

424th Knowledge Seekers Workshop; March 17, 2022

(Quick index done mostly - Proofed and transcribed completed ; need to Key phrases, Words,) Excerpt Replication Unit 1:35

Watershed teaching of communication of the soul; Communication system has a soul; Food from surplus energies of U not other beings; Replication Unit - You are the Cup; Nowruz Table includes every life on planet - EU; 5Plus1 Negotiations details and piece of cake - Iran accepted supply fuel - T come out this way; NASA to get FEU; NASA return to moon; World leaders children of UC - need strength of soul; Hair - Nano material release and absorb fields; Soul becomes a sun; Soul is M field you decide if particle or wave; Elevation of soul become allergic to this U;

Communication through STM in the Universe:

The purpose of today's teaching is to open your eyes for future teaching of understanding the method & line of the communication. Through the STM we do same as P, but with emotion of love, unconditional giving, understanding ones own creation.

ENGLISH TRANSCRIPTION

proofed 424KSW

(:20).

K- ... We hope we extend our knowledge and understanding with how, and the things will come to be. What and how we will send our knowledge to each other without, going into understanding of what the man has made. (:22). How we change our ways of communication. We used to shout, .. howl across, we used the drums to communicate to. We became advanced, and we found a way to communicate, 1944 we called it telephone poles, telephone lines. We advanced further, and now we have made all these fancy systems, we have mobile phone, wireless communication, but has there been, is there been any wireless communication, has there been cables, has there been drums for our souls to communicate with each other? How do we feel each other, emotion of each other? Have we had systems, that we not knowingly, deliberately made for our souls and our emotions to communicate with each other.

This is where the new T comes in, .. the understanding of the T of the creation comes in. Now we have to understand what mobile phone, what wireless phone did the Creator create, for the Soul of the Man (STM) to be in touch with another soul. For you to dream and visualize it. (:24). We look at our mobile phones, and we think we are so advanced, now I can fold it, and the screen doesn't bend and cracks. I made it so small I can put it under my skin. But still has a system failure in it. Still we have not managed to do it the way the Creator has done it.

If I concentrate and understand the work of, my work, I can tell you "I love you" and you'll feel it, you'll feel the emotion of the love, of being loved. Our present communication does not include emotion. It's cold, it's cold as ice, what you put in it, you get out of it. It doesn't carry any sense of understanding of emotion.

But how come the communication of the Creator carries that? How much more do we need to understand, .. to learn, just to become a speck of dust of the knowledge of creation. To understand it. When the mankind can make systems, that carry emotion, he might have just, just managed to scratch the surface of the knowledge of creation (KOC), as the creation is dependent of the emotion, emotion of the soul, the emotion of understanding, is very much the way you feel it when you dream, of your mother, and you hug her, and you kiss her, and she kisses you back. You feel the emotion of the skin, .. of the breath of the mother, .. of the love which has no physicality (P) but is all in the dream, in the dimension (D) of the interaction of the STM.

So the mankind needs to develop, (:26). its own intellect to understand the method of the creation and communication in the world of the Creator. We have a long way to go. The moment today, we are developing T, that still use matter state (S) conditions to transfer the emotion. To transfer the emotion between the STP and the STM. Those of you who have been in the new systems know how it touches you. How you feel the emotion in the brain of the man, and then it converts itself to the STP in the heart of the man.

How you settle your emotions with the things, which in the past you could not solve with the parents, friend, or brother was alive, but now you can do. In a way, I could not speak to you when you were alive, I could not settle the misunderstanding, I could not explain it to you, when you were alive and were with me, or you are still alive in another part of the world or U, that we take away the conflict. We bring the essence of the love and creation between us. But now with this new T you can do.

Those of you who have been through it, know it is so real, even interact with daylight. You see it you feel it, you understand, that the emotion of the presence in the D of the soul, through the work of the systems is so profound, that it changes your life, it brings you comfort, .. peace, .. understanding, .. to the point to understand, there is more to life, (:28). than a mobile phones, and pictures, which comes with no emotion.

Now the new enhancement units (EU), the brain units, which we are developing, carries that emotion, .. love, .. understanding, not only with your uncle, mother, brother, but with the whole of the U, with the whole of understanding of the process. In the coming time when you fly from one planet to another, you are not aware of the stone, you are going from one city to another, you are not aware of what is there, happening dangerous, the soul of the people of that area, the soul of the people of the earth tells you not to come. Be careful, Or we need your help, rescue us. There is no SOS message in the STM, we don't have irons and woods and ribbons to make it SOS, but the STM, soul of the captain, the soul of the flyer of the system has become aware of it through the KOU.

This is what the new T will bring, .. the new step in delivering the T to humanity. As you remember last week .. we tried to bring this up, step by step, that you understand it. It's not to you, that you are the listener of the teaching of today. These recordings will be listened to for thousands of years, for the new generation, for the new Knowledge Seekers (KS), and then they develop and they understand, the progressive development of the creation of ?? peace and understanding, not will be only the level of the physical .. the planetary system, but will be amongst the men, amongst the men and other creatures, .. and travelers of the U, when the man himself becomes the traveler.

In a message (:30). to NASA headquarters in the past few days, as know we intensifying the delivery of the systems, was very simple. We give you a system as a gift, for you to develop the T, that with us we become peaceful. As I explained to the head of NASA mission to Mars in the past few days, the reason we withheld the delivery of the systems to Arizona (AZ), as I explained to John many times, and John understood fully, and we both agreed on it. Was not to put the T of the space, advanced from Iran, in the hand of the Americans to kill more Iranians, and create more sanctions with our own T.

Now that the peace has been achieved, now that the they have agreed to sign the peace treaty in Vienna in the next few hours and days, we share the knowledge. We have gifted a unit to NASA headquarters, Marshall's space center, and we've told them, you want it, you want our help, you can do, but we leave it to you to develop it. We leave it to you to understand the new era. As I said to the Marshall Center, they just announced the delivery of the new flight system, more rockets, I said, is this still a joke going on. They say, we have no other T, what do you want us to do?

In this process by sharing, and giving the knowledge, that if you want to fly from Tehran to New York , you just need to be thinking of it. If you do not manage to reach the level of understanding of the motion of the STM, in the EU you do. The whole process of the communication is to understand, (:32). the way even some of our own creatures on this planet work and fly.

We see millions of birds as I said before, we see millions of the fish together, they never touch each other. They never come even in contact with each other. Because they work through the dimension of .. the M fields, the interaction of it. You bring a minimum setting in your flight system (FS), it means that it cannot, does not matter at what level field it is, even the emotion, the physical body of the man, a lamp post, a stone, a dog, that minimum strength M fields, will not allow the two to touch. Keeps that distance, the way the fish do in the oceans and birds fly in millions across continents. We don't see birds falling off the air, when we see hundreds of thousands of them are flying together. You want to see this beauty go to Ghana, .. Accra, and then watch every morning, and every afternoon, hundreds of thousands of bats take to flight and come back. The sky goes black by them, but you never see a single bat to fall off by accident, by hitting another.

When you set the minimum, .. a condition that no soul in the strength of the G field of the earth will come to touch another, accidents become impossibilities. You communicate to

the strength of the soul of the system, with the Soul of the Man (STM). You even have to understand the strength of the soul of the stone, that it don't hit the stone or the lamp post. If you remember in the teachings before I said, (:34). it becomes impossible to have accidents with the new systems, now you understand why, .. how. We set a minimum interaction of fields within our FS.

Hitting a meteorite is impossible, because we can set the system according to the universal minimum standards. Meteorites are this part of our game, what about meteorites outside the solar system (SS), which are much bigger and more effective. What about the meteorites in the U, which is the scattering of the SS and galaxies debris. Which one piece can be even bigger than the earth itself. This is the beauty with the new knowledge, ... when we set the minimum FS, do we set it for the minimum flying gap for the earth, SS, galaxy, and the U, and for Unicose.

This is the knowledge the man has to gain, .. the new enhancement center (EC) systems we are developing, I have (in a) hidden way built into. Look at what you were taught months ago. You should have understood, you should have grasped the whole idea, of why we gave you the 5 Stacker Unit. Hidden in that structure is the minimum limitation interaction of the STM on top, and the G field of the earth at the bottom, which carries the Inertia in the second level, which means man has been given a full FS in the 5 Stacker unit. Now you understand, now you comprehend (:36). how we have covered all the bases, with you, that when it comes to it, you say yes, how come we missed it. Because you didn't have the knowledge you didn't know what it means.

When you have the bottom stacker of 5 units, it means you cannot touch the soul of no matter state (S), which is the gravitational field of the earth. On the top you carry the STM, it means you cannot touch no soul, you cannot come physically in touch with it. Killing is not just by, not taking a life, it's by preventing the thing to happen. This is the beauty of the teaching, which I have given you. I have hidden the knowledge of the creation (KOC) within the simple instrument, in a simple unit. Those of you who have destroyed the 5 Stacker Unit with what I call, clandestine activities of enemies of the man and the KF. Now you understand what you missed. The Devil lays in different clothes.

