

423rd Knowledge Seekers Workshop; March 10, 2022

(All proofed; , Transcription mostly done, ... need, Key Phrases, words, Quick index .)

Noah's Ark is how we travel when we leave planet;

Teaching on importance of "3 Layers" :

Need to create the 3 layers when T&T space travel, SS has 3 layers ..

How many times has the STM been part of another soul in the D of the U

Soul of Creator cannot come directly to our D, has to go through process of reduction, to become a ray within the egg and sperm;

C12 to C13 to C14 (:56) .

Traveling through space with soul and not P, physical manifestation at point of destination will be according to field at destination .

Burn C13 it becomes physical ash of C12

Body not in matter state, but Gans that's why it is flexible soft; Create new kidneys inside body by fields; no need for transplants ; Synthetic body parts - have to create soul of cell otherwise rejected by body; Field changes AA of man in space - doesn't die - takes new dimension with STP; Hello we meet again after thousands of years; When STM becomes a star or another planet ; Habit of man to kill - UC confines STM to earth till elevation; Pray for system before make it;

AA is the soul of the system (1:12) - set aside - it's a jacket

Are UFO's more advanced? Does the dog feel so?

EU are just intermediary systems to learn by;

BREAK Questions

conditional loving is not mature. Mother shows more love to 2nd child damages 1st child; need to explain to parents why;

5plus1 negotiations ..

IAEA to Tehran says Iran does not have nuclear weapon.

Iran exports enriched nuclear material exclusive permission to Russia, was hidden form public, used by WL to sanction Iran .. exposed and confirmed by IAEA

From this space T will come out, shipping space nuclear material to nations

KF offered IAEA to contain nuclear leakage if occurs in Ukraine.

Russia using 5+1 , not buy uranium from Iran, America has to back off Ukraine,

Iran is backbone of space T. Iran will be a leading nuclear nation and part of 5+1, the space T will come out this way

Subconsciousness is not sub condition of the soul, STM is aware of everything ;

KF teaching are about becoming aware of STM; You don't have to wait until bird goes free, you can make a conscious decision to free it now;
KF to make a marble put in mouth - get all energy you need from U;
K in Iran signing largest KF institute cooperation with 50 nations and manufacture new products; largest parallel scientific organization in new knowledge;
We gave the knowledge freely and now it is coming back to us;
You become aware of your true self internally and it shows externally others sense it - UC members;
The STM is within the man; To reach Creator become only energy; You decide if you want to manifest physicality; Did you give enough when you were in P to absorb enough fields to become a sun; Earth is a nursery of souls ; We go back to the sun the mother;
Risk of nuclear war; If push button Europe is gone - won't do - if Middle east they could;
KF has enough material to stop nuclear accident in our factories;

More details how KF involved with 5plus1 negotiations;

Cannot easily switch oils because refineries could be damaged;

CO2 Capture Buildings - not just agriculture, space travel, space fuel.
Use in MaGrav part of CO2 becomes C14 - everlasting energy supply. MaGravs are setup to use do this work; Gave away a big secret

When planet earth gets absorbed into sun ; Human race will go to another position in U, like what happens on earth when islands disappears into ocean like Atlantis;

ENGLISH TRANSCRIPTION

(start proofing)

Plays Creation video

(:22).

K- ... Today is another day where we add to the knowledge and try to find out more in how to progress, how we come to be what we are, what is the pattern of creation, what dictates life, and how can we replicate life. What is the secrets of existence, and where to, where do we look for the pattern of life? Is it condition to the life of the man, or is it conditioned to the whole operation of the U?

Haven't we up to now looked at 2 separate systems, or we never understood one system or another. Have we come to .. more materialistic and just look at what we see and what we touch. We understood part of it, but we never understood this is the pattern of creation. The whole subject of the teaching of the KFSSI is the ship, which is in space.
(:24).

In the olden days, we called it the "Boat of Noah" (Noah's Ark), collecting of every animal to travel, and then to land in a place. A perfect example of every animal in pairs,

that life can continue. But in fact, isn't that boat, or the ship of Noah, the spaceship, which man is trying to create today? To take the best examples, the perfect examples of the creation on this planet to the other destinations.

In a way, when you land as citizens of earth, on other planet, you land from the Boat of Noah. Which means we have come with the knowledge, that we can travel the space of the U. We come from the point where we know how to handle ourselves to be part of process of the creation. To be within the process of creation. We have talked about this in the past, we have tried to elaborate on this topic in a different ways and directly in the past. How do we create .. and sustain life, be it a cell in the body .., be it life of man on this planet, or the life of a galaxy or a solar system (SS). As we never had the knowledge, we never looked at it, but in essence this process of the creation is the same.

The process of the life is the same. In the body .. when you look at the structure, kidney in a specific position, we see 3 layers. You look at the wall of the intestine, (:26). we see 3 layers, we look at the body of the man. The skin of the man has 3 layers. Then the bigger size, in a bigger dimension (D), the SS again has 3 layers, a galaxy has 3 layers, and we always looked at what we saw, as it is, and we elaborated on it.

Because when you become a cell on its own, because when you become the body of the man on its own, you need a layer to protect you from outside fields, that it doesn't interact with what you create inside. Then you create an intermediary section, where allows the fields which are accepted by the inner side and outer side, to be leaked out, or to be absorbed, to be within the position and the place, that becomes the connection point, interface between the outside and in. Then you have the inner part which means, I work with whatever energies are within the structure. I don't let the blood to go out, I keep the veins in, I keep the muscles in.

Then we see, this pattern repeats again. We have the same thing, the same structure in the SS. When the knowledge of the man becomes extended and he can understand the operation of the SS, as I have explained in the book #4, about the creation of the SS. We see the same 3 layers. Us as planetary system, us as a sun, us as part of what we see, is in the inner shell. It's within the inner part, inner skin. So when we want to travel beyond the D of the SS, we need to understand the intermediary phase, (:28). and then we have to understand the outer phase strength fields, that it stops the cosmic rays of the different orders to penetrate to the middle, to come inside, and the same time keeps everything in.

Now if you understand this, we come to the point to understand further, how do we create this, what is the condition, what is the need, how can we have a 3 layers in the intestine of the man, and we have a 3 layers on the skin of the man, or we have on the kidney of the man, or within the SS. Who decided? What condition brings that condition of deciding what the strength to be? Can we put the 3 layers strength of the skin of the man, on the kidney? Or can we create the strength of the fields of the 3 layers of the SS within the skin of the man. It doesn't fit. Horses for courses.

Then the environment decides what that skin is going to be, and what is the purpose of it in respect to the others as they interact with each other. When the body of the man was created, it wasn't just, "oh we create a stomach and that's it. Then, oh, we need a liver. Oh, we need something to store what goes through it." So you would have to eat continuously, because you have no where to store. Then came the innovation of the fat, or changing the fields, that the inner system can absorb, we call it, lymph system. Or was it all created according to the process of the creation, that everything needed, and one part could bring the other part together.

In the world of science today, .. of medicine we say the blood comes through the kidney, (:30). and the kidney filters and cleans up, and then sends what is not needed. Isn't the fact upside down. Isn't the reality, from what we've seen today and we understand more about the creation and the process of life. Kidney gets most of the energy, which it does not needed by the body, through the lymph, through its body inside. Blood supplies part of it, not all of it.

