

436th Knowledge Seekers Workshop; June 9, 2022

(Quick Index 10 p; Proofing Transcription done need to do; Key Phrases, Words)
(Auto Transcription by Elias)

KF first man to land on Moon was successful on the 6th of June as promised; New flight EU without physicality is loading up its memory banks with the plasmas of the life of this planet - like an Encyclopedia; Bring back leftover equipment from NASA Apollo mission to Moon; Soul of Christ will appear;

ENGLISH TRANSCRIPTION

(:12).

K- Yes, good morning, good day to you. As usual, wherever whenever you listen to this series of Knowledge Seekers, Keshe Foundation Spaceship Institute knowledge. Yes, we are ready to fly, we are ready to fly beyond imagination. As many of you joined us yesterday, in a broadcast of the people who went through the flight simulation. Usually, organizations when they organize these kind of excursions or tests. They do one day, and then they see what might happen, and then they do another flight test, maybe in six months, or some years down the line.

We have developed a fully comprehensive system. And with that, in the hand, Keshe Foundation will continue on a weekly basis flight tests. We have another session of 10 people, this time totally German, as we trying to load up the system with what we call, (:14). European, and Aryan what we call, memory bank of the Wikipedia of the information. They'll be with us tomorrow. And then on Monday and Tuesday, more people will go through the same system. Tuesday will be only a morning session, not an afternoon session. And then, from the following week on, we'll test only Tuesdays and Wednesdays.

This allows our team to upgrade, it allows to run the productions and everything else, to produce new systems to come in. Because when we run the system, we are all there, if anything needs to be adjusted. If it needs to be what we call, setup, takes a lot of time and energy. And more or less two days a week, flight test is more than enough for the Keshe Foundation for next two or three months. We think that we can come cover what we're looking for.

The experience of 6th of June and the seventh of June on both the American side of time zone, and the European time zone gave us a huge insight. The insight is very simple, man has achieved a dimension of knowledge, that will it can dictate, choose, and decide. This became very, very clear in our testing.

In the process of tests done on the number of people who came into the what we call, the flight zone was very simple. They are in their own dreams, they were in their own

dimensions and directions I call it. As we said, the responsibility of the new life, new technology, (:16). is to work between the physicality (P) and the Soul. That the 2 interact. And this became very clear in the process of the teaching of and the work of last days of tests.

People are in a dimension of the Soul, and with the voice of a man to the physical dimension, we ask them to fly, and instantaneously they take that position. They want to fly, or they don't want to fly. They want to go where we ask them, or we request them to go. We asked the first people to go to the Moon, and we heard in the testimony of yesterday, it's instantaneous and they were on the moon.

We ask them to fly, we don't create condition, and they go where they want to go. One swims the oceans, and one goes somewhere else, and one goes to the Sun. And we test to see what we promised, connection between the Soul of the Man (STM) and Soul of the Physicality (STP), and this has given us a new what we call, incentive to go further in so many ways.

In the test coming up, we know the souls, which are there, and we know the souls, if they can be there. We request a specific what we call, mission, specific things to be done. One of them made, what we call, what we promised from the beginning, manifestation of the Christ, bless his name. We'll ask some of the people who go through the system to pay a visit to the Soul of Christ, bless his name. If they can do it, (:18). if they had the connection of line, they will come back and tell us, how he looked, and what he had to say about his time.

Then we go in the different dimensions (D). As I wrote, in the communications, we have with NASA cooperation in the United States, we have offered them two options, provide us with the exact position of the Apollo landing. The way our Knowledge Seekers (KS) on Tuesday paid a visit to the Moon, we request them to pay a visit to the site. Is there such a thing at the moment? Is their system's left behind decades ago by the Americans.

Then we show you how we'll change this. We'll ask them to bring part of what they see leftover at the site, if possible, back with them. We'll ask the travelers to come back with pieces, evidence and confirmation. If they cannot bring it back, or they say they got it, but they couldn't be back, we have to adjust our systems.

Do not forget, we introduced you the Material Enhancement Unit (EU). This technology exists inside the new flight system, which means what is gathered is energy of physicality, can be converted, maybe we have to fine tune it.

Then, as I have requested again, from the head of NASA mission to Mars 2030, to provide us with the location of the Mars systems, which they sent it to Mars, and they work for a while. If they have any pieces, (:20). they think it needs to be repaired. We can be in position of, and see if we can repair, by people who go to the site.

These are not what we call, talks. What we've seen, what we've observed in the system's of past days, confirmed to us this is a reality, it's for us to find, fine tune and deliver.

Discuss 5Plus1 Talks through EU - Soul

We'll bring you in groups where we think, from Russia, from United State, from the head of Islamic Republic of Iran, Ayatollah K of Iran to meet, through the soul of people in the room, to discuss the solution to 5plus1. We'll solve the problems within the confines of the flight system. We have to try, we have the knowledge, and we have the responsibility with what we have developed, to deliver.

Last night I was talking to a very close person to me, one of my cousins, born the same time, brought up the same way, and he's a Sufi. He's a very devoted Sufi. He said, Mehran what have you done? I do this through energy. I said, yes, I know you've done this for years. But it's you. Now it's a system. Now we can travel.

He said, I could never travel, but I can transfer energies to people who are sick. And I know what I do with it. He said, you've gone beyond the knowledge. (:22). And as a Sufi I accept you have achieved, with what I have seen in the videos of yesterday, "a break in the knowledge of man."

We have to understand, these are the realities we are going to face. We have to understand, that the game has changed. As I've said, this is just the first step. As You are what are what I call, "the naughty children, playful," many of you will come with different desires without telling us, and you'll go in there and see if we can achieve your desire.

As I said to the first person who went through the system, a simple thing. He went through the system on his own. And then we brought in the second person, which is from Netherlands. When he came out, I said to him, what did you, what was your wish? What was your desire? He said, I wanted to gain the knowledge of the universe. That's why I came, that was my desire, that I know everything, that I can do. I said, you failed before you go in.

The system is not there for you to take. The system is there for you to give. And if you truly give, the intention of giving, you'll truly find empty cup, to fill in. You expected it to go in as a man, and come out as an Einstein with lots of knowledge of the universe. This will not happen, you went to steal. (:24).

We heard from our guy in Netherlands (Galeb) and his sister, the same proposition, the same, but he said, I was there to give, and he received enormous amount. We heard from different things, you hear the voices, we analyze the what we call, the information. We analyze what it means in our system, each person, what it goes, what is done, what is added to the system, what is taken from the system.

In this process, maybe tomorrow, maybe sometime in the coming days, we'll have a message from Christ, bless his name, for your all as listeners. We believe it, we accept it, because we in a way, commission it. None of you knows who that person will be. And then we'll repeat it again.

We bring the facilities of the present science to manifest the true face of Christ. Then we see how much mysticism, and lies sits within the Vatican. Then it's for the Christians to decide. It will be a test of time. It will be a test of time for us to travel the span of universe. It will be the test of time for us to understand new technologies, to understand new insights in the working with the universe. It'll be an insight for us to bring changes on the dimension of life of this planet.

As I said before you all waited, and worked with the MaGravs and the Pain Pens, (:26). and Pain Pads, and while you were children busy with your toys. We finished the game, we finished the process of understanding. We built systems that ?? not one or two, but 10 people have taken the what we call the flight. Ten people tomorrow, maybe 11, maybe 12. And then the same numbers next week. But it's your responsibility to be here, to bring the knowledge within the races of the man, that it completes the Encyclopedia of the what we call, "the knowledge of this planet."

If you have a beautiful, obedient, lovable, cat, or a dog, or you have a beautiful fish, ask permission from our team. As long as they're tiny, we don't want the big ones, we can't fit them in our system, bring them in with you. Bring the most beautiful plants, with the most beautiful flowers, bring the plants with the most beautiful scent's, bring with you the most beautiful stone you see, and bring with you the images of the love of mankind, and enter the systems. And let us in so many ways, imprint the knowledge of this planet, that dogs and cats, and fishes cannot go to Wikipedia to put their own information. The information put on them, about them, is by the man, and imagination of the man. Let them deliver the fingerprint. (:28).

Bring with you the love of mankind and leave the hate behind. Bring with you what you see as the most beautiful thing in your life. And let's embed these into the system, that gets registered in the Encyclopedia of the plasma on this planet.

