1, you see all of it, how we become matter state. But when you look at the book 1, and look to the tunnel of the light to Book 3, some of it ?? , because (1:24). the light is shining in your eyes, you are blinded to the totality. It's very much because you are blinded with the matter state, you don't see the others. When we look into the sun, when we look directly we don't see the totality of it, we duck and dive a little, or we put something in front of us to dim the light, that we can see the sun directly. This is the same in the knowledge.

We stand on the universal side, looking down on the matter end. Where humanity in the physical condition stands in the matter end, and looks in the direction of the sun, of the light of the knowledge of the Creator. This is where it comes, this is where is the difference. Where you come part of the way through this light, and you look down, back on the knowledge of the matter, when you are enlightened, you are in the same position, but you have a light behind you, and you see what we call matter state in front of. So our knowledge is not, what is our position, what it is. We stand to look in totality of the reduction, in the essence of the creation, and in the matter state, we try to understand what has brought us here to become matter state, and try to look back into the light of the Creator, to understand more. And that's the only difference. In D we are the same. In comprehension we are all the same. It's the enlightenment that's the difference. Any other question. (1:26).

K- Before you go. There is a message in the chat about the MaGrav Units. KF has all the MaGrav systems. We just don't have .. .. KF has, or whatever we sell now, we have a stock of. We are not short of any stock in KF. It's just that we are facing a huge man

power shortage, within the structure of the KF, and getting things done. The Corona situation has not helped us much, and this is part of our problem.

Your MaGrav system is already built, has been shipped from Italy to KF Austria. We are not going to build it. It's just a matter of getting the time, or finding people to bring all these things together, the adapters, the plugs, and to ship, or finding the materials we ship from other points into one position. KF at this moment in time is not short of any materials. The Enhancement Units (EU) are getting built in China at a rate of 3 a week, and after New Year we'll try to go to about 100 a month. Everything else, which you see on the KF website, is more or less, all of it is in stock, unless we receive a large order, which we advance forward. It's just that we don't have the trusted man powers who work within us. As you know we have expanded, and separated a dispatch, and everything else. (1:28). (connection broke ..) ...

So we are not short of goods, ... we are short of work force to dispatch. Everything we sell I have made sure on the KF Store (1:30). has to be in stock. That the validity and capability, and this has cost KF a lot of money, in the past 6 months as we organized. We have shipped to 3 locations. which means all the goods, if one can't be met from China, by our new warehouse in Austria, which is getting extended .

If there is a delay we apologize, it's just the man power, that is our biggest problem, and bringing people who know what they are doing, then just bringing people. In so many ways, we stopped recruiting people who are KS, but actually they could not do much. They are perfect KS, but in a physical working condition they cannot perform. This is one of our positions which we are changing gradually, in the coming weeks and months.

Corona has not helped us, we cannot bring people into Austria, as we started doing, because now with the Corona and injections compulsory, nobody wants to come and live in Austria. Because from February they have to have injections, and nobody wants to be in that phase. This has created another cycle of problems for our manufacturing. We are looking to move .. part of our manufacturing out of Austria very rapidly. This we'll know in the next month or 2, we allow our work to expand very rapidly .. in manufacturing and deliveries. We apologize, it's not that we don't have the stock. I can send you pictures of your MaGravs sitting on the table in the warehouse. But it is just getting everything sorted. (1:32). and produced and putting in position to ship. ... the people boxed it the wrong way, put MaGrav in the Car MaGravs ...

So we are not short of, it's just man power. I apologize for the delay.

Any other question.

Q: ... When people in their physical life accumulate fortunes, and for fear of loosing their fortunes, or being stolen by someone, they bury something valuable. But then that person comes to die. The question is, does the soul become attached to that fortune, and when someone finds the physical treasure, does it free that soul? Or is it not like that?

K- You've brought a point, which I am very familiar with. I know it first hand. (1:34). If the soul of detachment of physicality is still attached to it? ?? not ?? the STP has left behind, in becoming part of the STM. So there is no attachment to it.

This has happened within my family in the past century, or a bit more, when my great grandparents used to be in Georgia, as part of the .. Jewish community in Georgia. When the Tsar came in, allowed the Jewish community, that were of the Iranian background or whatever, to decide to go to Poland, or to go to .. Iran, back to the original home.