We have accepted some dogmas about the process of life, that we have got stuck with it. Why is the position of the kidney in such a place in the body of the man. Why the liver always positions itself near the intestines, or nearby? Why doesn't the liver appears in the outer extremities of the body of the man. Where your reproduction services are, or where your hip is. Why the 3 layers of the liver, what in a way of the 3 absorption systems of the totality of what comes. The present world of medicines tells us, or the present knowledge of biology tells us, that the surplus materials are stored by the blood in the liver of the man. Yes, 20% of what goes in the liver. The liver sits on top of the stomach, on top of the intestines and absorbs directly the energy transfers and converts them into the energy matter state (S) of what is needed inside.

Once the world of science understands this, (:32). You will come to understand, you can take any energy, as long as it has a heartbeat, and what we call intellect, this entity and intellect can be created in the physical D anywhere in the U. You call this at the point, the Soul of the Man (STM). So when we send the STM, we transportation, transmute the soul from earth to moon, to Mars, to Jupiter, it will not look like the man, the way, 2 legs and 2 arms, unless you put it in a monkey suit like NASA does, and you lock it in, that's the way we want to keep it, then we'll see man will transform himself according to the condition and can live everlasting life.

We say in a beautiful poetry in Farsi, ... means, if you don't want to stand out, become part of it. Then you won't be noticed, would the body .. now you see it, Americans landed and you see a hopping man. Would we when we go onto moon and Mars, will hop like a man. The scientific data and traveling the space of the U, tells me, no. Man will not look like a man, as we see on planet earth. Man will look the way the man, the STM can exist in the D of physicality (P), what the environment of the moon allows it to be. Otherwise, your life is on a life support machine, the monkey suit. To transit, to transform, (:34). and transmute between one to the other, it becomes the trust of the man in his own existence.

What happens when you get to the moon and you want to go to the Mars? Would the intellect of the human race, and other races will reach to the point, that by the school of thoughts, by the elevation of understanding the emotion of the soul, you can decide the destination. You become aware of the existence and the dimension (D) of the life in other positions and D.

Isn't this what the sperm and the egg does in the womb of the mother? And according to the energy absorbed, the tadpole becomes a child. According to the fields which the mother has created within the womb. Doesn't this go back to what we call it, DNA and RNA and we want to confirm it, but isn't that energy seed, the egg and the sperm, which they make the STM, then becomes that Cup with the orange outside. Isn't the orange the beauty of the existence of the mother, and the Cup is the sperm and the egg, which are created to new D of its existence within the womb of the mother?

If mankind understands this, and this is the reason all these knowledge in a similar way has been transformed, (:36). and transferred to the knowledge of the man, and the rest of the creation in the U, understand this. Then we come to understand, if that soul, that energy field, which is created, can replicate the structure of the P of the Gans of the mother. Wouldn't that soul do the same, replicate the soul of the Creator (STC) within it. Where the Creator becomes that orange, and the rest of creation becomes different Cups across the U, that blows the wind, the STC within it.

So the STM is pure, as the STM. It's the condition of the environment of the P, which makes to have arms, and legs, and feet, and be jelly or whatever. Then to live you decide what you absorb, in the case of human race to kill and destroy to add to the what we call, field strength of the life of the man. We accept one, but we do not extend the knowledge to accept the totality. This is what I always said, man accepts my knowledge according to his intellect. According to his own understanding and acceptance of the totality of the creation.

You create that soul, when you transfer that soul from the earth to the moon. Now it has to create 3 layers within itself, that it can exist. How thin the skin is going to be, (:38). how thick it is going to be, what kind of pressures it's going to accept to dictate the shape, and manifest yourself at that point. But in essence, you still have within you, the field replication of the STC within the STM. I made man in the image of myself, now you have an orange, you still get the taste flavor, the beauty of the whole lot.

Now we understand, now we comprehend, now we come to be part of the totality. We've part of the creation and Creator, we've been part of the process of the existence. That 3 layers is where the STM can create the D of existence, hold on to the D of the soul, as it is within the STC. The intermediary that can see and give, and what I cannot handle, I'll put a jacket on, call it the outer limit. Where you can hold, I make it water resistance, I make it field resistance to the fields of the U. When you wear the skin of the man, you just say, oh, the water runs off the skin. But in the coming time when the scientists look, how much fields of this SS, this planet, that our body doesn't want to absorb, and we see it repelling. (:40).

How much of it gets absorbed within, because the body .. calls upon it, for it to exist, that cell in the liver of the man, that cell in the kidney of the man, does not receive the fields, all it needs to exist from what man eats, but it needs it, from different D of the fields of the U, because it's still filtering part of the universal energy within it, not just what we see, as a liver content, as what you have come to realize to be, as a cell of the liver. In that cell of the liver, are the fields of the radiation, the fields of the strength of the U within it, which the body of the man needs to hold onto. We say we hold vitamin C and D in the liver, when we need it, we call it, the body calls upon it to be there, and ?? the liver. But there is an extension, if you accept that the body .. takes 20% from the food, and 80% from the environment, so liver has to have the same functionality, to be able to take out that 80% of the use, which the body of the man doesn't need, in the D of the man. Your liver is not just for the physical D, it's for the extra fields of the U, which the body of the man needs.

Now that we come to the space T we have to understand this, that we can allow the life to appear, at the time, position, space where it needs to be. Where it has to be that it can confirm the existence of the STM. In the coming time, what we give you as we said before, as an enhancement unit (EU) flight system, would it have any physical D, would it have any physical manifestation, or we walk into the space given, we believe the space where the system is, and through it, we go through a transformation, and we connect with the universal field strength, to be able to travel the span of the U. As we said, in the last teachings, where we change the C connection fields of the C12 to C14. Where we become from matter S in the universal field strength transportation and transmutation (T&T).

Then it comes to the point, that if I create 2 layers, then the STM will become the third part (layer). Then the STM will become the D of the existence of the totality of the energies, which is needed for T&T to the point and destination of the field strength of the STM, through the emotion of the soul, and not through the emotion of the STP in the D of understanding the totality of the existence in the U.

When you travel from earth to planet Zeus, dimensions and strengths are different, and the brain of the man cannot exist. The AA becomes transparent, becomes dissolved, becomes nonexistence. Where are you going to find the emotion, except if you understood, it is the emotion o of the soul that then decides the position, the size, time and the place. (:44). And the STM has the knowledge of the U within it. As is that water, which received its beauty from the orange. That orange is the knowledge of the Creator, which knows all as he has created all.

As then man understands there is no room for intermediary. I go to the Pope and ask how do I use my soul, which strength do I need to go to planet Zeus. As the Pope himself has no idea of the existence of planet Zeus. How can you ask a blind man, to tell you the beauty of the light? How in the process of the present religions, you want to understand the upcoming knowledge of the man, in the strength of existence, unless the man himself becomes knowledgeable to the totality of the knowledge, through the soul, and creation

of the soul, and understanding, it is the image, it's that water in the Cup, which receives the knowledge and totality from the Creator.

In a way, in the new EU, which we'll use for travel, we create that 2 layers to allow the STM to expand beyond the boundaries. Now the boundary is the fields of the containment, and not the skin of the man. In a way, we put you through a condition, that you go through the sleep, you go through the condition, that you allow by reducing, changing the strength of the field of the STP and the blood flow, (:46). allows your soul to expand beyond its P, and you go see the uncle, cousin, and the next door neighbor and go to the planetary systems, which you never been, according to your understanding of the images you remember when you wake up.

As I said in the other teaching, we allow by creation of double layers, we make that transition and transformation for you. All it is, is to allow the soul to go beyond the expansion of the skin of the man. Then do I need to transmute and transport the P of the man, where every cell has a soul, and in essence, it's again, that water in that Cup, and the STM is the orange, in that essence.