As we build more and more systems, due to the way we have set them up, they will transfer information from one to another. We build what we call, the mosaic of the most beautiful things on this planet.

We work with every what we call, creed and nation and race, except Belgium's. This race is excluded from the dominion of the kingdom of the God, for what they did, and what they do to the children of man.

In so many ways, we want to bring balance to the society, that we take a perfect, what we call, mixture of the information and knowledge of the man into the universe. We bring a totality of what we call, collection of the information, that does not allow abuse of any process in the U. When you come to the system, come with love. When you come to the

system, come with sincerity. (:30). And when you come to the system, don't come with lies to yourself, within yourself. I tell the system I want this, but I really want something else. The minute you thought it, it is registered in the soul, then the soul will tell you, and you come out with nothing.

We will like you, once you have left the space flight for the coming weeks and months, send us the report. We don't chase you. We don't come and tell you what you did, what happened. Send us a report, what was the feeling, weeks later, a day later? What was the emotion, or what is your connection? What do you feel added to, and what do you think is changed in you. Or it has changed the environment around you to facilitate your wish.

Try to understand the new technology. Try to understand is not there for to take. It's for there to give, that by giving you find a solution for the others. Not if I give, I will receive. When you go in to give to receive, you have already failed. If you go in to be the best in everything you can imagine as a ballerina to a scientist, you have failed. Be there to elevate others, and other things, and not for you to elevate yourself to become more arrogant, and more what they call, egotistic in the dimension (D) of the failures of the man of the past.

It'll be interesting to see how many of you will come out, go home and find the change. (:32). And find the change in the way, that you never thought would be achievable. Making friendship with the father you never spoke to, making contacts and bringing what you thought it was something you hated more, to become the one you love more. Achieving knowledge, that you could never imagine achievable. Entering domains and dominions, that gives you a new dimension of life. Becoming traveler of the universe, and not just going to see the sights on this planet.

Today, we dream of Niagara Falls or jungles of Africa, those of you who have connected to the system, you start dreaming, you start realizing, that you go to new places you never knew. These are the new sites, these are the new places in the universe, which now is open to man. When you see the travelers of the universe respect them, love them, adore them, and invite them back.

If one of you, or some of you while you are in the system, or after, come in and bring the passengers of the universe with you, we accept. We greet you. Nobody will call you a lunatic. Because this was the purpose of these systems. When you travel the span of the new dimensions, try to understand, try to be part of, and not separate. In a way, in one of the talks of yesterday, become that butterfly. Become that, that with you, like others enjoy your beauty.

In that process, we bring the change. The new Enhancement Unit for flights (FEU), which now are under test, (:34). will bring new dimensions. Gradually, we'll explain more and more. Gradually, we extend to the knowledge more and more. We'll change the Enhancement Unit to the room, which now the EU are in. Which means you can walk in as collectively, as you like, as a mixture of races as you like. And within the space of the room, you will all travel to all directions and dimensions. Or if you'd like to go camping

together on your own. Don't bring food, because some of your food, will not be edible on the planet moon. Maybe the condition is different, and you cannot eat, but you absorb energies.

Bring things with you and see if you can carry with you. Pack your luggage, call your brother, and say I'm coming to see you today. I'll be in New York at 9. See, by going through the system with your suitcase, you will go to New York. And if you do, come back, and you'll return, tell us how it was. Did you meet with him? Did you eat with him? Can you confirm your existence and your dominion at that point?

It's you who has to manifest yourself, not our system. Our system is a cage, which frees man from the cage of his own soul of physicality (STP). The rest is yours.

Someone wants to see the daughter, someone wants to see brother, someone wants to see someone from the past, they want to meet again. This is all a possibility, a reality which now exists, and more and more people go into the system, more and more of you find out how easily it will become. (:36).

In the next day or two, the second operation, or system will come in. The two work together in tandem. And then we'll see how the situation and combination of you as passengers of the craft will change. As you heard with one of the participants yesterday. She may become the captain, and she decided where to go. She says, I took them, they went to where it wasn't good, she decided to go somewhere else. And then she decided to go to the Sun.

Now you understand when I told you, the captains of the future give their souls to the captain, to protect, and protected, and bring you joy with their soul. We've seen it for the first time, in the first day, whatever we said, has come out of the memory bank of the people who took the flight. Come into the flight system (FS), with the love of the Creator and walk out of the system, becoming a part of the Creator, and then see where the mankind goes. Whatever I promised you, now it's on the table.

Those of you who want to moon, bring us back a rock. Those of you who go to some other places, bring back with you, friends. And then let them take us, to show us their dominion where they came from. When you meet someone in a cafe, you don't know how they live, where they live till they invite you home. (:38). Then you know what home is. It'll be the same with many of you in the new systems. The lady says, there were ?? dogs, and then later on she says, "I think there are my family." You bring your family home.

Invite them to join you back. Our systems and operation in Linz has set up to accommodate the full spectrum of the Soul of the Universe. No harm will come to them, and we ask them to stay within our system, that we have control of the time and the space.

The computer game is over, it has become a reality game, and it's not a show. It's introducing mankind to Universal Community in a very soft way. In a way, when you

land somewhere accidentally, you first take a few steps, you smell the environment, you look what is there, trees, are trees, stones, the environment.

This is what we are doing with you at the moment in the next few weeks. We're taking mankind to a new environment. You see the water, dip your toe in it. See the water (if) were acid, and if I was a man, I wouldn't have been able to stay in this. Then you understand you have taken a new dimension, in manifestation you become ?? kind of ties, to the environment.

We heard from on of our people in German, that half octopus and half human. And in other, she still tells you the same, but this time she's on Earth. Then she's a mermaid, again the same, attachment the physicality of the man is very important. (:40). I'm prepared to compromise half, not all of it. Maybe the next time I'll become the fish, but today I still want to be a man.

We heard from our other people, how they say physicality, the thoughts wanted to take over this ?? . This is how it will be, the soul will ?? this work of the physicality. The soul is the traveler, it's got its freedom. It does not need to wait for you to sleep, it's with you when you're awake.

As I've said, a new game for mankind has started. A new lifestyle has started, a new process of interaction. In a way, we have let loose the man out of the village. Let's see how "village" you behave. And see how serene you behave, as the passengers of the U. You yearned for this for thousands of years. Now I have given it to you as a brother ?? creature. The gift, let's see what that gift brings you. If you're after vision, through D of sight of the soul, you shall not be blind.

And if within the structure of the body of the man, your a cancer to the society of the U, you'll have to sort that out by yourself. As you have seen mankind has been kept out due his behavior, due to his conduct in the past times of the Creation.

Join us tomorrow. And as you're doing some of you, join us on Saturday. I spoke to Rick, we don't need to do it nine o'clock Monday morning, tomorrow is Saturday, if you would like to go and do a lot of things with the family. (:42). We'll choose a time, maybe six o'clock, maybe nine o'clock, in the afternoon, we'll do a small session one hour, two hours, not much. Because then they do the same next week for those who gone through the system. Those we find interesting. And then we build up.

Come in with your mother language, and walk out with the language of the U.

I have delivered to you what I promised in totality, a health system, a feeding system, a life system, and energy system to the Soul of the Man, and everything else, it's all in it. When you walk in, you see the MaGravs, when you walk in, you see the conduct of the plasma, as you walk in, you see the what we call, operation of the Pain Pads, Pain Pens and everything else, which we have given you. Then hidden within all the technologies,

which we have developed, in the integration with each other, we have delivered the totality.

Now, it's for our team to learn more, and for them to deliver more. And I think those of you who went through the system, in the last few days will have a different experience, when you come the next time, the expectation will not. Now you come to the reality.

But we would like some of you to tell us, if you made an appointment with your family in different places to meet them and have lunch with them. See if you can go there for lunch. (:44). And we'll talk to them after you come back. Did they enjoy the lunch with you.

These are important to us, because it gives a dimension for our technicians and people who develop the technology, to understand what they have to increase, what we have to change, what we have to adapt in systems, that we don't bring the plate without the food, or we bring a food without a plate, while you're coming back, because part of the system was not adjusted to what it is.

