

430th Knowledge Seekers Workshop; April 28, 2022

(Transcribed teaching part, Proofed only teaching part (:44). .. not complete the rest. need to proof , Key Phrases, words, quick index ..) (Using Elias auto Transcription need to edit it) Excerpts : C14 line of communication ; Chemo for Cancer

Achieved fund raising target of last week, will start in coming weeks to finish process.

Carbon in AA is communicator in U; Different frequencies .

(?? Deuterium in center of every entity in U - line of connection - Is D in center of O, for example, basic building block then PI added to it; How does a PI make separation - if all built out of same stuff - The PI of D must have a special intelligence that gets covered when it becomes a different PI ??)

Indian Yogis who change breath to stop eating, breathing, only on this planet, not in U, not on moon, KF teaches how to survive in U.

Brazils nature giving, different than Africa and others;

Why we feel good in nature

Chemotherapy with KF technology 100% treatment for cancer, won't come back acts like vaccination.

About spiritualism ..

Mr. Keshe's experience with fortune tellers .

History about some reactors

Eindhoven center shaped like UFO

Recoating Nano materials - get different fields

KEY-PHRASES:

SUMMARY:

ENGLISH TRANSCRIPTION:

(:21)

K- Yes. Good morning, Good day to you. As usual, wherever, wherever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. Worldwide, we welcome you back to the teaching is nice to see the transcripts being done English some things. But it's nice to see the transcripts, (:22). but we make some mistakes and changes everything to what he likes. Maybe we don't need instantaneous transcription to these transcripts I've corrected, because now it stays on the screen. If you'd like to switch off the transcript, if it's allowed, and then other people that you will transcribers won't do that in a background recoup as possible. Because there's a lot of mistakes in spelling mistakes on the screen pocket.

K- Thank you very much. That's why the teamwork transcribers in Philippine do for us to go through this and correct their mistakes. And then they added on. Thank you very much. If you want to write out the last piece. Okay, that's good. First of all, I would like to go back to what we started early last time, we have achieved our target. Thank you in which to so many of you. We had another hiccup in past 48 hours. With the help of one of the Knowledge Seekers thanks to him. We are sorting that out, and the process will be completed. Hopefully by next week. It takes us time to get these things done. I think many, many of you are small donations to small loans to large loans. We manage to reach the target, but we had a small hiccup or a big hiccup which we could not resolve. Then I asked one of the Knowledge Seekers who's been solid behind us to help the situation to elevate it and he immediately responded without more or less a second optic. I thank him personally, and many others who have been there to see this process through. We've been told we should achieve our goal where we started, where the Keshe Foundation was put all his support financial resources in past six to eight months to achieve this is important for us to get to this is the basis of international One Nation, One respond planet. We've been let down by one of the Knowledge Seekers very bad name, but that is was to come to test to understand. But on the other hand, we're not always got tested, we achieve what we set out for. And as I said, once the funds are returned to us to start our program, or the Knowledge Seekers will send us the donations as a loan will be mirrored back. We will announce the list of to donate as long as you don't want to be known. And what was put on what was given in return. We have a solid back was behind the foundation in a background but so much in the front has been without solid and he's made sure every things we ever needed was there to be done it When putting everything he had on the line, I thank him personally. And it's for him to one day and knows who he is, we have solid backers, those who understood the knowledge and understand what the knowledge will break. In this process, hopefully, next few days or a week or two or whatever, when we solve the new problem, which hopefully is hold the best part this morning, will allow us to plan things out again, Keshe Foundation does not disclose his plans for it to be stuck. But we you will see us emerging, emerging in a very big way. So, think of his own international structure takes time, we have other set consulted many groups, many expertise. And we have made a decision in how the Keshe Foundation wants assets as a joint venture received and that buying new we plan how to do it. My idea is very simple. We have experienced, we went to the Knowledge Seekers, we trusted Knowledge Seekers, that they can do everything and we found out in Niger, or they call it in Ghana. And then in Italy, we have Knowledge Seekers are devoted and also not anonymously. So coming down, rob the foundation, and also pretend to be the Knowledge Seekers. They're coming and rub the foundation of millions and millions and those who have been inside helping them telling them exactly how to rub their illnesses. Keshe Foundation has been a very clear decision. We build the institute's and we bring the Knowledge Seekers, an expert team in the institute will advise the physicality of how to build the factories physicality of how to structure the new research and development. But running of the factories running of the research centers running of the management and commercialization will go to international organizations and companies without knowledge or less analysis because we're expert and the groups and the companies we

have brought in accept them to be in that position to be employed in that capacity. So, we have separated the knowledge on the management altogether.

The new management has no clue what the Keshe Foundation and GANS technology space technology is they know how to manage it to efficiency has to be a Knowledge Seekers know where the knowledge has to be and not they make decisions or correct where all the time, but that makes investment decisions and somewhere between the two the factories really set up. Hospitals will be set up the institute's will be set up in conjunction with a management, international management and the Keshe Foundation Knowledge Seekers. We think this is the best way for us. And we have started this process. So, when we start this process, to be very clear, transparent, one of the leading what we call human resources, companies in the world has been engaged to see this through, you will not be employed through the Keshe Foundation anybody comes in to employ to me as one of the largest human resources agencies, who knows the headhunters they know what they're doing, in setting up everything from the cleaner on the floor, to the heads directors and CEOs. This allows the Keshe Foundation to concentrate on what is good at research development, bringing new concepts and new technologies and running of the factories and the rest will stay with a international team of management or subsidiary Marguerite will be supported extensively by the Keshe Foundation, as we are the shareholders in arranging with the new CEO and the directors of the law. We see our work solid will support the Chinese operation rapidly as to bring disposition of the record work. We had to put everything on hold, we could we could not support 234 Or five projects at the same time. But see this merger of the what we call growth to be done. Now. Now we have hopefully achieved that. Now we are back with grappling with in Chinese. We are committed to the Chinese government. We are committed without doubt expanding our work in Beijing in Xinjiang.

We are committed to the work of president Xi, he has a vision, which is our vision, he has a global vision to bring peace and prosperity, (:30). but with a solid strength of knowledge. We have reached out to the government of Israel to create a condition of peace,

And we hope, the new prime minister of Israel will respond favorably as we have seen, in attempt to do, or contact, we could not negotiate the best, because we knew now why, as he used the reactor of Keshe Foundation to say saving a nuclear bomb. That's why he was ashamed to be found out. Now, he's found that there is no for his allegations, we see a massive peace opportunity in Ukraine. The investments of the Keshe Foundation will go mainly to do what is mainly has been brought out of the situation, Ukraine. You look at Ukraine as a massive disaster, I look at crane, as a massive opportunity for humanity change, of course, in many, many directions, let me explain to you why. Then you understand in much deeper how we think how we are. And what we see with our new process, once it goes through will bring changes. Ukraine and Russia, especially Ukraine, is one of the main manufacturers of the base fertilizer material for the whole of western Europe, or most of the month. With the situation which is coming in Ukraine, we see huge increase in agricultural product because the fertilizer has become very expensive. And at the moment, very hard even to attain. The way I look at it, the way we are

investing and the way we'll go, the new CO2 capture systems centers, in cities like that are is like Los Angeles, in places like New York, or London, or as we open more and more of these become the center that each nation produces is optimized and natural byproduct. Now we can see how we look at it.

MT Keshe 32:17

Using the opportunity, we will concentrate will discuss with you what is our target in the next few weeks that it will not come. Ukraine will not be able to come back into operational for at least two years. We have two years gap to show the new technology, new way to create products without all the side effects. There is a huge gap in our market and we see it it needs more 2 billion investments in Keshe Foundation has managed to secure works that we can allow us to bring these kinds of things out. There are more opportunities that we agree. We're standing there, you look at it as a war. I look at it as a point when the two conflict, what is the benefit for humanity. We seen that Vatican is pushing very hard in Ukraine. And we see Washington is not relented. It's sad to see the loss of wives said many years ago, many months ago, we will see local skirmishes. Ukraine is contained in Ukraine. But even though it's creating mayhem, and the mess in the country, is cleaning the path when the future of mankind to be we have seen many of you are worried about what Ukraine will not go much far. It will stay in a position which is this was a test for the.

MT Keshe 33:49

Loan will become an international accepted market. This was part of the plan of the Ukraine to bring bricks into operation. And bricks now functioning as the Western Europe cannot pay with dollars and the rest. They have to buy Global's they have to buy in, they have to buy the brick currencies and brick as one structure has enforces well as a international organization in the past few days, past few weeks. So we can see the advantages when it comes. The backing of the dollar has fallen. The backing off the Euro has fallen. We've seen Dollar and Euro reaching more or less parity, which hasn't had what over 2030 years. This is crippling you what's called the European nations. But we have to be there as a new technology to show the new ways the new understanding. This has brought a smell of change. And this is where a Keshe Foundation concentrates to be there to create new conditions to change up the course. What I called To the plasma revolution, for the brigade coalition, we have received enough support from you to be able to do it over the years. And now we have the stage further in making the international stretch. In respect to this, thank you all, for your Rapid Response last week, we still need help is not finished. Once we receive what we paid and came to agreement with, then we inform you, but it doesn't mean just now we raised out of the help of you for a week, everything stops. I have supported out of private accounts private financing, for past 20 years Keshe Foundation, and never came to public to ask for it is there if you want to. Just because we do a small part doesn't mean the support has to stop. The foundation needs a continuous support to be able to stand to be independent. All our companies, all our factories will be 100% owned by the Foundation does no matter how big your support in the background, which means nobody can dictate our operation, nobody can dictate how well the way we develop this technology. We're still on target or June flight system. Hopefully the reactors the final best will be completed in the next few

days. And we can refuel to start testing. We are ready to keep to will be set. I think especially John that he's been there to see everything done. That is all it can be parallel to Austria will bring the systems on I think our team, especially in what we call Austrian backing with Klaus and others in the background, solid nice standing to making sure that everything goes on. We have make anyone else want to all of you to know Keshe Foundation with the limits of the management team. In Austria, we are opening the Keshe Foundation division center on Saturdays for workshops. This should start from the first week of June, these workshops on how to make pottery with GANS in it, that it can create everything you want from it. paintings were the application of the GANS, it's a sculpturing, with applicational guests, making perfect GANS systems, making perfect Magrav systems making and using the technology in agriculture.