Now you understand the process of the development of the new EU. We've done nothing more, except replicating, understanding and digesting and processing the knowledge of creation (KOC), that we understand up to now. But this is not the end, it's just the beginning of what the knowledge of the man is going to learn and understand in the upcoming time, that the what we call, cycle of life in the D of P, and energy fields of the body .. , become the essence, the source, the beginning of allowing, what is kept, as a soul within it, to open up, to become the most beautiful flower, in the world of the creation of the Creator, become the center, become a seed of another life, another planetary system, another sun. We understand the totality of the knowledge, (:48). but now we have to be able to replicate it, that we don't even need the EU. We rely on the strength of the STM to create that enhancement condition, that it allows the STM to become part of the totality, without being encaged of what we call, the P, the brain, and the STP of the man.

We are not changing one prison with another. We are elevating the knowledge of the man, that that man can understand, that he decides the containment without imprisonment. Then it comes to the point, that as the human race, as other races which are within us, amongst us, we are amongst them, to understand the essence of the creation and its totality, not in absurd singularity like the life of the man.

Then it comes to ask one question. How does, where does, and in essence who controls the cycle of the life of the souls, and the souls of the U, and Unicose, and the rest? In a way, in the original teaching, in the Book 1 and 2 and 3, we refer to this, but now you can understand, we set the seed of the understanding. Where we say, where a neutron splits, become a proton and an electron, like when you get a bottle of water, and you split in a big glass and a small glass, (:50). still within it is water. So shall be the STM, irrespective of the size, D and position. The soul of the Creator (STC) to be the proton,

and the STM to be that electron, but in essence all came from the same source of the creation.

The process of creation and created needs understanding without condition, unconditional KOC. Then man opens new doors, .. opens a new D in the KOC. I made man in the image of Myself, not just by feature, but by the knowledge too. If man understands this, we'll find soon, that knowledge we carry, is the knowledge of Creator within the structure of the STM. Then do we need delivery boys, called prophets. Do we need servants of the delivery boys, called Ayatollahs, priests and the rest, where they themselves are not aware of what car, and what method of transportation they are using themselves.

This is the time when the STM becomes knowledgeable to the totality of KOC, it's the purity of understanding the totality, which becomes the creation for the elevation of the understanding. We create that prison into how much we will understand the process of the creation, (:52). how we shall create ourselves, and how in time we were created out of.

If a STM is from the fields of the sperm and egg, that lead to creation of it, how many other times, part of this soul has been part of another soul, part of another position and D, in another part of the U and Unicoise. Because it could not get here, if it was directly a soul of the Creator. It had to go through a transformation, it had to go through a transmutation, it had to go through a process of reduction and interaction, to become the ray within the egg and the sperm, that there interaction creates the strength of the STM to the Creator.

Then it comes one fundamental question for all of us. How close we want to be to the Creator, which means how much we want to understand the KOC without dogmas and restriction of understanding in physical D. And every created thing be it the dog, the man, the cat, the ants, the stone, has the potential to understand the process of the creation and it is not the exclusivity of man, and not just this planet, and not just this race.

Then you understand we are part of what we think of as a soul, our soul is part of it, it's a field of another soul, which leads to creation of another D. We become that ray within the collection of the PI of the creation.

Then it comes for our KS of the human race to understand, what to use, (:54). in creation of the systems and .. reactors within the boundary of the .. EU for travel, or health, that can reach that point, .. to understand that part, that has the ability to open the cage and let the STM as a PI field of the U, to be released, that it chooses its own existence in the D of the creation. But would it, in becoming free, become away from the restriction of P, receive more from the fields of the U and the Creator, that in the process in the process of the transportation and transmutation (T&T) to its new destination from the P inside the body of the man, it will absorb new fields from the fields of the U and Creator, that it becomes mature at the point of manifestation to a total perfect PI, to start a total perfect life, for what it shall create, and what shall be created out of it. The new EU considers the whole of that structure, even it's hidden within the structure.

This is one of the most fundamental principles, as we had last week, was asked, what is the difference between the C12 and the C14. Can I create C14, can I create the condition, C14 is transportation for the universal condition connection, C12 is for the matter state Pl, what we call, the Gans body of the man. Then you have to find a way, that you go from C12 to C13, (:56). and then C14, that C14 becomes the outside travel, and C12 becomes the inside, and C13 is an intermediary. When it doesn't work, when it finds problem in, as you can see on the skin of the man, you get the rash, .. boils, .. infection between the layers. Which means the body cannot accept the condition of the transportation, into the transportation of inside or outside.

Then the purpose of the teaching becomes, that in the EU our researchers, our developers, our scientists, deliver direction and position of understanding the totality, before we can endeavor to take the steps to make that journey, to go and to walk in that system, and then find yourself within it. We say the 6th of June will be the show of the flight. But do you expect to see the flight of the system, or do you expect to see the flight of the STM in that system. The physical man looks to see if he jumps, the man of understanding sees if the soul is still in the system and interacts with Do of P. This is the process, what mankind needs to go through, this is the process of the knowledge, that we have to through, that within it, with it, because of it, we become knowledgeable of the life in the D of the U.

We have to be able to cross the condition and understanding the connection of the C12 within the structure of the plasma of the AA of the man, (:58). which actually works in the D of C13, to be able to change to the matter state or to change to the universal state. When that C13 extension of what we call, exists in the D of the Gans plasma of the man and you put it on the fire and you burn it, you get a physical ash, which is C12.

So for the first time we understand for the life of the man, in the what we call D of P is the field strength between the outer layer and the inner layer, in the body of the man, it that existence in that boil, is that P, which the 2 sides cannot go. Do we go towards the inner side, which becomes the creation and the Creator, or do we go to the outside, to become part of another, in a bigger structure of the stronger fields, in the D of rejection. This is a knife, which cuts from both sides of the life, and the man is the knife, which side you decide to go, which side you come to understand, you choose to be part of. Then in that process, mankind become wise to the process of understanding of the Creator, the creation, the way we enter the realm of the created, but we are in the matter state of it, but in the D of the field strength of it.

My job is to teach mankind to understand this process, and gradually we are reaching that point. Reaching the point, that you don't look for T&T, (1:00). of the P of the man, because we never knew, man is a pack of energy as Gans's. That's why it is flexible, that's why it can move, that's why it can do everything else, Otherwise the body of the man, would be hard as a stone in total matter S. You are not, you cannot be, otherwise you wouldn't be free to move in the 3 dimensions, and the softness of the skin, and the flexibility of the muscle of the man, confirms the man is not in the matter S. But in the condition of the earth, we have put a frame on it, and we're hanging the energy states to it

as a bone structure. Would we, shall we, with the knowledge of the man reaches the point, that you can transfer and transmute specific fields within the cell of the man, to become part of a structure which you want.

Can we understand that we have the knowledge, that for example if you don't have a kidney, but we know the field strength that it sits, within the position where the kidney has to be, because of the structure, that everything has to be rejected, which is liquid, we can create the kidney in its place. Would it come in the coming time, that we have people with 4 kidneys, 2 obsolete does not work, and 2 freshly made within the structure of the body .. . Yes it can be done. Then if you understand more, when you created it, we can allow the transformation of the old kidney to go. Then there is no need for dialysis machine, .. for heart transplant, (1:02). because now we understand the knowledge, the totality of the KOC in the D of P and life, transformation of energies to matter S of the Gans within the body of the man.