You will learn some of you, as you're through the system, that you can tell us, I am bringing somebody with me, can you accommodate us. As your soul speaks through the word of physicality, we response. If you are ready to accept what is the condition? Who are you bringing back with you? What are you bringing back with you. Which parts of the system we want you to place them, or ask them to come in, that we see, we respect their what we call, energy facility. We don't bring a Jewish or Muslim, and give them a pig. They come in, we have to know how they come in. In a way, you have to tell us what you have accepted through your soul, and your soul we are responsible for, we have to accommodate your wishes in our system.

We communicate with you through your dimension of physicality, and your soul will bring to the point of understanding. If you noticed a lot of you, we put two chairs in the system, and you thought it was for the two passengers, you go with your wife. It's the same, you bring a friend from space, and we receive for him to be. It's not just man anymore. We facilitate for them to be part of us. And if you're in the room, (:46). and they manifest, do not run out of the room, and do not go and hug them and kiss them. They are adjusted to the person who has brought them. They are not adjusted to you outside the D of the fields, outside the system.

These are the facts, that you will face in the coming time, as the technology completes. We just tell you what to expect, and what are the possibilities. And how many of you will remember when you see flying with these, doors, or running around having a party. When you go to a party, you always invite them back for a party at your place. But tell us before you come. Don't bring too many, we don't have such a big place. On the other hand, make sure we know how you come.

We work through the soul, but at the same time, the soul is extended beyond the physicality, but we still have access to your physicality to inform you. In a way, I

welcome you to the reality of the space travel, and in a way, you're in for a big surprise. I hope you enjoy it.

It's taken me thousands of years to bring it to this point. And this is just what I call, first draft of the system.

In the near future, you will not see any physical D, it will be ?? stars behaving as systems. There'll be lights in different positions of the room, to accommodate everyone as they move around. At the moment, the reactors are fixed to a position. The upcoming systems, the reactors are floating, accommodating to every emotion, like different magnets. We put the system on, some of you who've been there, before you come in the future, behind you. (:48). It's like a noisemaking magnetic fields.

When you give to it, when you're giving to the universal, what I call, Community, you find out the noise become very sharp. We know if you're hearing, when you're in the process of taking and you want to run, you bring the system to have a run. The screeching, that it does not want to be part of it. The noises made in the system, tells us if you're taking or giving, and who we have with us, and how the soul is behaving.

And when you laugh, when you're joyful, we see from the system again. It's important for us, now to translate the language of the system, to a working system for us, as a team. That the new systems coming in, will carry the emotion of the facilitation of the system for the passengers too. Which means now, we are increasing the emotional side of the system. You will go and sit in different parts of the system and you'll have different emotions, we will try this in the coming time. You will sit in different part of the room and you get different emotions.

We are trying this tomorrow, with one person. We have asked him to come in, and we go through the emotions of what we call, work of the system, how they will have different emotions in different parts of the structure. It'll be interesting to see, and it'll be interesting for them to explain to you, (:50). about how ?? they felt.

I have fulfilled my promise to you, you got your flight system and everything else, which goes with it. It's for you to take that flight. In so many ways it's for you to confirm to us, you have become a traveler of U. Please remember don't come in to take.

We go to a break, because I think it's a lot, and hopefully we'll have, maybe some of the people who went through the test with us yesterday, or Tuesday, and see if they want to add to, part of this process. We have WL who head of Keshe Foundation on the list if you could bring her in. Galeb with us Would you play both Galeb and we learn from his experience. After we come back and we'll see where we land, and we'll see how we take the step to the next journey, and from him and maybe the others who are here who went through the test on Tuesday. How they feel since they're not done what is brought to them since that time. Would you like to take a break and we go to the next system please. (:52).

Proofed to Here >> continue on

<<< **BREAK** >>> 436 KSW June 9 2022 (1:00)

K- Yes, thank you very much. Thanks for coming back. And we'll see what we can do. As we see more or less a second person who went through the flight system with his sister, and we saw his what we call, thoughts and explanation of what he went through and what he did. He is with us now. And Galeb tell us if you're with us at the moment. Can you open your microphone? Yes. Good morning.

Q: Galib

Morning to you and to all the Knowledge Seekers as well. (1:02).

....

K- Can you tell us yourself about your experience?

Q: Galib .. The best way I can put it is getting back to what's home for everyone is different. But that was, as I said yesterday, one of my intentions to get back home. If I were to summarize it, not to keep people too long again, is in a very beautiful way. I got home again, or I, the illusion of not being at home, that faded away. And it was one of the I think the most beautiful experiences that I had in my life.

K- You went to Moon, in your talk yesterday, because the balance of it was not recorded. We have to get the lip reader to see what you said and text it, the parts ?? You said in the parts which you're talking, that you went to Moon. Can you explain that to us, how it came, and how you felt, and what you saw, and what was there?

Q: Yes. When you go to the Moon.

K- Because don't forget we promised on the 6th of June, we'll take you to the Moon. So you were the first passenger?

Q: We went to the Moon. Yes. .. On the 6th of June we went to the Moon. Because it was still the 6th of June. I think that's what you meant. (1:04). When you go to the Moon. ..

K- Explain to us how you went through, how you setup and how you went through (the system). Please explain the whole process.

Q: So this, we went to preparation of the four seats, and the first three seats and as we became more as we became more in balance with all of the fields of the universe, and we got, again able to be completely in, and be more in peace. After the fourth system at one point. That's when you are in the big system I cannot. That's when everything happens. For me, that's when the most of the magic happened. Or not magic sorry, when most of the when most of the beauty showed itself to me, and I was ready to accept what was there.

At one point, after my sister came in, and together with my sister we, we were sharing our love and our intention of peace. And as the beautiful other people also came in, we became a team. And every time a new person came in, there is a slight like a wiggling of the fields for me. For me, it's hard to pinpoint, because many things were already happening during the flight. But especially when the people came in and you realized, that there was finally balanced with four people. We were, I think, even though we were not aware of it, (1:06). or I wasn't, we were working together because .. the soul of the system is one. Please correct me if that, but I think the soul of the system is one. And we were there and at one point we were reminded of the mission by you. And this is when actually, the moment you decide to be, that is when it is.

And for me the first feeling that I had was, I felt abandoned.

K- When can you explain, what do you mean by that?

Q: At the moon, the moment..

K- How did you feel? Going from your position, you were in the room, to the position on the moon? Did you feel anything, was instantaneous? Because I asked you all, would you like to go to the Moon? Would you like to take a flight? And was that instantaneous, that moment you decided to go?

Q: That's very good one. First of all, when you asked me, I felt agreeing, agreeableness in myself. And when I had the intention, that is when it happened. So when you were talking, I was already positive about it. And when I had the intention, that is when I felt the shift in maybe, I can say, the MaGrav balance with me and, and the system.

You feel soft blanket around you (is this when the STM extends over the STP??)

So because one of the things that happens is, during the seats (moving from chair 1 to 3), you feel like a soft blanket around you, around your skin. (1:08). And the moment that I had the intention, this, this feeling of what was around me, that was touching my skin, that changed. And the emotion became abandonment. But that was just very, very shortly. And because I thought I was trying to assess what, why I felt abandoned, or who felt abandoned, or did I feel abandoned? Or was it the Moon, or was it someone from the

team. I just said, whoever or whichever soul it is, I, we were present together and we love you unconditionally. And that's when that feeling faded and that's also when the vision of the Moon became clearer for me.

Appears on Moon instantly - red sand wind on legs on the Moon (First landing)

The vision of the Moon was very sandy. It was not white, it was more beige, and red, and orange. It wasn't like a desert, but more like the old west. Like a lot of sand, but also with rocks. I didn't really try to walk with my feet on it yet. But what did happen was that the wind and the sand was, as I said, that blanket of feeling around my skin, that I had in the system. It was interacting with that on my ?? shown (shins).

K- You mean on your shoes?

Q; No, above my shoes, like down part of my legs (shins).

K- Did you were you wearing a clothing? Or was it just you as you? (1:10).

Q: No, no clothing? As I said, my feeling was already on the, I felt the change on the blanket around my skin. And I didn't really look at my clothing.

K- So you could have not be wearing something, because you could feel the sand on the skin.

Can you? How long did it take you to get there? You say instantly, in your interview.

Q: Yes, because as I said, you first brought it up to us, that is when I was agreeing with it. But I didn't set the intention yet. And when I wanted it, I realized directly the change of MaGrav environment. I should say that way,

K- In a way you're in command. You're in charge if you want to do it or not?