If you understand the system, why we gave you the enhancement unit (EU), in 5 levels is to understand, that even the Soul of the Physicality (STP) of the man cannot touch another. It's impossible, if you understand the knowledge behind it. You have to integrate all this knowledge in your FS. Do you need communication system, do you need to understand where the gravity of the earth ends or begins, because even you are on the other end of the U, you can go with the speed of, million times the speed of light, past the earth, but never touch it, because you set that minimum to all planetary systems. (:38). Now you understand, the communication is not just words and emotions, but by respect to travel, in respect to understanding the position in time and space.

Today's teaching is fundamental for those who take with us into the space T of coming up. What is to come. As I said, to the heads of KF teams, who are responsible for different aspects of it, we start the FS from now. KF in next few days will fly the units

across to US, to NASA, to Arizona (AZ), to Tehran, and Vienna. We'll ship the control system in a different way to AZ from Austria. We are back in track, as we achieved what we said, the peace process. As was said, in the past few hours, the world leaders (WL), peace has taken, and claimed its position to create a world peace. His Excellency President Biden has taken that position.

Which means the wishes of Universal Council has been fulfilled. Now we have a leader who takes peace serious, and is committed to it, to the wishes of your wish, to guide the WL into peace. I was on the road to the American ambassador in Vienna in the past few hours, in response to the signing of peace treaty with Iran and the end of sanctions, that America cannot use, and committed itself to peace, the T of the KF to harm another. We have gifted a unit to NASA.

Which means AZ and NASA, hand in hand will fly together. As I was speaking to John last night, if they want to work together, they have to bring the two units together in AZ, or in NASA, that we have the twin systems to fly. (:40). In a way, the KF knowledge and the governmental knowledge of the American government, will come hand in hand as one unit. The way it will be with Iran, .. with Austria, and the same with China in the coming time. We need the Chinese leadership to commit itself to peace, and they will receive the T and the know-how, not as a competition to be a superpower to impose.

We see this situation in Ukraine and you understand why we have never included Russia at this moment of time as part of the KF delivery system. As we were aware of what is to come, and the situation in Ukraine was very clear to us, some 6 to 7 years ago. When Russia commits itself to peace, will receive the T the same.

As I said to the heads of the KF in past couple of days, we have between 3 to 5 units a week to allocate. In the next week or two, we open the channels that you vote, as the KS who have supported, to which nations you would like to see, to receive the units in the following weeks. But there is one thing, we won't allow all the Brazilians to vote for Brazil, .. all the Italians to vote for the Italian unit. You have to vote for another language and nation outside your own.

The question here will be simple. (:42). You will see the delivery of the EU freely by KF to all the nations we promised in the coming weeks. Now that we have found a leader, who leads for peace, and soon we'll see the same thing come from Ayatollah K of Iran. We'll see the end of the politics and the religions in fighting each other, but work in unity to bring the condition, that what we asked for, for years. The unification of the politics and the religions in setting up the new standards for humanity for peace.

So we will try to do it this week, but it will be next week hopefully, you can vote, as KS who have supported us, to which nation, you would like to see their scientists, to receive the next unit. The only thing we have to do, is to fill in the destination for delivery. I kept my word and promise, and we fulfill the promise.

If you remember last Thursday in teachings, that I told you I will be meeting with Iranian officials in a few hours. And you saw the reaction of our meeting within a couple of hours after our meeting. When the Iranian head of negotiations, suddenly and with no notice, left the negotiations and back to Tehran. The evidence we provided to the Iranian officials was so profound, that they saw no reasons for carrying on with negotiations till certain points were settled. (:44). We saw, with our communication with the American embassy and the White House since Monday, explaining the situation why we standing out, has been resolved. We got what we wanted, and the peace is on its track. The signing of the peace will be a few hours, maximum of a few days. We try to do it before the Iranian New Year, it is the wish of the nation.

But it's communication between the souls, which sets these things up, not by accident. What you see in the clay, we see in the dust before the clay is made. What you see as a flower pot, we see it, when it is the dust on the ground, that what flower pot it will make and what beautiful thing it will be. This is the essence of the knowledge of understanding the communication of the souls.

As you ask, can you come to London to see me, from Washington, I have buy ticker, I need time to arrange, so it is the same with the soul. When we tell the things to happen we need to organize everything else, as the souls now have agreed. Sometimes we push it, we get it done faster, sometimes we wait thousands of years to get everything sorted. Now today we achieve both, on the agreement of the souls of thousands of years has come to an end. As the agreement of the few hours and few days has come to completion.

So it's important for the KS who enter the development of the next cycle of communication, to understand for the first time, even your communication system has a soul. (:46). Understand the work of it, understand the line of communication of it, and then you'll find we'll make one of the best communication systems, even for translation of the languages, and translation of the emotion of the creatures of the U, across the Unicose.

In the new EU, .. the Vision, we have built this, it has a soul, the system is based on the creation and communication of the soul. We have hidden the knowledge in such a beautiful way, that man will take hundreds of years to unravel. These units in the next few days, will be flown to AZ, as we made AZ the center of the excellence for space travel for KF, for what we call, northern America continent. Tehran will follow the same as AZ. Let's see, as we have not managed to complete the full negotiation with the Iranian government.

There is a problem, which has to be solved, in the offices of Ayatollah K office, his leadership, Iranian government, and KF. The problem they have, and I have explained to the American authorities and the others. The man who is leading Iran in the new T is half Jewish, and they cannot swallow the fact, and they cannot sell to the nation, that we have a Jewish blood, is devoted to Iran. This is why we never received open support, (:48). of the Iranian government. As how can they blame a nation, who is the matter of the offices of the government kills, and another Jewish blood helps. So we .. we are committed to

peace, nation, color, race, or religion is irrelevant, it's how we manifest ourselves. Now you understand how correctly we have conducted the work of the KF.

You as KS carry the emotion through your souls, your teaching and your understanding of the knowledge in totality. The process of the communication through the understanding of the STM, is the biggest step for man to be able to travel the span of the U. Developing interim systems for him to understand, step by step, is what we have done with what we call, the EU. In coming time the next generations of the man will not need the systems, as he will learn how to do it. It's literally as I said once, it's like a man who knows to walk, but is on crutches, he is wounded, and he needs to learn how to stand up, .. walk , and then with it he knows how to jump, to dance, and what I call, do a marathon of the knowledge of the Universe (KOU).

Your understanding of the creation of the systems, which carries emotion, .. the essence of understanding of the emotion of the man in the D of physicality (P), (:50). and emotion of the man in the D of the soul, is the prelude to total understanding of the work of the Creator. When you can translate the emotion of the soul to the emotion of the P, irrespective of the place, position and time. When the time starts, from when you manifest yourself, so the time is at zero point, at any point when the man manifests himself, and has not been manifested. But he still exists in other realms and the strength of the fields of the U.

The birth of the child is not the point when he manifests himself from the womb of the mother. The birth of the child is the fields of the origin, where you emanate from the soul of the Creator (STC). That's the knowledge, which man has to understand, and then in that position of the birth of a child, just a, what we call, the STP to live in the D of the womb of the mother, or the atmosphere of this planet.

Then one of the biggest problems for human race will be, how do we give birth in the D of the U. We have no delivery rooms, and no we have no .. physical D, what will happen to the souls, which will take the shape of P? Do they need to emerge from the womb of the mother, the way it does on earth. Or we communicate with the soul of the child within the womb of the mother, within the structure of P of the life of the soul, that you are getting manifested in this place, even though you carry the soul from the amino acid (AA) of the earth, you decide how you want to manifest yourself. You're still the child of mine, I still love you as a soul. (:52).

It's the same when we give birth to a child, if it's handicapped, if it's blue eyes, .. red haired, it does not make any difference, we love it, because we created it. Blind or without arms, still loved by the creator, which is the mother and the father. We are blind to the rest of the disabilities, even we are knowledgeable of these disabilities.

This is how the man is going to be in the depth of the space, when we give life through the STM. Our children will look as they need to be, in the environment of the time and place and the space they are born. We are used to 2 arms and 2 legs, our child will have 20 arms and 20 legs and no P in the D we want to see. We have to accept the new

understanding and through it, develop our senses through the emotion of the soul of the child, irrespective of its physical manifestation.

The way the parents do on this planet, when you have a child that has all sorts of disabilities. The love of the father and mother is not limited to the P restriction, or the beauty of the child. It's to the soul of the child, and this is what the man has to learn. Because the child will feel the disappointments in the parents soul, "I don't look like the ones from earth, so they don't love me." Where it has to be you're loved irrespective of. This is what the challenges the man will face in the coming in the opening of the space to man.

When the man comes out of the monkey suit of the NASA. (:54). We shall not die in space, because we don't wear a suit. We'll survive every condition in the U, because we travel with the suit of the soul of the Creator within the structure of the D of the STM.

Man has to understand, that the new ways of communication, that the new ways of interaction is not just by the phone. You communicate with the guy on the street, you walk first, I walk behind you. You cross first, and I go after you. Please you go through the door, and I go after you.

There is no word language. The space is the minimum gap of the fields, will dictate that. The one who is the weakest will get the preference, that he gets at the time of passing, elevation of the soul, from the one which is stronger. Mankind has got to come to understand the point of the existence, the emotion of the planet, the emotion of the galaxy, the emotion of the STM , the emotion of the U.