Then we ask what happens to these things, which we make synthetically. You still to hold it, you create a cell of the soul within it, otherwise it cannot exist. But still in that strength when you put it on the body .. , then it matches itself to the STM. Otherwise if it doesn't match in the D of the soul of the cell, the body will reject it, its M field strength and not anything else. When we give transplants of the kidney or heart or whatever, why does the body rejects? Because it's that rejection of the fields of it. What do the doctors do? They give you tablets to create that fields that matches, that those two can interact and keep that C connection interaction and communication. Would in the future we need these kind of operations and tablets? No, because man now understands the interaction of the fields. The T&T of the fields and how to create a condition of acceptance in field strength, both in G and M field, for the new and the old, that they can communicate.

We'll see this in the upcoming time when man becomes the traveler of the space, we will accommodate our existence to it. At the moment we wear a monkey suit, (1:04). as a spacesuit to contain it, but this is only good partially for this solar system (SS), what happens if I take you with a spacesuit in another position in the U, that amino acid (AA) just is energy, you'll have a suit with nothing in it, no life. Maybe a few fields, which are slightly different, we might find a kidney, a part of it, or a piece of a bone from somewhere in the suit. What we say, "oh, the man has died." No, he hasn't, because in the process of the freedom, the soul has still taken a new D of position, taking eclectic of the energies of existence of the matter S, Pl soul of the P of the man. Now how many of you would like to go through that transition? Would when I see you on the moon, in the D of the Pl of the existence of the moon, shall I know you. I say, "oh, this is so and so from planet earth." Or shall I see the of, and I say, I know this soul.

This is what I said, years ago, and those who understood it, I said, hello friend we meet again, after thousands of years. When I greeted the soul of Mitra in manifestation of its existence in the D of the man. Then the soul decides which P it will take its position and place. Because the D of P, (1:06). is mine in the D of physical existence on this planet, but the soul is the traveler of the U. When he sees a soul he knows, he recognizes. Go

back in the history of the KF, and it's been put in public. It says, "hello friend, we meet again after thousands of years."

Then that's the time we understood the presence of Mitra on this planet. All we had to do, was for her to be happy, to accept the soul within the D of the STP of the man. We are passengers of the U, and we have friends in other D, that like when you go to a city, and you say, oh, what are you doing in NY, I thought you're still in London. I haven't seen you for years. We travel the same across the boundaries of the U and Unicose.

The understanding of the totality, of the total essence of the creation in the D of P, in the D of what we call, the Gans state of the soft tissue existence, does not count. The essence of the creation of the STM, which counts in the D of the existence. In time, those of you who leave this planet as a STM will recognize each other in the D of the U, even if you become a star, and the other one becomes a planet, the other one becomes a seed of meteorite, (1:08). when you see and understand the strength of the soul, hello friend, we meet again in the D of creation we both came from, in the essence of the same source.

This is what the intro (video) told you, and now we understand. The essence of understanding, that the creation of the P is the time, place, and position in the physical dimensional strength of manifestation of P, and in the essence, has nothing to do with the strength of the soul and the creation of the soul, and emotion of the soul, but in a way, the soul is the creator of the D of the P, which shows its emotion in that D in the strength. This becomes important for all of us as we become travelers of the U to recognize the emotion of the soul, and with it understand what the soul tells us, and not the physical creature in front of us, "um, you look delicious " Where your soul tells you, keep your distance this body is hungry to take what fields it can steal from D of the U. This has been the habit of the man in the Universal community, and that's why the correction in the STM had to be done.

The habit of killing in the D of P has to stay and confine, and finish on this planet, where we elevate the STM, (1:10). that he learns to absorb the other 20% from his environment and not from another collection of fields of plasmas, what we call, life.

Maybe if you understand, maybe now you understand the first thing we gave you as a CO₂, what it means, what it entails, what it has, what it does, and go back to all the teachings, we always said when you start a system pray for it, as that soul within the system creates that protein layer on the top, which is the boundary of the fields between the outside and the inside for the STM.

If you understood this in totality, then you come to understand one fundamental point, have you ever up to now, treated, processed, and handled the Gans's you made, where you took the skin off. Now you understand why we keep on telling you to keep the AA separate. It's the jacket of the soul of the system, that when you need it, you can put it back on. Then because it's the separation point, understanding of the creation of the whole thing of giving and taking, then it is effective and it works. Not the Gans in the

bucket. You are happy to ?? plate, because you forgot the process of creation. You have not understood the process of existence. (1:12).

The teaching of today, is to open the eye of the KS, that you become to understand the process of creation in true essence of, and not by the magic of the spaceship EU, and everything that we have been trying, and has been tried by you, and has been the whole vision of the human race. What do you think when you see a man standing and watching a UFO, what does he think, oh they are more intelligent than us, they've done. What about the cat or dog, which is on the leash next to you watching the same thing. Does the dog feel the same way, these are intelligent people, I wish I was a dog in that ship. Understanding the science of creation is the purpose of the teaching of the KFSSI, not understanding the process of containment, another containing, another box for another soul.

We teach the freedom of the man in the U, .. the freedom of the STM in the U, .. the truth about man to understand what is to come, when he becomes part of the U Community, and then we take steps, then he can understand what we want, and then we can go to the next level of understanding of the totality. I made man in the image of Myself, and surely God doesn't have 2 arms, 10 fingers, and 2 toes and god knows, everything else, that the man see in D of P of himself. (1:14).

Then if you understood this, you understand the reason for your C12 and C14. You understand, what you call C, is the line of connection, it doesn't have that word anywhere else except the brain of the man, because now he can categorize it. And does not have the D of P in every aspect.

I hope from today's teaching you understand, and understood in a deeper way, that where and how the new systems are just an intermediary systems for you to understand more, to be able to travel the span of the U, easier with no restriction and boundary of what I call the spaceship the car, the donkey, and the back of a mule and the rest of it. It's the freedom of the man to understand the truth about the process of the transmutation and transportation of the fields of the U.

Then manifestation of it in respect to the position, field strength of the time and the place. A drop of water, moist on the window, the same drop of water moist in the room, not to be seen, and the same drop of water in the freezer to become solid ice, manifests itself again, differently. The window, room, and the freezer, are different conditions of the field strength of the U for the STM. How would manifest, how would you be manifested in the D of the window, the space of the room, or the free field strength in the space of the U. (1:16). This is what the man has to decide, in his travel and the D of the travels of the upcoming time, as the knowledge of the man reaches the T&T of the fields, and not the body of the man. I made man in the image of Myself, have you seen the Creator in a UFO, then why do you expect the STM to travel in it. Then you understand the restriction of the knowledge, which you have created for yourselves to be able to confirm your existence in the D of P and the physical life of the man.

We go for a break I hope I managed to open your eyes to a better understanding of yourself and what to expect in the coming time from your soul and your P, and how to treat, .. behave, and how to respect life, that I don't like my body and soul to be eaten by another structure to become part of, would I become the same, and I expect what is in the U freely available for me, that I do not have to commit a crime of killing.

Thank you ... today KF Sale Team has put in new packages for Easter time (1:18).

Proofed to here >>

>> **1st BREAK** >> Easter Store promotion 423 KSW March 10, 2022

(1:33).

K- have to do a PCR test so I can travel ... (1:34).

Q: .. question about the 364th KSW about the purpose ... of life. If the Creator's love is universal and unconditional to all, does that mean we the created are still immature, if we display a bias love as we strive to become Him and a part of Him?

K- Yes, don't need to ask, you should have come to that conclusion yourself.

It's very much what we see, and have seen many times, and we see repetition of it, when a mother sits at a table ignores one child, and the other one is adored to bits. Do you think that child doesn't feel, "why I don't get it?" (1:36). What have I done wrong, that I am not entitled to it. We see that with many parents the minute they have a second child, the first one becomes ignored. The first one is not there, because all the attention goes. And what do we create the condition that soul, that soul in the first child? Looking, seeking for attention that I exist, seeking for the love, that I am part of the existence.