Q: Yeah, definitely. But that's also when I do feel difference when every time, like when there are other people you do recognize. It's not that they decide for you. Maybe it's we should say, there is a more other feelings, more other MaGrav positions, more other fields, that are also there. And you may be it's like in the background, you get some of the whiff of their fields. I don't know if it's correct.

But for me, it was different when I was alone in the room, it was complete, it was a more clear experience. It was still a clear experience when other people were there. It's just there is more to it, you. As I said, also, in my interview, the inside of my brain felt bigger. I explained to my parents yesterday, it's like when I, when you close your eyes, it's you see a black, something black or not black, but whatever you see, (1:12). that which you see, it became bigger, I closed my eyes, and it was, I saw more, it was a bigger canvas. It became 1,000 times, a million times expanded.

Galeb is Armstrong of KF - first person to land on moon

K- If I send you back to the Moon, as now we're communicating with NASA. You've become the first Armstrong in the Keshe Foundation, if you realize that. You have become the first person who has taken that leap to go to the Moon. So in a way you are our Armstrong and we have a, we want to have a better understanding.

M field felt around FEU pilots

You said you ask your you talked to your parents, how did they feel about your experience and your journey?

Q: My mother said that when she hugged me, and when I was getting closer to her, and getting away from her, there was a buzz, a magnetic, like. I felt the same when some other KS already .. like Barbu, when he stepped to me. There is like a cloud of fuzziness around him. Like, as if, it's not like you're getting shocked or electrocuted, but it's like vibrating something, that's on your skin, and you feel it from, also inside of me. I felt it when I got closer to him.

And it's funny because one of my friends who didn't go in, but he was also close to us when after he came out. He said the same thing about me and my sister. He said, without even touching us, (1:14). I feel a fuzzy, a warmth, a vibration from you. And I felt that from Barbu, and my mother said it also to me. And she said, it's the same with your sister, but a different with you. That's one of the things.

If I go a bit more emotional, my parents. For them, for my mom, it was for a while, a bit. She understood - no, let's - she accepted what we were understanding. But she was having a hard time to placing it in her knowledge and in her understanding. And as I explained more to her, she got inspired to understand more of it as well. And because my parents they also they are they follow the path of Muhammad bless name, and they know about some spiritual things that are they come with some Sufis, I should say. For them, some part of the knowledge is easier to grasp, or there's already a reference point in their own understanding. As they connect the dots and they understand more, they realize more and more what the changes are that are happening, and how fundamental the new progress is for the next step of humanity. But, of course they go with their own beautiful speed and their own way of evolving.

Highest state of Bliss ever felt

K- How did your sister feel?

Q: My sister felt I think. As I said, someone asked me after I came out, (I make it about me.) She said, she was also in like in this beautiful state of bliss. (1:16). I think someone asked me and my sister agreed when we were talking. It was the highest state of bliss that I felt, and I wasn't looking for this. My sister also said something that, everyone has even a smallest idea of what it could be, even though I just realized when you were talking before, and please correct me if it's (wrong), but maybe even the expectation of getting satisfied with the experience, is that you're receiving something. Maybe even that part of expecting to be satisfied, or whatever it is, that is expecting to receive.

I don't know, but next time I was thinking, I should, I already was from time to time. But I think the idea of being able to leave everything behind, because I definitely want to go again next time, and definitely want to go again. At the same time, I feel an obligation to everyone to develop myself in it as well, from wherever I am, whenever I am. So every

night and every time and during the day, I start to try to get back into the oneness. As I said, the system works with you, you work as one. And I felt that every time when someone enters. I shouldn't say every time, but after the experience, during parts of the day, it was like a wave. I always felt like this warm pressure, this warm expansion in my head going on. But at some parts it was stronger. And at a particular moment, I told the other two people that are around me, also my sister, (1:18). I think at this moment Barbu is going in to the system. And later I asked him, is this a time that you went in. He said yes, that's the time when I went in. Because that was a time that I felt again more in the system.

Feels connected to the system even when away from it - pressure in head warm

Every time I talk about the system, yesterday, when I was talking about the system, even when I think about it, I feel again, the pressure in my head, and my head getting warm. But it's not that I'm saying this to make anyone worried, but it's ..

K- Did you feel connected with the system?

Q: Yes. And I also say this because, I try to love, what happens and I'm very grateful that this is still a thing. There is one little thing, that sometimes gives me just a tiny bit of sadness, and that I know that this system is perfect, or this system is beyond what I can imagine as beautiful .

Can do it without the system

In a way this is like when you go to the system, when I go to Linz I compare it, like when you're on a bike with side wheels, it's easier to bike but actually you don't need the side wheels to bike but ..

K- You can do it on your own.

Q: Yeah, you can do it on your own.

Back to Moon to find Apollo Landing

K- What will be interesting as I said at the beginning of the teaching, as you are our first man on the Moon, as I call it. We have asked NASA to allow us, or let us, we can find it on our own, I'm sure most of the Knowledge Seekers have exact pinpoint accuracy, (1:20). where they said they landed Apollo. Would you like to come back and test to go and see if it's real?

Q: I'm definitely willing to give everything to make this to make this mission, that definitely.

K- What we are trying to do is, just to take this out of mysticism into a science, into a technology. So in the next few weeks, we try to expand and extend the knowledge and how we extend the knowledge, and how we extend this to the next step.

We had somebody going to the Mars. As I said to the NASA people, would you like to tell us, or any spare parts for us to take to repair for you. We speak to them, don't laugh, we speak to the NASA at the highest level, right under the top. When I tell you the

situation is. We speak with a few people in NASA, not just one. We keep them all informed in so many ways.

What will be interesting is how would any of us think, or feel, and how would humanity feel, if one of the Knowledge Seekers who decides to go to the Moon, we give them the address, if they can get there and confirm, the leftover of Apollo. What about if we give you cameras, (1:22). which if they work in that environment, to bring us pictures back.

Q: I have something, can I. If there is still is a possibility to find leftover of Apollo, since that was earthly metals, I think it will be easier for my earthly hands to bring them to the earthly dimension. Wouldn't it?

K- In a way yes, because what we say, that we can take and come back. You don't go to New York without clothing, you go for a dinner party, you go for a wedding, you take the clothing with you. So, that should be a possibility.

But we are talking two different G fields, two different environments. And what, as you know, even when you look at this picture on the screen, the left hand unit is a Material Enhancement Unit, which means we can create materials out of the energy. When you pick up the material with the dimension of your STP, or STM on the Moon, you convert it. It becomes part of your environmental MaGrav System. It's like when we put the plates in the Gans boxes, they're not in the water anymore, they're in a M field of the Nano coated Cu plate.

Developing T to bring the Apollo hammer back to earth

So, when you come back, is we have this process of what we call, Material Enhancement Unit would we be able, if say you pick a hammer up on the Moon, when you come back here, can we keep the shape of the hammer, or would we get the materials of it as a dust. (1:24). Or while you come back, we create a condition of the place you were, and we ask you to put it in a special box, and then we seal it, create that condition, that we still get a hammer. These are all need to be done, this is what then, technology needs to be developed.

But the interesting part for all of us will be is, why are we confining ourselves to Mars and Moon and other planetary system here. We have endeavored to go out beyond earth to Moon, and now we have the facility to go. What about other positions in the universe? What about we choose star, we choose a planet. We know you can go to a star, because one of the participants tells you, that she went back to the Sun and felt peace. But we go beyond this Solar System, and as Galeb said, instantaneously.

Can I ask you a question, because you said in a very simple way, it was instantaneous. How did it feel when you found yourself on the Moon so fast?

Q: That's a very. I did not feel very surprised. But I did. I was very quickly, accepted the new situation. But there was a very slight shift in my emotional balance, also in my emotions not just in my MaGrav balance of the field, what I already explained. In my emotions, (1:26). let me try to be as accurate, I felt slight happiness but like or ..

K- Achievement?

Q: That feeling wasn't that strong, but maybe that's very strongly linked and I'm not recognizing it yet. But yeah, maybe we could say that, like the slightest form of, "okay, good, now let's move on," something like that. Let's move on, as in, let's try to add to this new situation. And let's try to continue.

Saw other beings on the Moon

K- You said there were other beings with you, were you aware of who and what?