Some of us, now that we understand the next steps of development, will not be to tolerate through elevation of our souls, the condition of this U. We call it, we become allergic to it, because we can give more, we want to give more. And for it, there are other universes, which work in the higher level that our soul fits into. We become the passengers of the new universes, through the elevation of the soul. (:56).

Now you understand why some of souls, which are created on this planet do not exist in this U. They are already passengers of the other universe in the Unicose. Because they elevated through serving humanity and the others, to reach to the point of higher elevation of the field strength, that they have taken the position, in that position in time and space.

Go back to some of the teachings of the past and then you'll understand. Then you will understand that the elevation of the STM. Why we are here to serve and not to be served. We are here to serve other souls to elevate, and with it to elevate that soul, to become better, to serve more to become the sun, sources of life, of the completion in other D, and not necessarily on this planet, in this galaxy, and this U. Don't forget the spiral of the M fields, the higher you elevate, the stronger fields you carry, the close you become to the Source.

You don't need no prophets, and don't need no churches and temples, where your churches, becomes the Creator and no one else. As you understand the KOC, .. the line of communication of the existence. You elevate to receive the KOC from the Creator, on the direct line of the KOU. Why do you need Mullahs, Ayatollahs, priests, (:58). Popes, rabbis, to put the touch of their own mind of what I call, tainted life into it.

The whole process of these teachings today, is to open your eyes for the future teaching of understanding the line of the communication, the method of communication, understanding that we communicate in the D of the STP, in the voice, touch, smell. In the D of the STM we do the same, but different smells and different touches, in a way, confirmation of existence. Emotion of love, emotion of being there to give unconditionally, is the level of the maturity of the STM to understand his own creation.

We are not a sect, we are not a religious organization. We are an organization structure, that understands the reality about the process of creation and how mankind can work, endeavor to reach a better point of understanding of the process of his own creation.

We used to look at the sun for millions of years, we saw the warmth of it. Then some of us decided to make everything, from SS and everything else from its rays. We learned how to convert, now we have to understand how to convert the knowledge of the Creator even with the systems, and then man on its own, to benefit of the elevation of the STM, and not to heat a water, or boil a kettle on. (1:00).

The understanding, the process of the teaching has been step by step, that you have time to play, to mature. When we have a baby on the playground, never seen anything, we give her a little toy, we give her something to touch, that she can understand "this is my finger, and this is my toes," and then, when she understands more we give her another piece, and then we give her something else to elevate, to learn more about the vision and colors, what color is what, and then the sounds. In all my teachings, I have done nothing but this.

Human race is at the infancy of the knowledge. So we gave you the MaGravs, we gave you the Stacker Units, .. other bits, that you don't only see the colors, but you become aware of the fields, the emotion of the fields. Go back on the teachings of the past few years. I kept on telling you, you are looking for P, where you have to look for the fields. This is the reason, now you understand why.

You cannot fly with a MaGrav, but you can fly on the fields of MaGrav. You cannot get energy from the U from a MaGrav, but you can use the fields of MaGrav to tap into universal energy. I gave you the most powerful generator, and you are still after the crumbs.

The purpose of the teaching of today is to open another channel in the line of communication, which up to now we have not covered much, in the teaching in the past 10 years. Now that the KS, the governments, and the scientists are ready, to take that step towards peace, to be able to communicate, to be respectful of each others existence, not

only on this planet, and beyond, we open the knowledge of communication, (1:02). in the world of ... U. In the D of the PI fields, .. of the creation and the Creator.

Maybe one day you'll understand, and some of you will elevate to the full understanding of the teachings, how we built up for you to feel the fields. We gave you the Cup of Life to understand, it goes in my body and does something. I cannot do, and it's there. Nothing was better for us, than the Corona, for humanity to learn about the creation, work, interaction of the fields, within the body of the man.

Many people said, but Corona killed many. Please go on the .. statistics of the world and look how the statistic has changed from influenza to Corona. So you haven't died by many more, you have just learned about the effects of the fields. As I said, .. if you look at the statistics of the Corona, and influenza, one has replaced the other, and even less have died of influenza and Corona put together.

We need to understand this process, we need to understand when the man does not take the step, we take steps to teach and to learn. In so many ways, we have no choice, man has been too lazy, too self-centered to learn about the works of the creation. So we do the job for you, in different shapes or forms, (1:04). as a Cup of Life, as a MaGrav system, Gans's, as a FS, that gradually man will learn. It's that toy to teach you about the first noises, .. the colors. Now you see the color of the beauty of the Creator.

Today's teaching is another .. watershed in the teachings of the KF, for man to become aware of the communication of the souls. I touched on it in very simple ways in past few weeks, but today you received part of that understanding.

How do we make these systems of the emotions. How do we understand, how do we connect each emotion with what. As I told you before .. when you stand in front of another creature from another D in the U, you say, does he want to eat me, or do I want to eat him. The other one never has the intention to eat, because he knows he takes whatever you don't need. But the intention of the man has been, I put it in my mouth and I taste it. If it kills me the others learn. If it doesn't kill me we eat it as a new source of food.

This is where it comes to an end, the soul of the person, entity in front of you gives you what you need, it saturates your soul with a shortage, of what you are short of, you won't touch it. Now you understand how the system works. Now you understand the orange and the Cup, where the Cup is the man, and the orange, is the one in front of you. (1:06). If you need it you receive the fields of it. And if he needs you, he becomes the Cup and you become the orange to him. Would you eat, would you feed your child. It's the same.

How many of you have a dilemma, when you grow an animal in the house, you never kill it. When you look after it, you don't eat it. Have you eaten your dog, or cat. Have you eaten your goldfish in the box. But the others eat the cat, dog, and goldfish. I remember when I was invited by the South Korean government to Seoul in 2008. I was taken to the highest .. to the main streets of Seoul by the team, which we were taken there with officials. As we passed a shop front the translator told me, please don't look. I said, why?

We went to the next door shop, it was a beautiful restaurant. After diner, I asked him to explain why he didn't want me to see the shop. He said that's a restaurant. He said, that's where we eat dogs. It's a specialty of the restaurant. I didn't want to insult you because we were going for a diner on the next door.

That time it didn't click on me. But later on I explained to him when I had a broken ankle lying in bed in Seoul. Coming out of the hospital I had nothing to do but to think. (1:08). The image of going to that restaurant came back to me. I called the translator ... I said to him a simple thing, I said these two restaurants are the same in the back kitchen, isn't it? He said, maybe. I said, have you made me to eat, what I don't believe to be touched, even with the knives and the forks, which touch in the other restaurant, and shared with this restaurant. He said I am sorry .. we should have thought deeper then this, to take you to that restaurant, but it was one of the best in Seoul.

If you understand, you don't need to communicate. If you communicate in the level of the STM you become aware of the totality, what is going on, and what is need to be, and how it needs to be.

We have to understand, with the new understanding of the knowledge of the soul, of the P of the man, no object, no entity in the U is food for man. It could be source of us, (1:10). becoming the energy feeder to it, or we'll receive energy from it, if it wants to, if it has spare to dispose, that is at the strength of the body of the man, and the STM to absorb it. Where we receive the energy through the STM and by, in a way of conversion of emotion, we deliver to the P.

The progressive development of the science of the creation, is obligation for man to understand, it does not matter the place, the time, the position. Now you see the feeding does not become a matter of importance, shelter, we shelter ourselves with the fields of our soul, but the P doesn't feel the cold. The food comes from the surplus fields of the U, not from the life of another being. This is what these teachings are about. To understand now the creation, the communication line of the soul, and interaction in the field strength of the soul, as the soul itself has a field strength, and is part of the world of the Creator, and in not the exclusivity of the man, and the life of him.

Try through the systems, which we have developed for you, and I even gave you more extensive versions of it to be built. Why is that? That you cover the minimum and maximum, and understand the composition of fields, that you need to make, as a sample, (1:12). that you can test with your soul, to what level you have become mature to. That which part of the U you can become, what we call, the traveler of.

When I made you the Cups with so many different elements and different shapes, spiral, and flat, or whatever was to bring you that minimum connection, understanding of the strength of the soul. Then you stand in front of what you created and see if you feel the emotion. It's another creature, which you have created. It's not in the womb of the mother, it's your imagination, it's your creation.

Then you understand how I explained to you that I will make a fish in the tank for the man in front of it. I make the soul of the fish, and that soul takes the shape of the fish in the tank instantaneously. Now you understand the line of communication. Now you understand the knowledge of the soul.

Maybe, maybe we become wise to understand the totality, and appreciate the beauty of the creation. I hope I brought you a new D to think. And I hope I brought you a new understanding to understand, I hope soon all of us will come to the point to understand, (1:14). more about our own creation and the Creator.

We go to a break .. and try to see if any of us have become knowledgeable to that point of understanding ...

Easter Products .. This Sunday 3/20 celebration of the New Year in Iran (1:16).

>> **PROOFED to here** >> continue

>> **BREAK** >>>> 424 KSW March 17, 2022 (1:34).

