

421st Knowledge Seekers Workshop; February 24, 2022 (Part 1 proofed need to finish proofing part 2 and Transcription done enough, main parts ; need to do Quick Index, Key Phrases Word ; 2 excerpts summaries)

Walk in forest not alone million of souls around absorbing energy,
Swimming with fish - covalent bond.
CO2 Box with AA on top absorbs the C14... ; more explanation of CO2 Box
Oily hair and skin is same as CO2 Box we are absorbing form environment without knowing.
Create C14 and graphene on MaGrav coils, will have generator, absorb energies of U;

Silicon 28 equals 2 C14; around muscles for motion but keeps separate.; Silicon Gans
Waiting to sign contract with 3000 scientists. new products .

Ukraine .. Pope financing in background through Americans and NATO, to take over finances of Russian Orthodox Church,
Vatican lost in China , African priests sent in with bags of diamonds to start revolution . .
Has assets of England Church, Queen is his servant. like cooperate takeover.
Not a war ..

oily skin and boils , in kids by emotions .
Plasma capacitor electricity readings fluxes with breathing. plasma energy.

ENGLISH TRANSCRIPTION

Proofing >>

(:13).

K- ... As Knowledge Seekers (KS) we share knowledge and know-how, some how some of us know a little bit more and shares, and some of us who have more emotional feeling brings the essence of the soul into our work. (:14). As we carry on in bringing to understand the parallel similarities, and the work of the soul and the physicality (P). We come to the point we need to understand in a deeper way, how to create the soul condition, which it can in turn, interact with the physical body of the man and the Soul of the physicality (STP), and the Soul of the Man (STM).

The reason for this is, at the moment we think we live on our own. We walk in the jungles, we become single sailors on the oceans of this planet and we think that's it, we escaped from it, there is nobody else around. But in fact you are far from the truth, in a neighborhood in the city we have a few people around us, we have to deal with a few souls. In the oceans we have to deal with millions of fish and everything else with a soul.

In the jungles we have all those trees and shrubs, it's more crowded for the STM in the jungle and the ocean, than in the cities. Where we have taken everything out, put brick blocks and we nominate how many people live in each block, .. room, .. house. So we have restricted the interaction of the STM. In the jungles and oceans there is no such restriction.

We go to the woods, I go to walk in the forest to feel good, why? Because you have more souls, .. more shrubs and trees to share with. It means you get from them, you gain from them, you give to them. Maybe the first time we look at going on a walk in the park, (:16). walking in the jungle, or becoming a sailor in the ocean will have a different meaning. We are not alone, we are going in a more crowded place, with less dimensions (D) of P, as we think, but in fact, we are more crowded, we share more, we enjoy more. Subconsciously, we connect to every soul of every tree, .. to every rabbit, cat, or dog, which is in the park of jungle, or in the oceans we have a whale underneath us, we share our thoughts in the D of the soul, with millions of fish beneath us, and the rest.

Now we understand why we love to go to the jungles and we go into the greens, and we like the oceans, and we do these, because we create more D of interaction, giving more, brings more, enlightens more. This is very fundamental to the understanding of the MaGrav. We do the same thing in the enhancement unit (EU). When you go in the EU, you are not on your own. Come on, we put another 34 huge systems working with you, giving to you, and you are taking from their souls. And then you are taking from the collective soul.

In a way, we share more. I can't get 34 people in a cramped part of the EU, but I can surely do better, because now 34 is an order of magnitude, In a way, it's 10 times 34, because they are so close they have to interact, and on top of it, we have 35, your soul, your STP. You walk into the jungle of plasma. You walk into the jungle of emotion of the souls of the plasmas. Now you understand, (:18). why it is effective. If we can give enough to your soul, that it says that's it, guys take it, you open up. You open the soul beyond the boundary of P.

There is no magic in the science of space T. It's understanding how to cajole, and how to create illusion of magic. We place massive amounts of reactors in one position. What did we do when we give you the Vision EU, .. the Vision and Emotion Unit. We create more to share with. You open up. You open to give more. Because you see them lower than you, because they are not as close composition of the body .. , and the cell of your brain, and the rest of it.

In a way, we make a giver out of you. In a way, when you have to deal with an EU with another 34 crowded souls. Now you understand, you get carried away and the soul opens up to give to all. You look, as you are receiving from the EU, but our composition of the material is set in a specific way to encourage you, "come on darling give, open up."

Do you remember, when I told you, when you go into an EU you might see a light coming up. That light is the expansion of your soul. We are not playing magic, this is not

a card game, that we hide and say, this is there, you sign it , and then we show it out of the deck of cards. We teach you true, teach you what it is.

Then you understand, then when I tell you we put these systems in the prisons of today, we have no more criminals. (:20). What do you think it comes from, where do you think comes from? We open, and at the time when we open the soul, in passing the STP, corrects everything, puts everything in order. Everything becomes a balance. I commit a crime to get attention, .. to come back in to be with the others, because I can not handle outside. Now I satisfy that need, that you don't need to commit a crime to get the pleasure of attention from your own soul.

There is no magic in the plasma (Pl) T, it's understanding how the magician has set the game, as a magician of the Creator. This is what we do, this is how it should be. This is why when we go into the EU, if you wish, you share. If you get to command of it, you can share of it. This is the beauty about this T.

I can put you into every system we have, and you still will die of your own cancer, because you are more important to show the emotion of your own feeling to yourself, than to the others. Self-pitying the STP to the STM. "ah, you do what you like, give me cancer here or there, at least I self satisfy the demand in me, that I did something right." I do exist, and I need the attention to be given. The whole psychosomatic, what we call in the body .. exists between what we call, "soul-somatic" too. Between the STM and the STP, and it needs the two to be feed, to be looked after, (:22). to be there to pay attention. How do we connect, how do we see.

Last week I asked Rick to put the covalent bond on the screen for you to see. What did you understand from it? What did you it bring to you as scientists, what did it bring home as a man of KS. I have changed the .. groups of what we call the Keshe Romanian, English, what ever Corona Team to Keshe Romanian ... Knowledge Team (from Corona Team to Knowledge Team). We are not anymore KS as team, you are collection, you are a collective knowledge of the Creator and creation.

How you join up counts from now on. We have taught you how to become as part of a person to be a KS, as a group to be a KS, but as English or Chinese collective soul, has the collective knowledge of the creation (KOC). So you have the knowledge. Individually we are the seekers, collectively we are the possessors. This is why when they all possess the same, they're the same, the English, the Chinese whatever. The UC member is equal, connected.

The science of the Pl T is understanding the position, the transportation and transmutation (T&T), sharing of the fields of the Creator and no more. You haven't created anything new. It's not a cooking pot to make a Chinese food, we are a cooking pot as a human race for the Creator, (:24). who has cooked us to this point to be what we are, who we are, and he wants to see what taste do we have. What to enjoy us when it comes to interaction, and not in eating.

In a way, we cook food, and we enjoyed how we taste and what it is. The Creator watches what is, His manipulation of the fields creates, and enjoys the existence of. We are nothing but a cooking pot of the fields of the U, and we think as a human race we control everything. The teaching of the KF is to show you how you mix the fields of the U in this cooking pot, and how you can move one field to another to make taste better, to look the same, or to be different. There is nothing. Whatever we teach you in the knowledge of .. the EU, is nothing but playing, manipulating with the fields of the Creator, because the U we created, created out of the essence of Its fields.