MT Keshe 37:38

We expect these to start from somewhere around about fourth of June. And this will go on as much as possible every Saturday, maybe sometimes on Sunday, we have ordinario, who's been backing up to Keshe Foundation in German translation for years to run, the exhibition center is there and we are taking booking in new, what we call email has been created for you to book to come in, to be there to see and to learn and to expand, go to the place which should be on different channels of the Keshe Foundation, to be able to book yourself to go to the exhibition, or book yourself to be part of these workshops. So these workshops will be space level technology development, we announce it, they have put the price of 300 or 350 Euro, or the what we call for the workshops, and you can book in advance maximum capacity is about 15 to talk to people. And in a way, when you come you'll see the exhibition, and after that or during that but there's something happening you're cooking the pot or you put something in the oven, lunchtime or in the afternoon or somebody would take you around as you came in for not the what we call the workshop, you get the tour of the exhibition as the understood, we see this as essential to be able to spread the knowledge and in the future plans this will be done in a very extensive way. So have you been through the exhibition if I'm there always trying to come and say hello. And if we are in a capability to expand this to other positions or conditions we will do. This is important for us now that these workshops run primarily by the Keshe Foundation and kept and looked after by KFSSI. Our management team in the background has been standing behind our solid onemain in China to lean in China, Bella Stanley and the rest the whole team of the Keshe Foundation worldwide. In Arizona we've seen relentless work on John we've seen Raphael be seen our team in Mexico. We've seen this look call Lisa and gym in Australia, we've seen the Philippine team standing solid behind we've seen Alex in Nigeria standing and solid trying to carry on with the work he started some three four years ago, the work does not stop we see Alex in Canada and the commit American team continuously expanded in work, we see new certain Tara with a backing up the what we call the twins are that has the keeping the back end of the reading teaching online plus the factories which have become a center of production and export of the Keshe Foundation materials. Very soon, all depends on the maglevs you will see as you order will be manufactured in the battery into ha we do not need to produce much better to be in competition is much practical to make it the way user has done. They have moved into a new premises offices has changed, expanded, and factories on the same way. And this is what Keshe Foundation is. It's you. And it's us as you. And this is very

important. Last week, we had to come to you because it was crucial. And you stood by us as you've done for years. And hopefully now we go through the new phase, we are not looking at what happened in the past, we are looking what the future can make. I see a lot of positive moves in Ukraine, I see a lot of positive moves. What's happened, it's in Saudi Arabia and Iran, we see a lot more in Palestine. A beautiful decision has been made by the State of Israel to communicate an open and break the previous open that everybody can do with Islamic world is taking time to textile. And this will bring a lot of food. The first meeting in Israel, but other nations Arab nations in the parliamentary level brings a lot of good time. We invite Iran to join us. Iran has to join us, while serving in leadership, find a way to bridge the gap between Tel Aviv that we need to bring peace but peace comes out of the work of the Keshe Foundation and in nations when we can deliver the technologies that can bring the change. I thank you a lot. You want to talk to us in past few days, past few weeks, and you're they're solid. And

MT Keshe 42:39

I said to other Knowledge Seekers in past few days, I wish I would have been to the foundation long before then just doing it on my own backing it for years, step by step. But the last step counts and that's last few 100 10s of 1000s which we needed to breach because we use our resources may change. We tell you as it happens, I will tell you, we will open up books that the others can plan to sabotage we tell you what is happening as it happens, that you can support us to achieve what we are going to achieve. By thank you for last week support. Still support is not finished is 7 billion children to look after. They're all law teachers, and they have their own questions. That you pretty much said what you've done to not stop support. We are not here to charge to make a bill you will not see any Keshe Foundation churches and mosques and whatever and temples are temples without institutes where we deliver knowledge That's were is should be, the temple of God should be, the knowledge of the creation, and not the muse of the ?? created (creator) . Thank you very much. (:44).

(proof teaching ..)

Teaching starts:

C14 Line of Communication (44:00 to 1:28:52)

We go ahead with teaching, and we start another process of the teaching. You heard in the intro, Rick said to me, can I play this intro, I said yes, because somehow it's connected to what is going to be taught today. And as usual, I don't know how he gets it, but he gets it right most of the time, to produce the right intro for the right teaching.

In that process, we go back to part of the intro. We spoke about the soul. We spoke about the Soul of Physicality (STP). We speak about the magnetic (M) field connections. We've done this partially in the past, maybe we put a new light. Many of you who are making MaGravs, many of you who are trying to make systems, make a sense of it. Or maybe you're looking at it, with a what I call, a new eye, a new direction.

In all our teachings, we speak about a connection between the Soul of Man (STM) and the Soul of Physicality of the man, and the physicality (P) of the man. One question to ask you is, how do they communicate? How does the soul of the earth communicate, and stays in touch, in a M field strength, with the other stars, with other galaxies, with its own mother planet? Or with its own mother, what we call, Sun, the creator?

How do galaxies aware and carry the information? Where to be. How to be. (:46). In which direction, that I can move? How do we get the clashes of the stars and galaxies together? In a way, how does the universe (U) communicate?

What is the bandwidth? It is not there, as you're sitting in the car, and another car comes and you go beep, beep, on the horn, Don't come, I am coming. And if he doesn't hear, you clash, A Galaxy cannot beep, beep, and horn to the other galaxy, I'm coming. Can you keep away? Because we are mayhem, you started somewhere else, with too much speed, you might crash? But how does? And how do universal systems interact with each other?

How do you in the plasmatic condition, but in the matter state, for you to better understand, when you put a magnet on the table, informs the other magnets, that I'm here. Who wants to join me, you jump in, or who wants to move away, move away, that I want to keep this new position.

In the body of the Man, we always speak about amino acid (AA). In the AA of the body of the Man, we always spoke in all our teachings in a very simple way, that the body of the man has a combination, a simple combination of CONH, or a lot of you like to call him "Mr. COHN." (:48). This character, this structure is applicable everywhere. You need the line of communication. You need something to hold to. You need something to create, to release energies, and you need something to store the energies.

Why do you use nitrogen fertilizer, because nitrogen stores .. the energy (is the storer of the energy). And when it comes in touch with the amino acid, it delivers. And you get a plant to grow. What happened in the other processes, of what we call, amino acid.

This one is the gravitational (G) field holder, to keep everything together in the structure in conjunction with other cells. In the what we call, galaxy work we call it a black hole. In the universe, we call it the Central Universe line. Nothing has changed it's the same structure. In the universal language, the universal work, we see the same. We have a source of energies, which these energies allows the particles, as they release themselves, energies as what they don't need to create motion, and field of existence for the rest of the galaxy.

But the most important part for today's discussion, is this little chap (carbon - C). In the body of the man, the amino acids, the carbons are line of connection between the amino acid, and other AA. They carry a strength, that in the spectrum, can connect to any combination. We use it as a sugar, we use it as any other combination of materials we

need. Without a C, (:50). without a condition of the C, we do not have, what are call, connections, we have no line of communication.

So when, and as we become knowledgeable of the universe, to be added to us, we have to understand, what this little child (C), does. How does it behave? And how come in one strength works in your soul, in one strength works in Soul of Physicality, and in one strength works in what I call, matter state, or manifestation state, the body of the Man, in a Gans state. And in another state becomes the matter state, as in the bone of the man, line of communication.

The carbons don't just pile, sorry, the calcium's just don't pile on top of each other, to make a bone, your bone and everything else, and be in the center of every cell you have. They're organized, they have a strength of the C even ??? So how do the universe where you have the soul in the other direction, in which carbon level of the U we work? And is there a carbon connection level with the Creator? Is there a common ?? .

Is there a need to understand, which frequencies to listen to. You want to listen just locally, listen to the long wave (matter state). (:52). You want to listen to around in a better distance in the medium waves (STM & STP). Or you want to go and get as much as you can go far, you go on the short wave (Creator). Then you have the others, FM and the others, and the others.

We have to understand this, to be able to work. If you don't understand this structure. As I see, none of you up to now, have understood. You're in a big mess in your work. Go back to something very simple. You make, all of you is funny looking things, lot of springs, twisted wire called, MaGravs. None of you succeed, and I keep on telling you, guys something you're missing. None of you understand. What are you missing?

Energy doesn't come to if you don't show it where to go to. You cannot have a water on the plant, when the hose is lying on the floor, and water tap is 20 meters away. Water doesn't jump from the tap into the pipe, to the plant. You have to connect the pipe to the .. the tap, and you have to direct the other end, to the plant, to receive the water.

You have the plant as MaGrav, you have the tap as a universe. You don't see, we've given you the pipe, but you don't know how to connect it, to get it. That's why you're all in a mess with MaGravs. (:54). We have an elite secret organization, which is run by Jalal, to make a new MaGravs. How can you get rid of thirst, when you have no water, but you can see the glass of water. You have to reach your hand out, to get it to satisfy the thirst.

Where is your connection to the universal field forces, that you can tap into? You haven't got it. You make a twisted MaGravs, you take some wires, you Nano coat, you use this and that. Where is your C14? This (STM) works around carbon 14, and other levels of C. This (STP) works around between carbon 14 and 13. This (Physicality body) works between carbon 13 and carbon round about 12 and a half. And in a matter of state, you have C12.

When it comes to this guy, the Creator, you need a special understanding of what we call, crystalline C14, that is a different knowledge of the creation. So, Mr. Jalal and your team, which I have seen in the background, trying to get this secret society of MaGrav making. Have you sorted out, or tap into the universal energy. Because here (MaGrav coils), you're sitting on C12, you have to find a jump, then your MaGrav will deliver you megawatts of energy. (:56).

Then your system sticks out, and knows where the energies are, to give, and to take. Then you understand, when I explained to you, we've given you one of the most powerful generators. But I give a Rolls Royce to toddler in the cot, but I gave him the key. Can that toddler in a cot drive the Rolls Royce, just because he's got the key, because he thinks, "oh this is something nice to put in the mouth." The toddler is your team, Jalal, and the Rolls Royce you built, but you don't have the key.