(Excerpt: 1:35:00 to 1:43:36 Replication Cup)

Q: ... When you set fruit on top of the jar of Gans, how does the taste of the fruit go through the jar and get into the Pl water, and do you absorb all the vitamins, minerals and nutrition?

K- You even absorb the soul of the orange, or part of the soul of the orange, a reflection of the soul of the orange, too. You have to understand it's not just the Cup, it's the structure of the Cup. (1:36). When we make a replication unit, which is the Cup and the orange, it's not just a Cup. First of all you have created, D of life on this planet, which is salinity dependent. You have filled in the Cup with water, So now you have created a condition of life. That's the position of it.

You always, the best salinity is 0.9%, which is the salinity of the blood and the STM . Then what we have done, if you look at the replication unit, we have created, or we have placed bottles of different Gans's in this .. containers. These Gans's are M field dependent, so now this water inside is not anymore water, it's a M field water, of both strengths of what we have put, but we have pre-selected these what to be. So we know it will be at the strength of the AA. So this orange has a magnetosphere, it radiates. It's not just an orange as you are used to it, because you look at the physical D. Now you are

absorbing all its essence. You created a communication, a line of interaction. This is the beauty of it.

Now change this Cup, with the brain, (1:38). and the P and STM. Do you need that Cup. Or if you understand the interaction, you create a condition of wanting the orange, you will receive what the orange doesn't need as a field, it is there to manifest itself, to show itself, so it has already given it out, and you have picked it up. That's why you don't need to kill the orange to eat it. That's why you don't need, that position and interaction.

Many of you have opened many oranges during your life time, .. have opened many nectarines in your lifetime. Many of you have eaten apples and other fruits. Have you ever paid any attention, when you open an orange, between the segments there is a space free, even the tightly packed one have it. When you look at an apple have a look where the seeds are. Ask yourself one question, would this be the soul, the place of the soul of the orange? Where in the brain of the man we found that hole (dot on MRI).

This is what, (1:40). we have to become, not accepting just because it's said, understanding the process that we do not need to accept, because then it becomes intellect (a concept). It's us who has to understand how to expand the fields of this (STM), that it covers everything, and the strength of the orange becomes part of its strength, that it does not need to create P to kill, to destroy the orange to have its essence. Then maybe if you look at it in another D. One orange on earth is enough to feed all the wishes of the man in U, all the ones from planet earth, on planet Zeus, or any other position, to feel to taste that orange wherever they wish.

Do we have Alex from Nigeria ... No. He is very busy this month. .. Alex did one of these experiences with 3 different things, with orange, with something which makes you drunk, and I think it was a banana. As he wished, he received and he tasted it. Alex carries a beautiful pure soul, and he is one of the leading KS, (1:42). does the most strangest things, which the professors in the universities won't accept, because he doesn't have a degree, but he is 3 professors, 10 professors in one, because he is not reading the books. He understands the process of the interaction of the fields. He can explain to you, if he were here, because when he did it he was shocked how he got drunk at night, and how he was feeding himself with banana, and how he received his orange juice in the morning, and the taste, the emotion, and the feeling of it.

He didn't need that Cup. He in a way, became the Cup. So when you ask do you feel it, even the what I call, that soul of the orange has a M field strength. You just look at, do I taste or feel it, but what have you received from its soul D. This (matter part) is 20% of the pleasure. This (soul part) is 80% of the pleasure, and mankind always looks for this (20%).

Any other question. (1:44).

K- I would like to share something with you and our Iranian friends, as you know it's the Iranian New Year celebration coming up, this is as you have seen. It's short of one thing,

that should be there by tonight. This is the .. Iranian New Year celebration table, and embeds in it, the whole history of man, what man has received as a gift from this planet. The plant, flower, egg, the sweet, and the apple which is the creation of life, and in totality when you put it together.

When you make an EU it has to carry the emotion of all these, to make man the traveler of the U. That you carry the memories, the strength of the soul of the apple, and the orange, that we do not need to destroy it, or come to earth to see. We can manifest it through our soul in the D of emotion.

This celebration goes back to time of Mitra and Zoroaster. Even the light, which is the candles in the form of light of Mitra and the Creator is on the table. The egg represents the earth and the Unicose and the U, and it's in the shape of what it call, (1:46). cosmic D and structure. If you look at it, it's very much the shape of the EU. That's why we built the EU in this shape. The shape of the interaction of the M field, one end slightly stronger than the other, that allows the interaction of the fields of the U.

I wish all the Iranians the best this year can bring, we hope that the peace treaty in Vienna will be signed within the next few hours, and even just before the Iranian New Year .. for the Iranians to celebrate a change, and for a lot of us to receive a new D in life and T, as we share it now openly with the rest of the world nations. Happy New Year..

What is missing in the center is the bowl of fish, which is a sign of the liquids, of the life within the D of the oceans. It'll be there by tonight.

Any other question. There is something in this picture you haven't noticed, is the mirror, which reflects the light of the Creator on His creation. That's why we put the mirror on top of the table. Where it reflects all of its creation within it, which is the light of the Creator.

If you look at it, in a way you still see the Easter Bunny, (1:48). or what you celebrate as an Easter in Christianity with the egg. Then you see the Christmas, with the plant with the lights, we put lights on the Christmas tree, and the other ways you celebrate in Christianity in totality of the coming of the New Year, as it, what I call, the child of, what I call Zoroaster and Mitra, in different shapes and names and forms. It's beautiful to see this. I remember every year, how feeble the man is, and how man is still physical in every D of it.

Thank you ... I wish you all of a beautiful new year. It's going to be beautiful, we know what the souls are about to bring and how the man will change this year.

Any other question

Q: .. Did you say you can materialize a fish with a thought?

K- If you wish to you can do. There is no limitation if you understand it. Thought is the field of the emotion of the brain of the man. There is no reason why you cannot. Have

you ever been through the process of visualizing somebody or something has visualized in front of you, but it doesn't exist. It just exists because you want it to be visualized. (1:50). Your dream isn't it one of them, the interaction of the souls.

So we fulfill that dream. You might see in that fish, the goldfish, somebody who would like to see a crocodile will see a crocodile, somebody .. will see that. We create the emotion of the fish, you decide the taste of the orange, sweet, sour, it will be red orange, or an orange I used to pick on the tree of grandmothers garden. We provide the D of .. satisfaction of the emotion of the STM. Then man will paint it the way he likes.

If it's the New Year as we saw on the table, we always have a goldfish, maybe somebody would like to have a piranha in there, you'll see it. You decide through the D of emotion. This is exactly what I said, when you go to other D in the U, you decide how you manifest yourself, because it's the emotion in interaction with the field of the time and place, which gives the D of the survival. The soul cannot die. It cannot be destroyed, so in condition of interaction of environment, and the STM, P is created, to satisfy the emotion of the existence.

So in a way, I can create Christ in front of you, because it's what will satisfy your emotion to understand, to confirm his existence. (1:52). The true resurrection, but through the field of the wishes of the man. So would you like a fish, or would you like to see the Christ on a pole, or in the pond, or in the container. It's you who decides according to the wishes. Now you understand the knowledge. This is not a magic, or whatever. It's you who decides the manifestation, not somebody else. We provide the energy pack, it's you who colors that energy pack. It's a plain canvass, you draw your own painting, through the emotion of the STM. Now you understand the knowledge behind the T, there should be no much problems for KS.

Any other question.

Q: Nikolai .. it's been a few years since I was in these teachings but it is good to be back .. (1:54). about a certain realization I had about the CO2 Box, it .. related to the 5plus1, that I heard you speak about but in a different way. I wanted to ... share ...

When I drew the box in my minds eye, I had a plate of Zn on one side and Nano coated plate on other side, and I considered this the first skin. Then the difference between those 2 plates I considered the value of 5. My second skin was between the AA on the top layer, and the CO2 at the bottom layer, the difference being 1. So ... I had 5 + 1 as the soul of the middle of the 2 fields, and it struck me for the first time, that I had perhaps understood more, in the CO2 Box, then I ever had before. I wanted to bring that ... I wanted to know if I have the correct understanding or I had made a mistake, that's all ..?

K- We understand it in different ways, (1:60). and we explain it in different ways. It's beautiful the way you interpret it. I always said, we take from this T, according to our understanding and intelligence of what we are intellected to. I said to, .. we see a flow of KS, but they always come back, because they have been beaten with the knowledge.

They went away for a short while ... in 1 or 2 years, they come back. Or they just come back to listen to the teaching, because they add to the knowledge, because they received it with love and care.

You interpret the way you see it, and maybe that has been a way to elevate the soul of the 5plus1 leaders, that's why your soul comes to contribute to it. There is nothing wrong in how you interpret it, or nobody can say no, it is this or that. It's to be respected in what you share and what you understand from it.

In a way, if you add it 5+1 it's 6, and 6 is C, is this what we extract, CO₂ from the environment. Is this the line of communication in D of the soul, that you understand. In a way that you look at is, that CO₂ Box has a whole lot of knowledge, a lot of ways of application.

That CO₂ Box what you call it, 5plus1, it is 5+2 as well which is the connection to the universal line of communication. There is a huge amount of C¹⁴ created in that Box. (1:58). It's interesting to understand it.

