

420th Knowledge Seekers Workshop; February 17, 2022 (Transcription done ; proofing ; Key Phrases, Key words Quick Index)

Emotions like between matter state transformation liquid to gas ..

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION

Proofing started
(:26).

K- ... It's is coincidental and happening much more often then before. Just before we start the session, Rick says, there is an intro I would like to play. I told him, yes, this part of the teaching of today even. We add to this knowledge, we have to understand more and more of this knowledge, We have to understand, why what we have in the present physics, was accepted, but we never understood, the reason for it. What happens in the totality of the knowledge in matter and plasma (PI), (:28). and how we interact in the matter State, (S) and .. in the PI state. What is the next step in the world of science (WOS), you have to understand, form now on, we have to, we have no choice, we are responsible for our own existence, to be able to understand the 4th state.

This is the time of Mitra, which means for the first we see the soul, .. the P, and we can interact and interchange the energy fields from one to the other. This is the time of the creation, .. understanding the process of creation. Why up to now in the matter state we said, we can mix these kind of materials together, but we cannot do that. Why can we mix water or liquid parts, some of them together, and still some stay separate. Why can we make alloys of some matter states, but not of the others? But does this apply in the D of the PI state of the same entity?

Go back to book 3, 2 or 1, read in certain parts, we explained fully. There is a picture of Gans's different colors, sitting on top of each other, where we say, Gans' don't mix. How many times you created Gans's in your system and you see the green in one place and white in the other, different shades of white together. Because the same as in the world of matter state, Gans's plasmas, have the same interference, they have the same separation, .. interaction with each other. Now we can explain scientifically, (:30). and we can create a condition, that shows the size of the new PI, is correct in both matter S, and the PI state (S), because the matter S itself is another plasma state, but in a different condition of field forces.

In the world of matter S we have learned, we change the pressure, .. the temperature. We start with the water in the matter S, or we can start with the ice as .. a solid S. Heat it up, you get a liquid, heat it up you get a boiling steam, we heat it up beyond the steam we can get separation.

What happens? How do we heat up in Pl S. How do we create a condition of separation of the fields of the Pl? There is no heating. We have confirmed that in many researches, and many developments in the reactors. In the condition of the matter S, we change atmospheric pressure and temperature to achieve, to change the manifestation of the physicality (P). What do we do in the Pl state? We can't heat up, nothing happens.

In a Pl S we change the strength of the M field of the environment, this leads to interaction of more fields, or less fields of the plasma with its environment and it creates, and directionally indicates, which way it is going, is it loosing or gaining energy from its environment. One color up in green is gaining, (:32). one color down in yellow, it's loosing. One color up in green, it means, "I am a lover," it means I want to give. I see the soul in that green color, I rejoice, because I can take something from it. It can elevate me. I don't see the brown, do I have to give enough, my job is, my responsibility is to elevate to my color, at least all elevate, it to become a green, that it can give to the others.

We change the environment by addition of fields. In matter S we change the condition by heating, by pressure. Would it come to the point, that if we change the M field of the environment of the matter S, we'll see the change in the matter S of the body of the man, or in the water, of course we will, but we never understood this. This is the job of the STM, .. the central position strength field force, of the existence.

You have a problem with your son, you change the beautiful Gans's, which gave life to it, to the solid S more, to create the cancer. The state is the same. How come a soul decides to go to the strength, that to become a stone, it still has a feeling, but it cocoons itself with it.

In the world of .. Astrophysics, or Cosmology, (:34). or anything to do with space travel in the U, what happens if you enter an environment, that you feel, for the soul to survive, it means to be in a given S. It doesn't matter how long it takes, you become a stone, you become a rock, you change the field of it, but you are still inside, aware of the environment, of what's happening, but staying in the rock is good for me, I can survive till I find a solution. Or it's another position and just there, or I want to become a shape of the entity at the point of manifestation field strength.

Then you understand, it's us through the emotion field strength, that we can change the strength of the Pl. This is why emotion is so important, and this is why, maybe for the first time understand, this is why I put so much emphasis on emotion. Emotion is that additional heating, .. additional field strength that the STM, in conjunction with the soul of the position. It's eyes manifests itself to this ?? step, or to come closer. When you take earth and move it back to Saturn and Jupiter position, you get gaseous. Move it, change the field strength and move it forward, you get more solid with less, or no gases.

Isn't this what happened to the life of the man. At a young age when we are born everything is ?? free, and ?? interacted, as we add emotion to it, we create cancer, .. sadness, .. love, (:36). .. children of it.

So we understand the strength, the change, what is to be manifested in the D of the P of the life of the man, is the strength of the emotion, M fields of the emotion. Which adds to the soul, and the soul of the position in time and space, changes what was created out of love, becomes a point of death and creation of cancer. The breast which feeds the child, becomes the breast, which creates the cancer, through the emotion, that leads to the death of the mother.

Now you understand why from the beginning we continuously emphasized on emotion. Emotion is that temperature, .. pressure, which changes interaction of the field of the Pl, and mankind have never understood. We call it psychosomatic, but somaticism come out of the psycho, out of the emotion, psychological pressures and strengths. When we look at the brain of the man, and look at the structures of the different strength, of the different points, then we understand how even the emotion is created. Then we understand we have parallel, we change the temperature, we increase it, we melt the ice, we melt the gold, we increase the love, the emotion of giving, we become givers, open up.

It's no difference, we have chosen the same emotional effect to 2 different strength of the field of the environment, because the heat itself, is a M field interaction. (:38). Then we understand, this is why I continuously, in past teaching, try to explain the soul, the matter S, the soul, the matter S, that one day the KS become wise.

We chose in the past the same word for the same thing in different positions and application. We done the same in the WOC, world of matter S, world of creation of the soul. If I take love from you, you die, you become cold, you can't move, because the love is not there (anymore). But I felt the love, now I don't receive the love (anymore), I want to die, I want to go inside and not exist, become a stone.

I lower the temperature, I get ice. I heat up the temperature, I get liquid and vapor to be spread among the whole environment. this is where the WOS becomes important for us in the plasma T.

I reach at the point and destination in the space, that I want to taste, I want to feel, I want the emotion of the environment. I create a Pl, that the soul converts in the D of some of its strength into the matter S, in the position and time, in a given distance and position, that the soul can keep its integrity. (The soul creates) the tip of the finger, or the tip of the tail of a whale, distance from his soul (to be able to feel its environment.)

This is what mankind has to understand, he is in possession of that heating and the pressure, called, emotion. (:40). We have chosen the same words, M and G, heating and pressure, increasing or reducing the temperature. In essence it's the same. We create expansion, we create D of openness within the structure, and then if we understand this,

then we understand why electrons have been created, how some electrons interact with each other. .. please find covalent bond.

Why do we call it in the world of chemistry covalent bond. What does it mean? Isn't it a point where the fields of the electrons can share and be together. We have chosen love, as a covalent, where we can stay together. We can fall in love, in the size and D of the life of the man, we call it falling in love, emotion of interaction. Now it's the time to understand how we can bring the STM, to become matter S, and how the STP of the man can become the STM and in interaction, and become what we call the covalent, which is the P of the man, in interaction with the STM and STP of the man. We coexist, and with it, will lead to the creation of the man. Will lead to manifestation of the new understanding of life.