You will not succeed, unless in Totality you understand this process (of connecting to different frequencies of C). None of you in past 10 years - 15 .. ever understood this. I went to you in teachings as far back as Deuterium, the building block of C. The building block of in teaching, talking about the Deuterium and C14. In essence it's the same.

What is the essence of connection with C12? How does C13 works, and how does carbon, which is sitting on the line of communication of the matter state of 12? (:58).

Till you do not solve this, you go nowhere. Nowhere in your space T, Nowhere in your transportation. Nowhere in your MaGravs. Nowhere in growing up to cell of the body of the Man. Nothing, because you don't know how to communicate. There's no use me teaching on a short wave, and you're waiting on the long way. You switch and you play the peddle or the knob and you get where I am.

You have to understand this teaching. Then you can connect to any line. You have to understand the process of connection, because if you do not connect, your Mr. COHN doesn't matter in what dimension, can communicate with others and function.

"I made man image of myself," even in the construction of the communication, in a structure of, the building energy transfer, and everything else. It's not just a face. It's not just the emotion. It's the process of interaction and creation and connection ?? it's the same.

So gentlemen, (1:00). you've been making MaGravs for years, and I'm been telling you, you're looking for the peanuts, you're looking for the crumbs, the cake is sitting there, to get to the cake, you have to understand this process, how to connect to universal energy system, that your MaGrav system become the transformer, translator, and deliverer of any energy level, as you like.

These MaGravs creator energy, we never put so many kilowatts, so many as we say, as you need percentage of. One kilowatt -30% ; 100 kilowatt - 30%. Four kilowatts

whatever. Have you noticed? The same machine used 30%, if you use one kilowatt at home. The same machine gives 30% of 100 kilowatts. So this machine can create 30 kilowatt, but you're using a 300 watt light.

Have you noticed how much you have not understood? You tell me, give me a five kilowatt system. I give you the same MaGrav. If you use in the house one kilowatt, you get it, but if you use 15 kw, I give you a five. You have a five kilowatt (unit), because I gave 30% of it. How many the Knowledge Seekers missed something in the technology and understanding?

Haven't our KS who are building these systems, misunderstood the whole concept of, the line of communication, between them and the universe. The interesting point for me has been for me weeks and months. We talk about the STM, (1:02). We talk about you going out and getting in touch with whatever you want to go. Then we talk about the Soul of Physicality of the Man, then these two communicate somehow, and then somehow this communicates with the Soul of Physicality, with the physicality of the Man. Somehow this communicate too.

But what happened? Where did you miss the line of information? How come you get psychosomatic when this one (STM) connects to this one (P), and uses what we call emotion, and then comes physical emotion. Then how and where does this (STM) connect to other souls and U? Isn't this in reality what you all missed?

Somewhere in your body, when you die, you have another dimension to this, which is very simple, your physicality, where in fact, it brings you to C12. Long wave - medium wave - short wave; and FM. (1:04). But because of the structure of the system, sometimes in this process, because you have a common denominator, you still get C14, line of communication.

Change this one in a very simple way to instead of this being the physicality of the Man. And this one being the STP, and this one to be the STM, and this one to be the man in matter state, you ?? both. Play game, and make this the earth (Man), make this what we call, the mater of state of the earth, the Inertia. Make this one (P) the M field of the earth. Make this one (STP), the sun. Make this one (STM), the galaxy, and then so forth. Nothing has changed. We're still in that band width, of Mr. COHN.

You have to understand the knowledge, not become the monkey, monkey sees, monkey does, because monkey never looks over his shoulder to see what other monkeys are doing, that they're better than them, that they have understood, and you call them "aliens." You call them men from the deeper space. They looked over their shoulder, they understood this connection, they understood the line of communication. You cannot go to a party, when you put a tape on your mouth and you cannot speak. (1:06). And the tie your hands behind your back, then cannot even sign. You just walk like a lunatic in a wedding.

It's the way mankind of most of the work of the science has been. Because they don't want to see the truth. They don't want to see the light. They don't want to understand the work of the Universe. We understood how the gravity is. We understand how the gravity works. But how does this gravity fields connects to another star, to understand its position? It cannot be anything but the line of connection of Deuterium or C14, because universe works on these frequencies.

Now you understand when I explained to you, I have given you the most powerful energy system. You all laugh, Mr. Keshe the system doesn't work. But hold on guys. The same MaGrav system you connect to the house, you have 12 kilowatt usage, you get 4 kilowatts. The same MaGrav system you take to your mama's house, but she uses 3 kilowatts, you get 1 kilowatt. You take it to the son who is young and uses a lot of electronics he uses 30 kilowatts of energy, and he has 10 KW. And you say, Mr. Keshe, can you give us a 5 kilowatt power supply.

Hello, have you understood? This one (30 KW), because hit needs more, has tapped into Universal Energy. This one needs less, (1:08). has tapped into the house energy level. This one is working from, what it comes from other electronics and your body. Haven't I given you the 5 kilowatts you wanted. You have a 10 KW. But you have to understand this process (you get only 30% of total usage).

When you need, I give. Good morning, gentlemen. Good morning the whole hidden team of MaGrav system. I watch all your communications. Sometimes I literally roll on the ground. Guys, move on. Haven't you understood? Haven't you understood the process. Now you understand you had a 5 to 10 megawatt, kilowatt energy source with you from the day one, we made the first one, in Tranny, or in Barileta Italy.

But you're still looking at, what I call, AC/DC, human energy. You can tap into terabytes, Terra, Terra, Terra, megawatts of energy in the Universal Current. I'm sure John is pulling his hair out, in Arizona. (1:10).

Why, why the center of every planetary system, every beam, every structure in the universe has a Deuterium? In its amalgamation and division creates hydrogen and Tritium.

Hello, I have to know what is available in the universe, that I can create this position, that I can create what I need. How I position myself as a Deuterium, and sometimes I create the Tritium, that I can absorb energy from the whole universe. What is the function? What is the position of, in a matter of state, extra neutron? Giving energy? Isn't that what Tritium is? But once it gives, it needs the line of connection.

Actually, many of you Knowledge Seekers if you wanted a good MaGrav systems for the home, you should have made a Gans of fertilizer, than making all these Gans's you made. I said, that many times, but you don't listen. Because it's got so much nitrogen in it. Now, tomorrow, (1:12). you'll all be making Gans of fertilizer. But be careful, some of them have a lot of rubbish in it, and you don't need, and it can cause you more problems.

But that's not the answer. Understanding the science of interaction of the fields, is what we are looking for. It doesn't matter if it's called, calcium in English language, "dee da da" in another language, "Barba roo" in another galaxy, and "dee da ram" in another U. Understanding the work, the effect, the need for what energy levels, what it is. Which one holds in, which one gives, which one takes, the rest of it. And which one stays in communication with all three, what to give, and when to give, and where to give.

This is the knowledge, that you have to understand, and I keep on telling you for a long time, move away from matter state, understand the interaction of the fields, you'll find a key to the work of the Universe. You stick to what you're doing, maybe your great grandchild, maybe your great, great, great grandchild, when they deviate from your way of thinking, because you did all the bending, they didn't do any bending, because they realized a beautiful thing. Then you see the understanding is all the same.

It's all how, what level, which energy level, which M field strength you need, (1:14). that you can apply to it. You don't get the donkey to fly, and you don't put a load on top of a jumbo jet to take from one village to another. As we say in English, horses for courses, a flat liner cannot do jumping.

Now you understand the Totality of the science of communication of the universe. Without it you're crippled, without you can go nowhere, without it you are were you stood in the village of the man for millions of years.

But sometimes when you go to sleep, that extension in the back, knows everything is. Knows how to connect and goes for a ride and says, I had a dream. The reality, the process of the creation for the man is as simple as ABC. It's for man to decipher it. It's for man to understand it, for man to extend it. I promise you, if our hidden scientific group understood this, they could apply this, they would announce they have a 5 kilowatt MaGrav power generator of universal energy.

Then you understand your MaGrav System is the backbone of your flight system, because then it knows where to attract, what energies, where to be, and creates your condition of the position. It brings you to the right frequency, to the right channel, you want to listen to FM, radio four, (1:16). you want to listen to FM in a long wave. You can if you understand how to match it. If it is FM, with a mixture of long wave, of it's FM on its own and you just want to listen medium, or you just want to listen tot eh long. You can if you understand, have an FM in a long, medium and every other frequency you like.

It's just that you don't have the knowledge, you cannot do. It's like ?? what I said, I was asked to do a conference, talk in Germany, by the Snyder family. And this guy came as a doctor and showed us a battery, and a machine. He says, I get more out, than I put in, shows a battery, and says this is what it says, 12 watt, but I'm going 30 watts. And I asked a question, "excuse me, sir, why don't you tell the people about the AC side of it, you just show the DC." That was the end of teaching for him, and he became one of our best Knowledge Seekers for years and years.

What is the process of understanding? What do we understand from this knowledge? And how do we go to apply it, to when we need it? Do we need the energy to absorb. We use the oxygen and gravity. Do we need energy to give to stop overheating? We use the hydrogen. We need to find a source that we can rely on. (1:18). We look for nitrogen. But we communicate between all of them through the same source.

And if you look at it, it's a Star Formation (SF) all the time. There's no better SF than the AA of the body. If you have hydrogen on top, you have a nitrogen, you have a carbon, and you have what you call, oxygen. Each one sitting on their own.

Now you understand, I gave you universal MaGrav system from day one. Some of you with a small trick, that you don't understand, and I see you Nano (N) making, you create that connection to the universal energy, and if by accident happens. You say my MaGrav system gets 80% or 100%. Polish people, unknowingly they touched it. I think it's important. And when they went to the ice cream factory, they said that couldn't repeat it. They cannot repeat it, because in production. They made a small, unknowing move, of construction, which tapped into Universal energy.

I've seen two or three people being able to do this, they say, my MaGrav I have at home, I don't need electricity. "Oh, it never happens, it's a lie." But unknowingly, the guy made a condition to tap into Universal Energy. (1:20). When I look at their design on the paper, it's the same as the others. But when I asked him, can I have a picture of the system. I said, unknowingly they tapped into Universal Energy.