What does the child do, pays more attention to the second child, that by paying attention while the mother is there, she might see me too. Then what do we create in the second child, me and me and me, and possessive.

Psychology of the family is the best demonstration of the life of the man in the cycle of existence. We see that 99% of families. They put the picture of the second child on the phone, and the first child doesn't exist. How come the father (first child) every time opens the phone, sees him, not me, I don't exist. Then looking and seeking for that confirmation of existence allows the abuse, because when I am needed, to receive it, I allow anybody to show me love, that it confirms I exist. We do this all the time, it's the process that the man has not understood.

Next time when you see a friend or a family member, with a picture of 1 child on their mobile, ask them where is the second one, and explain to them, if they understand it, they become aware of their own shortcomings. (1:38).

You have to acknowledge the existence of all created things in equal measure. The best example is within our families, even if you been there. And what do we create, we create monsters in the second child. It creates hyperactivity, it creates a seed for a lifetime of abuse of the second child, of the whole ?? family.

Because we have not understood the process of creation. Then do we, are we, should we, be aware of it, and how do we react to it? What are we responsible for? This is what, as a human race we are responsible to understand the position of the same. Do we love another nation, another race, and not the other, or can we collectively love and respect all. And you see this in the structure of the KF, when we open the phone, we don't say only the Americans, but the Iranians (can speak). Whoever comes on, gets a chance to share knowledge, to be part of, because we are all one. This has to reflect in the operation of the life. To become wise to it, takes a lot of effort.

Any other question. (1:40).

Q; Salomea ... is related to ... solidarity is needed, is KF ready to create solidarity and peace with the 5plus1 talks, or it's ready to do it.

K- I don't understand, to make peace with 5plus1. We made peace with 5plus1 a long time ago. I don't know if I mentioned it, I was in the American teaching on Sunday, or if I mentioned it in another conversation. We brought the peace process a lot ahead, and one or less we expect it to be concluded this week, because this is the whole plan of 5plus1, to come out this week, before next Monday. Agreements have to be reached, otherwise Iranian government and officials cannot deliver the peace message to the Iranian nation. As next week has time to adjust it.

>> Proofed to here >> skip over 1:42 to 1:54

But in an accidental sudden appearance of out of nowhere, the head of IAEA, Dr. Grossi in Tehran last Saturday. And what he said, that we do not accept the, what the Israelis have put out, (1:42). and terrorized Iran for being in possession of nuclear weapon. It's the first time head of IAEA directly referred to misleading information, .. lies which was created by the ex-Prime Minister of Israel to create Iran a nuclear state, a terrorist state, and have to bombs. They created pictures of it. On the 15th of December last year, KF at 11 AM transferred a full 6 pages document to Dr. Grossi, which I said before shared automatically with US and Israel. That it brought to show how much Israel has lied about Iran as a nuclear weapons state. Americans had to keep their face, they had been fooled by a criminal man, and in that process Grossi going to Tehran ... has

confirmed that Iran doesn't have a nuclear weapon T. We have seen the process of peace speeding up. Literally .. through and one day visit to Tehran was to confirm that we exposed the liars, and cheaters. KF played this game, its role to bringing the truth, and bringing forward the peace process by huge measure.

I am meeting with Iranian ambassador in next few hours. (1:44)

.. After 15th everything changed, and this is the work of the KF (in 5plus1) We released the email to Dr. Grossi, that it is not just talk, we always keep record of it, everything. As I said, .. we have established the same position, if the present situation in Ukraine leads to leakage of nuclear material, KF in its factories in China and in Austria, we have enough material to contain any nuclear leakage the way we supported Fukushima. Therefore, we have the knowledge, we are part of it, and our message is peaceful. (1:46). We have seen since December, Israelis don't talk about anymore nuclear weapons (in Iran). You will see huge cancellation of the weapons orders by Arab states, because this dossier has been printed in 20 copies. So 20 heads of states will receive copies, and it's the nightmare for the state of Israel. That Iran has been correct, we are not after weapons T, we are after development of the T which is peaceful for our nation. .. for the first time ever, if you go and understand .. when I entered the arena .. in 5plus1 Iran would not lose its T. .. in future to sell nuclear T and not just fuel. Everybody thought it was a joke, just Keshe talking ..

Russia now is using the leverage of receiving nuclear material from Iran for the first time in the 5+1 negotiations. (1:48). It means Iran is still enriching uranium in a vast amount, but through 5+1 it can only sell it to Russia. Russia in exchange gives uranium to Iran that we use it in another next cycle of the process. .. this communication of the 5+1 comes out of and the Americans can't do much, they have to lean towards Russia, because if Russia refuses to buy the export of Iran nuclear fuel, which Iran is producing as an exporter of the fuel, we are not exporting machinery, we export fuel to Russia and we get paid for it. Russia under sanctions from Ukraine will stop as it cannot trade with any nation, will stop buying nuclear fuel from Iran. Is America .. or any of the 5+1 prepared to buy the fuel which Russia is buying from Iran. Then it has put pressure on the Americans to back off in the Ukraine situation, because Biden needs the 5+1 to create jobs at this moment in US, and a lot of other promises, plus using KF T in the upcoming T of the US. Now you see how much we are correct and involved .. We made

(1:50). When we negotiated 5+1 with Biden and Obama, we made sure the nation of Iran stayed solid as a leading scientific organization in the process of nuclear T because it is the backbone of the space T. I explained everything to you, that you understand, and I have done this for years.

Now we know we sell. Nobody was supposed to know. We know that to sell, we need to develop the T to get better. We know that in developing we become the exporters of the new T, we just don't sell the fuel we want to export. 30 nuclear reactors are coming

operational in next 10 to 15 years, and another 100 by middle of the century. Western world gradually what we agreed, makes Iran the producer of the nuclear fuel in certain categories for the world.

I got out of giving the keys to the Americans in 2012, the freedom of Iran as a nation, as a nuclear T, and I backed it all the way through .. we opened the lying cheating .., not nation, the government of Israel, that now Iran is not a nuclear, we had confirmation from ... head of IAEA. (1:52).

So yes, we are part of it (5plus1), we have been part of it. Exchange of the knowledge for peace ..

(pause ..)(1:54).

So we come to the position that we are part of the structure ... KF will stay this way. .. because once the 5plus1 negotiations are completed we have to decide how to transfer the new T, international operation, regarding space travel. We'll be traveling, .. shipping nuclear material with high-speed across this planet, from one nation to another, all this has to be negotiated, and it's in the pipeline to be negotiated. At the moment, we see the rigman with shipping nuclear materials .. this is all part of what is to come.

5plus1 will become the nuclear club in the world and this was what we said, at the outset, from the beginning. Iran has become part of that nuclear club. For the first the Russian foreign Minister has confirmed it, that if we are getting the sanctions .. we cannot buy, so we can't buy the nuclear material from Iran. Now we see Iran is selling nuclear .. purified nuclear material, but on the agreement, to the exclusivity of Russia. But soon it will expand, because 5plus1 as nuclear nations cannot meet the demand of upcoming ?? ? ? nuclear expansion. Soon it will become preferred in preparing nuclear fuels.