Now we understand if 1 electron (E), from 1 atom, (:42). shares its energy with another E, in another atom. It doesn't matter how many other E are in there, and these two want to be together, the atoms come together, but they have to have the same strength, .. the same structure of field strength. In fact, the covalent bond, is the relationship between the M fields of 2 E, or 4 E, and the rest have to accept. In all structures you always find this, there are some lovers.

This is what mankind has to understand, because at a point in space you want to become physical, you want to show yourself. You create a wrong strength of the emotion, you leave the door open for the whole U that, "now I am free, take what you like." and the demise of the soul. If you understand the control of the emotion. I want to be, but in respect to the fields of this environment. I want to see how my soul in the D of P will show on the surface of the moon, or in the atmosphere of the planet Zeus.

This is what we have to learn, we have to understand, that allows us to become the man of U. This allows us to be able to transmute between the manifestation of the P, and the manifestation of the fields you call, Pl, doesn't matter what strength that Pl has, at one point or another, in another strength field, will be manifesting itself, will be showing itself. Then what do we call it? Then by changing the temperature , (:44). in the room, we see that mist we created in the pot from the ice, becomes the water drops on the window, with the change of the temperature on the environment.

Where on the environment on the cooking pot, given strength, given temperature, given certain pressures, the water boils, the matter becomes steam, and in the environment and then in that environment is a different condition, we change temperature and pressure, we convert it back into the steam on the window, we give it the D of manifestation.

The life of the man will be the same. The STM is that environment of the room, and in interaction with the fields of the what we call, it's environment, outside it, creates its physical manifestation. The strength of the fields, .. which interact, dictate the position and condition of manifestation of the ... Pl, in respect to its environment.

(Fields can change Pl of cell to manifest as viruses)

In a given environment, and given condition, a field, when it interacts with a matter S, will create its own position and condition, what we call, like viruses. Do they take the same cell and change the strength of the fields of the P1 energy, and bring them together, you see sometimes they interact, you see sometimes they don't, because they don't have the common denominator field, even though they respect each others position, but once they interact at a given field strength, you get that what you call, virus.

(How they create different viruses)

What happens if I tweak, (:46). with the strength of the P1, before I introduce it to its P1 condition in the Gans S, what we call, the AA, it becomes hepatitis, it becomes AIDS, tweak it a little bit and it becomes Corona, tweak it a little bit and it becomes every other virus we want to call it. We change the fields strength and interaction with what we call the matter state condition of environment, then you decide the manifestation of how these two show themselves, maybe as a crown, maybe as a different shape or format.

In a way, there is no difference between the knowledge of creation, it's man who has not understood this. It's man through lack of understanding of the world of interaction the fields of the U, has not managed to understand its position. But if I can create an environment, that in this environment, has and wants to find a new position, then I can propel, that this P1 into any direction in the U, be it to the boundary of the body of the man, to make the shape of the man, be it the boundary of the galaxy or Unicose.

Once we understand this, we understand the new transportation and transmutation (T&T) of the elements at the same time. This is where I put you in the Vertical EU, I change you into P1 energy, I take you across to another D, I create the field of it, you come as a fish, and in another (position) you'll be a dog, in another you'll be a man from the planet Zeus. In fact the center is the same soul, but in respect to the condition of its environment, (:48). has manifested itself in interaction of the emotion of the fields of itself, in the environment, to the thing with the soul would like to be, to find its balance.

(Reincarnation)

Do we have reincarnation of the soul, or do we have reincarnation of the man. Or maybe reincarnation is the wrong word to use, it's understanding the field position and time, in respect to evaluation, and the manifestation of the soul. Do I reincarnate you from one machine to another, or do I carry the soul, and then the P reincarnates, according to the position for that machine.

I can put a machine on planet Zeus and a machine on earth, I create the fields of the STM, becomes one in the STP, within it. I take you to the planet Zeus, and I put you in the same machine with the field strength of the environment that's there. The soul will come to exist in the new, and the P of the entity will have 20 arms, a head the size of the a mouse, and the arms the size of the planet, because that's what dictates to keep the balance of P, STP and the STM together.

Now imagine your next door neighbor turns up the same, he says, "hi Jack, how did you end up here, I know the soul, but you look a bit funny, you got 50 legs this time, but you

are shorter than mine, I have 80 legs, 10 meters longer than you. What happened? Maybe my soul was a better giver." and here now I show myself in that D.

Wouldn't that be the same when the STM manifests itself in the presence of the Soul of the Creator (STC). What shall your soul manifest itself, (:50). in the D, in the presence of the STC? Soul of a giver, soul of a man, soul of a criminal, which is, you don't give and you want to take, there is no room for it, until you learn that the giving, is the beginning of the position of taking.

Now you understand how the world of creation has no PI, has no matter S, has no emotion, has no nothing, till you decide, in what proportion, in strength of the field of the U, you would like to interact with, or .. share with. Next time when you put the pot on the fire and you heat it up, call it love. When you take the entity and you put it in the freezer call it G, taking. Now we understand the WOS is the same, depending on the condition and strength of the environment, and the interaction of the fields in that environment.

Now the world of Chemistry looking at plasmatic field strength of the electrons and protons, not as E in the matter S, has totally different meaning, creates a new horizon in the world of the material development. Do I create the soul of the Carbon and with it I get a C, which is beneficial to the society where it is, and I don't create a CO₂, which you call it, environmental global warming, which damages, and even that C has a soul to serve. Then what would be the strength of the STM? (:52).

What would the STM be able to do, to all the souls on this planet, if it elevates itself to the strength of the STC, and its love of Mitra. Mitra is amongst us, and is within us, it's grown to be part of us, as it is the mother of creation of all of us. Now we have in P, when we can praise the beauty of the creation of Mitra. What are we going to do when we realize the strength of the D of the understanding of the creation.

Mankind has reached a point to walk away from making so many names for the same process. Now has to find a name in the D of the emotion of, to understand how you change a love to death, creating a child through the love of the body, to using the same body to create cancer, to bring the demise to P. Is it psychosomatic, change of temperature, or the change of pressure? Is that the M or G. Has it been the understanding of, what we call the pressure, G; and M, for the "give me," for the love.

Now we understand, you have a gravity and you have a magnetic field, you have a temperature and a pressure. How would you convert the emotion of one to the other, (:54). that it carries in essence, the emotion of totality. This is what I said to you, the teaching has changed, and will change, because now you have to understand the parallel, the understanding of the fields of the PI in the matter state, and what is what, and how you can interfere, and how you interact. The teaching of creation is the teaching to understand the interaction of the fields, which lead to that creation. There is nothing else in the world of creation (WOC) except interaction of what, in the world of cooking you want rice, here you want potato. In the WOC you want PI, you want free fields to be able to decide how to interact, they become the rice or the potato.

This is the part, which I many times explained, vegetarians say, I don't eat meat, I don't kill an animal. Have you forgotten, every grain of the rice has a soul, have you forgotten, that you have fooled yourself by ?? deferring and fooling yourself, in what the strength fields you do want to take. This is what we call, what we see, this is what we understand, this is what we interact with. This is where the WOC, takes a new dimension (D) and meaning. This is where the world of reincarnation, where the world of science, where the world of Pl, .. of interaction of the fields creates for us, to understand new D, new understanding, new processes, new look in the whole world in understanding of the creation. (:56).