When you have, when you see, what we call in the chemistry or in the physics, interaction of the materials, why do you they come about. How do electrons position themselves to create the bonding of the two, but not touching of the two. We still stay two separate atoms, but we share a couple of electrons, that we stay in balance, that one doesn't lead to the destruction of the other, and when the fields of the outer boundaries of the electrons of our system of an atom, is slightly matching, they don't interact. (:26). You cannot mix water with oil, it doesn't go, but when you can share you accept, you exist.

Have you ever swam in the oceans as a diver, ... in a free water when there are millions of fish. Have you ever seen a flock of birds flying hundreds of, thousands of them, never touching each other. Have you ever thought, .. imagined what's the process. How come these guys fly and they don't even flip, how come billions of fish swim next to each other and they don't touch. Look at the covalent bond on the screen. Every animal, even the man has what we call, the process of the strength of the separation of the soul. Is a magnet preset? Is a PI preset? You cannot come closer. You can push it, but you can't touch it.

This is how the birds fly from one point to another and land in the same place. Mixing the PI of the soul, and the PI of the fields of what we call the earth, and the STP, landing on the same place. Geo direct, 3 points, the destination is the 4th point of the Star Formation (SF), always land on the same place.

If you have ever swam in the ocean, which I am sure many of you have done. If you were clever, wise enough, (:28). to mimic the strength field of the fish, in the school of the fish, they surround you, they don't walk away from you. When you see a school of fish runs away from you, it means you don't, you haven't created the field strength to be part of them, you are an outsider, with a bigger field strength.

I used to fly and swim in the oceans of Bahamas, for several years, that was my holiday time, that is where I learned a lot about the creation. I used to go into the ocean, and I used to get lost in the ocean, never had a fear. I also used to come to a school of fish, hundreds of thousands of them, and they used to surround me, I was part of them. I was cocooned in them, ... and I could see them, they never touched me, but I was in there with them. I became .. it was just like a .. being sandwiched in, I became like a meat pie, meat in the middle, and the pie was in the fish. I could communicate with them, I could understand how as I swam they created the space for me, that you are there, you have the

space. Somehow, I never knew ... I could always, I always landed back on the beach, and never ended up in the middle of the ocean to get lost. I tried many times to get lost, but it didn't work. Because I could create a field D of the fish, the same strength, keep distance, but you are part of us. Be in, but committed to the peace with us, we are committed to accept you as part of us. (:30).

Human race is me in the water, and the fish the Unicose. All the fields of the U, the UC they accommodate us, but they don't touch, because we haven't learned to tune into them. They are always keeping out, we are not in.

We understand the position, because I can create a soul in the D of a soul of a fish, humble enough. I can create a soul in the strength of the Creator humble enough, which is even lower than the fish. The problem with the human race is, he always looks at bigger to be. The center of the black hole, which controls all, is the smallest part in the center, not the bigger D of the black hole. It's the center, which is the smallest, which is humble enough to give, that it receives.

When you look at the center of the black hole, .. a galaxy, .. the U, .. the STM you have reached the point of understanding position of the Creator, humble enough to give. Small enough not to be. Maybe now you understand why I always call myself a KS, and not a teacher. Humble enough to learn, humble enough to be in that position, that the soul allows to share, to expand, to be. The process of understanding the creation of the soul, (:32). is the position when mankind in the coming time, as I said, will create his physical children, not anymore by egg and sperm, but by the soul of the man, and the soul of the woman, and then the womb of the mother can become the embedded position for the soul to gather enough, that it decides the D of its P.

We have to, we have no choice, now that we are aware of these things, to extend the knowledge of the PI, extent of the knowledge of the strength of the STM, the strength of the knowledge of the field interaction within the package, be it an electron, .. neutron, .. start, .. galaxy, .. a U, .. the Unicose, .. the soul of the Creator (STC), or the man, which both have the same strength in the inner sanctum of, and that's how they are connected. I accommodate you, but you are a free fish, but you are part of us as a school of fish.

But change the fish to the soul, change the soul to packages of the M fields interaction and the size. Because in essence in the center of every PI, it's the same source, same source, otherwise it cannot create the position and D.

I am not afraid of destruction of my soul, I am proud to share what I have, that the others can be elevated as part of me. Because when they are elevated, (:34). I am me, within them, not as me, but as us. As collective fields that we create the new D. The cooking pot of the Creator for its fields, is how these fields interact, and how much more, or less they receive from the others, that they create different shapes, colors, and sizes. The color red from the blue is the orientation and strength of the fields in the PI of the object, which created them, and nothing else. When you have push a little, I can change from blue to red, or from red to blue, I take what I need. And even that process, I learn how to be a

constant giver, at a certain point of the strength of the fields of the Pl, I can shine as a blue, and not just be the blue.

In essence when you look at a star, imagine what a pure soul that entity had, that it does nothing but giving, irrespective of its position and what might happen to itself in the coming time, become its demise. When you see a sun, you see a lover, when you see a sun, (:36). you understand the attributes of Creator, which itself is the darkness of it, shines within.

Read the paper about the creation of black hole. Then you understand in the D of creation it's no black, it's interaction of the fields, which doesn't allow certain field strength, at a certain given point and position, to escape into the D of the Pl inner sanctums to protect it, not to protect the fields of it, to come outside.

Stephen Hawking never understood this, when he copied the paper, he never got the essence of it. You have to understand, go back into it, it says, inside a black hole, it's a star, it's a source, it's a shining interaction. Isn't that blackness, what it gives, and it's all takes to create balanced position. Is what we do as a human race. We block everything, and we take everything, block to give, but receive as much as we can, we become self-centered and selfish, we become the possession and the possessor.

Then you understand what creates the emotion in the brain .. Where to look for the emotion of possession, where to look for the emotion of .. holding onto, and keeping. Look for a black hole, darker cell of what I call, layers of the brain ... (:38). When in the future the scientists open this door they how truth the point is. The different color, the darker shade of the brain.. dictates, confirms the emotion, which that part handles. Now you understand the connection between the soul, the STP, and the intermediary, the brain of the man, what we call the emotion of the interaction.

We call ourselves vegetarians, we call ourselves the meat eaters, we call ourselves by what we don't eat. We don't eat animals. Do you want me to open a chapter in this for you to understand how your soul gets elevated, receives energy from the outside, in the kingdom of this life. Go back into my teachings from past years. I always said, man consume 20% of the food he needs, 80% comes from atmosphere, some of it we see, some of it we don't. Some of it we are aware of, but we never understood. Some of it we talk about the others, but we never look at ourselves, we are that others too. I taught in depth. but some of you never understood, and most of you were just busy absorbing the knowledge, didn't have the digest, the time to understand.

Let's go back on a very simple principle. Go back to your CO2 Boxes. (:40). What happens in your CO2 Box? In your CO2 Box, due to inherent conditions we create deliberately, we create the soul of CO2. Soul, which is hungry to give, but in giving, it receives. A CO2 or CH3 Box are the only things, you as KS have graduated to the knowledge of, to create a gaseous, or matter state fields, in a Cu you use Nano coated Cu and Cu, and you create the soul of the Cu, and the other Cu plate is ready to give, and you

create the Gans of Cu. In the CO₂, you create the soul of the CO₂ M field, and as a giver, they all come to take, and they convert to the CO₂.

