

45th Knowledge Seekers Workshop Jan 15 2015

Moved to S Italy, at New Spaceship Institute, Man uses packets of Energy by eating other beings, this has to stop if want to go into space, energy from CO₂, Biggest problem of Earth is contamination of Environment by fossil fuels. Adding of CO₂ to fuels to clean up cities, but you get a solid particle on the ground. On this planet you have evolution, can't change mind from outside.

Armand used Nano coated wires as connector wires in CO₂ boxes, gets so much more Amino Acid. How to achieve flight, what is missing in flight. Cannot contain plasma in a matter container and attain flight. Get plastic tube, nano coat plastic, use to connect to reactor ... this will move away from motors for rotation.

Walls of Blood vessels is not matter but a Gans state. According to Mag state they allow nutrition's to pass. When everyone gets technology no one can abuse another. Use CO₂ Gans for energy instead of Fuel. If added to gas, reduce fuel consumption 70 - 80%. Have to get the ratio correct. Collect what comes out exhaust pipe, can even put it back into tank becomes stronger. Have to wash Gans from salt.

Every material turned into a Gans is a star, full of Energy. Institute will measure and research CO₂ Gans as a food. How to use system to influence humans to forget the "war", to work for Peace. Lot of schizophrenics criticism on internet. Add CO₂ to paints don't need thermo to heat house. Is CO₂ Gans dangerous? Test it and let everybody else know. Fear put into man for control. Your body has salt, contains nano material in form of Gans of CO₂, Why should plasma of matter that you eat drink or breathe hurt you. When you eat a leaf, you are eating Gans of CO₂. You do not need to eat the plant to get the energy. Life starts when it (Amino Acid, fat layer) links up with an element. In so many ways even the Gans has a soul. Own entity. even atom has soul, it can hold on to its own structure, When you consume Gans, it does not destroy it. You collect what you're able to receive. Some top scientists around the world are willing join Foundation, USA has been offered. Start mixing Gans material in the materials themselves, then don't need much energy. Can paint Gans back on the wires, get super conductors at room temperature. Armand dried the Gans. Gans beer? We don't yet have a tool that can measure both gravitational and magnetic fields. At moment we only measure current flow of electron. Need new systems to measure.

PAIN:

Our aura expands the length of the Universe. In a way we feel each others pain, but our systems only register what is inside us. We have become so selfish, we only want to feel our own pain and not others. We have chosen to ignore others pain.

Keshe will show how to make Nano materials without caustic, natural way, will show in the future. Nothing sticks to Nano layers. Your body does it itself. It's a weapon technology if we show you now, can be abused. Third Reich still active in Austria and Germany, carry on what did before in different name. Chinese are commercializing on basis of Foundation, sharing the technology. No fear of sharing knowledge. Professors and doctors biggest block to themselves. Have found a solution to Chemo side effects. (1:59:00) Gans to reduce addictions, under trials. In first year of University they will teach everything, then to specialize. The CANCER cells from the beginning are already in the other organs, but through pain management the body masks the cancer until it reaches saturation point, then they say it has spread, but actually it was already there. Addiction to love, can Gans cure. (joke), elevate love to soul level and not use as a

weapon, to give and withdraw. What is love: "giving from your soul without expectation and freely". How to measure love, can measure through their blood. (7th Health Teaching on Heart), Blood feeds the emotional part of the man. You can measure even who you will be in love with... by MagGrav fields in blood of persons match. Emotional part of relationship is the man, the physical part the woman, man gives the idea to the woman and she makes it her own. Keshe doesn't believe in reincarnation in the totality, even though we are part of bigger body of Universe. When we finish with this club we join another club. Impossible to bring two cells back together again. The soul remains but physicality changes. All information is in RNA of Amino Acid which is consumed, worm ate man, bird ate worm, etc.. all information there. Soul collect and make a master soul, but can't differentiate which soul it came from. The RNA from the parents are merged into the child, but go back only to the point where they have a common Mother. It's why you see diseases when families inter-marry to close to common ancestor. Nasa says need to have 240 different races to have good gene bank in space. (Did Noah come with 240 ??) Its simultaneous different and yet one at same time. Who carries Soul, no one, soul is independent outside physicality. Soul have different levels of development. God will always have a partner. Individuality comes from Totality not from singleness. Core Team, 12 individuals, ChemTrials if you add CO2 into fuel they go back into CO2, Positioning of MagGrav field to find location, Do not fear CO2 Gans it is part of your life now, experiment.