If you make what we just saw in the teachings, they were talking about the bunny gifts (KF store) for the agriculture, if you just get the, what we call, the growth Gans's you might do 20 to 30% better, but as I said to our production line, add the AA of the material you put in agriculture, then you get 100 - 200%, because through AA you connect to the dynamic soul of the system, not just the energy system.

In trials we always have seen this. When you make these systems understand, if you are dealing with the matter S, PI S, or if you are dealing with a soul state. You have to follow the procedure A-Z.

I watch what comes in with the ... secret society with Jalal with making MaGravs and it makes me laugh sometimes, when I just see them flashing up, I say, they haven't understood yet. They haven't understood the work of MaGravs yet, they are still peddling in the matter S. Some of them ... but still you have to understand, it's the essence of understanding what counts, not the P of what you produce.

In what you understood 5+1, which brings you back, most probably, that you would like to see the success of it. You added your soul, (2:00). to the weight, to elevate the soul of the world leaders. From the beginning of the time of this 5plus1. I have been in it since 15th November 2012 with Obama started it, we set it up, and we continuously stayed out of it, but we gave them a bit here, and a bit there to keep in touch.

When I met with the Iranian officials last Friday in Iranian embassy in Vienna, there was a puzzle, that why we didn't know this. Immediately Mr. Barberry left Vienna within 2 hours. Because in the information we gave, and I have supplied that information, now to the American government directly to the White House, and we saw immediate change, again in the White House behavior, and they gave it, and have taken it to the Russians immediately.

We saw a strange phenomena, we saw the nest of the scientists of Iran being killed, centered, in ?? Arbell was flattened out. All the Israeli agents who were involved in killing Iranian scientists were taken out. This is a public information, I don't give you anything hidden, but we saw the reaction of Iran, into knowledge shared, and how Iran was victimized by the Israelis. In bringing, killing more scientist, in bringing the position. It was done in the middle of the night, not to kill, but to destroy the position. As far as we know, nobody was killed in that attack. (2:02).

It was just for Iran to know, now we have the information, now we know what we have done to it, and we show the American government. Immediately, now we know what you've done to, with whatever you've done, through Trump. We saw immediate guarantees, which was needed for 5+1, and now we are back on track. We hope that the Iranian leadership and the ministers will be in Vienna in the coming days, maybe just before the Iranian New Year, or just after .. to sign this agreement.

Because we went in with the soul of bringing peace. We saw immediate interaction with the Russians and Iranian foreign ministers in past 48 hours. We do a lot of work in the background explaining the truth, putting the elevation of the soul, and we always get it.

As Wang Lynn (WL) is here .. one of the Chinese security people said to us, that he has been in meetings with the world leaders (WL) and they discuss the KF in the meetings, in what we do, at the world level which ??? Because we partially share this with all the nations. WL you are in the background would you like to come in.

WL: yes, but I am not sure what you mentioned.

K- Yes, but what I was saying we share all knowledge with the Chinese as much as we do with the Americans?

Q: yes exactly.

K- We share the same with the Iranians and the rest.

WL; Yes

K- Do we hold anything back from them?

WL: No

K- Doesn't this puzzle them, that how we work. (2:04).

WL: yes, I think we are going to get some goods news from government, they accepted our project application forms ..

..(2:06).

K- This is the new version of the latest evolution ... it has changed to a new strength.

WL: it's already involving 28 provinces.

WL; Not much cases in our factory area

(2:08).

Q: Nikolai, if I may I had one other experience, that same evening. I poured a small bottle of Lugal's iodine into CO2 Box. .. My intention was to create the Gans of this for

the ability to put into the fields of a MaGrav, for spreading the fields of the iodine, for people who have a deficiency . . . the day before the waters had been very orange from the iodine, and in the morning when I looked it was completely clear. There are AA on top and white Gans on bottom in some places, not a lot. Every trace of the 70 mls bottle of iodine was gone. It struck me that this was the zero time communication in action. But it coincided with my understanding of the 5+1, at the same time, and I thought that was very interesting.

K- Let me ask you a question, what was your wish, did you have any wish about 5+1 before in past 2 -3 weeks, whatever?

Q: I have only listened .. I heard in passing (basically no) .. I didn't always know what you meant by 5+1. .. (2:10). .. but I am maybe not consciously getting the message. So at the time I didn't understand 5+1 ... I didn't have a specific wish about that group, I didn't understand what the 5 meant until last 48 hours ..

K- It sounds like a Carbon, 5+1 (= 6 number of matter C). That's beautiful. .. We all understand different things on different levels, but at the end it comes to one point.

In so many ways, 5plus1 has always has been 5plus2, because Iran wasn't counted as one. Iran was counted, 5plus1 against Iran. Now it has become 5plus2, and we'll see beautiful developments coming up. It's by the wish. I hear Brazilians have every night a program for elevation of the soul of the leaders, and 5plus1. But it comes to one point, what happens once we receive that elevation, are we going to stop. Or we elevate the soul of the world leaders to the next step, to the next understanding, to the world peace, to sharing of the knowledge and technology. Would it be the end of the suffering for a few, millions, maybe 80 million Iranians suffered long enough with it, or would it be another dimension to opening. (2:12).

As I said, the delivering of flight EU to NASA, Marshall space center is an olive branch of peace to the scientists. As I said, before. to the Americans ... the reason we didn't ship anything to AZ or NASA or to anywhere else, was not to give access to a T, that can kill, and bring more sanctions on Iranians by them using it. And the rest of us. The tool of war has to come to an end. Now we'll see in the beauty of it. Rick has on his system. We've seen the two FS. The Americans are promoting now, to send man back to the moon. It's amazing. ...

R: Plays the NASA video .. (2:14). (2:16).

K- ... I am back on .. As you can see NASA, if you read the article about it, is by the wish of President Trump, wants the Americans back on the moon, and they have come with a double rocket, which means with a twin rocket it will get there faster.

I wrote to my friends in NASA, I said, is that a new joke, or are you moving, or are you going the new way. It's very interesting, you put the 2 T next to each other. This is supposed to be the latest T from NASA, all they could do was to extend a little bit, another fuel tank. That's all it is. Very interesting is, are we still sticking to the matter S,

or would NASA move into understanding the work of the U, and work into the M field of the U.

I think it will be a beautiful scene when the EU in the next few days is delivered at Marshall space center, and we see how the American space people will interact with this unit. They have all the details of it, they are waiting for it. As I said to them, you have 2 choices, we send you the control system, or you build it yourself, or we tell you something. I said, let me tell you something. (2:18). Your control system has to fit within, 12 cm maximum within the gap between the walls. It's a puzzle, but as I said to them, we have to explore both T, and not become arrogant that one is better than the other. Because both we learn something new. Somewhere I am sure in deep space one will be used for pother, and the other will be used for the other. When the rocket is in problem, they'll use the M field shielding for the system, not to get touched by meteorites, or you go through . .When you go to space, space dust is always there, it will be battered by it. somewhere in the future in our T, when we want to land something down we might use the propulsion, rocket T that's been developed. It's not to be arrogant, but to understand, there are different ways of doing it, and we have to be open to both of them. and many others.

Once we say we are the only answer, it's the end of the cycle. The arrogance kills the whole knowledge. You have to be open, that's why we opened the patents. We see this, we see the evolution in the science, matter S and PI S. and PI changes to matter and matter changes to PI. So we have to be open to accept both, and see where is the best benefit for the development of the knowledge, expansion and extension of the knowledge. It's beautiful (2:20). ...

Any other question.

Q: Salomea ... the peace Talks if you have some news. And a wish for peace .. (2:22).

K- Thank you ..

Q: (she continues...)

K- Nowruz means new day, and we hope that everyday will be a new day, and we start fresh and we learn more.

Any other question

Q: ... on the 5+1. Mr. Salehi, who is half Jewish is not any longer the head of the Atomic Energy Organization of Iran. (2:24). So why aren't the 5+1 and Iran reaching a final agreement? The AEOI is now headed by Mohammad Islami.

K- The heads of .. The whole situation in Iran and 5+1 is not just about Iran. The whole structure in the background of 5+1, in principle, from the beginning was taken, as to be a weapon T, but in reality is colonization, and control of the future energy resources. The club is very small, and investors in the club are heavily involved in. Part of what we

looked at, 5+1 from the beginning, before 5+1, when the sanctions came in heavily on Iran regarding nuclear, was a young boy trying to break into an old club. Was not accepting another person to share a piece of cake. Now we don't have that position. Iran has moved on, and in the past 15 to 20 years to become a master. The boy has become a man.

Part of these negotiations, as has become apparent in the past 2 - 3 weeks especially, (2:26). shows what we are prepared to share, and who we are prepared to share (with), and who we put on the watch of another, as a little boy to become a man. In a way, everybody benefits by the 5+1, hugely on the nuclear T.

The Germans forced the nuclear plants in SEK, in Belgium, to enter the nuclear arena outside Germany, where inside Germany they could not do. Now they have a medical reactor, invested about 10 billion into it, and they brought themselves into the nuclear industry, which, this was not supposed to be done.