We did a very good job in our negotiations, (1:56). bringing Iran straight away into one of the leading nuclear nations. Some people abused it, but now we opened the hand of the state of Israel and we've seen how beautiful a confirmation came this Saturday, that IAEA does not believe Israel and all their lies, and killing of Iranian scientists. Iran was never after nuclear weapons, because we have a much bigger target which is the space T, enrich 100% ?? ?? we have the knowledge, the knowledge belongs to the KF, we know where it sits. ?? Iranian organization and ?? the human race. But with it, we'll change the condition and the position.

We have to go for a 5 minutes break I have to do the PCR test ..

(1:58). Video .. (2:06).

Proofed again to here >> continue ..

Q; Mark Dutchman, .. regarding subconscious. Does the subconscious include the STP and STM, or parts of it?

K- We as a human race decided to call it subconscious, but in fact, it is a connection between both dimensions, the STM and STP. What they see to be, we have subconsciousness in the level of the STP, and we have subconsciousness about the STM. The subconsciousness of the STM we denied it, because we never knew where the soul is and the rest of it.

Now we know, we have the same, the same words can be used, but in a way, we don't have a subconscious of the soul, because the soul is aware of everything. It is us who does not understand it, so we call it, a sub condition, or subconscious of it in the physical D. So it is in a way, the communication of the STM with the STP and the D of the emotion and transfer of knowledge, of the existence.

When it comes to the STP, we say, oh, I am not going there, because subconsciously I am aware of what it is, or was aware of it. But that subconscious is, the way we say the STM is connected to the soul of the others, or other whatever. Our STP, (2:08). is connected to the soul of the cells of the body of the man, what created the man. This is what we have to understand. We become aware of, but in a way, the STM brings the information, passes it on to the STP, or what we call, consciousness of awareness of the man, and then we call it, subconscious, subconsciously I do this. Part of it, if it is physical, we twitch or whatever, but subconsciously we become aware of knowledge's, or something which emotions, which we are not aware of. One is to do with the STP and one is to do with the STM, which we translate as, to knowledge of subconsciousness, or awareness.

Q: .. that's what I thought how that works. To reach your self, the STM and be aware of it, is that something we can do with the vessel we have now, or do we need wait till our vessel has changed?

K- This is part of the teaching of the present time, for you to become aware of it, and in control of it. Up to now we are not aware of it, it is within us, and we are in control of it. We allowed the religions to come in, and then we allowed the abuse of those who used the religions to abuse our emotions, our life.

So now you are aware of it, you can actually, we had a, one of our friends last week was saying, he puts two rings around his fingers, and if it goes (kinesiology - to decide if something is good for you). It's another step towards, we know there is something inside, which knows more than me, outside, in the D of the soul. That's all it is, so now we become aware of it. (2:10). We can do it, and the whole teaching is in that process. You do not have to die to free the "bird." The bird is free when you choose it, but understand its limitation to fly, and what it can do.

Why can't we bring the soul of us. I explained this to a child of mine some time ago. In a way, it's the easiest way to understand it. We decide to go and hunt, to kill a bird, an animal to eat, because we are hungry. We make that conscious decision to do that job. You go consciously to a supermarket to buy a chicken. So we are aware of our physical need, and chicken will give us certain energies which we need.

Why don't we do the same with our soul. That why don't we train ourselves to allow our souls to expand beyond D of P, that it can tap into the energies of the U, that I don't need to kill that bird. This is what we'll be coming more and more with. On the other hand, if you become inner conscious of, and you can bring it, you don't need to extend the STM beyond the boundary of the P to get the fields, you go in and replicate the fields you want with the strength of your soul, that you absorb, that you do not need to kill a chicken to get the energy you need from the chicken.

As I said, in very recent past, and you'll see as one of the products of the KF in the upcoming time. KF will sell little, (2:12). very much like a marble, that when you put this marble in your mouth you can absorb all the energies, all what you need as a food, then you will not kill.

In the next few hours, this is one of the reasons we traveled where we are. In the next few hours KF will sign an agreement, and KF will become one of the largest scientific organizations in the parallel system of the new knowledge, and world knowledge. In a way, Nano T, plasma T will come, and emerge out of Iran, in a way, that is not imaginable. One of the biggest scientific organizations will be born today, that will bring the new science of the PI T, which becomes food, construction, life, energy together, and we establish the biggest scientific organization from the nation of Iran.

But the condition is, part of the agreement is, the knowledge is open to all other nations on this planet. We just crossed the "T's" and dot the "i" this morning, and this afternoon we sign. We create a structure, which will be unique, and be collective collaborative structure with the scientists from some 40 to 50 nations, which already work in the space. In a way, we establish the KF as an international space organization, (2:14). headquartered in Tehran. We, the foundation has spent a lot of time and effort and everything else to make sure this process completes.

Today we'll celebrate that day, that the signatures will go on the paper, and you will see the birth of the first international plasma space T to be born. Hopefulness of it is this, that we will start, and you will see new innovative products from the KF in the coming days, things which will change our process. This is an interim development, that the next step will come in. We will explain to you very shortly, by next week you might see some of the products.

This is a structure, the knowledge that, what we call, we let the knowledge to go free, and the freedom of that knowledge has come back to KF. People of the same line have come back. We have established, it will be rapidly growing to one of the biggest space organization, under the banner of the KF. That we don't need to kill anymore, we understand the process of the creation of it, we respect each other, because of our soul, not because of the power or the money. Because we all have everything what we want, we can create.

Q: If I am aware of my soul, aware of my true self, does it come, show itself by itself, (2:16). or how can you stimulate this process of awareness of your deeper self.

K- You can do it internally and you can show it externally, depends if you are what I call, introvert or extravert. But you go within the soul, but then you want to show the beauty of what your soul has achieved. You can do it, you don't need to be. It's not a dress to wear, or a car, because it is the latest model I have, you see I can extend my soul out, and look at me, yeah? But it's the freedom of it, that the one who wants to see your soul, has the freedom to see, to recognize the beauty of it. This goes back to if you've been a KS for a long time now, I said, the members of the UC never need to introduce themselves, as they will be recognized by what I call, the shining soul they carry. They are there to serve. We see that. People. We won't see the UC members with a bright light walking everywhere, "oh, there is a guru." No we see the beauty of it, because we see the, we sense the beauty of the soul within. This is part of what is to come. We move away from D of P, but with the knowledge, not something just to follow, with the knowledge, that we are in charge of it, we control it and we can extend it to what we want.

Then when you want to go back and reaching the Creator, then you have to think the reverse of whatever you've done. Up to now you raised your hands and you said, "I raise my hands to God, the Creator." (2:18). Now we know the STM is within the man, and the house of the Creator is within the STM, we go within. This is the beauty of understanding the new T, the new essence of creation. You don't need to raise hand, God to help us. We go within to find the truth, and the way we have been.

Any other question.

Q: .. To reach the Creator we need to become only energy?

K- Yes. Just ask yourself, do you see that way, or you are still entangled with the D of P?

Q: Will we one day cease to be, and manifest ourselves in P?

K- If you decide to, yes. This is the whole purpose of the teachings. You decide when to manifest. You decide if you want to be the creature of the planet moon, Jupiter, or planet Zeus, or another D with no planetary system, but in the fields of the U. Then you become a star in that U. (2:20). because there is nothing for you to be attached to, you are there, you become the star, you are the center of the fields.