What my Great grandparents did, the Russians became very clever in that, the Jews were taking a lot of jewelry, diamonds, assets by swallowing it, because they used to carry a lot of diamonds and that kind of things. And they buried some of it, within the structure, and they left the structure of where they buried, the what do you call it, family loom. they traveled back to Iran through Caspian Sea, but they were kept in camps for some time, to make sure if they swallowed any jewelry or whatever, they could collect the discharge in special toilets they built for the people going through the transit. (1:36). ?? My oldest second cousin was born in Russia, she was entitled to carry a Russian passport. When they opened Russia, she went back, trying to find what was hidden by the family, buried in the ground for one day they come back, to get hold of. She met some of the ex-families there, but nobody knew the totality. She could never find it.

So I am quite familiar with this, but it is attachment, detachment. Nobody knew this, except this lady, and she went to get it. There was always a discussion in the family. Why does she go back to Russia so much, especially going back to get this .. family loom. There was a lot of sentimentality between my mother, and the family, that why has she done this, this was to be buried and not to be touched. But to her was too big to have a sentimental, or physical value to get hold of. .. I said to my mom at that time, she always been like this, physicality more than understand, that was a memory, that everybody had in the family, that such a thing was buried in the place, and now she has literally destroyed the emotion and the connection of the family that the wealth was buried there, and one day we'll find it out, and will be found. .. (1:38).

A very recent one .. found packages of precious stones ..

Sierra Leone .. (1:40).

.. is part of what we have to analyze it. As far as we can say, it is part of the STP.  
(end of question)

K- I promised you to show you the picture. You can see your MaGravs System, see it is just a matter of dispatch. they took the wrong box. .. it's a car MaGrav ...

Now you understand when we tell you we are not short. it is just the man power problem and you MaGrav unit, .. is part of this stock. (1:42). It's there for 3 - 4 weeks trying to get sorted out.

Next question.

K- Can I add to it. You will receive. We will start promoting the MaGrav Units extensively in the next couple of months, once .. our factory in Tehran, which is primarily designed to produce MaGrav systems, .. goes under full production. The factory is all getting done .. We will start promoting the KF MaGrav power units exported from Tehran ...

Next question .. (1:44). It's the new logo of the KF. ...

Mexico has tried one with the green lights .. You will see new developments out of Iran ...

Q: .. Where can I find the article on inter-atomic fusion, or can you tell me a little more about that?

K- Listed for sale on Amazon.

R: It's in the list of published and unpublished works. ..

I was wondering if that info was part of the books. (1:46).

R: These are the books and electronic documents here. It's on the list here.

Here are some extracts from the papers listed here, but we don't have a link directly to it.

K- .. A lot of documents from the KF was stolen from KF, in the past by the Belgium's, and they are proud to show it. These are the assets of KF, and this nation kills and steals, is their nature. And as I said, pedophilia and prostitution and stealing is part of their work. Sooner or later we get these back into the ranks of the KF archives. One way or another the knowledge is there, and the documents sits within it. (1:48). You'll see how. It's in the archives of the knowledge of the papers we have kept. We'll see how we can share it. There is a hard copy of these on our disks. We have the disk stored .. and it is with me. I personally moved them into a safe place, for them not to get stolen again. In due course we'll get it deciphered. There are many, many of our disks with a lot of knowledge which has never been shared. Which will be kept. Even when we changed computers we took the hard disks out. Because there is a lot of communications and new papers which sits in them, and it will be shared. The only thing we lost which is unfortunate is ?? ?? when we switched from .com to .org, we lost some documents in that .. .com section, which I am sure a lot has been stored.

Any other question.

Q: .. Mehrañez .. mistake .. (1:50).

Q: Jalal, ... it's regarding the papers here. Yesterday in the teachings, I had a question from Claudia, regarding "the truth about Homeopathy." .. if she can go and order this paper, it will add a lot to what she knows.

Yesterday the question was that they use vibration to change a condition. I tried to answer it my bizarre way ... I tried to say, .. we make the same thing by MaGrav positioning, and the different way in Homeopathy, by shaking the position. I hope I could answer it. (1:52).