You know, we have a beautiful saying in Farsi. We say, the secret is in blowing it. It's the foot of it, foot means blow. A guy working for a master potter for years, putting, making the pots, putting in the what we call, the oven, bringing it back, and always been black, because they always use charcoal. After 30 years the master wants to retire. And he says you've been with me a long time, and you've seen everything, you know what to do. He says, but there's one secret I don't know. It's every night I leave all the pots are black. When I come in the morning, they're all white. If I find out how to change the black to white, then I found everything. And the master says, when I wake up, I just blow the dust off. It becomes white. But he's never there to see that the blow, the blowing of the dust.

But the master knows, 30 years he hasn't understood this knowledge yet. It's exactly like our Knowledge Seekers. Any if accidentally, he would have would have seen the white sits under the black.

You are the same. (1:22). You are the same you make the MaGrav systems, but you haven't understood, and some of you by coincidence, and some of you in a way of twisting your wires, make sure you receive no energy from the U, and you think you're doing so good. If you cannot tap into Universal Energy, you can do as much as you like. And sometimes when you force it, you'll get something out.

But the whole process is to really understand, the process of the creation. One is in reality, if you understood it, your ?? orange (O??). One is your hydrogen. One is your

what you call nitrogen. One is your C. One gives (H), one takes (O), one supplies (N), and one keeps everything connected (C). This is the secret of the creation in the U, be it in the cell of the man, be it creation of galaxies, be it the structure of the life of the Creator and His ?? I made man in the image of Myself, because man works exactly the same as I do. I give, I take back what they don't want. I supply continuous energy from me, and the connection between me and them, it comes back what I need to take, what I need to give, and then it comes on ?? (1:24).

But don't forget in a very simple way, have you ever noticed this? I get 30% reduction on my house, which I used to use 30 kilowatt. I get 1 kilowatt it's not good, you still get 30%. I get 4 kilowatt, it's not as good as yours, but you get 10. Hello .. what you need, I give 30% of. You have a 10 kilowatt power generator.

Your other problem has been, how do I change the speed of the energy, from AC universal, to man need AC,. Sorry, a DC universal to AC man needs in the matter state. None of you will succeed, in no shape or form, in no D, if you don't understand this, and don't understand how to create it, and don't understand how to use it. I want to go to Mars from Earth, I need to know what's happening in Mars. And the only way I have is through the line of communication of the C14 or Deuterium. Or am I still working on 13.75? This is the beauty of understanding the knowledge. (1:26).

This could be Mars, this could be another galaxy. This could be any where else in the U. This is how the M fields of the universe connect, and keep separate. That's why, when you put a magnet on a table, what do you see? A line. One is 13.75, one is 13.76, one is 13.4. But what is in it, structure of the M field inside? What is the secret of creation? Why some of it come this way, and some of it goes that way? How is it decided? How does it behave? This is the story of the M field, the line of the connection to the Creator. I teach you one day, you're not ready for it.

So, I hope you learned a lot today. I hoped, that with the teaching of today, especially the KS group will go one step further, in understanding the process of the creation and the totality. You do not know, if there is somebody behind the door. You do not know if there is somebody behind the mountain. You do not know if there's somebody in another galaxy. If you don't shout at the frequency and the strength, that they understand, and they can shout back, You can ?? shout as much as you like in this room. (1:28).

Remember the story of the dog and the whistle? You whistle a lot, but nobody hears except the dog, because it's in the right strength field, ?? for his ear. As I always said, nobody hears the departure of the STM except the owl, which the noise of the departure is so harsh, that it makes it to cry, and he sings. Do you want to be the dog, that you hear the matter state whistle, or you want to be the owl to hear the voice of the Soul.

You have to find that strength, you have to find that knowledge, you have to understand it, not to find it, because I always say to my children, when you understand you don't need to remember. (1:28:52)

Thank you very much for today, we go to a break, and we come back, and see where the knowledge takes us. Thank you very much Rick, if you want to go for a commercial.

Before we go for a commercial break, if you are artistic, you have an art, which you can use, .. to teach the others, glassmaking, which can use for the .. Gans's or anything else, which connects to our technology. Send a message to the Keshe Foundation, you're given classes in the Keshe Foundation center in Linz. If you can cover your costs, plus that you have an earning for a day. Join us to teach the others the science.

Some of your teachings will be recorded. That it's not only 20 people will learn, will be millions of people who will learn, as the television station is getting extended to go for full broadcast, live broadcast and ?? broadcast in the next months. (1:30).

As I said, the structure we set up, is not just for Keshe Foundation development, the ?? , teachings, television stations and the rest. And what I call public understanding of the technology.

If you're an artist, and doesn't matter, even if you're a professor in chemistry, and you see a structure, you make concrete, you make anything. You say, I want to teach, book your time with the Keshe Foundation (info at keshe.foundation), say, this is what I have, I would like to know if I can teach. Maybe once a year, maybe once a month, or whatever. Come to Linz, or in the future go to our Institute's, and we put classes for others to come and learn from you. We teach you freely, and it's your responsibility to share the knowledge freely to the others. You fall back, then the knowledge gets cut off, and you become a cabbage, just you grow without any sense of direction. Man grows when the man shares. It doesn't matter if it's a state of wealth, a state of knowledge, or a state of understanding the creation.

(Proofed just the teaching part)

(1:31:30)

>>> **BREAK** >> 430 KSW April 28 , 2022 (1:38).

Q: Azar .. there were yogis in the past, and there are still some in the Himalaya, that they trained the body. That has to do because the breath is the soul itself, because if the soul leaves the breath stops, which is the God Himself. So what they did. They oxygenate the body ... if you have a body it can only handle 4 watt light bulb. If you want to bring the soul in place the amount of energy that can go through the body is trillions of watts, and it can burn the body. (1:40).

K- Who said that?

Q: Can I continue?

K- No when you start on the wrong no use carrying on with it, okay carry on.

Q: .. if I die now and you come in the next day .. body starts smell. These people, after they die, they don't smell because they oxygenated the body so well.

K- That's a different scientific field. You don't allow the creation of odor, which is a .. crystal structure. If you delay it, you don't smell it. This is what happens in your nose. The smell is there, but at a different level when you put the O in it.

Most of you if you had Corona, if you went through a severe Corona lost your smell. But you are getting it back very slowly, because the neural cells are gradually adjusting, to the .. lower level, natural level of the rest of the body to be able to communicate. But it doesn't mean that you lost it. If you would have introduced a new dimension (D) of fields of crystal structure, you would have had smells of the new D maybe the smell of Mars, .. Jupiter. We don't lose it, the strength changes, just because we don't smell it at our level strength, we think we lost it.. They do the same, (1:42). when you add O to the body you change the threshold to another level.

Q: .. when we look at the spine, take it up

K- They are different .. totally different processes,

Q: . if these people could do everything you talk about, they could transmute elements, .. themselves. ... this is not a story.

K- Why should it be a story ... The teaching we do is for most of the mankind to reach to that level. These people have already understood. So it's that, something strength. But maybe they understood part of it. Maybe they understood more than what we teach today.

Q: .. They play with the breath only.

K- of course, breath is a natural way of taking food. .. you don't need a digestion system.

Q: Because if you can control it, you see, this is interesting for me. ...

.. a lot of people go to the astrologer, (1:44)., to read their palm, they tell them about their future. But in fact, the future they say is related to the physical body, which is the truth. But if we go to the different level, which is the soul level you can manipulate the future, you don't have to have any faith, what the astrologer is going to say your future is going to be. We act in the physical, but if we go to the soul ..

K- No, no, no I am going to stop you there. Go back to the teaching of last week. When you can go to that level. You don't manipulate. .. when I explained to you, it's the same soul, he knows the story, the father tells the night before. Because it's the same father, he knows where to stop the story, and start the story the next day, .. night for the child, that it fits the story of last night. You don't extend the story. ..

You know in Farsi. How do we start telling the story ..

My son, because we connect it to what it was, and we bring it back to when you can connect to your soul, you don't know. Because you plan, you are aware of what's going to happen tomorrow, or next year, in the thousand years. because you see the whole structure. It's like you, you know what food you're going to have for breakfast, lunch .. , because you plan it. (1:46). The food doesn't need breakfast and dinner.

But in totality I would like to be there. When I go to Jerusalem I become Christ, and then I go to Mecca and become Mohammad, then I go somewhere else and become somebody else. Because I plan it, I decide, when you are in the frock of a man, it is very easy to

change once you're understand the soul. It's the easiest thing, you can even stand in front of me and change your image, that I see Azar as a man, .. woman, .. as a child. Because this is what I want to see. In the world of the man we take photographs, in this D of the soul we create that reality of the existence. You can do it with breath, .. understanding of the emotion of the soul. You can take from what you need.

I can show you a video of the new which are manufactured for .. release. We have managed to create the emotion of the soul within these systems. we watch it we see it, people don't understand, but we know what we have created. But it is you who has to match into it. You go and do, frequency, music, .. with the right stereophonic in your head, find the position of your brain, and there, find the position of the soul in the same position. I put you in a machine .. you wanted to commit suicide, now you are a loving, you don't want ever to finish. (1:48).

When you go to the D of the soul, even the breath taking is, they haven't matured, these people by taking a breath. There is no O in the space. How they going to do it in the space. We teach you how to it in any position in the world of creation. If I take this guy, as you say, by taking breath he does these things. I take him to moon, there is no O he dies. He cannot do the same. But the knowledge you have, the knowledge we teach you the structure of your own creation, you can survive in any position in the U.

You know that song every breath you take, every step you take, I am watching you. Do I need to take a step or do I need to take that breath. Because my soul can take ?? any energy. As I said, the KF T covers all aspects. These people can do 1, maybe 2, maybe part of 1 and 2. But to understand the totality .