Q: It was, I should say, because at points, I thought maybe it was you, because a few times you were walking in the room. But then I also realize that, because the way the other beings looked, it was, they were darker. Like, I looked around in my surrounding, and there was like, clouds of darkness, but not darkness, it sounds very weird. But instead of a light that we see when we look at UFOs now, it looked like a dark light. Like the opposite. And that's why I thought maybe that's, but that's just the way it looked when I was looking around. But when I focused on it, it became light.

K- Did you see different lights, or was it all the same?

Q: I only focused on two. And that's when my sister and you were in the room? No, not my sister. Yeah, it was only you two, I think. If I'm correct. They were, because my sister was in a big system. And you were not. (1:28). That made it a bit for me difficult to distinguish the light? I think. But I cannot say, Oh, I saw your light. But yeah.

K- It's awareness of something three?

Q: Yeah, there were there were two distinct, like darkness's and they later turned to light when I focused on them when you two were in the room.

K- How do you feel now? What's your emotion What's your feeling?

Q: I feel excited for giving more for the future and also very honored, that I get to speak to you and to all the Knowledge Seekers here again. I'm especially, at the beginning when I started talking, the system I felt again, very present with the system. But now I feel more, as when I get out of the system. But that's a good thing. Like when I got out of the system, I was very happy and I was very beyond ecstatic, but in bliss, and that's opening up flowering in me as well.

I don't know if I if I said it in my own testimonial or when I was with my sister, but so the way I see it was, when you do soul travel, when your soul expands, but for different reasons, maybe my soul and physicality were not able to completely move on to the transmutation, or transposition, and only my soul at one point, and as I said, slowly and especially when time goes on I was in the bigger system, I started sometimes smelling a smell. It wasn't like a perfume that was in the room constantly. (1;30). It was just a smell, that was thrown at me for a second. Or, and again, I love smells, so maybe because that's the easiest way for the Soul of the Physicality (STP) to show itself to me. I don't know. It was the same with what I said about my shins, with the winds and the some dust. Maybe because I wasn't focusing on that at all. I wasn't expecting these things. At one point I was thinking, because you're saying the noise, it gives us an indication. I was thinking would it be, would it be. So I started to, I didn't want to experiment. But I started

to notice that whenever I was more in, what I call, the bliss situation, it was more of an equal sound. But I don't want to say too much about this, because I know feel ..

K- Did you feel any wind in the room when you were in the system?

Q: So again, same with the wind, it was very, not constant, like sometimes just randomly, at a random place in my body, but that's like, as if it throws a bubble at me, a bubble of wind.

K- Because some people who've been in the system, they speak about feeling a physical wind touching them.

Q: Yeah, that's the best way of saying it. It's not you're going through the wind as I have experienced on the earth, and maybe that's for the future, but it's like small instances.

K- Yeah, but there is nothing dynamic, rotating, or anything in the room. We made sure that there is no .. physical motion, movement of matter state. (1:32). The only thing is when somebody comes in you feel, or if I go in and out.

Q: Yeah, no, it's not the door, it's not. That's because you notice that wind, you also it coincides , it's, maybe you don't even notice it. But of course, when someone opens the door, the noise of the outside, it grows, and then it closes and what not. But when I said it's like a bubble of wind, at a random place in my body that was a bit different.

K- Would you go back to the Moon?

Q: Definitely. I was planning to explore all the places, that want to be explored. That there is a beautiful position for more peace with the humanity and the souls that are present. But also the Moon, and the Moon felt beautiful. Going together to the Moon felt also pretty nice.

K- Anything else you want to add?

Q: At this point, what comes to me is a question. Is two things, actually, two questions. One is, so for example, when you go to a moon, and you find or another planet and you find a rose, or a flower, or something that might be a flower to them, and you take it with you. Could it be that it becomes a rose here, but it's actually something, it doesn't look at all like a rose there.

K- It could be, because if it's a living thing, it has to accommodate itself to manifest itself here. This is what I said, (1:34). it's very interesting with.

Some pilot only wanted to change partially - remained part human like mermaid

We had this with two or three people who took that journey, and they went to places, and they don't see themselves as human complete, or partially human. We had this. So this explains a lot. But the same as we go, and if we don't want to change, we don't change. It's the same with them. If you bring a living thing, it has a soul, and that soul has to accommodate his self if he wants to manifest here,

Q: If it wants to come with ?? .

K- The way to do it, as I always say, says that, I love to show you to the others to appreciate the beauty of you. Not grabbing and running. You understand? .. Okay, I always want to show my beauty. So I'm coming with you, for you to show me to your friends, I'm a flower or whatever. You understand? And it might be totally different thing when it appears here, because he still wants to maintain its what do you call it, its life, its survival.

It was an interesting process going through with you on Tuesday. Can I ask you a question? What was the purpose of you moving the controls in different positions and conditions.

Q: The reason was, that I tried to give my understanding to the system. And I hope that maybe if I understand the better the system works, then I can give more of my understanding. And one of the ways in my understanding expanded was, especially with the controls. If you, the way it may be, this is just for me, but if you put more pressure on it. You it's actually, (1:36). if you put more pressure on the controls, the pressure from your head goes a bit away. That's one of the things that happened. Especially because there was, I also got reminded of the beautiful teachings of Mozhan Andreas, and they are very useful for everyone who wants to know. I shouldn't say very useful for everyone. They were very useful for me in trying to, trying to be more, have more understanding about the flight. They about, what the body shape looked like in the aura fields, or the magnetic gravitational fields beyond the physicality. And I tried to see how I could, how we could like expand the understanding of this interaction, so that there is more to, we can interact better with the system. That was my reason.

K- Because your moved, I've never seen anyone moving these arms, in a very systematic way. And people usually sit and hold them on their lap. With you it was more or less moving, like a weightlifting, you were pushing and positioning it in different positions. I thought what does that mean? What do they. How does it help you to do it? Or what did it help you with.

Q: So yeah, so one of the reasons I chose one of the positions was, I wanted to see, because if I stretch my arms as far as possible, that is for my physicality, a boundary of interaction. So I wanted to see how it would be in that boundary, with the system interaction with the system. And one of them was, I wanted to see if I brought them more together, or more apart. Because also, I think they were also explaining how every finger was a different, (1:38). it's like a different field of MaGrav, that it belongs to. So I was like what if I bring it closer to my STM seat at my head, or farther away? Or if I hold it from the back? What kind of different interaction would it be. Also I already know it's within me, if I just stand here in my room, it's different. So I was giving the system all of these knowledge, like, trying to give more of the knowledge of my understanding and interactions.

K- Thank you very much. Is there anything you want to add?

Q: I have endless love to you and everyone else, especially all of the souls and I'm looking forward to continue to expand the knowledge together.

K Thank you very much. Thank you very much for the journey you took. I hope I will learn more from you and other Knowledge Seekers who go through the system.

Is any other question that you want to ask Galeb or any of the participants?

R: I was wondering if he could describe a little more about that transition, both before landing on the Moon, and leaving the Moon. How was that? (1:40). A little more about the emotion, or the, that transition? What was the effect on you? And how did you achieve that transition? Was it instantaneous in the moment, or did it take a few seconds, minutes to go through that actual transition?

Q: So as I said, let me try to go step by step again. At the point that I was reminded of the mission. I was already at the point of ?? deep plasma position, or am I saying (it right), deep plasma ??

K- You're on the matter state, the system?

Q: Yeah, the last one (Chair 1), I was at the last seat, going back. So you go up (Chair 1 to 3), and then you go down (Chair 3 to 1), or progressively, and I was at the last step before leaving, and then I got reminded. So I was trying to. At that point, it may be good to know the context about me. When you're at the fourth step, so the big system (main flight unit) that's a completely different MaGrav positioning, that the soul has done at the last system (Chair 3 - STM). And at that point, when I was at the last system I was retrospectively I decided, I understand, more ready to go back to earth.

Because later (after leaving the Center), when I was in the car and I was moving around, and we were going for dinner, I just realized I had to reposition myself in a beautiful way again on planet earth. And it was different. And it's good that we have this new plasma position system. So I was I was already pretty much on, ready to be in balance with earth.

And when this Moon mission was reminded, so I was more. It is good to know, I was more in balance with earth. (1:42). And then we got reminded of it. And while Sir Keshe was speaking, I was feeling agreeableness within me. I was like, yes, this is what we came for. Of course we shouldn't. It was beautiful to go with everyone, because he made for like, we go together, we go together. That was the agreeableness.