Then, would you like me to increase the emotion of love, or would like me to increase the temperature of the room? Would I melt you with my love, or would you melt in the temperature, in the D of physicality (P)? I can melt you with giving and loving, and the environment can melt you with temperature to burn, to liquefy. Doesn't this happen when the Soul of the Man (STM), leaves the Soul of the Physicality (STP) in the coffin, that we become that liquid again. We change the state due to conversion of the fields of our own, and nothing else. Now we understand, we need to understand, as we change the STM to the matter state of the physicality of the environment.

Then what is the next level of understanding? Why do we have to understand this, because if we don't understand this, do not become man of U, do not become the travelers of the U, because, if you get it wrong and don't understand the strength of the field of the emotion, than you'll be trapped in the liquefaction of the matter state of your emotion, and that will be, not much good because the soul will be free, in the so many ways. (:58).

Or can I create the condition, that I can crawl back in the matter state to be within me, that the soul becomes the carrier. What in a hidden way, the Inter-Atomic Fusion paper proclaims and confirms. The soul, the P of the man, is all interaction of the fields of the environment in respect to the Pl, which has created the environment, and in respect to the matter S fields, of the fields themselves, that lead toe the creation of the that ?? part (pot?).

In a way of understanding, I made man in the image of Myself. In that respect, if that is what man is made in the image of, our own creator, is conditional to the strength field of His environment, and the love and the D He needs to create life, in the D of the soul.

Does this mean, that now we understand much easier the WOS, now this means that we understand in a much better way, that everything being in, even the matter S, electron condition, is interaction of the fields and nothing else. If the 2 do not interact due to the different field strength of the same E, in combination of the totality of the fields ?? soul of matter, you cannot mix it, (1:00). But if you know the process, than you can create what you want. In Farsi we have a beautiful saying, ... If you wait I can make from sour grapes, the sweetest, sweets, that I know, but I need time, I need to understand the change, the position, and the strength of the field. Then it becomes sweet, and then it becomes to what it can interact. This is what we need to understand, time, position, field

strength, and whatever you call temperature or pressure, but in essence they are all are manifestation of the interaction of the fields of the U in different strength. Once we understand this we can become soul, in the heart of a stone in the matter S, as it is in the holy writings, even a stone has a soul. So would the STM, be a stone in the body of the man, as sometimes man becomes so cold, that the stone is much warmer than the existence of the man.

How much do we understand this, and how much we can change the field strength to manifest the soul in the D of the P. Then can we understand this, and can we be able to bring the condition of existence, (1:02). into the D of the soul and visa versa.

Proofed to HERE >>>

I hope you understood well enough what and where the T is going. I hope now we understand where we sit with the new knowledge, and have no fear to move from the D of the soul to manifestation of P. Where the totality of the fields of the Inertia, what we call the STP, has to interact with the soul to be able to give it the manifestation of presentation and observation. In a way, the STP is the Inertia of the field of matter S or conditions of existence for the soul. But connected and controlled by the soul in respect to position and distance, the way it was said the E ?? lives from the center of neutron, to find its own D and position in trajectory of its fields to become the finger or toe of the man, or become the cell of the heart. Understanding this the WOC becomes much simpler, this becomes .. a message between the STM and STP of the man, and .. the emotion , what you call emotion, it comes the prophet, the one between the two, that they understand each other, (1:04). the one which communicates between the two and both give for the other to exist.

Now we understand how the position and time, fields strength, and environmental field strength (FS), lead to the creation and the position of one or the other. Mankind is ready for that change. The race of the man is ready to understand the final ?? pot, .. is ready to accept the knowledge of creation. Not by force, or by the books, but by the emotion of understanding of the feeding of the creation, as there are no books and no words in the creation of the Unicose.

Many of you, .. are waiting for next Tuesday, 22nd of February, to see what would happen, would he manifest himself in the D of the Creation or would he become the declaration of the understanding of what we call, Methi. Methi is within you, it's you who decides the understanding, and no one else. It's you who becomes part of, and becomes to understand the totality of the whole creation. How many understand, how do we go to understand. How do we find the comprehension of the totality? (1:06). Don't need to be a professor, brick layer, or a child in the womb of the mother, you can understand the whole lot in 1 second. We can all be enlightened in matter of zero time in the place and space, but have you understood the process of the creation, that is your freedom when you understand the process. This is what you call, the "day of Judgment" We understand how to convert the STM in D of the STP of the environment to create that man

irrespective of the time place and position, call him black, white, Martian, call him to come from planet Zeus.

What are we looking for as the day when the Methi comes, when in fact, the Methi is within us, and we are part of his existence. Maybe .. as KS maybe we understand and see more. What happens to us, what will happen to our emotion when we understand that it is us who kept, the truth away from us, by lack of understanding the and not understanding the reality, (1:08). that all D of the field strengths of the U are the same. We have chosen the wrong, or different names for the same process. I melt the ice, I melt your heart with my love, is that temperature the same or is it the strength of the field of different times and position in space.

Why do we become emotionless, and feeling-less in respect to one who we loved so much, once. Have you become that heat which has become that pressure. Has it become that love which has become hate, ?? The same word, the same emotion, for the same condition of environment? Then we'll see, and become the man of space, what to fall in love, at what temperature and pressure, and what strength of the field of the emotion. Then at the point of manifestation we decide to be the stone, the man, the bird, or the water. It has become so natural, that we never understood the totality of the creation.

When you say, I love you, does it mean truly I love you, that I give you so much that you show your beauty, by falling in love with me, you show me your love. Isn't that the true understanding of the WOC Isn't that what we have been looking for, for all that time? (1:10). Someone to fall in love with, that we can create from the manifestation of interaction of the field of the emotion of love, the children of the creation. Then ?? what , then we appreciate the totality of the creation. Then we understand that everyone of us is the Methi of his own soul. ?? it is one soul, to feel that force in the D of the strength of the field of the emotion of the man in the D of love for his Creator, and every other soul changes. That can be instantaneous of ?? one understands the true meaning of love. The true meaning of unconditional love is comes from Mitra in ?? D of the soul and P. ?? ?? unlimited access to ?? totality of the whole existence, in all D, position and time.

Are in ?? with your lover, or have you decided that the strength of fields in one position can allow the mixing, and I want the change. I want ?? not to be in love, or in interaction with the other. We define love, I define field strength in the D of the environment we call temperature, pressure and heat, in the D of the P of the man we call it, hate and love, possession or giving, generosity or animosity. In what strength, to what extent, (1:12). mankind will be able to share the totality, .. be ready to bring that change. To what strength would mankind be ready to understand the essence of the creation? Maybe today's teaching brings you to understand where the transmission, transmutation, and transportation of the fields, in the matter state, ??/ condition of the PI, and the STM will be. I made man in the image of Myself. Is man the image of the STM, or is it in essence the image of the Soul of the Creator (STC)? Where man is the creator of ?? love, himself by himself.

Then does it mean when you look at the man who wears the face of joy, laughter, generosity, is the reflection of his soul. And when you see the man so mean, and so destructive, is the reflection of the soul wanting to gain, without giving. Then when you see a man, you see the STM, but a ?? feature. Go back ... I know the man by walking in front of him, what man I have, because his feature shows the feature of his soul, cannot deny, cannot lie.