But that's not the point. The most important point in the process of showing the CO₂ was to look at the amino acid (AA) on the top. In coming to give the C, to create with the O, CO₂ Gans, because now I am a needer, I want it, because I want to do something with it, you produce the CO₂. But the AA is gathered on the top the same way. You collect the AA to put it aside. (:42). Hello.. the old saying, "what are you looking for?" What did you miss, what was the part that you did not understand in this process? Why does your CO₂ Box get saturated and does not create more CO₂. Hello .. what happened to the AA? Haven't understood yet?

I'll give you another example, as I said many times, you vegans, and vegetarians, understand this very well, because you taste it, you know it. You are more sensitive to it. When you put a leaf of lettuce, when you taste it, substance of the slipping in your mouth, the texture of the softness of the leaves of the vegetables you put as a salad, as a slipping and sliding, is the AA, is it life?

It gave its life for the leaf to absorb from it, to feed itself. (:44). Again the AA, the slipperiness is the amount of the AA, the fat, which sits on it. You actually don't get much from the content of the P of the leaf, you get from what fat, what AA that is on the leaf, that converts into energy of the AA of your stomach, and it becomes part of your energy. Wash the leaf much harder with more detergent and you take most of it away. But you have to eat more of them to compensate for the physical D of the ?? vegetable.

The leaf has used the AA to absorb energy from the U to itself, that it guarantees life. But why does the leaf get crumbled, and then destroyed or whatever. Because that field strength creating the fields between the 2 plates changes, and the AA strength is not there to compensate for that strength, that it goes yellow, and then you cannot compensate it, it becomes dry, but it still carries layers of the AA during its lifetime. So it has absorbed energy from the environment to survive.

It never ate, it just created circulation as we have in our CO₂ Box. Now come to you as a humans. Hello, (:46). have you just come out of the shower, wipe everything with the best shampoos and the soaps, the most expensive ones to wash yourself, to feel clean. Why do you do this? Why do you feel good when you wash your face and hand you're your body? Because you remove the AA, which your body has absorbed from the environment. You call it, "my skin comes out," and you wash the (old) skin off. But what was on top of it before you washed the skin off? That AA of the atmosphere. The 80% of the extra food absorbed from the environment, partially has come from the AA. Next time when you are sitting and playing with your forehead, and you see it is a bit greasy, and a bit oily, say thank you for feeding me. The AA is the essence of the fields, which gets absorbed by the body inside. The composition of the fields of the work of the blood and the brain, they taste what AA gets absorbed on your skin, that its energy is needed for ??

Wash yourself better, absorb better. But why do we grow old? Why do we change? Because the heartbeat, the P changes and cannot absorb the same AA strength as before. Now you are collecting a compound of, a deviation of. It's that deviation, gives you the old age skin. (:48). Because it has to cringe and make more surface area, and you get crinkly skin, that it absorbs more energy for the inner organs of your body.

Now you understand there is no difference between you and the leaf, and your CO2 Box. You all are absorbing energies from the environment, composite fields of this planet, which is the essence of the creation as the AA. Now you know where your 80% comes from. Wash your face with better soaps, and wash yourself with different soaps and do whatever you like. As your soul has a composition of different AA, it changes, that you receive variation for awhile, till that balances, you go back in again, till you wash. Now you understand how the knowledge of creation (KOC) in man is so back to front.

Then look at why you get temperatures, look at why there is a limitation at 42 or 44 degrees, you start having the loosing of the brain cells, and all sorts of problems when you pass such a temperature. Because at that temperature within the structure of P of the body of the man, AA compounds change position, and if it goes too high, they open up to create the same position as with the fish, as with the what we call, covalent bond, and the cell cannot hold onto.

Now we understand the essence of life from the plasmatic M field position. (:50). In the condition of the EU, I transferred the energy of the AA in a given way, directly into the direction, inside the body of the man, not waiting for it to stick, as what we call, the greasy skin, and then going in as what it needs.

I was talking to a KS recently, he said, you know these creams have a lot of Zn in them. I said, yes, because Zn is the link of emotion. Isn't the skin of man in the middle layer, where we feel everything, all our emotions, how get touched, we are pinched, we are caressed, we are beaten. You deal with a skin condition, you have to have a Zn, because it is the combination between the Zn and the soul composition, which gives you the emotion connection, field strength to the brain .. and to the STM.

Now you understand when you come to skin problems, I always give you, use the CO2, the Zn, and the AA of the Zn, and AA of the CO2. You look at the CO2, but how can I make the connection with your skin, when you don't put my fat on it, the AA which came with it, that it matches your skin. Mr. Keshe, "it worked." It works, because we understand the process of creation. We understand the process of interaction of the fields. (:52).

Now with new T, with new emergence of the knowledge, we bring new D. We bring new know-how, we bring new T, because now we can create stones, which absorb certain plasmas, certain AA that, that AA in the stone, can create a condition in the body ..., so we given you a stone to put in your pocket. No, because we know you are a human, you need to be connected to the AA of it.

Next time you women or men, you touch your diamond ring, you touch your silver earrings, and necklaces, don't clean them, don't wipe them, smoother them in the AA of silver and see what feelings you get. Smoother them with the AA, of what you have created in the metal, and then you'll see the jewelry will have different meaning. Most of you will take it off, and you'll never put it on again, because that hunger of possession in that field strength is satisfied in D of the direct field. You don't see a need to wear jewelry, because in essence you create to feel within you, that you receive it without the need for it to be there, that it absorbs some of the AA. Many of you have seen me for years, I wear nothing, because these are possessions, (:54). and with it I everything, I don't need attached to me to have something else with. Then you satisfy the needs.

Then you understand why you even talk about the AA, because look at the combination of the PI of it, a complete cycle, sustainable in every D, even you dry the fruit, the AA is still within it, because it can change its composition. It just needs energy transfer in a given direction and D. That's why we water our plants, to create that connection, that the AA in the environment can interact with it, that it receives energy. We put seed in the ground and it grows. Why, what's the essence of it? The earth ?? fields are filled with the strength of AA. Now we bury the seed and put the fat on it. It receives and it grows.

We did tests in China with the Chinese KS and the officials watching it. They never understood how I played the game. It was very easy to see they have not understood a little bit. It takes 11 days for a tiger nut to show the first shoot, takes another 4 days for the shoot to split, and every time you get a new shoot, you get a new seed in the root, that it has to feed that shoot, (:56). so you get cluster of tiger nuts in the ground. You put a fertilizers or whatever after 15 days, you get 2 shoots.

We understand the knowledge, we add a specific way, AA to the seed, we shoot in 4 days, we split, and by the 15 days we are a few cycles and shoots ahead of. What it takes a farmer to do in 3 months, we do in less than a month, because now we have put the condition of ?? This is the knowledge of understanding the process of creation, then you can play with it. Then you see how the magic of T manifests itself.

In the next week or 2, KF might have a huge surprise for KS in the D of new T, our T, which has been expanded by KS. Those who are privy to the inner work of the KF will tell you, we all are sitting for one of the biggest magic's in the world of science and T, which the KF most probably will deliver new materials, new T from our website. (:58). But not this time from KS, but the world of economy. You still can have a few pieces to test, but we come in conjunction with those who have developed our T in the background into a big step. If the things happen the way we hope, then you'll see, maybe by the next Thursday, massive injection of the new T, new products, into the international world of people, who have understood our T, and taken it a step further. But they are humble enough that they want to share, they want to bring it back out.