And at the moment, he stopped talking. And that's when I wanted to set the intention. The moment I said, I didn't even say, I didn't even put it into words with thoughts. I said, it was like, I wanted it, like the desire of the desire, started flaming within me. And it was just a spark. It was the first spark of the desire. And then the instant, first of all, what happened was, again, I felt more within the stronger fields, because, that's probably because someone else was in the big system. I think at that point, that was my sister. She was in the big system. So I explained it as being, because we were again connected with each other for the mission. It was ..

The sister also went to Moon - first woman on Moon

K- Can I ask you, did she tell you. I forgot to ask her. Did she go to the Moon?

Q; Yeah, for her. She did. She definitely said, I went to the Moon then. And after she went to the Moon with. I didn't ask her too much about it, I should ask her again. One of the things that she did say was, the Moon. She felt not alone at all on the Moon. She felt very, very connected with everyone at the Moon.

That was very contrast, like a beautiful contrast to my experience, because I felt in the first instance not good there. (1:44). And something else that she said was, she also went further. So she didn't stay too long at the moon. Maybe during our mission she did, she felt very, very, very much a desire to go further, and go to Mars, and go to Saturn.

K- Did she make that? I don't know, because the recording is blank. She most probably has said it on it.

Q; Yes, yes, she did.

K- The recording what is there, there is no sound on it.

Q: She did.

K- We've got to get her, and discuss it more and understand. So you're the first brother and sister on the Moon.

Q: Yes.

K- Rick has there ever been a woman to the Moon with NASA operation?

R: I don't think so.

K- So we have the first woman on the moon with the Keshe Foundation process.

Sacredness of Moon in Islamic world - permission from Source

What is very interesting. What is very interesting for me, which I think, if you don't mind, Galeb, I come and explain it, because you brought it up yourself. You come from the Islamic world.

Q; Yes.

K- And Islamic world, Moon is sacrosanct, is holy. And is one of the biggest problems of going to the moon for the ... How do you feel that you achieve this?

Q: How do I feel?

K- As a Muslim, as a Muslim person with the respect and honor Moon is carried within Islamic society?

Q; If I was to explain it with the way, that more Muslims would easier connect to my explanation, is that, (1:46). everything happens with the permission of the Source. And if I have, if there is a sincere wish, and the Source accepts this wish, this is your you're given right. So we had the wish to go. There was no ill intent. We had respect for all the souls, and we were accepted. That's, I think, a way to put it. Because the sacredness of the Moon is less pronounced within different sects of Islam. Yeah, that's the point. Yeah. But that still doesn't take away from, it's a very valid way of questioning this.

K- It's not questioning, it's enlightening to keep the respect. Because I come from the same background, and I remember the day when he was announced man has landed on the moon. My immediate family, my great Aunts coming to the house, and saying that

they are trying to mess up with the Islamic world. They say they went to the Moon, it's impossibility.

But on the other hand, in a way, where you come in, and your sister, it was very respectful to see your sister in Islamic clothing, in a beautifully dressed, and serenity she carries with her and you the same. Does the religion counts in this game of traveling in the space?

Q: Well, I would say, religion is. A religion is just a part that came later. Because it's about faith, and it's about following the path of what all the prophets came to bring to us was the one, the same message. (1:48). So it doesn't matter which name, which perspective, you name, because as you always remind us, it's about doing good, speaking good, and thinking good. And even with, if I say for example, an example of our beautiful Prophet Muhammad peace be upon him, that he said, if something happens, and if you don't like it, try to change it with your hand. And if you cannot change it with your hand, try to change it with your mouth, and if you cannot change your mouth, try to think, try to add to the situation with thinking good thoughts about. So I feel that this is one of the, what they saying, it's true and true the same message, and we already, I already believe that I knew that. But just as a reminder for everyone else who. This is the same.

K- I'm sure we we'll see more and we hear more, and more people, who the Moon become not fashionable to fly to, very soon. As more and more people do, and you see them going. It'll be nice if you ask your sister to make a recording of her thing, because we lost it in the microphone being, whatever happened to it? And if you could let us have it, that we can add to the archive.

Q: Yes, I'll do my best to make a beautiful addition

K- Thank you very much. It was a pleasure to see you and your sister. It was a beautiful time to travel with your soul.

Are there any other questions for Galeb.

K- Okay, (1:50). thank you very much Galeb and I wish you all the best and I hope we'll see you again. Maybe I get a piece of hammer or whatever next time you go to the Moon whatever the Americans left behind.

Italians want to party on the Moon

Q; Can we make a music concert on the Moon, or make a party?

K- Is that Stephanie from Italy? Yes. What do you expect from the Italians.

.. Don't forget to bring your bottle of wine with you. We don't know. You have to try. You have to wait till we extend the fields into the whole what we call, flight room.

We had a very interesting experience. They think it's me, but not only me. Sometimes it's three of us from Keshe Foundation. Sometimes one, or sometimes two of us in the room. People don't know who comes and goes, unless they look. We come to assess, to see what the position is. We have one person continuously in watching, that nobody touches anything, nothing goes wrong, if any system fails. And ... training for the next sessions. And one of us comes and goes quite often.

First time we could feel the fields about 10 centimeter from the system, at the beginning of the day. And then, in the latter part of the day, we could feel the fields very strong, when we came into the building. You feel it, it's just like a whack, hits you with a hammer. (1:52).

The EU communicate with each other

And then one of us in the room, because we continuously, people can't hear us, but we whisper to each other, what we see, what needs to be done. He says, I get these patches up buzzing in my head, and it just goes away. And it's like a pressure buzz, magnetic field buzz. And then we listen to the machine, what the machine says. How they react, how they, how they pronounce, or show the field strength.

From the experience we had in Sanya, (China) testing two systems, we have a very, very clear system, understanding. When we run the systems, hopefully, because we have to complete the system, before we .. initiate the other one to come in. As is getting now adjusted, what you call it, set to go with the first system. You hear it, you hear a noise of communication, and it's very vocal, you hear the system noise. It's like they're talking to each other.

Over 150 reactors in flight room - reactors have never been seen before

We expect this to happen between your system, you've got to realize something very, very important, in a way, is now we run into 100 reactors in that room, plus, maybe over 150 reactors in that room. These are a special reactors never seen in public, these are not something you ever seen. These are not in public, we don't release it. But what is interesting, if you go back to the experience of 129, we had 129 Tesla, different system.

In this system, (1:54). when we put the two systems in, plus the head units, the Vision units, we have a massive cosmic plasmatic fields. It's not earthly fields. We have no system to measure it. But we feel the forces of it, as it was said, it's like the wind.

Creating massive cosmic fields - suitable to every created thing in Universe

So in next couple of weeks, in next coming time, we expect to create a massive cosmic field, which suits every created things in the universe. I designed it this way from the beginning.

Machines out - transport large number of people same time

In a way, you don't need to come into the room, machine. We can take the machines out. And we go into the satellite system, as we call it. And you can travel, you come in maybe 10 - 20 of you, all the Italians are renting a bus, we've been told they're coming in the busload, and you get in the room together, and we'll see where you go, how it goes. Bring your wine, bring your .. guitar and see if you can have a party on the Moon.

This is not out of reach. It's something technology for it. the facility has been made for it. Stephanie tells me the Italians are getting a bus to come. Don't forget your wine and cheese. Don't forget your spaghetti, and let's see if we can rock you on the moon. We don't let you to play in the building. But bring whatever noise instrument you like to rock on the Moon, and see if we can get you there.

Now it's not a dream. (1:56). It's for us to be able to transport, transmute many, many souls at the same time. And I think it can be done. Maybe we get half of you there, and the other half will end up on the other side of the Moon, the other half go to Jupiter and Mars and come back. You know Italians can't keep in one place.

Germans came with a very much serenity, you know German mentality precise everything and we have them tomorrow, and they have them two days after. We need the noisy Italians, unruly lot. And let's see how we can accommodate you. And if we can get you there.

We have tried now with four people. Galeb was one of the 4 of them. So it can be done. Now we want to know if we can land you all together in one place on the Moon. Please don't bring the whole base of the Apollo with you back, leave it there, just bring a small piece if you go there. And leave the American flag behind, because they've done a lot of hard work to put it there. Maybe you can put the Italian flag next to it. When you come bring Italian flag, and see if we can take your Italian flag to the Moon and plant it there, as we've been there, as it is tradition on earth.

