

49th Knowledge Seekers Workshop Feb 12 2015

Starship formation, reactors moved 6 cm over night, weighs 6 kg, 2 grams of Gans move it. Moving to find its own balance. Has been in this position for 8 weeks. (30min). They are not measuring amounts of Gans, Nature works by conditions and what is available.

What are ratios?; CuO is physical side of human or planet, CO₂ is emotional side, CH₃ is energy supplier. When emotional pressure comes in you get cholesterol, same happens in reactors, cancers created the same way. Acupuncture needles and nano coating. When needle in body, body is a vacuum condition, the metal behaves as a Gans state conductivity state. Eradication of cancer in body in minutes, next step in learning is MG field strengths, this determines what the lymph produces together with neural. How conversion takes place. Body is model for reactors. On the basis of "Twinty". The reactors will be all one material Gans. Whole of Energy transfer in a Plasmatic state. One G is created on the surface of the ball. Moving to total MG field.

EGG film under sea (1:05). The yoke is very much like the earth and the white the atmosphere. When craft comes out of water, don't get the waves because mag field attractions. Space crafts are opposite the aircraft, MG field open up in front, no friction. Mike had idea of winning lotto for Technology, Keshe, "Maybe we don't need it, may be detrimental, must come through the man." This is 3rd time this Technology attempted to give to man, pyramids are all around the world, mystery was taught to man thousands of years ago. This is not the first time man been in space to see earth from space. When man moved out from East Africa towards Egypt, he was shown at that time the technology. Then man was spread out around the earth with the technology. Crossed the ocean through "magic touch", Megalithic around the earth at same time by the "Guardians", for reasons of survival of race. You do not see pyramids in earthquake zones. Rituals were used to hide knowledge, still seen in the ruins. You will find the "star-formation" among the writings near the pyramids, as the tools to build them, and maps that are 30,000 years old. Peace is the cornerstone of technology. Kingship time is over, process started. Knowledge is increasing to the masses. (1:35). Area 51, but contact with man has never been interrupted. Man is ready to join Universal community. When you go to the seeds of emotional man you will get all the knowledge. The prophets taught the knowledge of the emotions but not the science, now its being combined. First time man was taught in understanding of emotions, not in words.

Mike, made some pyramids out of copper tape. Wife said he comes off as a know it all. He started a blog with Keshe info, but people couldn't understand, he was tired of all the secrets. (1:57). Moving objects from point a to point b. Is an electron info unique to individual? Keshe, with info of 1 RNA can create body of man, don't need to carry the man across space, just one RNA and recreate body, in a drop of blood, it carries both physical and emotional. Keep a genetic bank in case of disaster, then can replicate it somewhere else. All beings have RNA, that is your recording (how to replicate). Keshe admits he's an alien, without their help we wouldn't have achieved what we have. (2:08) Man is a creation of the conditions of this environment, he was not brought here from another planet. There are people here from other planets because they found an environment in which they could live. The Universe is like a neutron division to Proton and electron, or supernova. The Universe can expand as long as there is room to expand and the give and take of other Universes, balancing. Fusion is another fallacy of man. Peace in Ukraine announced by BBC. (2:28) Experiment drew up by Mike, creating a

plasma ball between two magnets. 310 Nano coated tubes and wires wrapped around the Gans reactor, can produce MWatts of power. You control it by what you put in, not other way around. The central Core Gans must be homogeneous, that's where Fukoshima and Tritium come in. Doesn't need to be spinning. IMPORTANT!! This is how the stars work. Don't need high voltage to create Plasma when you have Nano coating. Helix vortex from one end to another release Energy, RNA helix, vortex and helix at same time, get MG energy in huge amounts. Tesla: loneness is the requirement for opening the creativeness. (3:42) "Inspiration and intellect comes when the emotional part interacts with the physical part at the point of purity. You add to your intellect, get inspired when you add to your emotional strength, which is your blood circulation, finds balance with your physicality at the level of your comfort. When you reach that point you add to the strength of your soul." Inspiration comes when your emotion is in balance with your physicality. Something like autism, repeating something till its comes into balance, how you get enlightened. Once its correct and in balance its added to RNA and to DNA, that is how transfer the knowledge through the genes. When the inspiration comes and it's added to the Essence, that's why you get the "prophet of God". This time you receive the Totality so there's no limit to the inspiration.
