

## **435th Knowledge Seekers Workshop**; June 2, 2022

( Quick Index up to :40 ; Transcription done part 1, Need to do part 2 Proofing ; Key Phrases; Key Words )

(Auto Transcription by Elias)

Ready to start testing new FEU this Monday June 6th;

### **ENGLISH TRANSCRIPTION**

(:22).

(Need to edit auto transcription >>>)

K- Yes, good morning, good day to you. As usual, wherever you listen to this is Knowledge Seekers, Keshe Foundation Spaceship Institute, from somewhere on this planet, as we finished the teaching of last Thursday, and then we went to announce on Saturday, the new cycle of technology and knowledge as we broadcasted on Saturday, the 28th of May 2022.

As we promised, we are ready to start testing on the 6th of June 2022. The structure of this simulation of the flight systems. We have opened the door for every one of you to become a passenger of space. Further, we allowed many of you to come in and go through the simulation to see for us ,to adjust the system perfectly for the ultimate flight, within, maybe some of you will find dimensions (D) in the system. And some of you will find the dimensions in the system.

In that process, what was, and what it's about has been that, you come to Linz and you fly through the simulation system in Linz, and be considered all the time, for every single one of you, for the facts you make, how it will change, and what it will bring in, and what we need to adjust in our system. We did this initially, if you remember, in the Vienna conference, we brought the system in a different way, and we allowed the Knowledge Seekers (KS) who attended the conference, each one a few minutes to sit in system, (:24). and see.

We saw how each one individually controlled the system in a way, and we saw as I said in the teaching before, one of the Austrian Knowledge Seekers managed to stop the heartbeat of the system, managed to tune into it. So, it shows we control everything by our emotion, by our fields. So after nearly two years of launching the Enhancement Units (EU), now we are in a position to test flight. Test it in a simulation of the structure which is set within the what we call Linz headquarters of the Keshe Foundation, where any of you can come in, we don't have a pilot. You are the pilot. You will decide in how you take the flight. We do not interfere.

We create a condition that you are ready to go for a flight test, and we are prepared to take you back when you come off the test. We have built 2 systems as I explained in the

teaching, and you go from one system to another. And then we'll see, in a D of the Soul or D of the physicality (P) and how you monitor.

We will stay in the first two days, three days, are already booked. We only accepted about 10 people a day. We monitor because it's not just for fun, it's for adding to the knowledge, changing systems, that we get a perfection, monitoring how you go through the system.

Many of you, who as I said, attended the American teachings on Sunday night, one of us as Knowledge Seekers, introduced himself that he's been as what I call, a test pilot, through the first test in the system. And he explained his emotions and what he felt in the system. (:26). So, we are going into the phase of the next cycle of new technology, technology which has never been seen in public. Technology which will bring a new cycle.

As I said, in the past few days, I've been to every language teaching nationality teaching, relations of UK, English, or the Americans, the Germans and the rest, to explain in more detail to answer the questions that we've taken all the ambiguity out of what we call, this new technology.

What this T is, is what we have taught you from the beginning. We taught and we collaborated with the Iranian government to make the first physical dimension of flight system. We use plasma nuclear technology, to create lift and motion, like a planet does, The planet Earth creates this, and what it creates, then it dictates what kind of life can live within it. Earth dictates amino acid (AA), which we are used to. And then this amino acid has a strength, this amino acid even if you want to call, it gold has an amino acid. So it has a certain strength and it allows , leads to its creation. And then we have a mixture of everything else.

So we have created the generation of life, that within the lift and motion, creates a cycle of life. Then we had to allow the work of the Universe to interact within these 2 gravitational (G) magnetic (M) field flight system, and the ?? life gravitational ?? system, which is life as we have it.

So if you go back to teaching, in the past 20 years, I actually started long before that teaching, my teachers and my professors, (:28). what I thought now, it's come together. We have brought the knowledge of teaching, and what we taught, together developed a new science from what we call, the science of life of universe.

In the universe, you can fly, you can maintain life in a different ways. And we have explained to our past years, how life is. Life has two parts, has the energy part, which controls the physical part. Energy part, we call it a Sun, we call it the soul. The physical part is the interaction of the environment with the soul, which is created, which has led to its creation. And we maintain what we call, intermediary as we call, the soul of physicality (STP), which is actually the energies of the physical dimension. It's the Inertia

to create the life, in interaction with the environment, which we call it, the physicality (P) of the man.

Now, the knowledge has reached that point, that we are ready to take man to the next step. As I said, in the teaching, I gave many talks around different chat rooms. And I said, I'll bring you correct ?? with me, that if you're not there, or you haven't been to another, and you can't understand the other, you will understand altogether what has been said in past few days, as we expand it to extend the knowledge.

We have brought the knowledge of creation, in totality, in the reach of the man. In a way, man, physical development, as I said, the biggest innovation man had, in the history of man, it was the wheel. Once the man created the wheel, then he started developing, separating from the animal kingdom. In a way, because now he could carry more, (:30). he didn't have the ?? 2 legs, the 4 leg of the animals, which he was relying on. And he, with it managed to grind the flowers down, and do all sorts of things, created the cars. As we call human race in the space, the "wheel" race, because you do everything with the wheels. You fly, you have an aircraft, that has wheels, you drive, you have wheels. Life without wheels is no motion life, unless we put you on a rocket, and you don't know where you're going to land.

In this process, now, we bring the knowledge of universe, which separates, brings an end to the cycle of what we call physical knowledge. Cycle of wheels, cycle of motion, with what we call, something circular you rotate.

Now we go to the spherical shape of energy, we call it a plasma. Stars have a spherical shape, Earth has a spherical shape, because it has a plasma, within it. The Soul of the Man (STM) works in a spherical shape. And as we say, everything has to have a dimension to suit the work.

When you see the Sun, with its size, and the Solar System it creates, you see, you need that size to create what we call, the atmosphere of the , or the plasma of the Sun. You have a huge, so many, whatever thousand million kilometers plasma, in the center, radiates out, and creates our Solar System. It has parts in it. it's emotion, its Earth. its ?? sphere, its Jupiter, and the other one is Saturn. You can name any part of this brain of the Solar System, the way you feel like it.

We cannot fit the Sun, (:32). with its enormity, in the center of the brain of the man. It doesn't fit, and it's too strong. So we have created the same star to fit the size of the body of the Man on this planet, in the center of the brain of the man. So we don't need such a huge plasma of millions of kilometers. We need a plasma of a very few micro (meters), because plasmas have the same energy, it doesn't matter where they are, they work on the same principle. They have access to universal energy, for the performance, for the survival, for the existence.

So in the space of the Universe in the Solar System of us, we need to reduce the system's energy when they come out of the plasma of the Sun, for the strength, as they go further

out. For the stronger fields with the interaction of what bits left in the middle, create copper, zinc and the rest, on the planetary system of the planet. When energy in a way, reduces after so many minutes when it gets to the boundary of the plasma of the Solar System, with hydrogen and helium, which what we see with Jupiter and Saturn capture.

Replication is the brain of the Man. Instead of allowing millions of kilometers of space, we have developed a structure of compressing and taking energy from this center, the soul, the sun of the man, what we call, the brain.

In a way, we could take a filter in, to reduce the speed. And then as we reduce it, we use that energy for different purposes. The inner part goes for the functionality, the outer part goes for, the middle part goes for emotion, and outer part goes for physical interaction.

Where we've seen over years, (:34). we explain that the boundary of your brain, controlling your arm and leg, and in the middle of it, is different kind of emotion, and it's whatever you learned.

So in a way, it's the same thing. But as always as I always said, a plasma can expand as far, and to the limit, that is environment allows it to. Now we said, this universe can expand and then it has a limitation to it. As much as the fields of the Unicose allows it to expand.

The plasma of the Solar System of us, can expand in a galaxy as much as the other fields allow it, it cannot just expand wherever it likes. The compression of the fields allows the size, dictates the size. So in the cycle of man, that compression field of environment to control, to hold, is the flow of the blood. The blood is the controller of the cage of the M field of the Soul of the Man.

Because, as I said in other teachings, the dynamic eye, in a specific position, creates magnets. Man has learned, magnets in interaction with the, what we call, another metal creates magnetic fields, and current, and energy. And this is what our blood does, creates a M field to contain the leftovers of whatever is not absorbed with the brain, to contain the totality of the sphere of the what we call, the Soul of the Man, or the star in the center.

If you understood this, (:36). now, we understand the rest of the creation of our physicality. If we reduce this magnetic field cage, the weakness allows more fields to extend out. This is what happens to us in sleep. The field strength, the heartbeat, everything else reduces by a very, very small fraction, and that fraction allows more fields to radiate out of the brain, out of the body of the man, out of the star of the man into environment. And then when it travels, it interacts. If it has somewhere a connection, goes to that connection, because it already has it. It just creates a communication line with the connection it already has.

When you wake up, this system, as it goes out, it gets back, it interacts with these filters you put in, and you sometimes deposit that interaction of the fields of the star, with the

others outside, with the body. Fields are low to become what you call, a dream, releasing some of the information of communication.

In a way, our brain eavesdrops on a communication between souls, and then it eavesdrops, he remembers. Then you wake up and say, I had a dream. In fact, you didn't have a dream. You were cheating. You were listening to other people's communication. In a way, communication between your soul and the soul of entity. Being a metal, you dream of gold, be it grandmother, being your brother, alive or dead because you interact with the souls. Souls don't die, always interact.

Man dies, man has a cycle of life. The sun never stops shining. So it's the same of the STM, (:38). at the center of the ?? soul. And so if you understand this, you remember part of the is drop you did you became the spy on your soul communication with other souls. And then you say, I had a dream. That Oh, you forgot, you've never been told the truth about the how it works. Now you know, there is no magic. Your dream is eavesdrop of your physicality on a communication between two souls, yours and the others and many others. Maybe you're in the party. Some of the people in the party are alive, still in the physical dimension, and some are dead. They're in the space dimension of the fields, not in the physicality.

You see the grandma who died years ago, and see your cousin were just born two weeks ago. And you're all celebrating his birthday, his birth celebration. Then it comes if you understand this, for us, now, with all the teaching we've done, we have given you the gravity machine. We have given you the most powerful generator as a MaGrav system in the dimension of the should. You went for the crumbs as I always said. And we have given you the dimension of life, which controls in a way, the understanding of the work of your soul, the Sun in the dimension of the man, which we call it amino acid (AA).

here >>

So in this dimension, your magnetic field cage you call it, the blood we can interfere with. Even though you live a normal life, you're awake. If we create a specific field around you, (:40). we can start getting your soul leak, information, get in touch with, and go through the cycle of going to the party, where everybody else is having a party, all the souls, but you're on Earth in physicality. You're left out in physical dimension. But the soul is actually dancing with the others, the aunties and the cousins and the rest, and the grandmother, who passed away.