Because in the same process we still use the AA. We still be able to give a room to go in, and walk out and say, "I am not hungry, I don't need to kill." I am satisfied, because everyone understands, that this room is the room to share the beauty and the energies of

the STM and the totality. We are entering the next phase, and it's time to set the STM collectively to come together to that position. The change will come when we all understand the T, not by one giving and all of us, "monkey sees, monkey does." (1:00).

It is, the process of understanding, this is why the teaching of past 2 - 3 weeks has been this way, to bring you to understand, .. to be part of, to bring you not to copy. Yes, we understand this. We are part of it, and as part of it, we have to understand the process.

Now you understand the connection between the soul and the P, and life of the man? When that AA is absorbed on your forehead and you see my head has gone greasy. Hello, have you understood what has happened to you? Have you noticed by coincidence how much your emotion and your feeling changes, absorption of knowledge changes by greasiness of your hair, by greasiness of your skin, and what that greasiness is the AA, not coming from your skull as you think, is coming from outside you, because now you are that CO2 Box. What emotion do you create within the brain, that calls for this AA?

Now you understand P has a different meaning. Now you understand our structure is a complex systems of just creating conditions to absorb energy from its environment. (1:02). You thought the greasiness comes from your skin of, my dear how far wrong have you been. You have created it inside the fields, exactly the same as that CO2 Box. The liquid inside the CO2 Box is your blood, circulates, creates a field strength that calls for that AA.

When I am in Japan, I don't have a greasy hair. When I come to Europe my hair becomes greasy, I don't know why. Because the Japanese culture and the way they pay you attention, and the way what you eat in the physical D, does not need greasy hair for you to absorb energy from the space. It's that ?? food with the fish, where the Sushi and Shizu, and the rest of it. Here you don't (get that), but the brain and the soul still needs that feeding of it.

So what do I do, I call it in, I create the energy within your blood to call what I need, it becomes greasy hair to you, but actually it is feeding energy to you ??. But at that process, now you changed to satisfy that need, other things in the body don't match, and you get a cancer of the greasy hair, cancer, because you don't get that cancer in Japan, because you already been satisfied by it. How many different types of cancers through emotions and the fields, now we attract and create, due to not understanding the work of the field of the U.

Would the KS in the coming time, (1:04). create soaps, which gives that filter for absorption of the certain universal field, that makes man wise to understand the knowledge of the U. Quite possible if you are clever enough, if you understood the T.

When you start going into the EU. John is pushing, he says, I want mine as soon as it's here, this month, has to be. When you go to EU in AZ in the next few weeks, and John is happy to show you the latest T in the space development. Touch your forehead and see

how greasy it is before, and how greasy it is after. What kind of grease? AA. Now you understand.

John is about to receive his units in the next few .. weeks, most probably. The first of the Vision units. I am sure many KS will behave and treat it like Mecca, to go and just see and sit in it. If you don't it, sitting in it doesn't bring you any feeling. If you don't sit in it, and when you sit in it, you feel emotional, what have you satisfied in the strength of the AA of the fields of the brain in which part? You fit yourself with the boots, with the fruits, with everything else which goes with it, toots. Because you never understand that you are just absorbing the AA of. Now we control that AA, we control what is leftover, that you are absorbing from the fruit or the animal, with the systems we give you, that you don't need to kill. (1:06). It satisfies the need, and with the need satisfied nobody shall kill.

There is a beautiful .. town in Sudan. It's observed by the UN. When I was explained this by the officers of the UN, that don't leak it out, you have to find it, there are some references to it on the Internet. In this .. town they create, like a roundabout, or corners with 2 entrance doors on 2 sides of the street, it means you can enter this building, from 2 and sometimes 3 sides. The purpose of this is to satisfy a need, that, that does not lead to an infringement for the other things to commit a crime with. A man or woman, who are lonely and would like to have a physical interaction with another, they go into this, from one door, or the woman comes out the other door and they satisfy the need. They go out from that door or the other door. Nobody sees who came in, or who goes out, who is with what, satisfies what. But it satisfied a need in the society, that it stops the prostitution, raping of the children, and everything else, which the community in the West suffers.

UN keeps a lot of documentation about a lot of tribes and their habits, and this is one of them. (1:08). If you find into the UN archives and knowledge, a lot has been gathered. I had the privilege to be able to access some of this during with my work with them, because they knew what I am looking for, how creation and the Creator, accommodate each other.

How there is a tribe in African which there is no sexuality until puberty, and at the point of puberty, they switch to what is short in the community, and possibly short in the next 10 to 20 years, need more boys, or less girls, and there are too many .. their soul decides. Operation of the soul of the collective community decides, what gender we're going to have. How we create more boys, or we create less girls, or we do things because we estimate it will be enough girls or boys in the community. What did these people do? How did they elevate their souls? They don't make a decision, they don't go there, I want to be a girl, I want to be a boy, their soul decides, psychosomatic. We had matured to that point, why did we loose it? If a race of us has matured to at least that point, we should have had it too.

When you imbalance the situation by force, you have the problem of, in the Chinese community of today. We have 20 - 30 million extra boys. When it came to 1 child per family the Chinese girls are taboo. Boys are wealth, because when they get married, they

bring money in. What did they do, they found out, if it's a boy or a girl, they abortion the girl. Now we have 20 - 30 million, (1:10). Chinese boys who cannot find a partner. Wouldn't it be better for the Chinese government to understand operation of the soul, and soul's satisfaction before we need not to grow, the nation cannot give. Instead of forcing papers into the parliaments and the councils, teach the nation the need of it. Will that not ?? done, the same things as the Africans did. Isn't this another way of population control by man to decide, what we have, what we can feed, what we can produce, and now that we can feed from the energies of the U, why are they telling you are under populated by 7 billion.

Would our race start creating a new cycle of children of the soul, that as more of us depart from this planet into the space of the U, we have enough to support the life on this planet. We don't become empty villages, where everybody has left for town, and it is ghost buildings. I traveled through one of these ghost areas in past few days, it's amazing, houses which are ?? devoid of life, hardly, nobody.

Mankind has to understand from now on what his soul does in respect to his society, not just himself, and how he can adjust it, like the fish, that they understand without touching each other, but they keep the space, through the space of the fields of their souls, that creates the strength that keeps them distance, and no accidents.

Isn't this the way the new cycle of the KF Flight system (FS) will work. I told you a few weeks ago, (1:12). there will be no banging, there will be no accidents with the new T, because it even feels the soul of a child standing on the pavement wanting to cross. It's a new T, it's understanding the T of the creation, which brings a new dimension (D) to the Knowledge Seekers (KS), as seekers of the knowledge of the plasma (PI), we have to understand how our bodies, how our life, has physically positioned itself to create a condition, the color of the eye, the skin, and everything else. I don't want to be in NY, in Harlem with a white skin, I don't feel good. So when I go to Harlem I have a black skin because my soul feels, my physicality (P) is okay, but still have to wear the watch, a gun, and the knives, because I have to learn the culture, because I use my soul, my soul understands the culture, I still feel safe. So shall be when I go to planet Zeus.

