

425th Knowledge Seekers Workshop; March 24, 2022

(First half transcribed, mostly transcribed ;; need to proof, Key Phrases, Words, quick index)

Spoke 3 times about Brazil and Rafael - gifted Brazil EU for Rafael's birthday

Topics Index

Islamic 1401 year of Methi; All religions except this is the year; "I am here"; Methi is inside you; EU spread around the world to elevate STM; Your soul will become a shining star; Methi is the collective soul on this planet; Be a bulb in a floodlight; Who would like to be the first bulb to light up humanity; Messengers are those who give their soul to elevate the others; Separation of electron from proton; STM is being prepared to be like electron, ejected from neutron, the mother, to create new U; Mankind will become a new cycle of creation; K has done this many times - this is how they create new universes; Candle maker story - lighting candles on the earth to start the process, we'll all elevate in an instant - but someone has to start it. The flight EU are for elevation of the STM; Mitra fell in love with Earth - it's a gift to create a U from mankind; NASA will be gifted a FEU;

Brazil has done a heavy work to spread knowledge across planet so they will be gifted a FEU for Rafael's birthday; Brazil has been a point of contact with the outside (UC) for thousands of years; Responsibility of KS to inform their governments to ask for a free EU for peaceful application; 10 years ago KS reached 75% of planet with USB Key; To the religious leaders - Methi is upon you;

Rafael has devoted his life to the KF;

Rings of Saturn - interaction of different fields creating materials that superimpose over each other; Part of Defense T - used in Iraq; Why Mozhan could not open windows during training - not answered ask Mozhan they know; 5plus1 is complete but Europeans trying to get more before signing; Watch Iranians British released 400 million they could setup another Libya in Iran;

Assassination attempt on Mr. Keshe in Istanbul by MOSSAD; Iran destroyed Mossad base in Erbil Iraq; Israel warned against killing anymore Iranian nuclear physicists - respond accordingly; Will share T with people of Israel not government; Trump withdrew from 5plus1 treaty because he sold America to Jewish Lobby - part of agreement, and his daughter etc .. ; Robot soldiers of China on Indian border ; Gans T for high altitude life; FEU have to go to nuclear centers - they use nuclear; Why UFO light in KF Store changes direction of rotation - environmental field pressures ; Electric current changes amperage, loss or gain - according to field interaction of environment - 2 KW generated could come to 2.4 KW at substation;

In west spiritual communities always say forget the mind go to the heart - why so much strength in heart - STM and STP come together in heart - strong - a whole teaching on it ... ; Next time feel the emotion of the soul ; Emotion has a strength - converts fields into P - based on Inertia - sadness into tears .. : In 2015 Brazilian leader said Iran was a peaceful nation - western countries punished this leader (because he went against agenda against Iran); KF revealed how North Korea got nuclear T through Belgium controlled European Space Agency - then they stopped them; Brazilian space T is very advanced -

we give T for rapid development; You touch the T the wrong way you wipe yourself out;
Warning again to Israel to stop killing Iranian nuclear physicists;
Radiation in MRI and x-ray machines is generally absorbed by the body; Only dangerous
if they dislocate a cell - MRI checked every 14 days; Could elevate STM with MRI if
you understood how; Body of man is a plasma - not matter; Your RNA contains all the
experiences your ancestors had - if we put you in EU then we can find out the history; If
your ancestors met Tesla we can experience his gentle nature;
Rafael speaks - just 2 people started intention group; reads Power of Intention - Brazilian
Telegram restored; Mr. Keshe third time wishes Rafael happy birthday; Translators have
understood the essence of the soul of the T and then they become the center of the KF
work; They translate the essence of the emotion; Brazil daily intention group elevates
soul of 5plus1; English speakers don't gather around KF in the US and UK; Old guard in
Brazil objected to Rafael - but we went with the soul and it proved correct; UC in skies
of Brasilia welcomed K to Brazil; We wished to bring Brazil out from UC member of
Portugal who was suppressing growth - now we see it growing; With gift of FEU Brazil
may collaborate with AZ and NASA and Iran; Extend Intention from 5+1 to whole of
humanity - the group has enough power to do;
K preparing to return to Iran;
Through purity of accepting and allowing - STM can radiate voluntarily over the field of
the body - not to make P subordinate - but through the plasmatic heartbeat - the true
heartbeat.

425 KSW

ENGLISH TRANSCRIPTION 425KSW

(:22). .. if you listen to this intro video, every time you learn something new .. Somehow
the intro chosen by Rick matches what the teaching is going to be. It's very interesting ...
every time. We've seen, .. understood .. the Soul of the Man (STM), is the creator of the
new cycle of life. As we know in each cycle there is a need for parents to guide. In the
life of the man we need prophets to guide the STM, or for its physical condition, and then
we have messengers in the name of scientists.

This year today, is the cycle of 1401. The 15th century in the Islamic Shia ???. But the
interesting part about this in the Islamic world, by the order of the religious leaders of
Iran, Ayatollah K and the rest has been recognized to be the year where the Messiah will
declare himself. will show himself and clear the path for the evolution of the man to the
new cycle of understanding. In the Islamic Republic of Iran, the structure of the
universities, and others, military forces, have been establish to protect and guide, (:24).
once the manifestation of Methi has been announced, to protect and to guide him. In a
way, from harm.

We see the same thing is within the calendars of the Jewish calendars. The Jewish Rabbis
expecting the manifestation of the Promised One this year. Down goes the line of the
others. We'll see what will show this year, of what is, officially if you receive any

messages from Iran, most of the nationals, they tell you the year of manifestation of Methi. But in fact, who is the Methi? What is the position of the Methi? Isn't it the man himself? Isn't it the understanding of the process of the creation to know that what is needed to be done to elevate the STM. How do we understand this? What do we understand from this process of 1401. The cycle. The year which the Islamic world waits for the manifestation of Methi. They are sure it will happen this year.

What is the process for all of us? What is the understanding of? Where do we mature to? What do we mature to? To understand, to recognize the Methi, the presence of the hidden one, the presence of the what was promised, shall bring the end of all the hardships and the war. As is usual, man looks outside, nationalistic war. Wars of aggression of religions. But in fact, the war is, and the war of the man with himself. The war to live the conflict of two lives, the physical life, (:26). and the life of the STM. That's the war which the Promised One is to complete. and the completion war of man to understand, he is the man, is the STM, that has to come to an end, within the wars of the walls, within the structure of the physicality (P) of the man.

The teaching of the past few years has brought you to that point. Brings you to that condition, brings you to understand the position of the P, and separation of the P from the STM. But in fact, the messengers, the Methi, is you, within your soul. No one can teach you, unless you find it yourself. I can take you to the water, like the horse, if you are not prepared to drink, nothing can be done. The thirst has to come from within, the thirst of understanding the truth has to come for within.

The teaching of the KF as we are the messengers of U within the P of the body of the man is very simple. You up to now understood, you do good, you give whatever you call, to the Church, you do good deeds to elevate your soul, that you will receive something, that then you'll live a better life. But in fact, the teaching of the KF is totally different. You are happy with the good doings on this planet. the teachings of the KF is to extend the soul to do the good things outside the P of the body of the man. The D of the fields of the creation.

In the D of the fields of the U. You were happy, (:28). to give some money to a beggar, .. to build a church of the religion, .. to give a pair of shoes to a man who doesn't have. You were so proud you did so good. But now we have allowed you to extend this beyond the P of the man. If you are happy that you received elevation by giving a pair of shoes or some money in the bucket, when you went to the church or the mosque, that you receive elevation, and what you want. Now with the new understanding the U is your oyster. What would you like to give to U, to U Community, and then you understand what shall be received by your soul, that your soul. You were happy to be a shopkeeper. Now you are a king of your own soul. Now you become the warehouse man, because now you have access to give more to the U Community, if this is the way you think.