So by creating a new technology, of the space, an evolution in the science of man, we allow that field barrier to extend. Then, in that process, we have created two systems in the launch room of the Linz. One is in the dimension of the Soul, and one in the dimension of physicality. Because we can tamper with the field, outside your body, we don't touch your body, we got nothing to do with it.

It's very much, as I explained many teachings, you're sitting in the room, perfect, everything is ?? nice. Temperature is perfect. You see the outside, and suddenly outside

gets cold, and you see a moisture on the window. Control of the temperature outside, has manifested the matter state of what's inside, as a drops of water. We control the temperature outside. And then that allows us, for you, for your physicality, to show itself, or extend itself to outside its D.

The man does not need the wheels to travel anymore. The man now has the knowledge, (:42). the science, the way the creation works. You had your time, millions of years. And we gave you a hand here on there, for what we want to do with mankind. When mankind reaches this point of maturity. But man became a little bit mature, and as is usual, became arrogant. And when we gave man technology to take man to space, man used as a weapon, as a nuclear weapon technology.

So we had to make corrections. So we had to bring a dimension. Simultaneously many functions, we set up to bring man to where we want, which is today. We, at the beginning of the talk, as I said, we built a nuclear plasma flight system. This is why we gave this knowledge man, to use the energies of the universe at a very high level, to create motion for men to escape the physicality of this planet. But what did man did, greed of power and money, created nuclear weapon technology. And this is now obsolete.

As I address the Iranian leadership, Ayatollah K of Iran yesterday, in talks in the Iranian talk (Iranian KF meeting). Your Eminence Ayatollah K of Iran, stop the development of the nuclear weapons technology of Iran, and open the nuclear plasma technology for the space. Bring back the pride of the nation, not the shame you have brought on the nation. The same we've seen what the Americans did in the Second World War. They misused the knowledge and the power we gave them.

But we did not stop. Because now you see as the what I call, disgraced, Prime Minister of Israel, used the plasma technology of Iran, which developed by the Keshe Foundation for the Iranian scientists, as a nuclear weapon, (:44). and brought more pain on people. But in a way it's needed, for man to learn his own stupidity.

But nuclear technology was brought to man to understand the fields, which will come on the development of this technology, man will understand, what the beauty nuclear technology has, what opportunities will create for man, that man could never ever dream. Mankind leaving the weapon technology and concentrate on a plasma space technology. You'll see the most beautiful live, even if you understand nuclear power in a higher level, which is not open to the man, is the pathway to the Creator.

But as usual, men messes everything up. Now we still are correct it. At the same time, we had to create a communication line, that we could speak to every man, in a man's way. As they say, it's a man's world. Man made the car. But we, in the process of knowing what is to come, we allowed, we brought the technology you call, communications, mobile phones. If you thought man was so intelligent, to get that on his own, you got a long way coming.

We brought man to that stage, that man could understand communication through M fields in a different way and form, that it's prepared when we bring the totality together, to be able to locate itself. On this planet, you use what we call, the satellite system, you use whatever frequencies, (:46). or whatever you like, to communicate with each other.

We have the same structure, once the man become knowledgeable, in the universe. In a different ?? scale, without any of these satellite business you have. M fields if interacted, become communicators of each other, replicators of each other. And this is what man has not understood.

So in a way, in past 100 - 200 years, we set out to bring man to understand many things and make everything physical, that he is happy he's done it. And as we gave you a leg with a nuclear, we gave you a leg with communication, now we give you a leg with transportation, in the D of the Universal Community.

I need nothing from this planet. The wealth I carry is more than what this planet can ever offer us. We don't need the wealth of a few thousands or millions. But it's the way it man ?? thinks and we spend the man to learn to be detached. We learn, we do that for man to be able to go to the next step. Now, we have created you, the first, the very first, what I call, cart, when the man got the wheel, and stuck something wood on it, and sat on it and attached it to the horse and or a donkey and you start rolling yourself. Now I can move.

The system you're giving you is literally cart stage, but you have to understand how to make the cart, and then later on you can develop it to motorcycles, and what I call, the Rolls Royce. Is up to date, and the most fast races, are cars, and everything else.

In that process, we are there to give you a hand. The new systems in Linz are that helping a first hand, for man to go. (:48). The what we call present satellite communication, the mobile communication, in next few years will become obsolete, because man will move into the dimension of the communication of magnetic fields, which any of us who had the beautiful NASA with all these things looking into deep space, nobody has seen satellites between the galaxies or whatever. Because it works with the norms of the interaction of the field.

With the new system, which we have launched, as of Monday, for you to come in. It's for you to start learning how to allow to reduce the strength of the cage, to allow, to be able to interact with others in the dimension of the universe. And then, if you like we create a combination of the fields, which allows you, to allow this what we call, connection to be traveling, but where you want, you can take one of the rays, and give itself physicality.

In a way the Soul of the Man become the reservoir, and the river, because the line of magnetic fields and if you like you have a cup, collecting the what comes from the reservoir, and is manifested as what is in the cup, that water can go into the kettle , that water can go into the pot, that water can feed and fill another fish tank.

So it hasn't changed the characteristic the what we call, reservoir, the Sun. Now you still have the reservoir, but you manifest itself in the pot. So you behave as you are the source, now that it's more of you in the pot. (:50). So mankind can be in the system, but manifest itself in another point in the universe, another place, and in a way, if you make a cycle back, you can bring the water back to the main reservoir and you come back home.

So, with the new technology, what we talk is a reality, is what mankind has to learn, that the reservoir is within the Soul of the Man. We allow you to create that, rivers to go out. If you go out in the dimension of the ending up in a pot, we'll see you as a water in there, or as a water in the fish tank, and we can always suck it back, connect it back and return the water back to the reservoir. When you come home, and you say, I was a fish tank. I was a water in a cup. But what do you say, I went to see mom. I went to the party. I saw the grandmother. Because now that knowledge is available to man.

And then, sorry, the grandma was alive, but the mother was dead. You see all of them sitting and kissing and cuddling. The grandma gets you a glass of wine, and then I knock on the door. You have to wake up, or you say, I have to go, I have something to do in my physical dimension. You come back (to the physical D) with a glass of wine in your hand. You got it from your grandmother who was alive. If you know what to do with it, you manifest back in the system with a glass of wine in your hand.

The mother gives you a bar of chocolate, the chocolate you always loved, because she bought it for you from childhood. You come back with a bar of chocolate, it was not given to you in the dimension of physicality. No, no, no chocolate bar (because it did not come from D of physicality).

In a way, for the conversion of the fields of the matter existence, (:52). we gave you the Matter Enhancement Unit, the material Enhancement Unit, was in a way to get you used to, in a way, you can create matter. We did this with the help of Knowledge Seekers in the lab of Austria years ago, and we showed it. Our team in Austria sent these materials to be tested, what it is, what was captured, what was converted from energies.

In China with the work we did, we created water, and we could see it, because now it was another dimension. We knew what we were working with. In others we created emotion. In others we removed cancers. In others, we did all sorts of things over 20 - 30 years of research.

Now, what we're asking you is, come to Linz as many as you can, because we have to complete this cycle for man scientists to understand, to be able to complete a safe physical structure for man to travel the span of U. But don't forget, when you travel in the dimension of the Soul, you have no physicality, but you carry your physicality, because you manifest yourself in other points, because the field overpasses your physical body. Everything in the body gets fixed, because otherwise the star, the Soul of the Man cannot function. It got mishaps in the middle. Be it the cancer cells, be it Alzheimer's, be it a piece of shrapnel. All has to be with the new strength to be adjusted. In a way to amalgamate the energies back into the star, where they actually came from. Interaction of

the field of your soul with physicality dimension magnetic field of inertia has created the tumor, (:54). has created the depression. One ends up in interaction of the matter state you seen as a tumor, and one ends up in the matter of states of depression, emotion, tumor.

There is no difference. One has a physicality and one has the field. And in this process, when you land on the other end, the new space travel system, you are a perfect man. We are not offering you Med Beds or Bed Meds, or whatever. We are offering man, a new method of transportation, a new method of being able to travel the span of the universe. And in that process, we are teaching you to start learning step by step.

When you take your child to school, you don't ask them to write an essay about Shakespeare. You put a pen in your hand, then you allow them to draw a small straight line, small vertical line, horizontal line, how the curve is, when you give them a piece of paper to repeat, to learn. And then out of that curve and straight line, you teach them A,

and then you say this is A, and then the B, and then you teach them how to connect A to B, to make a "BA," the rest of it. And now we brought man to that process. Forget about your achievements, "oh, we have a nuclear weapon technology, satellite controlled supersonic bombs," have no value. Haven't you seen the scrap. The most advanced weapon technology of man to kill each other? Is it just a heap of a scrap in the knowledge of the man.

Any of you goes in the enhancement unit (EU), (:56). and his wish is to expand the fields of nuclear bombs, you will do that, they become obsolete. I have told that to the Americans and Iranians for years. I don't need to do anything, I just expand the fields. Your weapon technology has no work. You all have seen how easy it is.

You put your wires, beautifully copper working between two plays, and after a while it gets black, it gets plasma Nano coated. All I need to do is to do is to create a condition that all the microchips of nuclear weapon technology get Nano coated. No connection. But we allow this to happen, because man has to come to the point of understanding there is no power in killing, there is no power in ??

We test you extremely, extensively. Every, all those who claim more sincerity, we test harder to see, where the gold melts with the fire, and when the man melts with funds, with money, with power. Now we see, one way or another, sooner or later, we find the limits of the , and we know we cannot go any further. The point of containment is done.

In this process, now, with all the technologies, which have been provided to man, we start the test. You are the pilots. As I said many times, there is no control room in this flight system, there is no toilet, there is no kitchen, and there is nothing, nothing else. To see it, very, what you call it. Do you remember I told you, you get the, when the man first found the wheels, he put a piece of wood on it, (:58). and suddenly it's a cart. You still see some gypsies doing it. We may do that, for you, to remind you, man has not gone far in knowledge of understanding.