I was explaining this .. in 2009 I was invited by UN office in Brussels, UN .. because as you know on my passing, UN takes management, not the ownership, (1:50). of the KF of 50%. This very soon will be transferred to Earth Council and the other 50% to the UC. A guy said to me .. in UN what we understand we have a problem with you Mr. Keshe, even though you are giving the management the running of the KF to us. It's in your constitution and we understand it. He said, at the moment, ... we have about 10,000 to 50,000 people around the world in different cultures. In people who understand the whole of physics, we have maybe a 1,500

Someone who understands the physics the last one we know was De Vinci, they come every 500 to 700 years. He said, today you are the one, and we do not know how to handle you. Because you go across the whole knowledge of mankind and the U. Derek (Red Circle) with me in that meeting. He said, this was the problem because they couldn't see us, they asked us, go for a lunch, and come back in the afternoon, (1:52). Because it's important what we want it to be. They said, this is the problem you teach, you talk, you know in physics, chemistry, and biology, everything else and you can connect it and explain it and it can be understood. He said, we get one of you every few hundred years, and you are in front of me, I don't know what to do with you. We do not know in the UN what you are giving us, which part are ?? that it doesn't become a cause in another place for war and something else. He

said, this is what we have a problem to accept the KF to manage it, because the knowledge is totality.

When you go to someone in Tibet, and you see they might do something. How can they take us across the U. What are the scientists in Brazil have, that we can put to become another part of the knowledge. Here we teach you everything.

Now, you know, as much as I know, in every aspect of the science. Your knowledge is as level as me, and as much as I can transfer to you. And I don't teach you how to change the breath, these people can do. Now, you all can do, if you understand it. But through your experiences on the what we call, preferential understanding, you choose which part suits you. You want to do the MaGrav, you want to the soul extension, you want to do the agriculture, and the knowledge is there. But how far can, the knowledge is not any more to the level of what I can achieve in agriculture. It's now what I can achieve in my soul, I can eat nothing.

That game today is what all of us can do, (1:54). without depending on the other, and another, to not only be satisfied on this planet, on this physicality, but in the others and other places and positions. We're teaching you the knowledge of the universe, not individuality of what could be. When you have it, you use it when you need it. And you don't need to do all of it. Because it's there.

You buy a sub-tool, you buy a shop, a big knife is in the kitchen. You don't use it when you want to cut an apple. You use it when you have a big bone, or a big piece of meat you want to cut. It's you who has to decide what type of knowledge you want to cut, in what portion of it to use.

But in general, if you got to the understanding of the teaching out to Keshe Foundation for past years, you have chemistry, some time you call it agriculture, sometimes called, medicine, sometimes, energy, now in the soul, now in transportation and everything else. Nowhere you get such a diversity of knowledge, because you all had something, in some teaching, you connect it, you use it

Q; .. if you listen to somebody whose ?? birth, can you tell a lot about that person? You can?

K- Why do I need, I see the soul, why should I look at the birth

Q: but how do you see this

K- Come and sit next to me so we. We feel the soul. and we test the soul with the physicality. One of Knowledge Seekers very recently failed drastically.

Q: What do you mean failed?

K- It's not there. It's not there.

Q; You mean the soul is not there?

K- No, (1:56). We know the physicality ?? ?? We know, and we say always, we test how hot the fire is, if it can melt the gold. We test the fire with gold. Because gold was the first metal man ever managed to melt, and manipulate, and that's why it's so precious

to us, it's the first, like a first child. And then we see how much gold we can melt the man, and we test the man through that gold. The greed of the man, is the failure of the man, be it in knowledge, be it in money, be it in the status and the rest of it. When the test comes, it's important, otherwise always looks good.

I cried for that soul this morning.

Q: Thank you Mr. Keshe.

K- You're welcome. Thank you very much Azar for you and your family, for supporting us so radically, and so beautifully last week and now.

Q: No problem ... anytime.

Any other question?

Q: Alexandra., (1:58). .. Whenever we are in contact with nature, in the countryside, or at a waterfall, in those places, with many trees, we feel a peace and a greater contact with the Creator. Here in Brazil, we have the Amazon forest, and we know its value and importance for the planet. So the question is, why do we feel so much peace when we are in these places? Is there any function and importance of the vertical beings, beyond what we already know? And could you tell us a little more about them, their importance and role here on the planet?

K- I think, first of all, you have to be in Brazil. To understand the beauty of the ?? tillage. To understand different strength of the fields of the plants, and the nature in there. You don't get the same feeling when you're in jungles of Africa, even it's green and trees and everything else. You don't get that feeling when you're in Central Park in New York, or you go to Hyde Park in London, still it's the same, still it' green and everything else. I lived, and I've been in both dimensions. When you go to Brazil, the green, the color of it, the texture of it, the emotion of it. is very different. It's an amazing. It's an amazing experience when you walk the jungles of Brazil. You you're in a different dimension. (2:00);. You're in a different what I call, understanding of the nature, and you receive different fields of it.

When you walk in Africa in the jungles, you feel the pain, you feel the suffering, you feel a lot of things in. The jungle bleeds. The jungle is not what you call, is there, but you have a different sense of, to it. It's

Here >>

When you go to North of Iran which is green by the Caspian Sea, you get a different feeling. But when we moved and we returned back to Brazil, I wanted to, to feel that this feeling was a wrong it was something not just just because of what we had the first time when you go into the greenery into the jungle in Brazil, you feel a dimension of giving we where the plants get fried, because they receive everything so beautiful, the position of the jungle the position of the place is amazing. And we are we are in reception of these

jungle we are in in a very different strength in the jungles in these places. When you walk in the environment of the president greener greenery or what I call it's an amazing place is green is not the same cleanser green we know environment is not the colors are not and it seems that they supplied a full spectrum of what our soul needs to expand also needs to reach to understand and our soul needs to be part of and it's amazing what you feel when you walk these what are called jungles of Mexico or Saudi Brazil. The understanding of it emotion have it is different because I feel these are new, these are as I said a spectrum of fields which we lack and we need and we want to receive when you walk in Brazil, as you can see the picture is the photographs taken by us in our two visits to Brazil where we hope that in the future near future will be the center of the Keshe Foundation in Brazil with the help of our team when you when you see it has its different energy levels gives you when you receive the give it your condition and they take from you unconditioned the this

MT Keshe 2:04:08

this Bactrim of energy is amazing

MT Keshe 2:04:24

it's that combination

Rick Crammond 2:04:29

so Mr. Kesh, you're losing your connection there we

MT Keshe 2:04:49

know No. New

Rick Crammond 2:04:59

Hello, Mr. Kay Share is getting hard to hear bandwidth problem there I think huge

MT Keshe 2:05:34

Can you hear me now

Rick Crammond 2:05:39

barely it's kind of going keep talking now there's some kind of interference there with a bandwidth

MT Keshe 2:05:53

the Amina

Rick Crammond 2:05:55

so better now yeah I think the sharing might have interfered

MT Keshe 2:06:00

No it's somehow our main center was

MT Keshe 2:06:24

okay can you hear me now?

Rick Crammond 2:06:30

Yes better

MT Keshe 2:06:33

sorry we're trying to share with you the world recall per se in Brazil the color of the shape the color of the plants the shape of the plants are totally different than Africa. Africa looks like taking Brazil gives and you feel that giving somebody is microphone is open Rick, I can get all clicks. And this this process of understanding of the fields of the universe, it's important to us is the same. What would you do when to when you go in sub seeing physicality of a tree? The universe and going into a jungle and getting a mixture of physical What do you call it field strength? What would you do? How would you enjoy them without actually seeing a tree? How do they affect your emotion? How would they affect your soul? How would you affect your physicality would some of these conditions in the space like the jungles of Amazon or jungles of Brazil brings you to manifest yourself in the dimension of physicality because the joy so much they're like your child you know you just jump out you want to be in this area because you enjoy it you become playful in the in the playground of the new dimension. In the future mankind will see and feel these emotions these feel the strength WC when I go travel around the world, you you look at the beauties I look at what fields I can give and I can receive in that environment. I do it natural is something which I built I don't listen to the trees as they say what they say I look at the emotion of the environment what the tree has created what does it mean? What does it contribute to the rest of its environment? What does it won't condition doesn't create the other plants would like to manifest themselves in when you go into jungle when you go into an environment okay the other plants not just a tree you see and see what this tree what is planned has accommodated environment created for the others to be created. In a next to that together they show the beauty or they can complement each other. When you walk in the fields where is nettles that it can rub and create your hurt and pain with which you might need it as a pain something you use you look for another leaf nearby, which you can rub it and take the pain away. These two always go next to each other. The Nature gives you knowing the manual software has already created the company just pick the leaf and you walk off Oh use this need that being old, but you have to understand what the plant has gone through to feel the pain of the mat when he touches it, and it takes his energy for me. Nettle is one of the things that we need more than anything else he had so many cures in it. Queen Mary College in London for years about a huge network of departments in research and what things they can it's so important in university allocated a huge department to the understanding of the work after that. But the nature doesn't open a university receta it feels the emotion of the man when he touches me, he cries he creates an environment that another plant nearby is there. I give you to take your pain away when I give you the nourishment you need. This is the way I look at the nature not that I go in I feel good in nature. And it's the same in Brazil. You feel what the political environment gives you and how it does

MT Keshe 2:11:17

this is what is why we feel good. We can go to a park st we stuck with that go just walk to a park. We can go to the Arctic be born plant one tree which is slightly different in this park. It feels so good to vote. Because that creates that environment that will receive the energies fields that we need. Even when we walk in the park when we walk in the jungle, get an antenna

MT Keshe 2:11:51

we are in China, we just do it and they take from us what we don't need so we feel good because it's like just been fed, but in a different level in a different district. As I said many times, then Brazil is another beauty of creation. Every nation every part of this planet has its own beauty. But Brazil and some NGOs are amazing.

(2:12).

Q: Salomea .. I had a dream, wish you and Queen Mary foundation from Romania who was a person which is a medical doctor Creator disease. And for this reason, I sent one in May, to the foundation and to him. And I'm interested if my dream became reality, and I hope that we will be able to cooperate in the field of health with this foundation because this foundation is dealing with hospitals and EHRs. And

K-

I have no knowledge of such complicated scores in the background, Keshe Foundation. Yes. Yes, I don't say this.