In a way, you were happy with the crumbs of the elevation of your soul in the D of P. With these teachings we show you the way to be generous and to be the giver in the D of the U. ..STM in the D of P once learns the teaching of to understand the process of the

creation. Now connects to the other souls of the U and Unicose, and from a flick of a finger you become from a small soul within the center of the brain of the man, to a star, to another U. So simple.

You were looking for crumbs, I do good that something good may happen to me. Now with the extension of the STM beyond the boundary of the P, (:30). which is part of the teaching. Now you can extend this giving, if it is truly within you to become a star within an instant. You shine, you connect, and with it you lead to the creation of the new cycle. Isn't this what we said, in the enhancement units (EU), that some of you once you go in you see only the light, which means the boundary of the P is past, and now you become that shining star. You become that giver, to give, when you are a star when you shine you are a giver. Even though the same time you receive. So we understand with the new teaching and the understanding of totality, one man can become a star, once he understands there is no limitation in the fields of the U. In a way, bypasses or super passes the D of the Soul of the Physicality (STP). You become like that car with .. a flashlight in the front. You become the source, then you become the driver of that flashlight. You become the source of what to shine, and then your job is to find a flashlight which shines 360 degrees unconditionally in all directions.

The elevation of the STM was not the whole purpose of you being able to go beyond your P, get in touch with the uncle, .. or cousin, or go somewhere. The whole purpose of the teaching in elevation of the STM has been to make that shining star from within the STM, .. P .., to become instantaneously a star. To shine upon all the ?? (:32).

This is what we said in a hidden way about the soul of the UC members, that once they get to that point they shine, they don't need to show their P. Now you understand how the truth unravels itself. Then you understand the teachings of past 424 KSW have been to bring you to the teaching of today, that every soul can become a star. It's not just to extend beyond the D of P, you can still hold onto that P because that P is where the center of the sun has been kept to gather, it's the seed. It's D of existence, .. of creation of that soul.

So we come to one point, where do you see your soul. Do you want to be in the D of putting a coin in the bucket of a beggar and you think you are good, and you receive elevation because you gave. Do you want to be the guy who gives his shoes and things, oh I have an extra pair, at least he can walk, and I receive more because I gave. Or are you those who build churches, for building places for the worship of the fallacy of the brain of the man, and think I have built a church, I have guaranteed myself a place in heaven. The heaven exists within the understanding of the man himself, and the hell is the man who is ignorant to the truth. The purpose of the teaching has been to bring you to that point, to show you, if you were happy to live in the village, now we give you the U. (:34). but in D of U, you have to have the capability to live with it. You have to understand the process of it, you have to be there not to go through university, but to understand the truth.

In so many ways, what I said very recently, if the promise of Ayatollah Khamenei of Iran, and the Islamic world, and the other religions, is that this year, will be the year of

manifestation of Methi, is how many of you are going to be that Methi? For your own soul, that you start the new generation of the cycle of life in the correct way. Methi by name, Methi by living, Methi by conducting the correct way to understand. Not to be crying that I lost something, where what I lost has become the step for the progress of the others. Be proud in your loss, has become the gain of the others. Mankind's' soul will cry to understand more. But in a way we have paved the path for you to understand. We brought you to the point to understand, that what is promised to be, is not a Methi as a person, but is a Methi as a totality of the soul of the mankind and the planet earth and its citizens to understand the truth about the creation, and about what we call the precious value of your soul.

Then you understand why the teaching has taken so long, we are preparing you to take the soul of Methi, (:36). as a collective soul of the creation and created on this planet. Soul of the new life, new generation, new position in the U of the new Unicose. Where P has no D. Where the understanding of the process of the creation of what we call, interaction of the fields to lead to a perfect life becomes the essence of the creation.

We are Messengers, and we know how to deliver the message, and we know how to guide people to understand the message. It's no use when I deliver a message to you and you only read German and it's in English, it has no meaning, unless I can translate that to the German that you understand. Then even when I translate, to be able to carry the essence of the emotion of that letter, that you get the full feeling of it, not just reading like a computer, with no emotion.

Mankind has to understand the emotion of the what is going to happen, what is going to be the essence of the creation in the next cycle, not only of his own. It's like the STM from now on is like that little bulb you see in the football stadium in a flood light, on its own, still shines, but collectively will flood the field. The soul of the humanity, .. of the created things on this planet has to become that flood light, (:38). become that star, that process of the creation where the man moves from individuality to the collective awareness of the creation as one. The soul of Methi is the soul of the created on this planet. When the mankind, when the created things understand to go through the process, needs to the understanding of the totality.

Which one of you would like to be the first bulb in that floodlight? Which one of you has managed to understand the truth about the process of the creation. Then we understand the year of Methi is upon us, because we have received the teaching, we've been guided to understand the essence of the Soul of the Creator (STC) within us, amongst us, and to understand collectively we've become that Methi. It cannot be one anymore we put and the cross and be crucified. It cannot be one that can be put on the wall and fired down to be destroyed and to be killed, that he might stop the message of the Creator.

The Messengers of the Creator are those who give their souls for the others to elevate, not their P. In mankind has become that torch, that only for himself, becomes that what we call, floodlight, that he enlightens the rest of the soul of the created things on this planet and collectively mankind elevates to position of creation of the new U. Now maybe you

understand what is the purpose of our work, what is the purpose of creating such a position.

Every U in the Unicose has been created the same way. Out of the collective soul, (:40). of the created ?/ which they reach the point of maturity at the same time, and the same position, the day of promise. The promised day is when the whole of the soul of the created reach the understanding of totality and needs one to shine for the others to come on. You become that first candle that starts the fire, you become that single candle which lights the rest of the candles in the church and in a mosque, and in a way to light up the whole stadium, This time the stadium is the Unicose and STM is that point, that bulb, that matches with the others to become the same, when you look at a floodlight, you can't see one light from the other, they all shine collectively. This is the beauty of the teachings of today.

That man understands, that the promise of the Methi is upon us, but not again, the way the world of religion has seen it in the D of P. The totality of the maturity of the STM on this planet is the Promised Day. That in a way we as one, we become, we as all. In so many ways, maybe now you can understand, how far can I go. How much can I understand about the creation of my own P and my own soul, that I stay, not looking, better light, in that floodlight, but be equal and as shining as the others. It's not a competition, it's understanding the elevation of the STM that all entities shine the same, when they are in the same light. (:42). When the shining of your soul manifests itself, all it can shine against the light, against the D of the STC and nothing else. Earth on its own is a dark planet, unless its fields interact with the fields of the sun, then that creates the light.

So when we speak about the collective STM, to be the Methi, only shines with the brightness, with the unisons , when collectively stands in front of the light of the Creator and gets enlightened by it. By the interaction of it, it so big that the light we create on this planet for the daily time we see, is nothing compared with the light that sits and emanates from the sun. The sun is the creator, the essence, is the creator of the life, and the collective STM, at the time of the manifestation of Methi we become that planet that the interaction of its fields with the interaction of the fields of the Creator will shine, as another U, as another D, another understanding of the totality.

Mankind is ready for that process. For that purpose we are pushing with the D in the understanding. In that process we are pushing for all the nationalities you call yourselves, and all the universities you call yourselves, to understand, not to conquer the U, but through the EU we provide to conquer to understand the power of your soul.

You get into an EU thinking I can go to the Mars and the Moon, but in fact, once you get into the EU, you understand the travel of the STM, (:44). which is much faster, it's more instantaneous. In that process, once we can grow enough light across this planet, as we distributing so many EU across this , then collectively this planet will shine, independent more or less, irrespective of color, race, and religion, and path of belief.