But within this system, we have created the condition of the opening the fields universe, that man can travel. But at the moment, we do this within the confinement of the Linz. You are the captain, you go and say, I felt nothing. You go and say, I've been to Moon, and this is a sand, or a stone I brought back. You show it to us in your hand. We accept it.

You tell us you met the grandmother and you sorted everything out. We still have to accept it, because it's, you are the captain, you know where you landed, we are not there to tell you who's right, or who's wrong. And some of you go into System and come up without anything, "I didn't feel anything." Because you cheated your soul. You told to yourself, I'm going to see grandma. But in fact, I want to use the system to get some gold on the way back. You come back empty handed. You cheated yourself not us.

\

So when you go into systems, as I said to the Iranians yesterday, you have to go into this system, with the ethos of Mitra, with the ethos of Zoroaster, Think good about yourself and others, do good, and act good, and you'll achieve it. You'll become a pilot to go anywhere. Some of you will get touched emotionally, because it's overwhelming. As John told us on Sunday, you fall in love, but this time is not a kiss on the cheek. It's something more inside.

Then, maybe you go the second time and you find what's inside. (1:00). You find the operation of how you control that love, how you became to be a giver. When John speaks about the falling in love, it's not a physical love, it's become detached. When you fall in love to give everything. Nothing is important, and then trying to find out.

John explains that he turned the chair, because he moves from the D of the plasma into the matter state to see, and he says, about to see with the third eye. So these systems have different combinations. But slowly we teach you. Those who came, those who went, those who tested different aspects of this technology to reach the production of the system today, are all Knowledge Seekers, or people who needed the knowledge to do something with themselves, save their lives, get rid of cancer, go and see the grandma, bring the father and mother on the table. Why, what went wrong when you were alive, and we couldn't talk. Now we can and sort it out.

Knowledge Seekers all have been through these phases of it, It's not a theory. Now we allow you that chance to do, and we invite to Linz. In a way, come in, captain your own ship, captain you ship in a way, that you will do the right things for the right reason. At the same time, we are not looking just for one, we have asked different nationalities and languages to come as a group. We want to see what happens when we put a bunch of you into one flight system, and environment of flight.

Germans are coming. I heard Italians are renting a bus and coming. I'm sure we'll see a bus from France. And the Dutch are on our way. Some Iranians are flying from other parts of the world to be here. (1:02). Americans are on their way, Mexican and Brazilians, and Africans, and people from all over the world are on their way to add, to put in the memory bank of this system. The totality of the race of the man.

When you sit in that system, whatever you have gathered over centuries through your race, will be shared with us. We don't download, we share it with us, because it's like a magnet, you come in. As a magnet, you put a magnet on a table with other magnets, it shares its fields, we take the magnet out, everything is still a magnet. But now everybody has the knowledge. This is how the universe works.

When we ask you to make your way to the Linz center, it's to gather that, to bring your balance information, for our work, what we have. I have told our team we need a fish, we need a dog, we need a cat, we need a leaf, we need a plant to go into the system. We are making the memory bank of the race of the Earth. We take a stone into the system. And we allow, it's like your memory bank from your forefathers, what plants not to touch, what to eat, the rest of it becomes Encyclopedia of the fields of the planet.

And then we allow it in a development next, for man to take the fancy of travel in any dimension. You need to be educated a little bit more. Now, since yesterday, we announced the reverse of the system. You go to learn without telling us, you use the man's rocket technology. (1:04). And you are very happy we are NASA. We dressed our people in the monkey suit. But we got to Moon as we saw, we had the fear, and we always have that fear, what happens if the thing doesn't jump up? Or the system fails? Man in that D of physicality on Earth of today, will die on the Moon.

So NASA makes a call to Keshe Foundation. Can you help us? We have the Russians who boycotted the Americans, we are not supporting you anymore to go to the space lab, after the Americans do whatever they want, if you have it, get up there and help your people. Now the Americans and the Russians come to Keshe Foundation. We have a stranded passengers. No problem. We should be able with the knowledge we have. We have invited the head of the NASA operation to come to Linz this week. They've been openly invited and they've been openly asked to watch the whole structure.

What do we do? We didn't send them out of Linz, so we have no connection with them. But Hello, they carry a headphone, which to the satellite system of NASA, connected to Earth, we connect into it. We put them on the condition of what we call, flight system that we bring them back. NASA there is no crisis. NASA we have no problem, because now we travel the dimension of the universe.

So for that effect, to perfect that side of it and our people understand it. Yesterday we launched what we call, the Mobile plasma testing. Which means any of you, which carries a mobile phone, and is anywhere in the universe. On this planet, you bought the mobile phone to take as a souvenir to Planet Zeus, to show, "Oh, look at these humans while they're working on." (1:06). What they are doing with themselves. You think you just go to other countries and other places, and displays, taking with you what we call, souvenir, to show, look, do, what they have.

People of the U have done this with mankind for centuries and Thousands of years. And now one of the best souvenirs we take, is man's mobile phone. Look what they think

they're so educated, they've put a little thing together. And they've come from the four wheeler, now they're again ??

Now we use that mobile phone, we want to, we only need 200 locations to complete our structure. You are in Sydney, through the operation of the fields, we bring you to Linz, and you go back. Excuse me, we don't bring you to Linz from Australia to be on the plane for 18 hours, through airport, no Corona. We bring you out to Linz, through the operation of the system we set in the center, flight time, 10 seconds, maybe a minute, if you don't want to crash into the wall.

But we are not carrying you in the dimension of your physical body as man has been trying for centuries, or especially in past few decades to see if they can move one atom, and don't lose the bits of it, ?? behind atom never manifested ?? something on the position.

Then we send you back. In a way, we invite you for breakfast in Linz, you sit with other Knowledge Seekers, you explain to us how the Sydney was this morning. And you go back home, and you say, "I've been to Linz, this is a paper signed by Mr. Keshe thanking me for going there." And I'm coming back you have a paper to show, and you take a picture with all of us.

So we free this situation, (1:08). as of last Sunday. Come to Linz, go through the system to add the data knowledge, the Wikipedia of the man as I call it, in the dimension of the magnetic field. Then we open the channel as of yesterday. Only 200 people will go through this, what we call, transportation. We don't need more than 200. And we open the channels. Go on the channels and please sign from all over the world.

We don't want all to be Americans, we don't want to be all Chinese. You have a problem in paying from China, speak to our people the way the money has to come to Linz to the Keshe Foundation, sales offices. The way is set up, we control everything through the Keshe Foundation, Austria. We have registered companies in our process, we can do what we're doing correctly.

Then, if you're Chinese, we pick you up from China. We bring you. When you arrive in Linz. I have a very bad news for you. You only spoke Mandarin all your life. You arrive in Linz, you speak German the way we do, or the Austrians do, and you speak English with us, the way we do.

Manifestation at the time of position in respect to, you will carry the emotion, understand when we tell you, as we had the example of, "you're a bastard," you say, no, I know the Father. Is not a bastard. It means you don't do the things right (only understand the dictionary meaning of word). You will even understand the emotion of the language. And this is how you will travel the span of the U.

Go on the site of the Keshe Foundation on the sales, in the store. We need 200, and we block off the 200. You're in Sydney, you're in Nigeria, you're In South Africa, you're in

Brazil, (1:10). wherever you are, sign and seal the 200. Because we set the map of this planet. If you're listening to me, and you're on one of the ships on the oceans, please sign, we need to because, we need the location. Later on we understand. If you listen to this, and you're a submarine, naval man, and you're allowed to receive technology teaching, as many of people do, sign in, we need you under the water, too. And we want to complete this by Friday.

Priority goes to those who register first. The first days of the Keshe Foundation, in Linz are already booked. We have booking, we expect the payments and the rest of it to come in through. But as the Knowledge Seekers says, We are coming in, they can't pay, we come with the cash. Keshe Foundation has a specific registered, computerized by the Austrian banking and government, you pay us, you get your receipt it's good enough. But you have to confirm on an email, and you have to pass all the clearances, things we have that you can come in.

You can't just turn up, I am here. One of our best, good friends in Romania, he says, I'm coming in with my hammock and I sit outside till I get a place. Fill in the form, and the car park of Keshe Foundation Linz Center is not a residential place for hammocks. Understand, come with the family, come with the friends, because we need to secure emotion in these systems. It's not just, I'm coming there to do what I want. We want husbands and wives, father and mother, (1:12). daughter and father, the son and the father. We want to know that the love of the two, the perfect parents, coming with the son and father, will be locked into, that in the next generation, coming would not get a prostate cancer. When he's got a problem with his sin. He knows how to handle it through the interaction of the fields.

In a few months from now, maybe we don't put a timer on it, you know KF is very what do you call it, unreliable when it comes to promising time, because we keep on researching, we forget about what we promise, and we keep on carrying on developing.

We will introduce what we call, transit flight. Which means we don't need to come to Linz anymore. We structure systems, that you can go from New York, from Beijing to London for lunch, then back home in New York. Then this has to be sorted through international organizations. Immigration, calculation of who's going to be there. Everything else as we have created these problems for ourselves.

The birds flying across the borders of this planet from continent to continent. I've never seen any of them hanging a password on their backside. But man does, because man needs money, and the money has a lot of things to do, how the government can abuse the others, rob them, you control them. What they did with Africans, killed them in one of the largest massacres, and control a nation, and then weaponize it by the fear.

But this time it will not work. Then many of you, took the time ?? comes right? (1:14). You go from Sydney to New York. Are you carrying any American dollars with you, your money is not accepted here. You go from London to Tokyo. Do you carry any yen, otherwise "nee-yen" you get another nothing, nada? Because you don't. But as I said, we

always do the right way, the things long before. We introduced you the Keshe coin. You'll arrive in Tokyo. I have an account set with the Keshe Foundation on a Keshe Coin. Welcome, we can spend what you want, it has the same value across this planet.

Now you understand what we set you up with. And we have asked one of our beautiful Knowledge Seekers, who knows this game, to start setting up this process for the Foundation, because he's an expert, he has expertise. And hopefully, peace and with his help and the knowledge he has, we will be able to bring what we call, Keshe Coin on the back of solid base of work of the Keshe Foundation, what we produce, what we have, and what other currencies allow us to be balanced with.

Many nations currency were backed by gold, but some of this gold was stolen, and some of them were stolen from the others to increase theirs. With the Keshe T we go with the work, the effort of the man's thoughts and knowledge, and we secure it that way.

So you can see we have already set you up. We see problem with a world governments to accept, how we're going to handle so many people, that can land in NY, in the White House sitting by the President, and they have no visa. (1:16). Then it comes for man in next few years to sort out this funny business with passports, and finding a solution of trust in languages and nations.