When you have a dynamic PI you are bound to attract fields to you. When you are a ray, you just pass through. When you bring your soul to be in a position in the U, then you become the star, then you become the source, because you absorb other fields and with it, what you receive you expand, then you can shine, you shape. This is what we call, the earth is the nursery of the souls. Where the STM frees from the shackles of the P, and it has to find a space for itself to position, as you put a magnet on the table of magnets, and in that point, because it's in a dynamic position, it becomes the essence of the creation of new life, new PI. Then will it shine to absorb enough life, enough fields, to absorb enough from universal fields of the existence of the physical D. Did you give enough, that you receive enough, that you become a star in that position. Or would you become, what I call, just a dust in the fields, and not even absorb, the lowest of the dust. Don't forget in terms of PI T the lowest is not to get inside, it's the further you are from the

source, because you give so much to go further, so you are further from the point of the creation and Creator.

Any other question.

Q: Will planet earth stop being physical some day, will it become an existing planet with its beauties only being energy? (2:22).

K- We are already that, but in the D of matter state. But sooner or later we'll go back to the mother. The gravitational pull of the sun will take us in. Then there are no mountains and no rivers, we all become part of the plasma, so. I explained this to a cosmologist a long time ago. We see meteorites, .. and asteroids, we see them coming to planet earth, and they burn into the skies or they get rejected. But how much our scientists have observed, how much of these meteorites or whatever you call them, go back to the sun?

Many of the meteorites we get hit by, they are on the journey to the mother, and we are no exception, we are just a bigger piece. We have some PI as time goes we give more and more. We gradually get pulled in and become part of, and become another PI. If your body is buried on this planet the day before the sun absorbs us in, or you died thousands of years ago and it is just a bones, would it make any difference when you become a mixture of the PI within another structure of the ???. Then you radiate back out. Then you become part of it. Then in fact you see, we are always a field in change. (2:24). We are always a mirage, what we call the existence of life.

Any other question.

Q: ... Can you reassure us about the risk of atomic war?

K- What you want me to show you, you get a nuclear bomb. I don't know it depends what crazy leaders we choose to be there. But what we see, at the present time ... We have to see what we learned from Corona. Two years, the frightened us, the injected us, and as we saw in the state of Austria yesterday, threw everything out, we become free. We don't need to have injections, we don't need to have anything else. Maybe we see PCR for a few days, and then it will go away. Because we went through the cycle, they brought that for us. But it brought a lot of attention to the knowledge of the man, what the viruses are.

As KF, in a very short while, as we are doing, and other institutes like us, we explain the viruses, and then we add it to our knowledge, because you've seen it, what it does, how they can abuse us. Next time we'll not be afraid of viruses. It became like the black plague, but this time the black plague was created deliberately for enslaving our nations. We paid heavily for past two years. Our great grandchildren will pay for the moneys borrowed to pay, and other things from the .

We got fooled once. Now we see the wars. and none of the superpowers, (2:26). are objecting to anything in respect to, or threatening of the reality of a nuclear war. Because the arena is not on the list, it's not the Arabs, .. not China, .. not Australia, and Africa we can do it, the way we killed them, we promoted. Now the arena is Europe. You drop a nuclear bomb anywhere in Europe, and the Americans and Russians play the game.

Sorry, Western world doesn't exist anymore. They are not entering the arena of nuclear war at this moment in time, because in fact there will be nothing left of Europe. So the Europeans bark, but they have no bite, and that's the only thing they can do.

Because we saw what happened in the same country in 1986 when Chernobyl went. Today some 35 years later there are farms on the mountain of Wales in west of UK, that cannot be farmed, because the radioactive material from Chernobyl landed there.

So we will not see nuclear war, not in Europe. If it was in Middle east, yes that has nothing to do with us. But you nuke Europe you have finished with Western civilization. I think there is nothing more than this, the Chinese would like to see. Let them test it, then there is no superpower. Then there will be only 1 power, which is China, and nobody will risk it.

I see countries like Poland, which they are now prepared to give Mig's bla, bla, (2:28). to the Ukrainian army to be used. Watch what will be the response of Russia on Poland. They are considering in Moscow to flatten the embassy of Poland, in Moscow and never allow no Polish work contracts to come into Russia, The harshness of it will be much worse, because Russia has other powers behind it.

Then the teasing of the Western nations, then we want to go from Mig to F fighters, has no meaning. Look at the bigger picture of the politics, there won't be no nuclear war, not in Europe arena. Europe just after some 70 - 80 years is coming off the pressures of the WW2. This time, it's going to be flattened. It's the Western world which will loose, and none of them are prepared to press that button, they bark. But as a nuclear physicist we do the study of the nuclear weapons, don't worry about it. It's not the 1950's and 60's, that one person can push a button. Collection, and collective members have to release sequences, that the nuclear bomb can be released.

It's possible we might have a nuclear leakage, but that is something that we have already confirmed to IAEA, that we are ready to support them with material being held in Austria, that we can share with, that can literally be flown to the frontiers, very near. Don't worry about nuclear war, it's a lot of barking, but there no bite, and if anybody bites, (2:30). there will be no Western Europe.

Any other question.

Q: Any news on the ongoing negotiations between Iran and 5plus1, but I think you may have already answered that. Perhaps you could add more details .. answered in the weekend Keshe American Knowledge Team?

K- It is as it's going, I explained earlier on. The Russians confirmed, they can play their game, and we'll see what comes out. It's a state of art of negotiation, which who can do, and what can be done, and we are in that position in the moment. We expect and we announced weeks and weeks ago, if the Russians don't throw the what we call, the French spanner into the work, we expect to see the signing before or around next Monday ,

Tuesday latest, as Iran is going through the Iranian New Year celebration for 21st of March, which is the following week.

They don't want to do it the last day, the nation, or they might do it the last 2 days before the New Year. That to bring a new .. hope for the present structure. (2:32). But in effect we knew it from mid-summer, the negotiations will complete around this or next week.

But the only problem now is with the Ukraine situation. If Russians don't accept buying Iran's nuclear surplus material produced by Iran, then somebody in-between, maybe American will say, we buy it. This is another option which is considered by the White House. But on the other hand, this gives validity to the Iran nuclear weapons T, in not being real, and Iran will become part of the nuclear club, opened now since last week.

Everything was setup by His Eminence Ayatollah K of Iran to finish by next week. Everything fell out once, but we brought it back in. Everything in how to behave in the 5+1 was rehearsed with the KF and Iranian officials months and months before. How we expect, who to be, and what to be, and who has got to be. These are all done in writing and verbal communication to the Iranian government and we are in that position. We succeed because we know how to do it. There are a lot of deviations from it, but one way or another, we are on track. The American asked for a lot of unnecessary things which got nothing to do with negotiations, 5+1, and they came with 16 brackets of new demands, which are out of the negotiations, some has been met, some not, but more or less it has been agreed. Iranians came with the same thing, it wasn't just Americans. But over all everything is set. It should have been signed, (2:34). actually today or tomorrow. Everything was set to complete this week that it is set for Monday to be announced and be completed ...

Because it is a very important day in Iranian culture, it's the last Tuesday night where by tradition we do a lot of fireworks, and they want that fireworks to be fireworks of freedom and return back to all the sanctions finished and the rest of it. We are on target if the Russians don't mess everything up. Because that is the prelude to the Iranian New Year. It's part of our culture. We are Iranian, Zoroastrian, Islamic nation. Our belief in our nation and the culture comes before the religion.

Any other question.

Proofed again to here >> further now

Q: R: I am wondering how the oil production around the world is tying into this. We see the US has cutoff Russia, or sanctioning them for their oil, which is, kind of, shot themselves in the foot in a way, now they don't have enough oil to cover product needs in the US. The US is looking towards Venezuela and Iran their chief enemies last year, to be suppliers of the oil that their missing, and trying to make ends meet, .. (2;36).