Maybe now you understand Ayatollah K of Iran, and Iranian government understood the process. They made 1401 the year of the manifestation and appearance of Methi. I am here. But I am here as a soul of totality, as that I includes all citizens of the soul of this planet. Maybe it's time for man to understand,.. for humanity to take that step, that the totality of the knowledge for man to become aware of his soul has been given. It's man who has to open that door. It's man who has to close the doors of ignorance, racism, and so many ways of prejudices, to himself, to the others, and the totality of the understanding, if we going to shine, we shine together. The famous word in sing, "you never walk alone." Which means in collective awareness in totality of existence of the souls, when we walk together side by side in the D of the STM, the walking is done, we'll shine by reflection, (:46). by interaction of the fields of the totality of the soul of the created in presence of the fields of the Creator. There is no light on earth if there was no sun. This is what has to be understood, and this is the whole purpose of the teachings to extend the Soul of the Man beyond the Soul of the Physicality that it shines as a star in totality.

When you shine as you were created from the same amino acid, you cannot be any brighter than the other. You all become the same and you understand, that the Soul of Physicality will become, what we call, the essence of holding the whole structure of life together, as the Soul of the Physicality of the man is based on the amino acid of the creation on this planet, so all the souls from this planet will have a common denominator connection to be, to shine, and to elevate the rest.

What would be the future of the human race in the space? If you choose the flight system you'll be still, that aliens who travels from poles to poles, from planet to planet. (:48). If you choose the flight system of the Soul of the Man, the totality of the man will become that shining star. Now it's for the humanity to decide, am I going to be that UFO passenger dragging around from centuries and thousands of years of this universe, or collectively we agree, that on the time, the time has come for the Soul of the Man, the collective soul of the creation, to become that star, and with it, in one instance become the center of a New Universe to shine, because once that position achieved.

You will find that, there is no space fields within the solar system, and within this galaxy and universe, that accommodates, can accommodate such a powerful source, unless it finds itself a new structure. We know this knowledge very well, we call it the division of neutron. We call it the separation of the electron from the proton. This when the humanity reaches the point of unified fields, to understand the totality, and becomes one, then we become that electron, that will be rejected from, or ejected from the what we call the mother seed, and we become that new cycle, the New Universe.

This is why in the intro it always says, if you understand word by word of it, what will become. You'll become a new cycle of life. You were expecting to become a sun, but collectively you'll become a universe. It's for mankind to decide that point, it's for mankind to understand the message of the Methi, and understand the progress, in understanding the totality is more important than one individuality, (:50). to be the king,

the leader, the president, or whatever shame name you put on them. Now you understand the process of the creation.

I am the Methi and my job has been to create, that new separation of what I call, neutron for the creation of the electron to be ejected from it to become a New Universe. We have watered this plant well, and it's time for it to flourish, and it's time for the bird to take the first flight to leave the nest. The totality of understanding of the process of creation now forces mankind to work as one, to make one soul, to understand the Soul of the Creation, that it goes back, and it's exactly in line with the writing of the first book, the creation of an electron from the principle plasma, the neutron.

This universe has been the neutron, for the electron of the life of this planet, to be created, that when it reaches the maturity, when he gathers enough fields not only from this planet, but from the universe, what we call Unicose, it comes the time of new birth. The generation of the new cycle as an electron, that in turn this, as what we call, a new dimension, becomes what we call, the new entity, the new totality in the Unicose.

Maybe from today you understand, how even the whole creation of the Unicose started. We are the same within, and within when we gather enough, we become another, (:52). and then with that process, again within, we become another.

It does not mean that one universe, or one part of the Unicose is bigger or stronger than the other, but in the process of the creation, all the neutrons are the same, shine the same, the same strength, but in different position of attraction and rejection of the fields of different strength.

Now we understand where the mankind is going to go. Now we understand the process of the creation now we understand that the earth through the interaction of the fields unified fields of his souls is getting ready, he is preparing for that, what we call separation and creation of a new life in totality, amongst the positions in the Unicose.

You were happy for me to give you a UFO. You were happy to sit in the Enhancement Unit and fly from New York to Tehran. Now I gave you the seed, the structure to understand how you as a human race have to work collectively, to bring the energies together, that allows the electron, what you call, it the division, what they call the decay process to start, that this village of man, become the center of another universe.

This is what we came here for, and this is what we do regularly, it's not one-off. The earth is not the first place, where what we call, the electron has been created from. I've done this many times, in different shapes and colors. I'm a master in what I do, because in that creation, (:54). we'll see a new light to shine, but the reflection and interaction with the fields of the Creator.

In a way I create candles. I take time to make it, and as a Candle Maker when I light it, I only can be seen, its light, when it interacts with the light with the fields of the Creator. In the way, the purpose is to show one by one, lighting candles in the Unicose, to show the

beauty of the Creator, to be in love, and to be devoted to serve. You are happy to light a candle in the church on the table, with the lover, the lover is a creator, and we create a candle to light it, to show the beauty of the lover.

This is why we always told you the manifestation and what we call, the presence of Mitra is the lover, and the candle is the light to show the extent of love, in reflection and interaction of the fields of the lover which is the Creator.

Now you understand why we brought you step by step, even in the production of Enhancement Unit. If you look the shape of the universe, and you look at the shape of the Enhancement Unit, there is no difference. You looked for a dome to go in, we gave you dimension of the creation of the Unicose, within the structure of the Soul of the Creator, and with it you create a dimension of the what we call, a universe. Look at the dimensions and the proportions in the fields, (:56). and the shapes of your Enhancement Unit and then you understand, how we walked you into understanding, living, and in a way, elevating the Soul of the Mankind, to become that electron in totality, to lead to the creation of the New Universe.

What's the purpose of gathering so many beautiful flowers, making them to grow, and do nothing with them. It has to show its beauty the Soul of the Creation, the Soul of the Creator the soul of interaction of the two, has to shine, that, that light shares the essence of the Creation within the Unicose. One day Mankind understands the messenger (message) of Methi. One day mankind understand what this message entails, and how the Humanity as a whole, and the Soul of the citizens of this planet, through the Love of Mitra has jumped the gun, and from what I call, little tiny planet, now are ready to become the center of the New Universe.

Once an electron is ejected from neutron, then it has its own cycle of life, independent and it can dictate its own position, dimension, and size. Now maybe as Humanity we understand why this year has been promised to be the year of manifestation of Methi. It's the maturity of the man to understand the process of his own creation and a collective interaction, (:58). to lead to the creation of the New Dimension in the STM, in the Dimension of and in a Position of a New Universe.

We cannot gift more than this to the planet, where Mitra fell in love with. In a way, Humanity has received the energies of the universe through the love of Mitra, and the manifestation of the Children of Mitra will bring a new dimension, a new essence in the world of creation, where the shining of the light of the soul of its created, will become the same as the Creator. In totality, we are ready for that process. In totality, this year we set the scene for that process of unification of the souls.

In a way in a hidden way, we gave you a lot of hints, of what's to come. We give one Enhancement Unit to every nation. We give one Enhancement Unit to every university, that can evolve and elevate the soul of the understanding of the knowledge, which leads to the freedom of the man. In a way freedom to become part of that light, to shine by the soul and not the physicality. As I said we have set out and we play your game, because

you're so physical. We give you a new Enhancement Unit. Now the Enhancement Units has gone into mass production and we hope by the end of this year, we give something like, maybe five to seven hundred units across this planet to universities, to the governments, to space agencies, and even to the churches, (1:00). and to the mosques, that they understand what was the purpose of all that work.

We are not here to look, we are charitable. We are here to clean, to create the condition of equality, that all the souls shine the same, in the process of the manifestation of Methi. In a way, as a human race we are ready for that step, and it takes one at a time to build up.

As I said in the past weeks the Keshe Foundation has started the process of the manufacturing of the new units. We had to wait there was a process, which needed to be completed. In so many ways in its completion, we have seen the totality of what we call, the essence of the creation. What we need to understand is that, Mankind has entered the process of conversion, the process of understanding, that now we are on the race to become the center of the New Universe. We are on the race to become, to understand the totality of what we call, the structures of the Creation.