K- .. the paper called, "the truth about Homeopathy." This paper was written in a few hours. I give you a history behind it. My sister, she is a dentist, and at the same time she is a Homeopath as well. Dentists usually when they get older their hands get shaky, they

try to still stay in medicine, they do other things, Homeopathy, Acupuncture and that kind of thing, They keep busy. She is a qualified Homeopath ... she asked me the question, what is the whatever. I said, let me rest, and I tell you when I wake up. I was lying down, and when I woke up, she said, I have seen you, you're going to write a paper. I have seen you downloading. How you clarified the knowledge while you are asleep, how to do.

I said, "it's not downloading, it's just accessing to the right file, that you can get it." I got up and that afternoon I wrote the paper, " The truth about Homeopathy." The word I cannot pronounce correctly if I am right. Rick, it's called ?? when you shake it, there is a specific name in Homeopathy for it. It's the way you shake, and the number of the shakes you create. In how you realign the number of the energies and atoms of the water.

R: It's succussion or something like that

K- Yeah, it's in the paper.

R: It's succussion the action of process of shaking or being shaken, (1:54). especially with violence.

K- yes, shaking. In a way, it's a realignment. If you understand this, it is very much like how you shake it. In Homeopathy there is a slight problem, that they haven't got this succussion the right way, because the machine shakes in one direction only. If you understood the science of magnetism, and you could change the shaking, not only in a vertical, but shake it, in the same, different directions, and angles in the machine, you can cover more. But they have not understood this.

We know this, because if you go back into the understanding of magnetizing the Fe. If you have an Fe vertically down, it doesn't magnetize. If you hold it in a specific angle and you hammer it. It depends how you hammered the nail, it will become magnetic. This is one of the reasons, for example, unknowingly, all of you, if you ever held a drill, and you tried to drill a .. screw into a piece of wood, and it bent a little bit, or whatever, you see the wasn't magnetized before, but if it falls, it sticks on (the drill). Because the rhythm the screw driver hits the head of the hammer, and different angle, if accidentally you reach that angle, you magnetize the screw. So we all done it before without knowing it. (1:56). But scientifically know what it means.

The Homeopathic people, they have not understood this. This is the truth about how you align by shaking it, all of material in one direction. You can hammer a nail in a given angle, never it magnetizes. But if you apply the right force, with the right angle, the nail will magnetize. We've seen, all of us, as I have said, we use these new small hand drills, we've seen it, but we never understood it. It's the same with the Homeopathy. Homeopathy, it is how you shake, what angle, if you add it. You can add all the angles into it, and create it.

But we do the same thing in Gans production. When you produce Gans's and we put them in the high speed, depending on the speed, and what we put through it, we create a plasmatic field of it. In the Homeopathy, we create a massive state fields. In the Gans production we create the plasmatic fields of the same. One is the soul, and one is the STP, if we call it, in D of physicality, and that's the truth about .. Homeopathy.

So when you realign M fields of it, in the strength of the let's say, the cell of the heart, when it interacts, it interacts with the heart. This is what we do with the Gans plasma technology, but in a more advanced way. And that's the truth about what we call Homeopathy, and thanks to my sister, asking me, can you explain, and this paper was written within a couple of hours. (1:58).

Q: Regarding the square. Mr. Keshe when are you going to teach the square knowledge?

K- What do you mean, the square knowledge?

Q: There is knowledge behind the square.

K- What knowledge? What is your extent of knowledge? What's the extent of your understanding?

Q: Here ,now, in this position?

K- Yes, you are in teaching, we are all KS. What's the extent of your understanding about the square?

Q: Yes, how we achieve a square out of the fields.

K- Now I am going to put it to you, the way you do it. I put 2 questions. The square as doubling it, or the square as a shape?

Q: ... I think that makes no difference in my opinion.

K- It makes a big difference. It makes a big difference. What are you talking about, there is a big difference. One is in the number and one is in the shape. (2:00).

When you want double the strength of the PI, it's a different T, then the one which you talk about the shape as a square. Increasing the energy of a PI is a specific T. It's very much deep in true essence of cosmology. Can be done in matter state, but it's not the way you do in electronics, with increasing the current or whatever. Increasing the energy of a PI, doubling it, is a unique understanding of the work of the interaction of the fields.

Q: Isn't that the same as what the skin do?