This is the responsibility of Universal Council and the Earth Council. Now you know why we set you up. It's time for you to get started and get ready for what is to come. Because once these people go into the systems, they come out of New York. officer stops them. Excuse me, where are you from, "I don't speak no English, I just came from India." Do you have a passport? "Unfortunately, I don't I just came with the KF system. It will not work.

We have to get internationally accepting the process of this technology. By gaining trust that you came from Linz, you will return back to Linz Keshe Foundation ?? will give a guarantee to the government. As I said in the next few weeks, when we start Mobilizing you back to Linz. We'll ask the Austrian government to have an officer of immigration in the Keshe Foundation. We have to. "I have just come in, just to have a lunch, and say hello to the Keshe Foundation Austria and I'm going back. You're a transit, no problem. Then we build the trust.

Our team is there to produce 2, 4 or whatever we can, systems, that we increase the numbers in Linz. Then with negotiation with governments. We place them in airports. We place them in center of New York where immigration officers sits in the room, and you come in, you don't need to go to the airport, to get a taxi and come. You're in Central Square, you're in Hyde Park in one of the hotels, they setup immigration office, (1:18). and one of the systems.

You come in, "how long do you want to stay?" One day, but your soul will tell the truth, "I've come here to emigrate, but I want to see if I can enjoy for a month." But the soul

says, this guy is lying to you, you is come here to emigrate. Excuse me sir, do we listen to your soul, or do we listen to your physicality.

Everything is set for the man to go to the next phase of maturity. Come to Linz and join us, or go and become one of the 200 people. We'll get you to Linz, and we let the Austrian immigration to know you arrived, who's arriving, documentation is very bad. And they sit there for you to come in.

It's not a "Beam me up Scotty," anymore. It has touched my soul, and I'll be there. When you come to Linz make sure, anybody touches any equipment by hand. Your time is over. No physical touch. You come in, you sit, you're given apparatus control. You hold those and you walk out. Don't try to look whatever it is. We stop you, you're finished, your time is over. I just wanted to look does not work. Because these systems are set to do certain functions and it cannot be malfunctions.

You come in, walk in, sit in your place. Do what you want to do. Don't touch what you're not supposed to touch. And you will see the beauty of it, and then we bring you back to the operation of the physicality. Don't wait. "I will come one day." That one day will not be here, to be, to add, to be part of.

Sponsor those who cannot come from South America. (1:20). As KS as long as ?? South Americans in Europe, which can come and add to the Wikipedia of the knowledge of the man in the systems. We ask you one question, and the only question we ask you is, when you come out of the system, write everything down, what you went through, what you saw, what you asked before you go in, and what you got when you were in. Did the two match, or was the soul going in for something else, and the STP going for something else, and the emotion was cheating both.

So we what you tell us, you saw the uncle, you saw a beautiful planet, you swam in the oceans of universe, you met Spider Man on another planet, we accept all of it. Because you were there, we were not, and you have to be true to you. Because if you line up a lie online, with yourself, you'll find out, the next trip becomes impossible.

This is why I said, I invited Ayatollah K of Iran to come into one of these systems, and we'll see if the sincerity is for the nation of Iran, or other things, which is not there. They will not walk into the system, the soul will stop them doing it.

I always said years ago, when Mandela comes, you will see what he said, what he did, and what he delivered. He'll be one of the very few world leaders, which will get into the system. Because he did not deviate from his path. (1:22). You will see, none of the world religious leaders will go in and come out the same, because the crimes they have committed is beyond, to get to that position. As we say, they sold their souls, for every criminality to be there. We don't expect any of the world leaders to go in and come out the same, if they can go in. It's like two magnets, when you put the wrong magnets in, the opposite way, it rejects it, you cannot come close to me, I am pure.

We see the change of the man, we see the evolution in the science. We'll see a new cycle of technologies and knowledge, which come out. Your president, His Excellency, President Biden says, in his inauguration and his election, and his work new technologies. The soul has been aware, that the new technology will change the dimension of the nations, is about to come, and now I here.

We are not telling you something will happen. Today, Keshe Foundation team are putting your systems for Monday testing it ready, to be there. It's made, it's built, it's done. Years of work completed. You cannot replicate it, even if you worked inside the structure of the Keshe Foundation, because there are many, many hidden things, which is hidden within, within hidden, what we hidden.

That's why I said, you buy a replica, it will not work. And you find out you go to Mars and half of your leg is not there. "Oops, I bought the fake one." It's not any more, buying a branded name, added us. But it's actually a fake one, because this time it doesn't fit. (1:24). And this cannot be corrected.

And we've seen one of our Knowledge Seekers, who we helped a lot, ?? defense, collaboration with the Russians and others, thinking he knows everything, created what we call, the Med Beds. And what happened to Med Beds, they come to Keshe Foundation past few weeks, wanting to add our technology, because their technology doesn't really work. As we say, the manure has hit the fan.

It's the job of you Knowledge Seekers to add to this knowledge to create a new cycle of man, cycle of man which has all the knowledge shared equally. Then when we bring the universal unit in a very short times, then you can travel the span of the universe, because now you practiced. You all agreed, everything is settled here, there are no wars. There is no one to cheat you from your soul. And then we go to next step.

I'm here just as an accommodator. I'm not here as any other point. I just brought the knowledge for you to gain, to bring the evolution in science of man. And as I said, to enjoy the dimension of physicality of this life, because Mitra promised me a lot of how this planet is. I had to come and see if Mitra was correct, and she was, marvelously correct.

The life of the new cycle of the man will become detached from physicality, the life of the man through the love of understanding the love of Mitra, which is in a way, the light itself, is completed through this cycle. You have to add to it, and then you'll find out, you cannot cheat yourself. You cannot cheat your nations, you cannot choose your races into something else. (1:26). We'll bring you the combination of the totality and we'll bring you the essence of the creation.

That's what I said, there is only one seat as a captain, and one seat as a passenger. Would you like to end up in NY, and your passenger in Beijing, because you two did not truly agree, that we'll both go to New York, and from there we'll go to Beijing. And then you say my passenger as gone missing. This is for you to be correct in interaction of the souls.

Understanding of the souls, is not sitting in the car, going to see the mother-in-law of the husband, and she sits in the car says, "wish I was going to my mom, and he can go to his mom." If he will go to his mom, you go to your mom, what happens to your husband, I don't want us to ?? stop half way. We agree we go to your mom, first, we have lunch there, and then we go for a dinner to my mom. Then you both have dinner together in both places.

Work with us to bring this evolution of science as rapidly as possible, achievable, by all his meant. We came to a few weeks ago, asking for financial help for what Keshe Foundation could not do anymore. This financial help is to bring institutions into operation, that this technology can be taught to all of you. It's not for us. This structure is set to, not to spend time to clear the past, but to set up a new dimension and direction, that the Americans don't have what the Chinese have, the Chinese don't have what the Iranians have. We open Institutes in Beijing, we open Institutes in Arizona, in Tehran, (1:28). in South Africa, in Mexico, in Brazil, in London, and the rest. These Institute's work together for the evolution in science of the man.

It's not for me, if I touch, I can create wealth beyond what I ever, you could imagine. But we still hanker and baffle with human race. We test the human race and we find the cheaters, and those who lie, and lie to themselves. They pay with their own process, not with us. We don't need to lie, because the people who lie, accuse others to be lying, because they know themselves to be lying ?? about everything.

Understand the process, work on the ethos of Zoroaster, on the ethos of Mitra. enter the systems. Think good, what you want to do good in there, do good when you arrive in the position, and the other goods.

You will find new emotions, which you could not describe, because these are emotions, which we never felt before. John tells you, listen to the American teaching, how he felt, the emotion of the fields from the head to the heart. We need to explain his emotions. This we call it the emotion of the plasma. Where the interaction of the fields dictates what P we'll feel, but we have no explanation for it up to now.

As I said, there are many emotions the man has never knew. Now you are witness to interaction of the field of your soul, and the STP. Make your word for it, which explains it. And I think one of the ?? first people to do it, is those of you who go into the system. Feel the universal love. (1:30). Feel the emotion of being loved. And as John said, it's not a love as a kiss on the cheek.

We need the 200 to be confirmed, and completed by Friday. There is a structure for it, they'll follow. We need the those of you who come to Linz, as many as you can, to build up the full picture. And then we need to bring the two together. And then we go for what you call, transmutation on this planet. Then in the next month, it depends on how humanity responds to this situation, we'll open the universal transportation.

If you don't have the address, you cannot go. You need to use the knowledge of the universe to reach, ?? different part of U. You want to go to Moon, you land on the Moon of the Saturn. Yes. Oops, I made a mistake. On Earth, you have created GPS, and you have the mobile. We can track you, find you, bring you back. You get buried in an avalanche. Now there's a carrier mobile, y beam me up , through my mobile to the central control. Satellites are set. They don't need to come and dig you out. They move your Soul and the Physicality will follow.

As I said, once we complete this knowledge, death will be as impossibilities. Unless you decide to give the totality of what you put together, to the next soul. It's like your wealth, when you die, you give you wealth to your children. You allocate how much to each. (1:32). Now you do that with your soul. And then that leads to elevation of the soul ?? together and formation of you, you gathered, that it elevates the other, next generation.

Now you understand what Juggernaut has hit humanity. But the problem with this juggernaut it has no break, because it will keep on adding knowledge. It's a juggernaut of knowledge, Juggernaut of the love of the Creator for man. It depends on how much of it we can take. Where you can attach yourself in this juggernaut to travel the path, which is going. It's not there to harm, It's there to elevate the Soul of the Man, ?? to bring your life on this planet, that mankind and the kinds that live here, live the life of the universe, which means a peaceful life, which means a cycle in change. Which means bringing totality in understanding and eventuality of one or the other.

What we come to understand is, that mankind is ready for that transformation. And we have brought you the tools. But we brought, the souls we brought with us, we trust to make the tools, that it serves for the change of humanity. As I said, when we go, we take everything with us to do a job, we just don't go in there trying to find a solution. We brought with us the souls, which we know will do the job, and we implanted in those souls in the body of physicality of the man to work with Soul of the Physicality of the man, to deliver the technology and knowledge, (1:34). that you needed it to go through that elevation.