As I said this picture shows our work clearly. The mass production in delivering units across this planet in the coming weeks, and days has started. You shall see as part of the whole structure, that we have started that process unknowingly by man, (1:02). but knowingly by us, that you all understand this is not a game.

This is not to give an Enhancement Unit to one, or the other to be better. This is to give a unit that Mankind will line up to create the condition for the evolution of the what we call, the Soul of the Man through the knowledge of physicality. This factory will be full of these systems waiting for universities and governments to ask for, and to deliver. From next month, we push for about a hundred unit a month to be ready. Keshe Foundation will support this. First time we showed you one and two, and we learned to be taught, now it's become a race. This factory is what we call the ?? breeding point for man to start to understand the totality, and with it to start the process of what we call interaction of the Souls of the Man.

Maybe in the coming time Man as a race, will become educated to understand what has been given to him as a gift. It's for you to understand the process, it's for you to create that condition. The first units will be flown to Arizona, and at the same time the two units arriving at Arizona, one goes to NASA to invite the scientists to join the race of elevation of the Soul of the Man, even though they are interested to get to Mars and Moon. NASA Corporation has been aware, (1:04). and has been informed of the delivery within the next few days. One will go to the city of Tehran. One will go to another city in Tehran. Austria receives the first two in the coming days, and then in the progressive development, we shall deliver one to Tel Aviv, and one to Mecca. At the same time we'll give units to the Chinese, and to the Japanese and to the rest.

It's your responsibility the way we gave the keys to the nations, to share the knowledge. Some 10 years later, now we give system to use the knowledge and the key, to develop

the flight system, not to fly the physicality, but to be able to release the Soul of the Man to take the flight of the universe.

These units will be spread rapidly across this planet, and I'm sure nations scientists will do the same. We have the units we'll manufacture units, and from this week on is your responsibility to get your nations to ask for a unit to be delivered to, that its scientists can evolve and develop and to bring the totality of understanding of the physicality and elevation of the Soul of the Man. In 2012, exactly 10 years ago, I announced about the same time, about the release of the key to nations. The key it was a USB stick with the knowledge in it.

Ten years later now we give the system to it, as they were too lazy to develop the technology. Now it's the same. Go to your governments go to your scientists and universities and tell them, there's a space unit free as a gift. (1:06). Can we bring it in and deliver it.

We asked the Universal Council to do something and there's still, as usual in the dimension of physicality, battling with what to do. Last time the Italians broke the rank in Europe, and through the parliament in Italy, and the rest, they received the key and they broke rank. This time we broke the rank ourselves with the Americans, that NASA becomes the leading scientific organization to work with Keshe Foundation Arizona to bring the change.

Get your universities to apply, to convince us that they are ready to go through that process, not just for the flight, but totality of the elevation of the science of the man, and we give you the units free. Does not matter if you are in Africa, you live in New York or you're in the jungles of the Amazon. If you're in the jungles of Amazon, we'll deliver it to you one way or another.

Brazil

Talking about the jungles of Amazon we have seen a lot of work in Brazil. A lot of heavy work done by Rafael and the team of the Brazil, to bring the knowledge across this planet. This week is the birthday of Rafael. I think Brazilians have done enough to receive the first unit as a gift for his birthday. (1:08).

A lot of work has been done in Brazil. As Brazil has been another point of contact for Humanity with the outside, for thousands of years. Now we give you the system to complete it within the universities of Brazil. We gave the unit to Iran, as it is the birthplace of Mitra. We gave a unit to Austria. This is the last point where mankind realized wars can become, the whole of the world involved in, through the existence of Hitler. Now we show the same country can become the essence of peace and knowledge. The rest is for you to convince your governments and your universities, to ask the Keshe Foundation for a unit, and what they are going to do with it, and within the next two months to achieve flight of the Soul of the Man, and not in the dimension of the physicality of the man.

It's a responsibility of Knowledge Seekers the way the Italian Knowledge Seekers did in 2012, by going to the parliament, forced their government to ask, and we delivered the key to their Embassy. (1:10). This time it's for you as Knowledge Seekers to get your governments to ask for the Enhancement Unit, and guarantees, that will be used for peaceful application, and sign their nation's to World Peace Treaty.

We'll bring the change we bring the change in a correct way, but we have to understand these units are there for elevation of the Soul of the Man, and not for man to fly to Mars, to Moon, and the others. Then if the scientists decide to test it, on the 6th of June they can try to go to Moon, or to Mars, or anywhere else they decide. John in Arizona is waiting for his delivery next week or two.

The same will go with NASA. NASA at the moment is baffled how they are receiving their system as a gift. In a way, they were, and they are still doing a lot of work. They are the first organizations became aware of this new technology and development, since 1985. So it's time for them to at least see what they have done, and what they could get, where they can go with it. It is not our job to deliver, cook, and chew it for you. It's our job to show you the way.

Now it's time for you as Knowledge Seekers to join your university, join your government, and start the first steps in production of the systems. In a way, we show you the first step, (1:12). and hopefully and I'm sure the rest of your universities will develop the next steps. This time I decided to give one to NASA first to stop the embarrassment of the last time, that the Americans had to come and ask for it, on the year or the day of the election of president Obama.

This time we work with all the scientific organizations and agencies to see that the elevation of the Soul of the Man understood, and is achieved. And this year become the year of manifestation of Methi, which means the collective awareness, understanding and knowledge of the elevation of the Soul of the Man and Mankind, to start the new cycle, as to start the creation of the electron, that it becomes in due course, ejected from the mother, from the neutron to create, to become part of, but independent of. This universe has been promised to be a shining universe, as is the birth, the mother point of the creation of manifestation of Children of Mitra. The Lover, to stand opposite the Creator, and shine beautiful enough, to keep the Love of the Creator and the direction and dimension of attraction of it.

In so many ways, the beauty of the creation of this New Universe as a reason. In a way, (1:14). the creation of earth as a New Universe, in the outer edges of the lines and the strength presence existence, of the fields of the Creator, will create a dimension of the womb within the two. Which leads to creation and Light of the Creator to shine, in a beautiful way, amongst all created universes and the Unicose.

Understanding of this has become very simple, and has been important for us to be able to do this. In a way, what we look at, is the creation of the new cycle of generation. In a

way, that as the Creator sits within the center of the creation, Mankind will come to understand the totality of the understanding of what we call, his own existence. Mankind will come to understand, that he has become the center of the Love of the Creator for what He has created to show His Lover.

It's not that only Mitra shows his love to his lover. The lover shows the same love back to Mitra, and the citizens of this planet are that, what are called flowers, which receive the totality the beauty of the Creator to shine on. This is why we chose the Earth and we made it that Shining Star to become the Shining Universe. We could not tell you this from the beginning, but now we see that the human race is ready for that transition. (1:16).

Maybe, maybe today's teaching will be understood in the time to come, and then become the seed of what we call the play of the Universal Community, to become the travelers, to see this beautiful Universe, which has become the center of attraction and attention of the Creator. We have planted well, we watered it well, we had to clean some of the thorns and dead leaves from it for it to be ready to shine when the Mitra takes his time and place, and position, to make it the womb of the created, and to come to be equal and the same.

I thank you for today's teaching, as without you we cannot teach, even though we can teach through the Soul of the Man. I hope you understood the new position and the purpose of the teachings into some extent today.

Maybe, now you understand what is the responsibility of Knowledge Seekers. Your responsibility is to sow the seed of the Knowledge of the Creation and the elevation of the Soul of the Man, and we give you the seeds. The Seed is not the Gans anymore, or something else, it's the seed of the Knowledge, understanding, and we give you the tools, the plant pots to grow these seeds in the form of the Enhancement Units.