2:13:35

Yeah, I will. Maybe I will call this person and I will ask directly. And now I am in directly in line with the president of cash Association from Romania. And

MT Keshe 2:13:53

what is the cache Association?

2:13:58

Bracklesham Burano is the president of cache Association from Romania is a Association who organize your conference in Bucharest

MT Keshe 2:14:09

Oh, yes, yes, yes.

2:14:11

Yes. And Drago shoe Murano is very knowledgeable person and climbs. Buddy and teaching

MT Keshe 2:14:25

Yeah, these things have to be discussed at your level and the team each other. The Keshe Foundation in Romania is controlled or it's headed by Mario's and anything you have or anything in that position communities in many years and we are aware of what is very beautiful what they are doing. But if you want to get anything done between the Keshe

Foundation and other parts in universities, you will have to go through Marius which is about direct access to the management Keshe Foundation decision making, yes, he

2:15:03

touch with Dragon.

MT Keshe 2:15:07

Yeah, but it's, I don't I go the longer the more but if there are such things, Keshe Foundation more or less, as in key countries ahead, somebody will look after the affairs of the Keshe Foundation. And so get in touch with them, put them to do it. And if it is something big enough or something that we got to get involved, we get involved. And usually I don't see this insistence, by Head of Keshe Foundation, and VanVeen handle these kind of things, is the responsibility on the team in the background. Thank you

2:15:41

very much. He already knows about this. We used to talk before I inform him one year ago. Doesn't matter.

MT Keshe 2:15:49

Leave it to them. Because we don't get involved. Thank you very much.

2:15:55

Okay. Thank you.

MT Keshe 2:15:58

Yes. What's the next? Hello, Rick? Yes,

Rick Crammond 2:16:06

yes. Yes. Yeah, he's muted. Now. We have an image that I'd like to show you first. And that question is from our chat here. Let me just get it up again. Back in the chat. Let me see here.

Rick Crammond 2:16:34

Oh, I know it was in already in the q&a. It was from Daniel. He's asking me if I can show this photo. And so photo view actually Mr. Kesh. And he sent it in our last reactor workshop. We talked a little bit about it, I think you'll recognize the picture.

MT Keshe 2:16:59

No, I know. It's somewhere very young. That was

Rick Crammond 2:17:04

fun. Oh, this was I think it was the convention or or interview or whatever that you did in the Netherlands in Eindhoven. Perhaps you had a display there you were showing the everlasting flashlight and you briefly showed the generator system for the Magrav basically, or the reactor. This was like the coil system are something that and you had mentioned you consulted with electrical engineer or something to come up with this

system to to get the energy from from your reactor system. That's the way I understood it at least. So he's asking Daniel's asking if you can say something about this?

MT Keshe 2:18:06

I cannot remember this picture. I happen to see the video section of it.

Rick Crammond 2:18:12

Yeah, I don't have that handy. This part came up. You showed it for just a split second. I remember seeing the video years ago. I think it was iron joven. It was like,

MT Keshe 2:18:25

I know. You did. Yeah, in Idaho. And we showed a number of things which are more or less still the backbone of the technology, but people couldn't understand at that time. And I in hallway was in a way, that presentation became the backbone of showing the Iranian government's National Defense, power and Space Technology The following week. In this, you know, most of you know by now, in this exhibition, we were supposed to show the first flying machine on 26th of November. And Belgium's came to the house six, seven offices, and wanted to see on the 25th on the Friday. They wanted to see my system I took them out, show them the car. The guy said Do you have a flying license says the car stays here. I said why they dilapidated on the nation. Show us how he finds that we can use it. You don't have a license. And then they took all my nuclear materials. They put it as I had a safe as a nuclear physicist, I know how to protect the nuclear material. And they said it's illegal. You have to come up with the q cube you put all your questions, we see it instead of confiscating it. This will show us was deliberate damage. And then when we came to it when we couldn't show so very rapidly, we put a lot of things together, because the tickets were sold, when we came to the exhibition to the tutorial was half empty. And I said to the organizers, why is empty American Embassy has bought all the tickets to embarrass you that nobody came. And some of you who were there, you remember it. And then the following Saturday, on the third of December 2011, we show to show them that you have no knowledge, you better call illiterate elaborated information, that you cannot stop the technology show its power. And on the third of December, in the city of Ghent, in exhibition, for the first time we show the Iranian nuclear based power reactors, and are set for what they did to us last week, trying to embarrass us that there is nothing will show the power of this technology very soon to the west. On the fourth of December, less than two hours later, we captured the biggest American drone ever more sophisticated on the what they call Iranian territory, and landed it and it went public. There was no more embarrassment, there were 100 200 300 Tickets are brought up such a shape that was not what was said can we have our toys back from that they Iran has been superior power in plasma Technology, nuclear and in between. And this is this this exhibition. And when the Belgian Ted brought us to show the power of the technology, and even today, they are scared of what is in this level, Iran in development and processing and technology. A lot of hidden Technologies was shown our so determined to show you cannot stop the knowledge. We showed the beauty box of universe. We showed our heart of things that those of our top level of science could understand there is a change, there's something and then the following week, because we knew what they were doing on Saturday third of December. I didn't see anything. There

was a conference organised by Peter, who then because he was the same as me very radical scientist opening he was showing how the injections are creating, what do you call autism in children. The Belgian government took him to the parliament and tried to tell him he's insane and put him in the mental institute. In his auditorium, we showed for the first time the power of the visual the first time they're hearing a nuclear reactors now is in the center of the exhibition in bins you see 3d.

MT Keshe 2:22:49

And I remember, I never told anybody, I just got 200 backpacks. We didn't want it to go public how this reactor shows what it is. And what okay with at the beginning, I said to Peter, Peter, anybody comes in has to carry a black bag. And when they came in many of you, I know about 150 of the world's total auditorium, there were people standing in the background everywhere. They had a black man who didn't muster any telephone, any camera, anything electronic causing the backpack in front of you. And the only person who feels to have to do it was there because he was reporting to his master, which we checked out two years ago out of this Malaysia and with his government, and they couldn't say what he was going to be sure. And then we went I opened suitcases and we shot Iranian plasma nuclear base reactors for space technology. And within 24 hours, we brought shame to the biggest nation in technology that had the loss of spy and they wanted it back as a this picture springs a lot of pain, how much we have to delay a software to bring the technology to mankind to be not to be in a position of was not to be in a position but maybe man was embedded into our minds is good. We made sure

MT Keshe 2:24:21

this shape to be but sometimes the solar market is not ready for this to come. But it's very it's an understanding many, many hidden technology, the space Deep Space Technology was forming on heart. It's a beautiful place. It looks like a UFO. And it was booked by a magazine for this to be shown and then the Americans went on and then they tried everything not to be shown not to be there. And a lot of other things which I have explained before. They came to embarrass us within seven days. So you'll notice the whole nation state and government backwards you have no knowledge we show you the bucket with us all the other stuff we show them practice on the airwaves and it is interesting anyway interest we found that a lot in the recent past that how actually the master the one who was dictating everything to Turk was with no house the boss all the texts we saw the same thing right across past two years say same boss, the reporter to the headquarters and it's very interesting when you have as they say in English a spy in the gap Thank you very much this units have auto application that he is and these data reported out to be seen to be done there's a lot of knowledge in front of you even today you don't see it in a lot of demonstrations inside. When you go to Linz there's a lot of things in there which I know what it is and even the presenters don't understand what is sitting there, but in the future you will understand

MT Keshe 2:26:34

you got to remember something really interesting is that you have to understand where and what and how to tap into the universal knowledge

MT Keshe 2:26:54

just because you made it doesn't mean you know what to do with it and the whole knowledge a whole science Oh space technology in a way the whole of creation was given to you in two or three simple structures Magrav the see toolbox, the guests the enhancement

MT Keshe 2:27:37

or are the backbone of the whole of the universal understanding of the movement attraction supply division of the fields

MT Keshe 2:27:54

when you look at this picture lens is Manchester is amazing. But you look at these things here. I look at something which I just talked about you

MT Keshe 2:28:06

here. This is where your space plasma nuclear reactor sits. That's the Battle of seed is there. If you go to the left, you will see the call the uranium space reactors, these are made. material comes from South Korea took about six months to find a way to build it. In city of Ghent in Belgium. This is a reputation of this basically actors, a mother and a child. The one on the right creates dynamic, rephrasing and reconditioning and repositioning magnetic field, the one on the left, because it's half a sphere does not allow the change of the fields, but it can allow the change of direction of the motion. In a way gravitational become magnetic. But in in the right one, you get clarity change and climate change and spaceflight is dangerous. So, the one on the left is harvest has no possibility of change of polarity, but it has perceived complexity of understanding technology. Then the field pulls up the plasma create different direction, positive auto clockwise or anti clockwise, descending and ascending and then you create that conditions. If you got the picture of the two white ones next to it. Those are the union nucleus plasma react. Which is useful explosive. It's just next to it. It's on the same bridge.

MT Keshe 2:30:01

When you look at these reactors and can do it the other two years of my life took about a year and a half, two years to build this was in control this very complex is extremely, I've explained many times before complicated structure, you see go outside that complex to bid comes in this place. Here, if you look at these rings, these rings are in different ports have to have the same, if you look at it, it took us nearly three months to be able to make these rates, the pick up information from these things to know what's the condition of plasma, in different layers inside the reactor. This system here, we could connect to different gases and different combination of gases, that we could choose the combination of the gas, in any level, we like, we could change the gas here to create more, what we call ionization. Here, we could change and we we could create, fill the finalization here to pressurize the fields here. Using one of these, which we could increase the power ease and changing the decimal side is the same together we could change the ratio of this layer of gas and the same district of gas and see the swamp like you change the condition of what we call centralization when you use guests and this system a lot these units are just

flying system communication system and you have a picture of the other two reactors on the same bridge.