The love of creation, creates the Creator, not the Creator, creates out of His love, (1:14). the creation. Maybe we have understood the whole process of creation, back to front, the wrong way, or maybe you have to understand one leads to the other, and the other leads to the one. Now you understand why the teaching has to go this way, because you have to become aware of the existence and how you manifest yourself, before ??? put in what I call, enhancement units (EU) travel you from one position to another. I am coming from China, but I don't like to look Chinese. When I receive, or arrive in London or NY, I want to be blond and blue eyes that no one knows I am a Chinese origin, but I still when in NY go to a Chinese restaurant and enjoy, because within me I carry the ?/ essence and pride and joy of being one. Would we become the chameleon of our emotions, or does our soul lose the chameleon of emotion to manifest us in the D of P. Does an animal change his color due to the emotion of existence, and not by the chemicals. I learn to be the shape of my environment and color of my environment, that way I can ?? appease the soul to ?? stay alive. would the mankind do that if you walk in a community of totally strangers, the only odd one out, you stand out, but you are one of them, you are part of it, you are not noticed, no matter the way you put it ?? (1:16).

Then you understand why we created the Universal Council (UC), that works through the soul and not the D of P. It works through understanding the field of creation of the higher order, than working with the lower order in the name of the prophets and religions. Mankind has been given a gift by creation of the UC. I hope they'll understand, where the soul of the UC becomes the soul of the creation, and with it a manifestation of a new cycle of man, that shall not kill, so pure that will not do wrong. that the collective soul of the UC in the presence of the Soul of Mitra, will become the Mitra itself, the essence of love for the creation and the Creator, which is within and understanding of the totality.

I said we need one soul to change the soul of ?? man, and that one soul which has the strength to do, and is connected to all the souls in all D, is the soul of Mitra. As she was created from the strand of every souls of the strength of the U, souls connected with all, and lives amongst all, and is part of all, and what we call, every name which is emanated from the STC, which lead from Mitra to collect, to create that child of the man.

We come to the point, (1:18). where mankind has to understand the creation of one to the other, and in essence one is the other, but one is conditioned to the environmental field strength of itself. I hope .. today's teaching opened your eyes in the transmutation of the STM to the D of P, and at the point of what man has been in the D of P has made the soul of the child, to become the man with all the problems in different field strength, which is short of existence in the D of his own environment. I made in the image of Myself. Is the image of man the image of ?? my soul. As I said .. what would you to be remembered

of that D of P of the soul. Is it the time will come that when we drink a glass of water to satisfy the thirst, we drink a glass of love to satisfy confirmation of and completion of the existence of the soul by itself, both the cup to give life, one in the D of love, and one in the D of P.

I hope you understood the essence of the teaching today, .. it is much clearer for you as KS what is to come, in the D of Transmutation and transportation (T&T), (1:20). and the fields strength of difference ?? field strength to lead to the creation of everything that the man needs for his survival and life in the soul in the D of creation. Thank you .. I hope I brought you one step closer to understanding of your own creation and the reason you are here and have been created. If you are created in the D of the P of the man, and then the soul has come from it, you have the pitfalls of the man's pitfalls in D of P in respect to its environment. Would these pitfalls be a benefit and advantage in another D of the creation, or would it be the demise of the same? It's for man to understand the next process, .. that he wants to position that soul, that he has the totality as much possible, the ?? mass ?? of the strength that he can survive in every D in the creation irrespective to eh field strength, position , time and Inertia matter state of the STP. Today's teaching is very deep if you understood, If you understand and start grasping the totality of it, then you have understood what will be of you in the position of transportation using the .. EU. .. the teaching of today is for the travelers of tomorrow in the D of the soul, or the P of the man.

Thank you . go for a break (1:22).

>>> **BREAK** >>> 420 KSW Feb 17 2022 . (1:28).

K- the entertainment of the man has become our job.

R:

K- We have to entertain the children of man.

Q: A true explanation of love for Valentines day ..

Q: Thanks for description of electrons (1:30).

Q: ... The proton can be M or G, how many protons are allowed to accompany a proton ...

K- in essence no one dictates the field strength of themselves and their environments. .. if you look for example, as I said in the first part. you boil a water and feel the moisture in eh air, and the coolness of the outside environment on the window creates a mist or moisture on the wall, which gives manifestation back, what came from the pot. But you'll see the size of the droplets on the window or grass is more or less the same. You see the freezing on the window because of the coldness of the air is the same. So in fact, the

outside condition has dictated the size of the weight of the drop inside. (1:32). It's the same with the creation of electron (E). The M field of the U dictates the size of the E. Dictates the size, how much PI will create a PI of E, how much the field of different strengths will create the condition of a proton. Then you understand when you have a field change, strength difference, and a neutron splits to keep its integrity, to the size of a PI of an E and a proton. We see the ?? which is the same, but the understanding changes.

In a way, the center of field forces of the galaxy, the field strength forces of the U, dictates the size of that droplet on the window, because that's the one, which is outside, which is form the interaction of the fields of the environment, the SS, the galaxy and the U.

This is why .. in the D of understanding, as the totality of the fields of the Unicose is created by the pressure, presence of the STC, according to the environment of the given position, the size of the E is ?? different, even though you'll find E in every U in existence. This is why they became different universes, because their field pressures ?? outside dictates the size, the position is the same droplet, but outside temperature colder, it becomes a drop of ice, but the same size as the other drop, which in the other room, is still warmer, kept slightly, compared to the outside, (1:34). and it stays a drop of liquid, drop in the same house.

How many times have you called your lover and your children. You say come and have a look at the drops on the window, where the next door there is moisture, the same pot still cooking, in the same kitchen in the same house. ..

So we understand, that the WOC of manifestation, of absorption of as we observe it, is strength field position dependent and nothing else. You feel cold in the bed, the same soul, the same P, you get cuddled, .. touched, by the lover, the cold in the bed doesn't exist, because the love of the lover is so strong, that overwhelms the coldness.

You feel the heat, the warmth of the emotion, and that what is, **what we call, the love of Creator**, when it touches you, it melts you. When it touches you, it freezes you to have no feeling, because it's you who have decided, the one which cuddles me, is the one I love, or the one I hate. It's you, the interaction of your emotion, where hate emotion creates, that condition of environment of the bed, which is a bed of life, it's the existence of the U. (1:36).

The husband cuddles you, you have a hate within the emotion of the structure, you tremble. The same time the child you love walks in and he cuddles you, and you cuddle it, and then you feel the warmth of that love, but the other side of the same existence, hate exists. ?? where is the separation? Didn't the man give you the same love as the child did? It's you who decides one to be the hate, and one to be the love. If you loved your man the same as the child, you'd be overwhelmed with the love of both. It's the same fields, it's you who creates that condition, and .. that side of condition, what to be. But on both sides you receive the same love, the same feelings of loving and giving, for you to have.

What is the size of an E, except the emotion of the time, position and the presence of the observation. Maybe you understand why you can manifest in one D as a stone, with the same soul in respect to the condition of environment and the same soul in condition becomes the river of life, to give life to the others. Mankind will soon understand this, and .. comprehend the emotion of the existence. This is why, (1:38). always go back to the early medical teaching, we always referred to emotion . The emotion is the position of understanding of its interaction of one to the other.

Any other question. (March 3 the teaching 6PM CET)

Q: Stephanie .. can't (1:40)

Q: Ed. I always portrayed the STP in the chest area. The proper visualization of this is the STM as a much stronger source in the center, and the STP as a weaker sphere around say according to the environment. Would that be correct?