K- No. The skin works in maybe, in a similar way, but not exactly, not really. And going to creating a square as a shape, we know the world of science has a big problem with that, they say, the light cannot be bent. But plasmatic fields can be bent, if you know how to bend it, because part of its spectrum, when it is a matter state strength, becomes conditioned to the matter condition field strength, which still not, you can only bend the light, (2:02). you can actually square the light, too.

Now that we understand each ray, if it is particle, or photon, or is a ray, then you understand how, you can change and make a light, as a photon, to become a square. You play with the pull of the gravity or M field strength within the light, and you can bend it. It's an unknown knowledge to mankind, but in due course, we teach. It's part of the transportation and transmutation system.

Q: .. that's why I asked it.

K- Yes, it's part of it. When it's a particle we can do it, because when it's a particle it carries both D of GM field, and if you have systems, which can interact, can put, this T in

a way, was used very recently, by Iranian scientists, without them knowing it, we know it was used, one day I'll refer to it, I'll explain.

You can bend the light 180 degrees to go back down the line, which it has come, by changing its GM field, and this is part of the creation of cosmic rays. Most of the cosmic rays comes by reflection of the light itself, the field itself, back down its own tunnel. In a way, you laser beam, the laser beam. But in that condition it's a laser PL, it's mono-energetic, which can be sustained, it's not very easy, it doesn't happen often. But because of, due to the size of the cosmos, it's a frequent event, (2:04). but it is not an easy event. It's understanding the knowledge.

I called this once, the game of the Russians and the Americans in 1950s and 60s. The Americans sent the match box to the Russians, and they waited, and the Russians sent the matchbox back to the Americans, if you know that. Then the Americans wrote to the Russians, that you didn't see it, there was a micro fiber in the box, you did not see it. The Russians sent the message, look down the center of the micro-fiber" we made a hole in it.

This is the reality, if you can become that hole, within the same light, then you can. this leads to creation of a lot of new knowledge, which was hidden from the man. It's the essence of the creation of the cosmic rays. Because when the cosmic rays moves down, that is created out of the essence of the interaction of the plasmatic fields, within the plasmatic fields of the same strength. In a way, you cut through a butter, with a butter. Any other question.

Q: Mehranez, (2:06). .. when we see the image of a saint, we see the lights in the painting, like a star shines. Is that light, and people at the time could see that light? Because they are painting that light ... ?

R: You mean Saint people. The rays of light painted...

K- This is painted, it's the light of enlightenment, to understand. Because you have saints of a specific thing. Like on the, 2 - 3 days ago, on 6th of December it's the .. Saint Nicholas, .. saint of children. In Orthodox and Catholic church, on 6th of December the children wait for him, he comes on street and gives children sweets. He looks like father Christmas, but with different kind of hat, to gives sweets and gifts to children. That's enlightenment, it's not anything else. (2:08). It's the sign of enlightenment, it's manmade to show they have been enlightened, to that knowledge, for that reason, for whatever specific reason.

Q: But can we see. Could people at the time see the light around the head of the saint?

K- You see the light around the holy people, even you and me, depending what we are holy about. It's the aura, you call it. It depends how you want to explain it.

Q: Aura is the same as that light?

K- Yes, the same interaction. It's symbolic of enlightenment. It's not that you see a glowing, glow on top.

Q: Is it why people are nice to people, because of that light which they don't see?

K- It's enlightenment how you can reach, to what extent you can reach. This is enlightened, which is human dependent more than anything else.

The Messengers of God are seen in the gold and the white light, and when you see it in the white light, it's the level of the affirmation to the light of Creator. Which is the same, it's confirmation of the existence and interaction. But the rest is what we see in the D of mankind. (2:10).

Q: .. Does just seeing and enjoying the beauty and perfection in nature, and all forms of creation, feed the STM.

Q: repeats .. does just seeing and enjoying the beauty and perfection in nature and all forms of creation .. feed the STM

K- what does that mean .. can you translate.

R: Well when we see the beauty of nature, does it feed the STM as well as the STP?

K- Yes, when what we receive in the STP, if it is at the strength of the connection to the STM, yes, you transmute, and transfer. This is what we do at the point of death. At the point of physical death, what is at the strength of the STM, which has been a common denominator, or embedded in every cell of the man, in being in communication with the STM. These all get transferred back to the soul. It's like there is a bandwidth of the totality, what is at the strength of the purity of the STM, that every cell, (2:12). reflects back into the, or given back to the STM to carry. That's where the elevation comes from.