There is no limitation it's our technicians, which have to create that condition. We see possibility. When the system was set, when I went into the what I call, flight zone, it's quite possible, that many of you will experience the same thing at the same time. Give us couple of weeks, the room, the system works all the time. Even when we switch off the system, system is still works, (1:58). You can always have the connections with it. And Italians please get your wine sorted out, and cheese and olives. And let's see if we can take you through that transmutation and transportation.

R: Well the cheese might go bad by the time NASA gets there, you can, you might want to wait a little bit for the party, because they're planning on sending a woman to the Moon in 2024.

K- We already been in 2022

R: Yep, that's why if you have a party, they're not going to be late. ... cheese will be moldy.

K- I tease the NASA mission control people, because we have a direct line with them. They literally laugh their heads with us. The video yesterday shocked them. That the video yesterday went to number of NASA management team and the rest. It has caused a big concern with them. And we'll see.

Bring back a piece of Apollo - that will change the game

I think when we bring back, we can do, if it's possible. If our knowledge reaches that point, a piece of Apollo, if Apollo has been to the Moon, and give it to them to analyze it themselves, and confirm this is the piece. That will bring a change in the game. It can be done.

As I said, EU, Material EU, which we have is part of the structure of this system. So it's possible, quite possible. But you have to tell us when you got it, you can tell us, I've got the hammer in my hand on the Moon. (2:00). Because you're physically still partially with us, through D of the soul. And then we have to tell you exactly how to behave when you bring it in.

It has to be brought in this specific way, that it manifests itself in a matter estate. If it comes in, in any other way, it will burn out, not burn out, it'll be dissolved in the fields of the plasmatic fields, as who was it yesterday said this. It's like a sugar in the water, you dissolve. We will like to keep the integrity of it. And it'd be nice if he says, Made in USA and they can comply with composition. If we be able to do that, it will change the space game.

Manifest Soul of Christ in system - most important

Because at the moment is just a talk, I've been there. Now one of our subsequent steps in next few weeks is, to get the Christians to confirm to us, if they've seen the Christ. That's one of the most important thing for us. And then the next step comes, if we can manifest the Soul of Christ in the system. We cannot give it physicality. That's for sure. But let him speak, that is 100% possible, not 99%. That's 100% possible.

And I promise you that fish tank. The fish tank is made, it's in Linz. Let's see. If you can ask him to be there, till the Pope arrives, and see if he accepts his master. These are reality now, the systems are fully operational. (2:02). We have to fine tune.

If you are from Middle East, Palestine area, descent, you are Armenian, your Palestinians, all Palestinians, the Jews in the old part, you have to be, we got to run, we can bring you in. We might through your descendents, see if there was a witness to the crucifixion, to get to see it, the full explanation of it. But bringing the Soul of Christ, it should be as easy as ABC. Now we've seen how the system works.

Others are present - during flight

You got to understand all the people you've seen on the interviews, even Galeb speaks about others being present. Now it's for you to ask, who the soul of, who are you? Or ask from the souls, can you show me the soul of Christ. It's as easy as ABC? And that knowledge stays with us.

Q: .. Why is the so called Christ energy important for the whole process? Since religions are going to disappear anyway?

K- Which process, what process? For us you mean?

R: I think, yeah, well, (2:04). many processes .. she says, you mentioned Christ very often and we are messiahs already. So why is religious connotation there?

Christianity most abused system - bring Christ to tell truth - from him

K- Yeah, because it closes the abuse of the Soul of the Man by Christianity. It's the most abused system. Many, many people have been enslaved to it. And we'll bring the soul of the kings. We'll bring the soul of rulers who we want to know how they did, why they did. I told you, the man history will be rewritten many, many times I referred to this.

We'll hear it from the history makers. We'll bring the whole past of the, past to the present, through the souls. We are not going back to the future. We are bringing the souls which made that future at that time. It's, we have to train, our people has to go through the system, how, and where, and what, and then we'll get the answers. We'll finance it and we'll find solutions to many, many things.

One of my wishes is to bring Tesla back, and go through him, with him, to understanding of the totality of his mind. Tesla did and worked maybe 10% of what he had with him, he wanted to. He had a marvelous mindset.

Any other question

Of the Prophets why Christ - he is only one who did not kill - did other things

K- Let me. I have to tell you something, .. why I chose the Christ, because he's one of the most innocents, of all the Messengers, (2:06). compared to what the rest of them. He did not put his hand to kill. He never raised the sword, and that's the reason.

The whole purpose of us, and the whole purpose of the KF and the work we do, is to get man away from killing. Christ is the only prophet, which did not dirty his hand with murder. He did everything else wrong, but he didn't kill.

Moses created a bloodbath. You know what Muhammad did in the Islamic world and the Iranian nation. We know Buddha in a way, in a diverse way in the background, did a lot of other works, which was not public. We know from the present prophets, which we call, Messengers, which we run to. This is, Christ is the only one, which never committed the murder crime. And that's why.

Any other question you have from Galeb, or his talk. (2:08).

Q: Dr. Gatua ... Thank you very much for what you have brought, all the knowledge, the new science. And it's enormous, it's not even realized yet. But from my brief, thinking about what you have brought, and what it means to this world, and the universe, it's definitely a new era. So we now know of the Common Era, the Christian era, or whatever you call it, either before, or current, or common. So since you have changed that completely, and perhaps it would be best for you, to be the one to name the new era. So what are we going to call the new era? That is the question.

Not a new Era - knowledge always existed - only man opens to it

K- There is no new era, no new era. It's a new cycle in the science. It's a new cycle in understanding the process of creation. Nobody can claim it, it's been there from the time of creation. Now we understand it. You know, if you've never had orange, and somebody gives you an orange for the first time, it doesn't mean it's just been created. Just because you never had it before. There is no new era. When you, when you call it a new, and you're joining the Universal Community to be part of, there is nothing new. It's just new to you, but it existed all the time.

So it's not a new era. It's just for us, we understand a little bit more of creation. And we haven't even started understanding all of it. Once you start claiming that kind of thing, you become too arrogant and that's the beginning of the end.

There is, we now, we start unraveling the knowledge, (2:10). which already exists, for us. Because up to now we've seen it, but we never understood it. We are like those who thought the Earth is the center of the universe. And the first guy who said, no, they hung him in Pisa. Now we are at least more open minded, we don't put them on .. a noose. Even though a lot of religious leaders would like to see my neck on the noose, because big percent of the job lost - shop close.

This is the beginning of understanding for us as a human race, the knowledge, which already exists in the universe. So it's not a new era. It's just an addition to what we know. We had to get to know the magnetic field, we have to get to know the communication the way it is, it's not shouting over the hills and drumming. Now we can do a telephone, satellites, and now we can use the technology to be that point.

Expand the soul - connect to the system without being there

In the near future, if you understand the systems, and you manage to expand your souls, as many of the people you've seen today or yesterday in talks. They can connect to the system without being there. So now you have yourself a line, you have your, what I call, a central point. The more systems we make the more they connect. We create that umbrella, that physical condition to expand. There's nothing new, but we just found, we just arrived.

As you know, it reminds me of the McDonald and Moscow, when they opened the first McDonald's in Moscow, when during the communist time. There was, I went two or three times to get a McDonalds, it was impossibility, unless you paid somebody who stayed in the line for 24 hours, you bought his spot. There was people just hanging around, joining the queue, (2:12). so that they could sell a spot to somebody else. The McDonald's you could buy it from any shop, anywhere in any of the major cities around the world, but it was new to Moscow. And everybody was queuing up around the block for 24 hours more or less, to get served. They're serving 1,000 Big Mac an hour, just to get rid of people. So it's not new, it's the same thing.

Funds to come in for new Institutes to teach T

The knowledge is there. And now we understand it, we understand a small part of it, which I hope will bring us the big dividend, in most of it. There is, as many of you helped us to set up and donate it, and loaned us the funds to set up the new factories, and the new process for it. Once this, the funds arrives, and we get the things moving. We're not going to, as I said, do the process of building. We're going to build new structures with the new technology.

Elevating Soul to physical boundary - sorts out most of physical problems

We are not going to clean up CO2, we're not going to find a cure for something, or something else. Why do we have to find a cure, to work for everything, when we know by elevation of the soul, going to the boundary of the physicality, most of the problems of the man in the physical dimension can be sorted. We've seen it.