K- Maybe in one position yes, .. no. There is a fundamental point to understand in respect to the fields of creation. Is the M field which is the center of the soul which becomes in interaction with the field of environment of itself the P of the man. When we have a soul of the AA, (1:42). interaction of the field strength of the environment of another PI, when the 2 interact we show a peak, what we call a crown in case of the Corona. In fact the interaction of the STM and the P .. with each other in the G field strength of the environment creates the shape, size color of the body .. or any entity. In a way, our fingers and toes are that crown on the cell, on the AA in interaction with the fields of the environment. Where us, are created from interaction of the fields of the totality and ?? individuality in respect to the environmental GM field strength. We have to understand this, then it answers a lot of questions. We decide why we grow shorter, taller, brown color or like a ?? for the rest.

I was asked many times, why do you come and want to taste the pains of P, of life of physical life. Till we don't taste and test it, we cannot understand where the problem is that we can correct it. We have a very good say, we can't stand on the side line of the football pitch and play with the ball on the pitch. We have to play the game to understand the joy and beauty of the game. The pitfalls of it, (1:44). and what is wrong, what is good, and ?? ?? the same man that position. Many times ... I looked one week the man plays on one side and the next week plays ..

It's us who decides where that line moves. A few thousand dollars has changed us, but does it change the same emotion with the boys you have after the game ..

Does the emotion of the man connected to physical ?? and love for position. ??

Q: It is the emotion that creates the P?

K- Partially yes, but you have the D of environmental positioning and direction too.

Q: It's the balance between the two, the emotion finds that point of Inertia with the point of environment, correct?

K- You see, this is partially, it's a combination of the things. This is beautiful to understand, if you understand the depths of what I am going to tell you. (1:46). ... Chinese traditionally are short ... But now we see Chinese very tall, and some of them are very tall, which is very unusual. The only thing that has changed in them, is it the amount of energy they take because of their diet. Or seeing the basketball players in America, wanting to be, has increased the emotion that height. It's the combination of the two. Emotion which is the love of receiving and wanting to give, to your own organs, you hands, fingers whatever, that creates you to satisfy the soul.

I talked about this many times before ... This girl wanted to be a harp player. .. the love to play harp has changed the P. (1:48). .. and you see it. how the fingers have changed, .. the body figure has changed to support this system. She is a marvel of creation.... because comes out of emotion, the P has changed to fit, because the love of the soul has changed it .. .

... or another ball game in America, which is the sign of the freedom to grow as much as you like. 99% is equal combination of both. I met 2 brothers ..

(1:50).

Emotion leading to the creation of P. But what happens when the emotion of the soul takes over? Would the size of the P be the whole U. or isn't that the essence and attributes of the Creator. It's the wish, we get, but we have to understand that wish is for the benefit of more than me. Not for me to gain something out of it.

We've seen it in the operation of the UC in past few months and few years. The wish to bring joy to the others, that no child loses a father in the war, brought the end of the wars. A joy to finish the problem for millions to suffer, has brought a completion of ?? of 5plus1, because the wish was there, was added to, was strengthened to the different positions of love.

Remember when I promised you very soon, Iranian nuclear physicists will be in the White House, it is just about to happen. Because the emotion to give was so strong from the KS, and from the UC, that directly effected, doesn't matter how they negotiated. Wherever they go wrong, they go right. They get to that point. When I announced about a month ago, the negotiations were going to be successful, and more or less complete, many people thought, that's another thing ?? Now you see. I congratulate .. (1:52). I had to use it, on behalf of the Iranian government with IAEA and hammered the Americans and Israelis with it. That we know, we are very gracious, and we don't talk. Because we all come from the same essence to be serving and to be the lovers, to be the givers. Then by giving becomes ?? love, by manifestation of giving to bring that condition, we create that body, that atmosphere, that SS, that structure, that all the love flows for that condition in it.

I was asked, did you hear, in the American Teaching .. , what do you see for Ukraine. Russia might go into Ukraine, because it's their territory, it's their mother colony, their motherland, but would anybody go to war for it. No, because there is no need to fight.

We'll find a solution. If we don't find a solution, you find people who think the way you are, you put them into position and take the old guys out, and you are back to the same position. Gun policy has become negotiation policy and negotiation policy becomes love policy very soon. There is a problem we flood it with love, we find a solution, we have to find a solution, and by giving to earth other we develop.

This is how the KF AZ has become, (1:54). the center for love of the knowledge of P, the same in Austria, for all the scientists, be it Iranian, American, Chinese whatever. You will see in the next few days the evolution, which KF will start around the world in a very clear way. Then we'll sit and watch which nation will be the 6th of June flight, because that's their target, by sharing and working on it, relentlessly, they will do it. Because we wished it that way. In a way, we all give them a shell. In a way, they all build with their love. As we say, watch the space, the true love for created and Creator of the man for each other has just begun. We stopped them fighting, now we get them loving. The most beautiful thing is how much they'll fight to show more love for each other, is the game we watch. I love you 1, .. 2, I love you more, so do I too.

Any other question.

Q: To withdraw the P inside the soul, do we need, is it understanding, or is it a whole, (1:56). different strength of emotion . ?

K- Both, you have to be able to understand it to use the ??

Q: Will the understanding lead us .. I don't understand how ..

K- It's the maturity of interaction of the field, what strength field do you use to understand the interaction between the fields of the soul and the STP. That's all.

Q: Stephanie ... I think if the teaching of today would go viral, people would understand the power they have, ..we have ... (1:58). .. you touched a very

Q: .. Brazil ... (2:00). How do we get to a place without knowing the place, for example the moon, how do I control my emotion to get there.

K- What do you mean

Q: repeats ... how can I connect myself to get attracted to that place?

K- Your soul does, we don't have GPS, in the U, but your souls does. If you have experimented with magnets. Do a ... experiment get a magnet and set a number of magnet on table ... see how that magnet, where and the way that magnet finds its final position. How many other magnets on the table will move, join, interact and they become another group or individuals in a new position. This is what happens to the STM if you decide to find position and place. You decide and in that process, how many others will join you to get you to there, and what you need to get there that it guarantees your survival and existence of you and the rest. (2:04). This is a field strength positioning collectively. You decide to go to the moon, but you don't know which part of the moon will suit you because of its field strength, your soul does, because it feels the interaction of other fields, in totality. You got to understand wherever position in the U you want to go to, your soul and the field strength M field of its existence has already has a connection to that D and position. Many things have to interact for you to be there,

otherwise that place could be poisonous to you, .. ??? The GPS of the STM is the multiplicity of its field strength which is connected to the totality of the fields of the U, not written on the box of electronics.

I explained this ... they asked one question, why are you here, why have you chosen this planet, .. time, and their space? Because the STM, the soul of the planet cried for help, collectively the soul of the existence of the U, needed a soul strong enough, patience enough, to wait to come, to sort out, gradually to bring the point, (2:06). that when it comes to the totality, the whole lot of the soul understand and the whole planet changes.

We heard the cry of the soul of the planet, in destroying life and killing, we came here to change, but through time and space, walk around the deserts of this land, and the snow lands of the north, for thousand of years, knowing that finally, the final fruit of it will be peace. My walks have come to an end, because man now for the first time wants peace, and then we'll change the man, and we shall near no more cry from this planet, as it learns, it will not kill, destroy or damage.