That's why suddenly the strength becomes so much, that the distance gap created. It's like when you put 2 magnets and they jump away from each other. The stronger does not move. The weaker moves away, because the stronger holds. It's the way we travel the space units on it. It's when that point when the STM field strength, totality of the all, every single cell in the body of the man, which has its own soul. Is given back to the soul, or returned back by the soul, because that's how you get psychosomatic. You get the physicality, and you get the STM, and when the don't interact, when there is a problem, the STM cannot connect, or the STP of the man does not connect correctly, in sending the messages to the STM, with what we call, interference of the emotion, you get psychosomatic problems. Where the soul and the physicality don't match in understanding transfer of the fields, and then where it comes from that field, is directed, and connects to the soul, and the physicality cannot match, and leads to cancer, or whatever it is. This is the truth about how we create most of our psychosomatic conditions.

In that position at that point of death, every single soul at the strength of the STM, which is a collective of the fields, which is connected to it, is returned back to the soul. That gives a boost, what do you call, not a boost, but a strength in totality of the field, which in a way, rejects, distances itself from the STP and we call it a point, because it becomes so far, we call it a point of death. (2:14). Or separation of physicality.

This is what we fully should understand, exactly why. If we are able to hold onto, to elevate the STP to a point, that there can never be that separation, man will never die. The "Fountain of Youth," the "Everlasting Life," is understanding how to elevate the STP, that the fields of the STM and STP, don't become so, what we call, separated, that they reject each other, or they create a distance, that the physical life cannot carry on. This is

the fountain of youth, if you understand this, you will understand why races live for billions of years in the space, because they can adjust that, very fine.

Those who by eating, by living a certain pattern of life, can create that balance, and then, that leads to the next one, and the next condition, and the next. And ?? way down ?? understanding of the physicality and the soul, the STM and the STP one can literally live in any D forever and ever. Are you balancing what you take and what you give. Carry on please.

Q: Azar, I didn't have question. (2:16). Jalal brought up Homeopathy, and then you were talking about the last man standing ... My husband is Homeopath and Chiropractic ...

( He did remote healing by making homeopath with mind ... )

(2:18).

Q: Jalal Aura which is higher source ...

(Mr. Keshe tried to come in but they ignored him he remained silent)

Q: ( there is a point you go .. husband goes to a place where there is no you .. has to watch TV to come back ..)

(2:22).

K- Any other question

Q: Jefferson .. It's not a question but I would like to bring an understanding ...

(2:24). Starts to read the countries involved in IEA

(2:26).

(2:28)

K- Thank you. The members of IEA, (IAEA) International Atomic Energy Authority, is a collection of different languages, and different paths of belief. When we look at .. the structure of the UN is the most what I call, deceiving organization in the world. IEA is slightly better than UN work, (2:30). but in a concentrated way, in self-proclaimed leaders. In .. UN Security Council or what we call, collective self-proclaimed leaders to control everything, is a different proposition, than IEA .. as an organization. It represents more, it represents science, not politics, which they brought the politics into it. Where IEA is a scientific organization. It's the way I look at it, it is part of what we said, the scientists are equal to the prophets of the soul and theology.

In so many ways, we try to reach as much as possible, and that's why we asked the KS. The chief of IEA is Argentinean, well seasoned diplomat. But the other members are of the same, before we had symbolic, this time we have somebody who actually understands the diplomacy of peace and nuclear T. They have brought people with the right caliber,

and with the right understanding, we can reach a lot. My hope in the coming meetings with IEA, in a very short time, is that we finally break that barrier, understanding of it.

It's not a bargain, what we give, to bargain what we can share. the whole new approach from the Iranian side, or KF as part of the Iranian organization in the 5plus1 is, (2:32). we leave you to negotiate on whatever you are talking about, but there is another option. What are we going to do with this new option, which all of us need. It cannot be excluded. My hope, and it is the same with the members of the IEA, is how can we bring the 2 sides together. How can we put a sanction on the knowledge, and then how can we share the same knowledge from the same country in a more advanced way. This is what is the dilemma now.