Now, we are entering the next phase. And we are there to greet you to start, to be the what I call , the astronauts of the next cycle. And how we go to the next cycle. One of the most important parts of this technology today, is what we released yesterday. That 200 people around the world are very important for us, because we then can send you out, and then we can bring you back. From Linz we send you out, but we should be able to bring back those who need to reach the condition of elevation.

You cannot travel. How many of you on Americans, or South Americans in Spanish language meeting I think. we were told that they don't have the money to come to Linz. Can you get someone to sponsor us? Can we open a KFSSI channel for us. Send the funds to the KF I want a Brazilian to be tested. We'll find a Brazilian to be tested, to go to become a pilot, we'll find Mexican, we'll find African.

It's our responsibility to bring everyone into the system. Because then pieces of the jigsaw emotion of the Man, will be missing? Thank you very much for being there. We go through a break. We come back, I answer some of your questions regarding the flight system. And then we go into the teaching. And then we'll take if there's time for questions regarding the teaching. Rick, would you like to bring us to a few minutes of rest and then we start answering a few questions for half an hour or so and then we'll go the next.

Thank you .. we go for a break ... (1:36).

>> **BREAK** <<< 435 KSW June 2, 2022 (1:42).

K- We'll take questions for about half hour then more teaching (1:44).

Okay, let's see what we can do. Before we go any further, just as part of the what we were taught. We will go lie on Monday from the Keshe Foundation Center in Linz. For those of you who want to see when what because our margins come out of the system, if they allow us to show the whole processes they go in before you go in and when they come out. Last project, but we'll be there lying around about the first person will go in on about 10am in the morning to the first process. And then after 1130 every half an hour. The process of putting the next nine people through the system and If you can explain your way, maybe we open the lines, you can ask questions from those who've been through the process, how did they feel? Do they feel anything. Or, as we have one of our Knowledge Seekers, whatever we do, there is no emotion. There is no feeling, I don't feel anything. But in the center of the most strongest criteria, feel anything, but am I sitting here for and we watch the other people with emotion to go through it.

So on Monday, as we always been very open with our works. You around the world become part of the technological development and the change in the human race. We don't know what to expect, we don't know what commitment the soul of the Mozhans have who go through the process. And in a way, (1:46). it's very many of us will watch it. We'll try to give this process live. We'll try to give this process every day, that it can be broadcast.

One of our Knowledge Seekers will always be with us, Dean will be asked to broadcast, be with us in the center. To carry this emotion, we have set up a small corner for interview, that you can explain what he went through. But we do not interfere during the process.

You cannot jump in when you're putting the suit on to go into the dive. So we are bold enough, we are eager enough, and we are correct enough to share as our Knowledge Seekers, if they want, to go through it. The work, the what we call, Flight Center will not be shown, the flight room, will be kept what we call, secure. And we already have the sixth, seventh, and other days booked to come in within what we want. Come in, bring the data of your race to be added to the race, of completing this program, that mankind can go to the others.

We use a specific progress development, that the knowledge within this system will be shared with the next system. It's like putting a magnet amongst magnets. When we bring in new systems into the Enhancement Center in Linz, they automatically will share the data which they carry with the next unit.

When you come into the center, you will see two units inside, which is now, and two units are set outside, that they will be loaded in the next few weeks. (1:48). And the fourth system will run parallel. Then we increase the number to 20 to 40 a day.

We have invited NASA scientists to join us, they'll be live online when you come on. The Iranian officials will be online, the American officials will be online, the Chinese administration, people and scientists will be online. People from all walks of life will be online, they watch it through YouTube or what I call, VPN channels. But you will be there. And I would like to see what Mr. Musk thinks, when it's all "musked up", or when he is all messed up, for what they planned.

Slavery of the man through technology is a heinous crime. And you have to understand, no race has that privilege. Not even the Creator Himself. Please ask questions and we try to answer.

Q: ... will, these units store the emotion of the brain.

K- Yes. Man does not carry anything but emotion. Of course, that's the whole purpose. That's why we told you about Universal Council. Through Universal Council, a common language will store that emotion, common emotion of the race. This is why we went to the Germans, because Austria, it's all German speaking, and they're coming in busloads everyday, (1:50). to add to the knowledge. I Thank the German community for such a solid support.

It's, we are home in Austria. The headquarters of Keshe Foundation worldwide now has moved to Austria. And maybe as I said, through the development of this technology in Austria, Germany, we forget about what happened in the last what we call, last century through German. We become proud to the German, and add, the development of the new T. Maybe that's why as I said, we came to Linz, to the home of Hitler. To, not to repent, but to put things the correct way, the right way. And maybe the reason for him to be here was for us to come, to bring the beauty of the Creation to the same city, as he brought so much misery to man. We are thankful to the German community, and Government of Austria to allow this technology to flourish here.

Any other question

Q: ... How flying it out of the Earth will allow the passenger to return to Earth, how will they recognize the planet Earth? (1:52).

K- You know, we let you do the bungee jumping, but we keep the end of the rope. We know how to get you back. Don't worry about that part. As a human, you sat in the machine, we gave you control to hold. As a human you left your fingerprints of your protein everywhere. We got you by the tail, don't worry you are not going very far.

R: .. The problem is more how to stay off the Earth I think then how to get back to it.

K- There is no problem, you will find the wish will bring the dimension. It's very strange. Some of you will go in and you come back and tell us how the birds feel, because you really wanted to fly like in bed when you into the machine. And we understand more because the birds cannot speak their emotion. We will understand the emotion of the birds, why do they do things. Some of you love your dog so much, that you for us, when you come back for the first time we listen to the language of what this means, when the dogs do these things. You love your cat. You love a painting. A painting is not just a color on the wall, it's made of atoms, it has an emotion. You'll learn a lot of new things, and then we'll add it together. We are there to bring the change, but the change is for you, not for us. Don't be afraid of going someplace and not coming back. Be afraid of what you see in the new place you can handle it.

Any other question

Q: ... (1:54). Do I need to be in Linz, or can it be done from say, Australia once the fee has been paid to enter? Or do I have to go a slow plane and be physically there?

K- There are two bookings? One is for those who are in Europe and they can get to Linz. We go through that process first. Then you book in for the flight from Australia to here. That will be announced it says on it, that'll be announced when it will take place.

We have to complete the one part, to bring the other part. Then when we start are about to start flying people from all over the world and returning it. We have to this, it's a lot of work for our people in Austria. We have to get authorization from the Austrian government, the inspectors have to be, they might tell us please go to the airport, set the machine up, or we come to our center. We have to do everything legally.

Then we bring you to the next step, then we call for what we call, international flights, that you don't need to come to the center, then we have to have the agreement of governments, that we allow from Beijing, to New York, and where they will land. Then I'm sure the developers will come up with the systems of delivering, new systems of tracking.

Or one of the most beautiful thing with this is, you'll come to see the balance of the taxation across the world. (1:56). I seen this a long time ago, when I used to go travel

around the world as a business man. That there is no tax haven for anybody to hide. In a way, you can live anywhere, we all pay the same taxes, and a percentage of taxes goes to Keshe Foundation for development of the technologies and other things. And then we bring what we call, "One Planet One Nation One Race."

The key to the change will come when we get unified taxation across this planet. In a way taxation is acceptance of the services. In the next few days, in a handful of weeks, you will hear that Keshe Foundation has become part of, as a .. honorary board member of building the first 4 advanced cities, on this planet, finance by nations. You're there that everything which is done, is done according to the science of 21st century, and what the Keshe Foundation sees in it. We are advisors in building of the ?? forth newest cities in the world.

We're there and we thank our people that are here amongst you, they know when it is, and what it is. You will see the Keshe Foundation being part of the development of new cities. That what you call, the old and new put together. We have asked our people to keep it all, people who know we have received our invitation, (1:58). we have received our whatever. And you will hear the Keshe Foundation will be, and we have this with two or three other countries that is coming up, building space cities, which have no limitation of P. And then we go to see, what's the next step? I have asked them people who are here, on board, please do have a reveal this, until it is announced in the press and is shown in what do you call, public?

Any other question

Q: .. more people are concerned about tech implants and especially Jefferson mentions dental implants to those who have dental implants, can they enter the unit?

K- Yes, yes, yes. Because dental implants are a different thing than other implants. Even pins, if you have a small pins in the bone connection, you don't have a problem. But if you have an implant in heart, if you have pacemakers, if you have Parkinson computerized system in your, under your skin, if you have inbuilt ear system, we advise you for the time being, no. Especially if you have (heart) valves, even if you have a pig valve. We prefer you not to. If you have a.

We had a question from Azar this morning, women with breast implants they had a cancer, and then silicon. At the moment we advise you not to. But there is a technology we can transport you. But that, at this moment is only available, if you do that for you, on earth.

Because we take it as you are, we delivery you as a package. And in one of the teachings last night, or this week, I explained how it works. (2:00). We know this from what we call, the test which were done in European EU, .. center in Brussels. We ?? Derek, we took, we were invited to give a speech about this new technology to the European Parliament. They took one of our materials, and they put it under the X ray system, and it says, doesn't show anything is here. In a way, we black box it. But if we black box you in the condition of Earth, we can only deliver you on earth.

So you can go from New York to .. Beijing. But at the moment, we prefer not to deliver you on the Moon. Because we have not gone through the evolution of understanding the work of, or setting up of the structure, that on the Moon, you convert into the dimension of the fields of the Moon. (Otherwise,) you end up as a man, and there's no air (on the Moon).

It'll be interesting how in the near future using the old technology of the rocket propulsion and the Spacelab, people will go to the space, into the Spacelab and bungee jump into the space and see what they become. It will happen. It's inevitable it will happen. Americans and Russians will make a lot of money from this Spacelab, where people go in with the system, and in elevation of the soul, they jump into the deep space. Would you become a jelly, would you stay as a man? It will be interesting time for us to come, to see.

But at the moment, we prefer to keep people with a shoulder, hip, if you have a fused spine, all out of it (not use the system). (2:02). If you had a heart problem, likely to be out of it. Then please, when you go in, leave an address where you plan to go, that we know where you've gone. We can bring you back. But in a way, we want to check when you arrive to get there.

Any other question?

Q; .. she's booked her flight basically, during the during your talk here. And wants to know how many have booked up to

K- Not really. Put it this way we are well booked, .. Keshe Foundation never releases data. We are well booked. Most of the people will unless there is a one or two places left, you're into third and fourth week some of you now. We have people who are booking into the June and July, so those are getting filled up too. But our main interest at this moment of time, because we have enough people coming through, is the booking on Mobile system. Please book it. We need to come in.