The Japanese will not be allowed by the Americans, because they have a tighter control and it's an isolated island. The Chinese got a very big piece of cake, of this process, access to Africa and African resources of nuclear material. The Russians got better deal, the same through it. The Americans got a chunk of it, that they could manufacture the .. nuclear power plants, and sell it to the other countries.

Iran became a nuclear perforation nation, selling it, now as a little boy. Gradually into the hardware, because Iran's hardware is much more effective and much faster. No nation has managed to reach 30,000 rpm in centrifuge. Iran has, and makes it easier for .. higher isotopes to be prepared. Americans are after this T, is done by the Iranians.

So this was a battle of who and where. (2:28). They have actually cut the cake in pieces. We know where everybody sits. By fluke the British got a piece of cake as well, but they are part of .. the council in UN and they got themselves in. French are heavily involved, they got part of which, part of the world they supply the nuclear power stations as a sale. Every nuclear power station is round about 30 billion plus. So it's a massive injection of funds into a nation, and labor force and income, because it's not just building a nuclear reactor for Sri Lanka, or Singapore, it's the servicing industry of it, brings a continuous income for 30 years you have to deliver fuel, .. repair the systems, .. purify the fuel and everything else. So it's a very big industry. The 5+1, or the 5+2, Iran being included, was allowing the Germans to come into, openly nuclear T, which was banned by the Second World War. The Chinese got a beautiful deal out of it .. in Africa. Russia has come to sell its nuclear power stations to Iran and the others.

Overall when it come to an end, hopefully by this weekend, we'll see the beginning of the end of a lot of .. nuclear industry growth, but in the back of .. a lot of discussion and fighting of how to be done. In the past we had a problem, when I was in university time, there was a problem, which .. country was going to dominate. Even in England we moved from the carbon graphite cooling systems, (2:30). faster systems into TWR was the American system, because the British system didn't work properly. Then we saw the

French trying to muscle into the British market, and the other places. It was a big battle for the governments in the background for the nuclear industry, who is going to take, and somebody wanted to take all of it. Now with 5plus1, with Iran, everybody has settled down, the cake has been cut.

We'll a little bit the changes, in how much shares will be given to, especially Iran, both on the fuel side, and the T side. Iran will become a perforation center for .. the negotiations. The negotiations will be Iran will perforate, but cannot use the fuel for weapon T, which is correct. I agree with that, with IAEA, and the Americans, and the rest. But this should apply to the Germans now, and the same to the other countries. We all producing nuclear materials, but not to the weapon grade.

Or we go directly into what we call, 100% pure PI nuclear, which is a nuclear perforation system, which allows the totality of the knowledge to be added to. The perforation, plasma perforation, which is the backbone of the fuel for space T, is why KF is allowed to be, within the framework of the .. Peace Talks. Because the PI perforation is needed at 100% purity, to be to travel in the depth of the space. (2:32).

We cannot have systems which are not pure, and can create problems in deep space. You suddenly get a drop of Ca, then your reactor ends up to be in another part of the U, as you were expecting to be. So purification in the PI space, has been part of the KF negotiations, as a 5plus2, with Iran.

You can see, as you have seen before, this is what, with this report (on screen) which is shared with Iranians, the American government, and IAEA in past week, says, "New nuclear plasma perforation system," which allows Iran to go to 100% purification PI level, which is needed for space T.

Within the dossier of this report, which is now in the hands of Washington, Tehran, and .. IAEA since 15th of December, a new game is to be played. This is why, once we meet we make such a big difference in our talks, and negotiations with the governments. The nuclear industry of today is obsolete, and we have spent billions on it. But with the new perforation system we bring a new D. We all purify to 100%, but for the development of the new science, the new space T and new arena.

What you see in front of you on the screen, .. within this report, the past, present and future, of the nuclear industry, in a very simple way, has been explained. How it's been abused and how it's been used, and who has fooled who, by abusing it and the rest of it.

Every time we opened this report, (2:34). to Iranian officials in the embassy, within 2 hours the Iranian leadership called the Iranian team back. Because knowledge and education is very fundamental in this report. When the Americans received it, they immediately reacted, to accepting that the Russians can play their game, and negotiations can start. What we tell you is all recorded, the time of transmission, the government meetings, everything is recorded. The messages to the White house, through the American embassy ambassadors office, all recorded and in the future will be released,

once the negotiations are over. You'll see how come every time this happened we got this reaction. It wasn't there 15th December before, we run into problem. released that to IAEA, IAEA ran to Iran, saying Iran is not making nuclear, because the hand of Israel was opened up, and how Trump played it. Actually he trumped the American into 5+1 negotiations of today to go with Iran. In his stupidity he brought a very positive move, which we see today.

Now the cake is shared, now we know Iran sells fuel, now we know the Russians do their systems, .. what the French are doing and is in public, which up to now was hidden (from) in the public domain. Now all nations will purify.

The units we sent to NASA, NASA cannot fly if they don't have 100% plasma nuclear, impossible. They'll land in the oceans, instead of flying if they get 99% correct.

This is where the new T, new knowledge brings the change. When we tell you we go to the embassies, we get in touch with the WL, government officials, (2:36). organizations like IAEA, we make that difference, because what sits in these documents we deliver, is a game changer. Because it is all facts. This report will one day, I am sure will be released by KF, or Iranians or the officials in the UN, maybe by IAEA. But once we opened this document at 10 o'clock last Friday in the Iranian embassy, within hours the Iranian team ?? left Vienna. Everybody wrote, negotiations came to a stop. You can see the reason of it, it is sitting in front of you.

We saw the same night, the nest of what was destroying Iranian nuclear physicists and scientists, in ?? Arbell was taken out. This gives us a chance for peace. As I said to our negotiating team and to KF management.

I think the best thing to do, once we seen the first units to NASA, Tehran, and others. The very first units have to be flown to Tell Aviv. In a way, we don't give you a tool of war, we give you a tool of peace. Let them to be ashamed of what they did. How they lied, and how their lies put so many lives in danger. So many people in .. pain, and for what reason. I think Netanyahu has to be put in a solitary prison for the rest of his life, for the lie and cheat he did, to force the American Jewish Lobby.

When this one becomes public, the Jewish Lobby in the US will loose a lot of its power, (2:38). because they're known as cheaters, as liars, as enforcers of death. Because Jewish Lobby in New York and in Washington pressurized the governments with their lies, now their hand is opened. We don't kill a bird, we de-feather it one by one that it cannot fly, that it can't do anymore damage. The bird of death. Under the government of Israel, not under the nation of Israel. This is important for all of us to know.

I was in Istanbul, and I met with Iranian officials on Thursday, even during the teaching of last week. I fly to countries for a purpose, in the background. We knew the position of the British when I was in London 2 - 3 weeks ago. We knew the position of the Russians in another D, .. of the Iranian leadership in a very clear position in Istanbul. I told you in

teaching of Thursday .. by the deliver of know-how. Because we saw the problems, were not getting through.

There was a big problem the Americans would not let the Russians to stay where they are, we had to solve it, so we did, and 2 hours later the Iranian team left Vienna. We saw step by step, everything. The Americans got the document, they knew how they had been fooled by the Israelis, and how Russians supporting Iran was correct, the letter was given, we are back in.

I always stood outside, (2:40). and the Iranians will not accept KF to be in front, outside, because of what it is. But within Iran we are doing beautiful jobs, the factories are getting setup. We thank the offices ... to allow the T to grow very rapidly in Iran, Our factory is more or less going into production, they received the first export order in the last 48 hours, which is a massive order for them and it allows them to start exporting Iran Pl T outside the borders of Iran, with the full knowledge of the Americans and the Russians, and the rest. We start playing the game. Iran team can tell you, we have received the first massive invoice for export out of Tehran, at the back of it will come the space T.

We play the game of peace. The game of peace has to be, that we stay fair and correct with everyone at the same time. What is in front of you has been a game changer with IAEA, accepting, and flying back to Tehran, to say they don't accept the lies of Israel anymore.

The Iranians didn't know why IAEA changed position, and when they received this report they jumped immediately, because Mr. Barbary was sitting and waiting for this report, it was imminent Iran would show reaction. ... we were not expecting such a reaction from Iran to suddenly leave the negotiations. They went and they cleaned out the Israelis, and they went and sorted out the negotiations with the Russians and on the back of KF, put pressure, knowledge pressure, (2:42). on the White House, on the embassy in Vienna, with delivering direct materials and explanation, and it took less than a few hours for Washington to change position. Because they knew, now is a public knowledge and we've given them the writings to the Americans, that we'll never release this report unless they decide to. I have asked the same thing from the Iranian government. We play a direct game, the time and the hours we give you is there ?? ... we were convinced that Iranians were not aware.

Our intermediary in Tehran betrayed us. In a way, maybe they thought not to give it, it will be better, but we broke a lot of pain. But now we delivered directly into the hand of the Iranian leadership ... It was instantly in Tehran, and they knew what they have been treated for, and they gave the answer. And we've seen it.