This is what, was one of my biggest objections to the Iranian leadership. We are in to negotiate for peace, but why don't you, or why do you only show half of the cake. If you are negotiating, you negotiate from a point of power of knowledge, and not the power of destruction. If you play innocent, you have to deliver the knowledge, that we have a more powerful T, that we don't need this. This is one of the points of my, what I call, separation from the Iranian leadership. My suggestion from the beginning to the Iranian administration was, we go in with the power of the knowledge, we go in with the understanding we are not here to beg, we are here to share. Somehow there is a lot of financial gains, there is a lot of financial dog fighting within the Iranian administration, which we cannot handle, it's not our job. KF has taken this diverse point of view to bring that.

We know the both, not just both, (2:34). all the members of the negotiating teams are here with us in this meeting on different channels. They know we talk the correct way to bring, to share. This needs all of us, because this knowledge, when we take to IEA to negotiate, is to be shared by all of us. We are not fighting, as members of the KF with IEA, 5plus1, we are not fighting for superiority. We are fighting for sharing the knowledge of the, what I call the Creator. I am sure in the coming hours in our meetings with IEA, we'll have a lot of second round of bashing about the heads, to ignore one, that you can keep the sanctions, but you cannot ignore one, where knowledge can be given to all the nations.

Our Chinese friends are here, they know, when we were invited to collaborate with the Chinese space agency for the design of the space reactors, which is on the table of the KF, they wanted the fuel combination. "We already have built it, we don't know how to fuel it." And that was a lot. That was a very interesting joke of me, which was played by the Chinese space agency people. You built your reactor, but we cannot fuel it. "Can you give us the fuel combination."

This is what I call, part of our problems. Not to give the fuel combination to one nation to become superior. Not to give the superiority to Iran, that then, they cannot tame on the name of the religion. (2:36). But to give it to all of us equal, irrespective of language. The only place as I said, for a nuclear physicist to find home to work, to understand, to show what it means, is through IEA.

We kept this away from public, but we collaborate directly inside to bring a consensus with all of the leaders. This is part of the game, this is part of the game of understanding politics of the nuclear T. We especially open this today, because we are getting a very crucial point. The Iranian team is back on the table. My request to the Iranian leadership, let's play all the cards on the table, and see, it's not who is checkmating, but who is actually "mated" it themselves to "check point." Then we'll see how we develop it. We'll see how we go to the next step. The whole process is, to share knowledge in exchange for peace. Peace for humanity. To exchange knowledge, not for finance, but for superiority, where collectively now we can go as One Race. It's very nice to see, all languages are covered within the ethos of the IEA, and most of the religious groups and leaderships, are in it. Some are on the boundaries some are within it.

But as I said, sanctions cannot be on the basis of knowledge. Sanctions have to be on the basis of what wrong doing has been done. You don't punish someone who studies to become more knowledgeable. You punish the one who abuses, and this will change. In the coming weeks you will see.

We bring heavy sanctions on the state of Belgium. (2:38). This is part of the agreement. Then no nation, no one can travel to Belgium, who has been, or the way now, you have to have a Corona certificate, you have to prove as a Belgian, you have no connection and you never been involved in any pedophilia, any child trafficking, and we increase this one to, state to state. Belgium is the beginning, because they are the center. Then we'll see the correct conduct, then we'll see the changes. This is T in exchange for peace, but peace for all our children. Peace for the children of man, that the new cycle of children through the ethos of Mitra can be developed. You'll understand slowly what we are talking about.

As I said, all the pedophiles returned back to Belgium. All the abusers go back to Belgium, because they have been safeguarded in safe haven, and now we open the door. Anybody who has been outside and heavily involved, now they know they are going to be caught, they have gone back to Belgium. Even those who left KF recently, because they have been given sanctuary by their nation, to abuse more. You will understand very soon why they are going. You can't have connection between the man, and the UC without bringing peace to our children, to our life, to all of us, because our children are the next generation.

In IEA we have all the languages, and we ask the KS across this planet to pray for them. If you elevate the members of the IEA's soul, which covers most of us, but this time through knowledge, and not through politics or religion. (2:40).  
Any other question.

Rick reads comment, from Betty from Vienna ...  
(2:40).

... >> I am from Vienna .. as you have mentioned there is a shortage of man power in our KF center and where can I find out about jobs in Austria. I am here for service to others. .. I am a business student with specialization in supply chain management.