It's for you as Knowledge Seekers to take the banner, contact your governments and universities, and Keshe Foundation will deliver unit by unit. Let's see, (1:18). last time as collective Knowledge Seekers 10 years ago we managed to reach 75% of the governments of this planet. See how much you get your governments to accept the units, your universities, and with it commit themselves to peace. In a way we have given you the roles of peace. Is for you to turn the guns of the Soul of the Man to what I call, "the beauty birds of the freedom of Man in the space of the universe." That little white dove that we symbolize as the sign of peace, has to become the sign of the Soul of this planet, that collectively we bring the process for the peace, and the elevation of the Soul of the Man to become that New Universe on its own.

I've done my job. I still carry on teaching, but slowly, slowly we open your eyes to the New Knowledge of understanding totality. When you become universe you need to know a lot, to be able to create the condition of life, that it stays perfect, and reflects the true essence of the Creator.

Thank you very much for today and I have one thing to say to His Eminence Ayatollah Khamenei of Iran and to Vatican and to Jerusalem. The year of Methi is upon you, it's for you to decide how to unify to show the beauty of the Creator, which is the Soul of the Totality of the Created on this planet. We provide the tools it's for you to water it to show his beauty with the knowledge correct conduct and what we call, the elevation of the Soul of the Man, and not to slave the man through his soul. Thank you very much Rick we go through a break and we come back and we try to answer human questions.
(1:20).

>> **BREAK** >> 425 KSW March 24, 2022

(1:25)

K- By the way I don't know if you have gathered or not, this week is the birthday of Rafael. Happy birthday Rafael. I think I can say, he has devoted his time and life to the KF and the humanity, and I think it is the best gift we could give to the nation of Brazil. (1:26). It's for him to decide where it goes, it's his birthday gift. And it's thanks to all the Brazilians who work so hard to extend the knowledge from Amazon to the bigger cities of this country. It's a beautiful nation, we've been there a couple of times, and we always say we go back. We know the nation has the capability and the knowledge of the space, but let's see how their devotion to their faith will bring man and the science of this nation to be parallel with the others in a very rapid way. By mid-April it's for Raphael to decide where he wants it to be delivered to with the agreement of his government, and deliver it to that point and university, or that governmental space organization.

We have met with the officials in the scientific world of the government of Brazil while we were there a couple of years ago, before Corona. It's amazing how this nation will bring the space T and the knowledge of the, what we call, man, to a new D. Thank you very much for all your work the Brazilian team, in what you have done, and what you are doing. I think it was the best way to give a gift, at the right time to a nation and a person who has worked so hard in the past couple of years to share the knowledge freely across Brazilian nation. We wait and see, and hopefully we see more to come.

It's your job to go to your governments and universities, and ask them to request from the KF standard office at KF kfm.global , (1:28). which is the usual office contact for the KF. Then we respond. It has to be I want it for my country, not work. It has to come from official university, embassy or the government to the KF in Austria. We'll respond as we

done before by giving the Keys. This time we give the system. It's no use telling us I want it for my nation, it has to come from your nation, your university, and we shall deliver. It's no use coming there and just sitting. You have to prepare your nation to receive it, to .. use it, to elevate and bring the knowledge across. To share it directly with the scientists and it's, open it to the D of the knowledge of the citizens.

Any questions.

Q: ... We have 2 human questions from the German speaking community. One would be, what about the rings of Saturn, was it a planet before, or how does that look. Can you say something about it?

K- There is a paper written called, "Rings of Saturn." This paper is not released, but in it, (1:30). we explain how the rings are created from within the center of the planet. It's characteristics with all the planetary systems with a plasmatic center. The rings are primarily created by the interaction of different fields, superimposed on the other, as the planet is still at infancy. Saturn is one of the youngest planetary system in the solar system (SS). As it will age, and the fields within interact we'll see less and less rings. We have these rings around the earth. We see these rings even around the sun. But as you have different materials gathered over the travel of the Saturn from the edge of the SS to inner part, to where it is now, it has collected different materials overlaying each other, and each ring is manifestation of that overlaying material, overlaying each other.

In a paper called the ring of Saturn I have explained this very clearly. .. whiteboard . (1:32). But I can explain it. In some of the teachings in the past we have explained this. Where the rings of Saturn comes out of the creation of overlaying of different density materials. ... You have a center of the Saturn, you have the Sun in the center. This sun, by radiating different fields in different directions, ?? leads through its dynamic structure that its materials revolve, and revolve around this point. The Saturn was created somewhere here (outer edge of SS), as a collection of some atoms and some plasmas. As it evolved and rotated (around the SS), it becomes bigger, and bigger, and bigger. As it goes in (towards the Sun), it evolves different layers. Now you have the Saturn center, with another layer on top of it (red), (1:34). then this process carries on, and then it comes to another point, where at this point it's (has accumulated) different materials, in this area. So now you have the blue, red, and then the green. As it goes to towards the center (of SS). Earth started the same way. Earth at the moment is somewhere here (midway to the sun), but it started in the same area (as Saturn at the outer edge of SS). So as the .. Saturn closes in it will come to this point (where earth is now), over billions of years.

What this effect has, we have the center, now the interaction of different layers on top of each other, creates the ring of the fields of it. So now you see the rings of Saturn, the red and then the green one. (audio got muted by mistake ..) (1:36). You see this layer by layer. The green one stays as a center, the red one has created this red ring, the green one created this green ring. Then it goes on, it carries on with the next step. If you went through a different strength, another layer on top, this will create another ring. These

layers are not necessarily material, .. could be different strength H plasmas, as they are on the boundary of the SS.

When we see the rings it shows the composition of the inside materials, what composition they are. We see this with the brain of the man. If you look .. you have the soul and you have different density .. brain tissues. There is no difference, that's interaction with its environment. Gradually as the Saturn makes its way, to let's say this position (where earth is now) in the SS, it most probably losses the green and the black (rings), we'll see one (? ring). We see this with the sun the same. Sun has its own rings, the same as ... Saturn, but usually it's one or two. Then because of these different strength of the fields, we see different .. materials, according to the strength of the fields in each layer. (1:38). There is nothing unusual we understand the process.

We use this knowledge in defense T of the spaceships. In the spaceship programs when we build the systems, we create opposite interaction of the fields knowing this knowledge within our reactors. We don't go and build it. Within the reactor we create the condition that one of the fields is opposite to the others inside, so the field outside. This is used for defense T. This is actually how part of the Iranian defense T used in Iraq, in the last January, two years, because it creates a direct, total black condition , you cannot see.

The purpose of this in space T is very simple, is that, let's say a meteorite comes in, and you are a single track, what we see like meteorite will come in (passes through a single track), but when you have a double layer, if you penetrates this (first layer), not this one (second layer) reflects it back out. It's a very advanced knowledge, (1:40). and I have built this one in the space reactors we use today. We don't create 2 motors rotating on top of each other, we create the fields which their interaction creates the condition. There are no motors, there is no containment in the U, it's just the field forces. Go back to part of the teaching where I explained that, in the reactors, especially the first blue reactor we made in Belgium, and then in the first Iranian flight system (FS), we saw the reactor going anticlockwise, stops, and then it goes clockwise. When you change the pressures and the field forces within the reactor.

You don't need containment. In the future man will not have a house built of bricks and mortar. We create our walls the same as the earth, through the fields, the forces within the reactor, we put in the center of our property or in the U. then understanding this we create, very much the way you create clouds, not to be seen we create partitions. Then by changing the fields you decide you want to see the light.

The world of the knowledge of the physical D in the next few months and years, will change. This is all in the teachings, it's not something new. Go through the patents you see it. Now you understand what it means. The structure of the space T, (1:42). .. in the STM has one principle. It's man who has broken it up into bits, and now he doesn't know which bit fits to what.

(1:44).

Any other question

Q: ... Why did the Mozhans weren't allowed to open the window during their training?

K- Ask them.

Q: I asked them but they don't know exactly, we speculated.

K- Ask them they will tell you. First of all when we were in the .. You have to know what happened with the Mozhans. .. started in Ghana .. we traveled to .. South China Sea, (1:46). into the Human island, which is parallel to Hawaii ..