Rick Crammond 2:32:00

I can't I don't have a picture of that right here trying to come up with one of the earlier pictures

MT Keshe 2:32:08

if I have one show you

MT Keshe 2:32:19

is reactors have a specific field radiation the metal reactors do not perform well we call the plastic reactors because the absorbed energies they create a different condition of the flight. And in so many ways understanding the flight condition is understanding the mixture of not gases, but the fields we create you look what ionization or gases are look for what I call interaction of the fields. And these are the other two space reactors from plasma reactors for space technology. These are sitting next to the other two. You can see them just on the left. I told you it took us about a year and a half two years to build the first two this reactor here was built in Iran Sherita home university in seven days. And a twin was made at the same time. Really the government made every effort possible to reach a test ground understand that the technology and but it took me a year and a half. It took them seven days and seven days on Tuesday afternoon when we achieved the first flight condition. The original reactor I blew the bottom of it literally slide the blow off the bottom up with the confidence I need a new reactor I've done I've blown the top in flight is loaded was Monday afternoon. Tuesday morning I was told the specialist for me to the opposite the research or the presidential office and you discuss and we'll see what we can do so and then later tested that it worked to do this. And I remember what a scientist being advised advisor with me and said you came here to build this spin Do you want to testify to the planetary system and you built it because our target was this one But you built this one to show you can do interact with each other. And it was more or less on the same table as you see here in the lab in Charlottetown. Us We changed the gases in this one and we find we watched, how this one flew we tried, we changed the direction of the what we call the materials, nuclear reactor systems here and we could decide with that which direction useful

MT Keshe 2:35:34

These are what we see as backbone, the present size in the space technology. And if you really look at this picture, if you understand what the structure entails nothing has changed and it's all just elongated to Enhancement Unit shorter innovates now, we extended the dome and this is your enhancement nothing else principle is the same as love putting nuclear radiation and the government's can stop us now we developed a space level fields that nobody can even understand

MT Keshe 2:36:29

and you had to rush

HERE V
(2:36).

Instead of putting nuclear radiation in, the governments can stop us , now we developed the space level fields that nobody can even understand it.

Any other question.

Chemotherapy with KF PI T - 100% no recurrence of cancer (2:37:00 to 2:44:55)

Q: Claudia .. if we did an imaging scan of our cancerous bone Nano layers at the time of birth. .. if we could replicate that in our lifetime, then we could live for thousands of years. Question is does, this T already exist, would it be for all bones, and how could we replicate this as adults?

K- We have passed this knowledge by what I call, hugely, with teaching of the T, (2:38). in the D of the STP and STM, we don't need to do this. You don't need to be ever worried about it, if you can overcome it, and how you can do it. You learn from it. You don't need to create these things. You have to understand, now you have a much more deeper understanding of this science of creation. So you should be able to get it. Or use temporarily the Gans's till you create that condition and the flow of it.

About mid early 2009 - 10 -11, I set you to show the beauty of, or the advantage of chemotherapy. Many of you have a lot of problem with chemotherapy, many of you have a lot of side effects. I set out to understand the material, the function of chemotherapy, and the rest of it, that it can work , does what it does, and then you don't have the side effects, we don't have the problems of it.

To understand this, I bought many animal bones, cow, chicken, lamb, (2:40). and went to understanding of it. The structure of it, the understanding of the totality of it. Very much like how you say, De Vinci used to do a lot of things like that.

It was very clear, that how we can use chemotherapy to take the energy from the cancer, but at the same time create a condition, that the vast amount of energy, which chemo provides, does not do the harm. I developed a patch, what you call, a patch, like a cover for the upper leg, that we could position the bone, the bone marrow, the muscle tissue, the layer over the .. skin over the bone. We put this into test and it was amazing.

We measured the blood cells, white cells, red cells, and before and after the use of this system. We could see what a big change in it. We understood the problem of chemotherapy, we solved it before it becomes a problem, so the body had a natural process of what you call, producing, without the problem of chemotherapy.

We tested it with the doctors and they continuously took data. It was definitely 100%. If you've heard me many times, I support, I am one of the advocates of chemotherapy, if it's used the way we see it, (2:42). and if it's used in conjunction with the technology of the plasma, the way we understand it.

It works 100%, not even 99%, because the immune system of the body takes over, instead of the chemistry doing it, there is no chances of the secondary cancer, and there is no chances, that the cancer will come back, because the body makes the immune system to match the cancer, and then if it becomes like vaccination.

People with this process walk a very, very beautiful life. They don't die of cancer, they might die of other things, they die of other things, because we've seen them happening. They die of car accident, they die of whatever, whatever. But they don't die of cancer, in fact it doesn't exist.

Understanding, and it all goes on that layer, the skin of the bone, that's where the situation has to be handled, and the Nano, it's a very Nano layer, it's very, very much, it's an amazing, that the skin of the bone is, in a way. When you tear it, in breaking (a bone) it ?? allows ?? the calcium come to it. The what do you call it, when it cracks, it's so sensitive. When you fracture your bone, skin gets triggered. But in fact, has other purposes. It has a massive space. It's like a coffee filter. That skin is a Nano layer, coffee filter, which allows certain type of energies, as lymph to cross the bone, and anything which is not needed, stays behind it.

If you understand this, (2:44). we can play anything with more or less, any disease. We built, we tested this with doctors in Holland, we tested this with doctors in France, doctors in Germany went for it. Single doctors, they just tested it. It's a very simple thing. You just wear, you have these kneecaps, that you wear for need protection, they call it, knee support. It is very much like that. And actually makes the work of the chemotherapy, and ?? still working over six weeks, within two weeks you get it. There are a lot of technologies in that sense, has been built on the back of these experiments with doctors around Europe.

(Chemotherapy teaching proofed)

Any other question (2:44:55).

here >>.

Rick Crammond 2:45:02

Thank you. Mr. Kesh. See here, back to our q&a So second question from Brazil this time from a miracle Hello Mr. Keshe Frick and seekers that subject is what we call in ancient science, the incorporation of spirits into physicality. Here in Brazil, in all cities, towns, and even in the Amazon jungle, there are people who incorporate spirits and use this knowledge for good or evil. The question is, how and when does this permission for souls to interact happen? Thank you for allowing us access to the plasma knowledge.

MT Keshe 2:45:57

Spirit is what we call the Soul of Physicality if you understand the fields, which created if you understand your microphone is open if you understand the energy transfers like the

liens we're talking about the jungles of Brazil, then you can interact with it because then you can add to it you can take out and in a way, if you do you get punished to take on it by your own dimension of your office character. This is what I always say. If the people you vote to tell you the fortune and how to do things, why always the poorest the most they live in the most horrible condition they interfere with other people's life they take away because if and if you're so good, why don't you see a fortune today where the jackpot is what number is for next you can become a millionaire you don't need to earn \$1 You get \$2 Seems what other was saying that people in Tibet can do some people become habit energy that they become aware of it that it can interfere with the sort of zeal, but all the physical energy has come to to interact and to balance the body. And so, it depends you want to use it the right way or the wrong way, frozen is a good good place for it as you have access to select more fields due to your environment. And could be can be that and somebody call it the use the Voodoo Buddy whatever the pins or whatever, these are all those who ever by accident came across it and use it the right way they benefit those who use it the wrong way they punish themselves is punished and they create the solutions. Now we know this what the call spread or Soul of Physicality which is what in your physical body holds together and operates is like a frequency. If you know the frequency you can tap into it you can always just do that. Something broadcast on it. So when your job is not to interfere, make it available it is over to elevate us and more and more of you Knowledge Seekers do add to the knowledge you become one of those in generals of Amazon because now you understand it the same as many of you now understand the process of creation you can do a price it incipient power the knowledge is that we can understand it we can scientifically explain it. And some time your spectrum fits in two to four lives the rest you cannot do so but if you've got two or three right the rest of your life and you become a magician or magic I always put myself in the these things to understand how these people I don't want to listen to them but a few times occasionally my life I could let go but see how they connect how they understand what they do also dissolve they can live and some people are very, very good at walking the streets of Rome sometimes well 20 years ago 1979 So I didn't need to make a note in the guy says I want to read your I want to tell you because I have to tell you what I need to Only bunch of things when he gave me a couple of things he said use the security protection and things going to change and he told me a lot because I never met the guy he put a store on a sidewalk was called American. He said nice, nothing just talk. He knew everything I was puzzled about my past I never met a guy and one of future problems and a lot of things he told was more or less accurate and what he predicted was bonus because it's amazing how we get to it, I had the same

MT Keshe 2:50:40

encounter in Toronto in summer those of you living in Toronto this bears or whatever we walked through the street it was hundreds of cars sitting telling our cars or what the fortunes or whatever and my sister so festive I mean have a good laugh and that was another amazing experience with this boy who was setting never met knew a lot explained a lot and she was pretty pretty accurate

MT Keshe 2:51:17

and none of it was all you become a fortune it was very precise to the name to the place to the thing, which no one really you can have if you have a bigger dimension you can interact with more comes from the teacher to the understanding you can interact with every single soul across the universe not just understand how the universe comes. As we'll call it, if you want to call the horse whisperer, they understand the language of the horse understand that feeding. So, you had a soul whisperer you can understand it, but if you understand all of it is important and we teach you to understand how the Cornerstone is to touch because

Rick Crammond 2:52:25

I did find the video with you and the reactors and also I was sent a link to the facility in Eindhoven which is you mentioned that sort of a saucer shaped place

MT Keshe 2:52:50

but it is a beautiful place as looks like a UFO and I know this place from childhood more or less being connected to Philips on Idaho it is a home of Philips International.