(2:42)

K- .. go through the usual path info at keshefoudnation. you will get a response sooner or later ...

(2:44).

(2:46). Any other question

Q: Dean .. 5plus1 negotiations everything has a soul ... Would a flag carry a field strength of a nation, and if so, if you elevate the soul of the flag, would you elevate the soul in that nation? ...

K- In so many ways, we patronize. But if you look for the first time in KF Iran flag stands next to the flag of Iran. This flag from Iran, the KF flag, very soon will be in every center to represent One Planet ONOR. You'll see it flying between, the Iran and the nation and KF in between. In a way, you bring the essence of humanity together. It will be done in the next few months, (2:48). and you'll see more and more of it. The only place where we have one flag of KF, and flag of the nation is Iran, because we are not intermediary between, but we are part of the structure.

Q: .. One thing I noticed, if everything has a soul, in the matter state. If the soul is in a physical form, and it can be in the form of an item, a possession, would that possession have a field strength, or whatever, to perceive in its essence, that if you interact with that, would it still give off a field strength from wherever its condition ???

K- I don't understand.

Q: If you have an item that has a presence and is one part of the world, ?? it contains the fields strength ??? of matter state of another part, and it gets shipped to , or it gets repositioned to another part of the planet, will it still carry that field strength ..?

K- It should do. .. You interact with any shape or form, because it still has a soul. This .. the crystals you buy ... (2:50). Zirconium's, If you create a right frequency on it, they crack, they break up, like they do with a glass. But if you hold it, in a way, "I want you to split," you can break them.

You don't create a resonance, you create a satisfaction of the soul, if you call it. When you break a stone by hammering it, or resonance, or whatever, the fracture lines are different, then when you do it through the presence of pleasing my soul - "can I see you separate." I have done that many times. You can hold a stone, and the stone opens up, I can do this.

This as I said before, what KS who are, my satisfaction for your soul, I can create you a shooting star. It is understanding, does it mean the star is there. Did the Star of David appear out of that? Why there is a lot of time, people trying to explain the SD, but was it created on a point, without actually any star existing, but was to the satisfaction of confirmation of the beauty of the Christ .. We have to understand the concept, the principle, (2:52). the truth about the facts, and then we understand more.

Q: .. you spoke about Christ. Christ as a Messenger from the Creator, did he gather enough field strength to deliver his message?

K- In a way, of doing it, yes. There is a difference in understanding the totality. There is a big difference in understanding the work of the soul, or you understand the work of physicality. In a way, he ?? did, but in a way, his position was abused. Christ as a man, or Jesus as a man, was, received the message, but then manipulated by the man, to suit the man. Manipulation, is what we call, Catholicism and Vatican of today. The true Christians are still serving in different D without belonging to Catholic faith.

I was explaining to one of the KS ... we were talking about how they tried to separate the Jews from the Iranians and the rest of them. I was explaining, (2:54). when I met my uncle in Tell Aviv, some 20 years ago before he passed away, bless his soul. He was explaining to me my Great grandfather, he used to be a traveler between Palestine and Afghanistan. On the way he always passed Kabala once or twice a year, they were merchants on the Silk Road. Whenever he passed Kabala he was asked to say a prayer in the Mosque. Because as a Jew, he had a beautiful voice to decide the .. the ?? azzon, the time when he was in, .. in Iraq. It didn't matter he was a Jew. To him it didn't matter he was in a Mosque, it was the beauty of the message, that the words could transfer counted. This is what the essence of life is, not attached by name, but attached by deliverance of the truth about the elevation of the soul. This is what the problem has been for mankind, to understand the beauty of the message of Christ.

Q: .. when we as KS communicate and are present with each other, I have noticed recently ??? I spoke with through a channel, as soon as I spoke with him, there was a very bright light form outside, in the sun. It resonated ?? we were speaking .. ??? so KS have ?? (2:56). of the connection, it seems to be illuminating and bringing about a condition, that apparent to KS across this planet ...

K- We are not doing anything to say we are creating a new creed. We are sharing knowledge to enlighten the totality. That's what the difference is. In some ways, in a couple of teachings before, we spoke about the creation of the CO2 centers around the world, which is started, the program, we'll see it taking shape in the coming weeks and months, and spreading the captured CO2 to elevate the STM and the humanity, and all the animals and the trees, and plants, and even the stones might change, because they still have a soul, they get elevated by it. The stone, when it goes in the furnace, it receives energy, it melts. Would the energy, which we release by the spreading of the Gans on the stone, would it melt, or elevate the soul, that the stone will melt?