Pressure in US and Canada to restart the Tar sands .. plus it is totally against the climate change people, that are in those governments . They are forced to look at alternate

energy supplies right now. It seems like a perfect opportunity for the Keshe Plasma T. Is it possible, .. you said Iran will be selling their nuclear items to Russia, but if they get blocked .. they would tend to build up the nuclear materials in Iran, and that makes it, everybody nervous.

What if Iran took those nuclear materials and made space products, (2:38). out of the purified uranium, or what ever it takes to make a safe reactor. I know you can make a safe reactor both H and uranium reactor, and you know how to do it for space T, and for making power ... Is it possible, that it is time for the transition now to allow Iran to become the world leader in this new T, because it has to. Not allowed to go the Russian route, and they'll to divide up all that radioactive material (the excess buildup in Iran from Russian sanctions), ... spread all that material around the world in small packages, it's a perfect way to get rid of it all.

K- But the thing is this equation of nuclear and oil is what I call, as somebody said, since Ukraine came into operation, Corona doesn't exist, we don't hear much about Corona in the news. It's become a new Corona. We have a beautiful Iranian comedy guy .. I was born in UK but I am from Iran .. so I am "Ukrainian." ..

The structure of the oil industry does not support the pattern of the ruling of Biden. We've been in the oil industry for a long time. The refineries are keyed up for a specific .. refinement (oil from a specific area). (2:40). It's not so easy to change refineries to new oil. If refineries are set for Saudi oil, Saudis sell the oil, because that's the only thing you can put in. That's why Japanese can only buy and consume Iranian oil, because their refinery was set for that way.

You can boycott Russian oil, but you can't buy Iranian oil so easily to replace it. We know this. Believe it or not I have been in one of these mistakes. At the beginning when I was young in oil industry, we never considered, but there was a need for oil, so we sent oil to the refinery, but it was not keyed up for this kind of oil, it created huge damages. ..

...
American refineries cost hundreds of millions to convert it, to be able to receive it. Russian oil is a specific mixture. Russia when it was the USSR, the oil industry was hit, brought oil from Siberia, Kazakhstan, and put them in one pipe. We sell Russian mixed crude oil. . You have to mix it because the refineries are set for this kind of mixture ..

(2:42).

Pushes the Iranian production to 5 million barrels. Creates a lot of wealth.

When Iran comes out of sanctions there will be a lot of changes for Iran. I am an example of it. For me to open a bank account in some countries, because we are under sanctions, as Iranian for me it is impossible. In 2 weeks time when sanctions comes off, Iranians can open bank accounts. We have this problem with the KF companies. But we solved this, .. in a very beautiful way, in ?? But today we had it this morning. .. in one of the countries we are trying to setup up, the bank has objected, I carry an Iranian passport. I suggested you wait for a couple of weeks, they'll come and kiss your hand, can you open a bank account. So we see these come up .. change. But essentially this has produced a

benefit for the oil producing countries back to 140 - 160 (\$ per barrel) and some of the oil fields only become profitable at certain price bracket ... (2:44).

Oil industry is a very complicated industry ... It's just a good news making .

Any other question ..

Q: ... about CO2 Capture Building with one of the by products are used for agriculture. (2:46). Can you go into it a little bit more what else can be the benefits of the CO2 capture buildings.

K- Space Technology. Space T will be one of the main beneficiaries of this process. In a way, we were just talking about the oil, what kind of C you can capture in your CO2 Box shows what kind of flight system you can create for your system. Is it a space fuel, or for running your power system? It has a lot of usages, it's not just for agriculture.

With the knowledge we have we can create a sustaining power system using a CO2. The power system is not that you create, and what you call it, energy. It's you create a condition ... that part of the CO2 stays at the matter energy level, and part of the CO2 becomes C14, which taps into universal energy. Then you have to know where you tap in to it, then you have everlasting energy. MaGrav systems are setup to do this work. (2:48).

Q: the MaGrav systems .. sorry I didn't understand that.

K- The MaGrav systems are set to create this energy production using CO2. I gave a very big secret away. ...

Any other question.

Q; Kay ... (2:50). When the planet earth gets absorbed to the sun, obviously the human race will be left out, in a way, that we don't have any other planet to exist. .. would another planet be available that the conditions would be that we could exist on that planet.

My bigger question is, when the sun itself will become part of a bigger absorption, say a black hole, does it mean the human race will be wiped off, say a few billion years when the sun becomes mature enough for it to change its D, does it mean the human race will die away, because it is dependent on the AA which belong to earth, as well as to the SS. Are we going to be wiped off? Has this every happened in the Unicose to other races, do they get wiped off?

K- I can give you an example, in a very simple way. We have an island (Atlantis), which has happened to us many times (as a human race). There are people who live on this island, and suddenly there is a volcanic eruption and nothing left of the island. But we have citizens of this island who have traveled to the other part of the world and taken sanctuary in other countries. Would the name and life of the Island which doesn't exist, it's submerged under the oceans, die off, (2:52). or its citizens have become the remnants, and the sing of that island.

The STM has traveled the spans of the U, and we are those left the island. It does not matter if the island exists or not. The soul of us, man at the moment, who leave the physical body takes a position in the U, it's not just gone. Part of its energy will go somewhere but as a dynamic P1, it'll find it's own position. It will carry .. the fingerprint of life on this planet, that where it came from, and maybe as it is part of a structure of it, it will create a condition of AA, the same as what it did, or near to it, of this planet.

So it doesn't matter, sooner or later this little dust will be absorbed in a bigger field dust, and the bigger field dust will be absorbed in an even bigger field dust. We are just a field in motion, and why do we fight for, a few seconds of manifestation. We are not. You are worried if you are going to go and become part of the SS or the sun, but in fact, long before that you have already become part of the U Community by leaving the physical life.

I used to come from earth. would you be able to create a DNA RNA of what you become a star of , and become a sun of, (2:54). to create another planet, that life can exist on it. Would I create that DNA, like the physical life you create with DNA in your child? That's the dilemma that you don't know yet. Don't worry about it, if it is going to happen tomorrow or a billion years, you have already carried, you left the island.

Q: .. but we need the AA, Mr. COHN, in order for us to stay the human shape in P, that we do

K- Do you need the AA, or do we need the fields of the AA, that's a different thing. Or you need a combination of the fields, which manifests itself in the D of that AA of the man on this planet.

Q: So presumably there would be an environment where the fields of our AA can actually manifest there, or we can trap, so it can create its presence and shape.

K- Yes, but it doesn't mean you are going to have 2 legs and 2 arms again.

Q: Yes that's what I am referring to. I was trying to say, does the race, the human race, the way we stand actually dies away in a few billion years.

K- Not really you just evolve in different field strength.

Kowoss did you hear the American teaching last Sunday, somebody said, Mr. Keshe was in London .. did they meet ..

Q: Yes .. I kept my mouth shut quiet ..

K- It was an honor to meet you ..

Q: the honor was all mine, (2:56). The pleasure is all mine, every second of it is like a lifetime, trust me.

K- Thank you very much ..

Any other question

K- .. hopefully we share more knowledge in the coming time. In a way, the world is a better place even though it looks a little rough on the edge, to what it was 3 - 5 years ago. Man is not going to war, man is becoming aware of the use of the energy fields of the U,

in the form of viruses. In a way, if you look at it, the credibility of the world leaders with Corona and now with the other parts, which are coming up, has been dented heavily. Where the population and mankind decides the future of this planet, then those who thought they can control the money and control other bits, and food. We are on that verge with the new T, to give that freedom, that you can decide, and how you decide it and how you bring it. It's not an easy job, it's not so easy to be in that position.

Thank you ..

(2:58).

423 KSW

END