MT Keshe 2:53:21

Interesting if you keep on that picture of the einhorn Phillips, supported football team, many of us know this football club. And Phillips plays a lot with the lights. They are mass are playing with lights, they create all the new light system they can light up even during the football game, the what they call it, where the ball literally follows into the goal they can do that they have that kind of technology available to them, they can light up different environments of the football ground they own more or less and they tested and interesting is they test the lighting system on the emotion they create the supporters and a football ground and there is a big controversy in the background how Philips creates a light to create condition for the football players or put opposition and all of it comes from the success and win in this area. eye to me as always a Philips as part of my blood. And I follow a lot of work being negotiated with Philips into technology development, many aspects of content arrangement and years and years ago. And it is interesting to see what will come and if us as a human being would like to travel with this as a UFO. Or you can travel with the direction of the Soul of the Man in any narration universe, you don't need to wait 1000s of years to get something which might give you some ideas in the back on to the knowledge of the future. What happened if you transfer or manage to communicate and rely on the use of a certain position or a structure in the universe within the inspite unit understanding that you can copied make it give you an Sonic that you can travel this point of universe instantaneously. And this is why why? I explained many times that what man sees on the star on a Galaxy somewhere in the universe is what's actually happening instantaneously. If you look into dimension, or the different field strength, or you look at it, as with cameras and dimensional matters, you say the label takes so many light years to come. But you're already seeing light at a time, which happens if you have understanding in a region to see a district. And I explained this many times before, when you have a nuclear bomb, you hear the sound before, during and after. Depends how we're, you're the same as what you see with the light. One told us that the sun is a store, you see the light, like a thunder and the noise comes. Mankind if he learns to travel on the speed of the light of the universe, we'll get to the

place, even though the position of the destination never changed. A couple of days as some of you told me to wait the sun because you're really seeing the light. And most of us don't understand this, we went in a matter of sick. See, the same sort of magnetic fields depends which one of it you choose to confirm the existence. When you see the light of a nuclear bomb, on your way to the way of becoming the physical location of the sound.

MT Keshe 2:57:48

This is what our scientists have to understand. The position of the bone graft hasn't changed as far as scope determines by what we accept as a car permission to travel.

MT Keshe 2:58:04

Going to go to Idaho in this beautiful citizens of Europe has been more beautiful, beautifully done by the Philips international TV. Beautiful service.

MT Keshe 2:58:21

When you have the money to read this, you can do anything you'd like.

Rick Crammond 2:58:33

We have some a few GANS questions here. First one from Dan in the q&a. If I put a CO2 GANS into a CO2 reactor, in the same way as the CH three reduction to get the tridium GANS? Would it remain weathering remainder be an oxygen GANS?

MT Keshe 2:59:00

I don't know how you mix it one of the ways you know you created the oxygen look for drops of water around your system. Look at the level of the water what you this is a problem with our Knowledge Seekers here so passive. You know, when you fill up your GANS CO2 box to make mark to water? See if that the water level always stands on the same level or does it rises or does it go lower? Traditionally has to go lower, if you will, against system on a table and a water level doesn't change and put another box of empty water and you see that changes reduces so it must happen to this one. So if it doesn't happen, it means you're producing water you're producing condition that the water can hold See if you're what's in your box video producing the gas and whatnot in the box which you're just putting in a row stays the same and some of you you see reduction because it means you haven't read the condition of the arm was we have a beautiful Knowledge Seekers in Ireland of sunny in South China Sea and I've done a lot of work with joy love working with

MT Keshe 3:00:45

you see is when I showed him a construction I said now do this and you'll see and he It took him about a few days to make that construction in the garden in a portfolio on the pathway and he was there for months this and he said why don't you teach this to everyone as much that teach they have to understand to do it we you can produce we even measured marked how the level of water in one box moving higher than we put in and the lower says the cash we're making water that we're not supposed to talk to subs

MT Keshe 3:01:41

I love living in South China Sea incendio most beautiful places on this planet is gorgeous.
And

MT Keshe 3:01:54

in that process, we've done a lot of work in this part of the world with him and is very dear to Knowledge Seekers he understands the knowledge or to creation far beyond anyone I know that is more or less synthetics

MT Keshe 3:02:21

and you have to understand the fields strict you have to understand the condition of the accessibility of the fields when you want to create it create Oxygen. Oxygen cannot be on its own in that also condition always leads to creation of what see how what is squeezed? Doesn't what a uses. How is your solidity? How does that synergy works? These are all part of what we call understanding of the Totality. T What else?

Rick Crammond 3:03:14

Okay. Well, further parts of Dan's question was how can I use an oxygen GANS? And I think you've answered that someone in terms of creating water? For the question, if I have a GANS? How can I identify the emotion, the Magrav position and the strength of the field?

MT Keshe 3:03:40

I don't know you have to find a way that is so true.

Rick Crammond 3:03:47

Then that might be

MT Keshe 3:03:50

one of the way one of the easiest ways to make such a thing. Put. I saw another GANS near it, and see how that gas changes and cupula gossip GANS somewhere else. We'll see if that changes the same to or not, then you understand it, get angry with your system and see what the color Ghaziabad what it takes all the gears. You just roll with it. See what it takes. These are experiences you have to make yourself

Rick Crammond 3:04:28

so that's probably an answer to the next question from Dan How does my soul use the fields of plasma through emotions?

MT Keshe 3:04:37

Speak to it. I can tell you

Rick Crammond 3:04:44

it's not for you to tell Dan about that is for Dan to find out.

MT Keshe 3:04:50

As always say the color red I see another color reducing

Rick Crammond 3:05:01

So Dan goes on with another question. If I if I use alcohol in the CO2 Reactor instead of water

MT Keshe 3:05:11

you get the gas.

Rick Crammond 3:05:14

Then what if I use citric acid?

MT Keshe 3:05:18

I don't know you make an alcoholic one. But you have to test and see what you get

Rick Crammond 3:05:31

so it was like an alcoholic lemonade perhaps.

MT Keshe 3:05:35

It looks like it

Rick Crammond 3:05:39

okay from his sannan San has got a question about his hands. Mr. Kesh. My question may sound crazy, but I'll give it a try. I play a lot with my hands. I find myself caught in many flows like spiraling, symmetrical repositioning of the hand, the body or the head, I find invisible interaction points where my fingers and toes reacts together, I find myself pinpointing my fingers and precise positions on my body, my head, and often my nose, which makes me breathe like I've never done before. I find myself making strange noises with my mouth and nose just looks like a blender noise with different speed levels depending on the air intake and rate of breathing. What is the explanation of these interactions? Thank you,

MT Keshe 3:06:35

your body and your field that's as simple as that each position creates different fields expansion or interaction. A simple your body is active plasma, you have more energy in your nucleus. Actually, according to us, it's a body of the man carries a team Hiroshima bomb, which is only magnetic field. So if you push it in one, you put a magnet on a table and move it to another place and bring a weaker magnet stronger magnet, you get different actions. Now you know your body is a plasma. So there should be no such a question. Although the plasmas which are feeding fields interact with on the test sometimes. And it's an amazing test. To to understand your system, if you work with someone I used to put the system right against the heart. They felt nothing. It meant the system is not true. But if they tell you the field someday. But if this is taking the breath away, you know you got it finely tuned perfectly to many of the people we did test with we used to do this because the reactions in the past was made totally different way than that. Systematically, you're know somebody calls you and says Mr. Kesh. This, this, this happened to me. And this, this happened to me. Can you explain and say, did you do this

in that using the reactors? So yeah, so that's a consequence of it. Were the first reactors we created for trials? Many, many, many women would gone there menopause 1020 years down the line. They got it back. And they wish Mr. occasion is on my side. So you wanted to be young you wanted to recover from whether it is this is what it does. We enhance the body. And I always used to say there has been a careful, Grandpa doesn't become a diet. Change the emotions. Now we see it we see the cycle in many many or people that they regenerate because of the intake of foods and other things were starting to open. And he happens to a few but if you understand there's a system behind it, you can do it what do you want to stay that active? Do you want to sue creating children age of 8090 100? Why not? If the body is there and the physicality to support Why not Do you have to find levels on what if it's any other?

Rick Crammond 3:10:18

Oh, yes, let me see here

Rick Crammond 3:10:33

we have a question from Andrew in the YouTube who's got a nanocoat ID coil, that he put a GANS coating on two or three years ago. And now the whole system is dry, and he wants to know whether to renew nanocoat The coils, or

MT Keshe 3:11:00

I don't understand why people read nanocoat

Rick Crammond 3:11:04

Well, he was concerned, because you mentioned one time that to nanocoat, two times to cover any parts that were exposed are still in the matter state, especially with the twisted wire connections of the Magrav coils.

MT Keshe 3:11:22

So they saw the beginning when you do something, not just on the line.

Rick Crammond 3:11:27

Right? And you would do that before the GANS? And yeah. So what if, what if you already coated them with GANS, and so on, can you read nanocoat The whole thing very quick at all,

MT Keshe 3:11:45

you can try you'll see bits coming out samples up, it's like because a new skin, nano layers grow up the top I crack and fall and so yes. But the field now will be compensated won't be the same fields. Right. You might only last time you only got the green GANS is now when we get the transits, but I used to use this because the increase in different fields

Rick Crammond 3:12:21

those fields will be embedded right into the matter level of the material, basically, and just put, again in caustic might get pull off all the outer layers, but it's still have some of that embedded in it,

MT Keshe 3:12:35

where a Korean company uses our technology for production of the new nanocoat. And they literally do this literally.

MT Keshe 3:12:57

You see you understand the science of creation. Then you can make any material for that time and place in the space. And you can always repeat it. I've said this before, when the first I went to to SEK Belgium nucleus center. And they wanted to see the liquids I make. That's all they were interested. So I made them three different liquids. And I gave them a Coca Cola. They waste all of this, can you give us some more I wanted to see if I can replicate. One or two was the replication of the blood of the mass. One was the replication of something else, also replication of something else. And they they measured it, they felt it's about you produce nuclear radiation in a simple bottle. I said because I understand it. And then SDK for now today. Also nucleus center. Before you couldn't if you had any nuclear material from building to building, you have to report now any material with new technology room to room you have to record and report because now they realize you can make nuclear plasma based technology from human water. But they couldn't understand it. How is that thing? That's so backwards? They haven't started yet. But they bring a scientist of this knowledge to understand up to them

MT Keshe 3:14:45

so we call it top 20.

Rick Crammond 3:14:48

Sure, yep.

MT Keshe 3:14:50

Yep. Thank you very much. Thanks very much for today. Thank you very much for all your support. In the past week. We still need your support. We haven't finished it And if we hit on the problem, I don't want to come back. I prefer to be saved and worried and go back and say happened past 48 hours. And I think the knowledge was here at law, or the rapid response, and unconditional. And this is something we live in the same units. See you next week. And hopefully we'll have another cycle of understanding the knowledge of the creation. Thank you very much. See you next time.

(3:16).