Then you understand, we don't need no GPS, the GPS of you is the strength of the field of the soul, and the desire to be connected with which field and which strength and position, but it takes time to learn.

Any other question. (2:08).

Q: .. yes, thank you for being able to be in your presence here.

K- You know as KS we hear this word many times, that it's pleasure to be in presence and asking questions. In a way, it's a pleasure to be able to teach that it elevates your souls. Your presence is a gift for us, is spreading the knowledge which is a gift. Gift cannot be given if there is no one to receive it.

Any other question.

Q: ... What is special about 2022 02 22? (2:10).

K- It's one of the crucial points of the maturity of the STM. It's the beginning of the time where many souls will be elevated to understand the process of the creation. We'll see the process, the start of the new generation of man. This process will take shape, a long time to complete, but is the position where man becomes aware and the power of his own existence and D of the soul.

It's the day of .. recognition of one strength, one knowledge, one understanding, and how this process has created, it's the creation of manifestation of the Methi, the Promised One in the STM, in understanding the totality of man's own strength in a way, confirming understanding of the creation and Creator without any shape or form of P or intermediary. Enlightenment to the light of the knowledge, that's what it is for.

It's a turning point, we shall see massive changes from next Tuesday in the structure of the social structure of this planet. We'll see massive improvement, massive progress towards the peace, towards unification of science and T of man, which leads to totality of

understanding. It's the time of Methi, (2:12), and manifestation of his presence. Where it's in every man as part of the totality. In a way, it's when the UC meets to bring that unification of the STM in respect of the time, place, position of the presence of and the desire of the soul of the mankind to reach the ultimate goal, which is to love the Creator, to give to become part of. It's a wonderful day if you understand it, it just doesn't go by name, it's chosen by time, place, and what we call strength. We'll see the start of the change in many ways. From next week, from 22nd on, we'll see massive development in process of the space development, space processes, man understanding there is a bigger space in the U, then man has chosen village of earth. Man will start investigating the knowledge the true knowledge of creation, not just knowledge as what man taught he has been created out of.

If you knew what I know, you shall not sleep till next Tuesday, and there on, for the rest of your life. Where the beauty of the Creator shall be shown. It's the Day of Judgment for man's understanding of one's own soul, and his capabilities, and his connection and power of understanding the beauty of the creation. (2:14). The UC members are getting ready for it, and .. will come to understand it, and once they feed (feel) it, they'll connect through the soul of Mitra. and ?? soul of humanity and the rest. The change will come.

Any other question.

Q: ... I have noticed that some of us are changing conditions by giving orders to the Cups, and they say they feel the benefit of it. I feel sad knowing this, it's like you are giving orders to one of us to do something for you. It feels like slavery. I am ashamed sometimes even to look at the Cups and Gans's knowing that I am not clean or able enough to alter their perfection. Please explain to us the right way to interact with the Gans's, children's and the rest of our environment because I feel we are not understanding love yet. ?

K can you repeat .. we'll understand different (2:16).

Q: repeats ..

K- I know a lot of people make different Cups of life, Man .. to see what they get out of it, and what they want of it. But they haven't realized you have to give to be able to receive. This goes back to a lot of beliefs, many of us ... people around us say, if I win the lottery, I give half of it away to the poor. How many poor people gave their money to win the lottery, that you want to win? Does the greed of the man the generosity of the man that he can have, and be greedy. This is what it is. (2:18). .. People don't make the Cup of Life to become the beacon of their souls to spread to the others. They make it that what they get out of it, and the Cups don't work that way. You order it, you do what you like with it, in essence you fool yourself. In essence which part of it do you link into that you become the STM ?/ on top to become a giver, to receive. You know something, North Pole always becomes ?? at a given strength even though he attracts the G of the South. It's the same, .. with us in our relationships, I give him so much love, if I give him a bit more he becomes too arrogant. What about if you flood him with love that you enjoy the arrogance of him to give back to you.

I used to give my son a lot, he was first born, he was my life. I remember my mother walk into me one day and said, why do you love him so much, kiss him so much, carry him so much. I said, I see me, the love of the creation, how much I can give him. She said <??? a specific name in Farsi. Which means he becomes not knowing what he wants to be, and he'll become arrogant. (2;20). I said, I give him so much in the essence of the creation, when he becomes to me as a father, he can give the same to his child, that there is no short, because I give it that he ?? ??? the same Now that I become a grandfather I see exactly the same thing. How he gives with so much intensity the way I gave him to his child. I didn't hold back as my mother used to tell me, I gave unconditionally, that now when he has become a father, he remembers what the father gave and gives more than what I gave. Then when my mother passed I away said to her, you see mom, I was right, I created more love than our lover gave.

We condition what we want to give. If we given unconditionally, even a stone will elevate its soul to become one beauty ?? that we can enjoy its beauty as we want to see her. When you condition the love, .. put limitation on the love, than you have ?? and you are human. When you give unconditionally, and you know ?? limitation to it, then it is that progressing towards the ultimate goal to become the soul, which is the giver, and at the same time gives as much as ?? ?? survival ?? (2:22). ?? sacrifice has no value in the D of the soul.

Any other question.

Q: Thomas ... our politicians are trying to give us back our freedom .. repeats ..

K- Actually you haven't got your freedom ?? ??? they brought such an economical situation on your nations, that you had to burrow from them, that now without a single bullet, you have to pay for these vaccines for 30 to 50 years.

Q: I hope that the system sort of outrun itself.

K- It has outrun itself. Now most of the countries say the game is over, (2:24). but we'll see how much we earn.

Q: .. all these phantom debts will somehow disappear

K- I don't see, unless you find a new gold mine and you can pay it.

Q:

K- ?? ?? If you go back about 30 to 40 years ago, Switzerland used to receive its money from every illegal activity in the world, Switzerland was best place in Europe. The streets of Zurich was paved with gold from the money stolen by the others, by the payments by nations. As I always said, Switzerland is rich partially from the stealing of the pocket of the whole nation, and not from the pocket of individuals. Because when most of the world leaders when they would steal from their nations would bring to Switzerland. So it's the central soul of the theft of the world I call it.

Q: .. at least

K- You haven't stolen it from Europe, ?? from all the world leaders, you are rich enough.

Q: (2:26). ...

K- .. but you have been backed by the Rothschild's , you are giving what they gave you to ?? ???

Q: ..

K- You have so many vaults which haven't been opened .. and died ..

I know how it works and how government officials, ... they stole from their nation and they go to Switzerland, and then died and nobody knew they had this cash, because it was so badly stolen. Now if it opens up ...

Q:

K- I know now it is a bit more difficult. (2:28). ..

Q: We have big installations in the mountains ..

K- It's not just gold.

K- the promissory notes which are issued to the world leaders by banks.

The very educated leaders they take promissory notes from their governments in different shape or form they deposit in Switzerland

We have 400 billion between China and Iran, (2:30). a loan commission for the leaders or people who sign over, for it to happen, is over 40 billion dollars. Which means the people of Iran in years to come have to service this 40 billion. It's all in notes, not in cash, in promissory notes .

Q:

K-

Q:

K- because it's all in plastic now

Q: Our whole financial system is bankrupt ...