Try to understand the operation of the amino acid (AA), the teaching of today is to understand the transfer of the energy, where that 80% comes from. Don't forget some of the energies we create within our soul, to absorb the energies of the U, do not necessarily end up as AA on the skin, that is just for the emotion. Some of them transfer as AA inside the cell of the body .., some of those become neutrinos, because they just give enough energy, I don't need it, but just need it to go through (the body), and I absorb what I need, for creation of specific energy fields, in the strength field of the Soul of the Man (STM). Man does not create it on this earth, the atmospheric condition of the solar system (SS) doesn't allow it, (1:14). but I need it for my life.

Now you are understanding the teaching of the past, why I said we absorb ?? Carbon 14 fields from the U, because we don't have it here. but the soul needs it for its existence. It's that, what I call, vitamin H, or in some cases I call it, the X factor in process of the

creation. Because the vitamin H is the health field that does not exist for man on this planet.

That's why when we travel the depth of the space we receive those field strength, what we call vitamins, that satisfies the body .. , the life of the man, then man does not get cancer, because he absorbs it without the filtering of the atmosphere, .. SS, .. the galaxy.

As I said to the IAEA very directly, recently, I can create nuclear material out of water. What are you trying to restrict us. I can create Gamma rays, I can create whatever, cosmic rays from just a glass of water. Isn't this what I did, that the damn forsaken nation of Belgium put me on as a terrorist, is because they said, the only way he can create grapheme is only, through the use of Gamma rays. Did I use Gamma rays? No. (1:16).

I created the field, that within the structure of the C, allows C14 which is the backbone of creation of the fields of the U, in the radiation level to be created, and man has not even understood how to create C14. Because I have the KOU, I understand the interaction of the fields. Hello, H₂O. Hello, 16 (O) and 2 H if I can change the 2 H in a specific way to Deuterium, which I know how to do, doesn't it leave me a C14.

Now you understand, Belgium's did to me, made me a terrorist, a criminal. Didn't they do that to the guy who said the earth is not the center of the U. They hung him in a church in Pisa. Now you understand? Now you understand how the lack of understanding, and ignorance has become the Medieval Ages with the damn nation of Belgium, with the criminals and pedophiles, where the object is to abuse the body and the science, body of the children. We gave to mankind, (1:18). the most advanced T, and what did they do, they made a criminal out of us. We punish them, by not receiving the knowledge. They dragged it for 8 years, now we open it.

Understanding the knowledge is more important, than trying to use the knowledge, because when we understand it, you apply it when we can. But you have to know how to use it, you have to know what conditions you create, that leads to what you need. Orientation of the C14, in the interaction of the fields of the U continuously creates the fields, which leads to creation of the cosmic rays. When man understands this, man has cracked the secret of creation.

For me, as a passenger of the U, it's an alphabet of the vocabulary of the science. It's actually the A of it, because without it you can't have the B. But you have not understood it. A pedophile policeman makes the biggest science in the work and life of the man, a crime. And then they sent a woman to make sure the scientist is killed and they can do what they like.

You got to understand the knowledge of creation I have given you, in the creation of the CO₂, in the CO₂ Box, look at it. Why did I give you the first box as a CO₂? (1:20). C12, what did I just explain to do with the O, with the presence of the H. Haven't I given you C14 without you understanding it? I have given you the basic alphabet of the creation and in the world of the Creator. You are still, "what happens when you put the CO₂ in, and

you get this and it doesn't work." Go to the structure of the body of the man, you call it B12. Can you create, or B9, Folic Acid, "hello I am pregnant" you need Folic Acid for division of the cells, it comes from radiation. I have given you the radiation creation in the fields of the U. You are still entangling, what would I do with the AA, what would I do with the creation of Gans CO2. If you understand this, I have given you both the knowledge of the earthly knowledge, and the KOU in creation, in your CO2 Box. But you don't have the knowledge. I have been doing this for years. When is human going to see what they got?

Go and see the report of IMAK which says, they have detected graphene on the first parachutes we gave it to the government of Belgium to test. They said this is using a nuclear Gamma rays, (1:22). and Keshe is a terrorist. Damn the nation, that has held the humanity back by 10 years. I'll see an end to the nation of Belgium and the blood of Belgium on this planet, because they have done enough damage. Not only to mankind but to the children of the man. This race should have never been created, and should not have brought so much hardship to humanity.

When we wish the end, we process it, that it will come to an end, because the rest of humanity has to move forward and live with the pleasure of the knowledge. You know when I explained to you before, that we come here to taste, to test, to understand, and I had to come here to understand, this process of the humanity, which lives within this blood, and now we know what to do with it. We elevate it that it doesn't exist, but elevate it to the doldrums of the U, not promotion it to a higher, because they have to learn. Listen to the teaching, you'll become a dust in the soul of another, because you have not matured to understand.

Go back into the .. original teaching, go back to understanding the Gans Boxes we gave you. Understand now and look at it in a new eye. In the D of the universal knowledge, not in the D of the man's knowledge of plasma. I have given you the biggest gift in the knowledge of humanity and the U, if you know how to use it. I gave you the Nano material for conversion, (1:24). I gave you the understanding of Nano T from the matters of itself, to understand in conjunction with the others, you'll create the conditions of existence.

Now you understand the secret of the knowledge to connect man to the universal energies, is your CO2 Box. Go back to it, and redo it, but this time, don't look at in the D of just a CO2, look at it in the D of the fields of transmutation and division, in the universal level, then you might see what will be achieved in the EU, in getting man into space.

Do I need to elevate the whole body of the man to go with, or do I create a condition of the C14 in the level of the D of the position, and the place in the U, that I can deliver the soul to the point and the position, be it NY, be it moon, be it Jupiter, or another D in the U.

The T of today is so mature. What I have taught you is so complete, that if you understand it, man will not stay in the D of the physicality to suffer. You have both, the 2 key communication lines of the U in your hand. Go back to my teachings, go back to all the medical teachings, go back, every time we touched about the health of the man, we said, C is a connector, (1:26). is the line of communication. Macro and micro.

In the D of P of the man, you have C12, in the D of the universal, you have C14. In some parts of the U you come to C16, and in some parts of the U you come from C8, understand why. What is the proposition? What is the understanding of it? What fields does it create, that allows the composition and creation of sustaining a Pl, we call it life.

Now you understand how fundamental the knowledge is, and how much you have been taught the .. human, earthly matter state, but at the same time in parallel, you had the knowledge of the universal communication, and process of understanding.

This is part of our work, and I just see Rick posting something, it says " C14 Balances ... " I don't know when this is published. R: it says May 2019 KF Plasma Times. K- It's part of the teachings, so you see we have not missed, now you understand.

Now you understand the key of man to become passengers of the U in any D without P, is your CO2 Box. (1:28). You have P, it has emotion with it, I gave you creating think Boxes, you have muscle tissue, I gave you Cu Boxes, but originally I gave you the key to connection between the universal and the earth matter state.

So now when you go to another D, when Zn doesn't exist, but it could be platinum, you make the Gans of platinum, you have the emotion of the space and time. Now we understand how simple it is, when you know how to walk, you can dance and jump. You can dance with the beauty of the knowledge you have, and you can jump from one D to another, from one nation to another, from one race to another, one position to another.