If you just, if we receive a booking with no payment, we just cancel it, because we have this experience in Eindhoven. People just booking to block. We don't accept the block. Unless they are people we know, they tell us they're coming. They are Knowledge Seekers, we know very well, that they want to do it. We have two or three of them who want to do it. Yes, we accept. We have from England, we have from Romania, we have from another country. These are people we know very well for some situations, they want to bring, to ask for us to accept, (2:04). we accept, because we know them very well. But if you make a booking just to block us, and there is no payment. Forget about it. We get a lot of people booking even in the shop, in the store they book goods, but then they (don't ) pay for it. They hope that we'll ship it for them, and they get away with it.

HERE >>

So it has to be complete the cycle, and the Keshe Foundation team will respond to you, your time allocation, when is allocated for you to be in, and stick to that location time, because when you miss it, we will leave at five o'clock every day. So make sure everything is done. Your emails, your communication before you arrive, you have to have a time of going to the system. You can't just arrive, oh, I go there to get through. You'll be sitting outside for weeks. We'll make sure, that people who respect the work will receive it

Q: Azar ... Are you going to stop the flight test after 200 people, or are we going to test for month after month, so someone coming in December can still enter the system?  
K- We, the 200 is for those who are outside, they cannot come to Linz. The one flight test in Linz, we're expanding the numbers. In a way, we can go for 10 years, because this knowledge has no end.

But then we spread the systems into Arizona, which is our headquarters, into our offices in Tehran, in our building in Beijing, or in Jin and Jiang, or other places. And to our structure in Mexico and Brazil. We won't have any nation out. (2:06). But the Linz, the headquarters of development, will stay that way. We don't close it. But if we see dwindling of numbers, we just stop the process, because we've gathered enough information in next six weeks, eight weeks. Some people are trying to push to come in July. We try to accommodate, but the 200 for what I call, "Mobile" has to finish. It's got nothing to do with the test flight from Linz. It's important for us to be able to bring back in and see how efficient, how fast, if everything set up. When we send you out, we have your tail, as I said with the bungee jumping. When you're out, how we bring you in, is important for us. We need everything to be tested. It doesn't matter when you are on the flight path, if you become a blind spot in one of the satellites, won't end up in the ocean or somewhere. You'll land with us. Everything is set to. The knowledge is complete. It's just our people learn, and then replicating the systems.

Any other questions? We most probably bring a halt by the end of July, August to, flights from Linz, and we go into the Mobile system. We are not here to offer a service, we are here to gather information and data that we can ?? our ?? problem.  
Any other question.

R: Don't see any hand up ..

K- KS (2:08). understood everything, that's a first.

Q: Neil ... Many, many years ago I met the Dalai Lama and learned about astral travel and how the monks can park their bodies in retreat and travel. And going through my journey of experiments. I've learned how the fields have worked, and how they interact. This is the same thing that they discovered themselves through their own routines. Am I correct in that?

K- Do you want it which way? Do you want me to sensationalize it, or do you want the facts. ... The elevation of the Soul of the Man and doing what now we try to bring, is not exclusivity of the KF. In the passage of time, many, many people from the race of the man and other races have elevated to understand this, and have managed to do it.

Sometimes they do it with cheating, and sometimes they do it, because they know what they're doing.

As you remember we had that huge religious leader of you India, (2:10). with I think 50 million followers. And he was getting a status because he could pass 21 days (without eating), and I showed him to (be a) cheat in the Inzanno (Italy) and he had no value.

But if you go back to people, somebody who did this perfectly, and I watched him, was Buddha. As a person, he completed the cycle of understanding of the separation of the soul and the man. The rest tried it sometimes, and it didn't work. And sometimes in the knowledge of what we call, the passage of time, some of the what you call, prophets reached to understand it, but they couldn't complete it. So there's it's not exclusivity. And some people read it, and talk about it as if they've done it themselves. But when you ask them to do it, they don't know how.

They are the preachers and not the teachers, and there's a big difference between the preachers and the teachers. This process is not exclusivity. We are not the .. The minute we claim you're the only one, is the end of the work of the Foundation. The progressive development of man, of the races of the Creator is endless. We are here, and I always said, as Messengers not claiming to be the owners.

Q: Salomea ..

Happy birthday to Rick. (2:12).

K- Oh, Rick, is it your birthday today?

K- Well now that you mention it, Yes.

K- Oh, happy birthday. Happy birthday. We don't say how many years you are, how old you are.

Q: .. You have a small poem on the chart for you dedicated is flying on the Moon with the help of transmutation at the soul level like a butterfly. And I hope everybody will enjoy is a small point and these dedicated also for the flight system.

My question is related with my own experience before speaking to Mr. Keshe, I had an experience with some colleagues from Romania from "Braga dil " team they invited me to go with them in a travel at the soul level with the spaceship created by our own soul, and they, we give appointment at one o'clock in the night. And not surprising, ..

K- Can I tell you .. something from what we have seen from "Braga dil" group in the past few weeks. We put no credibility in their work.

Q: ( she interrupts ..) .. Yeah, but believe in me because I never tell lies.

K- No, but I just tell you. I know, but "Braga dil" group in Romania, very good people, (2:14). but they claimed a lot .. but didn't deliver and when it came to point, they found excuses. So please, I tried to make this very clear. The "Braga dil" group in Romania. We have not seen any credible work with them. .

Q: .. I'm sorry for this, but

K- Do you have anything else?

Q: Let me to ask you a question.

K- Okay ask your question.

Q; .. And I was able to travel (she starts arguing with K)

K- I do not want to . Let me explain to you something. Do you have anything else to tell?

No.

Can we have another question?

We respect you Keshe Foundation but the group has no credibility. And I told them the same couple of days ago.

Do you remember, we have the Japanese ... who came and did a lot of things. And when he got to the point. when we got to the last final point, they were forced to lie and cheat, because they were after the American passport with the American government. We see the "Braga dil" group in the same way. unless they can do the show other ways. And it's a shame to see them associating themselves with the work of Keshe Foundation.

Do we have any other questions?

Q: Sorry, I wasn't able to listen to you because I was interrupted some internet.

K- Do you have any?

Q: Yes, do you know the color of, of Venus of or Mars? Because I have seen a orange dark orange color. I never learned it. But just I have seen this color. (2:16). And I don't know which which planet it is. It was my impression was Mars. But

K- I think Wikipedia can tell us that. Rick, would you like to go there? And see what color is?

Q: For the reason I came to, to meet you, personally, because I had this experience. And I know that all technology is inside us. So we as a technology. And if you want to discover new technology, we have to discover our own human being, structure and function and interaction of the both souls. If we have internet outside, we have internet inside, all what we have outside we have inside and also this flight system is inside ourselves. And if we want to utilize this technology, we have to understand you and you understood, and congratulation because you understood this. And you're now to humanity.

Mr. Keshe 2:17:18

Thank you very much. Thank you.

2:17:22

Yes, for this reason, I

Mr. Keshe 2:17:25

thank you. She's coded but intimate. Rick, do we have any other questions?

Rick Crammond 2:17:39

Yeah, well, you wanted the picture of Venus here. So just trying to bring that up. And that's, I don't know what it is it is say it's a nearly featureless and colorless sphere with a uniform cloud cover. So it's basically sort of white Do you might say, in visible light, that's what we see.

(2:18)

Thank you very much.

Any other questions?

Q: When we arrive by way of Mobile, will we be naked? Or will our clothes come with us?

K- That'll be interesting. Very interesting. I explained that I think one of the discussions in last week. If you come from Australia, sitting on the beaches of the ocean and enjoy your time, and you end up in New York Central Park, where it's winter and snow? How would you turn up? Would you carry the suitcase with you with the winter clothing? Or would you be clothed to the physicality of man. A lot of you will see, you end up with a new feature, that the new environment gives you what you need. You won't end up ??? ?? want in the pit, call it

You will see your soul will adapt to the presence of time and space. This is how you will change in the space. If you wear cotton clothing, when you go to Mars, excuse me, it's a protein base and has no existence on the Mars. You'll be as naked as a parrot. But do you see shame in the life, because you will not be the shape of the human being, because you adopt the environment of time and space. You got a lot to that. (2:20).

But you have to understand the Soul of the Man, will not bring man to shame. So that should not be your concern.

Any other question

Q: .. Will we see re-growing of amputated body parts?

K- We shall see, I've answered this to a group of doctors in the past, but we shall see Don't forget to used this technology to grow parts.

### **Test if you are from Earth or somewhere else**

Many of you, if you go through some tests, prior to .. entering the systems, you will know, if you come or you're part of the structure of this planet, or you are guests of this planet. You know the physicality of man, and you will see deviations from that physicality, which adjusts to live on this planet.

If you go from Soul to physicality, and same soul to another physical, that change will carry on, because the soul has to exist in the environment of presence of time. And many

of you, who are passengers of the Universe and being here, you will see this. Be really for a lot of new things, and do not dismiss with this new technology. With this new knowledge, that we released as a technology. (2:22).

Be open minded and respect the work, and the presence of the others. They, some of these people have been with us, and they brought us a lot of good. We don't remember it, because we thought that they are humans. But they could not do anything, but just to bring the cycle of man in a progressive way. They have contributed a lot to advancement of the human race.

Q: WL Ruthie ... Good. Because for poor connection of the internet, maybe I missed some information. But is that you mean you have to choose the way of to connect with Mobile phone? Because I was in Beijing, I also can apply in the project and go to Linz.  
K- Yes, yes. Come to Linz in a few seconds.

Q: Ah, so in China, we can do that. Because, you know, just a couple of weeks ago, China government has announced like very strict policy to go abroad for the visa application. So that means all the Chinese if they like they can if they have their mobile phone and they can book the ticket

K - We love to have the Chinese.

Q: That's good. That's good. (2:24).

K- there is no Corona That's great. That's a very good news because I was wondering what is that and there's just so good to hear you clarify that. I'm looking forward to be in playing.

K- .. We go through the process we have to complete the first cycle and then .. Our team has to understand it. Keshe Foundation Scientists are there. We just don't put you in a machine and go away. We are there to gather information. We are there to gather data. We are there for our central brain system in each system, to gather information, and see what it's gathered. What is the knowledge, where do we go and how are we

This is not a show, you buy a ticket just go to a show and we have an operator there running it. We collected the data you give us. That's important to us. And it will be such an audit sequential system to go in.

But I advise you if we see anyone touching any of our system, Your term is finished, because we don't want a fingerprint on the systems. Even our technicians wear gloves, that they leave no fingerprint.