These talks will complete in the next few hours, few days. It's just a little bit more of who takes more of the cake and we are done. I thank the whole of the Iranian team, ...
... Soon we'll become the center of knowledge for north America. We are prepared to invest in it. In a way, it thank you to the whole of KS around the world. We start showing our work, (2:44). and once we receive the 2 different systems, NASA starts working with

us, the Russian space Agency, the Chinese. We'll rapidly embracing of the new knowledge and T. This is all thanks to you as KS, in developing, the sharing, and keeping the peace, and the ethos of the KF.

Any other question.

Q: R: I was wondering how the PI T could tie into the current conflict in the Ukraine. We see the presidents of Ukraine just gave a speech to both the Canadian parliament and US Congress, and he got standing ovations on both accounts, and promises of more weapons to be sent to their country, for their so called defense. The conflict could escalate more ... how can the PI T and is there any connection with the 5+1 with that?

K- No, this Ukraine situation is a very isolated case, as we explained before. Not much we can do, because in the back of it, there are a lot of things, settling of scores, at the moment. We've seen there are no movements for attacks, or war. It's a lot of rhetoric. The PI T has to come through the essence we always work. (2:46). It's the job of the U Council, especially member for Russia and others to elevate the soul of the leaders.

There is a very big problem, there is a very big problem. In the west we get bombarded with the Western news, the way they want us to see it. In the other side, on the diplomatic side, there is more to it, then what you see. I sometimes try to explain this to understand.

First of all the Ukrainian situation is between the Vatican and the Church of Russia, it started with that. By West bringing new sanctions on Russia, it became a bit personal. When they froze and .. locked down the private yacht of Putin, that was the last shot to Putin, so they went for him. He took no mercy.

But in the process we have come to the point now we know for a fact, the Americans were doing exactly what they were doing in Japan. Americans in the Ukrainian nuclear reactors are developing nuclear weapons, in the hand of Ukrainians, for the Americans to be a position on their (the Russians) doorstep. Now from the nuclear side of T, we know Americans have been very busy, naughty children, doing whatever they were doing in Fukoshima, it lead to explosion of the Fukoshima reactor, because it was carrying plutonium, then uranium. That was one of the main reasons Fukoshima blew up, it couldn't hold, because it had too much enriched material in it, which wasn't supposed to be there.

The Americans fooled the IAEA, or the IAEA said, you do what you like. (2:48). we don't look. The same position now we find in Ukraine. There is a nuclear weapon T development in Ukraine, which is controlled by the Americans, using the old Russian reactors, that the Russians built, and nobody could believe such a thing could take shape. So now we understand another step which has taken shape.

Now we understand there is accusation by chemical centers, by chemical centers, again to be used, because the Ukrainian leaders have been paid to do it, in the doorsteps of the Russia. That if anything goes wrong it's the Russians did it, not us.

A lot of biological weapons technology is tested in North Korea, and now we know Ukraine has become another part of it. The accusation lies by the Russians against Americans. Because the Ukrainian leader is literally servant to White House. He'll come to your Senate and lick the, god knows whatever, to save his life now his ?? time is close.

He has committed international crimes by allowing the Americans to develop nuclear weapons on his doorstep. And I told you this before, we knew some of this about 4 or 5 years ago. Russians will not let this guy go by the look of it. Because he has betrayed the motherland. We look at it from the Russian point of view, which you don't see in the West. Developing, allowing the testing, or even starting the tests of nuclear weapons, has brought 20 years sanctions on Iran. How come Ukraine is allowed to do it, hidden from behind. How come Japan was allowed to do it from behind the closed doors. (2:50). Only the Americans knew what they are doing. This is a part, which again brought pressure on the Americans, and they know there is a lot of things behind it.

We test it, it's on their ground, if it goes wrong, it's theirs, not us. Israelis do a lot of human trails, paying the North Korean leader for biochemical tests, chemical warfare. Life has no value. We see now Ukraine, if the accusations are correct, by the Russians, they have been doing the same in ex-eastern block. How much Romania is involved in these things, how much do we have these centers of testing, in Bulgaria and other places. Where the leaders are hungry for finances to help themselves and their nation, and they'll accept any ?? cruelty. Don't look what is pushed in the West. Look what is looked from the East too, and somewhere in-between you see the truth.

You still need to elevate the soul of the world leaders, they are the children of the U Council. Not for just this occasion, for the rest of the existence of both, you need to. These children's of man are very weak, and they need the strength of the U Council's soul to strengthen their soul. It's not just the Iranians 5+1, it's not just the Ukrainians, there'll come a lot of other conditions. Inherently the man relies on the STP and it's weak. Inherently the STM and the soul of the UC of humanity is much bigger, and this planet to change, to bring that change. (2:52).

Don't look if a guy comes and they clap for him and give him a standing ovation, he has already a bank account, checks in his bank for nuclear weapons T years ago. Now he is exposed, he is running for him not to be, or at least give me a home when I escape. When I sold my nation to weapons T.

There is a lot of things which you don't hear in the West, but KF has .. a lot of connections, in a lot of places and we see a lot of the facts. The accusation of weapons T is in public. You got to realize Fukushima and Chernobyl are beautiful test grounds for what will happen to human beings, and animals and plants, and usually the nations and the military don't go to see the benefit side and what can be done (to improve conditions). They look what can be worse and how they can use it to their benefit (better weapons). This is part of it, now you see the guy coming and crying and going to Senate, and

Canadian Parliament. But that guy has a nightmare, that he has been discovered by the Russians. He sold the nation next door to them, part of the motherland, to weapons T development, against the motherland.

Ukraine was not going to use on the Americans or Germans. So you go naughty, you pay for your naughtiness. This is a cry of the wolf, the way it is looked at in the East. We'll see more, we'll understand more, and we'll see the skirmishes. (2:54). Now it has become a settlement of the national security, the Church of Russia, and a lot of personal pride, a lot of personal pride.

Any other question.

Q: .. here in Brazil we have some popular sayings the older people speak to the younger ones, such as the head is not only to create hair? ... What is the true function of hair, and why do we have a swirl of hair in the center of our head ... ?

K- You, we have a beautiful saying in Farsi, say, when you look at that girl on the top of the head, you'll see how many of them do you have. As a joke they say, if you have one, you'll marry once, if you have 2 or 3 of them you'll marry 2 or 3 times. So your soul already knows what you are up to. You'll need additional souls, which will be added to. It depends which culture, we look at the head. But there is a beautiful picture ... it shows a bunch of Iranian men sitting having a cup of tea, with all the bald heads. (2:56). It says, there ?? isn't any shampoo in Iran, because it makes all the men bald. You look to China you hardly see bald Chinese, they all have a full head of hair.

It's partially receives the fields of the U, it's a Nano material. It partially allows .. the interaction of the fields, which are not absorbed by the body of the man, and those which not needed on the body. The hair on the body creates a lot of, doesn't matter hair on your chest, back, or on your head, it creates different reception of the fields. There are a lot of researches done on this, if you go on the Internet ... effect of emotion of, whatever, the color of the hair, the length of the hair, and these kind of things, a lot of studies been done, as a joke or whatever.

But essentially it's another Nano material. It's essentially the way we dispose of some of the energies, or gain some of our energies. There is a very clear line between the races, which have lost their hair, and those who have stay with the hair. There is a research that explains a lot of these things, and studies have been done. We receive fields according to. What has happened to the curly hair and the one with the straight hair. The field interactions are different, creates different. Why the red heads have a specific behavior, and the blonds have a specific behavior. (2:58). It's the way, it's not just something which grows out of us. It's something which, what level of interaction will have with it. We can touch it, we can change it, we can use different Gans's interacts, and change the color, and with the change of the color you receive different fields, and different emotions.

Go back into KF, 2008 - 09, something in that time, there was a KS in Holland who had problems and we developed T for one thing and it effected the hair, and the wife was ??

saying, my husband now has a full head of hair, and they all turned black, and he feels different. She was so happy she had her man back.

We receive different fields according to our AA, which is embedded in the Gans of the hair. It has an effect and .. purpose. It's one of the ways we receive what we call, energies, or we give up energies. It's something which, once scientifically understood as a PI, then we can trace it, we can see it There are studies by the Russians about open hair, spread hair years ago, and it gives you what auras they create, the same hair, in spreading different way. (3:00). It has an effect on the emotion of the man, it has an effect on the structure and thinking of the man.

Any other question.

Q: Mehranez .. happy Nowruz which is the ?? spring when the whole thing comes out of the earth, and in your life is coming out, so everybody changes the old things, cleans up the house, ready to receive and makes peace with everybody around, with kisses and sweets. I wish the same for .. because under the cover we all love each other ... (3:02). light .. Tomorrow in Iran ... they want the coming of Methi.

My question is when we try to be good, and then become like a sun, honestly it doesn't attract me, because I don't, I protect myself from the hot sun, and so what, because on earth we have at least some little minorities which are so emotional, from these young people who do this praying tonight. That is just bringing tears to my eyes, they have generosity

K- I don't understand what you are trying to explain ..

Q: I am saying that on the earth (3:04). we have emotional people, or relations that can give us the ?? that this earth is beautiful. But if I become a sun, is there a guarantee over there I can find people to relate to my emotions, to feel

K- What do you mean? When your soul becomes a center of a sun.