Some were enlightened, some understood some of it, but in time they'll go back to it, and they'll understand what is taught, and what is the reason behind what was there to do. It's a process, it's what all of us will come to understand.

While you are there, the German community, we thank you for all your support .. travels to the Linz EC ...

(1:48).

Any other question.

Q: ... How can we help speed up the process of peace between Iran and the 5plus1, as we are now 5 days into the Persian New Year, and no sign of an agreement?

K- The agreement has been done. The agreement is total and complete. (1:50). There are a couple of points, which is actually irrelevant, needs to be done. There are .. The main problem, it's not a problem, the hiccup which you were not in public aware of, is that the Germans, English, and the French are trying to get as much as possible before the end, before the Americans sign the paper. Iran is using these points to gain back what was done wrong for years. The Iranian leadership is playing it very skillfully. You saw it just 2 or 3 days before the Iranian NY, the British released 400 million Euros of money, which was kept from Iran for past decades, and that was used to release to people, who was support to be there, to be released. I advised the Iranian government to keep an eye on these 2 people who been released, because it is the pattern of the British, that they use these later on, to create mayhem, and become the leaders, of whatever they are trying to push. We saw that in Libya, .. Iraq. My advice to the Iranian government was to keep a very close eye on these 2 guys, and the people whom (the money) has been released. Because they become the next seed for the problems, a lot of problems, which is set, to setup (in Iran). They send them in to do things, then when they get captured or they're found out, then they pay for them to be released. We saw that, same thing, with the president of Libya, how the British paid for him to come out, and then they put him back in as a leader.

So there is a diplomacy going on, (1:52). the French want

(1:54).

(1:56).

The delay is made by the 3 EU members trying to collect as much as they can. The Russians have got more or less free nuclear supply from Iran ... We see in the upcoming nuclear reactors .

.. with Iran providing, what do you call, producing a nuclear weapon has gone to the bin, with the documents we provided to the IAEA, and the American government. And we saw how the Iranians reacted. The process is ongoing.

Assassination attempt on Mr. Keshe by Israeli MOSSAD

We were aware the Israelis lying and cheating and they tried to prevent this process from going ahead. (1:58). There was an attempt on my life in Istanbul 2 weeks ago, which we kept it out of line, again by MOSSAD, planned by them. It's all pictured, and .. videoed. This was because Israelis know that we opened their hands, and they didn't want it to go any further. That was 2 weeks ago, on my return from Istanbul to Vienna, and immediately meeting with Iranian officials, we saw the reaction of Iran, in Vienna, and we saw immediately what was done by the Iranians, to the headquarters of the MOSSAD in Erbil in Iraq. You cannot attempt on the life of anymore Iranian nuclear physicists. We respond accordingly. You tried to take my life, we responded again to your bases, which were centers for creating ??? that's what You ?? has in Erbil couple weeks ago. Now you understand the whole process behind, in the background. If anymore attempts made by the Israelis to another Iranian nuclear physicist, we respond accordingly, in a very strong way.

The understanding of the T and the peace is part of each other. This is why earlier on I announced that we will share the space T of Iran with the invitation of our UC member for Israel, with the nation of Israel, not with the state of Israel. It's his job to arrange it through the proper universities, and the presence of Iranian scientists. Sharing a knowledge is part of our work irrespective of race religion .. (2:00). But I have to have the clear indication from the Iranian leadership that this unit can go to Israel, and we get a collaboration on the scientific level, the same as what we are doing with NASA.

Any other question.

Q: .. We all know that the US withdrew from the agreement in 2015 .. How can we be sure they won't do this again playing with Iran?

K- This wasn't a play. You have to understand the state of mind of the last American president. He is money orientated, he got his daughter by paper, married to second richest family in Israel. He got the support of the .. Jewish Lobby, he gave the White House in their hand, for them to become, to be able to do whatever he wanted to do. Part of that bargain selling the US to the Jewish Lobby was ending of the contract .. the peace negotiation. This was understood fully in the world of politics and diplomacy. It had nothing to do, he just sold, the guy will sell his shirt for anything.

(2:02).

Next question (2:04).

Q: Salomea ... I am worried about this robot soldiers of China at the border of India. Can we do something to stop of the repeating situation in Ukraine in Asia. .. Can we do something as UC?

K- We already have, we already started. I think you missed the point in today's teaching. By giving these units to every nation, and them developing it, we'll come to the point in the physical D that the borders don't have no value. The Chinese can be in India in seconds, and if the Indian government asks for the space reactor to be delivered to them, Indians can do the same. Don't forget the teachings will be simultaneous to all of them. It's not a matter of who will, they all will

(2:06).

We teach you everything. Collectively you need two units to work. So NASA has one half of the equation, and John has the other. How NASA collaborates

(2:08).

I am traveling to London to meet with officials in UK to transfer the T, especially to ??
(2:10). It will be gifted to Queen Mary College in London. We'll see the next steps. ..

These units have to go to nuclear centers, because they have nuclear facilities. You cannot fly with Gans's. It goes back to the origin of space flight in Tehran in Sharif University.

(2:12).

As you've seen the units have gone into mass production.

Q: They line in another century ..

K- We all live in the same century it's just changing the man's habit ...

Any other question. (2:14).

Q: Is the Cup of the U 6th or 7th level of the matter state?

K- No .. You have a matter state in every level, even in the 5th Cup you can create a matter.

(2:16).

Q: ... the Keshe sales UFO, the hovering UFO found in the KF Store. Sometimes rotates left then right, would you be so kind as to explain this phenomena?

K- I think we just explained that in this picture. It depends on the field forces of the day. As I said ... go back to maybe 5 or 6 years ago when we should the units we saw the

change of fields between day and night. .. in some parts of this planet on some days, if you weigh yourself on a scale, say before 7AM and weigh after 10 o'clock you say I lost weight 1 kg, or I gained 1 kg. My diet works, but in fact, it's the field G of the earth which changes. You haven't lost (weight), it's not .. atmospheric pressure, whatever. (2:18). These are field forces G field forces. It's the same fields interact with these M field, of these flying objects on your systems. Depends what fields and what environ dominating that day. It goes back again into the teaching .. . outside forces dictates the forces on the magnet. Even in your electricity lines, you have this variation. It's not from the power source, it's from the fields of the U which changes it. We understood this in power transmission years ago. Sometimes you produce 2 KW but when you come to substation it's 1.6 KW, because the cable line on its path is giving energy to its environment, at some point has paralleled with it. And sometimes we produce 2 KW, but we get 2.4 KW. Depends what G field of the earth at the substation creates in respect to what we call, ?? inserted to create that .. voltage difference. It's a M field flow, it creates a current, so it changes your power levels. It's the same with your .. UFO systems on the move. It very seldom happens, it depends on where you are, in what position and how you position. If you lift it up 2 meters higher, (2:20). it will go the opposite way, when you bring it down, it will go to the opposite direction. It depends on the ... daily fields.

You've seen this in some places when they say it's visual perception, by, when you think you are on the hill, and the car down the hill, goes up the hill. This is the same kind of ?? things, it's not a visual game, it's field interaction of the environment on the system. Even your current flow can create that. Even if you switch your wires, back to, unplug it and plug back different ways sometimes you get it. It all depends on the field interaction at the point of the .. two system , because they are independent form each other. One of them changes, so forces the other one to react to it. This is what Einstein called the "funny thing" you have to find out where is the funny, and change it, that it changes direction of the rotation of your UFO.

Any other question

There is something interesting with these UFOs try to change channel

Q: Nikolai, ... (2:22). .. it's a wonderful gift you have given for the birthday of Rafael, that's quite fitting. .. with the intellect and the heart. In what I would call, so called, spiritual communities, otherwise people who have, let's say spiritual community. they say come from the heart because that is the strongest field. In attempting to teach some of these teachings that come from the KF, and your knowledge of the greater collective knowledge about the location of the soul within the brain. These people who have learned a slightly different understanding have great difficulties with the idea that the intellect, the soul in the brain could be more powerful, or .. perhaps, that the soul could be within the structure of the brain. that is very difficult for them. And they say, "no, no, come from the heart and forget what is in the brain.' Can you speak to this and perhaps expand some knowledge in this area?