Now we understand why I said, the teaching now becomes to understand the interaction of the both. What you need as an energy to extend the elevation of the soul within that structure, and what you need to give in the structure of the P to create that promotion. I am a master of the teaching.

As I said in the teaching of Tuesday in addressing the UC, we are the Messengers from the depth of the soul of the Creator and we have the full knowledge. It depends what our audience understands. When you are in the nursery you go blah, blah, .. for the child to understand, when you come to the first year we give you the alphabet. (1:30). When you go to the university we show you the bigger picture of the knowledge. When you graduated with the KOU, we teach you the process of the graduation to be able to access. At the moment we speak blah, blah, because that's what the man understands. With this teaching are bringing you to understand the ?? plasma, and we are finished with blah, blah. Maybe we get a smile on your face. Now we can smile as knowledge, I understood what RNA is and how I can use it.

Today's teaching is again connecting the energies of the U, understand it. Remember that AA on your skin has a C connection. Do you want it to be C14, do you want it to be 40% C14, or do you want it to be 10% C14, and the rest C12. The C14 side elevates your soul, C12 still feeds your P and connects to your other D.

Two people have crossed the line in the KF in the past years, but they never understood it. One is Alex in Nigeria. He touched it, and he jumped it, because he was too busy seeing too many interesting things. He was in the Zoo with too many animals, he got carried away. The other person walked in it. but he walked, and I felt "he is going to hit it today." Was John in AZ. None of you, I have seen any progress, even coming near to this knowledge. (1:32).

We had 1 KS in South China Sea, who has understood most of it, and they castrated him. I spent 2 years with him in South China sea, and working with him. He is the only KS who understood KOC. I want to know when you as KS become as knowledgeable as him to understand, how they are going to castrate you. Only 1 KS out of millions of you has attained the knowledge, fully in a worth of let's say 40 to 50%. He has no education. Alex is the next one. People who have no blockages of knowledge from the past with the degrees and PhDs, see it through their life. Those who have, and read something, try to fix it to what they have read, so it doesn't work.

The biggest crime the Chinese government ever allowed to happen, was in respect to this KS. He would have opened the door of the knowledge into the Chinese community beyond their imagination. I made the Chinese flying system with him. (1:34). I shared the KOC with him. We built the flying systems. There was no talk, when we loaded, he was there, he knew exactly what needed to be done. He knew how, what fuels were needed, all on the table. I said to myself, amazing.

Because it does not need PhDs to understand. It needs the clarity of the knowledge to understand. Try to understand the knowledge with the clarity of his essence, not what was written in the book of the man, who has slaved the man.

I hope today you learned how the connection between the STM, the P of the man, in the environment comes together. All this you have done many times. Now you can connect it. It's understanding, which matters, and if you understood this, your MaGrav systems, which you have been looking for, would absorb the energies from the U, and converts it into energy through the line of the connection of the C within your system, (1:36). to your MaGrav system, you have your generator. As long as you want to connect the wires and this and that, my friend, still carry on playing.

Go back in the books, in one of the books we have shown the parachutes. In one of the books, we have declared that graphene is made in the parachutes. We forced them to give us the Raman Spectroscopy of the confirmation, that the C12 exists, and the graphene is within it. This is why I gave you the coils, this is why I gave you the MaGrav systems.

You have to learn how connect the MaGrav system to convert, to absorb, to create C14, on the coils, that it can absorb the connection to your system, as a C12, as energy you are looking for. Now you understand, I gave you the generator? Please those of you who received MaGravs pay the balance to the KF.

This why some of you who made MaGrav systems worked, and you have a good energy, power reduction, and some of you, "does not work." Those of you who have managed to do, if you look at the coils, the number of coils, positioning, everything perfect, (1:38). because you create a spectrum of the C12 field energies, C12 is not singular. C12 has a spectrum field energy, millions of them, and the reason for coiling it, is that purpose, to be able to. But the main object of the whole thing, that we gave you from the beginning, which the Belgium's made it a criminal offense, is how have you managed to create enough graphene on your coils?

Mr. Jalal your secret MaGrav society is on the run. You wanted to make the MaGrav system, but you didn't understand where your engine is. Now I gave you the engine. Creating C12 on the Cu coils is one of the easiest things to do, if you understand how.

Now those of you who claim we haven't given you the generator and Keshe is a fraud. My friend you are as fraud as Belgium government and its king. Because you didn't understand the knowledge. Belgium's confirmed from day 1, that I have created graphene, and I created C14. These are the source of the energy absorption.

That's why on my parachutes, when you see the box, the original ones, you see energies, floating everywhere. Do you remember the Einhooven Exhibition conference, where I opened the Box, and I said this is the empty energy box of the U. What was hanging on the doors? (1:40). of the container? Cu Nano coated parachutes for nailing the roof.

Because I created a box with graphene and C14 on the layers of the Cu, that each one absorbs different energies from the U. I took that, and I made it into the coils, and I put it in your MaGravs. You have the what I call, the vortex of the combinations of the C12 energies, and C14 conversions in your MaGrav systems. Excuse me sir, your fraud is not understanding what you have, and not the T. Denying does not bring clearance.

Reconsider, now again and again, how you Nano coat, and how much C14 you can create on it. Now you go back to why we said, do not N coat with fire, or (but) Nano coat with caustic. My friends, Rick can you put the chemical composition of caustic on the screen.. and then add a potassium (K) to it. I have given you the C14 generating system. (1;42).

... Bring the potassium (K), if you read one of the papers I keep on pushing K, because K is , you got some of K in your toilet cleansers ... The barbeque cleaner has it, .. it says K content. ..

That K due to the K40 which is the reference point in the division of the 40 to 42, gives you 3 C14. As a reference point, not as a producer, which allows your O, with a

combination of the Nano coating to convert a Cu. Convert a Cu atom, into the combination of itself, to the division of the isotope plasmas of C14.

Now you understand why 56 which Fe, is magnetic field of this planet. It's the only way which, the inner fields of this planet interacts with the C14 of the U, to create planetary systems. (1:44). Because of its position and its D. Each planetary system goes for the same way, to tune into the C14 radiation field of the U. That's the only way we keep connection as M field in the Pl form, as is communication in the body .. C is a connector, communicator. In the plasmatic field of your magnet, is C14 connection, that's how your fields, within your magnets, within the planetary system work. It keeps in contact with.

When the knowledge of the man extends to be able to measure every single fields coming out of your solid magnets, or planetary system, you will see that connection. It's your C14 isotope strength, which dictates, you'll become a cell of the heart, you become a star in one position, or you become blood in the circulation in the body of the man. That's why you have that C in everything.

That's why in certain position of the body .. fields are created like in Thalamus and Thymus, that allows the creation, conversion of what we call, the isotopes of any elements according to the field strengths of the C to be given, that can convert a matter from one to another. When you lack K, or Phosphorus in your body, where does it come from? Through the 2 glands, cooperation and interaction, (1:46). in releasing the cosmic ray fields, gives enough energy for one matter to jump to another, to satisfy the need of the body .. or to take as a G field in the C14 connection, to complete it.