K- Let me explain something. The system mankind has brought for himself in payment will not go bankrupt, will not disappear as long as the man works in the D of the matter state and material state. When you don't need to kill an animal and you can take the energy of the environment. you have no one to ?? there is no currency for it, doesn't matter how much you get it freely. We see this now, .. very clearly. (2:32). .. president Biden has understood this very well. During Obama's time , he is trying to remedy it in different way during his time Does not matter you have the geniuses in making weapon T in any shape or form, when during the peace process, and the countries during the Corona have no hunger to buy anymore, when your national governments can't be bought. This is the process which will come. when food has no value, you can have the most beautiful supermarket of food.

When the KS learn how to feed themselves with the energies of the whatever you call, they may walk the shop, but they will not buy (in) the shop, because they are not hungry, there is no hunger for the food. It's the same we are not hungry for war anymore. We have satisfied .. in different D and positions this. It will come. The world of . exchange of paper, currency, monetary system all finishes, when man finds out the things he values so much, have no more value.

Japanese government has a huge problem with the KF from the outset, when I explained to the Japanese that the properties in Tokyo will have no value soon, (2:34). or in NY because if you can have the most beautiful scenery ...

People are working from home ..

One insurance company buys offices from another insurance from backdoor. ..

to create a fake figures when it comes to paying policies ...

When you live on the Moon, what do you need properties you pay millions for
.... (2:36).

KS in understanding this, will see the changes, which you bring in this process through the whole structure.

Any other question .

Q: .. you said earth was calling for help for people to come .. I assume I heard this call and I came here. My question really is. How did all these warmongers and sulks and how did they finally arrive here? To turn this beauty into this .. world for the inhabitants nobody sees all this beauty because of the wars they made for the last few thousand years.

K- Now we mature for it, so we correct it. (2:38). Mankind will correct the mistakes of the past very quickly .. once .. mankind will change that's the beauty of it. You see when you have somebody standing in position, you cannot see the position, so people ?? ?? when once the position, the reality, there is no battle. So we don't take position and with it we don't take possession.

I refer this especially in past few weeks ... negotiations in Vienna. I moved to Vienna to back the negotiations by the request of 2-3 governments, they knew we could do something. When the first week of negotiations we hit something I entered negotiations with IAEA ... Out of the fear of it becoming public, the Israelis and Americans have backed off, and we came to an agreement point, because we showed we don't talk in public. But we have a huge thing if we talk in public will bring demise to a lot of things at the end of it. (2:40). The wisdom of using the knowledge has brought us peace, not fighting to kill. This is the maturity of the man. Look at the Israeli press since the 15th of December, and see how much rhetoric about Iran having nuclear bomb has changes. .. Now and go how simply we opened the hand Strange enough the IAEA did not share this document with negotiators ?? key people who actually oversee the transition. It's the wisdom of knowing how to use, but at the same time being wise enough not to, we can now do things in different way, now we have to elevate their souls. I said the UC you do the work in the background, I do the work in the front. It's beautiful we have reached peace. I told you a month ago that all the negotiations are going to be peaceful, and it's going to be reached. Next 2 or 3 days it will go back to 2015 and all the sanctions will go, many children will receive medicine, and young children will survive in Iran. But it will create a lot of jobs in America in a peaceful way. That many American children go hungry because their father doesn't have a job. Now they'll have a job. Both

sides benefit by this process. According to the statistics of UN more children go to sleep hungry in US than any other countries, and it supposed to be the richest country in the world. Even in Africa children don't go to sleep hungry, (2:42). as many as do in US. It'll bring the change .. bring the .. next step in development of peace for man. The peace is not the guns, .. it's the peace of mind. Having a peaceful nations, .. what it means we can talk, negotiate .. bring things. I think Rick posted .. that the end of this barricade in Canada the police and protesters kissed each other. In the past it was all gas masks, shooting and running.

R: Police even bragged ... (2:44).

Q: Did you see the press conference of Trudeau ..

K- we have the same situation in Austria, the police refused to do the job of the government with the Covid. This Sunday we are free. .

The number of contaminated people has passed 30,000 in a continuous daily basis ... but not many people in the hospitals, but it is a normal flu, they are detecting how many. But the more we are getting the more then are relaxing the boundaries. In the begging when we were getting to 1,000 or 2,000 we have to stay home, lockdown. Now we went to .. 30,000 all the restrictions taken off, (2:46). after March we'll be back to normal. ..

R: The logic is upside down

Q: The Austrian Chancellor was in Switzerland

K- UK has opened up.

Q: But .. the whole thing

K- I am not going into the whole thing. I am talking about the wisdom of man, if you want to go into politics it a different ??

Q: No, I don't want to go ..

K- No you see ... you have a local, national, international and you have global structures. The whole situation was designed by global runners, not by national and the governments. The global runners relied on the greed of the man to become rich. That's all they did, the rest of it is how you managed the process. Sooner or later it had to go away, but this was expected 2 years run. (2:48).

You look at the total economical damages or debts of the nations. and you look at who has become much richer. Who has taken control of the central banks. The only people who came out of this successful were the African nations. Where the Europeans went under more debt with these injections, Africans didn't have it .. now if you put a balance to it, there is actually more balance to the poorer nations ... richer nations become poorer, because they have to pay all this injection money. These injections are not 1 or dollars, they are 100 odd dollars each. Do you understand. So we'll see a correction in the economy in the next 5 years. but we need the T to bring that correction, otherwise we are back in the same doldrums.

(2:50).

What are these truckers going to do when I can pick a package in the port ... factory, I deliver it directly to. The job of trucking as we now it, it will be redone ...

Q: I am counting on you

K- No I am counting on humanity

Q: I am counting on you for ...

K- No, you don't count on anything.

Q: Let me tell my story, if we sort of develop your T.

K- No it's our T. (2:52).

where people start not being hungry, being happy ... then and if the travel into the U can start these people can go there ...

If we finally come to this point where all these weird psychopath people who have for 3,000 years 5,000 nothing but wars. .. if these people

K- Can I stop you there. Your fathers .. forefathers, same as mine, have been part of this process. Partially in the earlier life .. it's always good to know in the hindsight. We were and are still part of it. We just want to glorify the past, we think we've become to understand, now is better ?? We as a race we all been in it, and collectively, (2:54). we have to accept the responsibility for it, and collectively have to find a solution for it. That collective decision to find a solution only comes in a change in habit, .. social structure of understanding the process of life. When the first steam bucket was made. ...

The man in Africa still (has not got it) even 200 years after industrial revolution.

It's us who have to bring this plasma revolution to all the man of this planet through the STM at the same time. When we reach collectively to all, through the process of understanding, sharing knowledge unconditionally.

It's very strange when they understand the difference. I have to write this article ..

(2:56).

(2:58).

Not revolution in the matter S of the man, It's a revolution which is silent in the man, which is bringing the change and it's done by understanding that for the first time the STM is within the P of the man. Nobody can cheap you anywhere. This is where the change will come, when you elevate the STM every man in every corner of this planet will benefit by it ...

When I listen to Rafael, it gives me such a pleasure, such a joy to see him, hear him, on his monthly report to the KF how they have taken the knowledge into the depth of Amazon. Before we took the knife to show them how to cut. Now we take the PI and the same way they know how to protect themselves with a knife ??/ (3:00).

The souls like Rafael, .. other KS around the world who are going and developing the teaching through the soul, not the D of the P of it, that's where the change will come. This

is the revolution and evolution through the STM. This is where the KF is. Not the PL T that you can have a better machines and you find cheap food. Because when your soul is elevated you can feed the P in every direction.