K- In what form?

Q: Perhaps I want to know in which regard, how are fields of the heart perceived to be so strong. Is it the manifestation of 2 other fields, that the fields within the brain and the fields within the body, the STM and the STP, (2:24), create those ..?

K- Exactly, that's exactly it is. One is tuning to the other and visa versa. This is what your ?? self says, my heart says, don't do, because you receive the message from the soul. It's a translator, interpreter of the message. Understanding of the totality is the part we say my heart says, don't do , and where did the heart get the message from? Partially its own interaction of the fields on the matter state (S), and partially from the soul. The STM never sleeps, the sun never stops shining. It's the man who is on the facing of the sun, side of the earth, or on the back of it (earth).

It's then we receive the light of it with different strengths, it's the same with the STP. Very strange, maybe in the future mankind will understand. .. The STM shines in all D and directions. What happened when this sun, (2:26). shines on the left of your heart, or the right of your heart. Would the position of the heart in respect to soul, create different field interactions, of different strengths, that is creates different emotion within the man. Which part of the heart will receive air from the lungs first of the highest order, and takes back from the other.

The field interaction with the soul and the conversion of the fields of the heart, that's why we feel the emotions, we feel my heart , because the sun sits above in the center of the brain. And now you have this rocking chair of the heartbeat of the man, in different positions continuously. Then you understand why man has a mixed emotion, ?? and emotion.

The sun, the soul does not stop shining. It's the position of the heart which receives it, and then how you react. (2:28). The blood flow is sporadic in the body .. in the circulation, it condenses in this area (of the heart). So it has more possibilities of interactions (with the soul), as it gives (to soul), it receives. It's not a one-way traffic that we only receive. When our emotion goes there, it feeds the soul, and the soul communicates with other souls. That's how your balance, of your doing comes. We see how things turn out.

We see how we feel the fields, due to what we call, .. you got to understand something very simple. This goes back again to .. science of P. You have the heart of the man, .. blood circulation which we call the dark blood, deoxygenated, and we have a blood which is oxygenated. Now we understand the blood of the man is a Gans. (2:30). Brings not only the blood but with brings the emotion of what the P has done. Every blood when it comes into the heart .., like the way we have the liver which we store from the blood, surplus. The STM has the same liver, memory bank of what ever has been brought from the physical emotion. Then you have the source of life on the environment, and this comes with a different strength. We look at the physical condition in how much blood it goes. In the new knowledge we look at how much fields it brings in (oxygenated blood side), and how much fields this one (deoxygenated side). The interaction of the fields between the two creates a new D, what we call the STP. And this in turn interacts in a mixture of fields with the STM. The same as it gives it takes. Exchange of information in the central bank, or most of it, because the rest of it through the same blood flow will go around the brain, the skull and comes back. It's very much what we never understood.

Where does the G starts, and where does M fields finishes. (2:32). If you understand this, then you can do a lot in the future T of understanding the knowledge of creation (KOC) to decide on the condition of the P of the man. These two (STM & STP) have to work in unisons to keep the soul and P in all D as a field. Where the P is manifestation and interaction with the fields of environment.

Then now you tell me, why do I feel that emotion in my heart. It's where the sun shines, interacts with the totality of the fields, where here (in the head) it collects in the circulation around the brain, information only about physical interaction. Where the essence of the physical soul of the man in the heart. Now you understand. Then if you understood this, earth, moon, Jupiter, planet Zeus, another galaxy, is how we allow this field (STP) interact with the field of the soul to lead to the, if decided, to creation of the dynamic P of the ?? zinc. (2:34). It's as simple as that. You convert this into the knowledge, where the sun is the soul of the creator of the man, and then you have the STM, it's the same. Then you understand, what I call , the STP, then you see, how the STM, STP connects through to the STC. It's so simple.

Next time when you feel it in the heart, see if you can feel the emotion of the soul, and then that emotion of the soul, if you can feel it, then you decide is it, with interaction of STC. Then you become aware of the knowledge of the Unicose, the creation.

As Messengers we understand the totality, that's why we can teach so normal and so on the level that everybody can understand.

Any other question. (2:36).

Q: Ed, ... Is there a connection between Inertia and emotion, if so could you elaborate on this?

K- Emotion has a strength which changes to P. When you feel sad, you create cries and tears, or whatever. You convert the fields into matter S reaction in the body of the man. So it is Inertia based, yes. You change the emotion into laughter, so you convert the emotion to reaction of P. It's what I call the Inertia of the man. As I said a few minutes ago, every level has Inertia, it's how you interpret it, and how you manifest it, and how you show it.

Q: Brazil comment. .. we here in Brazil thank you ..

Q: In Brazil there are ten thousand in Telegram group, if each of these reach a thousand we are tens of thousands. (2:38). When you started taking in Brazil April 15th, 2010 went in the UN Security Council, our former president on a trip to his country defended before the world, the peaceful program of Iran. Our president was rejected by the geopolitical forces at that time, criticizing him, as if he was innocent of the true intention of Mohammad DeJan. With the group of KS perhaps it is

Could this meeting of the presidents ..

K- I don't understand.

R- Could it be this meeting of presidents .. this connection with Iran but got rejected by the forces of the world.

K- The situation is typical, Iran is not the only one. You got to remember something. Maybe the first time we disclose. If you remember North Korea, (2:40). was close, under a lot of pressure, making bla, bla, and everything else. Nobody could understand the rapid development of the nuclear T of north Korea.

KF released internally to the Chinese government and certain government officials within EU how N Korea is gaining knowledge, nuclear and rocket T and the rest.

.. the T is coming from the European Space agency sold by the Belgium director into North Korea. Belgium's were sending weapons T developed by Europe through the director to N Korea through their government, the officials. That door was closed very rapidly. We see N Korea does not show much. they are trying to, but they cannot get. Because Europeans were having access to the Americans latest technologies, as part of being the same, working, collaborating and this T was getting sold by the Belgium's within the EU space T, in a back door to the n Koreans.

(2:42). the same man, same group. Now we see changes.

Brazil Space T

It's the same with Brazil. Brazilian space T is very mature, that's why we always picked to work with it. Now with the gift of the EU it's the scientists who already have the knowledge in a very deep way can develop it more rapidly. Our objective is to give to the nations who are very rapidly developed , and put them in, not competition, but collaboration to achieve the flight collectively. Where you can fly zero-time, more or less, than we see the present aircraft industry becomes obsolete, borders become obsolete. It's the pattern which we always worked.

Go back to last week, I explained the situation very clearly what happened in Erbil, what happened after we left the Iranian embassy 2 weeks ago, now you know the reason. You touch us, we wipe you out. You touch the T the wrong way, you wipe yourself out of the arena. You touch another Iranian nuclear physicist there will be nobody there to touch us anymore, because we make sure, that you touch, you wipe yourself out, not us.

It's the same in Brazil, the Brazilian leaders understood the importance of the development of the nuclear T. The club could not stay a club.

I can show the evidence of the attempt on my life, on the screen now, 2 weeks ago, by Israelis MOSSAD in Istanbul. (2:44). It was just a pure luck, that it wasn't set, the way they set it. We give the knowledge, we do the knowledge freely, we .. accept the knowledge freely, be it political, be it scientific, Israel, Brazilian, leadership understood, because it's the progress, we cannot go into space if we don't fully understand the knowledge of creation (KOC) which is nuclear plasma. Otherwise, you are still burning fuels, gases what we are doing now. The Brazilian scientists and government understood. It's the same , it will be the same. We don't get crucified by not knowing, we get crucified by knowing and there is something wrong.

Any other question.

