

#### **44th Knowledge Seekers Workshop Jan 8 2015**

A council of 12, core peace team, on soul level not physical level, not disciples, they have no right to speak physically, only respond through soul, Temple of man will be in his heart, no temple building, if they talk to you it not from the soul but the man, this way can't get corrupted, educating man to be independent in the Space, problem in man lack of confidence in his own existence, according to a mans intelligence and openness to his own shortcomings, can get accredited Masters degree from teachings of keshe foundation, Keshe can commercialize new discoveries immediately, knowledge has to be free, no patents, salaries across world Keshe Foundation will be fixed,

How matter is suddenly created in the Plasma, Amino Acid strength makes it visible, we don't see all the systems in the Solar System, but we can't detect them, all mans system are for electronics not the emotional part, magnetically is physical, gravitational is emotional, Matter can't replicate itself, when it comes into Gans state it has intelligence, decision making, can replicate itself, most planets stars vertical axis, Earth is slightly tilted change pressure on it, change direction of flows, different way to control Plasma for speeds, Once release technology will enforce peace, Reactor with 2 Gans CuO CO<sub>2</sub> acts like the eye, how eye sees light, water like water in eye, Questions: (1:20), have only part of the picture of star formation, need to get balance, balance comes in structure, medicine has to develop tool to measure the MagGrav fields of cells, in kindergarten, need full knowledge of what is electrical, negative current is magnetic, positive is gravitational, all the people with reactor are sitting on 50 watt power supply but blind to it, The reactor descending 1 mm at a time over a week, how much energy to descend where comes from?, Whole electrical theory is missing big parts, Tesla didn't understand Plasma, In power generation only using a fraction of available power but scientists don't understand, The skin is like aluminum foil between 2 Gans, release huge amounts of current unknowingly dangerous, How leaf on tree works, feel leaf feel fat, that's the energy, plants use CO<sub>2</sub> as a magnet to get the amino acid, 80% of energy comes through the skin, we are reused energy systems, How are we all connected -- "I created man in the image of myself" ( keshe is channeling), Earth is place to practice before going to space, departure time is coming close, all the resources used for military to put into space program to save planet, Personal defense technology released after Peace agreement, there are more states then Gans but too soon to disclose, USA and Britain stole Iran's through misinformation, Nothing has ever been stolen, taken out of this planet from ET's, Gans is another star that gives energy out, "thy shall not steal" ... "WE" have brought in more then we have ever taken" (Keshe talking as an ET??), but man not ready for knowledge, from March Russia only take gold for oil, don't accept dollar, Road map for peace to avoid trouble, dollar is most bankrupt, bubble has burst, (2:30)

Finding new life forms in China and Japan, nano Structured Fe, icebergs and sea water .. how life formed. Fe goes to Blood. Keshe has box in lab (4 years), keep in ready Universal condition to form life, the material you add has to be in Nano State. Have to mix like wind on Ocean, amino acid with Nano metal (Fe, Mg, etc..) Can create any material on earth in this box. 2:45 The "old Guard" (professors) will protest and stop progress. Animals live in areas by North or South pole of Mag field. Understand conditions you create, you should have diamonds at bottom of CO<sub>2</sub> boxes. Looking at it from Matter point of view. Don't just look at end product. Body creates the condition to make different cells from same material. Copper plates are not pure, the impurities give

you different material. Pile different gans on top of each other and measure the plasma flow, then you'll understand working of brain or heart, etc.. CREATE CONDITIONS... To serve humanity. Keshe can't do all of it, need everyone to contribute. Moving to South Italy to start new University. Come with expectation to GIVE, then it will succeed. Full support of Italian authorities. Governments want to take over Keshe, but its up to you to keep it. (Threat to Governments, "we know how to give heart attacks and brain hemorrhages, we don't kill you. Don't try to stop the Foundation). "I will not let this technology die". Wife said, not to speak like this.