That's why man living in the North Pole, an Eskimo eating only meat, still produces every other material it needs in its body and the man who is a vegetarian and eats one kind of food, still the body converts. It's the C connection with the support of the glands, which create that condition of radiation, what we call B12. B12 is a controlled conversion between C12 and C14, and allowing the conversion with the C, to change combination and transmutation of the elements in the body .. as a Pl. That's what the body has done for billions of years. You are short of vitamin D, the body makes it, you are short of Ca, the body makes it through conversion of the AA connection of the body

Have a look at KOH, and NaOH do you see the O and the H next to it. (1:48). If you be able to control this connection with the H2O, with an extra O and the H and N, in plasmatic, and not a chemical interaction. You allow one of the O to change into graphene, or to change in C14 of the C12. Then this becomes a divider, a supplier of the division of the fields of the other elements to create transmutation between one to another.

Without the presence of the C12, or the energy fields from the C12 source, transmutation in the plasma conditions is impossibilities, especially if it is going to be repetitive creation of the same, and the body f the man continuously creates repetitively a cell for a given position in the heart, a cell for the given position in the foot, and remembers what it needs, because the emotion of the soul, of the emotion of the cell, in that point in the

body, in interaction with the cosmic ray created by the C14 in Thalamus, allows the conversion as sustaining of that field in that position. I am a genius when it comes to explaining to you, but you are a genius more than me, because you understood it,

The secret society of the MaGrav community of Jalal and Hasan and the others, back to the drawing board. Find out how you create C14, (1:50). on yours, find out how you create graphene on your Nano coils, and then you find the source of the energy as universal energy conversion.

But there is a proviso to this. The one you give the MaGrav system, if he is to use the system to benefit, to give from what he receives, the system works. The one who is there to cheat, "oh, I bought a MaGrav system it doesn't work." Because now you are working as the man in the middle of the (school of) fish. the intentions are clear, I want to be, the benefit to give. Now you understand in the world of the Pl, it has to be correct in every D.

Thank you .. for today's teaching, I hope we learned a little bit more, and we created more mayhem for those of you who understood it, but you couldn't place it, and it's a lot of blah, blah, to those of you who are just listeners and you have nothing to do with it. I like to go to sleep with the voice of Mr. Keshe. I will create a copyright for putting people to sleep, by listening to me. But one day you pay with your soul, and you enjoy it.

Thank you ... now you understand how you bring both the soul and D of P in the D of transportation and transmutation, in understanding the first basics we started 10 to 15 years ago. We go for a break. Sorry Jalal I threw a lot of things out of the window you have been working for. (1:52). But you got a gorgeous team. Go back and understand and you'll have the biggest power station in the U. ...

I gave you the true universal generator, and if you change the C composition in your Cu, you can create even energy on the planet Zeus.

Thank you we go for a break.

Proofed to Here >>>

>>> BREAK >>> 421 KSW Feb 24 , 2022 (1:58).

K: .. I don't know if we can .. whatever we give is not good enough.

R: You certainly gave out a lot of information today and knowledge

K- Clarification .. Do we have Jalal on the first row. ..

Q: .. What is the relationship of Silicon which is 28, to C14, it's also a double of C14, is it something we can take advantage of, because it's a readily available material. (2:00).

K- yes, but don't forget if you touch the AA or collection of AA, you have the shiny softness like a gloss, the softness of our cells when you touch, like neural system which is communication line, is partially interaction of the fields of the When you come to neural damages, you always have to use the Gans's of Silica, but you have to understand how it works, .. it's transfers .. because it is like a glass it transfers energy, and the thickness of it, .. composition of it in the neural system, creates the .. transfer of fields from one cell to another, it has a huge role to play, but AA themselves created it, they create that. You don't need the Silica, you need the fields of Silica to give that glossiness, the softness, that floating-ness, but still containing it with a full, .. transmission of energies. Silica is one of the .. as an energy fields of the Gans, one of the fundamental plasmas in the body .. (2:02). You have a huge amount of it in tendons. When you have a problem with the tendons, when you damage it, you always need to create a certain amount of ?? silicon in the AA strength. You'll find out the process of connection, what you call, ?? mucicatin and connecting and producing something else, increases quite drastically, when it comes to ligaments and tendons. The layer which you have on the skin, of the bone, Silicon is one of the main attributes to it for separation but still keeping it like a glass container, the skin. the separation of the skin tissues when you take a muscles and you see it's got a jelly-ish material, most of it is silicon , because

(2:04).

(2;12). you want to have a healthier understanding of your emotion and you want to enjoy yourself, try to use the facilities, and I am sure we'll see more of them. One in Tehran, and in ... in Germany ..

Any questions.

Q: Micah Green ... brand new T coming very soon, ... of what might be to come?

K- We prefer to keep this until all the contracts are signed. This is a legal position, extremely (2:14). Hopefully, once it is concluded KF automatically become a 3,000 scientists organization team in research and development and commercialization. We are still in the final positions ...

It's a massive change. There are the KS of the KF used, it will bring a lot of changes ...

We have to sign this agreements ..

This team as 1 group ..

(2:16). will change. They have worked for years developing these things using our T.

(2:18).

(2:20). Largest manufacturing in Europe ..

(2:22).

Any other question?

Q: .. Is it correct to say the fields of the physical man, the correct fields of the STM, and the field of the MaGrav system, together generate an energy generator?

K- Of course it does. This is what we said from the beginning. You just understood, that's good.

proofed >> (2:23:30 to 2:37:07)

R: We got a question about Ukraine.

Q: Question, 6 months ago Mr. Keshe said, we as KS ended all wars, now we are on the verge of a war, that might lead to WW3. How would he explain what's happening in Ukraine?

Q: . Whose decision is it to kill people in Ukraine. Is Putin's soul deciding those who die. (2:24).

K- Let me explain something. We don't have a war in Ukraine. I explained this very, very clearly in American teaching a couple of weeks ago. USSR never died, Russia as a USSR was never dissolved. Each country went on their own and they called themselves what they liked, but the nation and government of USSR was never dissolved. Ukraine is still part of USSR. It's not who decides, it's the USSR as a collective nations of what we call, the bigger Russia, have decided they are going to keep their property and their territory.

This is a Vatican war. Vatican tried to attack, tried to take over the Church of Russia, which is even richer than Vatican, and they could not get into it. The Church of Russia has asked, as the administrators, as protector of the Church, the state of USSR, headed by Russia, and other nations of Russia, other 12, to protect the motherland. America will never go into war, because they know they are just barking like a dog, as I call it. Russia has the right to protect the assets of USSR. This is what they don't tell you in public.

Vatican is financing this push, and there will never be a war. We said, 99% weeks ago, that Russia will go into Ukraine to protect the motherland, the USSR. Russia is not invading Romania, nor Bulgaria. (2:26). Russia is keeping the structure protected from the push of the Vatican through NATO, to push, pressurize Russia, that they are open on the backdoor, the Church of Moscow, or Russian Orthodox Church to become assets of the Vatican.

Get this very clear, doesn't matter what you hear (in the media). Russia has not moved into create a war, Russia has moved into territory, which belongs to it, as USSR. Americans will bark because they know they are wrong. The Europeans will bark, they know they are wrong. And there won't be a war. This is not a war, this is correcting, in what done later, becomes civil wars, in Belarus, we saw it in Chechnya, and the others. Vatican is trying to push, using NATO as their slave, to push, that we go, we go into Ukraine, we put forces in there, or you give us the Church of Russia. It's not a war, this will never be a war.