Q: Yeah, but my soul doesn't feel the same love and emotions in here, which is ..

K- But the fact is, are you connected to your soul?

Q: Yes.

K- You think so (yes). So if you live in that level you understand, as you consider yourself as a giver, as a sun. You don't need to feel to feel it. Once you are in it, you don't see it. If that is the way you think, that you do, then it is your responsibility to understand the work of your soul the same way.

You don't need to speak, to do. If you think you live that level, you don't feel a sun, but you feel you, understand your soul, and the way you always speak, that you are there to give, and everything, and whatever the other people. You have to understand how much you think, what strong, what strength of the sun you have created.

This is what I say, for the UC members, that they'll be recognized, (3:06). by the strength of the light, the strength of the giving, the devotion to serve and change humanity. You

don't need to see it, .. you feel it by the soul. If you feel you don't feel the sun, because it's you, how you interpret the sun.

You don't need to write your words. There is no need to write down, to give an account. When you count the wealth, you are not wealthy. I always said, when you count, "I did such a good thing, I got taught," you haven't done, because you counted, I do to get. Everybody, when I was in business, asked me how much are you worth, I said, I don't know because when I count, I am not worth it. I never sat down and counted money to see what I worth. I knew what my salary was, to be able to do more, but never count how much I am worth, and what is the wealth. Because when you count it, you are not worth it. It doesn't matter how many zeros you put in front of it.

If you count, I am going to do a good thing, and I write it as I did a good thing. You haven't done a good thing. You just done something, to get something. You haven't done, you haven't added to somebody else's, or elevation of the soul to be able to see. You do your job without counting, but you hope the results are there to create a position and D, a new D.

I hear this is very traditional, oh, I am going to do this, I am going to walk to Fatima, and they go the whole length of Spain, from one side to the other. What for? (3:08). Or they go to the mountains of Katmandu, or the other places. What for? What good do you do? Or is it for you to think. When you count it, you don't have it, you already lost it. This is something, which you do not need to measure what sun am I going to be, your job is to serve, then the light will show itself.

Q: Okay, I change my direction ..

K- Have you understand, do you understand before you change?

Q: I understood, it's another looking at the things, you taught .. us another aspect of things, which is, I go it. ... It's just that we have very little point of things, comparing to you.

K- I know a little, and I share that little.

Q: Thousands of years, okay.

You said, I read something about judgment, no judgment. I read a paper in Brazilian, it was a paper , about not to judge.

K- You don't judge. You do your best and then you see. Because once you judge, it's something. When we judge, (3:10). we have to make a decision. When you make a decision, that's what you'll react to. That reaction brings elevation of the soul, or taking something from somewhere, or doing something ?? . I don't judge.

Even in the recent past. I don't judge. I live, I put things in the order, and very interesting we've seen it within the past 2 - 3 weeks everybody was accused of .. lying, and everybody would lie. When it came to the time the truth broke the lie. I didn't need to judge. I just put a fact to be, and I didn't try to improve it or taint it, because I could change a position or judgment. Everybody was accused of lying to change a judgment.

When it came to the judgment, the Day of Judgment (DJ), the truth was more powerful, than the lie, which was created to create lies. Because we spoke, it's true. There is nothing anybody can say about the truth. So I didn't need to judge, I put what was the fact, and the judgment comes by itself. And the person had to judge himself. Nobody else.

So don't make a judgment. I make a lot of decisions, like all of us, we do a decision. We might call it a judgment. (3:12). We make a decision according to what is in our hand, and we decide what to do. Do you call it a judgment, or do you call it a condition of the position and the decision making. We can judge about our own behavior, .. our own conduct, and then judge why we did it, what was the outcome, and was it to serve the good of better. Or was it to serve me. Or was it for me to be able to elevate the others. We can judge about ourselves and nobody else.

This process of .. judgment happens between the fields of the Pl. I want to be here, does everybody accept me, and when you accept, where is my position, because I am here to give to everyone.

Q: Sometimes the intention is to serve, but it ends up the wrong way.

K- The wrong way. Yeah, but if the intention is to serve, and you turn up the wrong way. Sit back, and see when it comes up. If the intention, and if the decision was to serve for the better, you will see it coming out the way you planned it, or what was best way for everyone. Short term might look, but long term might be very different. We are humans we always look at the immediate, that it confirms our work.

A farmer sows the seed of a grain into the land. (3:14). He never knows if he'll be alive to sow the seed, (to harvest). But he does it out of the willingness to live, to be able to serve his soul by living, and the others. We have to be that farmer. When the farmer sows the seed in Spring he doesn't know he is going to be alive in Autumn to collect it, but he still does, because it will benefit his family and the others with that seed.

It's how the man's life should be. You are that farmer, never expect, just be there, that in the future, it might bring him benefit, but in general, in principle it's for the other souls to live off it, Because I don't eat all of it, even though it means ?? ?? elevating the others. We are the farmers of the soul, to serve. That's all the human race should be, as it is for the others in the U.

Q: .. some people, they say in the Koran it says you encourage people to do good things, so then it's bad when they are doing things, and that causes people to interfere to what ..

K- We'll leave that part out, because that part of Koran had a meaning totally different. They took it the wrong way.

Q: I think it is like that, because it causes problem, interfering ..

Any other question I have been here thousands of years, it's nothing, (3:16). we got a lot to go yet.

Q: ... how to treat like and dislike, love and hate, equally without discrimination?

K- I think we gave that answer in a different context.

Q: .. is the essence of the body of the man, in reverse absorbed by the plants and animals, as the orange is absorbed in the Cup? Is this the meaning everything is connected, because the fields are interacting all the time, in all life?

K- Yes in a way yes, of course. The blanket, pillow, cat, dog, grass, takes what we don't want, because it's very simple, we call it, aura. Aura has to be a field that interacts, (3:18). if somebody goes somewhere. So of course, We have classified it, but we don't connect it. Now we know what it is, we receive the same. Receive from the emotion, the feeling, the environment, the trees, plants, and the dog.

Q: .. If everything is put in front of us why don't we see and understand?

K- Because we are ignorant. We ignore what we don't like, I call it ignorance, it's part of it. In English language. We ignore what doesn't suit us. We see what we want. That's all, we don't want to accept certain things, and we want to accept what suits us. We are all under the same banner, being a human, animal, prophet, being a creator, whatever we create, what we do is to the same condition, we are not exception. Once we understand we are not exception, then we move into the other level of understanding. As I said before, .. why do you break your leg, you can do this, whatever, why have you done that to yourself. We have in the D of P part of the same. There is no exception, we go through the same, (3:20). learn the same, and from it, we learn what needs to be done.

Q; When the peace treaty is signed, is it signed individually or through a soul, is it valid for a whole nation? (K- Yes). What happens when you don't keep that peace treaty?

K- You see what happened to Trump, exactly. He created even, no peace in his own nation, and it is not there. The peace treaty has to be with the STM and the totality, not with individuality and their ?? purpose. The present peace talks doesn't matter (if it's) about Ukraine, 5+1, or other points and positions. It's very simple, it has, and will effect the whole of a nation, and many others.

We were driving yesterday in Vienna, we saw a dirty, dusted car with Ukrainian license plates. Deep inside me I hope that this will be short term suffering, and this car goes back, because it was obviously driven all the way, nonstop to be somewhere, to escape from what is happening. In the border of Austria, Romania, we see this emotion, of people worried about this, what is happening. It's to understand it, I know the feeling because I have been through it. (3:22). I know what it is to have everything, and next day not to have. When we went through the Iranian revolution, I was a student in university. I know if we don't open the door back open, these people will be suffering and changes for a lifetime. Because I have been there. It's not that hear 1 or 2 million ?? some have no home to go back to, because it's destroyed. Some of these people will never go back because they don't feel that security. Learning a new language .. 6 months down the line nobody remembers the Ukraine. They become another bunch of refugees, and a life process of pain, change.

That's why we come, and we experience, and we understand how it has to be done. There shall be no more refugees, because the man looks after each other beautifully from the new T from now on. I know it because I went through it. Why do we need to go through it? Because then you understand the emotion of the man, what he has done, needs to be done to change that emotion.

As I said, it's the same in the .. summer of 1979 Iranians, if somebody had an Iranian friend, it was gold, everybody wanted to be your friend. In ... march of 1980 .. then after revolution we all became terrorists, (3:24). and the rest. We went through that cycle of revolution and victimization and everything else, and it changes the life. It is part of it, .. you have to understand. What's going to happen to you lot when all of you become refugees in space, till homeland called earth is not there to support you anymore.

So you need to go through the emotion to understand it, and to be able to translate it, and there is no exception.

Shall we call it a day.

Q: ... is there a soul more like a particle or a wave?

K- Soul is a M field, you decide when it will behave like a particle, and when it will be a wave.

Q: Does the wave generate the particle, or the particle the wave?

K- Did the egg or the chicken come first The rays of the suns come, emanated from the soul of the Creator. If you ask if the particle or ray came first, you have to ask the existence of and confirmation of the Creator. Is He an entity, or is He an unconditional field? I think most of us know the answer. (3:26).

Thank you for today ..