Any other question

Q: .. Brazil (finding a translator ..) (2:26). .. (2:28). Happy Birthday Rick, thank you for everything. A person who is a murderer when this person enters the unit, what happens with this person?

K- We cannot refuse, because by going to the system, he could be elevated. We are not there to judge. He will know the interaction with the system himself. We are not there to judge. As I said, the world leaders who commit crimes, they'll never walk in.

So, it's for the Soul of the Man to decide the entry of the man.

Q: .. How this person will handle herself or himself, by dealing with the consequences of (what was shown) to this person. disperse when they enter the units?

K We were not there when the crime was committed. (2:30). But the soul was. It's between him and the soul, and his physicality, and STP. We are not there to judge. There are no courts in the U.

Any other question.

Q: .. Can this units help the person to remember past experiences?

K- If it is in the D of the STP, yes. If the STP wants to remember, wants to release the memory, yes. It's not going to what you call, reincarnation, or reviewing, or going to the past. It's the memory of the past, if it's there, and there's a reason for it to be added.

Any other question. You've got to realize, nothing's hidden in this structure from the Soul of the Man, and Soul of the Physicality. And they don't lie to each other. (2:32). It's the physicality which lies, but not the STM.

Any other question?

Q: .. If we've got a person with diabetes, type one or two, that goes along now to have this experience. Will he come back recuperated from his ailments?

K- Shall we asked for those who go in. Because we ask people what their condition is before they go in. You ask them Live.

When we get people out of the system, if they want to go Live, to share, to elevate the KS, it's a live, interactive Zoom sessions from Monday. Whenever you see the Zoom call goes open, try to get in. We don't announce what time it's going to be that we have to run a show. We do our things and when we see it's the right time, we open the channels. We could be open anytime.

Any other Question

### **Every Element releases full spectrum of all plasmas**

Q: .. Question is about the explanation of the Alpha, Beta, and Gamma rays are their plasma, any of the elements in a special condition can release one of them or not?

R: I guess is plasma that element release one of them.

K- Every element we have releases full spectrum of the radiations in the U, From Hydrogen to Plutonium and above. (2:34).

It's just that you have to get it in the condition, which it releases it. If you go back to the space reactors of the Keshe Foundation, which we tested and it's in the patents, we create ionization, but ?? of course centralization, through the interaction of the helium.

We can produce X-ray from water. And we can produce Gamma rays and cosmic rays from hydrogen. Not Tritium. I can get gold to produce so much radioactive material, that you don't want to go even near it.

This is, what we tested in the space reactors in Iran. This is how I handle high breach nuclear material by hand. I know how to deactivate them, through my blood circulation the fields I create.

Every element has a capability, and not a capability, and actually does release a full spectrum of all the fields of radiations of the universe. It's not just because we see water as a water. Sometime the water you touch, as the water you drink is the most lethal weapon in another part of the universe, because it releases radioactive material radiation.

It is what, (2:36). we perceive through the lack of knowledge today. I always said, if you ever get to see the Iran senior scientists, who were monitoring my work in Tehran. I never wear gloves, I never have a fear of handling nuclear material.

I learned at a very early stage, in very young age, how these things are created, and how I can change it. When you open an X-ray tube, you see it different, even in a specific way, you release Gamma rays and all sorts of cosmic rays, from X-ray tube. My father used to tell me, you are crazy why do you do these things. I said, I have to understand

Every element has the potential to release a full spectrum of the fields, from hydrogen to plutonium, and all their isotopes, and other materials. Or the interaction of certain materials against each other.

It's beautiful, if mankind comes to understand the beauty of the radiations, how to manipulate them to create fountains of life. Our scientists have a fear of the unknown, they call them all sorts of things. But there's a beauty in Gamma rays and X-rays and Cosmic rays. And if you know how to produce it, that allows you to create the next stage for production of the fields you want, (2:38). G and M and the rest of it.

I have mastered in playing fields, creating fields, and targeting what fields I want to create. So don't, never be afraid of radiation, understand how to manipulate it. Radiations are like a jigsaw puzzles you put together. If you get a gamma ray targeting the field of alpha, "ah, you see the most beautiful things in the universe."

If you get the cosmic rays interacting with beta rays, you see some of the most beautiful fountains of energy ever seen in the universe. We see these in the structures of planetary systems or stars, or galaxies, but we don't understand how these fountains of energy comes ?/ together. The majority are from radioactive material, or the radiation, or what

you call it. We only guess ?? ?? there are millions of them. And their interaction releases fountains of energies we see in the universe

I remember when I was very young opening the first X-ray tubes, and my father used to go nuts. You don't touch these things, they are contaminated. I said, they're contaminated to you, because you don't know how to handle them. I know what I'm doing.

And sometimes he used to sit and watch me baffled. (2:40). A nine year old, 10 year old boy plays with these tubes. The explanation is that opening the liquids, ?? the oils in it all sorts of commotion, if you ever opened X ray tube. The mirrors, the reflectors, the god know what. But in fact, you can just tilt some things and you go from alpha to gamma and beta, and go to cosmic rays in the same tube.

Any other question

Q: .. how can we use those elements, or those plasmas in the conversion of elements. You kind of answered that. He also wants to know the amount of vacuum in our setups.

K- Which vacuum, which setup. Do you think we are going to give you a trade secret.

R: I thought you might say that with the would be specific to any particular setup for sure.

Q: .. Would a mentally disabled person who enters the unit, return with normalized cognitive functioning?

K- I would love to see somebody going through that. (2:42). I would love to see the outcome. But if you're mentally impaired, we cannot let you in the system.

Q: Jallal .. From Monday, you will open the Pandora box. What we will do with the sandbox?

K- Just to practice before you get to the Pandora box.

Q: What we will do with the knowledge what we have?

K- It's part of the technology. You have to add to it and understand more of it. It's not finished just because, what we put into this system. It's an amalgamation of what we have taught you. Why do you give up? Because somebody else made a machine. You still have to make your own machine. Don't chicken out. I see the discussion in your plasma secret plasma chat room.

Q: Yeah secret. You're the secret one. (2:44).

K- I explained to one of your team how to convert the MaGrav units energy into energy, usable energy. And he has not worked it out yet. But

Q: He didn't open it to us.

### **MaGrav power units disclosed to Tehran factory**

K- The new MaGrav units coming out of Tehran factory will sort out all your energies, problems you had with your MaGravs. Iranian scientists have been disclosed how to convert it and now that works. I hope they understood it. But the Tehran factory will

produce the first cycle of generators, if they understood it correctly. They actually produce electricity, when (but) you give it free away to the electricity board (back to the power grid). They produce one kilowatt, and (but) they sell two kilowatts, and you produced that 1 kilowatt for them free.

Q: Back to the transformers.

K- Yeah, I pull my hair, how many years I told you what you got to do. ?? Some day you'll understand it.

Q: You know Mr. Keshe, I am really, I am very happy, and in a way I am sad.

K- For what?

Q: Okay, I am happy for what is coming from next Monday and what we're going to open. And I am very sad, because when I was there in Linz, nothing came.

K- Because we ..

Q: Wait, .. you took me when I arrived, you will give me something to eat, and bye, bye.

K- Yeah, because the system was .. We should have let you to go in it. As I said that system, in Lnz, the one with a chair in it, has got heavier.

Actually, it's really interesting, I think it's something I can tell you for a joke. (2:46). Because this company, which did the lifting for us from upstairs, downstairs, or whatever. They had to bring different machining. Last week, they have sent us a bill for 16,000 Euro, just to lift the machine, and they had to change it, because the machine they had wouldn't lift the same thing, or whatever. I think it's part of the bill.

So it was there, but we couldn't let you go. We tested it in a way, in the original exhibition center when you came. And we saw when we put the system on, with the interaction with the environment, with the magnetic of others, and we had to readjust it.

You most probably felt it, but because you're not aware of it, you walked away from it. Only one person has been EU under operation. And there was a reason for it. And that's the head of the Keshe Foundation, Ella. You've seen the pictures of her being in the system in operation.

We blocked people going in. We added weight under the systems for it not to move, but it was adding its own weight to it. You came in, but you're blind to the knowledge. If you passed the system, you already interacted with the system. But this time we let you go in it. Because we toned it down, in a way that it can work. And we adjusted it, that it can work. And it's taken us two years to do this. (2:48). That it could be done.

As I said before, the teachings, I stopped going to the lab, because it became impossible to finish this job. It was just going from one development to another, because as our team was understanding more, we had to tell them more, to add more. So I said, if I stop going in, at least we get it done. And then we can add the rest of the knowledge later on.

What you see is the knowledge up to now, which our team can understand. Those huge elevations and .. modifications to the system. You might come in this time again, Jallal and feel nothing. But this time you are in charge, not us. But it is interesting, in the first

few people we put through, we put one at a time through. And then we put two at a time through, then put three at a time through, then we put four people at a time through. It's combination of, creation of specific fields, which we are looking for, and to see what the effects are.

Some of you might pay to come in for one test, but what we see on the results, we'll put you through three, four or five times through the test, to become a pilot. Then some of you halfway we might stop you because we don't see any reason for it, to go through, because it's the wrong intention. So when you come next time I'll give you a free ?? ride, Jallal.

Q; Thank you. Happy to be part of this Mr. Keshes. Thank you very much.

Any other questions? (2:50)

Q: .. So when a person sits in the craft, is their soul projected out of it to fly, but still tethered to the body, in it?

K- We are not launching, now they used to use the rockets. Now we'll trajectory the souls. No, that' not our job. You decide where you want to go. We don't have a soul what you call, propulsion rockets.

R; Soul catapult.

K- Yeah, You're the captain of your own decision.

Any other question

HERE >>

Q; Dan mentions when I land in a cave in our mountains? How do I see what's there? Will the light be from me?

K First of all why do you want to go in the cave? Is that your wish. As someone said, in the talk, would you see through the third eye, or what he calls it?

### **Race in space that light comes out eyes to see**

There is a race in the universe very much. When, it's like we know, when you put a torch out to see, this race has created and adopted a special way in the structure of their vision, that they can light through their eyes, in a way they create a light for their eyes to see what is in front of them, when they go in the dimension (D) of physicality (P). It's like a, not a laser, but it creates a field dimension, we call it the light. (2:52).

They see things in different ways, then we do through the eyes of the man. There is a race, which sees only the soul of entities, and collection and strength of the Soul. When you look at a piece of wood, they don't see it as a wood, they see the soul of every atom, and how they interact.