If you look at it this way. Is there a war if the America takes the Marines from state of California to another state. Is there a war? The war is what happened in Ottawa in the last few days. That's the war of slavery, by their servants.

If you know the geopolitics, (2:28). Americans don't have the field forces, unless they go high level bombing. You high level Russia, I said, Russian USSR military forces have said, "one bomb out of Allied Forces on Ukraine, they'll flatten out New York." That's the territory of. Americans can bring sanctions, no problem.

What's going to happen, this is the pattern we've seen over years. Russia will move in, they change the change the government, they take all these leaders who started becoming rebel soldier, and what you call, opened business accounts, and huge money in America and Europe, they stole a lot, raped the nation. They'll escape, or they'll take them to prisons in Siberia. I have been to one of them, I know what they are going to do with them. Then after 30 days, or 60 days, or 6 months, Russians withdraw, they instate a pro-Moscow understanding of Orthodox Church of Russia, and then the barking dogs will stop in 12 months time. There never will be a war. Cannot be a war.

Moving soldiers to protect the motherland, same as you want Arizona and other states to be part of US. You don't let the Canadians or the Mexicans take it. It's the same with USSR. This is the problem, which was sitting for years to come up, and now has come up for a second time.

Intrusion by Vatican, using military forces of NATO on this side, has caused this problem, but there is not going to be a war. This is the motherland protecting its child. Russian has spent trillions in Ukraine. (2:30). As I said, when your children try to go, and you let them go, it doesn't mean for the others to rape them. The motherland protects them. This is what we see now, and this is the correction in the political dimension in Ukraine.

It's not going to be. If soldiers get killed, for whatever reason, we've seen it happening, this is part of the what we call. You have to look at it from the Russian. I have been very close to the Moscow, .. and affairs of the politics in Kazakhstan, and Moscow Russia for a long time. I don't support either policies or governments, but I stand very clear to see the reality and the truth very clearly, where it sits and how it sits.

Ukraine today is still part of USSR, the Russian parliaments, and all other parliaments of the 13 nation satellites, should have dissolved the USSR, this would not have given the USSR, under instruction of the leadership of Moscow. Even if it wasn't Putin there, it would have been somebody else, you would still have this position.

Vatican, you got to understand Vatican did the same thing with China. All that uprising we saw in Hong Kong was the amount of the financing, diamonds, Vatican sent into GoJo, into central Asia to create with the black people of China, problems, literally they came in as priests with bags of diamonds, they sold it in China, to start a war to divide China. China was aware of it.

I know this exactly what is happening, because we are part of the peacemakers, we know what is happening with the governments. (2:32). They isolated it to Hong Kong, and they financed Hong Kong to break up. We saw how the wisdom of his Excellency of president Xi of China brought this under control. All the mayhem we saw, all the pushes of the west in Hong Kong, was financed by Rothschild's, and by Vatican.

One of these Rothschild's guys was in the KF 6 years ago. They penetrated the KF through Rothschild's to destroy the KF, at that time we had a big breakage in the work of the KF, and the number of KS disappeared, because of it, was the same process. Because we know one of the Iranian guys was connected to Rothschild's, thinking I am Iranian, they can break in through, but we were watching it with the work of the intelligence system. Go back to 6 - 7 years ago, and you'll know exactly what I am talking about, without mentioning names.

Then with our work with the Chinese government, it was isolated, they were aware of what is happening, they got .. the position sorted. So they went to Hong Kong with all the fight. You cannot imagine how much diamonds Vatican brought from Africa with the priests, they brought in, went to China, to create the splitting of the Chinese state. Exactly what they did, but this time, we were aware, the Chinese were aware, and the system kicked in, and isolated it in HK, and you saw all the battles we had for months, and now do you hear anything? All those leaders who got paid by the Vatican are in the government prison in China. We see the same thing now in Ukraine.

Vatican and Rothschild's are killing themselves to destroy the peace, that they have the control, and it is not happening. (2:34). I have no worries, this is not a war, this is ??? you see a few dogs barking, ?? let us see. In 6 months when it is stated back to where it should be, the present people will go on the streets, come and jump, which they get benefited by the NATO, and the what I call the free slavery of the Vatican inside. They shout and holler on the street, otherwise people of the Russia and Ukraine know exactly why, the Russians are coming in.

Just because you left the side of the fence in your garden doesn't mean the dogs can come in. You put a fence up and keep the dogs out, and that's as simple as that. They can bark behind the fence as much as they like. There shouldn't be a war, unless something goes crazy with somebody in the west. We don't see any.

I explained that in the American teaching very recently. I have been part of this process for 40 years, and I worked the Russians and the Chinese for long enough to understand what is their point of view. Yeltsin once said, Mehran has slept in more beds of the presidential offices around Russia than I have. Then you know how close we are, and how much we understand, and the T of the nation and the feeding of the nation.

It is not going to happen, it should not happen. First of all Europe doesn't have forces to match the Russia, secondly, if they push the pipelines will close, you don't live in the west, in Europe. (2:36). Winter cold time. The Russians have chosen the best time to do. We close the pipelines the prices will go up, the Germans and the rest will freeze, and their nations will go on the street. It's very well planned, and done. Western Europe relies on the gas pipeline from Russia for the heating and their life in the winter. They know what they are doing, and in a way.

The Americans can bark, but we won't see high rise bombing, in whatever. A few field forces here and there, and secondly Europe doesn't have that kind of military, especially with the Corona, to stand a full invasion from Ukraine into western Europe. It's not going to happen. Russia is just getting the child back home, in a way, which became a bit astray. They will shout and kick, but at the end, when the child is in danger, the mother will bring her home.

Any other question. (2:37:07)

Q: Azar ... our skin is much oily.. when people get older they get less oil we get less energy from the U, that's why they're gong to die?

K- When you are young and you get the boils now maybe you understand for the first time, it's a combination of the emotion, which creates different fields. (2:38). .. So you have imbalanced fields between your hormones and creation of your emotion, which shows itself in different ?? If you look at the boils of the youngsters, of their face or the back of their hands or whatever they come. you'll see a connection with their emotion how they feel and which part of the body manifests itself on. You do not see boils on youngsters with a lot of confidence, even they have confidence outside but weak inside. you'll see it, and just look at which position the boils appears on which side of the body, .. face. It gives you a lot of info about emotion and which part of.. you know if certain part of your brain creates certain emotion fields

Thank you shall we call it a day.

Q; .. experiment with a capacitor (3:30). ... I made a small capacitor with a mix of some Gans and some KOH and some AA in capacitor. The next day, millimeter when I

breathed in the mille-volt measurement on the multi-meter decreased, and when I breathed out the mille-volt increased . When I held my breath the measurement stabilized ...

K- I have been there, I know that. If you blow it changes, in steps of breathing it changes, it just flickers .

R: I've seen that as well ... (3:32).

K- We change the field of the environment, because it is not just breathing, a breath is a plasmatic field change and we transfer it. Because it comes out of our body it's connected to the C, and if you have the Gans's which are C based, I know it took me a long time, I haven't even .. managed to change it with .. laughter, you know if you laugh... But if you change the breath, it changes too. It's still within the AA fields in line with the C ...

Thank you very much

I hope we opened some more mysteries about your CO2 Boxes, and how you have to take the MaGrav as energy sources if you know what to do with it.

Thank you ..