Any other questions

Q: Mark ... Dutch guy in Germany .. You talk about elevated soul, but in principle our soul is elevated. that means you mean more than this pure love seeps through all these rings of being, onto the P, is that correct, or is it elevated soul in terms of your soul, (3:02). becomes more aware.

K- Aware, awareness of existence through existence.

Q: Yes but it is my soul has always been aware, but I become let's say from the mind side, I become aware of ..

K- its existence

Q: .. not only form the mind side but from the feeling side.

K- This is what we always said, we call it a feeling, from emotion side. The only common things between the STM and STP, they have is the emotion. If we understand that we solve the problem.

Q: Yes I completely agree.

K- Can I ask you a question, I remember who you are. Did you send your request to the KF.

Q: Yes I will write you an email .. If a person dies in agony and the soul goes into a new realm. does

K- into what?

Q: into a new form, let's put it that way.

K- Yes

Q: Now does this agony stick onto the soul or is it free of it

K- It depends what you call agony, ..pain, suffering.

Q: Yes if someone is dying from cancer and has terrible pain.

K- this is a very touchy ?? to touch. we find people who have been very charitable in life die of the cancer, same as those who have done massive crimes. (3:04).

Q: I am not asking that

K- No, no, I am trying to answer you in a different way. Is that process of agony and pain is it to bring the point of maturity to the man? In understanding through oneself. The problem is we are not inside the body .. we are not in the process of thoughts of the man. We see the physical pain, .. agony. We do not know what that man is balancing or elevating his souls to, through that power, through that pain. That's what counts. Chinese have a ., suffering bring wisdom ... So is that physical suffering brings the man to calculate to understand, more of what he has done wrong or right, and what has to be put right. What he ?? That's what, then the physical suffering is irrelevant.

People say to ... you can mend everything, why do you come here to break your bones .. you can live without suffering. But till we don't taste it, we don't understand it, we cannot find a solution for it. So what are we here for.

Q: That I understand, it's the contrast that is being presented to you, (3:06). and through this contrast you'll know..

K- No, I am not going for a contrast. I go back to the teaching of today. You have to understand the emotion of the soul and emotion of the P, the STP, they have to match, that's where the point of maturity comes. This is where maybe in the physical suffering we change, we see the same. Some people try to cover it up, some .. try to correct it, and some try to show they are correct when in fact ?? the essence the show is the same underneath. This is where it comes and we mature to it, but do we need that physical suffering to mature the soul, maybe, no, maybe it's the timeframe that the soul needs to adjust itself before separation. We see more and more people living to 100s, .. statistically because of the healthcare we are living longer and longer. But does that effect the D of the soul, the longer you live? SO if you live a thousand years would your soul become very wise. Or .. you become more knowledgeable about the work of your soul, that's what it counts. SO it's a very touchy point, understanding what it is, it's the fine line of existence. We do sometimes.

I am told if you can make gold why you ?? KF. Because my gold is different than your gold, Your gold is that yellow stuff from the thing. My gold is teaching of the KS that they teach the others, I am always rich, you always have to look for that yellow stuff. And that's all that counts. ?? when my gold is needed on the table is done by the KS, to help the other KS. This is the way it is.

The time of suffering to help the others is finished. I live a comfortable life. But I don't need the extremity of the extreme. I live a comfortable the way I do, this gives me comfort, what I can do, how I can serve. It's not the time of being a hermit, sitting in the cave and don't eat let the beard grow. I wear very smart I wear ties, I travel with everything that God can give, because that gives the image that gives the confidence to the people that there is a purpose for this, it can bring.

I was told by my Chinese friend, you are the most unusual prophet. I said, yes, my prophet id for you to profit with your soul, not to have things to ?? you know in the time of KS, we have KS who have been UC they have offered hundreds of thousands of meters of land to the KF as donation, I refused ... because I know it has no value. When we need the ?? donation I go to the KS, (3:10). you are rich, we need because we serve. And they always respond. .. even the properties .. we buy ??? what do they call it now, "go funding" we don't do that, we invest in the knowledge in the STM, and then there is a time for it we ?? this is the maturity of the time. This is where the maturity comes.

Q: .. I feel this very profoundly what you are doing, and just as little feedback, last Thursday gave me such an immense good feeling, and I am going through all your understanding Pl science all 12 of them. I have done my first CL ... because I am teaching change of emotion to people, and how to understand that you can consciously change it. This is your teaching are beautiful on this mission I have set myself.

K- I know what you do ... Going back to it, we are still waiting, if you would like to collaborate with us. But generally ... we'll go out directly head hunting for the heads that can bring that change. Maybe somebody who understands both the emotion of P would bring things about. (3:12). As I said to our directors of the KF, before we used to

do in one front, and they used to go after us, in what we ?? Now KF has many fronts and the beauty of it is you are doing it as KS, not us. The KF is the point of the center of the effort, but it's great to see, .. when we receive information in the background, weeks and months we understand what is to come. It gives immense pleasure the change is there to come, and the governments are standing behind KF now. You know the governments which they used to batter us, now they are there, they want to finance us, they want the T to be, because the leaders of the T realize there is a bigger thing than a MaGrav unit or .. pillow talk, chit chat which is used to damage. It has brought a lot of ?? on us. I cannot speak much at this moment, but the joy inside me is amazing in what is to come. Mankind will elevate in one way or the other, but it's soon, much faster.

Q: I would like to be part of your movement.

K- We are not a movement ...

Q: I say consciousness

K- We'll see what comes up. There is such a bright future, not on the horizon, we are in it. Actually sometimes it even scares me to talk about it, (3:14). because it has to be there, done by the KS to see it done. Even in the past 48 hours, we needed something, because we knew it was the change, part of the game changer for us, and out of nowhere he appeared. Yesterday, concluded, and I said, I never asked them to, but my wish was so deep inside, which was needed and it just showed itself out of the window in our lab. That's all I need to do. I don't need to go to rob, to lie, to cheat.

My wish is there to serve, and somehow the way, it was planned years ago to be there on that day. And it appears. This is how it's going to be. There is a huge change coming on KF. I am absolutely, I don't know how to bring it out, but we know what is going on, and what is going to happen, but interesting point is, the whole humanity is going to benefit by it. That's the changes, it's very beautiful. We'll come out very soon with it, I mean it is in the hands of the heads of the KF, and the 2 ladies, and the people who head the KF in different ways, the UC to get their act together very quickly, because I think world leaders will soon will pass the work of the KF, going in and trying to do the work of the KF.

In so many ways, maybe it's the wrong way to say, or the right way to say, collectively we have done it, we have achieved that in-between point as a human race, but some of us created the wars, and some of us wished for the peace, (3:16). and it taught the ones who created the wars to mature. It's beautiful . Anyway thank you .. keep in touch, we are .. a massive, I don't .. just wait till after next Tuesday, because the change comes around next Tuesday, and then we'll see how the change will come.

Q:

K- Write to .. Rick shall we call it a day ...

Q: about why the blood system

K- thank you .. I hope we learned a little bit .. sometimes sharing it brings a lot of emotion but .. that's what the man is made of in the D of P, is emotion dictates his direction of work. (3:18). Maybe now we can do more in bringing the change in a beautiful way. ... for having all the KS and especially the people who are the game

changers in the KF. Most probably I will be attending the 22nd we understand the totality of the change.

420 KSW Feb 17 2022