They are very, very special races .. which have developed niches, I call, in their existence. You'll see it now the Pandora box is opened, There is one thing for sure, is that if during the testing, we see our friends from other parts of the universe, we will not reveal that identity, where they come up. It's for them to explain if they want. If you're in a combination flight with others in the same, when you see this, it's your responsibility to hold the sanctity of the what we call, their wisdom and their life. You are responsible for their safety. You are obliged to respect the integrity of the life, in the universe in any shape or form. When we put 4 of you in into systems, maybe your own soul doesn't know your dimension, (2:54), because it's become some human dimension , convertede, that we are not aware of the origin. The Soul of the Physicality (STP). and if you see manifestation of light, or other things, just respect it. Decide in secrecy with us, not just with us, with those who are in there too.

Any other question

Let me let me say something to to all of us to understand. The systems we deliver are universal systems, which means to belong to all citizens of the U, and not exclusivity of man. And please respect that, because then in another system, in another part of the universe, you become that strange thing and how do you want them to treat you.

As I always said, you are a national, as long as you put the hat on, put your foot across the line of the nation, you put back here, and your restraint that's why we created One Planet, One Nation, One Race, that you are all member one structure, and One Nation. You will be shocked. A lot of you, with what has come, and what is to come, and how.

As I said, to one of our friends, (2:56). ?? See is that nowadays, you get the Romanians, in Vienna, they'll go to their own restaurant and the shops, and the Arabs all go to their own restaurants and shops. In a very short time coming, we'll have structures like this, which allows the soul of the people from different parts of the universe together to build up because now they know who they are. And they stay in the shape as they were in their own original dimension. You might walk into the bar, and then in that bar, you'll see a bunch of green things moving around with 20 legs, respect it, because now you entered to the bar where the citizens of the planet " Dit dop " or whatever, are there. It's a new game, it's a new change, and we have to learn very quickly. Prejudices will bring the demise of man

Enjoy it, and you will see the beauty of it. Because it brings a lot of diversity, and you might even in a way, don't forget your past, and don't forget your origin. But enjoy the mixture. I always said, mankind if you understand what is about to come with this technology, becomes like the English people. Forty years ago, the only thing you had in the corner shops was fish and chips. And then the curry sauces, and people got the taste of the curry sauce, and then the ?? salsa, (2:58). and then the Chinese came and opened up. And now when you go to England is one of the most cosmopolitan nations in food in the world. Then it's next to the Chinese, Chinese, and next to the Samalian, and next to the other one. And the beauty of it is the mix each other's food, and they give you a pizza with a curry, with the Chinese sweet and sour, and something else on the same bit.

And this is how the man should be. We become not cosmopolitan with this new technology of this planet, but we become cosmopolitan through the word of the system, universal enhancement system, that the citizens of the U respect each other. Because you pay heavily for it, because you will be isolated, ?? nothing else.

HERE >>

Mr. Keshe 2:58:56

we have to learn new weights we have to learn new things we have to be proud as part of the structure not be racist as its nationalism, racism as normal in the workup. kind of find itself so nice. And don't go in because you're going to be ashamed or to be shamed, though does a suppression. If you go into the system and you see other races, as we have created a universal field system embraced. Thank them for being here to do the same when you watch deputies that also lives

only a few locks off for a very big shock as I said to one of Knowledge Seekers Recently even a hit with a Juggernaut and you don't know how big this channel is because you were never prepared once a beaut (3:00).

If it wasn't that beautiful what is to come, I wouldn't have stayed here for thousands of years, to make sure you haven't missed the ???

Any other question

Q: If there's no time travel future or past, why can't I access through memory, the experience of another soul?

K- Who said, you can't find a way, with somebody who is prepared to share it with you/.

You know we invite people to come to our house and we give them our culture of God go to the Indian guy gives you the curry and the Chinese guy give you the Chinese now we have to say the same thing but in a universal level as we go through

It have to be done very fast, otherwise it creates problems if it's done very slow.

But please, if you're in the units and you see things, respect them. Don't run out pulling your head, screaming, I've seen somebody green running around. You never know what he sees in your soul. He should be running before you do. (3:02). It's gonna happen, you watch you wait.

R; Maybe you'll see the green monsters running outside of the machine going Yeah, humans

K- help you know, I always say that will be the two girls sitting on the branch one white about Brown. Brown brown one cannot make you to taste the chocolate. So we have to try with chocolate we want to try. And if it is, there's just imagination of us.

Mr. Keshe 3:02:43

Any Okay, well,

Q: Why do we sometimes have lucid dreams?

K- I don't know.

Q; What stage are the reactors in China? At which I saw the red lights? And what about the bright plasma sphere reactor you presented?

K - The collection of the knowledge and the units you're going in?

Q; Let's imagine anything. What about tattoos? Will the soul of the ink particles materialized? In some shapes or forms?

K- I don't know. Would you end up with the same physical body? Right? That's the question you're gonna ask yourself.

Rick Crammond 3:03:52

You have to have a body in order to tattoo it is full of fur, (3:04). then it'd be hard to tattoo for example.

K- Don't know. We are we are in for a very good beautiful surprise of knowledge and technology.

Q; What is the option with a medical shunt placed behind the ear as far as entering the flight unit.

Mr. Keshe 3:04:23

Moment

Q: In one of your past experiences on Earth. Did they put you on an upside down cross?

K- Have they done that to you?

As I said that I was talking to one of our KS, and was talking to the father and explaining what is about to come what is now coming to Linz. And as I said in the teaching, he said this is antichrist. They've said when the Antichrist come these things will happen. So we have to wait for the Christ to appear. Now it's time for it. So I don't know if you had a Christ Christ when the system comes up. So we have to wait and see we've been cross upright, downwards

Any other question

Q: When these flights are approved, what happens to those in the aeronautical sector that stewards and pilots from people in the security sector airport terminals, (3:06).

won't be they will not we are not looking for approval. We are testing it up with and the system as we said are we have registered with the Austrian Essbase people in the way that setting about the space system and they are not looking for approval we are not bringing is just you who Captain so there's a beautiful law. It says you can do a direct yourself. So that's why you're the captain. We are not flying you.

I used to have a friend. Everybody different is they must not and he was a purchaser in our company. We brought him in to talk he was there he couldn't bring really was there because he was the uncle of one of our directs and I battled with him so long. I said can we buy knives we are setting spoons, forks in our shops but we're not selling any knives we want says no way as long as I'm here which he actually said to the end. He wouldn't buy a knife and the very first time I asked him that why I own to find that you know how much we lose is that I sold in the very first shops, a knife, somebody came bought a knife from us and he went and killed somebody with I don't want to be responsible for it. So the major chain store selling spoons and forks. He used to buy sets without a knife

Mr. Keshe 3:07:52

so it's not us it's what you do yourself with it. Which you are responsible for it

Mr. Keshe 3:08:04

free provider Swati this you use it and you can misuse it this technology this system does not ask that you don't work with physicality, you work with the soul the condition of the fields is suspended

Mr. Keshe 3:08:30

that's why we call it simulation

Mr. Keshe 3:08:38

you are used to flying the box or the back of a cart or a chariot or jumbo jet now you learn a new flight system. You is you who decides I'm going to the shop to shop and then because the soul and soul of physicality and physicality agree you get this body moved on the street you get the boss you go to the shop or you get in the car you go to the shop you buy what it is.

Now in stock doing getting out getting walking, get into the car getting a bus to get to the shopping center. Now you take the soul shop and then manifest yourself in P and then you do your shopping and you come back the same way. What It Takes you're not waiting on the bus stop sitting two hours in traffic job. Now it's a one second job in a very new future because we've seen this system in other parts of the universe. You will have initially to they make it very much if you remember the old way and the new way you go to shopping. The old lady used to sit and put the numbers one by one. And then it says took you 10 minutes to get one trolley because she had to enter anything. And now

you go in and just to zip it and now you go to some shops who put everything in the basket that gives you the price without you doing anything.

(3:10).

We go through that technology development and evolution. And then we see the massive, rapid deployment of the new sciences. These are what I'm going to teach you in next coming months and years. You'll be baffled. You'll laugh what the teaching of today, Mr. Kesh going to teach us. It took us there and teach us what is today because you don't understand it. You need to understand.

We have to get the majority population to understand that it doesn't become exclusivity. And those who get the message show the door eMusic back Moses. Moses was one of the turning point in education of man for us. The greed of the men feared more men of the Create if you go by ratio, Moses killed more than Hitler did.

So we learn other things. So you are the customer to decide.

Any other quersoitn

Q: which was for the CO2 setup, that was discussed apparently I think you mentioned something about that a couple of weeks ago. So he's looking for the vacuum setting for that CO2 setup.

Mr. Keshe 3:11:48

It says see oh you setup

Rick Crammond 3:11:55

you figure it out yourself? Basically. Yes. (3:12).

Shall we call it a day or do you want to go into the teaching session as needed? 12 o'clock we've been here or two years.

Rick Crammond 3:12:09

Okay, sure.

Rick Crammond 3:12:15

What, what do you mean going into the teaching session.

Mr. Keshe 3:12:20

We go already with the teaching to next week. Join us next week from Monday, keep your resumes open and you might learn something very new as our people go through and be switched on. And we allow you to talk or listen to the chat to the observation and to the expense of people going if they don't want to share it you see nothing but if they want to share it, we open up the zones we don't wait nobody up we just put his own channel recorded and we just added ABC the and the rest of it.

We did that with the testing of the 129 (Tesla) flight system. I know one component, the AI system and the how is the for all of us to learn something new because you're doing it and you're sharing it and join us please we'll pull the 200 number as fast as you can. As you're doing with coming to Linds. Essentially a lot of buying tickets and staying around the airport and hotel and everything else we we bring you only send you back your experience. Thank you very much for today. And I hope you're having a wonderful time those of your problems with the system and experience new emotions, new feelings, new understanding, and be generous enough to share it and those of you who listen to it exactly as the experience of the Soul of the Physicality.

(3:14).

See you next week.

R:

K- It'll be interesting if that during that time of Tuesday afternoon. Some of the people going to now, German's, I think booked on the seventh day They will share their knowledge with us what they went through the system and Universal Council members learn from what is gonna come to them and what they have to deal with.

We'll see how it goes if we get to that point, because I'll be monitoring it in the background, and see if it is there. We have interesting point. Universal Council members can ask questions from the people if they'd like to share their experience.

Thank you very much.

435 KSW June 2, 2022