We don't want to speak about the health application of the flight system. But I speak to the people who come out of the room. I have seen, I have literally heard people who came in. They didn't come for flight. The lady said, I'm not interested to fly, where am I going to go? Well, I was interested in this, and in this, in me. And I have achieved what I came here for. Or at least I see the beginning of the opening of the doors. (2:14).

How are we going to find a new Gans for such and such a thing? Or are we going through the elevation of the soul, that cleanses, not cleanses, but energizes the whole body, we create a new condition. With the conditions you have, with the new fields, they wouldn't exist? The sugar is in the bottom of the glass in the cold water. You heat up the cold water, the sugar disappears.

The knowledge is - the acceptance of the strength of the fields - that's all

That's all this knowledge is, the strength of the fields, and acceptance of it. We are all in it. All of you participated to bring this in. And we are all in it, and it's the next step on it. And when we did the flight system, last week, we didn't hide, or we did something people going to Linz, there is something hidden somewhere we can teach the soul. It's on the internet. It's available to all of you.

Unconditional Love - Giving - we are the guardians not the owners

This is what it is, unconditional love, giving without condition. I could make billions out of the systems and technologies. Why? I take nothing with me. But in helping all of us. We participated especially in the last leg of it. Now when it comes and receive the funds, which are supposed to come in, to get us over to elevating you, for the new sites, for the new technology. We are guardians, we are not the owners.

And this is the next step. I hope with all of us and people in China, in Iran, and everything else, we bring the thing through, but don't forget, ask yourself a question. If you go into the system, and it's getting better, (2:16). and you start traveling, the first time was exciting, you didn't know what you're doing. But now you know where you're going, what you want to do.

90% will not come back to earth

Would you come back to Earth? I promise you 90% of the people going through the space travel will never come back. Because they will find peace, they will find what they need, they don't need to worry about the food tomorrow, clothing today, the pain, the illnesses and the rest of it.

It'll be good to come back home, as many of you want to go home. But home will be something to visit and go. I don't have time to stay, it too much hardship. I have to wear winter clothes, I have to wear summer clothes, I have to look for the water, and I have all the problems on top of me.

So the process is ongoing. And we're going to step up evolution in science. Now it's not anymore Microsoft, or General Electric, or Toyota, it's Keshe Foundation. And it's the totality of us who are doing it. This is the beauty of the new science, I don't own it, I'm just a messenger I deliver it. And at the same time, I make sure that systems for it, to deliver it are there, but you have to educate people to see it.

You see it's, when you listen to Galeb, it's just, you look at the voice, we look at the different dimensions of it. He says, he feels somebody come into the room. He feels the presence. He doesn't need to open his eyes to see. Because the three other people, two people, and me going in and out. (2:18). He feels the presence.

He felt the presence when the first part of the couple came in. He says, he didn't feel balanced. And I can tell you why he didn't feel balanced. Because what the character was, who was the person who went in. Everybody in the room who were there, and after had the same feeling about this guy. The same emotion. It wasn't just Galeb, he felt something unbalanced. This was the character of gentleman.

And we are watching, we are observing. It's very much like going back to Rick's magnet table, we put another magnet in, everybody adjusts to. Now that magnet is a ball of the

soul. .. This brings a lot of understanding. You just listen to what they say. We analyze, because this gives us indication, the souls are sensitive to movement of plasma in the room. How much of it we can cover with ourselves, that we don't interfere, when we come and go. And how much of it is, when we add a new magnet into the table? That's all it is.

And how one soul is a taker. It's amazing how we analyze the team, the group came, they all know each other. They're all friends. But in that process of friendship, we could map out. I could because nobody ?? I could map out who in the group is what. And then I came out, and I watched them. I see them in the dimension of the Soul and what they say and I see them in the D of when they're out in the life condition. (2:20).

I passed through, but I observe everything, how they stand, how they're isolated, how they're treated, how everything is, how they try to influence, that they are correct and do something that I want you to say. That's why if you hear Galeb, and his sister, the first time they talk is when they sit in front of the camera. If you listened to yesterdays program. It's us to understand to accommodate. We are learning. There is no new technology. It's just we understand a little bit of the technology of the Creator.

Q: Thank you very much Mr. Keshe for bringing us that, to that stage of new understanding and for your beautiful answer to my question. Now I have another question. Going through the World News this Morning. I didn't see anything about the new flight system, or anything about Keshe Foundation for example.

K- You will never hear anything about us .. . It's impossibilities.

Q: Why do they ??

K- There is there is a ban There is a ban by the fox organization, which more or less controls 89% of the world news on Keshe Foundation. Fox News controls everything. And if they don't want you do, you don't know. And if they want to fabricate, everything we see with the war in Ukraine, they fabricate it and just put that out, because this is what they want. And just because people hear that part, they believe in it.

Put it this way. We know how the technology works. They cannot control the internet, (2:22). and we see how many of us are, and how many people around the world work, or do, or have to do with the technology. The most beautiful thing is, in a very short time, the Fox News will be foxing it, because when the souls communicate, who needs internet, who needs television, who needs to listen to the news, which is all lies, and fakes. As simple as that.

And we are in such a beautiful time with the development of technology, that in a way, who cares? Let us bring the technology and spend the energy in going forward. Let's see.

We're not looking for confirmation of news. We're looking for confirmation of how much technology we can bring out, that it brings that change.

There is a total ban, since 2012, on Keshe Foundation, no news articles, no newspapers, nothing, except if they create a negative. And they put it only on the internet, but they can't put it on paper. So who cares?

The correct code to trip, with hundreds of people are coming to go through the trip. The next six months, 12 months with the next step will be, what we do. Do you care if it's in the Fox News? when you can come from Kenya to Linz, and be here for lunch and go back? Does it make any difference to anyone, except you, that you can do it?

Q: ... I don't care if it's in the news or not. I was just wondering what ..

K- No, we don't care. We don't have anything. We don't care, (2:24). because we have established a new structure and the people who want to be around it. And you will see now that we have put this unit out, we get people coming in, and we see regular people coming in, and we can do this. You will see the change on the programming in internet. How people will come, and how it will change. But we are not there looking for a change. I didn't come here to be famous today and go.

I have come to do the total change, that it last thousands of years, and man never killed again, and he never does what he has done up to now. That's all.

Q: Do you want to tell us in the background, what the world, or the government's, their reaction, their reactions? What are they saying? And thank you very much.

K- We'll tell you in about four to six weeks time. There's a lot happening in next four to six weeks. And then you will see. We heard what they do. We heard what they say. We've seen the process, how they are, but it.. It will bring in, why we'll bring in what the government say is, once we complete the process of bringing you from Kenya to Austria, instantaneously, government have to react. Can a man from Kenya come without us knowing?

When we fly you from here, and you sit in the White House, in the Oval Office in front of the president, while he is having his lunch. Who's this guy here. It becomes like the queen. If you remember a few years ago, somebody out of nowhere appeared in the Queens bedroom. And nobody knew that the Queen eats out of Tupperware. (2:26). When they arrested him. They brought him out, and he said I was in the room when she was having breakfast, she eats our of Tupperware. I wonder how many of you will come and say what the President was eating in the Oval Office. You don't need permission.

That will be the next step, then you are, then they will decide what to do with it. At the moment it's people talking. As I said to NASA, show us a hammer when you bring objects, that we can get it confirmed. When you can do things. We have to complete our systems, our systems are not complete, because it takes time. Our people have to understand, they have to develop systems to make the system. Then it's a different ball game.

Q: Thank you very much Mr. Keshe. looking forward to living in peace, the peace that your technology brings is amazing. And moving forward to a peaceful world. Thank you.

K- It will be amazing to see. Thank you very much, Rick. So we call it a day. We already had a four hour session yesterday.

R: Yes, sure.

K- Thank you very much for being here. And hopefully, in next the few weeks, we'll see more, we add more. And we'll see how it comes.

Please, I repeat, because we've seen it. Do not come to the Linz, unless you're accepted, and you have the time. Because the doors are kept locked, because of the way we work will not be the same. And some people say, "Oh, I come and camp outside, you can camp outside for 20 years. Go to the booking, get your time and come in. Thank you very much.

And hopefully we see you on Saturday. If any of the people who go into the system, want to make any videos and report in.