It doesn't need heat to disassociate. It needs elevation to understand. Would we see a stone to light up, but not with the light of the glow of the heat, but light of the soul, elevation of its soul, and this is the difference. This is the difference of the teaching of the KF, in totality, for the whole of the created. Not for one path of belief of the other.

Every word, if you look at it, we have a language, or a word, that separates us. (2:58). And allows us to be us, we are correct, and they are wrong, with other belief. In Arabic, in Farsi, we call it Kafir. the Jews call it, ?? quin. In English we call it, unbelievers .. But in essence we still we believe in certain path, and elevation of our souls.

So when we spread these Gans's, absorbs fields ?? the planet would they lead to enhancement of the trees. Will many trees not exist the way they are, when we start, and they say, "oh, it's the effect of the CO2," or have we actually elevated them to a new D and position, and they'll give different fruits. Up to now, man interfered in the matter side. From now on, we'll interact through the energy fields of the PI, or what we call the soul of the U - big difference. You melt in the fire, we melt through the love. That's the difference between the state of the matter and the soul.

Q: ... the beauty and essence of the soul ... through this teachings ?? ?? many souls are becoming enlightened, (3:00).

K- Shall we call it a day Rick.

Q: ... about C footprint, because here in Australia we are in a bit of a trouble. The Carbon footprint is 10 times higher than it needs to be per person. I always wondered, what amount of CO2 Gans would we have to sequester to offset our C footprint? Is Gans 1 for 1 in terms of weight for C?

K- ?? actually how they calculated it. There was a calculation done in the past few weeks, and they are building the first CO2 capture centers around the world. The designs are going through, it's done by our KF team, and you will see it. It has gone into its phase. to go through... architects for the final design. I was talking to our teams ... maybe it's time, (3:02). to share, that you might see what is to come. This center which will be built in Tehran initially, and then .. most probably China, it will look very much like, by design, very much like this. Then you understand how forward we are, with the whole thing. I will show you the video, and I hope our team appreciate it, that, what is about to come.

This is the structures, which you will see building across your nations, in capturing CO2. It's actually a leaf, again it's the brainchild of the KF Television. He is a designer, and it sits perfect with us. A leaf, which within it, captures the CO2, like a leaf does in .. on a tree. But this time we build it, we build it to capture, and you'll see these buildings, very much similar to it, across your cities, replicating the work of the leaf. Maybe in the next year or two, you'll see a number of these around Tehran, Beijing, New York, London, and maybe New Delhi.

This is what the essence of work is to understand, when we capture the CO2, like a leaf, when it captures CO2 it releases O to give life. When we capture the CO2, we have to do the same. We are not capturing it to take it out of the circulation, but we are capturing it, (3:04). to make it a life, a food, for making generation of life, a new cycle of life. This is the beauty of it.

Maybe next 2 years you'll see a number of these constructions around your city. It cost millions to put these up, the proper way. Where it can actually be put, across, through, and we'll see the change. Contaminated cities, winter, summer, does not make any difference the air is polluted. This is our job to do. It will bring changes. We'll be taking the same as .. the leaf takes to clean, to use, but this time as it comes out as a CO2, it will

be an energy of it as a PI, not as an O. It's very interesting to see what changes it will bring.

Do we actually need to collect so much as we said, because we are changing so much with the transportation, and with the other things, that we will not produce so much CO2. Then would these buildings in 10 or 15 years have any use for ourselves, we bring everything to a balance. In that report, .. the business plan, they have actually calculated how much our structures around the world in the next 2 years will bring the change. The footprint of the total calculation. It's a very small fraction, but very large ?? function in it. We breath in and out, and we continue as humans to put it out. What is our footprint? Breathing has a footprint. We run, we increase the footprint, everything else has to be calculated. (3:06). But it is part of the process of life on this planet.

Thank you for today I hope we see a positive outcome in all the works of the mankind in whatever it is to bring peace. Hopefully we'll see some good results for all of us in the coming years, with understanding of the K of creation.

.. if time allows we celebrate the Christmas and New year ..

**Proofed to here >.**