Q: .. Brazil... (2:46). you said in a teaching , our body disappears when we have 72 Tesla's. .. when we do tests like MRI's it has 1.5 or between 3.0 Tesla's, do our fields change permanently or come back to the normal after exams?

K- You mean when you go through the field radiation? Most of it in MRIs and x-rays, the body will disperse the energy. We do that in nuclear testing's. When you go to the doctor and they inject the nuclear materials into your blood and they take the radiation with the systems to see where the faults are, or the damages in the body. These kind of radiations are temporary and they are usually cleared out by the body within 24 hours. X-rays if they hit the center of the nucleus they create dislocation, but essentially they just pass through, and the energy is absorbed by the body, and dissipates as part of it. It depends, we see sometimes faults with the x-ray machines and MRI, is when they have been dis-concentrated and that creates a dislocation of the .. fields or increase the fields of the Gans and moves to a new position, and that position becomes permanent and can lead to damages and other things. Now we don't look at the MRIs, (2:48). and x-ray machines and nuclear materials for medical application as a matter state, as an energy state (S) and what that energy does and what new position creates for it. So essentially

(2:50).

When I saw the first MRIs coming out in early 70's ... Can we get this to Iran, how fast, do you know what these can do ..

If you literally could create the field strength within the MRI of the STM, you can elevate the STM in the MRI machine. (2:52). But we don't have that knowledge, because we are matter S position. We never understood the difference between the matter and the PI which the body of the man is. It's not matter, it's a PI, that's why it is soft, it takes different shape of it, it allows it. If you touch your skin, and you push it, it goes up and down.

(2:54). Because now the knowledge becomes available in a what you call, a restricted level according to what we want to know about today. Would we see the soul or a person who has sitting and working with Tesla. Would we find people who worked with Tesla and find their descendents ..

Rafael speaks

Q; Rafeal . I think he is ready to say something. Perhaps ..

Hello .. first of all thank you for the Happy Birthday, and thank you for this gift, I was not expecting that. .. the whole Brazilian community is very happy with this. I would like to share something, (2:56). that we shared at the One Nation about the work here. As we

said, believe it or not we started with just the sincere wish of two people here in our country, this work. We said, that is all you need to start, and then the rest grows out of it. this is what we are feeling is happening here in Brazil .. as we have now more than 11,000 members, but the main thing is how .. (Reads "Power of Intention - Brazilian Telegram restored" .. (2:58). ..

Thank you for all your love and care, Mr. Keshe.

K- You're welcome. Thank you for your work. I was talking .. interesting is that, how the translators of the KF into the native language creates, or has created those, who actually through their translation initially, understanding the essence of the soul of the T and the science, and they become, what do you call it, totally geared up with work of the Foundation. We saw it with Fabio. We see it in Rafael. We see it in Mario in KF Linz. We see it with most of the translators, we see it with Wang Lynn before. I think in the translation, it's not just the word which gets translated, they are translate the essence of the emotion. it's beautiful to see how they become the center of the knowledge and then the center of the KF.

In so many ways, when you wish it, you receive it. We went to Brazil with the wish to bring that elevation of the knowledge and T beyond the restriction, (3:00). which was put by the UC of Portugal on Brazil. We see a lot of changes. When people wish. The Brazilians have every night a session for the elevation of the soul of 5plus1, that is keeps on a path of peace, and how they work on it. It's the wish that creates, it's the sun that shines. It's just .. how many bulbs do you put next to each other to create that number, that light and how it will shine.

We see the same thing with the UC member of Italy, how Italians are working in the background. We see the same thing in Iran with .. how the situation is changing. Gradually it adds up.

One of the most discordant part of the KF is where we speak the language, like in US, and in England. The center has not been created, except for those who just work within the structure of the .. British don't come together. The Americans , because everything is in English, why should we do that. It doesn't need translation, and they don't make it thousands of , hundreds of thousands of, but they have not managed to ?? it.

But when it comes to language they do, and through that translation they learn more and they connect more. We've seen that in Brazil. It brings a reflection of when we were in Brazil about 2.5 years ago for the first time, and Rafael was the translator, I could feel the essence of the sincerity, the simplicity of understanding, (3:02). the truth about the STM, and the knowledge was something secondary. It just developed.

There was a huge objection by the, to, especially from the old guard. We saw one of them getting disqualified from Facebook very recently from rhetoric came again back ed by Belgium's. .. objecting why we put Rafael to head the KF. We had a number Brazilians who thought they are entitled to be running the KF. .. because they did so much P, we look in the line of the STM. It's proven to be correct, that our judgment by soul was more important than position acquiring place, in the Brazilian community. If we would have

allowed any of the old guard stayed there, because they were 5 years before, KF Brazil would not be where it is today. We've seen it, it was the right decision.

We see the same thing when we appointed the two heads of KF, the 2 ladies. There was a lot of rhetoric, that this and that. We see KF growing

What we see in the soul counts not the D of P. Brazil will go a long, long way, I am sure we met with the governmental people with Rafael when I was in Brasilia, at the advisors. (3:04) and we've seen now, with this gift they will get involved. They'll become part of it and they will extend this to knowledge sharing between most probably Brazil, Arizona, and NASA and Iran. We'll build in the next few weeks what call, the space group of the KF, where the scientists around the world will be made members of this group on Telegram, that all can share knowledge. It doesn't matter where they come from, NASA or the rest. Or some of them sit on the sideline just to learn and see what they can do to show better. Any of the groups which tries to hide things and trying to sow that they have done better, or come up with something, you'll find out they create there own demise. It's there when they block, from receiving knowledge. We'll see step by step the process growing. I am sure Brazil will be a shining star in the process of .. space development.

We knew it when we landed. Go back to the picture release at the time when we landed (UFO around the sun greeted Mr. Keshe when he arrived in Brasilia), in the skies of Brazil. It's beautiful, you have a beautiful nation and beautiful KS, and those who were there for their own personal gain, have already become silent, and disappeared, and they'll disappear.

Thank you .. Rafael and your team, and a very happy birthday to you. I received a message from members of UC and the others, that it was your birthday on 26th, would I give a message for the teaching of tomorrow in the Brazilian Chat. I thought it is better for the whole world to know, not just the Brazilians, what a gift, (3:06). you have brought to the state of Brazil KS, and the nation. And it will be well used. You know exactly where you have to go, which scientists you have to speak, because when these things land you cannot put it in your pocket, it's a big thing and they have to react, to get people to understand the knowledge. Thank you ... and many beautiful Happy Birthday.

Any other question.

R: Just a reminder the Brazilian group has a Zoom meeting 11PM CET.

K- They have a public meeting every night if I am correct, about Iran the peace negotiations on Telegram, there are quite a few of them in there. I attended one of them very recently and it's very nice, very beautiful the way they do the work. Maybe it's good to extend from 5plus1 to the whole humanity, the world leaders, and the group has enough power they can do that.

Any other question

Q: .. When are you going to return to Iran

K- You can ask for clearance when you enter Iran, and the government guarantees you can leave Iran when you enter. (3:08). The Iranian KF has already submitted the application to the government. We have to wait, between 30 to 90 days ..

(3:10).

Any other question.

Q: .. How can the field of the STM radiate voluntarily over the field of the body of the human. Is it about purity of thought?

K- It's purity of accepting, allowing, that's all. It's understanding I can do that, I can allow physicality to be .. in parallel, (3:12). and not subordinate. If you make the P subordinate to the soul, then we make the same mistake as before, where we superimpose the P over the soul. It's a balance, and how much you can change, you can do it with a heartbeat, .. understanding of the HB the true HB of the Pl, not the HB of the man, you've seen the physical ?/ damage.

Let's see what happens, what we shall do in the coming days. In the first week of April hopefully movement of the first EU into AZ ...

It's not there for you to go and see. It has to go through the process of those who are considered needing the .. enhancement in body, emotion .. EU will benefit by it. (3:14). .. start with American veterans ..

(3:16).
